watercourses; and such corporation has also power to transport, as a common carrier, persons or property on any railroad, or other road, or on any canal, or aqueduct, constructed or purchased by it, taking reasonable compensation. If necessary in the construction of such canals, aqueducts, railways, tramways, tunnels, underground passages, or roads, the corporation has power to condemn lands, or an interest or easement therein, or thereunder private property, for a way and right of way, in the mode prescribed by law, such way and right of way not exceeding one hundred feet in width throughout the whole length of such canal, aqueduct, railway, tramway, tunnel, underground passage, or road; and without the consent of the owner of the land, the same must not be constructed through the yard, garden, orchard, stable-lot, gin-house, barn, or through the curtilage of a dwelling-house; and such corporation has power to erect, at such place as may be deemed convenient for its uses, depots, or other buildings, or structures, or wharves; and may purchase, hire, or charter vessels or boats for the transportation of its products or property; and may aid in the construction of railroads, or in
6164 the establishment of lines of vessels or boats, running to and from such depots, or other buildings, or structures or wharves; but the owner of any land which may be taken under the provisions of this section, shall have the right to have all his property, of like kind with that transported by the corporation, carried by such corporation over or upon such canal, railway or tramway, upon the payment of a just and reasonable compensation for such carriage."

Examiner Gutheim: It is also your understanding, Mr. Burlingame, that railroads so chartered are subject to the jurisdiction of the Alabama State Railroad Commission in the same way that trunk lines of railroad are subject to their general jurisdiction?

Mr. Burlingame: Yes.

Examiner Gutheim: Have you any other connection with the exception of that with the Mobile & Ohio Yellow Pine?

Mr. Burlingame: Not at this time. Here is a blue print showing the location of our tracks.

Examiner Gutheim: Do you wish to offer that in evidence?

Mr. Burlingame: Yes.

(The blue print so offered and identified, was received in
6165 evidence and thereupon marked "Burlingame Exhibit No. 1, received in evidence January 27, 1911." consisting of one sheet, and is attached hereto.)

Examiner Gutheim: Are all of the tracks shown on this map connected with the line running from Yellow Pine north now built and in operation by the Washington & Choctaw Railroad Company?

Mr. Burlingame: No, sir.

Examiner Gutheim: What tracks are not now in operation?

Mr. Burlingame: There are two spur tracks leading off to the east that have been removed.

Examiner Gutheim: Will you point them out and describe them?

Mr. Burlingame: These two here and four or five down here. (Indicating on Exhibit 1.)

Mr. Rich: Down by Copeland?

Mr. Burlingame: Yes, one by Copeland. I will say that all of those spur tracks that were used for the purpose of logging only have been removed. That answers the question.

Examiner Gutheim: All these tracks that run to the east some distance north of Copeland in a general parallel way and connecting with what is marked "T. V. R. R.," are they still down?

6166 Mr. Burlingame: No, sir; they were taken up.

Mr. Gutheim: The so-called T. V. R. R., is that still down?

Mr. Burlingame: I think so. We have our holdings on there, but I don't know much about the railroad.

Examiner Gutheim: So that the only line that is now ready and in operation is the one that runs in a general northerly direction from Yellow Pine right up through Copeland and Omega——

Mr. Burlingame: Up to Matthews.

Examiner Gutheim: And a little beyond?

Mr. Burlingame: Over to Williams, quite a little distance beyond Williams now; we have a spur track that leads out from Matthews maybe four or five miles. That is just a logging track for the E. W. Gates Lumber Company.

Examiner Gutheim: Can you say when this blue print was made?

Mr. Burlingame: In 1907.

Examiner Gutheim: So that since then has it——

Mr. Burlingame: No, I will take that back,—since 1909.

Examiner Gutheim: So that since 1909 all these stations that it has been necessary to write in on this road in pencil have been located?

6167 Mr. Burlingame: No, sir; they were located long before the map was ever made.

Examiner Gutheim: But they were not shown on the map at the time it was made?

Mr. Burlingame: It was a matter of oversight on the draughtsman who drew the map, was all.

Examiner Gutheim: Going from Yellow Pine north you strike the place called Reynolds?

Mr. Burlingame: That is from Yellow Pine I should judge three miles.

Examiner Gutheim: What is over there?

Mr. Burlingame: There is nothing there but a side track and a place to store fertilizer.

Examiner Gutheim: Was Reynolds at one time a logging camp of the Gates Lumber Company?

Mr. Burlingame: It was not.

Examiner Gutheim: The Gates Lumber Company had considerable timber thereabouts?

Mr. Burlingame: They did not.

Examiner Gutheim: What have you got at the place called Moss?

Mr. Burlingame: There is a side track and an unloading
6168 platform for the purpose of storing grain and feed.

Examiner Gutheim: How much of a population is there at Moss?

Mr. Burlingame: It serves a community in all of perhaps maybe —well, one saw mill, two or three stores, and I presume 100 people.

Examiner Gutheim: There is a wagon road that runs from Moss over to Magnolia on the M. & O.?

Mr. Burlingame: No, sir, there is not now; there used to be in years gone by.

Examiner Gutheim: What is there at Copeland?

Mr. Burlingame: Copeland consists of three stores, one gin and one saw mill. You saw this large territory about Copeland is very productive, and it sustains a community of maybe a thousand people. six hundred at any rate.

Examiner Gutheim: At Omega is there a station built?

Mr. Burlingame: Omega is a new town that is being built at which there is a saw mill, one or two stores, seven or eight houses, and it also supplies quite a population. It is also the shipping point for a good deal of agricultural products that reach our lines. They are hauled for eight and ten and twelve miles to that point on our road.

6169 Examiner Gutheim: Are there any settled communities at the marks on the map north of Omega?

Mr. Burlingame: Yes, it is a settled country, practically a continuous farm all the way to the end of the line, in which there is no timber. Adjacent to the line at Wilting, which is the next place above Omega, we have a small ore mill which is being put in at that place.

Examiner Gutheim: Does your road handle any United States mail?

Mr. Burlingame: It does not.

Examiner Gutheim: What mail service have the communities that you mentioned?

Mr. Burlingame: They have none. They go to Bucatuma, about twelve or fifteen miles.

Examiner Gutheim: Over on the Mobile & Ohio?

Mr. Burlingame: Over on the Mobile & Ohio. If I mistake not there may be rural free delivery there, but I don't know.

Examiner Gutheim: Now, was this road from Yellow Pine north which was put down for twenty miles and now in operation put down at one time?

Mr. Burlingame: I did not catch that.

Examiner Gutheim: Was this road north from Yellow
6170 Pine about twenty-five miles now in operation put down at one time?

Mr. Burlingame: No; it was built as fast as we could build it, though.

Examiner Gutheim: When you said: "As fast as we could build it," did you refer to the railroad company as a railroad company, or the railroad company as a part of the one incorporation with the lumber company?

Mr. Burlingame: No; as a railroad company. Let me get that straight for you. We had a logging road to the mill, that is, the E. W. Gates Lumber Company had.

Examiner Gutheim: That mill was located at Yellow Pine?

Mr. Burlingame: Yellow Pine; they had a logging road. They commenced to build this standard gauge road previous to the time that they took up the logging property, and they built the railroad as fast as they could get it into some additional timber that the E. W. Gates Lumber Company might use until they got to the place where they had more timber. For instance, they built eight miles right here, and then they built twenty-five miles on top of the eight miles right here (indicating), and I suppose they were three months in building the twenty-five miles.

6171 Examiner Gutheim: Is there any timber there located up beyond Omega?

Mr. Burlingame: There is no timber from Matthews in that whole twenty miles.

Examiner Gutheim: Is there any beyond Matthews?

Mr. Burlingame: Except that which is in the hands of other people than the E. W. Gates Lumber Company.

Examiner Gutheim: Is there any beyond Matthews?

Mr. Burlingame: There is none except right at Matthews, which has been cut out.

Examiner Gutheim: You say there are fifteen miles of track under construction. How far has that construction proceeded?

Mr. Burlingame: We are now building one about three miles, between three and four miles beyond Williams.

Examiner Gutheim: These three stations that you spoke of, are they stations which are usually defined as open stations?

Mr. Burlingame: I don't know what you mean.

Examiner Gutheim: Stations with an agent?

Mr. Burlingame: What do you mean by an open station?

Examiner Gutheim: Do they have an agent of the railroad company there?

Mr. Burlingame: We have an agent at Matthews, we have

6172 an agent at Yellow Pine.

Examiner Gutheim: Are those gentlemen connected in any way with the Gates Lumber Company?

Mr. Burlingame: No, they are not.

Examiner Gutheim: How long have they been there?

Mr. Burlingame: Well, we got into Matthews about three or four months ago and they have been there since that time. We have always had an agent at Yellow Pine.

Examiner Gutheim: When the road was up as far as Omega, about fifteen miles was that?

Mr. Burlingame: Yes, it is about seventeen, about eighteen—seventeen.

Examiner Gutheim: Did you have any agent out there in the service of the railroad?

Mr. Burlingame: Oh, yes, we have always had a traveling agent on our train. We have also had an agent at Yellow Pine.

Examiner Gutheim: Isn't the agent at Yellow Pine also the Mobile & Ohio agent?

Mr. Burlingame: He never was the Mobile & Ohio agent.

Examiner Gutheim: The Mobile & Ohio agent does all the way billing for the Washington & Choctaw Railroad?

6173 Mr. Burlingame: No, sir, the Washington & Choctaw do their own way billing. I would like to say just one thing I want to explain, that there was an agent of the Mobile & Ohio who by some means or other conceived the idea that he wanted to be the freight agent of the Washington & Choctaw, and he succeeded in getting his name on the tariff of that company, but he was never their agent. We never paid him any money and he never did any work for the Choctaw & Washington Railroad, and how he got onto the tariff is more than I know, I cannot say.

Examiner Gutheim: Now these other mills along your line, do they have the same rates going out, say to destinations on the Ohio River and beyond as the Yellow Pine mill?

Mr. Burlingame: They enjoy the same rate of freight.

Examiner Gutheim: They pay an arbitrary of a cent above the rate from Yellow Pine?

Mr. Burlingame: No, sir; that junction point rate extends to every shipper of forest products.

Examiner Gutheim: Now, do any of these small mills get their timber in by your road?

Mr. Burlingame: They do not.

Examiner Gutheim: Does the Gates mill still get its timber

6174 by your road?

Mr. Burlingame: It does.

Examiner Gutheim: What is the local logging rate on that timber?

Mr. Burlingame: 3 cents a hundred.

Examiner Gutheim: That is not the 3 cents, the other division that you gave?

Mr. Burlingame: No, sir.

Examiner Gutheim: Then the division is——

Mr. Burlingame: The railroad keeps the division.

Examiner Gutheim: I mean, does the Gates Lumber Company pay 3 cents per 100 on logs in addition to which the railroad company gets 3 cents on lumber as its division?

Mr. Burlingame: The E. W. Gates Lumber Company pays to the Washington & Choctaw Railroad 3 cents per 100 for logs.

Examiner Gutheim: Just where are these 60,000 acres that you have said were open for colonization located, up beyond Matthews?

Mr. Burlingame: South of Matthews. This line east, there is where the 61,000 acres of land were opened, all the way down here (indicating).

Examiner Gutheim: Those six or seven hundred people

6175 that came in there are actually there?

Mr. Burlingame: They are bona fide settlers, they are there now, brought their families.

Examiner Gutheim: Taking up that question about whether or not the lumber company which owns a railroad which gets a division is thereby enabled to undersell a competitor who does not get a division, let us assume for a minute that he does not apply the

3 cents per 100 pounds to the selling price of the lumber, thereby underselling directly, by applying the division to the price that he is going to sell his lumber at, but if he gets the division of 3 cents, that division increases the revenue of his railroad, doesn't it?

Mr. Burlingame: Well, yes, but you understand what we have to do to get that revenue.

Examiner Gutheim: Yes, but he gets a division of 3 cents which goes into his road freight revenue?

Mr. Burlingame: Yes.

Examiner Gutheim: And having that division, he does not have to make as much money on the lumber because his operating expenses——

Mr. Burlingame: If I——

Examiner Gutheim: Just a moment. And in order to
6176 make money on his local rates he has to make the revenue equal the expense?

Mr. Burlingame: I don't see the connection between the lumber company and the railroad company.

Examiner Gutheim: Just answer the question.

Mr. Burlingame: I cannot, because there is no connection between them.

Examiner Gutheim: If this road's operating expenses are $25,000 a year and it gets divisions of $10,000, it must make up the $15,000 on local earnings?

Mr. Burlingame: Yes, sir.

Examiner Gutheim: Well now, if its divisions were cut out in order to come out even it would have to make $25,000 on local earnings, that is right?

Mr. Burlingame: To keep out of the hands of the sheriff, is that what you have reference to?

Examiner Gutheim: Yes.

Mr. Burlingame: If he has got to make $25,000 then——

Examiner Gutheim: He would have to increase rates, would he not, the railroad company would?

Mr. Burlingame: I don't know whether I could answer the question, whether he has to increase his rates or increase
6177 his tonnage or how he would overcome that point. He could increase his tonnage as well, increasing his revenue.

Examiner Gutheim: We will assume the tonnage is about the same, but your revenues have been reduced, and in order to come out whole, you would have to raise your local rates, is that a fact?

Mr. Burlingame: No, there is an assumption there that would not hold good, because if your tonnage remained the same your railroad is not going to be progressive, it is not going to go on.

Examiner Gutheim: If you carry 500,000 tons one year and 500,000 tons next year on the same line of road will there be any great difference in the operating expenses?

Mr. Burlingame: Why, yes, you would pay more for wages in one year that you will in another, as you are not embarrassed by the fact that last year you did not have equipment and this year you have.

Examiner Gutheim: Assume for the moment that the conditions were normal in both years, that you handled about the same tonnage, but in one year you got $10,000 out of divisions and in another year you did not. If you came out whole the first year,
6178 in order to come out whole the second year, would you not have to arrange to figure on $10,000 additional local earnings?

Mr. Burlingame: Well, I suppose it might run that way.

Examiner Gutheim: Assuming that your local log haul rate was increased, wouldn't that increase the cost of the logs in the pond to the lumber company that had to pay that increase that log haul rate?

Mr. Burlingame: You assume that the rate on logs is increased now?

Examiner Gutheim: Would not that result in an increased cost to the lumber company of the logs in its ponds?

Mr. Burlingame: If it increased the rate?

Examiner Gutheim: Yes.

Mr. Burlingame: Most assuredly.

Examiner Gutheim: So that your lumber in the long run would cost more on account of the fact that——

Mr. Burlingame: Lumber hasn't anything to do with the earnings of a railroad.

Examiner Gutheim: You have just said that when you increased the local rate on the loghaul to make up your revenue, that your lumber—your log is going to cost your lumber company
6179 more in the pond. That being the case, isn't the lumber going to cost more?

Mr. Burlingame: Well, I don't know but what that would be the case. I don't say——

Examiner Gutheim: We have got that far. If the lumber costs you more simply because you don't get divisions, you have not got such a big margin of profit if you are selling at the same price on account of this loss of divisions to this railroad?

Mr. Burlingame: I don't understand a question like that.

Examiner Gutheim: We have got to the point where your lumber is costing you more to manufacture on account of the loss of divisions of the railroad company. We have that fact. Mr. Burlingame, wouldn't your margin of profit be less when your price of lumber is the same as you sold in previous years when this road got divisions?

Mr. Burlingame: No, sir; if the railroads can haul that at 3 cents 100 pounds, the railroad would still be there getting this same amount of money.

Examiner Gutheim: You are going back to the point now where the E. W. Gates Lumber Company finds that its logs in the pond cost more than they did the previous year. Therefore its lumber costs more. Now, assuming the case of a lumber manufacturer
6180 who owns a tram road and is operating it, of the same nature as this, without divisions, is he not in the position that the Gates Lumber Company would be when its divisions were cut out asd he finds his margin of profit less?

Mr. Burlingame: How is a lumber company man interested in any of the profits of a railroad company?

Examiner Gutheim: I am saying this, that they are interested to the extent that its log haul was increased when the divisions were reduced, which resulted in an increased cost of lumber.

Mr. Burlingame: That is right.

Examiner Gutheim: Isn't there an increased cost of lumber caused by the lumber operator who was running the road bringing it to the railroad company and getting no division?

Mr. Burlingame: Is there such a thing as a man being a common carrier and getting no division?

Examiner Gutheim: Oh, yes, there are common carriers who are getting no divisions. There are railroads that are not incorporated as common carriers that perform the same service that you have mentioned which the tap lines were operating that are not getting divisions, doing identically the same thing in the lumber business?

6181 Mr. Burlingame: They are not all alike.

Examiner Gutheim: I guess that is all.

Examiner Burchmore: Are you acquainted with the Sumter & Choctaw Railroad?

Mr. Burlingame: I believe I am acquainted with the gentleman who owns it.

Examiner Burchmore: Who is that?

Mr. Burlingame: Mr. Allison, I think.

Mr. Rich: Who did you say owns it?

Mr. Burlingame: Mr. Allison, W. P. Allison.

Examiner Burchmore: That is down in your vicinity?

Mr. Burlingame: Yes, sir.

Examiner Burchmore: What sort of a road is it?

Mr. Burlingame: I don't know what kind of a road it is except it serves loggings interests.

Mr. Rich: Aren't you mistaken about Mr. Allison being the owner of that road?

Mr. Burlingame: No.

Examiner Burchmore: When was this railroad incorporated, I mean the Choctaw—Washington & Choctaw?

Mr. Burlingame: In 1904.

Examiner Burchmore: Incorporated as a standard guage then?

6182 Mr. Burlingame: It was incorporated under the title of the E. W. Gates Lumber Company in 1904, and subsequently got out a charter in that name.

Examiner Burchmore: Does it now have a separate charter?

Mr. Rich: Yes, sir.

Examiner Burchmore: When did you change it to a separate charter?

Mr. Rich: That was in 1910.

Examiner Burchmore: What is its capital stock at the present time?

Mr. Rich: Authorized, $700,000, actually paid in, $200,000. The investment stands the original owners $250,000.

Examiner Burchmore: Was it paid in by turning over the road?

Mr. Burlingame: Paid in by selling the road and some small addition in cash.

Examiner Burchmore: You spoke of those three trains that do not run on schedule.

Mr. Burlingame: Logging trains, doing the switching of the lumber.

Examiner Burchmore: Did you state what compensation the railroad received for carrying those logs?

6183 Mr. Burlingame: Three cents per 100.

Examiner Burchmore: Aren't the rates on your line on a milling in transit basis?

Mr. Burlingame: We get an allowance from the M. & O. of 3 cents, I think on a milling in transit basis, that is, the railroad does, but we charge the E. W. Gates Lumber Company as a railroad to handle their logs into the mill. The division has nothing to do with the other part of it.

Examiner Burchmore: That joint through rate on lumber applies from any point on your line to an interstate destination?

Mr. Burlingame: I would like to ask one question, if export business is interstate business?

Examiner Burchmore: Yes.

Mr. Burlingame: Then it does.

Examiner Burchmore: It does on exports?

Mr. Burlingame: Yes, sir.

Examiner Burchmore: How about domestic?

Mr. Burlingame: Yes, also on that.

Examiner Burchmore: Then if it applies from any station on your line, the joint interstate rate and the milling in transit privilege, isn't the Gates Lumber Company entitled to free move-

6184 ment of the logs from the point of origin to the mill and a movement of the lumber from the mill to destination at the joint through rate without any extra charge on the logs?

Mr. Burlingame: We do not consider that the E. W. Gates Lumber Company have anything to do with those privileges that accrue to the railroad.

Examiner Burchmore: Well, I was simply suggesting under the terms of the tariff if it is on a milling in transit basis which applies from all stations on your line to interstate destinations, the rate being the same from the point of origin, then hasn't the Gates Lumber Company as a shipper the right to demand the benefit of that joint through rate from any point on your line to the interstate destination without any additional charge on its logs?

Mr. Burlingame: We do not consider that it has that right.

Examiner Burchmore: How far is that mill from the tracks of the Mobile & Ohio Railroad?

Mr. Burlingame: The mill is maybe a quarter of a mile away from the M. & O.

Examiner Burchmore: Has the Washington & Choctaw Railroad Company——

6185 Mr. Burlingame: Mr. Commissioner, just a minute. I would like to say that the planer is located on the M. & O. tracks.

Examiner Burchmore: Does the Gates Lumber Company load its lumber from the planer into cars lying on the Mobile & Ohio tracks?

Mr. Burlingame: It does.

Examiner Burchmore: Then in case of a shipment of lumber loaded at that point moved into an interstate destination, what service does the Washington & Choctaw Railroad Company perform for which it should receive a division?

Mr. Burlingame: But a very small portion of the volume of the business handled comes from the planer, a majority of the product being shipped rough from the saw mill, in which event the M. & O. does not do any of the switching whatever.

Examiner Burchmore: Is that your full answer?

Mr. Burlingame: Yes, sir.

Examiner Burchmore: Why was this railroad incorporated separately as a common carrier railroad in 1909, if you know the reason?

Mr. Burlingame: For the purpose of assuming the privilege of eminent domain given us under our charter rights of 1904.

Examiner Burchmore: You already had that right as a
6186 charter right?

Mr. Burlingame: Yes, we thought it might be useful, and that is why we chartered the railroad.

Mr. Rich: May I ask a question?

Examiner Burchmore: Certainly.

Mr. Rich: I will ask you, has it not been under consideration by the owners of the railroad property for some time bonding the property or mortgaging the property and issuing bonds for the purpose of extending it?

Mr. Burlingame: It is the intention of the company to borrow money on securities issued by this railroad.

6187 Mr. Rich: In that connection was it not suggested to you by counsel and by others who were considering financing the property, that it would be better to separate the interests in the way which has been done?

Mr. Burlingame: It was suggested that the separation be made.

Mr. Rich: I think that is all.

Examiner Burchmore: You removed these logging spur tracks that were formerly connected with your road, that ran into the timber of the Gates Lumber Company?

Mr. Burlingame: We did.

Examiner Burchmore: Why did you remove them?

Mr. Burlingame: The E. W. Gates Lumber Company had no further use for them at that particular point and we relaid them at other points.

Examiner Burchmore: Have you put in any private tracks in order that farmers might get their fertilizer into different parts of their farms?

Mr. Burlingame: We have put in several special tracks of this description, and very recently for what we presumed to be permanent tracks.

Examiner Burchmore: Is the logging track that runs out
6188 from Matthews a permanent track or temporary?

Mr. Burlingame: It is a temporary track.

Examiner Burchmore: Did the Gates Lumber Company make you any special inducement to put that track down, beyond the promise that they would originate logs on which you would earn three cents?

Mr. Burlingame: The Gates Lumber Company built this as a spur of their own accord.

Examiner Burchmore: But did they charge the cost up to your road?

Mr. Burlingame: The railroad company participates to the extent of furnishing the rails only.

Examiner Burchmore: And they are compensated in your opinion for the use of the steel by the traffic that they get, the three cent charge on logs?

Mr. Burlingame: The compensation is for the repairs furnished, the engines and the equipment that belongs to the Washington & Choctaw Railroad.

Examiner Burchmore: Can you furnish us with a recent map of your road just as it stands today? It does not need to be an elaborate map.

Mr. Burlingame: We will do that.

6189 Examiner Burchmore: Does the Gates Lumber Company ship or sell any turpentine and resin?

Mr. Burlingame: It does not.

Examiner Burchmore: Does it farm out that privilege?

Mr. Burlingame: It formerly did but has no connection with the industry now.

Examiner Burchmore: Is this E. W. Gates Lumber Company related in any way to the Gates Lumber Company over in Arkansas or Louisiana?

Mr. Burlingame: They were formerly an offspring of that company.

Examiner Burchmore: But no connection at the present time?

Mr. Burlingame: None at the present time.

Examiner Burchmore: Do you know whether it is a fact that most short line railroads east of the Mississippi river as our information seems to be from this case, participate in joint rates with the trunk lines on lumber to Cairo, for example, have a joint rate that is one or two cents higher than junction point rates?

Mr. Burlingame: I understand that this condition is true on one road.

Examiner Burchmore: What road is that?

6190 Mr. Burlingame: On what I think is the A. & N. Railroad. I wish to say that very little of the product of our community reaches the interior market, that is when compared with the volume of the foreign products handled.

Examiner Burchmore: Do you know whether that is a fact on the Sumpter & Choctaw Railroad?

Mr. Burlingame: On the Sumpter & Choctaw Railway I cannot say.

Examiner Burchmore: Do you know whether those junction point rates apply to stations on their line?

Mr. Burlingame: I could not say.

Mr. Matthews: Have you a statement showing the traffic tonnage?

Mr. Burlingame: Only a memorandum of the tonnage, if that is what you desire.

Examiner Burchmore: We would like a statement of the tonnage similar to what we called for from the other road.

Mr. Rich: We will have that prepared.

Mr. Burlingame: It would not take but a few minutes if you want that copied.

Whereupon, at 6:30 P. M., a recess was taken until 8 o'clock P. M.

6191 After Recess.

JANUARY 27, 1911—8 o'clock p. m.

Brookings & Peach Orchard Railroad Company.

Mr. Walter: I want to say on behalf of the Brookings & Peach Orchard, that as far as that road is concerned, the auditor who had charge of the books has been recently married, and she left everything in a more or less disordered condition, and the records are in bad shape. Mr. Henry A. Quellmalz has been looking into the matter a little bit and if you want to hear from him, he will give you the best he can in a general way.

HENRY A. QUELLMALZ, was called as a witness, and having been duly sworn, testified as follows:

Direct examination:

Examiner Burchmore: Please state your name?

Mr. Quellmalz: H. A. Quellmalz.

Examiner Burchmore: What is your relation to the Brookings & Peach Orchard Railroad?

Mr. Quellmalz: Secretary.

Examiner Burchmore: As secretary what are your duties?

6192 Mr. Quellmalz: Why, I sign a majority of the papers that come from the road, and I also sign checks.

Examiner Burchmore: Do you also attend to the correspondence of the road?

Mr. Quellmalz: Why no, we have left that all to our traffic manager, who has attended to all that correspondence.

Examiner Burchmore: Do you attend to the correspondence for the Interstate Commerce Commission?

Mr. Quellmalz: How?

Examiner Burchmore: Do you attend to the correspondence with the Interstate Commerce Commission?

Mr. Quellmalz: Do I intend to correspond?

Examiner Burchmore: Do you attend to it?

Mr. Quellmalz: No, sir, I do not.

Examiner Burchmore: Does the road render annual reports to the Interstate Commerce Commission?

Mr. Quellmalz: They did in 1909, but up to 1910 they did not. In the last three or four days I have been trying to make up this report, but I have not succeeded as yet, but I intend to give it to the Interstate Commerce Commission by the middle of next week.

Examiner Burchmore: Do you know on what dates such
6193 reports are supposed to be filed with the Commission?

Mr. Quellmalz: No, I don't know a thing about it.

Examiner Burchmore: Does your company make reports to the Commission of its accidents?

Mr. Quellmalz: If they have any, I think they did.

Examiner Burchmore: Do you know whether the road has reported accidents to the Interstate Commerce Commission?

Mr. Quellmalz: No, I do not, I could not answer that question. I don't think they ever had any.

Examiner Burchmore: I will say that the Secretary for the Interstate Commerce Commission wrote to the superintendent of your railroad, Mr. Joe Nester——

Mr. Quellmalz: Yes, sir.

Examiner Burchmore: At Brookings, Arkansas.

Mr. Quellmalz: Yes.

Examiner Burchmore: Twice during the year 1908, asking him—calling his attention to the provisions of the Act to Regulate Commerce, requiring monthly reports of accidents, and no reply was ever received to either letter, and I am informed that the reports have not been filed.

Mr. Quellmalz: As I said before, I do not know of any accidents, of anyone ever having been injured.

6194 Mr. Walter: You are required to report whether there are any or not.

Mr. Quellmalz: I was not aware of that fact. I will see that they go in after this.

Examiner Burchmore: The Brookings & Peach Orchard Railroad connects with the Iron Mountain System, at Mollus?

Mr. Quellmalz: Mollus, Arkansas, Green county.

Examiner Burchmore: What is the length of this line?

Mr. Quellmalz: Approximately three miles.

Examiner Burchmore: Has it any side tracks?

Mr. Quellmalz: Why, it has one siding.

Examiner Burchmore: What is the length of that siding?

Mr. Quellmalz: About 120 feet.

Examiner Burchmore: Where is that siding?

Mr. Quellmalz: It is about 300 feet from the Iron Mountain I should judge. Here is a map that I drew of the railroad the best I could. It is a year since I have been on it. (Producing sketch.)

Examiner Burchmore: That siding connects at each end with the main line of your railway Company?

Mr. Quellmalz: With the main line of our railroad, yes, sir. This is the Iron Mountain Road and this is the saw mill.

6195 (Indicating on sketch.)

Examiner Burchmore: You are also secretary and treasurer

of the Henry Quellmalz Lumber Company?

Mr. Quellmalz: Secretary only.

Examiner Burchmore: Who is president of that railroad?

Mr. Quellmalz: Henry Quellmalz.

Examiner Burchmore: Is he the president of the lumber company you have just mentioned?

Mr. Quellmalz: Yes, sir.

Examiner Burchmore: Who is vice-president of the railroad?

Mr. Quellmalz: Mr. Arthur Quellmalz.

Examiner Burchmore: Is he vice-president of this railroad?

Mr. Quellmalz: Yes, sir.

Examiner Burchmore: What other officers has the railroad, if any?

Mr. Quellmalz: Well, the railroad has Joe Nester, who is its general superintendent, and L. M. Rowan, general traffic manager.

Examiner Burchmore: Are those gentlemen or either of them officers of the lumber company?

Mr. Quellmalz: Why, Mr. Nester is agent of the lumber company.

6196 Examiner Burchmore: As such agent what are his duties?

Mr. Quellmalz: Why, he buys lumber and logs for the mill.

Examiner Burchmore: What is his salary from the railroad company?

Mr. Quellmalz: He does not get any salary.

Examiner Burchmore: Do any of these officers receive a salary from the railway company?

Mr. Quellmalz: Yes, Miss Rowan receives $15 a month.

Examiner Burchmore: Miss Rowan?

Mr. Quellmalz: Yes, sir.

Examiner Burchmore: She is also employed by the lumber company?

Mr. Quellmalz: No, not at present. She was.

Examiner Burchmore: She is now employed by the railroad company?

Mr. Quellmalz: Yes, sir, she is.

Examiner Burchmore: I will ask you whether the stockholders who own a controlling interest in this railroad company, are not also the controlling stockholders in the lumber company?

Mr. Quellmalz: They are, yes, sir.

Examiner Burchmore: Are the stockholders in the two

6197 companies precisely identical?

Mr. Quellmalz: Well, no.

Examiner Burchmore: What differences are there in the holdings?

Mr. Quellmalz: Mr. Quellmalz owns 80 per cent of the Quellmalz Lumber & Manufacturing Company, and I think, he owns about 91 per cent of the Brookings & Peach Orchard—97½ per cent of the Brookings & Peach Orchard Railroad.

Examiner Burchmore: Who owns the other 3 per cent of the railroad stock?

Mr. Quellmalz: Why, I own a share, Mr. Arthur Quellmalz owns one, Wallace J. Brown, Joe Nester, G. Frank, Adam Baget, Henry Pirtle, John Russell, W. D. Polk, and George Fleetwood.

Examiner Burchmore: Those gentlemen are directors in the railroad?

Mr. Quellmalz: Not all of them. There are seven directors.

Examiner Burchmore: The Quellmalz Lumber Company has a saw mill on or near this railroad?

Mr. Quellmalz: On the river, the Black River.

Examiner Burchmore: On the Black River?

Mr. Quellmalz: Yes, sir.

Examiner Burchmore: And the railroad terminates near
6198 or opposite the saw mill?

Mr. Quellmalz: Terminates right at the river, that is, the spur, the road, the main part of the road runs right in the center of the mill.

Examiner Burchmore: We can put this in evidence?

Mr. Quellmalz: If you want.

(The map so offered and identified, was received in evidence and thereupon marked "Quellmalz Exhibit No. 1, received in evidence January 27, 1911," and is attached hereto.)

Examiner Burchmore: Where does the Quellmalz Lumber Company's mill obtain its logs?

Mr. Quellmalz: Obtains its logs from its own timber land north of the mill, west of the mill and south of the mill on the Black River. They cut these logs and have them hauled to the river by teams, and there they are rafted and brought down to the mill proper.

Examiner Burchmore: For what distance do they haul those logs by teams?

Mr. Quellmalz: Why, all the way from a quarter of a mile.

Examiner Burchmore: Do you know how far down the river they float the logs?

Mr. Quellmalz: How far they float them down the river?
6199 Examiner Burchmore: Yes.

Mr. Quellmalz: About, I think, all the way up to twenty miles, from the farthest distance.

Examiner Burchmore: What is the name by which the station at the mill is known?

Mr. Quellmalz: Brookings.

Examiner Burchmore: And the junction with the Iron Mountain is Mollus?

Mr. Quellmalz: Mollus.

Examiner Burchmore: What is the distance from Brookings to Mollus?

Mr. Quellmalz: I think it is three miles.

Examiner Burchmore: The Brookings & Peach Orchard Railroad have joint rates on lumber with the Iron Mountain to interstate destinations?

Mr. Quellmalz: Yes, sir.

Examiner Burchmore: What division does it receive out of those rates?

Mr. Quellmalz: Three cents a hundred.

Examiner Burchmore: Uniformly three cents?

Mr. Quellmalz: I think so, yes, sir. It is a flat rate.

Examiner Burchmore: The rate from Brookings is one
6200 cent higher than the Iron Mountain rate from Mollus?

Mr. Quellmalz: Yes, sir.

Examiner Burchmore: In all cases?

Mr. Quellmalz: Yes, sir.

Examiner Burchmore: You say they get a division of three cents. Do you mean they get three cents over one cent, or plus one cent arbitrary, or three cents including the one cent arbitrary?

Mr. Quellmalz: Three cents including a one cent arbitrary.

Examiner Burchmore: So that the Iron Mountain receives two cents less than its local rate?

Mr. Quellmalz: I think so.

Examiner Burchmore: When was this railroad company incorporated?

Mr. Quellmalz: On May 16, 1908, under the statute of Arkansas.

Examiner Burchmore: As a railroad common carrier?

Mr. Quellmalz: Yes, sir.

Examiner Burchmore: What is its capital stock?

Mr. Quellmalz: Six thousand dollars.

Examiner Burchmore: Was that all issued?

Mr. Quellmalz: Yes, sir.

6201 Examiner Burchmore: For cash?

Mr. Quellmalz: Yes, sir.

Examiner Burchmore: When was the railroad built?

Mr. Quellmalz: Why, it was built—it was rebuilt in 1908. It was a narrow gauge railroad when the Quellmalz Lumber & Manufacturing Company bought out the Lloyd G. Harris Manufacturing Company.

Examiner Burchmore: In what year did they buy it out?

Mr. Quellmalz: 1907.

Examiner Burchmore: That was before the railroad was incorporated?

Mr. Quellmalz: Yes, sir.

Examiner Burchmore: They bought the mill and the timber at the same time?

Mr. Quellmalz: Yes, sir.

Examiner Burchmore: Did they buy the river?

Mr. Quellmalz: I don't think they did.

Examiner Burchmore: I don't know what kind of a river that is, whether they could buy any rights on it.

Mr. Walter: Riparian rights?

Examiner Burchmore: Yes.

Mr. Quellmalz: It is not navigable.

6202 Examiner Burchmore: Did they buy the whole stream?

Mr. Quellmalz: No, they cannot.

Mr. Walter: I guess not.

Examiner Burchmore: Do they own on both sides of the stream?

Mr. Quellmalz: They own on both sides of the stream, yes.

Examiner Burchmore: Does the railroad own its own right of way?

Mr. Quellmalz: Yes, sir, it does.

Examiner Burchmore: Has it owned its right of way since the date of its incorporation?

Mr. Quellmalz: I think so.

Examiner Burchmore: Did it acquire any part of that right of way by condemnation?

Mr. Quellmalz: No, sir, I don't think they did.

Examiner Burchmore: Who owns the land on either side of the railroad?

Mr. Quellmalz: Why, to the best of my knowledge the Quellmalz Lumber & Manufacturing Company own part of it, and Wallace J. Brown the other part.

Examiner Burchmore: Who is Mr. Brown?

Mr. Quellmalz: Mr. Brown is a farmer living in the town
6203 of Brookings.

Examiner Burchmore: Do you know how much land he owns along the railroad?

Mr. Quellmalz: I could not tell you, no, sir.

Examiner Burchmore: Do the Quellmalz Lumber Company own the greater part of the land on each side of the road?

Mr. Quellmalz: Yes, sir, it does.

Examiner Burchmore: And they have sold Mr. Brown his present farm?

Mr. Quellmalz: No, they did not. He owned that farm before they ever came in there.

Examiner Burchmore: When was the line made a standard gauge line?

Mr. Quellmalz: Right after the incorporation.

Examiner Burchmore: What did the line cost, or what is its value?

Mr. Quellmalz: Well, they value it at about $220,000 now.

Examiner Burchmore: Are there any bonds on the line?

Mr. Quellmalz: No, sir, none at all.

Examiner Burchmore: Does it owe any money?

Mr. Quellmalz: Yes, sir; they owe $9,300.66.

Examiner Burchmore: To whom is that indebtedness owing?

6204 Mr. Quellmalz: To the Quellmalz Lumber & Manufacturing Company.

Examiner Burchmore: What use was made of the money thus obtained?

Mr. Quellmalz: They used it to buy steel with and ties, and rail equipment, equipment for the road.

Examiner Burchmore: Has the amount of money that has thus been owing to the Quellmalz Lumber Company ever been greater than it is now?

Mr. Quellmalz: No, sir, I don't think it has.

Examiner Burchmore: You stated, as I understood you, that $6,000 of capital stock was issued for cash. Was it not in fact issued in exchanged for the road acquired at the time of incorporation?

Mr. Quellmalz: Now, I do not exactly know. I think Mr. Quellmalz paid $6,000 for that railroad to the Quellmalz Lumber & Manufacturing Company.

Examiner Burchmore: And took the stock in exchange?

Mr. Quellmalz: I think so, yes, sir.

Examiner Burchmore: Did he give up part of the stock?

Mr. Quellmalz: No, I think he sold part of it.

Examiner Burchmore: For cash?

6205 Mr. Quellmalz: Yes, sir.

Examiner Burchmore: You own a share of stock?

Mr. Quellmalz: Yes, sir.

Examiner Burchmore: Did you buy it?

Mr. Quellmalz: I certainly did.

Examiner Burchmore: Paid good money for it?

Mr. Quellmalz: I certainly did.

Examiner Burchmore: Why did you buy it?

Mr. Quellmalz: Why, I thought it would be a good investment.

Examiner Burchmore: Has the stock paid any dividends?

Mr. Quellmalz: None at all.

Examiner Burchmore: Do you think it promises to pay dividends?

Mr. Quellmalz: That is a hard question for me to answer now.

Examiner Burchmore: Any boat line on the Black River?

Mr. Quellmalz: We have just bought a boat and barge.

Examiner Burchmore: Who has purchased it?

Mr. Quellmalz: The Brookings & Peach Orchard Railroad.

Examiner Burchmore: Where will they operate or be run to or from?

6206 Mr. Quellmalz: It will run from Pocahontas, Arkansas, to Brookings, and from Wammus Point to Poplar Bluff.

Examiner Burchmore: What kind of freight do you expect to carry on those barges?

Mr. Quellmalz: Why, they expect to transport ties that are cut on different people's land around there, that is not reached by the railroad, down to Brookings Station, and from there take it to the Iron Mountain.

Examiner Burchmore: There is a rice farm right up there too, isn't there?

Mr. Quellmalz: Yes, they expect to haul out rice.

Examiner Burchmore: How soon will your boats be in operation?

Mr. Quellmalz: They expect to have them in operation the latter part of next month.

Examiner Burchmore: What did you pay for them?

Mr. Quellmalz: I could not answer that question; I don't know.

Examiner Burchmore: Do you know where the money was raised to pay for them?

Mr. Quellmalz: I don't know that.

Examiner Burchmore: Is that included in this $9,000 in-
6207 debtedness?

Mr. Quellmalz: No, sir.

Examiner Burchmore: Who owns the steel out of which this railroad is constructed?

Mr. Quellmalz: The Brookings & Peach Orchard Railroad.

Examiner Burchmore: Did the Iron Mountain furnish any part of that steel?

Mr. Quellmalz: The Iron Mountain Railroad furnished the steel for the spur, I think, that connects with the Brookings & Peach Orchard Railroad.

Examiner Burchmore: For what distance?

Mr. Quellmalz: That is something I do not know, I think about approximately 300 feet.

Examiner Burchmore: Have you any sort of contract or agreement with the Iron Mountain covering that track?

Mr. Quellmalz: No, sir, not that I know of.

Examiner Burchmore: Are there any depots or other structures on your line?

Mr. Quellmalz: No, sir, a few farm houses.

Examiner Burchmore: Any other saw mills along your line?

Mr. Quellmalz: Yes, sir, we have three saw mills in our vicinity who haul lumber to our city of Brookings. Gibbs-
6208 Stanage——

Examiner Burchmore: What is their capacity?

Mr. Quellmalz: About ten or eleven thousand feet a day. A gentleman by the name of Scott owns a saw mill, and he also owns all the timber that is around there, and he cuts about twelve or fifteen thousand feet a day, and a gentleman by the name of Ragsdale has a saw mill about, say, two miles from our city of Brookings, who cuts about 10,000 feet a day.

Examiner Burchmore: How far does Stanage haul his lumber?

Mr. Quellmalz: I should think about a mile.

Examiner Burchmore: How about the other man?

Mr. Quellmalz: Scott?

Examiner Burchmore: Yes.

Mr. Quellmalz: About the same distance.

Examiner Burchmore: Where do they get their logs?

Mr. Quellmalz: Why, they get their logs off of their own land outside of this gentleman by the name of Stanage, and he buys his lumber off of Henry Pirtle, who owns quite a tract of timber land around there, and also a gentleman by the name of Shue.

Examiner Burchmore: Does their mill make hardwood?

Mr. Quellmalz: Yes, sir.

6209 Examiner Burchmore: What does Quellmalz manufacture?

Mr. Quellmalz: Hardwood.

Examiner Burchmore: Do they ship any of their lumber over your line?

Mr. Quellmalz: They do, yes, sir.

Examiner Burchmore: The major portion of it?

Mr. Quellmalz: Why, they ship——

Examiner Burchmore: We will let the tonnage go for a little while, unless you want to bring it in at this time.

Mr. Quellmalz: It is immaterial to me. What was the last question?

Examiner Burchmore: Do they ship most of their tonnage over your line?

Mr. Quellmalz: Yes, sir, they do.

Examiner Burchmore: They do not ship any down the river?

Mr. Quellmalz: No.

Examiner Burchmore: What sort of a town is Brookings?

Mr. Quellmalz: About 150. It is a mill and a farm town. Farms all around it. They are clearing right along, putting it into cultivation.

Examiner Burchmore: Does the Quellmalz Company have any company store there?

6210 Mr. Quellmalz: Yes, sir, they do.

Examiner Burchmore: Are there any other stores there?

Mr. Quellmalz: None at all.

Examiner Burchmore: A post office?

Mr. Quellmalz: A post office, yes, sir.

Examiner Burchmore: Is there any town or settlement along the line, other than Brookings?

Mr. Quellmalz: No, sir, not along this railroad.

Examiner Burchmore: What is there at Mollus?

Mr. Quellmalz: There is just a house put up there by the Quellmalz people, who used to have a man out there flagging trains, and now our section foreman lives out there.

Examiner Burchmore: Is the road ballasted?

Mr. Quellmalz: Yes, sir.

Examiner Burchmore: How many locomotives have you?

Mr. Quellmalz: One.

Examiner Burchmore: Box cars?

Mr. Quellmalz: No, sir.

Examiner Burchmore: Any flat cars?

Mr. Quellmalz: We have two standard flat cars, and two small cars carrying about 10,000 pounds. The flat cars also——

6211 Examiner Burchmore: Ten thousand pounds?

Mr. Quellmalz: Yes, sir.

Examiner Burchmore: How many train crews have you?

Mr. Quellmalz: Only have one train crew.

Examiner Burchmore: How many section gangs?

Mr. Quellmalz: One.

Examiner Burchmore: Any employés in the general office who receive a salary?

Mr. Quellmalz: No, sir.

Examiner Burchmore: Do you run a regular train service?

Mr. Quellmalz: Why no, they run something once in a while, they run one train a day out and back, sometimes two or three days according to what business they have.

Examiner Burchmore: How many cars in a train?

Mr. Quellmalz: From two to three.

Examiner Burchmore: Do you carry passengers?

Mr. Quellmalz: No, sir.

Examiner Burchmore: Incorporated as a carrier only of freight?

Mr. Quellmalz: I don't know. I think they are incorporated as a railroad.

Examiner Burchmore: Do you carry the mails?

6212 Mr. Quellmalz: No, sir.

Examiner Burchmore: Express matter?

Mr. Quellmalz: No, sir.

Examiner Burchmore: What figures can you give me on your freight tonnage and the revenue from it?

Mr. Quellmalz: Last year we hauled 8,563 tons all told. Our revenue amounted to $5,072.49.

Examiner Burchmore: How much of that was lumber? Didn't you haul any other kind of freight?

Mr. Quellmalz: There was one carload of corn went out of there. It was loaded at Brown and went to Corning. That was all that I can remember.

Examiner Burchmore: Do you know what your earnings were on that car, can you remember?

Mr. Quellmalz: I do not, no, sir.

6213 Examiner Burchmore: How much of that lumber came from the Quellmalz saw mill?

Mr. Quellmalz: 88.8 per cent.

Examiner Burchmore: How many tons—have you got the figures?

Mr. Quellmalz: Yes, sir, I think I have. There was 960 tons from outsiders.

Examiner Burchmore: That will do. And what was the revenue from outsiders?

Mr. Quellmalz: $576.00.

Examiner Burchmore: Those outsiders were the three saw mills you mentioned a little while ago, those outsiders consisted of the three saw mills that you have mentioned?

Mr. Quellmalz: Yes, sir.

Examiner Burchmore: There was somewhat of an increased outside traffic over the previous year, was there not?

Mr. Quellmalz: Yes, sir, I think it was. They were not going the year before, just cut for a while. For one thing or another they could not get into the timber to get out their logs.

Examiner Burchmore: What were your total revenues for the year, the total operating revenues?

6214 Mr. Quellmalz: $5,072.49.

Examiner Burchmore: What was the operating expense?

Mr. Quellmalz: Well now there is a question that I can not answer because I have not got that far into the book. As far as I have gotten they are about $3,200.00.

Examiner Burchmore: You mean you have not got the accounts made up for the year?

Mr. Quellmalz: They are made up, they are all down, and one thing and another, but I did not get that part of the book——

Examiner Burchmore: Do you think you made a profit from operation last year?

Mr. Quellmalz: Yes, sir, I do.

Examiner Burchmore: Have you made a profit in previous years?

Mr. Quellmalz: No, sir.

Examiner Burchmore: Where did you get the money to make up the deficit?

Mr. Quellmalz: Why the Quellmalz Lumber and Manufacturing Company furnished the money.

Examiner Burchmore: The profits of this year, I assume, will properly be applied on the reduction of your debt that you
6215 were speaking of?

Mr. Quellmalz: No, sir, it won't. We intend to buy a couple of more cars and fix up the track a little.

Examiner Burchmore: Who furnishes the cars for the movement of lumber from the mill when furnished by other shippers at Brookings when destined to interstate points?

Mr. Quellmalz: The Iron Mountain Railroad.

Examiner Burchmore: They furnish the empty cars?

Mr. Quellmalz: Yes, sir.

Examiner Burchmore: Then for this division of three cents, you haul the empty cars the entire length of your line and haul the loaded cars in the reverse direction the entire length of your line?

Mr. Quellmalz: Yes, sir, we do.

Examiner Burchmore: Who loads the lumber?

Mr. Quellmalz: The Quellmalz Lumber and Manufacturing Company.

Examiner Burchmore: Does your railroad issue any bills-of lading?

Mr. Quellmalz: They do; yes, sir.

Examiner Burchmore: Where is that actually issued?

Mr. Quellmalz: It is issued at Brookings, way-bills and
6216 bills-of-lading.

Examiner Burchmore: This bookkeeper that you mention, she is out there?

Mr. Quellmalz: Yes, sir.

Examiner Burchmore: Has there been any complaint against your road which has come to your knowledge, by these other mills out there?

Mr. Quellmalz: None whatever, no, sir.

Examiner Burchmore: Do you have any passes over the Iron Mountain Railroad?

Mr. Quellmalz: The President, and the Agent—and the General Superintendent have.

Examiner Burchmore: They are also officers of the lumber company?

Mr. Quellmalz: Yes, sir.

Examiner Burchmore: Who did you say had Iron Mountain passes?

Mr. Quellmalz: Mr. Quellmalz, our president, and the general superintendent.

Examiner Burchmore: Mr. Joe Nester?
Mr. Quellmalz: Yes, sir.
Examiner Burchmore: Did you come to St. Louis on a pass?
6217 Mr. Quellmalz: Did I come? Yes, sir, I had a trip pass.
Mr. Walter: Do you mean to this present hearing?
Mr. Quellmalz: Yes.
Mr. Walter: He lives here.
Mr. Quellmalz: I live here in St. Louis.
Examiner Burchmore: Have you ever held or used an annual pass?
Mr. Quellmalz: No, sir.
Examiner Burchmore: Mr. Nester is a timber buyer for the lumber company, isn't he?
Mr. Quellmalz: Yes, sir.
Examiner Burchmore: Does he travel around the country sometimes to buy timber?
Mr. Quellmalz: Yes, sir, he does.
Examiner Burchmore: Does he pay fare when he travels on such trips?
Mr. Quellmalz: Well I don't know whether he does or not. I have never seen him use his ticket.
Examiner Burchmore: You suppose he uses a pass on the roads that he has it?
Mr. Quellmalz: Yes, I suppose so.
Examiner Burchmore: What is the rate to St. Louis from
6218 Brookings?
Mr. Quellmalz: Fourteen cents now.
Examiner Burchmore: What distance is that on the Iron Mountain from Mollus to St. Louis?
Mr. Quellmalz: I think it is about 205 miles.
Examiner Burchmore: Mr. Walter?
Mr. Walter: I don't think I have any questions I wish to cover. You have never refused to haul any traffic that has been offered to you by any of these outsiders?
Mr. Quellmalz: None whatever, no, sir.
Mr. Walter: That is all.

Cross-examination:

Mr. Coleman: Mr. Quellmalz, you referred to a barge line that you intended to operate in conjunction with the railroad. Have you decided upon the rates that you intend to put in effect?
Mr. Quellmalz: Not yet, no, sir.
Mr. Coleman: Do you intend to devote the capacity of that barge line to hauling ties?
Mr. Quellmalz: Well, yes, ties and bolts.
Mr. Coleman: Have you any idea of the basis of rates that
6219 you intend to put into effect?
Mr. Quellmalz: Why I don't know. I think that we will write to the Commission of Arkansas and ask them what we have a right to charge on that kind of transportation.
Mr. Coleman: You have fully decided on making the investment?

Mr. Quellmalz: Yes, I think we have.

Mr. Coleman: Well, in doing so, and canvassing the matter, you must have approximated the earning power of the barge line, did you not?

Mr. Quellmalz: Yes, we did.

Mr. Coleman: Now about what approximate revenue did you figure that the barge line and the railroad company should earn per hundred pounds on ties to the point of junction with the Iron Mountain road?

Mr. Quellmalz: Well about six cents.

Mr. Coleman: Six cents per hundred?

Mr. Quellmalz: Yes, sir.

Mr. Coleman: What?

Mr. Quellmalz: Yes, sir.

Mr. Coleman: What proportion of that did you expect to get from your connection—your standard railroad connection?

6220 Mr. Quellmalz: I do not get that question.

Mr. Coleman: Did you expect to get any or all of the six cents per hundred pounds from your connection—the Iron — road or its connection?

Mr. Quellmalz: No, we intend to operate those barges as a local transportation company, not in connection with the railroad.

Mr. Coleman: Not in connection with the railroad?

Mr. Quellmalz: That is, deliver the stuff to the railroad company, but we expect to make that a local charge.

Mr. Coleman: Then you expect, however, simultaneously that in handling the ties the railroad will get a proportion of the rate?

Mr. Quellmalz: Certainly, we want to increase the earnings of the railroad company as much as we possibly can.

Mr. Coleman: Now, what did you calculate that you would get from the amount accruing to the Iron Mountain and its connections and your railroad line on the ties?

Mr. Quellmalz: Well I don't know; I could not answer that question.

Mr. Coleman: You testified, however, that you had in
6221 mind an earning that the railroad was to get as a proportion of a through rate. Now, what proportion—have you no idea? You say you have planned on the investment.

Mr. Quellmalz: Well, they will get their regular division of three cents from the Iron Mountain Railroad.

Mr. Coleman: Then you have figured on three cents. What did you figure that your boat line would receive, three cents or the balance of the six?

Mr. Quellmalz: Yes, that is what we figured. We don't know whether it will pay or not. We have to try it out first.

Mr. Coleman: Not being safe in your judgment as to whether it would pay or not, it was intended, was it not, that your lumber company or some affiliated interests with your railroad or boat line would buy these ties?

Mr. Quellmalz: Well, no. We do not expect to sell those ties to our railroad or to the lumber company.

Mr. Coleman: But my question intended to ascertain from you whether as a commercial proposition someone affiliated with your railroad or your lumber company would go into the market and buy these ties.

Mr. Quellmalz: No, sir.

Mr. Coleman: You did not think——

6222 Mr. Quellmalz: No, sir.

Mr. Coleman: That that was the idea?

Mr. Quellmalz: No, sir, it was not.

Mr. Coleman: You say you are secretary of the company?

Mr. Quellmalz: Yes, sir.

Mr. Coleman: Do you enter into the matter of planning for investments of this kind?

Mr. Quellmalz: No, sir, I do not.

Mr. Coleman: Was it your expectation that your boat line would handle these ties from the dock onto the barge?

Mr. Quellmalz: Yes, it was.

Mr. Coleman: And discharge them and load them onto the cars?

Mr. Quellmalz: Yes, I think it was.

Mr. Coleman: Do you think it can operate that service for three cents a hundred?

Mr. Quellmalz: I think we could, yes, because we can load the cars right from the barge that we bring them down on and load them right——

Mr. Coleman: What becomes of the load?

Mr. Quellmalz: You can take them right from the barge. The barge is right level with the railroad tracks there, the surface of the car would be level and we could take the ties right off of the

6223 barges and transfer them onto flat cars, provided we could get the flat cars.

Mr. Coleman: Have you tried that to find out what it would cost?

Mr. Quellmalz: No, we have never tested it.

Mr. Coleman: Then you expect to load those ties onto a boat and take them up and load them onto cars and make a profit on three cents per hundred pounds?

Mr. Quellmalz: That is our intention, yes, sir.

Mr. Coleman: You spoke of someone in charge of the purchases of timber for your company riding on free transportation or having free transportation.

Mr. Quellmalz: I said that our general superintendent has transportation over the Iron Mountain Railroad.

Mr. Coleman: I understood you to testify that someone that bought timber for you had this transportation.

Mr. Quellmalz: Well, this gentleman is employed as agent of the Quellmalz Lumber Company. He does buy timber for the Quellmalz Lumber and Manufacturing Company; yes, sir, he is employed by them.

Mr. Coleman: Does he buy lumber also?

Mr. Quellmalz: Yes, sir, he does.

6224 Mr. Coleman: Do you haul logs in on other lines to your mill?

Mr. Quellmalz: No, sir.

Mr. Coleman: Have you mills elsewhere?

Mr. Quellmalz: No, sir.

Mr. Coleman: What occasion would there be for him to buy timber then?

Mr. Quellmalz: He floats it down the Black River.

Mr. Coleman: That is, he buys it down the Black River?

Mr. Quellmalz: Yes, sir.

Mr. Coleman: Then he would have no occasion to use this annual transportation for buying timber on these railroads?

Mr. Quellmalz: Why, yes, I guess he would have.

Mr. Coleman: What would you do with that timber?

Mr. Quellmalz: Well we would float it down the Black River to our sawmill which crosses the Iron Mountain tracks.

Mr. Coleman: Well, I mean buying timber on the railroad. Would you buy it on the Iron Mountain Railroad?

Mr. Quellmalz: Yes, sir.

Mr. Coleman: And pay a rate on that timber?

Mr. Quellmalz: We do not buy it on the Iron Mountain Railroad. We buy it on the Black River.

Mr. Coleman: You were asked the question as to whether
6225 an annual pass was ever used in connection with trips made by this man buying timber. I presume that he bought the timber where he used the transportation. He did not use the annual transportation of the Iron Mountain road on the river, did he?

Mr. Quellmalz: No. I don't think you understand that thoroughly. This timber is located along the Black River, and the Iron Mountain Railroad runs along the Black River and crosses the Black River at two intersections. Now, this timber lies in between the Black River and the Iron Mountain Railroad tracks.

Mr. Coleman: Does he buy lumber also?

Mr. Quellmalz: Yes, sir, he does.

Mr. Coleman: He would buy ties too, wouldn't he?

Mr. Quellmalz: Well, I don't know as he ever bought any ties.

Mr. Coleman: Are you sure now that it was not contemplated when you decided to make the investment in the barge line that your lumber company or your railroad company having this man as their buyer, would buy the ties?

Mr. Quellmalz: No, sir.

Mr. Coleman: Then it is to transport ties from different people?

6226 Mr. Quellmalz: That is the idea, yes, sir.

Mr. Coleman: Have you in mind any concern that will buy those ties?

Mr. Quellmalz: Why I don't know who would buy them, but there are people on the Black River above us who have land that they are clearing, and there is a good grade of lumber on that property outside of tie timber. Now, they clear that out and they make ties out of that timber, and they will give those ties to us to haul down to our railroad, you understand, and send them out, but

we have nothing to do with the selling of those ties or the purchase of those ties.

Examiner Burchmore: If they wanted to ship those ties out over the Iron Mountain Railroad instead of floating them down the Black River, how far would they have to team them to get them to the Iron Mountain?

Mr. Quellmalz: Seven miles, I think.

Mr. Coleman: And they could run them by barge down to the Iron Mountain road the same way?

Mr. Quellmalz: No, they could not run them down to the Iron Mountain road by barge.

Mr. Coleman: I understand your testimony to mean that you expect for three cents per hundred pounds you will be able to
6227 see a profit in handling those ties onto your barge, transporting them, taking them off of the barge and loading them on the cars?

Mr. Quellmalz: Well now I said I thought that that would be the charge. Now I am not sure.

Mr. Coleman: You know that your company has no purpose in mind of going in the market to buy them?

Mr. Quellmalz: I am positive of that, yes, sir.

Mr. Coleman: That is all.

Mr. Walter: There is just one question I want to ask. Three cents a hundred pounds would be how much per tie? How much would a tie weigh?

Mr. Quellmalz: A tie will weigh about from 170 to 200 pounds.

Mr. Walter: That is all.

6228 *Trinity Valley & Northern Railway Company.*

J. J. BALDERACH was called as a witness, and having been duly sworn, testified as follows:

Direct examination:

Examiner Gutheim: State your name to the reporter.

Mr. Balderach: J. J. Balderach.

Examiner Gutheim: Where do you live, Mr. Balderach?

Mr. Balderach: Dayton, Texas.

Examiner Gutheim: What is your occupation?

Mr. Balderach: I was formerly treasurer and auditor of the Trinity Valley & Northern, but I hold the title of auditor of the Trinity Valley & Northern, about since the first of the year.

Examiner Gutheim: Will you describe the location of the Trinity Valley & Northern Railway?

Mr. Balderach: Yes, I have a map here that I would like to submit.

Examiner Gutheim: Will you file the map?

Mr. Balderach: Yes, for the record, and I will try to explain this more fully.

(The map so offered and identified was received in evidence and thereupon marked "Balderach Exhibit No. 1," received in
6229 evidence January 27, 1911, and is attached hereto.)

Examiner Gutheim: According to this map then, the road runs from Dayton on the T. & N. O. Railroad?

Mr. Balderach: Yes, sir.

Examiner Gutheim: In a sort of a general northerly direction?

Mr. Balderach: Northeasterly direction, I believe it is, more.

Examiner Gutheim: What is the other terminus?

Mr. Balderach: It is Fouts, Texas. We have extended the line eight miles north of Fouts to a place called Lumm, designated up here as Mile 18. That eight miles north of Fouts has not as yet been put in operation, but is expected to be put in the first of February, freight and passenger service will be extended to that portion of the line.

Examiner Gutheim: How much have you been operating up to the present time?

Mr. Balderach: Ten miles.

Examiner Gutheim: And your road to go into operation about the 1st of February will be eight miles further?

Mr. Balderach: Yes, sir; making a total of eighteen miles.

Examiner Gutheim: Is that road standard gauge throughout?

6230 Mr. Balderach: Yes, sir.

Examiner Gutheim: About how heavy a rail?

Mr. Balderach: Fifty pound rail.

Examiner Gutheim: Is that rail owned by the Trinity Valley & Northern Railroad?

Mr. Balderach: No, sir, it is leased.

Examiner Gutheim: Who from?

Mr. Balderach: Texas & New Orleans Railroad Company.

Examiner Gutheim: What is the consideration paid for the lease?

Mr. Balderach: $100 per mile per annum, or the equivalent of 4 per cent on $40,000.

Examiner Gutheim: Have you any other connection?

Mr. Balderach: Yes, sir.

Examiner Gutheim: Besides the T. & N. O. connection?

Mr. Balderach: Yes, sir, Fullerton, Texas, with the Beaumont, Sour Lake & Western Railway Company.

Examiner Gutheim: Is that a Frisco line?

Mr. Balderach: That is what they call the Frisco Lines in Texas.

Examiner Gutheim: What is the most important industry *of* the line of this road?

6231 Mr. Balderach: Forest products.

Examiner Gutheim: And what company owns the largest mill?

Mr. Balderach: The Dayton Lumber Company.

Examiner Gutheim: Where is that mill located?

Mr. Balderach: At Ladd, Texas, approximately a mile from the trunk line.

Examiner Gutheim: Is it all of a mile?

Mr. Balderach: Approximately a mile, it is about 5,000 feet.

Examiner Gutheim: How far is that from the Frisco connection at Fullerton?

Mr. Balderach: It is 4.8 miles.

Examiner Gutheim: Is the Dayton Lumber Company as a corporation, or through its stockholders, interested in the Trinity Valley & Northern Railway?

Mr. Balderach: Yes, sir; the controlling interest of the railroad company is held by the stockholders of the Dayton Lumber Company.

Examiner Gutheim: Is all the stock of the railroad company held by the stockholers of the Dayton Lumber Company?

Mr. Balderach: No, sir.

Examiner Gutheim: How much stock of the railroad com-
6232 pany is held by parties not connected with the lumber company in any way?

Mr. Balderach: Well, there is Mr. W. P. Cottingham, used to be secretary of the company, he owns one share, and S. H. Fullerton, of St. Louis, who is interested in the company, he does not own any stock in the lumber company. I cannot give you the shares. I think our report to the Railroad Commission of Texas shows the individual stockholders, 50 shares.

Examiner Gutheim: Mr. Fullerton owns 50 shares?

Mr. Balderach: Fifty shares.

Examiner Gutheim: Is he the only stockholder outside of the stockholders of the Dayton Lumber Company owning anything more than sufficient to qualify as a director?

Mr. Balderach: Sir?

Examiner Gutheim: I say, is Mr. Fullerton the only stockholder of the railroad not a stockholder of the Dayton Lumber Company who holds more stock than just what is necessary to qualify as a director?

Mr. Balderach: Well, I think there is Mr. L. J. Boykin. I am not positive, but I think he does not own any stock in the Dayton Lumber Company. He owns one share, I think, one or two
6233 shares of the railroad.

Examiner Gutheim: But the same individuals through stock ownership can control the policy of both these corporations?

Mr. Balderach: Yes, sir. As I stated before, the controlling interest of the railroad was held by the stockholders of the Dayton Lumber Company.

Examiner Gutheim: You say Mr. S. H. Fullerton has no interest whatever in the Dayton Lumber Company?

Mr. Balderach: Yes, sir.

Examiner Gutheim: Do you know whether any of the so-called Fullerton Companies have any interest in the Dayton Lumber Company?

Mr. Balderach: I am not familiar with the accounts of the Dayton Lumber Company.

Examiner Gutheim: The Chicago Lumber & Coal Company, do they have any interest in it?

Mr. Balderach: I have no connection with the lumber company at all. Never have seen their books, never have looked into the general subject.

Examiner Burchmore: Have you any opinion on that subject?

Mr. Balderach: No, sir, I have never formed any opinion because I have not investigated the business of the lumber
6234 company. I am not a lumberman.

Mr. Walter: Mr. Fullerton is here and he can tell you.

Examiner Gutheim: Mr. Balderach, does the Dayton Lumber Company sell its products direct through the Dayton Lumber Company or through a sales agent?

Mr. Balderach: Through a sales agency.

Examiner Gutheim: What sales agency?

Mr. Balderach: It is the Alf. Bennett Lumber Company of St. Louis.

Examiner Gutheim: Are the officials of the railroad company the same individuals who hold some official relation to the lumber company?

Mr. Balderach: Yes, sir.

Examiner Gutheim: About how much equipment do you have?

Mr. Balderach: We have eight flat cars, seven box cars, one passenger coach, or a total of sixteen cars of all classes, and one locomotive, all equipped with train brakes, automatic couplers, safety appliances, and so forth.

Examiner Gutheim: What is the investment of this company in the cost of its road and equipment?

Mr. Balderach: The latest trial balance that we have is of date October 31, 1910, and the physical property owned at that
6235 date is $122,059.38.

Examiner Gutheim: That covers the eighteen miles of road right up to Mile Post 18?

Mr. Balderach: Yes, sir.

Examiner Gutheim: Or only such part as was built up to last October?

Mr. Balderach: Up to October 31, 1910.

Examiner Gutheim: Was it practically all constructed at that time?

Mr. Balderach: No, sir; there has been quite a little construction work carried on since.

Examiner Gutheim: What is the total amount of capital stock outstanding?

Mr. Balderach: $25,000.

Examiner Gutheim: What other indebtedness does the company owe?

Mr. Balderach: We are indebted to the Dayton Lumber Company for about $62,537.87, if I remember the account correctly.

Examiner Gutheim: Have you any other outstanding indebtedness?

Mr. Balderach: Yes, we have some trust notes covering a
6236 purchase of five flat cars from the Hicks Locomotive & Car Works.

Examiner Gutheim: How much is that?

Mr. Balderach: It was originally $1,625, but the notes have been taken up as they matured, and we have decreased the indebtedness now to $180.53.

Examiner Gutheim: So that you seem to have about $87,000 outstanding in capital indebtedness?

Mr. Balderach: Yes, sir. Approximately $87,000, more or less.

Examiner Gutheim: How do you carry the rest of the amount, the difference between the equipment investment of $122,000 and this $87,000, as a surplus?

Mr. Balderach: No, that is not a surplus. Our voucher account, audited voucher account shows liabilities of $8,721.52. We have a pay check account which a portion of that represents, pay checks issued in favor of employés engaged in construction service. We also are indebted to several contractors for grading work, which has never been paid for.

Examiner Gutheim: How much is paid to the Dayton Lumber Company in the way of interest on the amount due it?

Mr. Balderach: 8 per cent per annum.

6237 Examiner Gutheim: Is that paid from year to year?

Mr. Balderach: Why, it has not been paid. It has been accrued. We have never had enough money to take up all our obligations, and if we ever do, we will pay them.

Examiner Gutheim: Does the road run its train on a regular schedule?

Mr. Balderach: Yes, sir; I have a time table here I would like to file into the record.

Examiner Gutheim: You may file that as your exhibit 2.

Mr. Balderach: All right, sir.

(The time table so offered and identified, was received in evidence and thereupon marked "Balderach Exhibit No. 2, received in evidence January 27, 1911", and is attached hereto.)

Examiner Gutheim: Do you operate both passenger and freight service?

Mr. Balderach: Yes, sir, we operate on a double daily service.

Examiner Gutheim: Do you carry any United States mail or express?

Mr. Balderach: Yes, sir, under formal contract entered into at the Post Office Department of the United States Govern-
6238 ment, effective November 1, 1910.

Examiner Gutheim: What other communities along the road are served by this company as a common carrier?

Mr. Balderach: Well, Dayton, Texas, is the junction point with the T. & N. O. Railroad Company, and it is assuming proportions as a distributing center, have five or six mercantile houses there, and those merchants supply the interior farmers, that is, I mean by interior farmers, the people living adjacent to the line of the Trinity

Valley & Northern for a distance of three to five miles. We have a station at Ladd, Texas, which is an open station, and we have several tie camps along the line. We also have an open station at Fouts, Texas, and we contemplate establishing an agency at Lumm station.

In connection with the Lumm station, I wish to state that it is located on what is known as Talkington Prairie, and it is an old settlement up there. The land is very productive, I understand, and we might possibly have a large town there some day—that is, I say a large town, a large country town, probably seven to eight hundred to a thousand people. Arrangements have been made to establish a town there. One of the merchants who has a grocery store
6239 and general merchandise establishment, having the post office, is going to move his place of business on our line.

Examiner Gutheim: Ladd, where you have an open station, is the site of the Dayton Lumber Company's mill is it not?

Mr. Balderach: Yes, sir.

Examiner Gutheim: And is the railroad station agent a mill employé or a lumber company employé?

Mr. Balderach: No, sir, the agent at Ladd, Texas, has no connection with the Dayton Lumber Company.

Examiner Gutheim: Now, at Fouts, where your line has opened a station, is that a logging camp of the Dayton Lumber Company?

Mr. Balderach: Yes, sir, it might be considered a logging camp. It was established there because the people who owned the land dedicated a town site. It was formerly called Rosswood. Messrs. Ross & Wood of Houston Texas, owned the land and dedicated a townsite that was named in their honor, but subsequently changed to Fouts, Texas; I presume in honor of our former president.

Examiner Gutherim: Well, is the agent at Fouts an employé of the lumber company?

Mr. Balderach: He was but he is not now.

6240 Examiner Gutheim: He is not now?

Mr. Balderach: No, sir.

Examiner Gutheim: This station called Lumm, is the Dayton Lumber Company logging in that vicinity at the present time?

Mr. Balderach: Yes, sir. I don't know whether they are logging right at Lumm, but I know it is north of Fouts.

Examiner Gutheim: Is there a camp at Lumm?

Mr. Balderach: No, the camp is at Fouts, Texas.

Examiner Gutheim: How far is that projected extension up to the Santa Fe connection at Lamb?

Mr. Balderach: I think it is about twelve miles.

Examiner Gutheim: Has there been any actual work done on that line?

Mr. Balderach: Yes, sir, our engineer, Mr. A. J. Wise, of Houston, Texas, has made a preliminary survey up through that territory and has just sent in his bill about thirty days ago for $450 for his services.

Examiner Gutheim: Now, do you make any distinction in the character of your railroad service between Dayton or Ladd and Fouts, and between Fouts and Lumm?

Mr. Balderach: We do not operate to Lumm now. The operation of the railroad has not been continued to Lumm because we
6241 do not have the rails for that portion of the line, but we have a service between Dayton and Ladd and Fouts and Fullerton. Our train No. 1 leaves Fouts and runs into Dayton, and our Train No. 2 leaves Dayton and runs down to Fouts. Train No. 3 leaves Fouts and runs to Ladd, and Train No. 4 leaves Ladd and runs out to Fouts.

Examiner Gutheim: There is some railroad operation north of Fouts up to Lamb at the present time, is there not?

Mr. Balderach: The Dayton Lumber Company's engine does a logging service.

Examiner Gutheim: That is the track extension that has recently increased your cost of road?

Mr. Balderach: Yes, sir. I might also say that in the month of December there was a crowd came out from Houston, went out to the northern terminus of our line, and we charged them for the train haul, also charged them for the additional equipment. That is the only revenue from train service on that portion of the line.

Examiner Gutheim: How long has the Dayton Lumber Company been running its logging trains between Lamb and Fouts?

Mr. Balderach: Why now, the Dayton Lumber Company has not been operating to Lamb, it is north of Fouts.

6242 Examiner Gutheim: Well, north of Fouts.

Mr. Balderach: Yes, sir—Well, it is over a year.

Examiner Gutheim: And what consideration do they pay to the Trinity Valley & Northern Railroad Company for the service?

Mr. Balderach: They now pay one dollar per train mile under a trackage contract. I don't know whether that contract has been filed with the Commission or not. If it has not, we will file a copy of it.

Examiner Burchmore: Suppose you file a copy.

Mr. Balderach: I have not a copy here, but the original. I will have a copy made from that and send it to you.

Examiner Gutheim: About how many cars in a train do you run?

Mr. Balderach: Why, I have some statistics here that show our average number of loaded cars in our freight trains for the last fiscal year, that I would like to offer.

Examiner Gutheim: This statement, Mr. Balderach, covers the general financial and operating statistics for the road for the fiscal year ending June 30, 1910?

Mr. Balderach: Yes, sir, the accounts are open for inspection.

Examiner Gutheim: You may file that as your Exhibit
6243 No. 3.

(The statement so offered and identified was received in evidence and thereupon marked "Balderach's Exhibit No. 3, received in evidence January 27, 1911", and is attached hereto.)

Mr. Balderach: The information concerning the number of cars on our trains from the statistical statement, shows that we have had 2.18 cars in each train, that is, as a statistical item, but the average

loaded freight cars in each freight train including mixed, is 2.18 cars.

Examiner Gutheim: Does that refer to the logging trains of the Dayton Lumber Company?

Mr. Balderach: No, sir, the logging trains of the Dayton Lumber Company do not enter into the statement now, that is, after this fiscal year. I would modify that statement by stating that from July 1, 1909, to December 31, 1909, the logs were hauled by our trains at a compensation of $5 per car covered by a special application made to the Railroad Commission of Texas. Subsequent to January 1, 1910 a contract was entered into between the Dayton Lumber Company and the Trinity Valley & Northern Railway Company, whereby the railway company was to receive a compensation of $1.50 per
6244 train mile. That contract was subsequently modified to a rate of a dollar per train mile, and the tonnage for the first six months of the fiscal year, ending June 30, 1910, is included in this exhibit as traffic movement for the fiscal year.

Examiner Gutheim: Can you say about how many cars per train the lumber company puts in logging trains?

Mr. Balderach: About nine.

Examiner Gutheim: And they would run about how many feet per car?

Examiner Balderach: I could not state as to the number of feet in each car.

Examiner Gutheim: Would these cars average about 3,000 feet?

Mr. Balderach: I could not answer that question because I don't know anything about the density of the load on those logging cars.

Examiner Burchmore: Characteristic logging cars, are they?

Mr. Balderach: Yes, sir, skeleton cars.

Examiner Gutheim: About how many miles would they pay that one dollar per train mile on the average?

Mr. Balderach: They operate four trains a day now.
6245 They run about 72, 76 or 78 miles.

Examiner Burchmore: Per day or per train?

Mr. Balderach: Per day, four trains per day; the mileage of the road is only 18 miles.

Examiner Gutheim: Do they pay a dollar per train mile on empties out as well as loads brought in?

Mr. Balderach: Yes, sir, all trains operated by the lumber company, the lumber company pay a dollar per train mile.

Examiner Gutheim: So bringing in two trains a day, with eight or nine cars each, would be about eighteen loaded cars a day?

Mr. Balderach: Yes, sir.

Examiner Gutheim: For which they would pay, if they traveled out fourteen miles, $56.00?

Mr. Balderach: If they traveled fourteen miles, yes, sir.

Examiner Gutheim: Are they traveling more or less than fourteen miles now?

Mr. Balderach: The last month that I have a bill against the Dayton Lumber Company shows that they operated about seventy-two miles a day.

Examiner Gutheim: Seventy-two miles?

Mr. Balderach: Yes, sir.

6246 Examiner Gutheim: So they would be paying about four dollars per car?

Mr. Balderach: Approximately.

Examiner Gutheim: Does that contract with the Dayton Lumber Company require the approval of the Texas Railroad Commission?

Mr. Balderach: I think it does.

Examiner Gutheim: Was it approved?

Mr. Balderach: Now, the contract was drawn up by Mr. Fouts, the former president of the company, and since that time there has been a change of officers, and I don't know whether that contract has been approved by the Commission or not. However, if you wish to be further informed in connection with that contract, I will try to make an investigation and advise you as to the facts.

Examiner Gutheim: I ask because I desire to know whether the State of Texas' special rate of $5.00 per car would be superseded by this contract without any comment from the Commission.

Mr. Balderach: As I said before, I don't know whether that matter has been taken up with the Commission or not. I am not in a position to answer. It may be, our former president took that

6247 matter up with the Commission and it probably authorized him to execute the contract. However, I will state that from the latest report of the Commission, it is shown that we have such a contract in effect with the Dayton Lumber Company.

Examiner Gutheim: That is a fact. Is it likely that the Dayton Lumber Company will log in any more to the mill at Ladd than they do at the present time?

Mr. Balderach: Well, sometimes they do. There is a lot of cut-over land there you know. They make a contract with these loggers to bring in the timber close to the track. Some has been brought to the mill within a distance of three to five miles.

Examiner Gutheim: The point is that on this contract rate of a dollar per ton mile, if they are logging near by the road, it makes their rate a great deal lower, but if they are going to log out further, it will make their rate per car much higher.

Mr. Balderach: I understand that. The extension you see, north of Lumm to Lamb, Texas, will increase the mileage of our line twelve additional miles. That is, when we built our extension up in that territory, and they still operate under the same basis,

6248 the rates per car will increase a considerable proportion.

Examiner Gutheim: Now, do you have through rates from the mill at Ladd on foreign products by both the T. & N. O. and the Frisco line?

Mr. Balderach: Yes, sir.

Examiner Gutheim: And what divisions acrue to the Trinity Valley & Northern out of those through rates?

Mr. Balderach: Well, we have numerous division sheets on file, and all of them carry a different division. On some I will state that on traffic destined to points east of the Mississippi River, moving by the New Orleans gateway, in connection with the T. & N. O. Rail-

way, the Louisiana Western, the M. K. & T., and the I. C. and their connections, we get two cents out of the proportion up to New Orleans. The proportion to New Orleans is eight cents, and the lines beyond New Orleans get the balance of the through rate. Traffic destined to points west of the Missouri river, we get 20 per cent of the Sunset's proportionate rate up to their connections with the lines leading west to the Texas gateways, leading out of Shreveport, Sherman, Denison, Fort Worth and Dallas gateways.

Examiner Gutheim: Is there any provision in the divis-
6249 ional arrangement whereby the Sunset lines must first receive a minimum revenue before you get any?

Mr. Balderach: There is a division sheet on file to that effect, but I wish to state that the Trinity Valley & Northern Railway Company does not route any lumber via that gateway.

Examiner Burchmore: Will you give us your reason why they do not?

Mr. Balderach: Why, yes. We route the lumber to the best advantage of the Trinity Valley & Northern, to secure to it the greatest revenue for the service performed. The division sheets that I have mentioned, the Sunset line received a minimum of eight cents.

Examiner Gutheim: You don't route it where they get seven cents?

Mr. Balderach: I don't understand your question?

Examiner Gutheim: You don't route it where the Sunset line will get seven cents and you get nothing?

Mr. Balderach: The Sunset Line reserves a minimum of eight cents.

Examiner Gutheim: What divisions do you get on the
6250 Frisco?

Mr. Balderach: Why, we get 2½ cents per hundred pounds where the rates are equal, and when the rates are lower via the Florida gateway in connection with the Frisco lines than via the Texas gateway in connection with the Sunset lines, we receive one cent and a half per hundred pounds.

I might say further, that at one time, when I first became connected with the Trinity Valley & Northern Railway Company, that our rate was lower via the Florida gateway than via the Texas gateway in connection with the Frisco and Santa Fe lines, and the Trinity Valley & Northern was not getting any division at all, and when that division was taken up with the Frisco officials, we told them that we would not give them any business at all unless they allowed us a division for the service performed by the T. V. & N. Railway Company.

Examiner Gutheim: Do you get any higher divisions than three cents?

Mr. Balderach: Yes, sir, our maximum division is four cents per 100 pounds, and that is on intrastate traffic, and we receive that division from the Sunset Central lines on a gradual division basis. Where the rate is 18¾ cents per hundred pounds from point of shipment to destination, local points or competitive points on the
6251 Sunset Central lines, we are allowed 4 cents per 100. Where the through rate is under 18¾, and over 15, or 15 cents, we

receive 3½ cents a hundred pounds. Between 15 and 10 we receive 3 cents, and under 10 cents we receive 2½. We also have division sheets in effect via the Frisco gateway allowing us practically the same division on competitive business. On traffic destined beyond the Sunset Central lines we receive 20 per cent of their proportion up to their immediate connection.

Examiner Gutheim: Does the statement which you have submitted show about what the average division was received by the Trinity Valley & Northern for each of the lines?

Mr. Balderach: For each of the lines, no, sir; I have not prepared any statement.

Examiner Gutheim: Does it show the general average division?

Mr. Balderach: On lumber it is 2½ cents on the average.

Mr. Walter: To be exact, 2.59.

Mr. Balderach: 2.575 of a cent, to be exact.

Examiner Gutheim: The figure that you gave just now is the average division, that is the average per 100 pounds of all revenues from divisions received, is it?

6252 Mr. Balderach: On lumber only. I think I will let you look at my statement here and I can give you a better idea of what it covers. Average receipts per 100 pounds, lumber, 2.575 cents.

Examiner Gutheim: Do you have through rates inbound and outbound on commodities other than forest products?

Mr. Balderach: Yes, sir. I would further add that I have prepared interline accounts, reporting proportions to our connections.

Examiner Gutheim: Via both roads?

Mr. Balderach: No, not via both roads; via the Frisco. We have interline accounts and through billing arrangements.

Examiner Gutheim: Do you have through rates via both roads?

Mr. Balderach: Yes, sir, we have through rates. Business originating on the Sunset Central lines and their connections, is handled on a transfer at Dayton and rebilled by our joint agent.

Examiner Gutheim: Will you give generally what divisions you receive on commodities other than forest products?

Mr. Balderach: On traffic originating in defined territory north of the Ohio River, the proportion up to the Mississippi river, we are allowed 12-½ per cent of the through rate. Traffic

6253 originating in seaboard territory, we take an arbitrary proportion up to New York, and we are entitled to our 12-½ per cent of the balance. That is on interstate shipments in less than carload lots. On carload shipments specific division sheets are issued, allowing our company various amounts. We get 3-½ cents per hundred pounds on carloads, and our minimum on less than carloads is 10 cents. On intrastate shipments, the divisions are based on revenue, using each line's local as a factor. That is, when the traffic originates on other than the Sunset Central lines or the Frisco lines. When the traffic originates on the Frisco lines, our division is based on the mileage arrangement. As the Sunset Central mileage increases our proportion decreases accordingly.

Examiner Gutheim: Now, are the divisions on lumber fixed on a milling in transit basis?

Mr. Balderach: No, sir, we have no milling in transit arrangement on our lines.

Examiner Gutheim: Well, on that haul that is performed by your company upon the product of the mill to the T. & N. O. is how much?

Mr. Balderach: The length of haul?

Examiner Gutheim: Yes.

Mr. Balderach: Approximately the haul is over three-
6254 quarters of a mile.

Examiner Gutheim: And that is always performed with the power of the Trinity Valley & Northern?

Mr. Balderach: Yes, exclusively.

Examiner Gutheim: The T. & N. O. power never goes on to your road at all?

Mr. Balderach: No, sir, the T. & N. O. does not operate on our tracks at all.

Examiner Gutheim: Likewise you haul approximately a distance of five miles to the Frisco.

Mr. Balderach: Yes, sir.

Examiner Gutheim: Now, does this statement of your financial and operating statistics for the year ending June 30, 1909, show the division of your tonnage and revenue?

Mr. Balderach: I wish to correct you there. That is for the fiscal year ending June 30, 1910.

Examiner Gutheim: I beg your pardon. Does it show the division of your tonnage and revenue, so that we can see what business is done for the Dayton Lumber Company and the revenue therefrom, and what business is done for the general public outside of the Dayton Lumber Company?

Mr. Balderach: Well, these financial statements and sta-
6255 tistical returns I have here for the fiscal year ending June 30, 1910 have not been segregated as between independent shippers and the Dayton Lumber Company. However, the statement shows for itself, and under the products of agriculture there is an item of corn, twenty-one tons that is an independent shipment. Under the products of the forest, ties, 4401 tons, wood, 1231 tons. stave bolts 2400 tons.

In manufactures we have, machinery 24 tons, ice 205 tons.

We have merchandise 604 tons, emigrant outfits, 10 tons.

A proportion of the merchandise is hauled for the Dayton Lumber Company, but it is such a small amount I don't think it would be of any value to have it in the report.

Examiner Gutheim: It is approximately correct to say that the items which you have mentioned are all the items that were handled for the general public?

Mr. Balderach: Approximately speaking. I have not prepared an exact statement from the waybills, because it entailed a good deal of clerical work, and I did not have the time to do it. I am the only one who handles the affairs of the railroad company, and

when I file my monthly reports with the Interstate Commerce Commission and the Railroad Commission of Texas, I think I have done a good month's work.

6256 Examiner Burchmore: It looks that way.

Mr. Balderach: I have. What was that, Mr. Examiner?

Examiner Burchmore: The figures you read, Mr. Balderach, seem to foot up 10 per cent of the total.

Mr. Balderach: On what stuff?

Examiner Burchmore: Outside.

Mr. Balderach: I have a little pencil memorandum here that I have prepared from my returns for the four months of the present fiscal year, which seems to indicate that the outside tonnage is approximately 29.72 per cent.

Examiner Burchmore: That is quite an increase in proportion. How do you explain it?

Mr. Balderach: It would be explained by the reason that the present fiscal year the log tonnage does not enter into our traffic statement. You will notice the log tonnage is 32,085 tons, or 51.33 per cent. If you eliminate the log tonnage the percentage of the other items would be much greater than it was.

Examiner Gutheim: Why do you eliminate the log tonnage?

Mr. Balderach: The log tonnage is now handled exclusively by the T. & N. O. Railway Company locomotives under trackage arrangement.

6257 Examiner Gutheim: Well, if you let that appear in evidence it will explain the difference.

Mr. Balderach: For the previous year.

Examiner Burchmore: Does the present report give those figures?

Mr. Balderach: Yes, that is the percentage of revenue of each item to the total amount of revenue.

Examiner Burchmore: Less than 20 per cent of the revenue last year was derived from outside operation.

Mr. Balderach: Of course if you take the percentage based on this statement here, you see this revenue from the log tonnage is 42 per cent, and if you eliminate that it makes the difference.

Examiner Burchmore: How about the percentage of revenue this year?

Mr. Balderach: The percentage of revenue this year is 28.52 per cent. I wish to state in connection with this exhibit here that I just prepared it from my returns on those four months' statements.

Examiner Burchmore: You think as an accountant that these figures you have given us are sufficiently accurate for——

Mr. Balderach: I think they are all right.

6258 Examiner Burchmore: The percentage of error would be very small?

Mr. Balderach: Very small.

Examiner Gutheim: Taking the revenues on the one item of logs including four months this year, how does it compare with the total of twelve months the previous year?

Mr. Balderach: I have not made any comparison of our revenue —Why, yes, I could give it to you. I am not able to give you that information, but I will state that the revenue from the log service was approximately $3,000 a month, and our revenue from the operations of the joint track with the Dayton Lumber Company is, for the four months ended October 31st, $3,739. There has been considerable decrease, however. The last bill I made against the lumber company for trackage aggregated, I think, about $1,500 for the month of November.

Examiner Gutheim: Referring to your statement for the period, July 1, 1910 to October 31, 1910, it should be—It reads 1911——

Mr. Balderach: It must be a typographical error.

Examiner Gutheim: What item in your revenue account covers the amount received from the Dayton Lumber Company for
6259 trackage at $1.00 per mile?

Mr. Balderach: That comes under revenue from transportation. You will find it right down below.

Examiner Gutheim: You will submit this four months' statement, also that statement of the fiscal and financial operations for the previous year?

Mr. Balderach: Yes, sir.

Examiner Gutheim: It may be filed as an exhibit.

(The statement so offered and identified was received in evidence and thereupon marked "Balderach Exhibit No. 4, received in evidence January 27, 1911", and is attached hereto.)

Examiner Gutheim: Now, who does the log spur work of the Dayton Lumber Company?

Mr. Balderach: The Dayton Lumber Company do their own work.

Examiner Gutheim: Who does the construction work?

Mr. Balderach: Sometimes, when they might be short-handed, we will run our section men over on their spur work and put our section foreman's report of the number of days engaged in that class of service—we bill on the Dayton Lumber Company for that amount of time and also probably of roadmaster's time
6260 for supervision.

Examiner Gutheim: Then where the men handle the traffic, including the use of the Trinity Valley & Northern power and equipment on the logging spurs here, does the Dayton Lumber Company operate its own railroad?

Mr. Balderach: The Dayton Lumber Company operate its own locomotives.

Examiner Gutheim: On the logging spurs?

Mr. Balderach: On the logging spurs.

Examiner Gutheim: In fact, does all of the log spur work at its own expense?

Mr. Balderach: At its own expense. In connection with that exhibit of operation—you might call it a general statistical statement—in that statement of July 1, 1910 to October 31, 1910, the total tonnage handled for the Dayton Lumber Company is 5,638 tons, 70.28 per cent. The tons we have hauled are 9,843, or 32.36

per cent. Revenue, $3,054.08, or 71.48 per cent. Tonnage for the independent shippers is 2,385 tons, or 29.72 per cent. The ton mileage is 20,572 tons, or 67.64 per cent. The revenue is $1,218.66, or 28.52 per cent. Now, these figures there would indicate that our general mileage is greater for independent traffic than
6261 it is for the Dayton Lumber Company. In other words, we perform a greater transportation service for the independent shippers than we do for the Dayton Lumber Company, and we are serving territory not heretofore reached by rail transportation. This tonnage of staves, wood, etc., is products that are being secured from independent land owners, and I might further add that if our charter should be revoked by the state, that there is a considerable lot of timber up there that could not be shipped out only by the Dayton Lumber Company, and if they wanted to ship that out the Dayton Lumber Company would inform them that they are not a common carrier.

Examiner Gutheim: Mr. Balderach, do you file statements similar to these, periodically from month to month?

Mr. Balderach: No, not from month to month. I prepared that memorandum for my own information.

Examiner Gutheim: Are they sent to the head office of the company?

Mr. Balderach: Our president, our former president, is located there, and I show them to him to show him what we are doing.

Examiner Gutheim: No reports of this nature are given to
6262 Mr. Fullerton, are they?

Mr. Balderach: They are available, and if Mr. Fullerton wants to examine it I will be glad to give it to him.

Examiner Gutheim: Do you make an annual report or a monthly report to the Interstate Commerce Commission?

Mr. Balderach: I think they are on file, yes, sir. I have had correspondence in regard to the annual reports afterwards, had a statement from Mr. Burley.

Examiner Burchmore: If you made the annual report, what does the correspondence relate to?

Mr. Balderach: One or two items there, in the preparation of my annual report I failed to make returns on a certain page. We had an increase in the bonded indebtedness under the physical charges, which is a very important question to be answered. In a hurry I omit things, and it was not our intention to do so, and he directed my attention to it, and also,—I don't know whether I have mentioned the fact in this record or not about the discrepancy which I was telling you about in the tonnage of the coal consumed by the locomotives.

Examiner Burchmore: The Commission has a rule about that.

Mr. Balderach: I don't know what they want in that case.
6263 I did not answer that letter. I addressed a letter to the Commission.

Examiner Burchmore: That is not a matter that is of any legal consequence.

Cross-examination:

Mr. Walter: Mr. Balderach, has the Trinity Valley & Northern Railway Company ever had occasion to condemn property?

Mr. Balderach: Yes, sir, we had several condemnation suits, in fact, the award of the condemnation court was carried to the County court, tried by a jury there, and the complainants have appealed the case to the court of civil appeals.

Mr. Walter: Who was that man who appealed?

Mr. Balderach: The condemnation proceedings were originally against a Mrs. Hood, and unknown heirs, and the condemnation commission awarded something like $33 or $40—I think it was about thirty-three and some odd dollars, and later on Mr. Chapman came in and filed objections to the condemnation award.

Mr. Walter: Who is this Mr. Chapman?

Mr. Balderach: Mr. Chapman, from the best information I can obtain, is holding a lot of land in trust for the Kirby Lumber Company.

6264 Mr. Walter: What are his initials? J. R.?

Mr. Balderach: I think it is J. R. Chapman.

Examiner Gutheim: And he made the contention that you were not a common carrier?

Mr. Balderach: He made the contention that we were not a common carrier, and he further stated that he had an interest in that land that was condemned, he was the owner of the timber, and the condemnation commission in making the award failed to segregate the amount of the award, and he did not know whether it was all to be paid to J. R. Chapman, or whether it was all to be paid to Mrs. Hood or the unknown heirs. A jury in the county court at Liberty tried the case, and they increased the allowance to about forty some odd dollars, and they segregated the award between the Chapman interest and the Hood interest.

Mr. Walter: Did the court decide that you were a common carrier?

Mr. Balderach: They found that we were a bona fide common carrier entitled to exercise the power of eminent domain.

Mr. Walter: Has that been decided by the Appellate Court yet?

6265 Mr. Balderach: Not that I know of. Briefs have been filed, and I think a decision will probably be rendered within the next thirty days, if it has not already been passed upon.

Mr. Walter: Has the railroad Commission of Texas had before it the status of your road?

Mr. Balderach: Why, yes, sir.

Mr. Walter: Did they make any formal notice to you by way of letter or otherwise?

Mr. Balderach: Yes, we have a letter here addressed—from the Railroad Commission of Texas addressed to Mr. L. Fouts, our former president of the Trinity Valley & Northern Railway Company, signed by Mr. E. R. McLean, secretary, which I will read into the record.

(Mr. Balderach here read the letter referred to, which is in the words and figures following, to-wit:)

"Railroad Commission of Texas.

"AUSTIN, June 10, 1909.

"Mr. L. Fouts, President Trinity Valley & Northern Ry., Dayton, Texas.

"DEAR SIR: In connection with your application of April
6266 15, 1909, for recognition at the hands of the Commission, as common carrier, I quote the following opinion of Commissioner Williams, which opinion is concurred in by Commissioner Colquitt, and is therefore, the action of a majority of the Commission on this case:

"'The Railroad Commission is given no authority to determine when railroad companies are common carriers. On the contrary, the law itself fixes the status of such companies, and does this absolutely and without reference to the judgment or opinion of the Commission. Every railroad company organized under the laws of Texas has the right to construct and operate a railroad and all railroads are declared to be public highways and all railroad companies common carriers.

"'A railroad company having a Texas charter and owning a Texas line is a common carrier by force of the statute, and it is its duty to operate its road as a common carrier, complying with the laws of the State regulating such carriers, and obeying and conforming to the authorized rates, rules and regulations of the State Railroad Commission.

"'A declaration by the Commission has, in my opinion, no effect whatever upon the status of a railroad company.

6267 "'In company with Commissioner Colquitt, I inspected the road of the Trinity Valley & Northern Railway Company a few weeks ago, and found it in possession of and operating a railroad and apparently acting toward and transacting business with the public as a common carrier of freight and passengers, and since that time, I have, without taking any official action, expressed the belief, and now believe, that the company is a common carrier by rail in Texas and bound by all the statutes of the State on that subject. That the present traffic consists largely of the products of the forests tributary to its line, and that its traffic and revenues will apparently be injuriously diminished when these forests shall have been cut away, does not seem to me to be material. The Railroad Commission is given no power to limit the construction of railroads to territory which in its judgment will be perpetually profitable, or in any respect to control the location of such lines. Indeed, it requires only a moment's consideration to realize that limitations against the extension of transportation facilities into territories which promise, so far as we can see at this moment, only a temporary traffic would be unfortunate and injurious. To mention only a few of the many

products of a like nature which will occur to the minds of
6268 all, who is there that would contend against the construction of railroads to the coal and oil fields, and to the ore beds of this country? Yet all these yield temporarily only, but will anyone contend that they are for this reason alone to be denied transportation and kept out of use?

" 'It seems to me that these considerations are irrelevant and that when a duly organized railroad company comes to own a line of railroad, the Commission's jurisdiction attaches by virtue of the statutes forthwith and without action on the part of the Commission.

" 'I believe we are without legal authority to recognize a railroad company as a common carrier, except as such recognition may be incidental to an enforced division of rates or the performance of some other duty legally incumbent upon the Commission.

" 'But, if we are to make a practice of recognizing other companies, then I am unwilling to discriminate against the Trinity Valley & Northern by refusing its application.'

Yours truly,

E. R. McLEAN, *Secretary.*"

6269 Mr. Walter: Has the Railroad Commission of Texas made any orders relative to the construction or change of your line?

Mr. Balderach: Yes. At the time of our application for recognition as a common carrier, the Railroad Commission made an inspection of our line, and they recommended that a large curvature be eliminated, which necessitated the expenditure of approximately $2,500, in excess of the original estimate of the cost of the property abandoned, and we subsequently made an arrangement to have that curvature eliminated. A contract was given a contractor and he has been cutting through some hills there, and incidentally reducing the curvature. The excess over the original cost is now being carried right on our general balance sheet as property abandoned, chargeable to operating expenses under authority from the Railroad Commission, which is approved by Commissioner Harlan.

Examiner Gutheim: That is charged in the account all right.

Examiner Burchmore: What was that?

Mr. Balderach: I said the excess—rather, not the excess, but the excess cost of constructing this, or in other words, eliminating this large curvature—what I mean by excess is the cost of the abandoned property over this original construction is being car-
6270 ried on the balance sheet of the Trinity Valley & Northern Railroad Company in the account caption, "Property Abandoned, Chargeable to Operating Expenses," which is carried under authority from the Interstate Commerce Commission in the form of a letter approved by Commissioner Harlan, and Mr. H. C. Adam personally.

Examiner Gutheim: Have you got that letter here?

Mr. Balderach: I think I have it here.

Mr. Walter: I have here various tables I want to offer in evidence.

(The tables so offered and identified were received in evidence and thereupon marked respectively "Balderach Exhibits Nos. 5 and 6, received in evidence January 27, 1911," and are attached hereto.)

Mr. Balderach: Here is the general balance sheet.

Mr. Walter: For what period?

Mr. Balderach: For the period ending October 31, 1910.

(The balance sheet so offered and identified was received in evidence and thereupon marked "Balderach Exhibit No. 7, received in evidence January 27, 1911," and is attached hereto.)

6271 Mr. Coleman: The through rates you mentioned, via New Orleans and the Illinois Central, they would use the Southern Pacific Lines?

Mr. Balderach: I don't know whether they would use the Southern Pacific. It moves in connection with the T. & N. O. Company, the Louisiana & Western, and the M. L. & T.

Mr. Coleman: Those are Southern Pacific lines?

Mr. Balderach: I don't know whether they are supposed to be called Southern Pacific. I don't know whether they are called the Southern Pacific lines in Texas. Of course, I don't know what interest might be held by the Southern Pacific Company.

Mr. Coleman: Via the T. & N. O. and the Louisiana and Texas is one of the lines going to New Orleans.

Mr. Balderach: Yes, sir, the Louisiana Western and the M. L. & T.

Mr. Coleman: Would that finally be moved up north of the Ohio River?

Mr. Balderach: The cars would move into Illinois, Michigan, Ohio, New York, Canada, some in Tennessee; that would not be north of the Ohio, though.

6272 Mr. Coleman: Those markets would all be available via the Frisco Route and Cairo, would they not?

Mr. Balderach: Yes, sir, but it is reasonable to presume just as sure as night follows day, that it is more economical to haul a carload of lumber loaded upon a car and receive 72 cents a hundred pounds for it, than to haul a carload five miles and only receive 2½ cents, and incur in connection with the operation of that five miles a possible liability of an accident or a wreck.

Mr. Coleman: That is not what I had in mind, if you will just answer my question.

Mr. Balderach: You just stated that the routes were available.

Mr. Coleman: I would like to ask you what your division is in connection with the Frisco and Rock Island?

Mr. Balderach: We have a division of two and two and a half cents of the proportion south of the crossing.

Mr. Coleman: Cairo?

Mr. Balderach: Cairo, two and a half cents.

Mr. Coleman: How long have those divisions been in effect?

Mr. Balderach: I don't know, but several years.

Mr. Coleman: Do you know whether the Trinity Valley & Northern ever received higher divisions via the Cairo Route I mentioned?

6273 Mr. Balderach: The divisions via the Frisco never exceeded two and a half cents. As I explained it in the beginning, those were rates via the Frisco, by which, I mean the Florida-Texas gateway, and were as much as or equal to the rates via the Texas gateway in connection with the T. & N. O. and its connections.

The Frisco rate was 2½ cents per hundred pounds, and the rates were lower via the Florida-Texas gateway than via the other gateway.

Mr. Coleman: I asked you whether they were ever changed. Are you familiar——

Mr. Balderach: Yes, I am familiar with the divisions, and they have not been changed other than as I have stated it in the beginning. At one time we operated a service there for which we received no division whatever, no compensation.

Mr. Coleman: Are you familiar with the testimony in the Chicago Lumber & Coal Company case?

Mr. Balderach: No, I have not read it.

Mr. Coleman: Were you with the Trinity Valley & Northern at the time that that case was heard?

Mr. Balderach: Yes, I think I was; yes, I was with the Trinity Valley & Northern at the time I think this decision was

6274 rendered, in December, 1909, wasn't it?

Mr. Coleman: Were you with them when the testimony was taken?

Mr. Balderach: I don't know when the testimony was taken in the Chicago Coal & Lumber Company case.

Mr. Coleman: This Chicago Coal & Lumber Company case testimony was heard in St. Louis and New Orleans.

Mr. Balderach: No, I don't know anything about it.

Mr. Coleman: Were you connected with the company at that time?

Mr. Balderach: When was the testimony taken, then I can answer your question.

Examiner Burchmore: December, 1908, taken in New Orleans.

Mr. Balderach: Then I was not. I entered the service of the Trinity Valley & Northern Railway in the capacity of auditor, on June 15, 1909.

Mr. Coleman: Did you ever have occasion to look up divisions prior to the time that you engaged your services with the Trinity Valley?

Mr. Balderach: Yes, sir, I checked over the inter-line accounts and made discrepancy statements, and in checking over our tissue copies of billings it was ascertained that a considerable

6275 number of way-bills had been forwarded covering shipments of lumber on which the T. V. & N. Railway was receiving no

returns. Now, I did not go back and investigate all of the divisions, but in checking over the billing and inter-line accounts, it was ascertained that a good number of waybills had been forwarded covering shipments of lumber on which the Trinity Valley & Northern Railway Company was entitled to two and a half cents, on which their line had never reported any revenue.

Examiner Burchmore: Will you examine your record and see whether you received anything out of that two and a half cents?

Mr. Balderach: Yes, sir; I have a copy of the interline accounts. They take up the way bill and report the revenue to the T. V. & N. Railway inter-line account, and I will examine those, and if we received a greater proportion than two and a half cents, I will be glad to inform the commission.

Mr. Walter: I think that is better than taking Mr. Coleman's memory.

Mr. Coleman: Do you understand, Mr. Walter, that the Rock Island Road may have given wrong divisions?

Mr. Walter: Sure. I should not be at all surprised.

6276 Mr. Balderach: If the Rock Island-Frisco lines gave us four cents per hundred they would get considerably more of our traffic. They will cut down my wages unless I get more business.

Mr. Coleman: You made mention of a contemplated extension of your line in connection with the Santa Fe.

Mr. Balderach: Yes, sir.

Mr. Coleman: Do you have serious intentions of connecting with the Santa Fe?

Mr. Balderach: Yes, sir, we have serious intentions. We don't know whether we will accept the survey to Lamb, or whether we will change the survey and go to Cleveland and connect with the H. E. & W. and the Santa Fe at Cleveland.

Mr. Coleman: Does the lumber company that is affiliated with your railroad have any timber adjacent to the Santa Fe?

Mr. Balderach: I don't know what the holdings of the lumber company are. Just as I stated in the beginning, I am a railroad employe, and I do not know what the holdings of the lumber company are and I am not interested in any way whatever in the operation of the lumber company, while I would like to see them be successful, that is all.

Mr. Coleman: Do you know what it is that is prompting your people to build to a connection with the Santa Fe?

6277 Mr. Balderach: I presume it is the same interest that prompted the people who held that land to try to prevent the Trinity Valley & Northern Railway from exercising the power of eminent domain. One of the attorneys of Mr. Chapman stated that the country through which the Trinity Valley Railway ran was very sparsely settled and of no value at all, but when it came to taking the Chapman property, it became very valuable all of a sudden.

Mr. Coleman: Through how many miles of country that has no timber would this land be extended?

Mr. Balderach: I am not sufficiently informed to tell you that, but if you would like——

Mr. Coleman: Approximately.

Mr. Balderach: But if you want any information of that fact I can consult our chief engineer there, and he can probably give it.

Mr. Coleman: You seem to have an idea in your mind that you people want to build up and connect with the Santa Fe because the Chapman interests are opposed to your connecting with them.

Mr. Balderach: No, not exactly. We have a large amount of investment down there.

6278 Mr. Coleman: There is nothing on that line that you would secure except wood, is there?

Mr. Balderach: There is cotton, grain and agricultural products.

Mr. Coleman: Are they moving now?

Mr. Balderach: They move over the Santa Fe Railway Company, and some of it goes to the Frisco sometimes.

Mr. Coleman: I am talking about connecting with the Santa Fe.

Mr. Balderach: We intend to connect with the Santa Fe.

Mr. Coleman: What is your purpose in connecting with the Santa Fe?

Mr. Balderach: We might be able to get some sort of a traffic arrangement out of it.

Mr. Coleman: Out of the Santa Fe?

Mr. Balderach: Yes, you never can tell.

Mr. Coleman: Have you received any encouragement from the Santa Fe?

Mr. Balderach: We don't necessarily have to wait for encouragement. We can carry on our construction, and when we see fit we might connect with the Cotton Belt. The Cotton Belt might

6279 probably want a deep water outlet there at that point, too.

Mr. Coleman: At Corsicana?

Mr. Balderach: Well, I don't know.

Mr. Coleman: A deep waterway outlet?

Mr. Balderach: We intend going down to deep water there. I presume you have read a great deal about this waterway they are going to have at the Mississippi. If we connect with the Cotton Belt we might extend further south and go even down to deep water.

Mr. Coleman: That is all that you have got tangible to——

Mr. Balderach: We have something tangible. We have considerable tonnage down there——

Mr. Coleman: I don't want to prevent you from making a statement; I only want to try to find out whether there was anything tangible that prompted you to connect with the Santa Fe, and unless you want to make a statement of your own, I don't want to encumber the record with any other information.

Mr. Balderach: I am trying to enlighten you to the best of my knowledge.

Mr. Coleman: That is all right.

Mr. Balderach: If I can.

6280 Mr. Walter: Can you tell me whether you have known of any encouragement by the Santa Fe or the Santa Fe inter-

ests to the building of any other railroads into that territory?

Mr. Balderach: Why, not that I have any recollection of, but it seems by the tariff that has been in effect that they have evidently encouraged some line. They have published through rates from certain lines in the past.

Mr. Walter: Do you refer to that tariff? (Indicating.)

Mr. Balderach: Yes.

Mr. Walter: I think we will offer that in evidence, as Exhibit 8 of this witness' testimony.

(The tariff so offered and identified was received in evidence and thereupon marked "Balderach's Exhibit No. 8, received in evidence January 27, 1911," and is attached hereto.)

Mr. Balderach: I will say that this is strictly an intrastate tariff and is not to be used for any purposes in arriving at through rates.

Mr. Coleman: You say it is an intrastate tariff?

Mr. Balderach: Yes, sir, intrastate tariff, railroad Commission of Texas tariff. It is Supplement No. 15, Railroad Commission of Texas Tariff, numbers 5*b*, 19*a*, 23*a*, and 30*a*.

6281 Mr. Coleman: Isn't it your understanding that the Commission prescribes through rates and compels the carrier to accept those rates with the connections that they indicate on intrastate business?

Mr. Balderach: Yes, sir, that is my understanding, but I had reference to interstate tariffs. I wish to state that the several lines here have milling in transit privileges.

Examiner Burchmore: Just mention those lines, the originating lines, certain ones there.

Mr. Balderach: Here is one over the Orange & Northwestern extending milling in transit privileges to Miller's Lake Lumber Company on very advantageous terms.

Mr. Coleman: If you admit that the Commission can prescribe the application of joint rates within the State of Texas in connection with the Santa Fe as well as any other road, wherein do we become responsible for the rates?

Examiner Burchmore: This tariff will speak for itself.

Mr. Coleman: It is well understood we are carrying as low as any other line.

Mr. Balderach: I wish to state in connection with your inquiry, that if it was not for the request of the Commission, these so-called short lines would not receive any division from the Santa

6282 Fe connections, because every time we forward a shipment to a local point on the Santa Fe we have got to make application for a billing order to determine the divisions. They are not published in the divisions with the side lines at all.

Mr. Coleman: If I am correctly informed, the Texas Commission can make operative through rates, intrastate from points on the Santa Fe with any line that they have recognized as a Texas common carrier, as well as with any other railroad. Now, having recognized your road as a common carrier, wouldn't we be compelled to carry through rates with you?

Mr. Balderach: Yes, sir, on intrastate shipments you would, but on interstate shipments it might be said that through rates for local points on the Santa Fe are not effective from side line connections, there is a differential of five cents over the trunk line rates.

Examiner Burchmore: I think that is clear.

Mr. Coleman: Mr. Balderach, the question that you have raised here was threshed out in the Chicago Lumber & Coal Case and in the Star Grain case.

Mr. Walter: It is going to be threshed out some more.

6283 Mr. Coleman: Let me ask you just one more question. What mill is on that line that you referred to?

Mr. Balderach: I think it is the Kirby Lumber Company's mill.

Examiner Burchmore: One of the intervenors in this case.

Mr. Coleman: The lumber company; the Kirby Lumber Company has no mill there.

Examiner Gutheim: Let me ask you, I want this matter understood——

Mr. Balderach: I understand that the Kirby Lumber Company is very deeply interested in the operation of that road, that they have large holdings there.

Examiner Gutheim: What mill do they have there?

Mr. Balderach: I cannot just name the mill. I know that the Kirby Lumber Company purchased the railroad. They also have quarries in connection with the line there—if I am not mistaken, there is a mill located there in which the Kirby Lumber Company is very deeply interested. I do not recall the name right now.

Examiner Gutheim: Do you mean J. H. Kirby or the Kirby Lumber Company?

Mr. Balderach: John H. Kirby and the Kirby Lumber

6284 Company.

Examiner Gutheim: Both?

Mr. Balderach: I think so.

Mr. Walter: Anything further you want to say?

Mr. Balderach: Not unless the Commission wishes further information.

Whereupon, at 10:30 P. M., an adjournment was taken until Saturday, January 28, 1911, at 9 o'clock A. M.

6285 ST. LOUIS, MISSOURI,

SATURDAY, *January* 28, 1911—9:00 o'clock a. m.

The Commission met pursuant to adjournment.

Present as before.

Louisiana Central Railroad Company.

W. Q. CHURCH was called as a witness, and having been duly sworn, testified as follows:

Direct examination:

Examiner Burchmore: State your name to the stenographer, please.

Mr. Church: W. Q. Church.

Examiner Burchmore: What is your connection with the Louisiana Central Railroad Company, Mr. Church?

Mr. Church: Traffic Manager.

Examiner Burchmore: Your railroad connects with the Gulf, Colorado & Santa Fe Railway?

Mr. Church: Yes, sir, at Cravens, Louisiana.

Examiner Burchmore: With any other railroad at Cravens?

Mr. Church: With the Lake Charles & Northern at Cravens.

6286 Examiner Burchmore: And connects with the Kansas City Southern at Pickering and Barham?

Mr. Church: Pickering and Barham.

Examiner Burchmore: What is the length of the line?

Mr. Church: The main line is recorded 32.96, with branches of 9.65, a total of 42.61 miles.

Examiner Burchmore: Do you include a statement of any trackage rights?

Mr. Church: We have no trackage rights at all.

Examiner Burchmore: Do you include joint tracks, jointly operated or jointly owned?

Mr. Church: Not at the present time.

Examiner Burchmore: Then I assume you have no trackage rights or joint trackage?

Mr. Church: No, none at the present time. We did have a couple of years ago, but the situation has been changed.

Examiner Burchmore: When was the Louisiana Central Railroad incorporated?

Mr. Church: June 9, 1904.

Examiner Burchmore: Under the code?

Mr. Church: Under the laws of Louisiana.

Examiner Burchmore: What was the capitalization?

6287 Mr. Church: $250,000.00.

Examiner Burchmore: Was that all?

Mr. Church: I think so.

Examiner Burchmore: Do you know what the consideration received for it was?

Mr. Church: I think it was to take up advances made by the Pickering interests to construct the line.

Examiner Burchmore: When the railroad company was incorporated there was already a railroad in existence which it took over?

Mr. Church: Part of this present line only, not all of it.

Examiner Burchmore: There was some railroad?

Mr. Church: Yes, sir, there was some.

Examiner Burchmore: What was that mileage they took over?

Mr. Church: I think about half of this mileage reported.

Examiner Burchmore: That would be about twenty miles?

Mr. Church: Something in that neighborhood, yes, sir.

Examiner Burchmore: Were any bonds issued at the time?

Mr. Church: No, no bonds at all.

Examiner Burchmore: Are there any bonds now?
Mr. Church: No, sir.

Examiner Burchmore: In what part of the State of Louisi-
6288 ana is the railroad?

Mr. Church: Southwest Louisiana.

Examiner Burchmore: That is the long leaf section?
Mr. Church: In the long leaf section, yes, sir.
Examiner Burchmore: Where are the mills of the W. R. Pickering Lumber Company situated with reference to this line?
Mr. Church: There is one mill at Barham at the end of that division and one mill at Pickering, and another at Cravens.
Examiner Burchmore: The railroad is not one direct through line?
Mr. Church: No, it is in two sections, one leading west of Barham, Louisiana, about 9½ miles.
Examiner Burchmore: And extending to what point?
Mr. Church: A point called Bayou Toro.
Examiner Burchmore: What is the mileage of that division, do you remember?
Mr. Church: It is 9½ about. I don't know the exact mileage.
Examiner Burchmore: And the mill on that division—that division is known as the Southern Division?
Mr. Church: No, Northern.

Examiner Burchmore: Northern Division?
6289 Mr. Church: Northern Division.

Examiner Burchmore: The mill on that division is how far from the track?
Mr. Church: It is right at Barham.
Examiner Burchmore: It is directly on the rails of the Kansas City Southern?
Mr. Church: Yes, sir.
Examiner Burchmore: The other division of the railroad known as the Southern Division——
Mr. Church: Yes, sir.
Examiner Burchmore: —extends from Pickering to Cravens?
Mr. Church: Pickering to Cravens, and a little ways beyond that.
Examiner Burchmore: Where are the mills on that division located?
Mr. Church: There is one mill at Pickering and another at Cravens.
Examiner Burchmore: How far is Pickering from Cravens?
Mr. Church: It is 19 miles and a fraction. We call it approximately 20 miles.
Examiner Burchmore: How far from the rails of the Santa Fe at Cravens is the mill there located?
6290 Mr. Church: I should say about half a mile. The Santa Fe does not reach the mill, however, at Cravens with any of their rails.
Examiner Burchmore: Do the two railroads have a connection at Cravens, I mean the Louisiana Central and the Santa Fe?

Mr. Church: Yes, sir.

Examiner Burchmore: Do they interchange any traffic?

Mr. Church: They interchange traffic about a mile and a half west of Cravens station.

Examiner Burchmore: How far from the Lake Charles & Northern rails is the mill at Cravens?

Mr. Church: The Lake Charles & Northern and the Santa Fe operate jointly at that point over the same tracks.

Examiner Burchmore: Are there any other sawmills or lumbering or other similar enterprises on the line of this railroad?

Mr. Church: Nothing, but on the Barham Division there are some small operators or stave men who are getting out occasional cars of stave bolts, I believe they call them.

Examiner Burchmore: But no other mills?

Mr. Church: No other mills, no, sir.

Examiner Burchmore: Now, discussing for a few minutes
6291 the Northern Division extending from Barham to Bayou Toro, when was the mill at Barham built?

Mr. Church: I think in 1902, or at least that is the time the Pickering people got interested in the property. It may have been built before then, but not very long.

Examiner Burchmore: The Pickering Lumber Company was interested in that mill in 1902?

Mr. Church: Yes, sir.

Examiner Burchmore: Was there any railroad there at that time?

Mr. Church: Yes, sir.

Examiner Burchmore: What was the character of that road and its length and what purpose did it serve?

Mr. Church: It served to bring in cars to the mill. It runs over a very rough country, and it is a country road that is built for logging.

Examiner Burchmore: Do you know what the mileage was?

Mr. Church: No, I don't know.

Examiner Burchmore: Standard or narrow guage?

Mr. Church: Narrow gauge.

Examiner Burchmore: I suppose the Pickering people operated this mill and the logging road from 1902 up to 1904 when
6292 the railroad was incorporated?

Mr. Church: Yes, sir.

Examiner Burchmore: What was the purpose of incorporating then?

Mr. Church: I presume to comply with the decision in the Central Yellow Pine case.

Examiner Burchmore: Had it been receiving any divisions out of joint rates previous to that time?

Mr. Church: That is before my connection with it, I don't know.

Examiner Burchmore: Have you any idea?

Mr. Church: I believe they were, although I would not state positively.

Examiner Burchmore: When the railroad was incorporated in

1904 and took over these rails that were then in place, did those rails, or has the railroad then in place, remained there?

Mr. Church: I think so.

Examiner Burchmore: They have not moved the road?

Mr. Church: No, not that end of it.

Examiner Burchmore: There have been, however, extensions of it?

Mr. Church: Not so far as the railroad is concerned. The
6293 lumber company have extended beyond there by their logging operations.

Examiner Burchmore: I will ask you with respect to the Southern Division which, as I understand it, extends from Pickering to Cravens?

Mr. Church: Yes.

Examiner Burchmore: When did the Pickering Lumber Company become interested down there?

Mr. Church: They have been at Pickering since 1897, I think, or 1898.

Examiner Burchmore: Was there any mill there before they went in there?

Mr. Church: No, sir.

Examiner Burchmore: When was the first railroad put into operation from Pickering and Cravens?

Mr. Church: The line was started about five years ago, that is the time that this Cravens mill was built. This present line was, however, not completed until 1907.

Examiner Burchmore: There wasn't any mill there?

Mr. Church: Not at Cravens until about five years ago. There was at Pickering.

Examiner Burchmore: When was the mill at Pickering put up?

6294 Mr. Church: That was put up twelve or thirteen years ago.

Examiner Burchmore: Was there any logging road connecting with the mill at Pickering?

Mr. Church: Yes, sir.

Examiner Burchmore: When was that put in?

Mr. Church: I think about the time the mill was constructed. However, it was before my connection with the company and I am not very familiar with its history.

Examiner Burchmore: When was the mill at Cravens built?

Mr. Church: About five years ago.

Examiner Burchmore: And they put in the logging road there at the same time?

Mr. Church: Well this line between Pickering and Cravens was afterwards constructed, but at the time the Cravens mill was built, the Missouri & Louisiana operated a line east of Neame. Neame is three miles south of Pickering, and they had an arrangement, that is, the Louisiana Central or the Pickering people with the Missouri & Louisiana to extend this Neame line into Cravens, and all the material for the construction of that mill was hauled over this line,

and after the completion of the mill and before the construction of the line between Pickering and Cravens, the line was used to market the output of the mill and take inbound freight.

6295 Examiner Burchmore: Inbound freight of what character?

Mr. Church: For the construction of the mill. You understand prior to five or six years ago there was no mill there at Cravens, and this track I speak of was just to take all the construction material out there.

Examiner Burchmore: Then with the incorporation of the railroad in 1904——

Mr. Church: 1904, yes.

Examiner Burchmore: That railroad incorporation took over certain logging and other tracts at Barham and at Pickering and at Cravens?

Mr. Church: Well Cravens was not in existence at that time.

Examiner Burchmore: But when the Cravens tracks had been constructed by the lumber company, they were turned over to the railroad?

Mr. Church: They were partly constructed by the railroad company and partly by the lumber company, and afterwards all turned over to the railroad company. I do not know what section, but that was the arrangement.

Examiner Burchmore: Your total mileage at present is how much?

6296 Mr. Church: 42.61.

Examiner Burchmore: How much has that cost?

Mr. Church: The total cost of the railroad up to June 30, was $411,683.66.

Examiner Burchmore: And your total capital stock at present is how much?

Mr. Church: $250,000.00.

Examiner Burchmore: How has the rest of the cost of the road been financed?

Mr. Church: The difference between the capital stock?

Examiner Burchmore: Yes.

Mr. Church: Why there has been something written off each year. I don't know exactly to what extent.

Examiner Burchmore: Was the money advanced by the Pickering Lumber Company to build the road?

Mr. Church: I imagine it was in the first instance.

Examiner Burchmore: And notes were taken. There weren't any bonds or anything of that kind?

Mr. Church: No—now I presume it was notes, I think it was notes.

Examiner Gutheim: There were, as a matter of fact, Mr. Examiner. I made an examination of this property and there was

6297 seven notes due the W. R. Pickering Lumber Company for about $75,000.00, originally $79,000.00, but it has been paid in part.

Examiner Burchmore: $250,000.00 and $79,000.00 makes only $330,000.00.

Mr. Church: They charge back for depreciation each year a certain amount. I don't know, but whatever the Commission's requirements are, is charged off.

Examiner Burchmore: But the road as a whole has not actually cost $450,000.00 in construction?

Mr. Church: In construction, yes. When the road was purchased by the Louisiana Central, they had an appraisement made of the property by the firm of Coates & Burchard, public appraisers, and the property was taken over on their appraisal, less some amount. I don't know exactly what the amount was.

Examiner Burchmore: The railroad paid less than the amount at which the road was appraised by this firm?

Mr. Church: There was some discrepancy between it. I don't know what it was, it was a less amount, yes.

Examiner Burchmore: It was a less amount?

Mr. Church: Yes.

Examiner Burchmore: I will ask you whether it is or is
6298 not a fact that the stockholders of the W. R. Pickering Lumber Company own practically the entire capital stock of this railroad?

Mr. Church: I think so. The ownership is practically the same although not identical.

Examiner Burchmore: Do you wish to explain the differences in the ownership?

Mr. Church: I am not familiar with the lumber company. I can give you a list of stockholders in the railroad company.

Examiner Burchmore: Have you that list typewritten?

Mr. Church: Yes, I have it on this sheet.

(Witness produces paper.)

Examiner Burchmore: The stockholders then are shown on this document which will be filed as Exhibit 1.

Mr. Church: Yes, sir.

(The statement so offered and identified, was received in evidence and thereupon marked "Church Exhibit No. 1, received in evidence January 28, 1911," and is attached hereto.)

Examiner Burchmore: This contains in condensed form a great deal of information about the road?

Mr. Church: Yes, sir.

Examiner Burchmore: You prepared that statement?
6299 Mr. Church: I did.

Examiner Burchmore: Is it correct?

Mr. Church: I believe it to be.

Examiner Burchmore: The statement indicates that you have 10 locomotives, 166 logging cars, 4 flat and box cars, 1 caboose, 1 combination passenger and baggage car, and 5 other cars?

Mr. Church: Yes, sir.

Examiner Burchmore: Those cars are equipped with safety appliances?

Mr. Church: The logging cars are not. I think the others are.

Examiner Burchmore: Do you run trains on either or both of your divisions on a regular published schedule?

Mr. Church: Why they have a schedule. It is not published only in a typewritten form.

Examiner Burchmore: On which division or divisions do you run passenger trains?

Mr. Church: On the Barham Division.

Examiner Burchmore: Carry any passengers on the other road?

Mr. Church: No, sir, not to any extent.

Examiner Burchmore: Well, not for fare?

6300 Mr. Church: I think not on that division. We only have a caboose car. I believe we do report some passenger earnings, but it is so small that it don't amount to anything.

Examiner Burchmore: Have you the figures as to your operating revenues, particularly your freight revenues from traffic for a given period?

Mr. Church: Yes, the last fiscal year.

Examiner Burchmore: What figures can you give us on that?

Mr. Church: The gross revenue for the last fiscal year is reported as $234,388.24; the operating expense, $163,013.53; gross operating revenue, $71,374.71; net operating revenue, $62,534.57

Examiner Gutheim: Just a moment, Mr. Church. You said gross operating revenue $71,374.71?

Mr. Church: Yes, sir.

Examiner Burchmore: The difference between the gross operating revenue and the gross revenue seems to be very substantial. May I inquire what additional revenue you had outside of operating revenues that went to make up the $130,000.00 gross revenue?

Mr. Church: The railroad company does the logging, that is, they lay the spur tracks out in the woods and handle all of the logs

6301 on those spur tracks up to the main line for I think $1.25 a thousand. That, I believe, would account for the larger portion of that difference.

Examiner Burchmore: Do they report the tracks when they are in the woods as part of their mileage?

Mr. Church: Part of the branch lines, I believe.

Examiner Burchmore: Does the lumber company not have any locomotives of its own?

Mr. Church: No.

Examiner Burchmore: Does the railroad report to the commission all of the tracks, including logging spurs, which it operates?

Mr. Church: All that it operates, yes.

Examiner Burchmore: There are some up there that it does not operate?

Mr. Church: The lumber company on the Northern Division have some track of their own.

Examiner Burchmore: Well, but that track is operated by the railroad company?

Mr. Church: No, it is operated by the lumber company.

Examiner Burchmore: How does the lumber company operate the track without any locomotives?

6302 Mr. Church: It is operated by a joint train service. The lumber company have in the neighborhood of ten miles of track.

Examiner Burchmore: What was your tonnage for the last fiscal year?

Mr. Church: Gross tonnage, 216,346.

Examiner Burchmore: Tons?

Mr. Church: Yes, sir, tons.

Examiner Burchmore: What of that was logs and timber?

Mr. Church: 214,814.

Examiner Burchmore: Leaving 1,542 tons of other freight tonnage?

Mr. Church: Freight tonnage.

Examiner Burchmore: May I ask what that other tonnage was and for whom it was transported?

Mr. Church: It was freight which was largely for the Pickering interests, although there was some outside freight in there. It represents various merchandise, grain, hay, feed and coal.

Examiner Burchmore: What was the per cent of tonnage supplied by outside interests—that is, outside interests, I mean those not related to the W. R. Pickering Lumber Company?

Mr. Church: I should think about ¾ of 1 per cent.

6303 Examiner Burchmore: It is shown on that statement?

Mr. Church: It is shown upon this statement, yes.

Examiner Burchmore: Exhibit 1?

Mr. Church: Yes.

Examiner Burchmore: Do you make an annual report to the Interstate Commerce Commission?

Mr. Church: We do.

Examiner Burchmore: Comply with all federal and state laws as far as known?

Mr. Church: We believe we do, we try to.

Examiner Burchmore: Has the road paid any dividends?

Mr. Church: No, sir.

Examiner Burchmore: Have you any surplus?

Mr. Church: Yes, sir, there is a surplus of $76,158.62.

Examiner Burchmore: How was that surplus accumulated?

Mr. Church: I think it has accumulated several years, it is a back surplus.

Examiner Burchmore: Doesn't that pretty near offset this indebtedness you spoke of a little while ago?

Mr. Church: Very nearly, yes, sir, but the indebtedness has not been taken up yet.

Examiner Burchmore: The indebtedness could be taken

6304 up by offsetting the book surplus against it?

Mr. Church: I am not fully posted as to that.

Examiner Burchmore: This railroad has joint rates on lumber in connection with the railroads with which it joins?

Mr. Church: We have joint rates on lumber and other commodoties only with the Kansas City Southern.

Examiner Burchmore: Don't have any with the Lake Charles & Northern?

Mr. Church: Not at the present time.

Examiner Burchmore: How long since you have had?

Mr. Church: We never have had with them.

Examiner Burchmore: Those joint rates apply from stations on each of your divisions?

Mr. Church: Yes, sir.

Examiner Burchmore: By the way, those two divisions have no physical connection with each other?

Mr. Church: No, they are 22 miles apart.

Examiner Burchmore: To get from one to the other you would have to move your trains over the Kansas City Southern?

Mr. Church: Yes, sir.

Examiner Burchmore: Do you move your trains over the Kansas City Southern?

6305 Mr. Church: Very rarely.

Examiner Burchmore: Those joint rates apply from stations on both of those divisions?

Mr. Church: Both divisions, yes, sir.

Examiner Burchmore: Are the joint rates on a milling-in-transit basis?

Mr. Church: They are.

Examiner Burchmore: On both divisions?

Mr. Church: Both divisions, yes, sir.

Examiner Burchmore: Is transit actually applied?

Mr. Church: Under the ordinary methods, yes, that is applied to the lumber interests.

Examiner Burchmore: That is to say, the joint rates are supposed to cover the movement of the logs into the mill?

Mr. Church: Into the mill, and the finished product out.

Examiner Burchmore: And the railroad actually moves the logs to the mill?

Mr. Church: Yes, sir.

Examiner Burchmore: Does it actually move the timber out of the mill?

Mr. Church: It does either from Pickering or from Cravens. Cravens nearly all—in fact, at Cravens the railroad handles

6306 all of the finished product either on switch or load movement, but at Barham it does not. At Pickering it does not, only on part of the business.

Examiner Burchmore: On most of the business or a small portion?

Mr. Church: Out of Pickering I would say 25 per cent it performs of the road service.

Examiner Burchmore: Are the joint rates to which you are a party on lumber the same in amount as the rates which the Kansas City Southern charges from stations on its line?

Mr. Church: Yes, sir, a blanket rate system.

Examiner Burchmore: There is no arbitrary added to it?

Mr. Church: No, sir.

Examiner Burchmore: What division does your railroad receive?

Mr. Church: From $3\frac{1}{4}$ to $5\frac{1}{2}$.

Examiner Burchmore: On what traffic do they receive $5\frac{1}{2}$ cents?

Mr. Church: That which is confined to Kansas City Southern rails. Kansas City and south as far as Neosho.

Examiner Burchmore: What is the rate to Neosho?

Mr. Church: Thirty-four cents.

6307 Examiner Burchmore: Do you remember the Kansas City rate?

Mr. Church: Twenty-four cents.

Examiner Burchmore: You get 5½?

Mr. Church: Yes, sir.

Examiner Burchmore: What is the Kansas City Southern mileage to Kansas City?

Mr. Church: 676 from Pickering, 654 from Barham.

Examiner Burchmore: And they get eighteen and a fraction cents?

Mr. Church: Yes, sir.

Examiner Burchmore: I was under the impression that you said that the movement of the logs into the mill, $1.50 a car, was charged by the railroad against the lumber company.

Mr. Church: No, that is for the spur work.

Examiner Burchmore: Out of the woods?

Mr. Church: Out of the woods, up to the main line.

Examiner Burchmore: But the railroad owns those spurs?

Mr. Church: Yes, sir.

Examiner Burchmore: Operates them?

Mr. Church: It operates them. You see the joint rates apply from the main line, not from these spurs.

6308 Examiner Burchmore: Those spurs are not known as stations, are they?

Mr. Church: No, they are movable spurs.

Examiner Burchmore: What is the average division, if you can give us an idea?

Mr. Church: 2.90 cents is the average division.

Examiner Burchmore: How do you obtain the average, how do you find or determine it?

Mr. Church: Use the range of divisions and divide that by the number of divisions.

Examiner Burchmore: I will ask you in actual practice what is the average amount per 100 pounds that you receive on lumber that moves out from points on your line?

Mr. Church: I never made any computation as to that. I could not.

Examiner Burchmore: What is your opinion?

Mr. Church: I should think about three cents would be a fair figure.

Examiner Burchmore: How long since you have received any division on traffic interchanged with the Gulf, Colorado & Santa Fe?

Mr. Church: August, 1908, I believe.

6309 Examiner Gutheim: Mr. Church, I notice in the statement of the holdings of capital stock, that some of the individual holdings are in fractions of shares. Does that indicate that that stock is held by them in a proportion similar to their holdings in one or the other of the Pickering Lumber companies?

Mr. Church: I could not say as to that. I do not know the holdings in the lumber companies at all.

Examiner Burchmore: Have you any opinion on that subject?

Mr. Church: I have never been able to get any information on that subject at all.

Examiner Gutheim: How much of a haul does the Louisiana Central perform in taking the product of the Cravens mill and delivering it to the Santa Fe or the Lake Charles & Northern?

Mr. Church: Practically a mile and a half.

Examiner Burchmore: For that you get no division of the through rate?

Mr. Church: Nothing from the Santa Fe but a switching rate of two and a half per car from the Lake Charles & Northern.

Examiner Burchmore: How much of a haul is it on the product of the Cravens mill to the K. C. S.?

Mr. Church: It may be practically nineteen miles.

Examiner Burchmore: That is compensated for by the
6310 division of the rate by the K. C. S. on a milling-in-transit basis?

Mr. Church: Yes, sir.

Examiner Burchmore: Do you make any deliveries of the product of the Pickering mill to the Lake Charles & Northern or the Santa Fe?

Mr. Church: We do.

Examiner Burchmore: And you have a 19 mile haul on that?

Mr. Church: Yes, sir.

Examiner Burchmore: You get no revenue out of the Santa Fe rates on that?

Mr. Church: No.

Examiner Burchmore: Do you get anything from the Lake Charles & Northern?

Mr. Church: No, sir.

Examiner Burchmore: The deliveries from the Pickering mill to the Kansas City Southern and from the Barham mill to the Kansas City Southern are all taken out by the Kansas City Southern power?

Mr. Church: Practically, yes, sir, not altogether at Pickering though.

Examiner Burchmore: What rate of interest is paid by the
6311 railroad to the Pickering companies on the notes that are held by the lumber companies?

Mr. Church: Six per cent.

Examiner Burchmore: Are the officials of the W. R. Pickering Lumber Company, the Pickering Land and Timber Company and the Louisiana Central Railroad Company the same individuals?

Mr. Church: Practically the same, yes, sir, although in the railroad company, Mr. W. A. Pickering is president, while in the lumber company, Mr. W. R. Pickering is president of the lumber company.

Examiner Burchmore: You testified that your average division at the present time, all of which is received out of rates via the Kansas City Southern, was about three cents.

Have the divisions out of those Kansas City Southern rates been increased within the last two or three years?

Mr. Church: They have not.

Examiner Burchmore: And about what was the average division before the date of the increase?

Mr. Church: About 1¾ average.

Examiner Burchmore: When was that increase made?

Mr. Church: November, 1909. November 1st, I think, 1909.

6312 Examiner Burchmore: Was that about contemporaneously with the period at which you were making up your connection with the Lake Charles & Northern or the Santa Fe rails at Cravens?

Mr. Church: Right when the Santa Fe were at Cravens several years ago, about six months afterwards I believe.

Examiner Burchmore: Now you have been dickering more or less, have you not, with the Lake Charles & Northern here lately, to effect an arrangement for the division of through rates via Cravens?

Mr. Church: Yes, sir.

Examiner Burchmore: And are those arrangements still going on?

Mr. Church: They are in statu quo at present.

Examiner Burchmore: Just where is the hitch?

Mr. Church: The entire tap line proposition.

Examiner Burchmore: Now, as a matter of fact, Mr. Church, are you making any deliveries to the Santa Fe at Cravens of the product of the Pickering or Cravens mills?

Mr. Church: Yes, sir.

Examiner Burchmore: And about what proportion goes out via the Santa Fe?

Mr. Church: That is rather small. I have not the figures exactly.

6313 Examiner Burchmore: Well, it has decreased gradually since the time the divisions were taken out?

Mr. Church: It has.

Examiner Burchmore: Is there as much that goes via the Lake Charles & Northern as goes via the Kansas City Southern?

Mr. Church: No, sir.

Examiner Burchmore: About what proportion would you say goes to each of the three companies, that is, out of those mills' output?

Mr. Church: At Cravens I think about 75 per cent of the output goes to the Kansas City Southern as a rule, and of the remainder perhaps—well perhaps equally divided. It varies at times. Sometimes the Lake Charles & Northern will get the bulk of it, and then again the Santa Fe will secure it. Out of Pickering, there is probably 75 per cent of that tonnage which goes via the Kansas City Southern, and I don't know but what it is greater than that. The balance is divided between the Santa Fe and the Lake Charles & Northern.

Examiner Burchmore: Now, how long have you been making a

separate charge against the Pickering division for the log spur work?

Mr. Church: I think about two years.

6314 Examiner Burchmore: Prior to that time did the railroad receive any revenue whatever out of the hauling of logs other than the revenue that accrued on the division of the milling-in-transit rate?

Mr. Church: I think there was an arrangement of so much per car for those, as I recall.

Examiner Burchmore: That was a separate charge for the regular road haul?

Mr. Church: Yes, sir.

Examiner Burchmore: What was the reason for republishing the tariff so as to make a distinction between a regular road haul and the logging spur work?

Mr. Church: I believe that it was made because—I think it was to increase the revenue of the Louisiana Central, that seemed to be the object.

Examiner Burchmore: As a matter of fact, it did increase the revenue, I believe, but was there not also the statement taken into consideration that the milling-in-transit rate contemplated only a charge for transportation service, whereas, log spur work was logging or timber service?

Mr. Church: I think so.

6315 Examiner Burchmore: And it was really an endeavor to make your milling-in-transit rate a transportation rate instead of a logging rate?

Mr. Church: That was our intention, to handle the logs strictly as a transportation proposition.

Examiner Burchmore: Do you have any contract with the Kansas City Southern under which you receive a division other than the division sheets?

Mr. Church: Nothing but division sheets.

Examiner Burchmore: Any contract with the Lake Charles & Northern that provides for the absorption of the $2.50 switching charge?

Mr. Church: No.

Examiner Burchmore: Do you publish any local tariffs and file the same with the Commission?

Mr. Church: We do.

Examiner Burchmore: And do those tariffs provide for the transportation of commodities other than forest products?

Mr. Church: Carry a full line of class and commodity tariffs—class and commodity rates, I should say.

Examiner Burchmore: Are you keeping your accounts according to the classification laid down by the Commission?

Mr. Church: I believe we are.

6316 Examiner Burchmore: Just to get it into the record, was this joint track that was formely operated by you, a track that was operated in connection with the Missouri & Louisiana Railroad of the Central Coal and Coke Company?

Mr. Church: Yes, sir.

Examiner Burchmore: Mr. Sargent testified in regard to that.

Examiner Gutheim: Yes, he testified as to the whole transaction.

Examiner Burchmore: Did you hear Mr. Sargent's testimony?

Mr. Church: No, I did not.

Examiner Burchmore: Do the officials of the Louisiana Central Railroad Company, or any of them, have annual passes over the Kansas City Southern?

Mr. Church: Yes, sir.

Examiner Burchmore: What officers?

Mr. Church: The president, vice-president, traffic manager and auditor.

Examiner Burchmore: Those are the officers?

Mr. Church: Those are the officers.

Examiner Burchmore: You mean that is all the officers there are?

Mr. Church: That is all the officers that have Kansas City
6317 Southern transportation. There is the general superintendent.

Examiner Burchmore: Those gentlemen are all officers of the lumber company?

Mr. Church: Yes, sir.

Examiner Burchmore: Do they have transportation over other railroads?

Mr. Church: Some.

Examiner Burchmore: For example, railroads running to Chicago?

Mr. Church: Yes, sir.

Examiner Burchmore: Any east of Chicago?

Mr. Church: I think Mr. W. A. Pickering has Pere Marquette transportation.

Examiner Burchmore: Do they use those passes?

Mr. Church: East of the river?

Examiner Burchmore: No, generally speaking, do they use their passes?

Mr. Church: When they travel, yes, sir.

Examiner Burchmore: Whenever they travel over the lines on which they are given?

Mr. Church: Yes, sir.

6318 Examiner Burchmore: But you refer to east of the river, they use their passes to Chicago?

Mr. Church: Oh, yes. I mean to say——

Examiner Burchmore: Has the Louisiana Central Railroad any private cars for its officials?

Mr. Church: No, sir.

Examiner Burchmore: They do not travel around the country in a private car?

Mr. Church: I think not.

Examiner Burchmore: Haven't any car and party passes?

Mr. Church: No, sir.

Examiner Burchmore: Do you know of any short line railroads that do have car and party passes?

Mr. Church: I have never seen any.

Examiner Burchmore: The Arkansas & Southeastern Railroad is a short line railroad, isn't it?

Mr. Church: Yes, sir.

Examiner Burchmore: Has that railroad got a private car?

Mr. Church: Not that I know of.

Examiner Burchmore: Do you know whether the officials of that railroad have car and party passes?

Mr. Church: I have never seen any, no, sir.

6319 Examiner Gutheim: Can you say approximately, Mr. Church, about what proportion of the revenues of your road arises from the division of rates via the Kansas City Southern, how much from switching absorbed by the Lake Charles & Northern, and how much from local charges?

Mr. Church: I do not know as I can give that to you definitely. I think the annual report perhaps separates that. I can give it to you and file it, if you desire.

Examiner Gutheim: Let me ask you, in the year which was examined by the Commission, approximately 20 per cent of your revenue arose on divisions of rates via the K. C. S. and the Santa Fe, the proportion of the K. C. S. being about three and the Santa Fe one. Taking into consideration that you no longer have divisions via the Santa Fe, but that the division via the K. C. S. has been increased, would you say that your revenue at the present time is made up approximately one-fifth by divisions or more than one-fifth?

Mr. Church: I should say approximately one-fourth.

Examiner Gutheim: Approximately one-fourth?

Mr. Church: Yes, sir.

Examiner Gutheim: So that in the year for which you have submitted statistics, in the neighborhood of $50,000.00 was

6320 received in divisions?

Mr. Church: I think it was about that figure.

Examiner Burchmore: Is your road also a party to inbound rates on classes and commodities via either of your three connections?

Mr. Church: Via the Kansas City Southern.

Examiner Gutheim: Will you give briefly the proportion of such rates which accrue to your line?

Mr. Church: On meat and grain products from defined territory we receive 20 per cent of the rate, that is, the Kansas City rate or division south of Kansas City. On coal from Arkansas and Indian Territory mines we receive 45 cents per ton. On merchandise from Shreveport we receive 30 per cent. From Beaumont and from Lake Charles we receive about 25 per cent. These are rates to Cravens only. That is the only point we have through rates and divisions.

Examiner Gutheim: And on that you have a haul of 19 miles?

Mr. Church: We have a 19 mile road haul, yes, sir.

Examiner Gutheim: Are the records of your company in such shape as permits you to make a division of the cost of road between the road actually used in road transportation service, and the road used on log spur work?

6321 Mr. Church: I think so.

Examiner Gutheim: Will you have a statement furnished and submit it in connection with your testimony that will show that division of the item of $411,683.65 shown on the statement?

Mr. Church: Yes, sir.

Examiner Gutheim: I believe also, Mr. Church, that your auditor, Mr. Ingels, can furnish a division of your expense of maintenance of way?

Mr. Church: I think so.

Examiner Gutheim: Between the logging spurs and the road transportation?

Mr. Church: I think so. In case you desire it, we will gladly furnish it.

Examiner Gutheim: If you will furnish that also. That is all, Mr. Garwood.

Cross-examination:

Mr. Garwood: Mr. Church, the map which I hold in my hand shows the Louisiana Central division extending from Pickering to Cravens correctly, does it?

Mr. Church: Yes, sir.

6322 Mr. Garwood: I introduce that in the record. Mark it exhibit 2.

(The map so offered and identified, was received in evidence and thereupon marked "Church Exhibit No. 2, received in evidence January 28, 1911," consisting of one sheet, and is attached hereto.)

Mr. Garwood: This map shows the connection of the Louisiana Central with the Jasper & Eastern at Cravens?

Mr. Church: Yes, sir.

Mr. Garwood: Correctly, does it?

Mr. Church: Yes, sir.

Mr. Garwood: The red lines being the tracks of the Jasper & Eastern?

Mr. Church: Yes, sir.

Mr. Garwood: I will mark that Exhibit 3 and introduce it in evidence.

(The map so offered and identified, was received in evidence and thereupon marked "Church Exhibit No. 3, received in evidence January 28, 1911," consisting of one page, and is attached hereto.)

Mr. Garwood: Just strike out "Jasper & Eastern", Jasper & Eastern or Santa Fe. This map which I hold in my hand repre-

6323 sents the Barham division?

Mr. Church: Barham division, yes, sir.

Mr. Garwood: I introduce that as Exhibit 4.

(The map so offered and identified, was received in evidence and thereupon marked "Church Exhibit No. 4, received in evidence January 28, 1911," consisting of one sheet, and is attached hereto.)

Mr. Garwood: This plat represents the connection of the Louisiana Central at Pickering with the Kansas City Southern?

Mr. Church: Yes, sir.
Mr. Garwood: The Kansas City Southern tracks being indicated in red?
Mr. Church: In red ink, yes, sir.
Mr Garwood: I offer that as Exhibit 5.

(The plat so offered and identified, was received in evidence and thereupon marked "Church Exhibit No. 5, received in evidence January 28, 1911," consisting of one sheet, and is attached hereto.)

Mr. Garwood: And this is the connection of the Barham division with the Kansas City Southern? (Indicating on plat.)
Mr. Church: Yes, sir.
Mr. Garwood: The Kansas City Southern being indicated
6324 in red?
Mr. Church: In red, yes, sir.
Mr. Garwood: I offer that as Exhibit 7.

(The plat so offered and identified, was received in evidence and thereupon marked "Church Exhibit No. 7, received in evidence January 28, 1911," consisting of one sheet, and is attached hereto.)

Mr. Garwood: Mr. Church, is the Louisiana Central as a whole substantially and permanently constructed?
Mr. Church: We think so.
Mr. Garwood: Can you indicate to the Commissioner the bridges and trestles there are on the line?
Mr. Church: We have ten bridges with a total length of 304 feet, and four trestles with a length of 28.94 feet.
Mr. Garwood: Do you own your own right-of-way?
Mr. Church: We do, yes, sir.
Mr. Garwood: By purchase?
Mr. Church: By purchase.
Mr. Garwood: What is the width of the right-of-way?
Mr. Church: One hundred feet, as a rule.
Mr. Garwood: What is the weight of your rail?
Mr. Church: Runs from 35 to 60 pounds.
6325 Mr. Garwood: Can you indicate in a general way the relative proportion of the heavier to the lighter kind of rail?
Mr. Church: I can not in tons. I have tried to get that information, but it has not been given to me yet. I think approximately 35 pound represent 50 per cent, and the balance is divided up.
Mr. Garwood: About how many ties to the mile have you in your road?
Mr. Church: About 3,000 as a rule.
Mr. Garwood: What character of ties?
Mr. Church: They are pine and oak, principally pine, however.
Mr. Garwood: Are your trains run on regular schedule?
Mr. Church: We try to observe the schedule.
Mr. Garwood: Do you dispatch them?
Mr. Church: By telephone, yes, sir.
Mr. Garwood: Does the road own its own telephone?
Mr. Church: It owns the telephone line.

Mr. Garwood: How many miles of pole line has it, how many miles of wire line?

Mr. Church: It has, I think, about 18 miles approximately of pole line with a double strand of wire. This is a metallic
6326 circuit.

Mr. Garwood: I believe you described its equipment?

Mr. Church: Yes, sir.

Mr. Garwood: You carry some passengers?

Mr. Church: Very few.

Mr. Garwood: Do you recall the testimony of Commissioner Meredith, of the Louisiana Commission, as to putting on an order against your road relating to passengers?

Mr. Church: I do.

Mr. Garwood: Did you comply with that order?

Mr. Church: We have, yes, sir.

Mr. Garwood: You therefore offer the facilities demanded by the Louisiana Commission?

Mr. Church: We do.

Mr. Garwood: And are prepared to hold yourself out as a road to carry all who shall offer?

Mr. Church: Yes, sir.

Mr. Garwood: While your passenger travel is not extensive, you are yet holding yourself out and offering facilities for all who do apply?

Mr. Church: We do, yes.

Mr. Garwood: Do you furnish facilities and hold yourself
6327 out as a road to transport all shipments of freight that may be tendered to you by the general public?

Mr. Church: Everything, yes, sir.

Mr. Garwood: Has the railway company any facilities for repairing its equipment?

Mr. Church: Yes, sir, they have their own shops.

Mr. Garwood: Where?

Mr. Church: At Barham, Cravens, and Pickering.

Mr. Garwood: I believe you indicate that you make your regular reports to the Interstate Commerce Commission?

Mr. Church: Yes, sir.

Mr. Garwood: As required by the statute and its rules and regulations?

Mr. Church: Yes, sir.

Mr. Garwood: Have you a Washington agent?

Mr. Church: We have, Mr. Charles A. Douglas.

Mr. Garwood: I believe you stated the length of the haul that you have on the finished product from Cravens to Pickering?

Mr. Church: Yes, sir, practically 19 miles.

Mr. Garwood: Can you indicate what tonnage moves from Cravens to Pickering on the Kansas City Southern?

6328 Mr. Church: I can prepare that, but I have it not.

Mr. Garwood: I thought possibly you might remember it.

Mr. Church: I have not got it separated, but it is relatively 75 per cent of the output of that mill.

Mr. Garwood: You indicated to the Commissioner, I believe, the distance of each of your mills at Crayens, Pickering and Barham, respectively, from the tracks of your trunk line connection.

Mr. Church: Well, I think so.

Mr. Garwood: If not, please state it, so that it may be in the record?

Examiner Burchmore: I think that was answered.

Mr. Garwood: I thought so, but——

Mr. Church: Yes, sir.

Mr. Garwood: About what is the per cent of your operating expense to your operating revenue?

Mr. Church: 69 and a fraction, practically 70 per cent.

Mr. Garwood: Where you have no through rates in from the junction points, do you apply the local Louisiana tariffs?

Mr. Church: Why we apply our distance tariffs.

Mr. Garwood: Your distance tariffs?

Mr. Church: Yes, sir.

6329 Mr. Garwood: What divisions did you have in with the Gulf, Colorado & Santa Fe before it cancelled in 1908, generally, indicate in a general way the amount of the division.

Mr. Church: We received 2 cents per hundred to the points on the A. T. & S. F. proper north of Purcell west of the Missouri River and one cent east of the Missouri River. Those are all the divisions we had with them. They applied exclusively to the Santa Fe rails.

Mr. Garwood: Did you have any divisions in to Texas points?

Mr. Church: No, sir, no Texas divisions.

Mr. Garwood: No Texas points at all?

Mr. Church: No, sir.

Mr. Garwood: Have you any divisions on inbound stuff in with the Santa Fe now?

Mr. Church: No, sir.

Mr. Garwood: Have you any divisions on any product other than lumber with the Santa Fe?

Mr. Church: We have no divisions.

Mr. Garwood: You have none at all with them?

Mr. Church: None at all.

Mr. Garwood: Since 1908?

Mr. Church: Nothing at all.

6330 Mr. Garwood: What buildings have you belonging to the railroad along the different lines?

Mr. Church: We have a small station at Cravens, and repair shops, coal chutes, water tanks, section houses, telephone stations——

Mr. Garwood: Have you a round house?

Mr. Church: Yes, at Pickering and Barham—I mean Pickering and Cravens.

Mr. Garwood: Pump houses and so forth?

Mr. Church: We have at Cravens what they term a round house that will accommodate three engines.

Mr. Garwood: I will ask you in a general way if you have all of the appliances, buildings, and so forth, necessary to operate a railway safely and expeditiously for the accommodation of the public?

Mr. Church: Yes, sir.

Mr. Garwood: Are you prepared to handle less than carload freight?

Mr. Church: We handle more or less of it, yes, sir.

Mr. Garwood: Are you prepared to do it safely and properly to the owners of the——

Mr. Church: We think so.

6331 Mr. Garwood: What station agents have you?

Mr. Church: We have agents at Cravens, Pickering and Barham.

Examiner Burchmore: Are they also employed by the lumber company?

Mr. Church: Yes, sir, they are.

Mr. Garwood: Can you state, Mr. Church, if you know, about what is the expected life of the plants of the lumber company at Pickering, Cravens and Barham?

Mr. Church: At Barham I believe the present holdings will be exhausted in about two years, possibly a little shorter time, but at Pickering and Cravens about fifteen.

Mr. Garwood: What is the character of the country and soil there, that is to say, is it adapted to agricultural development?

Mr. Church: I think it will be, yes, sir.

Mr. Garwood: Raising corn, cane and cotton?

Mr. Church: Corn, vegetables, fruit and cotton.

Mr. Garwood: Is there beginning any development?

Mr. Church: Yes, at Pickering, the company known as the Pineland Manufacturing Company who own about 30,000 acres of the cut-over land, are making strong efforts to induce immigra-

6332 tion in that neighborhood, and I am told that last year they brought in possibly fifty families in that neighborhood there, selling their land out to these farmers in small sections and various tracts. There have been more or less products shipped from Pickering on the Kansas City Southern that have been raised in that neighborhood.

Mr. Garwood: I will ask you whether or not at Pickering there is an experimental farm of considerable proportions representing quite a large investment of money?

Mr. Church: Yes, sir, that is being done by this Grannis Plantation Company, which is, I think, connected with the Pineland Manufacturing Company, it is the same interest. They have perhaps a mile and a half from Pickering, quite an extensive experimental farm and that is where this product is obtained from largely that they have been shipping recently.

Mr. Garwood: The natural outlet for that product, that is, the most direct outlet north to Kansas City would be via the Kansas City Southern, would it not?

Mr. Church: Yes, sir.

Mr. Garwood: That would move over your line?

Mr. Church: Yes, sir.

6333 Mr. Garwood: From Pickering, its connection with the Kansas City Southern?

Mr. Church: From points out on the line as these immigrants develop their land, we would expect to haul their product.

Mr. Garwood: What is the population of Pickering, Cravens and Barham?

Mr. Church: I think Barham is about 300, Pickering perhaps 1,000. Cravens I should say 12,000 people.

Mr. Garwood: Mr. Church, from your general knowledge of lumber conditions, I would ask you the question whether the question of tap line divisions, the amount of them, or whether they are received or not cuts any figure in the sale of lumber as far as you have observed the trade?

Mr. Church: As far as I know of, it does not.

Mr. Garwood: Can you tell in a general way the number of section men on your road?

Mr. Church: I do not remember the number exactly, but I think about 60.

Mr. Garwood: About 60.

Mr. Church: That is my recollection, possibly more.

Mr. Garwood: They are sufficient to keep the road up to a proper standard——

6334 Mr. Church: Yes, sir

Mr. Garwood: For the safety of the——

Mr. Church: That number is increased from time to time as the emergency requires, however.

Examiner Burchmore: Do they maintain those logging spurs out in the woods?

Mr. Church: Yes, they are operated by the railroad, yes.

Examiner Burchmore: They are all operated by the railroad aren't they?

Mr. Church: Yes, but beyond Barham there is a railroad track that we have nothing to do with.

Examiner Burchmore: I thought you operated trains over them

Mr. Church: Well we do operate trains but not to—they have their own gang that attends to the construction work.

Mr. Garwood: How many engineers have you on your road?

Mr. Church: I think eight.

Mr. Garwood: How many firemen?

Mr. Church: The same number.

Mr. Garwood: Conductors?

Mr. Church: Three, I believe.

Mr. Garwood: Section foremen?

6335 Mr. Church: I think there is seven section foremen.

Mr. Garwood: I have a note here that indicates 89 other trackmen. You stated that you thought you had about sixty section men.

Mr. Church: Those other trackmen, Mr. Garwood, are section men, and perhaps I should have stated a higher figure. I did not recall the figures.

Mr. Garwood: I believe you said that your road owned shops.

Mr. Church: Yes, sir.

Mr. Garwood: Have your own shop men?

Mr. Church: Our own shop men for repair work.

Mr. Garwood: Anything further that you care to say, Mr. Church?

Mr. Church: I do not recall of anything special.

Examiner Gutheim: Mr. Church, Judge Garwood asked you about Pickering, Barham and Cravens. Pickering is generally known as a mill town, isn't it?

Mr. Church: Yes, sir.

Examiner Gutheim: It owes its existence to the establishment of the Pickering Lumber Company's plant at that point?

Mr. Church: Originally, yes, sir.

Examiner Gutheim: Barham is in the same class?

6336 Mr. Church: I should say so.

Examiner Gutheim: Cravens is also served by the Lake Charles & Northern and the Santa Fe, isn't it?

Mr. Church: Yes, sir.

Examiner Gutheim: Judge Garwood also asked you about whether your road was equipped with the ordinary corporation service required. How many communities are there that the road serves outside of Pickering, Barham and Cravens, which are termini?

Mr. Church: Between Pickering and Cravens there are more or less farmers in there; no settlements of any consequence, however.

Examiner Gutheim: Any post offices or stores?

Mr. Church: There are some post offices, I believe, one or two and on the west arm there are several, several communities and post offices, but I am not familiar exactly——

Examiner Gutheim: Those post offices do not obtain their mail off your lines?

Mr. Church: No, we have no mail or express companies.

Examiner Gutheim: Now is the Pickering Lumber Company interested in the Pineland Manufacturing Company?

Mr. Church: No, sir, they are not.

6337 Examiner Gutheim: In the New Grannis Plantation Company?

Mr. Church: No, sir.

Examiner Gutheim: Now you said that approximately fifty families had been brought in for settlement.

Mr. Church: I am informed that.

Examiner Gutheim: And I judge from your answer to Judge Garwood's question, that they are generally located within about a mile and a half of Pickering?

Mr. Church: That is where this Grannis plantation is. They are located various distances, nearly all of them east, southeast and northeast of Pickering.

Examiner Gutheim: As a matter of fact, do they use your line in sending out anything? Is it not just as profitable and perhaps just as reasonable for them to turn in their farm products to the K. C. S. or to the trunk line direct?

Mr. Church: At the present time, yes, sir.

Examiner Gutheim: Are there any settlements on the other division of the railroad?

Mr. Church: There are beyond Bayou Toro, a few in there. Bayou Toro, by the way, is a post office and has been established about 60 years. That is an old community in there.

Examiner Gutheim: That is the western terminus of the Barham line?

6338 Mr. Church: Yes, sir.

Examiner Burchmore: Any cemetery there?

Mr. Church: There may be, I don't know.

Examiner Gutheim: You also said to Mr. Garwood that the divisions cut no figure in the price of the lumber. In your estimation do they cut any figure in the cost of the lumber?

Mr. Church: I don't think they are considered at all in that way.

Examiner Gutheim: Doesn't the fact that the Louisiana Central receive divisions result in a lower cost of manufacturing lumber to the Pickering Lumber Company, assuming that the Pickering Lumber Company owns the railroad?

Mr. Church: Assuming that, it perhaps would.

Examiner Gutheim: I think that is all.

Mr. Garwood: Just one more question. I wish you would state which lines were at Cravens first and how they came in there afterwards.

Mr. Church: The Louisiana Central was there at Cravens perhaps a year before any other line. Then afterwards the Santa Fe or the Jasper & Eastern was built in there, and later on the Lake Charles & Northern made some contract that resulted in the joint operation of that track from De Ridder east.

6339 Mr. Garwood: Do you know whether the Goulds own any large tracts of lumber lands in that vicinity?

Mr. Church: I understand they own quite a little timber land east of Barham.

Mr. Garwood: East of Barham?

Mr. Church: Yes, east of the Kansas City Southern toward the T. & P. line, between Shreveport——

Mr. Garwood: Approximately 100,000 acres?

Mr. Church: I think easily that. I have never had the exact figures, but I know they are interested there in our territory quite extensively, or were.

Mr. Garwood: They are popularly supposed to be the stockholders in a great many rail lines, some of which enter Louisiana and some of which enter Texas.

Mr. Church: Yes, sir.

Mr. Garwood: That is all, your Honor.

Examiner Burchmore: What railroads go into or near that tract of timber that you refer to as the Gould tract?

Mr. Church: I think the Texas & Pacific are the nearest, that is, besides the Kansas City Southern.

Examiner Burchmore: Any short line railroads run in there?

Mr. Church: I am not sure as to that. I am not very
6340 familiar with it.

Examiner Burchmore: Are the Goulds interested in short line railroads?

Mr. Church: I don't know.

Examiner Gutheim: As a matter of fact, Mr. Church, your line from Barham runs west of the K. C. S.?

Mr. Church: Yes, sir.

Examiner Gutheim: And I understand this timber of the Goulds is east of the K. C. S.?

Mr. Church: Yes, sir.

Examiner Gutheim: And so it is not likely your line will serve that timber at all?

Mr. Church: No, although the Pickering Company have some timber east of Pickering, but it is not likely that we will serve it.

Mr. Garwood: It is a fact, is it not, Mr. Church, that the connection of a short line railway, so-called, with a lumber mill by stockholding interests otherwise would have the same relation perhaps to the cost of production of lumber that a large mill and large complete machinery and a large investment would to small investments?

Mr. Church: I think so.

6341 Examiner Gutheim: Economical operation and transportation?

Mr. Church: I think so.

Examiner Burchmore: Mr. Coleman?

Mr. Coleman: Mr. Church, do you know whether the Pickering interests anticipated the extension of the Santa Fe, Jasper & Eastern line to and beyond Cravens before the Pickering interests decided to build its own line to Cravens?

Mr. Church: I think they did.

Mr. Coleman: Do you know that the matter was taken up by the Pickering interests with the Santa Fe?

Mr. Church: I do not.

Mr. Coleman: Were you with the Pickering interests at the time?

Mr. Church: No, not at that time.

Mr. Coleman: Do you know, Mr. Church, whether at the time that they anticipated the extension of the Santa Fe, they had not completed arrangements with the Missouri & Louisiana Railway for the operation of Louisiana Central trains over the Missouri & Louisiana into Cravens?

Mr. Church: I don't know anything about the details of that, Mr. Coleman.

Mr. Coleman: That is all.

6342 Mr. Garwood: Might I ask you a question, Mr. Coleman? Where is the Industrial Lumber Company? I don't recollect where its lands are situated.

Mr. Coleman: Pretty generally speaking, as I understand it, between Elizabeth and stations west or east of Cravens and Oakdale. That is known as the Wright-Blodgett tract, which was purchased from time to time, a portion to the Fullerton interest, a portion to the Pickering interests, and a portion to the Industrial Lumber Company.

Mr. Garwood: Could you say whether the Industrial Lumber Company had acquired those lands prior—that is all, Mr. Church—prior to the construction of the Jasper & Eastern?

Mr. Coleman: I think not, in fact I feel very positive that they were not acquired until it was determined to build a line to Cravens.

Mr. Garwood: I think that is all.

6343 *Gulf & Sabine River Railroad Company.*

S. H. FULLERTON was called as a witness, and having been duly sworn, testified as follows:

Direct examination:

Examiner Burchmore: Mr. Fullerton, please give your name to the stenographer.

Mr. Fullerton: S. H. Fullerton.

Examiner Burchmore: Mr. Fullerton, are you an officer of the Gulf & Sabine River Railroad Company?

Mr. Fullerton: Yes, sir.

Examiner Burchmore: What is your office?

Mr. Fullerton: President.

Examiner Burchmore: Are you connected with any lumber company?

Mr. Fullerton: Yes, sir.

Examiner Burchmore: If so, what companies?

Mr. Fullerton: I am connected with a good many lumber companies. I am president of the Gulf Lumber Company, Chicago Lumber and Coal Company——

Examiner Burchmore: That company owns the Gulf Lumber Company, I suppose, too?

6344 Mr. Fullerton: No, it owns some stock in the Gulf Lumber Company, but it does not own a controlling interest. President of the Bradley Lumber Company, British American Mills and Timber Company, Brown Lumber Company, Chicago Gulf Export Lumber Company, Chicago Lumber and Coal Company of Texas, Fullerton-Stewart Lumber Company, Fullerton & Powell Lumber Company—Hardwood Lumber Company, William Farrell Lumber Company, Fullerton-Moses Tie Company, Schultz Lumber Company, Switzer Lumber Company, Silver Lake Manufacturing Company, and I am vice-president of some others.

Examiner Burchmore: Are you interested in the Dayton Lumber Company?

Mr. Fullerton: No, sir.

Examiner Burchmore: Aren't you a stockholder in that company?

Mr. Fullerton: No, sir.

Examiner Burchmore: Any members of your family stockholders in that company?

Mr. Fullerton: Yes, sir.

Examiner Burchmore: We had that case last night, Mr. Fullerton.

Mr. Fullerton: I was a stockholder in that company for
6345 some time, but I sold my stock to my son and he is a stockholder.

Examiner Burchmore: What is his name?

Mr. Fullerton: Robert W. Fullerton.

Examiner Burchmore: How long since you have been in that company?

Mr. Fullerton: Well I think I was in since its organization.

Examiner Burchmore: I mean how recently did you sell your stock?

Mr. Fullerton: Possibly six or eight months ago.

Examiner Burchmore: That is since June 30, 1910?

Mr. Fullerton: I could not tell you exactly whether it was since that time.

Examiner Burchmore: Are you now a stockholder or a director or both in the Trinity Valley & Northern Railway?

Mr. Fullerton: I am a stockholder. I am not an officer.

Examiner Burchmore: You are not a director?

Mr. Fullerton: No, sir.

Examiner Burchmore: Is your son a director in that company?

Mr. Fullerton: I think he is.

Examiner Burchmore: Does your son or do the members of your family control the Dayton Lumber Company?

6346 Mr. Fullerton: No, sir.

Examiner Burchmore: The Trinity Valley & Northern Railway?

Mr. Fullerton: No, sir.

Examiner Burchmore: The interest of your family or relatives is a minor one?

Mr. Fullerton: Minor.

Examiner Burchmore: Questions were asked last night and a witness said that you were present and would be able to answer several questions. When was the Gulf & Sabine River Railroad Company incorporated?

Mr. Fullerton: On September 1, 1906.

Examiner Burchmore: You were at that time interested in the corporation?

Mr. Fullerton: Yes, sir.

Examiner Burchmore: What was and is its capitalization?

Mr. Fullerton: We have $100,000.00 capital.

Examiner Burchmore: Is that all outstanding?

Mr. Fullerton: All outstanding, yes.

Examiner Burchmore: Was it issued for cash or for property acquired?

Mr. Fullerton: The Gulf & Sabine River Railroad Company was organized before the Gulf Lumber Company was organized.

6347 The Gulf Lumber Company, the Chicago Lumber and Coal Company or its subsidiary company, bought its interest and incorporated or caused this railroad to be incorporated, and they afterwards sold that to the Gulf Lumber Company, and the Gulf Lumber Company acquired the timber holdings of the Chicago Lumber and Coal Company, together with this railroad company in the purchase.

Examiner Burchmore: Do you refer to the Gulf Lumber Company as a subsidiary corporation of the Chicago Lumber and Coal Company?

Mr. Fullerton: No, sir, it is an independent company, it is not a subsidiary company, because we do not control it.

Examiner Burchmore: I just wanted to get one or two of the general facts in a general way in the beginning so as to understand a little about the case. This railroad is built in two separate sections?

Mr. Fullerton: Yes, sir.

Examiner Burchmore: One section is known as the Fullerton division?

Mr. Fullerton: Yes.

Examiner Burchmore: That connects with the Gulf, Colorado & Santa Fe and Lake Charles & Northern?

6348 Mr. Fullerton: Yes, sir.

Examiner Burchmore: At Nitram, Louisiana?

Mr. Fullerton: Yes, sir.

Examiner Burchmore: And extends to Fullerton?

Mr. Fullerton: Yes, sir.

Examiner Burchmore: A distance of approximately eighteen miles?

Mr. Fullerton: No.

Examiner Burchmore: What is that distance?

Mr. Fullerton: The main line from Nitram to Fullerton you have got on this paper as being 10.05 miles.

Examiner Burchmore: What is the distance between those two points?

Mr. Fullerton: I think the distance betwen Nitram and Fullerton now is 6.4.

Examiner Burchmore: How many locomotives and cars are there on that division?

Mr. Fullerton: Well the general manager can answer that better than I can.

Examiner Burchmore: Three or four locomotives and a number of cars?

Mr. Fullerton: The road has seven locomotives altogether.

6349 Examiner Burchmore: The other division of the railroad and the only other division it has is the Stables division?

Mr. Fullerton: That is all.

Examiner Burchmore: That connects with the Kansas City Southern at Stables, Louisiana?

Mr. Fullerton: Yes, sir.

Examiner Burchmore: And extends in what direction and for what distance?

Mr. Fullerton: South and west from Stables.

Examiner Burchmore: To a point known as Stevensville?

Mr. Fullerton: It extends to Klarpsville.

Examiner Burchmore: That is all.

Examiner Marble: It may be I will cover questions that your Honor has already passed, but if I do, you will bear with me. This timber was in the first instance bought by the Chicago Lumber and Coal Company?

Mr. Fullerton: The timber around Stables, a portion of it.

Examiner Marble: And the timber around Fullerton?

Mr. Fullerton: That was bought directly by the Gulf Lumber Company.

Examiner Marble: You have testified that there is no relation between the Gulf Lumber Company and the Chicago Lumber
6350 and Coal Company, have you?

Mr. Fullerton: What do you mean by relationship?

Examiner Marble: Well, does one own the stock of the other to any extent?

Mr. Fullerton: The Chicago Lumber and Coal Company is a stockholder in the Gulf Lumber Company, but the Gulf Lumber Company does not own any stock in the Chicago Lumber and Coal Company.

Examiner Marble: To what extent is the Chicago Lumber and Coal Company a stockholder in the Gulf Lumber Company?

Mr. Fullerton: I think we own about a third of the capital stock.

Examiner Marble: One-third?

Mr. Fullerton: Yes, about that.

Examiner Marble: Who owns the rest of the stock of the Gulf Lumber Company?

Mr. Fullerton: The stockholders, various people.

Examiner Marble: Is the Chicago Lumber and Coal Company the largest stockholder?

Mr. Fullerton: Yes.

Examiner Marble: Who is the next largest stockholder?

Mr. Fullerton: Well I don't know really who is.

6351 Examiner Burchmore: Mention some stockholders.

Mr. Fullerton: I am one of the largest individual stockholders personally.

Examiner Marble: What proportion of the stock of the Gulf Lumber Company do you own?

Mr. Fullerton: Of the Gulf Lumber Company?

Examiner Marble: Yes.

Mr. Fullerton: Well, I think I own possibly $350,000.00.

Examiner Marble: Give it as a fractional portion.

Mr. Fullerton: That would be ten per cent.

Examiner Marble: About ten per cent?

Mr. Fullerton: About that.

Examiner Marble: Do you own stock in the Chicago Lumber and Coal Company?

Mr. Fullerton: Yes, sir.

Examiner Marble: What proportion of that do you own?

Mr. Fullerton: Well I possibly own about one-seventh.

Examiner Marble: Now then I am taking more time about this than I should. Are those two companies practically controlled by the same interests?

Mr. Fullerton: No, I should not say so. While there are stockholders in the Gulf Lumber Company who are also stock-
6352 holders in the Chicago Lumber and Coal Company, there are quite a number of stockholders in the Chicago Lumber and Coal Company, who are not interested at all in the Gulf Lumber Company and quite a number in the Gulf Lumber Company not interested in the Chicago Lumber and Coal Company.

Examiner Marble: But they are controlled in harmony and have the same president?

Mr. Fullerton: I am president of both companies.

Examiner Burchmore: The Chicago Lumber and Coal Company had a former case before the Commission, involving lumber reparation. That case was partially heard at New Orleans in 1908, was it not, Mr. Saunders?

Mr. Saunders: Yes, sir.

Examiner Burchmore: Are you familiar with the record in that case, Mr. Saunders?

Mr. Saunders: Fairly so, I did not try the case.

Examiner Burchmore: I will ask Mr. Saunders or Mr. Fullerton whether the record in that case has any testimony as to the relation, if any, that existed between the Chicago Lumber and Coal Company and the Gulf Lumber Company?

6353 Mr. Saunders: My recollection is that there was a statement filed in there showing some relationship.

Mr. Fullerton: I don't think I know anything about it, that is, I don't think I ever read the testimony, and I was not present in the courtroom.

Examiner Burchmore: Has there been any change in—any substantial change in the stocks or ownership of the two companies since 1909?

Mr. Fullerton: Yes, there have been some changes.

Examiner Burchmore: Minor changes simply incident to purchases and sales of small holdings and stocks?

Mr. Fullerton: Yes, some rather large changes. I know of one party who sold $32,000, thirty or thirty-two thousand.

Examiner Marble: You are president of both of these companies, are you?

Mr. Fullerton: Yes, sir.

Examiner Marble: Are you the managing head, the executive head of both companies?

Mr. Fullerton: Executive head, yes, sir.

Examiner Marble: Have they other officers in common?

Mr. Fullerton: Well, yes, some of the directors that are
6354 directors of the Gulf Lumber Company are also directors in the Chicago Lumber & Coal Company, but there is none of them that takes any active control or any active management.

Examiner Marble: You have a Chicago Lumber & Coal Company of Texas, have you?

Mr. Fullerton: Yes, sir, it is a separate corporation.

Examiner Marble: Is its stock owned by the Chicago Lumber & Coal Company?

Mr. Fullerton: The majority of it.

Examiner Marble: All except directors' shares?

Mr. Fullerton: No, the party managing the business—That is a selling organization.

Examiner Marble: A selling organization?

Mr. Fullerton: Yes, sir, the Chicago Lumber & Coal Company is a selling organization. It does not manufacture any lumber and this Chicago Lumber & Coal Company of Texas is a subsidiary Company of the Chicago Lumber & Coal Company of Iowa, and that was organized to assist in selling the products of the Gulf Lumber Company, because we did not care to go into the State of Texas with our corporation.

Examiner Marble: Does the Chicago Lumber & Coal Company market the output of the Gulf Lumber Company?

6355 Mr. Fullerton: Practically all of it.

Examiner Marble: And these various other companies as well?

Mr. Fullerton: Yes, sir.

Examiner Marble: Various other companies in which you are interested?

Mr. Fullerton: Others in which we are not interested.

Examiner Marble: It is a selling company for some outside concerns in which you are not interested at all?

Mr. Fullerton: Yes, sir.

Examiner Marble: Going to the Gulf & Sabine River proposition, what did you say was the length of that road from Fullerton to Nitram?

Mr. Fullerton: The report says that there is 10.05 miles of main track from Nitram to Fullerton.

Examiner Marble: The distance from Nitram to Fullerton is five miles?

Mr. Fullerton: No, it is 6.04 miles, I think.

Examiner Marble: What is it that is five miles?

Mr. Fullerton: Originally it was built to the edge of the town of Fullerton—Fullerton is now an incorporated town, and in order to get to our mills where the logs were shipped to, it was 6.4

6356 miles from Nitram.

Examiner Marble: So that the distance from the mill to Nitram is 6.4 miles?

Mr. Fullerton: Yes, sir.

Examiner Marble: Who owns the stock of the Gulf & Sabine River Railroad?

Mr. Fullerton: It is owned by the same people that own the stock in the Gulf Lumber Company.

Examiner Marble: It is not owned by the Gulf Lumber Company then?

Mr. Fullerton: No, sir.

Examiner Marble: Is it owned by the same people in the same proportion?

6357 Mr. Fullerton: Well, it was originally that way, but I think that those things have changed, by reason of people selling their stocks in one and retaining their stock in the other, so that the proportion would not be the same now.

Examiner Marble: When was that five miles of track constructed?

Mr. Fullerton: I think it was in 1907.

Examiner Marble: After the purchase of this timber from around Fullerton by your Company?

Mr. Fullerton: Yes.

Examiner Marble: Was it constructed at the same time that you built your mill at Fullerton?

Mr. Fullerton: It was constructed before we built the mill.

Examiner Marble: The machinery for the mill then was brought in over that line?

Mr. Fullerton: Over that line, yes.

Examiner Marble: Did you attempt to secure the building of any trunk line or any other railroad to that point before you undertook to operate yourself?

Mr. Fullerton: I beg your pardon?

Examiner Marble: Did you attempt to persuade any trunk line to build a line to Fullerton before building this road your-

6358 self?

Mr. Fulerton: Not that I recollect of.

Examiner Marble: How?

Mr. Fullerton: I don't recollect having done so.

Examiner Marble: Did any trunk line offer to build to Fullerton?

Mr. Fullerton: Not that I recollect of.

Examiner Marble: Didn't the Santa Fe offer to build to Fullerton?

Mr. Fullerton: I don't think so.

Examiner Marble: Did any officer of the Santa Fe offer to build to Fullerton?

Mr. Fullerton: I think that Mr. Hershey and Mr. Coleman came into my office and said that they were constructing a line of railroad through that country and that it might possibly be changed; they had their right of way secured or located, but that it might be changed, if we would indicate, or if we wished to have them come closer to my property. That is my recollection of the conversation.

Examiner Marble: What did you tell them?

Mr. Fullerton: My recollection is that I told them that we expected to build the railroad ourselves.

6359 Examiner Marble: You expected to build the railroad yourself?

Mr. Fullerton: Yes.

Examiner Marble: Did you follow that up in any way to try to get the Gulf, Colorado & Santa Fe?

Mr. Fullerton: No, sir.

Examiner Marble: The Santa Fe Railroad to build?

Mr. Fullerton: No, sir.

Examiner Marble: You had your own plans and did not want them to build up to Fullerton, is that the idea?

Mr. Fullerton: I did not care. They had a right to do as they pleased, which they undoubtedly did do anyway.

Examiner Marble: Did you tell them that they were quite as near as you wanted them to get?

Mr. Fullerton: I don't recollect having told them anything of that kind.

Examiner Marble: Do you care to tell us why you did not try to get trunk line facilities, instead of having yourself removed at a distance from a trunk line?

Mr. Fullerton: Well, now, I think that is a business proposition That we had a right to determine for ourselves.

6360 Examiner Marble: A man starting a great industry, one would naturally think he would be pleased to have direct touch with a trunk line instead of being——

Mr. Fullerton: A person starting a great industry that furnishes a large amount of tonnage might wish to do the carrying part as well as the manufacturing part.

Examiner Marble: Was that the motive that impelled you in this matter?

Mr. Fullerton: Well, in all probability.

Examiner Marble: Now then, that road being built, the Santa Fe did not swerve from the line of its original survey, but constructed its road due east and north, to the northwest, and it goes through this town called Nitram. That is the Santa Fe line there now; you have a junction at Nitram with the Santa Fe tracks?

Mr. Fullerton: Yes, sir.

Examiner Marble: And you built from Fullerton down to Nitram?

Mr. Fullerton: Yes, sir.

Examiner Marble: Did the Santa Fe pay any divisions or allow interest to the Gulf & Sabine River Railroad?

Mr. Fullerton: I think not.

6361 Examiner Marble: Ever?

Mr. Fullerton: Not that I recollect of.

Examiner Marble: Did it refuse to pay?

Mr. Fullerton: I don't know that there was ever any formal request made of that company to establish rates and divisions.

Examiner Marble: An effort was made to get them.

Mr. Fullerton: Not by me, and I don't know whether it was attempted by anyone else. If it was, I do not know of it.

Examiner Marble: Didn't they at first pay you two cents for a time?

Mr. Fullerton: The Santa Fe?

Examiner Marble: Yes.

Mr. Fullerton: Not that I recollect of; I don't think they ever did

Examiner Marble: Didn't they offer you two cents?

Mr. Fullerton: I don't think so.

Examiner Marble: Or one cent?

Mr. Fullerton: I don't think they ever did.

Examiner Marble: Isn't it a fact that the Santa Fe Railroad offered you allowances of one or two cents, but refused to
6362 make a contract for any length of time?

Mr. Fullerton: Not to my knowledge.

Examiner Marble: Or some officer of the Santa Fe?

Mr. Fullerton: It never was reported to me if such offer was ever made.

Examiner Marble: If it was, if such a proposition to pay one cent on certain shipments and two cents on certain other shipments, but a refusal to make a time contract in the matter was made to any of your officials, it was not reported to you?

Mr. Fullerton: No.

Examiner Marble: You are not familiar with it?

Mr. Fullerton: No, sir.

Examiner Marble: From what road are you now getting divisions or allowances?

Mr. Fullerton: The Lake Charles & Northern.

Examiner Marble: The Lake Charles & Northern at its southern terminus begins at Lake Charles, Louisiana, does it not?

Mr. Fullerton: I think so.

Examiner Marble: And runs directly north to De Ridder?

Mr. Fullerton: Yes, sir.

6363 Examiner Marble: From that point it operates to Nitram over the tracks of the Gulf, Colorado & Santa Fe Railroad, does it not?

Mr. Fullerton: Yes, sir.

Examiner Marble: Has it anything to do with the securing of that trackage right of the Lake Charles & Northern over the tracks of the Santa Fe?

Mr. Fullerton: No.

Examiner Marble: Did you guarantee any tonnage to the Lake Charles & Northern before they made that arrangement with the Santa Fe?

Mr. Fullerton: Yes, we had an understanding that we would deliver a certain amount or proportion of tonnage.

Examiner Marble: A certain proportion of tonnage?

Mr. Fullerton: Yes, sir.

Examiner Marble: What proportion?

Mr. Fullerton: 80 per cent of timber from certain lands.

Examiner Marble: What proportion of output of the mills at Fullerton would that be?

Mr. Fullerton: Well, that would be 80 per cent.

Examiner Marble: 80 per cent of those mills at Fullerton?

Mr. Fullerton: Yes, sir.

6364 Examiner Marble: Were there any territorial descriptions as to destination, in the agreement as to destination?

Mr. Fullerton: Yes, there was; it was to points where they had rates and divisions.

Examiner Marble: Points where the Lake Charles & Northern had rates and divisions?

Mr. Fullerton: Yes, but where they did not have rates and divisions, of course it would not apply.

Examiner Marble: You are going beyond that 80 per cent in your actual routing of your shipments at the present time, are you not?

Mr. Fullerton: I think so.

Examiner Marble: You are shipping all of your output over the Lake Charles & Northern, are you not?

Mr. Fullerton: Yes, sir, practically.

Examiner Marble: Did you personally have charge of the arrangement for divisions with the Lake Charles & Northern?

Mr. Fullerton: No.

Examiner Marble: The negotiations?

Mr. Fullerton: No, I did not.

Examiner Marble: Who did?

Mr. Fullerton: Mr. C. I. Mallard, who was at that time
6365 president of the Gulf & Sabine River Railroad. I think he was the person who negotiated the divisions originally. Since that time Mr. Fleishel, the general manager, has attended to that.

Examiner Marble: Is Mr. Mallard here?

Mr. Fullerton: No.

Examiner Marble: Where is he?

Mr. Fullerton: He is at Norfolk, Virginia, lives there.

Examiner Marble: What is his present business?

Mr. Fullerton: Well, he is now president of the John L. Roper Lumber Company, and an officer in some railroad down there.

Examiner Marble: Is that one of your interests, Mr. Fullerton?

Mr. Fullerton: No, sir.

Examiner Marble: Did Mr. Mallard report to you from time to time?

Mr. Fullerton: Yes, sir.

Examiner Marble: In the progress of these negotiations?

Mr. Fullerton: Yes, sir.

Examiner Marble: With whom did he carry on these negotiations?

6366 Mr. Fullerton: Carried on the negotiations I think with Mr. Fay.

Examiner Marble: Mr. Fay of the——

Mr. Fullerton: Southern Pacific.

Examiner Marble: Of the Southern Pacific interests?

Mr. Fullerton: Yes, sir.

Examiner Marble: Had the Southern Pacific interests bought the Lake Charles & Northern, when those negotiations began?

Mr. Fullerton: I don't know.

Examiner Marble: When did those negotiations begin, can you fix the time?

Mr. Fullerton: Well, it was 1906, possibly the last of 1906 or 1907, I think, is when we bought the timber. It is possible that the negotiations were had about that time.

Examiner Marble: About the time of the purchase of the timber?
Mr. Fullerton: Practically.
Examiner Marble: But before the construction of your railroad there?
Mr. Fullerton: I think so.
Examiner Marble: Did you have those suggestions in mind when Mr. Coleman called upon you to suggest that the Santa Fe
6367 would build direct to Fullerton?
Mr. Fullerton: I don't know.
Examiner Marble: Had they been begun before he called upon you?
Mr. Fullerton: It is quite probable. I don't recollect the time when he called upon me.
Examiner Marble: Can you fix the time when the material for the mill was shipped in?
Mr. Fullerton: Well, it must have been in 1907; wasn't it?
Mr. Fleishel: Yes.
Examiner Marble: Were those divisions with Mr. Fay's interest agreed upon before the Gulf & Sabine River Railroad was constructed?
Mr. Fullerton: I think not.
Examiner Marble: Were they discussed with him before it was constructed?
Mr. Fullerton: Probably.
Examiner Marble: Well, now, certainly, was it all one concurrent transaction, is that what you mean to say, all going on at the same time?
Mr. Fullerton: No, I think not. I think the matter was discussed either with Mr. Fay or with some person representing the
6368 Southern Pacific interests.
Mr. Cowan: Which Mr. Fay was that?
Examiner Marble: Mr. Charles S. Fay, was it not?
Mr. Fullerton: I believe it was either Charles S. Fay or Thornwell, and I presume it was with Charles S. Fay.
Examiner Marble: I will ask you, Mr. Fullerton, in the railroad organization in the Southern Pacific, which is the superior of the two, in point of authority, Mr. Charles S. Fay, or Mr. Thornwell Fay?
Mr. Fullerton: Thornwell Fay.
Examiner Marble: What is his position?
Mr. Fullerton: I understand that he is general manager or vice-president of the Texas Lines, or Southern Lines of the Southern Pacific.
Mr. Cowan: Mr. Garwood can tell you all about it.
Examiner Marble: Did you have any communication with Mr. Thornwell Fay yourself?
Mr. Garwood: The Louisiana end of it, I have no connection with the Louisiana lines at all.
Mr. Cowan: I thought maybe you might know.
Mr. Garwood: Of course I know of it.
Mr. Fullerton: I did not catch your question.

6369 Mr. Garwood: Mr. Thornwell Fay is vice-president and general manager, both of the Louisiana lines and the Texas lines, and my understanding, while I have no connection with the Louisiana lines, Mr. Charles Fay is general freight agent of the Louisiana lines.

Examiner Marble: Did you personally have any communication with Mr. Thornwell Fay regarding this matter?

Mr. Fullerton: I don't think that I did personally.

Examiner Marble: Did you have any communication with any superior of Mr. Tornwell Fay?

Mr. Fullerton: I did not personally conduct these negotiations, and consequently I did not—I don't know.

Examiner Marble: Were there negotiations conducted and carried on with the officers of the Southern Pacific interests who were superior even to Mr. Thornwell Fay?

Mr. Fullerton: I think so.

Examiner Marble: Whom?

Mr. Fullerton: Some of the officers in New York.

Examiner Marble: With Mr. Harriman?

Mr. Fullerton: Yes, possibly with Mr. Harriman.

Examiner Marble: That is your understanding, that negotiations were carried on with Mr. Harriman in this matter?

6370 Mr. Fullerton: Yes, sir.

Examiner Marble: In carrying on those negotiations with Mr. Harriman, who represented you?

Mr. Fullerton: Mr. Mallard.

Examiner Marble: Were you familiar with the operations of the Gulf & Sabine Railroad?

Mr. Fullerton: Not with the actual operations.

Examiner Marble: The physical operations?

Mr. Fullerton: No.

Examiner Marble: Is there someone who is going to testify that is?

Mr. Saunders: Yes, Mr. Fleishel, our general manager.

Examiner Marble: I will gain nothing by examining this witness along that line

Mr. Saunders: Nothing at all.

Examiner Marble: What territory do your timber holdings around Fullerton cover in extent?

Mr. Fullerton: Well, we have got in the neighborhood of 140,000 acres, that is, the company owns that much.

Examiner Marble: Would you with a pencil on this map indicate roughly the outline of that territory, or someone else?

6371 Mr. Saunders: Mr. Fleishel will do it for you, Mr. Marble.

Examiner Marble: I will ask him to do it right now. The Examiner suggests to me that it would be well to have in the record a map which will indicate these facts which I have got up here in this informal way.

Mr. Fleishel: You mean a map showing the timber?

Examiner Marble: Yes, showing the railroad and the timber lands.

Mr. Fleishel: I have a railroad map here but I have not got the timber on it. But we will give you a timber map.

Examiner Marble: Showing both the timber cut over and still there.

Mr. Fleishel: Do you want that shown separately?

Examiner Marble: You may show those which still contain timber, and then show those on the map from which the timber has been removed.

Mr. Fleishel: This is merely a profile of the railroad showing the curvature. (Indicating profile.)

Examiner Marble: You will indicate it with red ink?

Mr. Fleishel: Yes, sir.

Examiner Marble: You have given the capital of this line as $100,000.

6372 Mr. Fleishel: Yes.

Examiner Marble: Was that all paid in at par?

Mr. Fullerton: Yes, sir.

Examiner Marble: And you have issued some bonds?

Mr. Fullerton: Yes, sir.

Examiner Marble: How much?

Mr. Fullerton: $300,000.

Examiner Marble: Were they sold at par?

Mr. Fullerton: No, sir.

Examiner Marble: What figure were they sold at?

Mr. Fullerton: About 50 per cent.

Examiner Marble: What is their rate of interest?

Mr. Fullerton: They are 5 per cent bonds.

Examiner Marble: That means that they are issued on a 50 per cent basis then?

Mr. Fullerton: Yes, sir—Well, yes, we got a little over 50 per cent for them.

Examiner Marble: That bond discount is carried in your account and reported to the Commission?

Mr. Fullerton: Yes, it is being distributed, a portion of it each year.

Examiner Marble: Distributed on what items?

6373 Mr. Fullerton: It is charged against the earnings, depreciation. It would have been too much to have charged off all at one time, so we charged it off from year to year.

Examiner Marble: Did you distribute it over the life of the bonds?

Mr. Fullerton: I don't know about that, whether it exceeds the life of the bonds or not.

Examiner Marble: What is the life of the bonds?

Mr. Fullerton: I think the bonds will mature in 1928. I rather think that they extend over the entire life of the bonds.

Examiner Marble: Who purchased those bonds?

Mr. Fullerton: The Gulf Lumber Company.

Examiner Marble: I think I will excuse Mr. Fullerton now, asking him to remain, of course, and put Mr. Fleishel on as to the practical operation of this road, unless there is any cross-examination that has not already been brought.

Mr. Cowan: No, I want to ask Mr. Fullerton the general line of questions we took up with Mr. Johnson yesterday, but we can do that better after we get through with all these details.

Examiner Marble: Very well, if everybody is agreed as
6374 to that.

(Witness excused.)

M. L. FLEISHEL, was called as a witness, and having been duly sworn, testified as follows:

Direct examination:

Examiner Marble: Will you give your name to the reporter?

Mr. Fleishel: M. L. Fleishel.

Examiner Marble: What is your present position, Mr. Fleishel?

Mr. Fleishel: I am general manager of the Gulf & Sabine River Railroad.

Examiner Marble: Have you any other business than that?

Mr. Fleishel: Yes, sir, I am general manager of the Gulf Lumber Company also.

Examiner Marble: As general manager of the Gulf Lumber Company what are your duties?

Mr. Fleishel: Well, I have charge of all operations.

Examiner Marble: All operations?

Mr. Fleishel: Yes, sir, outside of executive matters.

Examiner Marble: You have control of the routings of shipments made by the Gulf Lumber Company?

6375 Mr. Fleishel: No, sir. Those orders come to us routed. We have published tariff rates——

Examiner Marble: Who do those orders come to you from, from the Chicago Lumber & Coal Company?

Mr. Fleishel: Some of them, chiefly, they sell the bulk of it, the Chicago Lumber & Coal Company of Texas, and the Chicago Gulf Export Lumber Company.

Examiner Marble: These are selling agencies of the same general interests?

Mr. Fleishel: Yes, sir.

Examiner Marble: They sell practically all of your lumber?

Mr. Fleishel: They sell the major portion of it.

Examiner Marble: Would you put it as high as 95 per cent?

Mr. Fleishel: I would not say so.

Examiner Marble: More than 90?

Mr. Fleishel: Probably 90, yes, sir.

Examiner Marble: How long have you been in this position of general manager of these two concerns?

Mr. Fleishel: Ever since they were organized.

Examiner Marble: Were you connected with the enterprise before the corporations were organized?

Mr. Fleishel: Yes, sir.

6376 Examiner Marble: Did you have to do with the location there?

Mr. Fleishel: Yes, sir.

Examiner Marble: Did you have to do with any negotiations for rail facilities?

Mr. Fleishel: Yes, sir.

Examiner Marble: Do you know of any offer by the Santa Fe to pay divisions to the Gulf & Sabine River?

Mr. Fleishel: No, sir.

Examiner Marble: On any terms, whatever?

Mr. Fleishel: No, sir.

Examiner Marble: None were made to you?

Mr. Fleishel: No, sir.

Examiner Marble: Nor to anyone else that you know of?

Mr. Fleishel: Never heard of it.

Examiner Marble: Was there any refusal to give you those divisions?

Mr. Fleishel: Indirectly, I think there was.

Examiner Marble: To whom were those refusals given?

Mr. Fleishel: They were never given, of course, any more than looking toward them to this extent. Before the railroad was completed I went over to Galveston to see Mr. Marsh and Mr.
6377 Pettibone, in regard to some construction material that was delayed. The road in fact had been all laid before I got there, that is, all except the laying of the steel; and I had no authority at that time really to make any divisions, but in the course of conversation there probably was some talk with reference to putting in divisions.

Examiner Marble: Did they refuse to put in divisions?

Mr. Fleishel: I don't know that they did. I think they did.

Examiner Marble: Your impression is that they did?

Mr. Fleishel: Yes, sir, that is my impression, but they had already indicated their intention that they would not.

Examiner Marble: Yes; to you?

Mr. Fleishel: I don't know how much authority the people had that indicated it.

Examiner Marble: You took that as a refusal from the Santa Fe to put in those rates?

Mr. Fleishel: Yes, sir.

Examiner Marble: You took it as their refusal to put in any divisions then?

Mr. Fleishel: In a general way, yes, sir.

Examiner Marble: Did you take it as a refusal to put in divisions at any time?

6378 Mr. Fleishel: No, sir, my impression was that they intimated that they never would do it.

Examiner Marble: Never would do it?

Mr. Fleishel: No, sir.

Examiner Marble: You went away with that impression?

Mr. Fleishel: Yes, sir.

Examiner Marble: Was it after that that the negotiations with the Southern Pacific interests were first made?

Mr. Fleishel: I was not positive as to that because I did not conduct those negotiations.

Examiner Marble: That was before the road was built that you got that impression from them?

Mr. Fleishel: Yes, sir.

Examiner Marble: Before the mill was built?

Mr. Fleishel: Yes, sir. We also had some pretty extensive railroad plans, and they were not disposed to recognize us as a railroad, or in fact to take us at all seriously.

Examiner Marble: Are you familiar with any offer or proposition to build the Santa Fe to Fullerton?

Mr. Fleishel: Absolutely none, no, sir.

Examiner Marble: You are not familiar with that?

6379 Mr. Fleishel: No, sir, never heard of it.

Examiner Burchmore: The line to the north of Nitram, belonging to the Gulf & Sabine River Railroad was not constructed, was it, until after the other railroads got into Nitram?

Mr. Fleishel: Yes, sir; built before the Santa Fe got there.

Examiner Burchmore: Where did they get the steel?

Mr. Fleishel: I stated in the beginning, our line bought the steel.

Examiner Marble: You got the roadbed ready?

Mr. Fleishel: That was the reason I went to Galveston at that time, to see if we could not hurry things up; we could not get it in there, but the bridges and the grades were all built before they got there, and we were operating it into Fullerton within two weeks of their rail reaching the junction.

Examiner Marble: Do you know the amount of the divisions you are now receiving?

Mr. Fleishel: Yes, sir.

Examiner Marble: Have you a detailed statement of those with you?

Mr. Fleishel: Well, no, I haven't a copy of the division sheets, but I can tell you what they are.

6380 Examiner Marble: What are they?

Mr. Fleishel: On lumber, from one to four cents, a maximum of four and a minimum of one. On classes and commodities it is 25 per cent of the Lake Charles proportion.

Examiner Marble: 25 per cent of the Lake Charles proportion?

Mr. Fleishel: Yes, sir, either in or outbound.

Examiner Marble: That is to say, it is 25 per cent of the amount allotted for transportation north of Lake Charles, Louisiana to Fullerton?

Mr. Fleishel: That is the idea, yes, sir.

Examiner Marble: Now then, will you distinguish between the one cent business and the four cent business? On what shipments do you receive only one cent?

Mr. Fleishel: Well, business on which there is a short coast rate. Sabine Pass, Port Arthur, Galveston, and New Orleans.

Examiner Marble: Is that true on Domestic shipments to those points, as well as Export?

Mr. Fleishel: Yes, sir—that is, now I think so, but I would not be positive as to that. I think that is a fact, yes, sir. It does

6381 not make any difference anyway, because we don't ship anything for local consumption.

Examiner Marble: You said the division was from one to four cents?

Mr. Fleishel: Yes, sir.

Examiner Marble: What is your next figure above one cent?

Mr. Fleishel: Four cents on lumber.

Examiner Marble: On mill business, and on lumber you receive one cent, and on some business you receive four cents?

Mr. Fleishel: Yes, sir.

Examiner Marble: There is no figure in between?

Mr. Fleishel: No, sir.

Examiner Marble: Then on all shipments except to nearby coast points you receive four cents?

Mr. Fleishel: No, sir, on points in Louisiana east of Lake Charles, and also in Texas east of Houston, to which no lumber moves, however, the division is to be agreed upon in case there is any business offered, but there are no settled divisions, there are no division sheets at present covering business in that particular territory, and no business offered.

Examiner Marble: On business you actually move you receive four cents on shipments to all points except these Gulf
6382 Coast points that you named?

Mr. Fleishel: Yes, sir.

Examiner Marble: Suppose the business is routed through a nearby port to a coast point beyond, does that affect your division?

Mr. Fleishel: I don't follow your thought.

Examiner Marble: Take a shipment to New Orleans to be put on a vessel and carried to some coast point beyond New Orleans?

Mr. Fleishel: That in our idea is an export shipment. I am referring to Gulf points as well as export, if it goes to a vessel for movement to coast points such as New York, Boston or Philadelphia, or some such place, those are export and the same division sheets and tariffs apply.

Examiner Marble: You get what on those shipments?

Mr. Fleishel: One cent per hundred.

Examiner Marble: I mean from Fullerton to New York via New Orleans and Southern Pacific steamers.

Mr. Fleishel: We carry a division of one cent.

Examiner Marble: You would not get a division of four cents on that?

Mr. Fleishel: No, sir.

Examiner Marble: Did you ever get four cents on such
6383 shipments?

Mr. Fleishel: No, sir.

Examiner Marble: If the business were routed all rail to New York, what division do you get?

Mr. Fleishel: We have never shipped any. We are at such a marked disadvantage in the rate we have never shipped any.

Examiner Marble: What is your disadvantage in the rate?

Mr. Fleishel: I think about 15 or 20 cents a hundred.

Examiner Marble: You have not arranged joint rates through all-rail?

Mr. Fleishel: Not that I know of. Those tariffs may cover that, but I don't know. We have never shipped a car and probably never will.

Examiner Marble: It would make no difference in your divisions on shipments moving through gulf ports, whether the lumber was routed to the port and reshipped, or routed through the port, continuous transportation, to some point beyond?

Mr. Fleishel: Well, I think it would if I recall correctly. These tariffs provide a separate rate for lumber going to New Orleans or Galveston and when they rebill the same the rate is higher.

6384 Examiner Marble: Somewhat higher than the export rate?

Mr. Fleishel: Yes, sir, it is higher. I think it is probably two or three cents, maybe four cents higher. However, I don't know about that.

Examiner Marble: These shipments going beyond would be in the first instance so routed to get that lower export rate?

Mr. Fleishel: Well, we have never shipped anything beyond except to Boston, that is to New Orleans, consigned to New Orleans. These waybills for shipment to New Orleans must state that they are for export. There is also a custom with the Southern Pacific line whereby they charge a local rate in on shipments that move to New Orleans and refund if they get vessel receipts, showing that the product has moved outbound.

Examiner Marble: Do you actually ship through New Orleans to New York?

Mr. Fleishel: We have, yes, sir.

Examiner Marble: Any considerable business?

Mr. Fleishel: No.

Examiner Marble: To Boston?

Mr. Fleishel: No, not through New Orleans, through Port Arthur, chiefly.

6385 Examiner Marble: On that you get one cent?

Mr. Fleishel: Yes, sir.

Examiner Marble: Has there been any considerable business there?

Mr. Fleishel: Yes, there was quite a bit; there has not been so much recently.

Examiner Marble: Where does the bulk of your business go now?

Mr. Fleishel: Well, the bulk of it goes to foreign points I should say, we ship everything we can export.

Examiner Marble: You mean you prefer to sell export?

Mr. Fleishel: Yes, sir.

Examiner Marble: Why is that?

Mr. Fleishel: Because we get more money for the lumber.

Examiner Marble: A better price for the lumber?

Mr. Fleishel: Usually; it is the kind of material we like to get.

Examiner Marble: Will they take a different grade of lumber?

Mr. Fleishel: Some, yes.

Examiner Burchmore: A better grade or a poorer?

Mr. Fleishel: Better. Those fellows abroad are pretty

6386 smart; they get the best.

Examiner Marble: So that these grades of lumber you prefer to sell——

Mr. Fleishel: I mean that in a broad sense. We send them largely timber, large square timber.

Examiner Marble: Have you in your possession division sheets governing these joint rates to which your road is a party?

Mr. Fleishel: No, I have not. I think they are on file with the Commission.

Examiner Marble: Are you familiar with them?

Mr. Fleishel: Reasonably so. I do not handle them, you understand. We have an office force there in the railroad office that handles this matter, and it is only in a general way that I [illegible] about it.

Examiner Marble: Are you familiar with the division of this 16 cent rate from your points through to points on the Illinois Central and connections beyond?

Mr. Fleishel: Yes, sir.

Examiner Marble: Do you get a division of four cents out of that?

Mr. Fleishel: Yes, sir.

6387 Examiner Marble: Do you know what the Lake Charles & Northern would get for the haul from Fullerton to Lake Charles?

Mr. Fleishel: I should think four cents. Eight cents for the haul, and we get four and they get four.

Examiner Marble: Do you know what the road from Lake Charles to New Orleans would get?

Mr. Fleishel: No, I don't know that.

Examiner Marble: Or the Illinois Central?

Mr. Fleishel: No. It is rather an extreme case, though, because the freight rate there carries for 16 cents to Cairo proper, which is a basing point.

Examiner Marble: Don't you mean that the four cent division is from Fullerton to New Orleans, or from Nitram to New Orleans, and a 4½ cent division, rather, isn't that the case?

Mr. Fleishel: I think not; in fact I am quite sure that it is not.

Examiner Marble: And 7½ to the Illinois Central there at New Orleans?

Mr. Fleishel: I am quite sure that is not so. In the first place, I don't think we carry the division to Cairo proper, because it is a basing point, taking anywhere from 22 to 26 cents, and a higher rate.

6388 Examiner Marble: Are you familiar with the Southern division sheet, No. 943?

Mr. Fleishel: No, I don't know that I have ever seen it.

Examiner Marble: Were you familiar with the division of the 23 cent rate?

Mr. Fleishel: Say to an Illinois point?

Examiner Marble: Wherever they might be on the line of the Illinois Central.

Mr. Fleishel: No, I don't know that I am. I have at one time seen those Southern Pacific Division sheets, but it is purely memory with me. I don't know, but my impression is that on those rates that move through a 16 cent Cairo basis they are divided as

between our line and the L. C. & N., four cents each. Now, whether that is right or not, I do not know, but that is my impression.

Examiner Marble: In order that the gentleman may be apprised of what I am trying to get at, our information is that on say a 16 cent rate from Fullerton to a point on the Illinois Central, the division is four cents to the Gulf & Sabine River, 4½ cents to the Southern Pacific interests, from Nitram to New Orleans, and 7½ cents for the Illinois Central beyond, and our information
6389 further is that the division of the Lake Charles & Northern of that 4½ cents, is 1.1, while the road from the Lake Charles & Northern to New Orleans is 3.4 cents, giving us from a 16 cent rate to a 40 cent rate for the Lake Charles & Northern Division from Nitram to Lake Charles.

Now, that your memory has been refreshed respecting that, what have you to say concerning it?

Mr. Fleishel: I would be willing to state positively that I believe there never is a carload of lumber moved from a point on our line to a 16 cent point on the Illinois Central, not even one.

Examiner Marble: I am saying that that covers the rates up to 40 cents?

Mr. Fleishel: I don't know anything as to that, but I do not believe that there has ever been a carload of lumber from a point on our line to a point on the Illinois Central line that carried a less rate than 21 cents.

Examiner Marble: You have no point on——

Mr. Fleishel: Unless it be St. Louis proper. I don't think we have ever shipped a carload off our line to Cairo proper. We probably have shipped a few cars to St. Louis, but I am positive that we have not shipped any to Cairo proper.

6390 Examiner Marble: I have said nothing about the 16 cent rate to be made that does not apply equally on a 21 or 23 cent rate.

Mr. Fleishel: As to the proper division, I don't know about that.

Examiner Marble: I started with the 16 cent rate, because it was at the top of the sheet, and for no other reason.

Examiner Burchmore: Now, the 16 cent rate only applies to traffic moving via Cairo and beyond, taking that 16 cent rate in combination with some other rate beyond?

Mr. Fleishel: I suppose so, but that is made over the Illinois Central.

Examiner Marble: The Illinois Central and connections beyond.

Mr. Fleishel: Yes, Cairo would be a very different matter.

Examiner Marble: You are familiar with those conditions?

Mr. Fleishel: No, only I have seen frequently divisions—but this is purely memory—which gave two and a half.

Examiner Marble: Now then, I will ask that the Commission secure this Southern Pacific Division sheet and put it in
6391 the record.

Examiner Burchmore: Very well, that may be done.

Examiner Marble: And as your road is a party to that division, I will ask you to send it in.

Mr. Fleishel: All right, sir, if they will give it to us.

Examiner Marble: You are entitled to it.

Mr. Fleishel: I have one copy.

Examiner Marble: You haven't it here?

Mr. Fleishel: No.

Examiner Burchmore: You can make a copy of it?

Mr. Fleishel: I haven't it here. It is in our general office at the mill.

Examiner Marble: Does the Lake Charles & Northern develop any other business at Nitram than what is received by your line?

Mr. Fleishel: Practically none.

Examiner Marble: Do you know whether it has trackage rights running to intermediate points between De Ridder and Nitram?

Mr. Fleishel: Yes, sir, it does.

Examiner Marble: They have the right to receive freight at all points?

Mr. Fleishel: They have and do every day.

6392 Examiner Burchmore: Well, is that an unlimited right to go out there and take way freight between points—at points between Nitram and De Ridder that is destined, for example, to Kansas City or some other place?

Mr. Fleishel: Yes, sir, they do it every day in the week.

Examiner Burchmore: They can take traffic anywhere in the country?

Mr. Fleishel: I think it is provided that they cannot accept business between local points on the Santa Fe. For instance, I don't think they could take business at Cravens or De Ridder, but they can take business for Cravens to Lake Charles, or Cravens to New Orleans, or St. Louis or Chicago, or any other point except local points—except where the Santa Fe have rails, all the way.

Examiner Marble: Could it for Chicago, then?

Mr. Fleishel: Oh, yes.

Examiner Marble: Although the Santa Fe have rails all the way?

Mr. Fleishel: Yes, sir, they do it every day.

Examiner Marble: They do receive some lumber at Cravens from the Pickering concern?

Mr. Fleishel: Quite a bit, yes.

6393 Examiner Marble: Do you know how much they get on that?

Mr. Fleishel: Mr. Church testified to that this morning.

Examiner Marble: I think it was testified this morning that you got two and a half a car.

Mr. Fleishel: That is just a switching charge. It is on local freight out of Cravens.

Examiner Marble: You say that the Pickering people receive two and a half only?

Mr. Fleishel: Two and a half. I only know what I heard this morning. I have understood all along that they did. I did not

know that they were making that switching charge, but Mr. Church testified this morning that they did.

Examiner Marble: How far is their mill from Cravens?

Mr. Fleishel: Right in Cravens.

Examiner Marble: How far is it from the junction with this track?

Mr. Fleishel: They use the Santa Fe track. It is just as close as the Santa Fe is. The L. C. & N. does not own any track between Lake Charles and Cravens or De Ridder. It operates entirely over the Santa Fe tracks. Wherever the Santa Fe goes, the L. C. & N. goes.

Examiner Marble: I am talking about the length of the
6394 haul by the Pickering interests for which this two dollars and a half a car is paid. Are you familiar with that?

Mr. Fleishel: Yes, I should say it was a quarter of a mile, probably a half. I would not guess over that anyhow.

Examiner Marble: You would not say a mile and a half?

Mr. Fleishel: I would not, no, sir.

Examiner Marble: This rate that you have, that you have an allowance of four cents, is that on lumber or on the lumber and the logs?

Mr. Fleishel: On the lumber we charge and waybill the same. The logs that went into the mill were paid for, and the transaction ends right there.

Examiner Marble: What rate do you charge on logs?

Mr. Fleishel: $2.50 a car, and a copy of that tariff is filed with the Commission.

Examiner Marble: You regard that as an intrastate movement to the mill?

Mr. Fleishel: Yes, sir.

Examiner Marble: Why do you file them with the Interstate Commerce Commission?

Mr. Fleishel: I cannot answer as to that. We all have our tariffs——

6395 Examiner Burchmore: It is not filed with an I. C. C. number, is it?

Mr. Fleishel: Yes, sir, it is.

Examiner Marble: What is the average haul on those logs?

Mr. Fleishel: Oh, I should say four miles, right now.

Examiner Marble: Does the railroad company undertake the expense of maintaining the logging spurs to the trees?

Mr. Fleishel: No, sir, has nothing to do with it.

Examiner Marble: The logging company maintains those?

Mr. Fleishel: Yes, sir.

Examiner Marble: Why do you have that done by the logging company instead of the railroad company taking it and operating the road?

Mr. Fleishel: Well, the railroad has nothing to do with the spur tracks. We do not operate anything but main line tracks, operate those for our own traffic.

Examiner Marble: Do you cover that as a railroad proposition?
Mr. Fleishel: No, sir.
Examiner Burchmore: No temporary tracks?
Mr. Fleishel: No, sir.

Examiner Marble: Does the railroad take any burden of
6396 putting down temporary tracks afterwards to be taken up?

Mr. Fleishel: No, the only thing we do, we put in switch points; wherever they can show us that they have got business enough to justify us putting down a switch point for them to come out, we do it.

Examiner Marble: Your road regards the business on the timber tracks as a logging proposition rather than a railroad proposition?

Mr. Fleishel: Yes, they do not have anything to do with the railroad business.

Examiner Marble: Does the railroad furnish the equipment and cars that run——

Mr. Fleishel: Yes, sir, we furnish the cars.

Examiner Marble: But no locomotives?

Mr Fleishel: Well, we lease them one locomotive and charge them ten dollars a day.

Examiner Marble: Does that include the wages of the crew?

Mr. Fleishel: No, no; they only require one locomotive, and so we give it to them, but we charge them ten dollars a day. Sometimes they have got one engine, sometimes another. They have got to have an engine, and they don't need but one at a time.

6397-8 Examiner Marble: You are not actually engaged in construction operation on the two mile extension?

Mr. Fleishel: Not just at present. We are building the other way now. We have our force on the other line.

Examiner Marble: You have drawn the outline of the land owned by the lumber company here, and which entirely encloses both these extensions as they go out, they are situated entirely within the land of this lumber company?

Mr. Fleishel: Just at present, yes, sir.

Examiner Marble: So there is no business developed by those extensions at the present time?

Mr. Fleishel: Yes, sir, there has been some.

Examiner Marble: Except logging business and business in forest products for the lumber company?

Mr. Fleishel: Yes, sir, there has been some.

Examiner Marble: What other business is there?

Mr. Fleishel: We have hauled hardwood logs out there for other people.

Examiner Marble: Logs developed from the land of this same lumber company?

Mr. Fleishel: In some cases yes, and in some cases no, sir.

Examiner Burchmore: Do they haul hardwood logs by
6399 wagon to your road?

Mr. Fleishel: Yes, sir.

Examiner Marble: How far would they haul hardwood?
Mr. Fleishel: Oh, not very far, along that dry creek bottom there.
Examiner Marble: How many feet?
Mr. Fleishel: They don't have to haul them very far.
Examiner Marble: How many logs do you so carry?
Mr. Fleishel: Not very many. We do not bother with the hardwood ourselves.
Examiner Marble: What has been done beyond the construction of this two miles of road from Fullerton northeast on this proposed extension to Alexander?
Mr. Fleishel: Nothing except the survey.
Examiner Marble: Has the survey been made?
Mr. Fleishel: Yes, sir.
Examiner Marble: How serious a survey has been made?
Mr. Fleishel: Very serious, indeed.
Examiner Marble: Has the right of way been secured?
Mr. Fleishel: Not all of it.
Examiner Marble: Any of it?
Mr. Fleishel: We have had negotiations for right of way,
6400 practically all the way.
Examiner Marble: Have you secured any beyond the two miles?
Mr. Fleishel: No, we have arrangements but we haven't got any yet.
Examiner Marble: Beyond your own line?
Mr. Fleishel: Yes, sir.
Examiner Marble: But you have not secured any beyond your own line?
Mr. Fleishel: No, we have not taken the deeds to it.
Examiner Marble: Have you closed up?
Mr. Fleishel: No, sir.
Examiner Marble: Are those lands generally owned by other lumber companies up toward Alexander?
Mr. Fleishel: Yes; one interest down in Alexander.
Examiner Marble: What interest is that?
Mr. Fleishel: The Weyerhauser interests, they are not operating, however. Most of that land in between Pine Timber and Alexander is a fertile valley, there is no timber on it.
Examiner Marble: This extension is northwest that is going to Leesville?
6401 Mr. Fleishel: Yes, sir.
Examiner Marble: Why is the road from Stables shown as if you were going to connect up with that?
Mr. Fleishel: Because we are going to do it.
Examiner Marble: Have you secured that right?
Mr. Fleishel: Yes, sir.
Examiner Marble: From the present owners?
Mr. Fleishel: Yes, sir.
Examiner Marble: That would take you to Leesville?
Mr. Fleishel: That will take us to Leesville. We are going into Leesville over their line. They have already got five miles of it built.

Examiner Marble: That road also goes to Stables, doesn't
6402 it?

Mr. Fleishel: No, we are going to both places.

Examiner Marble: How are you going to Stables?

Mr. Fleishel: We branch off about three miles out here and run southeast of Leesville there. The reason I did not put it on there is because that division of the road is not chartered.

Examiner Marble: You are going to branch off and go into Stables and you say it is about three miles from some point on that road. This map is correct. It shows that road going into Stables, when as a matter of fact it runs into Leesville.

Mr. Fleishel: We did not intend that.

Examiner Marble: What road is this here? What is the name of that? (Indicating on map.)

Mr. Fleishel: That is the Sabine—Gulf & Sabine River.

Examiner Marble: The same one as between——

Mr. Fleishel: It was originally chartered as the Gulf & Sabine River.

Examiner Marble: Is that owned by the same corporation that owns the road from Fullerton to Nitram?

Mr. Fleishel: Yes, sir; it is part and parcel of it.

6403 Examiner Marble: That line runs to Stables through your timber lands?

Mr. Fleishel: Yes, sir.

Examiner Marble: For what distance?

Mr. Fleishel: Oh, about nine miles probably, nine and a half.

Examiner Marble: What corporation owns those timber lands?

Mr. Fleishel: The Gulf Lumber Company the greatest portion of them.

Examiner Marble: There is a logging road in that timber at the present time?

Mr. Fleishel: Yes, sir. Of course we consider it part of our main line.

Examiner Marble: Now, you have shown a proposed extension of that road down to the Sabine River opposite Orange?

Mr. Fleishel: East Orange.

Examiner Marble: On here you have just indicated and mentioned the roads of a number of other concerns.

Mr. Fleishel: The Lutcher & Moore Lumber Company.

Examiner Marble: Do they know they are to be a part of this line?

Mr. Fleishel: No, they don't and we don't either. We
6404 have had it up, however, we have been discussing it.

Examiner Marble: Then when you have marked this line from Baylor down to East Orange as constructed, you mean that there is a railroad there that somebody owns that you are going to get if you can?

Mr. Fleishel: That is it exactly.

Examiner Marble: In the same way with the stretch of track from Merryville north ten miles?

Mr. Fleishel: Yes, sir.

Examiner Marble: You do not own that road?
Mr. Fleishel: Oh, no.
Examiner Marble: Who does that belong to?
Mr. Fleishel: Belongs to the West Lumber Company.
Examiner Marble: Is it a logging road?
Mr. Fleishel: Yes, sir, laid with 60 pound rails.
Examiner Marble: Do they know that they are to be a part of this extension?
Mr. Fleishel: The same situation exactly as the other.
Examiner Marble: You are going to get it if you can?
Mr. Fleishel: Yes, sir, we have been negotiating with them.
Examiner Marble: This road to the north from the connection with the river is a logging road also, is it not?
6405 Mr. Fleishel: Which is that?
Examiner Marble: This part that you have marked as constructed, the extreme southern portion.
Mr. Fleishel: It belongs to the Lutcher and Moore Lumber Company.
Examiner Marble: That is their logging road?
Mr. Fleishel: I don't know whether that road is chartered or not?
Examiner Marble: That is our information, that it is not.
Mr. Fleishel: I think it is not.
Examiner Marble: Does not operate as a common carrier.
Mr. Fleishel: I am sure it does not.
Examiner Marble: What about this line to Merryville, that is a logging road also?
Mr. Fleishel: Yes, sir, that connects with the Santa Fe.
Examiner Marble: Do you happen to know whether or not they are incorporated?
Mr. Fleishel: I don't think they are.
Examiner Marble: They do not get any division?
Mr. Fleishel: I think not.
Examiner Marble: Is the Leesville road incorporated that you mention?
Mr. Fleishel: Yes, sir, it was. They are not getting any
6406 divisions, however.
Examiner Marble: Are they operating as a common carrier?
Mr. Fleishel: No, they are not.
Examiner Marble: When were they built?
Mr. Fleishel: Ten years ago. They were operating out the other way and possibly did.
Examiner Marble: When was it built?
Mr. Fleishel: I think about eight or nine years ago.
Examiner Marble: When was the present line built?
Mr. Fleishel: Within the last two years. I don't think they have ever operated as a common carrier.
Examiner Marble: What is the distance from Nitram to De Ridder?
Mr. Fleishel: It is nineteen and some fraction miles.

Examiner Marble: Covered by the tracks of the Santa Fe railroad?

Mr. Fleishel: Yes, sir.

Examiner Marble: The Lake Charles & Northern use their tracks?

Mr. Fleishel: Yes, sir.

Examiner Marble: What is the distance from De Ridder to Lake Charles?

Mr. Fleishel: Forty-two miles I think.

6407 Examiner Marble: Covered by the tracks of the Lake Charles & Northern?

Mr. Fleishel: Yes, sir.

Examiner Marble: Do you know the distance from Lake Charles to New Orleans?

Mr. Fleishel: 222 miles, I think.

Examiner Marble: Why do you show these proposed lines from Orange all the way up to Alexander as a part of this Gulf & Sabine River proposition on this hearing?

Mr. Fleishel: Because I wanted to show them where our plans were.

Examiner Marble: Well now, will you tell us what the significance of that is?

Mr. Fleishel: The significance is that we expect to be operating a railroad from east Orange direct to Alexander, Louisiana, in order to connect up with about seven other railroads. There is a strong demand for a railroad between, and east and west line in there. There is no means of communication now between the east and west part of that state anywhere. There is an urgent demand for an east and west line in that part of the state. Anybody going to the state capital, it takes longer than it does to go to Memphis or St. Louis.

6408 Examiner Marble: Now, there are roads practically as you suggest, in existence between Alexander and Orange at the present time, aren't there?

Mr. Fleishel: Not that short, nor anywhere near it, as the line we expect to build.

Examiner Marble: But I am speaking of the line between the two points.

Mr. Fleishel: Not that I know of. There is a road between Alexander and Lake Charles, a short road, which comes in and is a part of the Iron Mountain system.

Examiner Marble: And another between Lake Charles and Orange?

Mr. Fleishel: Well, it is the main line of the Southern Pacific.

Examiner Marble: Take those two together, that is even a shorter road than the one that you speak of, is it not?

Mr. Fleishel: I think not; it may be.

Examiner Marble: Maybe it is, but in any event there is not much difference.

Mr. Fleishel: But there is a vast territory in between those two railroads that has no communication with the world?

Examiner Marble: Well now, just where is that territory?

6409 Mr. Fleishel: It is between Leesville and Alexander particularly. There is about thirty miles of territory there that has no railroad at all, and I might say also that that territory west of Alexander there is the richest farming part of the state, there is no timber on it.

Examiner Marble: Is it your theory that the tonnage in that territory will move to the west and southwest?

Mr. Fleishel: I think a part of it will.

Examiner Marble: Or will it move generally to the east?

Mr. Fleishel: I think it will move out through Texas all the mills in that country, Alexander and in through there, take the shorter route to the coast.

Examiner Marble: Waiving the matter of the feasibility of that route at the present time, the entire earnings of the Gulf & Sabine River Road on interstate shipments are realized by this line from Fullerton to Nitram, 6.4 miles.

Mr. Fleishel: Yes, sir.

Examiner Marble: And as the situation now stands, all of the service which secures those earnings on interstate shipments is rendered by that road from Fullerton to Nitram?

Mr. Fleishel: Yes, sir.

Examiner Marble: At Fullerton and at Nitram and in

6410 between the two points?

Mr. Fleishel: Yes, sir.

Examiner Burchmore: There has been no testimony offered as to the tonnage and earnings of this road, if I recollect the testimony correctly. Will you tell us what your total freight earnings were last year, freight tonnage?

Mr. Fleishel: Do you want the freight first? Do you want all the revenue itemized?

Examiner Burchmore: Yes, in that detail, if you have it.

Mr. Fleishel: Freight revenue, $110,941.93. This is the fiscal year ending June 30, 1910. Passenger revenue $3,809.25; Mail $220.65; Express $735.83; Telegraph and telephone service $652.08, total $116,359.71. Do you want the operating expenses?

Examiner Burchmore: What were the total operating expenses, just the total?

Mr. Fleishel: $103,072.21.

Examiner Burchmore: Have you separated the earnings from the two different divisions so that we can tell what you earned on the Fullerton division, and what was earned on the Stables division?

Mr. Fleishel: I don't think we have it separate, we have not here.

6411 Examiner Marble: Can you give us a statement of the earnings of the lines from Fullerton to Nitram?

Mr. Fleishel: Yes—I don't know that I can separate that for you for this reason. The railroad operates as a railroad, as an entirety. We do not *kssp* train crews separate, but use them wherever we can use them; and the same way with the terminal charges, switching and all that, things of that kind.

Examiner Burchmore: Your total freight earnings were $110,000?

Mr. Fleishel: Yes.

Examiner Burchmore: What is your impression as to the amount of that freight earnings that were earned on the Fullerton division?

Mr. Fleishel: I should think of the gross, probably $70,000 maybe seventy-five, maybe eighty, I don't know.

Examiner Burchmore: How much were the passenger earnings earned on the Fullerton division?

Mr. Fleishel: All of it.

Examiner Burchmore: And the mail?

Mr. Fleishel: All of it.

Examiner Burchmore: And the express?

6412 Mr. Fleishel: All of it.

Examiner Burchmore: Telephone and telegraph?

Mr. Fleishel: All of it.

Examiner Burchmore: What was your total of freight tonnage for the fiscal year?

Mr. Fleishel: 380,056 tons.

Examiner Burchmore: On which you earned $110,941?

Mr. Fleishel: Gross. Considerable of that was in less than carloads, though.

Examiner Burchmore: How much of that was logs and lumber?

Mr. Fleishel: Originating on the road, originating on our line, do you want it itemized the same way?

Examiner Marble: Yes.

Mr. Fleishel: Stone, sand and so forth, 157,000 tons; lumber 370,164; naval stores 3,650; iron 22; castings and machinery 6; household goods, one; merchandise, 35; miscellaneous, 795.

Now, tonnage originating on other lines, agricultural products, 968 tons.

Examiner Burchmore: This rich farming country originates no agricultural products?

Mr. Fleishel: There are no farms over the line of our road

6413 there except in small tracts?

Examiner Burchmore: Then I did not follow the testimony.

Mr. Fleishel: I said the line between Leesville and Alexander which we propose to develop. Then, animals 90 tons; Mining 119 tons; Manufactured products 2,958 tons; Merchandise 1,086 tons, Miscellaneous 5 tons; Total 5,226 tons. That was all tonnage originating on that line.

Examiner Burchmore: Let me ask you how much of this 370,164 tons of lumber came from the mills of the Gulf Lumber Company?

Mr. Fleishel: Well, practically all of it, the biggest portion of it.

Examiner Burchmore: I do not see any logs included in that statement.

Mr. Fleishel: I think that the logs—I think that the first item there includes logs.

Examiner Burchmore: What first item?

Mr. Fleishel: 270,164.

Examiner Burchmore: What about those naval stores, 3,650?

Mr. Fleishel: That is turpentine and resin, I believe.

Examiner Burchmore: Shipped for the Gulf people?

Mr. Fleishel: Yes, sir.

6414 Examiner Burchmore: 795 tons of miscellaneous freight, 35 tons of merchandise moving outbound. Who shipped that stuff?

Mr. Fleishel: Different people. I don't believe we shipped any of it.

Examiner Burchmore: You think the Gulf Lumber Company did not have anything to do with that?

Mr. Fleishel: No, sir.

Examiner Marble: What was it?

Mr. Fleishel: I don't know what that was, to tell you the truth. I don't have much knowledge of that, because we have two men in our office there that do nothing else.

Examiner Burchmore: I would like to have now, your opinion or your estimate or the actual figures if you have them, as to the amount of tonnage inbound and outbound handled for or on account of the Gulf Lumber Company, and the amount handled for other people.

Mr. Fleishel: I expect 90 per cent possibly for the Gulf Lumber Company.

Examiner Burchmore: Will you file with the Commission, if it is possible without too great inconvenience, a statement of the tonnage and revenues of freight inbound and outbound to and

6415 from each station on your line, station by station, every station?

Mr. Fleishel: Well, that would not show you much, because it is practically all from Fullerton. The only other shipping point on our line that amounts to anything is Rustville.

Examiner Burchmore: You have two divisions.

Mr. Fleishel: You want it separated for the two divisions?

Examiner Burchmore: Yes, I want a statement separated as to the divisions and separated as to stations, too.

Mr. Fleishel: Yes, I can do that.

Examiner Burchmore: Do the best you can on it anyway. We want also, if you can give it to us, a statement separating these different items of tonnage that you have just read, so as to show how much of each item was handled by the Gulf Lumber Company and the various companies in which it is interested.

Mr. Fleishel: That is a pretty good job, but I can get it.

Examiner Burchmore: Give it to us with substantial accuracy.

Examiner Marble: What statements are these that you have here? Perhaps some of them will show.

Mr. Fleishel: Those make no separation whatever.

6416 Examiner Marble: These statements that you have were brought to be put into the record, were they not?

Mr. Saunders: Yes, sir.

Mr. Fleishel: This is simply a copy of our annual report to the Commission on that line. The Commission has all this information I am reading here.

Examiner Marble: Have you any statement there that will show the number of tons of lumber shipped from Fullerton on joint rates?

Mr. Fleishel: It was all shipped from Fullerton on joint rates.

Examiner Marble: And you have put in a statement showing the number of tons?

Mr. Fleishel: Yes, sir.

Examiner Marble: Have you put in a statement showing the amount of revenue?

Mr. Fleishel: Yes, sir.

Examiner Marble: Received from divisions of those joint rates?

Mr. Fleishel: No, I don't know as I have.

Examiner Marble: Have you given us all of that revenue?

Mr. Fleishel: Yes, sir.

6417 Examiner Marble: What was the amount of that revenue on lumber?

Mr. Fleishel: $110,941, but quite a bit of that, of course, was on logs.

Examiner Marble: How much of that was on lumber?

Mr. Fleishel: On outbound lumber?

Examiner Marble: Yes.

Mr. Fleishel: Probably half of it.

Examiner Burchmore: Let us have a statement which will show that accurately.

Mr. Fleishel: All right, I will give it to you.

Examiner Marble: Probably $55,000 then was earned by this six miles of road by the carriage of lumber?

Mr. Fleishel: Not altogether on freight.

Examiner Marble: I am asking you only as to the carriage of lumber, simply the amount received for the carriage of lumber during the last year.

Mr. Fleishel: I will get that statment. I don't know. I will make that statement and give you that also.

Examiner Marble: Your Stables road has allowances for divisions, has it not?

Mr. Fleishel: Yes, very small.

Examiner Marble: How small?

6418 Mr. Fleishel: Averaging about three-quarters to one cent.

Examiner Marble: From what railroad do they receive those?

Mr. Fleishel: Kansas City Southern.

Examiner Marble: How long has it received that amount?

Mr. Fleishel: Oh, since before we bought the road, and ever since we have owned it.

Examiner Marble: Did it ever receive any larger amount than that?

Mr. Fleishel: We received a minimum of half a cent and a maximum of three cents, but I don't suppose there is one carload of lumber out of a hundred that is shipped on the three cent division. That applies only to Kansas City Southern local points, or Kansas City proper, and points south, and I don't suppose that our divisions there would average over three-quarters of one cent.

Examiner Marble: Can you give us a statement showing that?

Mr. Fleishel: We would not have kept it up if it had not been we were going to connect up with this line, because it costs us more than we get out of it, considerably.

Examiner Marble: Can you give us a statement showing
6419 the number of tons of lumber that are shipped on those joint rates through Stables?

Mr. Fleishel: Yes, sir.

Examiner Marble: And the revenue received?

Mr. Fleishel: Yes, sir.

Examiner Marble: What was the amount of the revenue, would you say?

Mr. Fleishel: I would not know. It is very small.

Examiner Marble: What do you charge at Stables for carrying logs into the mill?

Mr. Fleishel: $2.50 per car.

Examiner Marble: How long since you made that charge of $2.50 a car?

Mr. Fleishel: I don't recall, the tariff will show.

Examiner Marble: Did you once charge $4.00 a car there?

Mr. Fleishel: I think we did.

Examiner Marble: The latest charge is $2.50?

Mr. Fleishel: Yes, sir.

Examiner Marble: What was the occasion of the reduction?

Mr. Fleishel: Well, I don't know now. We put in—our traffic department issued a new tariff covering two and a half a car from the whole line for certain distances. Of course it had to
6420 apply on that line as well.

Examiner Burchmore: The haul is also longer now than it was when the rate was $4.00, isn't it?

Mr. Fleishel: I don't know as to that.

Examiner Marble: Necessarily so when you are cutting timber?

Mr. Fleishel: No, it is not necessarily so, at all; because they come back and go out on another spur, and we are not hauling as far as we were two years ago, or a year ago.

Examiner Marble: What was your arrangement or manner of charging for the carriage of those logs?

Mr. Fleishel: We just waybilled them in and collected the freight.

Examiner Marble: Does the subsequent shipment of lumber in any way affect those charges?

Mr. Fleishel: No, sir.

Examiner Marble: Did you have any system of making any refund on the logs in any case for any reason?

Mr. Fleishel: I don't think so. I am not in actual charge of the operation there except in a general way, but if there is any discrepancy our auditor has never reported it to me.

Examiner Burchmore: Your rates are not on a milling in transit basis, are they?

6421 Mr. Fleishel: No.

Examiner Burchmore: The rates from points of origin on your road are the same as the junction point rates?

Mr. Fleishel: Yes, sir.
Examiner Burchmore: No arbitrary.
Mr. Fleishel: No, sir.
Examiner Burchmore: Does this road own its own right of way?
Mr. Fleishel: Yes, sir.
Examiner Burchmore: Is that true of both divisions?
Mr. Fleishel: Yes, sir.
Examiner Burchmore: Do they own all the steel?
Mr. Fleishel: Yes, sir.
Examiner Burchmore: Where did they get the steel?
Mr. Fleishel: Bought it all around the country. We have all 60 pound rails. We bought some from the Blake-Pollock Iron Company here in St. Louis and we bought some from the Kansas City Southern, in fact, we bought the bulk of this rail that we have at Fullerton from the Kansas City Southern.
Examiner Burchmore: Do the officers of this railroad receive annual passes over other railroads?
Mr. Fleishel: Yes, sir.
6422 Examiner Burchmore: Has the Lumber Company any locomotives of its own?
Mr. Fleishel: No, sir, they have no railroad equipment of any kind.
Examiner Marble: Are you familiar with the operations of that Stables Road for the year ending June 30, 1908?
Mr. Fleishel: Only indirectly.
Examiner Marble: Do you know whether during that year you had a system of paying back to the lumber company a portion of the rates received for the carriage of logs inbound under certain circumstances?
Mr. Fleishel: Not to my knowledge, no.
Examiner Marble: Our information is on logs hauled to the mill that year, 6,963 cars, you collected $4.00 per car from the mill, but collected or charged, I don't know which, a total of $27,932.; that you figured that 4400 cars of these logs were turned in to lumber from which you got a division, and therefore you refunded $4.00 per car on those 4400 cars, a total of $17,600.
Mr Fleishel: I don't remember as to that. That was a traffic problem, if we should so refund it.
Examiner Marble: Is there any one here who would know about that?
6423 Mr. Saunders: I don't know. I think not.
Examiner Marble: That left you a net revenue on logs hauled of $10,332, and you received on divisions from the Kansas City Southern Railroad on mill products a total of $6,077.92. Do you know anything about that?
Mr. Fleishel: No, I do not.
Examiner Marble: On supplies hauled to the camp and naval stores out, you received $1,578.68 which left your total gross revenue for the year $17,988?
Mr. Fleishel: Yes, but a good deal of that was on local rates, I guess, in those shipments of logs.

Examiner Marble: You had a gross revenue on logs haule
$27,932, and you refunded $17,600 because you got division
the lumber shipped, is that right?

Mr. Fleishel: I think there was some traffic, just what no
we have had a great deal of argument with the Kansas City So
ern about the method of billing and the amount of divisions.
have never got one-fourth of what we should have.

Examiner Marble: Let us follow that a step further. Ass
that the net result of that would be that when your road rece
a division, the cost of the matured lumber to the mill
6424 pany was reduced, because you made a refund of the log
charge on account of the division?

Mr. Fleishel: That may be so if they were paying the frei
If we think that we are being overcharged by some trunk line
always try to get it back. We don't often do it but we always

Examiner Marble: If you got a division of the rates on lun
you counted that your logging rate was an overcharge?

Mr. Fleishel: No, I would not so consider it.

Examiner Marble: What would you consider an overcharge?

Mr. Fleishel: If we charged them more than the tariff rat
more than a reasonable rate I would call it an overcharge.

Examiner Marble: Why didn't you refund on all of the
brought in in the 6,963 cars, instead of 4,400?

Mr. Fleishel: I cannot answer that; I don't know.

Examiner Burchmore: Why did you refund the entire ch
on those cars?

Mr. Fleishel: I don't know that I can answer that.

Examiner Marble: There could not have been any attemp
reach a reasonable rate on logs without reference to the lun
movement?

Mr. Fleishel: No. That was probably in the nature
6425 milling in transit proposition.

Examiner Burchmore: Were the rates on a milling
transit basis at that time?

Mr. Fleishel: I don't know, I am sure.

Examiner Burchmore: What year was that?

Mr. Marble: The year ending June 30, 1908. Do you k
whether the same method has been followed in subsequent ye

Mr. Fleishel: No, it has not. Since we have had our railr
plans we have been working to get everything in our division
form.

Examiner Marble: You reduced the rate from 4 to 2½ and
out——

Mr. Fleishel: For a certain haul.

Examiner Marble: And cut out the refund?

Mr. Fleishel: For a certain haul, yes.

Examiner Marble: For a certain haul? I thought that 2½
for any haul.

Mr. Fleishel: Oh, no. Our tariff provides 2½ a car up to 5 mi
and then for points five to ten miles——

Examiner Marble: What length of haul is there on the logs

Mr. Fleishel: There will be, of course, quite a haul.

6426 Examiner Marble: I mean now.
Mr. Fleishel: I think probably five miles.
Examiner Marble: Well, under five miles.
Mr. Fleishel: Under five miles, 2½.
Examiner Marble: 2½ a car?
Mr. Fleishel: Yes, sir.
Examiner Marble: Then the 2½ rate is the rate on all shipments at the present time?
Mr. Fleishel: Yes, all that move at the present time.
Examiner Marble: All that can be moved.
Mr. Fleishel: With the exception of some logs that we carry on the other division.
Examiner Marble: Do you haul them more than ten miles?
Mr. Fleishel: I think we do on the Stables Division.
Examiner Burchmore: Do you have any joint rate on hardwood?
Mr. Fleishel: No, not here; this is a purely local movement. We haul the logs on a local rate there.
Examiner Marble: How much track have you there?
Mr. Fleishel: At Stables?
Examiner Marble: Yes.
Mr. Fleishel: Main line I think we have about 8½ miles;
6427 probably 9, or between that, and we have a spur system that is about 3 or 4 miles long.
Examiner Marble: How far from Stables is the junction with that spur?
Mr. Fleishel: I think that is at one end of the track there.
Examiner Marble: So that the entire length of the main line and that spur, you could not get out more than 10 miles from Stables?
Mr. Fleishel: No, sir.
Examiner Marble: That is all, I think.
Examiner Burchmore: Mr. Saunders?
Mr. Saunders: Mr. Fleishel, when the railroad company was first organized, where and to what points was it planned to build that road?
Mr. Fleishel: We first chartered the line from Leesville to Merryville.
Mr. Saunders: Was the charter subsequently amended?
Mr. Fleishel: Yes, sir, it was later amended, to run from Leesville to Alexander through Fullerton. We were going to build that railroad across to Alexander.
Mr. Saunders: Can you describe briefly the territory between Fullerton and Alexander which this road will penetrate?
6428 Mr. Fleishel: Well, the first 45 miles of it from Leesville toward Alexander is pine forest.
Mr. Saunders: Owned by whom?
Mr. Fleishel: It is owned by many more than by the Gulf Lumber Company, the Gould estate, Jay Gould estate, and Weyerhauser & South Land Company, Calcasieu Lumber Company, the Rupp estate, and more or less——
Mr. Saunders: Underwood?
Mr. Fleishel: Underwod estate.

Mr. Saunders: There are large timber holdings in there which are not directly or indirectly connected with the Gulf Lumber Company?

Mr. Fleishel: Yes. We do not own a fourth of them.

Mr. Saunders: Was the saw mill at Fullerton built before the railroad was started?

Mr. Fleishel: No, afterwards.

Mr. Saunders: You said there was need for a line running through that territory east and west so as to shorten time and facilitate traffic. Will you explain why that is?

Mr. Fleishel: There is absolutely no east and west railroad in that part of the state. A man going to Baton Rouge to the legislature or any place like that has to go up the road 75 or 100 miles and
6429 go down the same distance in order to get a railroad going into that part of the state, and he has got to lay over 24 or 36 hours in some of these little branch lines in order to make connections.

Mr. Saunders: You spoke of a rich farming territory between Fullerton and Alexander. How large a territory is that approximately?

Mr. Fleishel: I should judge it is twenty miles, about.

Mr. Saunders: You said that territory has no railroad facilities now?

Mr. Fleishel: Absolutely none. It is a big cane center up there, and there would be a sugar refinery built in Alexander this year if they had any transportation for the product out of there.

Mr. Saunders: Where was the rail purchased by the Gulf & Sabine River Railroad for its line?

Mr. Fleishel: The principal portion of it, I think, from the Blake-Pollock Iron Company in St. Louis.

Mr. Saunders: Did that rail move in on any special rate?

Mr. Fleishel: No, sir.

Mr. Saunders: Paid full tariff rate on that?

Mr. Fleishel: Yes, sir, so far as I know.

6430 Mr. Saunders: Were there any contracts oral or written by which any interest was given the right to that rail?

Mr. Fleishel: No, sir.

Mr. Saunders: Does it belong absolutely to the Gulf & Sabine River Railroad?

Mr. Fleishel: They have the absolute title, no string tied to it of any kind.

Examiner Marble: State whether or not any officer of any trunk line owns stock in the Gulf & Sabine River Railroad?

Mr. Fleishel: Absolutely none, I believe.

Mr. Saunders: Is there any stock owned in that way in the Gulf Lumber Company?

Mr. Fleishel: No, not to my knowledge unless it has taken place in the last month or so.

Examiner Burchmore: What was the purpose of that question, if I may ask.

Mr. Saunders: I want to show that it is disconnected from any trunk line proposition, it is an entirely independent railroad.

Do you operate daily trains there?

Mr. Fleishel: Yes, sir.

Mr. Saunders: On a schedule?

6431 Mr. Fleishel: We run four passenger trains a day.

Mr. Saunders: From what point to what point?

Mr. Fleishel: From Fullerton through Rustville to Nitram and back.

Mr. Saunders: Two round trips?

Mr. Fleishel: Two round trips a day.

Mr. Saunders: How are your trains equipped?

Mr. Fleishel: Just the same as any other passenger trains with electric lights in the trains and electric headlights on the locomotives.

Mr. Saunders: Does your equipment comply with the safety appliance act?

Mr. Fleishel: In every respect, yes, sir.

Mr. Saunders: Do you handle any freight on your passenger trains?

Mr. Fleishel: None at all, no, sir.

Mr. Saunders: Do you handle baggage?

Mr. Fleishel: Yes, sir.

Mr. Saunders: Express?

Mr. Fleishel: Yes, sir.

Mr. Saunders: Have you contracts with the United States government to handle mail?

6432 Mr. Fleishel: Yes, sir.

Mr. Saunders: Are your schedules published?

Mr. Fleishel: Yes, sir.

Mr. Saunders: Where are they published.

Mr. Fleishel: All railway guides.

Mr. Saunders: Do you sell passenger tickets?

Mr. Fleishel: Yes, sir.

Mr. Saunders: From what points?

Mr. Fleishel: Between all stations.

Mr. Saunders: To what points?

Mr. Fleishel: From all stations on our line to and between all stations on our line, but we only sell through passenger tickets to points on other lines where we have special divisions. The Santa Fe doesn't make any through rates.

Mr. Saunders: Who makes your passenger rates?

Mr. Fleishel: The Railroad Commission of Louisiana.

Mr. Saunders: You mean local rates?

Mr. Fleishel: Intrastate rates, yes.

Mr. Saunders: Do you issue free passes?

Mr. Fleishel: Yes, we do, to officials of connecting lines.

Examiner Marble: I suppose that is strong proof that it is a common carrier.

6433 Mr. Saunders: Are these recipients ready to ride over your road?

Mr. Fleishel: Yes, we have had as many as five or six private cars over it in the last twelve months.

Mr. Saunders: Do you issue free transportation on your trains?

Mr. Fleishel: No, not to any one who is not entitled to it under the law.

Mr. Saunders: Have you a railroad freight agent?

Mr. Fleishel: Yes.

Mr. Saunders: Where is he located?

Mr. Fleishel: We have an agent at Fullerton, a joint agent at Nitram and a local agent at Rustville.

Mr. Saunders: Have you a train dispatcher?

Mr. Fleishel: Yes, sir.

Mr. Saunders: Where located?

Mr. Fleishel: At Fullerton.

Mr. Saunders: Have you an express agent?

Mr. Fleishel: Yes, sir.

Mr. Saunders: Where is he located?

Mr. Fleishel: He is at Fullerton.

Examiner Burchmore: Which of those gentlemen are em-
6434 ployed by the Lumber Company also?

Mr. Fleishel: None of them.

Mr. Saunders: Are those men working for the Gulf Lumber Company?

Mr. Fleishel: No, they have absolutely nothing whatever to do with the Gulf Lumber Company in any respect.

Mr. Saunders: Are they paid any part of their salary by the Gulf Lumber Company?

Mr. Fleishel: No, sir.

Mr. Saunders: What is the population of Fullerton?

Mr. Fleishel: About 1800.

Mr. Saunders: Is it an incorporated town?

Mr. Fleishel: Yes, sir.

Mr. Saunders: Has it a mayor?

Mr. Fleishel: Yes, sir.

Mr. Saunders: Municipal officers?

Mr. Fleishel: Yes, sir.

Mr. Saunders: Police?

Mr. Fleishel: Yes, sir. Don't need them though, very bad.

Mr. Saunders: Do your agents furnish bonds?

Mr. Fleishel: Yes, sir.

6435 Mr. Saunders: To whom is that bond furnished?

Mr. Fleishel: Gulf & Sabine River Railroad.

Mr. Saunders: It is the regular bond furnished by freight agents to railroads ?

Mr. Fleishel: Yes, sir.

Mr. Saunders: I believe you stated you used 60-pound rail?

Mr. Fleishel: Yes, sir; we do not have any other kind.

Mr. Saunders: How is the tonnage of the trains on your line as compared with the tonnage of the trains of the Santa Fe and the Southern Pacific with which you make connections?

Mr. Fleishel: We haul about twice what they do. The reason is that *is* have a better road and heavier equipment.

Mr. Saunders: Have you got a heavier rail?
Mr. Fleishel: The rail, I think, is either 56 or 60 pound rail.
Mr. Saunders: Is your track ballasted?
Mr. Fleishel: Yes, sir.
Examiner Burchmore: Let me ask what road are you discussing now, the Fullerton Division or both divisions?
Mr. Fleishel: The Fullerton Division.
Examiner Burchmore: Just what do you mean by a
6436 heavier tonnage?
Mr. Fleishel: The trains we haul are heavier than either the Southern Pacific or the Santa Fe.
Examiner Burchmore: More cars in them?
Mr. Fleishel: More cars to the train and heavier locomotives to haul them, more tonnage and a heavier rail.
Mr. Saunders: How many locomotives have you?
Mr. Fleishel: Seven.
Mr. Saunders: What weight?
Mr. Fleishel: All the way from 42 to 80 tons, I think.
Mr .Saunders: How many loaded cars can you handle over your line?
Mr. Fleishel: We can pull 60 cars between Fullerton and Nitram.
Mr. Saunders: Have you done so?
Mr. Fleishel: Yes, sir.
Mr. Saunders: What is the maximum grade on your line?
Mr. Fleishel: Six-tenths of one per cent.
Mr. Saunders: Do you know what the maximum curvature is?
Mr. Fleishel: No.
Mr. Saunders: In comparison with the locomotives of the Southern Pacific and the Santa Fe with which you make
6437 connections, are your locomotives larger or smaller?
Mr. Fleishel: They are a good deal better than the branch line of those roads use. Of course on the main line they would not be.
Mr. Saunders: Has it ever happened that any of your cars have left your lines destined to points in other states?
Mr. Fleishel: Yes, sir, we have got some flat cars now that have been gone for fifteen months.
Mr. Saunders: Have you made efforts to get them back?
Mr. Fleishel: No, not specially. We are getting 35 cents a day for them, not *exorcised* over them at all.
Examiner Burchmore: You are a party to the per diem arrangement?
Mr. Fleishel: Yes, sir.
Mr. Saunders: You are a party to the per diem arrangement?
Mr. Fleishel: Yes, sir.
Mr. Saunders: So you get a per diem rate?
Examiner Burchmore: I don't think we will go into that.
Mr. Saunders: Do you charge demurrage?
Mr. Fleishel: Yes, sir; if they do not load the cars in forty-eight hours.
6438 Mr. Saunders: Have you a round house?
Mr. Fleishel: Yes, sir.

Mr. Saunders: How do you maintain your equipment?
Mr. Fleishel: How do you mean?
Mr. Saunders: Well, have you any machinists there to keep up your equipment?
Mr. Fleishel: Oh, yes.
Mr. Saunders: Do you have any team tracks?
Mr. Fleishel: Yes, sir; at Fullerton and Rustville, yes.
Mr. Saunders: What capacity are they?
Mr. Fleishel: They will hold about eighteen or twenty cars on one, and about ten or twelve on the other, and six or eight on the other at Fullerton; and at Rustville it holds about ten cars on the team track.
Mr. Saunders: Have you any scales on the tracks?
Mr. Fleishel: Yes, sir.
Mr. Saunders: What are they?
Mr. Fleishel: We have the latest type of 100 ton self-regulating team scales the same as they use on all of the trunk line roads.
Mr. Saunders: Where is that located?
Mr. Fleishel: Fullerton.
6439 Mr. Saunders: As a matter of fact do you weigh all cars before they go out?
Mr. Fleishel: Certainly; we could not bill them out if we did not.
Mr. Saunders: Have you a weigh-master?
Mr. Fleishel: Yes, sir.
Mr. Saunders: Under what jurisdiction is he?
Mr. Fleishel: The Western Railway Weighing Association.
Mr. Saunders: Is he an employee of the railway company?
Mr. Fleishel: Yes, sir; he is an employee of the railway company and the weighing association. He does not work for the Lumber Company in any respect.
Mr. Saunders: On the Fullerton Division do you haul any logs from Fullerton to Nitram?
Mr. Fleishel: I think not, no.
Mr. Saunders: The logs are hauled in from the road beyond Fullerton to the mill?
Mr. Fleishel: Yes, sir.
Mr. Saunders: And there manufactured?
Mr. Fleishel: Yes, sir.
Mr. Saunders: Have you milling in transit arrangements at Fullerton?
6440 Mr. Fleishel: No.
Mr. Saunders: Have you milling in transit arrangements at Stables?
Mr. Fleishel: No, I think not.
Mr. Saunders: Now, do you haul any other commodities from Fullerton and Nitram besides lumber and lumber products?
Mr. Fleishel: Yes, sir.
Mr. Saunders: Haul commodities in and out?
Mr. Fleishel: Yes, sir. Every day.
Mr. Saunders: Have you filed any local tariff with the Louisiana State Railroad Commission?
Mr. Fleishel: Yes, sir.

Mr. Saunders: I believe you stated that your passenger rates were made by the State Railroad Commission on intrastate traffic?

Mr. Fleishel: Yes, sir.

Mr. Saunders: Are the local rates of freight higher or lower than the division you receive on outbound shipments to interstate points?

Mr. Fleishel: They are higher in all cases.

Mr. Saunders: Can you state approximately how much higher they are?

6441 Mr. Fleishel: Well, our local rate on lumber for any distance between Fullerton and Nitram is 5 cents a hundred, and our division will probably average 3 or 2¾ cents.

Mr. Saunders: You make reports to the Interstate Commerce Commission regularly?

Mr. Fleishel: Yes, sir.

Mr. Saunders: Do you make them on the prescribed forms?

Mr. Fleishel: Yes, sir; in every case.

Mr. Saunders: Does your road make reports to the Louisiana State Railroad Commission?

Mr. Fleishel: Yes, sir.

Mr. Saunders: Does it on the prescribed forms?

Mr. Fleishel: Yes, sir.

Mr. Saunders: Who owns the telegraph and telephone lines on the railroad?

6442 Mr. Fleishel: Well, at Nitram, the Western Union and ourselves together have some joint wires, but on our line we own it all, the railroad company.

Mr. Saunders: What about the telephone line?

Mr. Fleishel: Well the railroad company owns the telephone line, that is, we have the same situation in Nitram, we have the Southwest Telephone Company own part of the switchboard and we own part of it, and we have five joint wires there also.

Mr. Saunders: Are you familiar with the Louisiana law exempting railroads from taxation within a certain time after the adoption of the constitution of 1898?

Mr. Fleishel: Yes, sir.

Examiner Burchmore: The Commission is also familiar with that law.

Mr. Saunders: Is your road exempt from taxation?

Mr. Fleishel: Yes, sir.

Mr. Saunders: That matter was taken up with the Louisiana State authorities, and they ruled your railway was exempt from taxation as a railroad?

Mr. Fleishel: Yes, sir.

Examiner Marble: Your lumber is shipped in box cars?

6443 Mr. Fleishel: No, it is not.

Examiner Marble: In flat cars?

Mr. Fleishel: Yes, sir.

Examiner Marble: You spoke of some flat cars being away that went off your road loaded with lumber?

Mr. Fleishel: Yes, sir.

Examiner Marble: How many flat cars have you used for loading lumber?

Mr. Fleishel: We try not to let any of them get off our rails, but five or six, something like that.

Examiner Marble: Five or six have got away, do you mean?

Mr. Fleishel: Yes, sir, but our box cars leave our road all the time.

Examiner Marble: Are those box cars used for hauling lumber?

Mr. Fleishel: No, they are regular 60,000 pound flat cars.

Examiner Marble: How many large flat cars have you?

Mr. Fleishel: I don't remember, five or six.

Examiner Marble: How many box cars have you?

Mr. Fleishel: About the same number.

Examiner Marble: Five or six?

Mr. Fleishel: Yes, sir.

6444 Examiner Marble: Where are they?

Mr. Fleishel: We don't let them go off our line at all, just use them to handle local freight and stuff like that.

Examiner Marble: The empty cars for the shipment of lumber are furnished to you by the Lake Charles & Northern?

Mr. Fleishel: Yes, sir, we interchange at Nitram, we have a joint agent there.

Examiner Marble: Under an operating agreement?

Mr. Fleishel: Yes, sir.

Mr. Walter: You spoke of the large Gould estate. Is that near the Iron Mountain?

Mr. Fleishel: Yes, sir.

Mr. Walter: How large is that tract?

Mr. Fleishel: They have 104,000 acres right there in one bunch.

Mr. Walter: Is there a mill or has there been a mill there?

Mr. Fleishel: No, it runs around the wagon road up to——

Mr. Walter: Is there a mill there on the tract anywhere to cut that lumber?

Mr. Fleishel: No.

Mr. Cowan: It was stated by you or Mr. Fullerton that the Southern Pacific lines have certain lands.

6445 Mr. Fleishel: Yes, sir.

Mr. Cowan: What lands are those in points of acreage?

Mr. Fleishel: Probably 80,000 acres, probably 71,000 acres I should say.

Mr. Cowan: Is that land most accessible to your present operation?

Mr. Fleishel: Well, yes, I should think it was.

Mr. Cowan: Is it designated by boundaries?

Mr. Fleishel: No, sir, I think not.

Mr. Cowan: What is the aggregate of the land you have in the country?

Mr. Fleishel: About 140,000 acres.

Mr. Cowan: Your divisional agreement is in writing, I suppose?

Mr. Fleishel: No, sir, not that I know of.

Mr. Cowan: Is your timber scattered in that territory which you described where you expect to extend your line to Leesville through the other tract of 40 miles?

Mr. Fleishel: No, we haven't much timber much of the route, our timber does not go probably over one-fourth of the route.

Mr. Cowan: Your statement that has been called for will show of course, the amount of divisions in the aggregate and the
6446 sum total?

Mr. Fleishel: Yes, sir.

Mr. Cowan: That you receive?

Mr. Fleishel: Yes, sir.

Mr. Cowan: Is Fullerton a company town?

Mr. Fleishel: In a broad sense, yes, sir.

Mr. Cowan: Are there any other industries there except yours?

Mr. Fleishel: There are fifteen or twenty stores there.

Mr. Cowan: What is there to attract inhabitants there with the exception of your operations?

Mr. Fleishel: Well that is the chief attraction, I suppose.

Mr. Cowan: Was there a town there before you got there?

Mr. Fleishel: No, not right there.

Mr. Cowan: So it simply grew out of your enterprise?

Mr. Fleishel: Yes, sir.

Mr. Cowan: There is no farming around there?

Mr. Fleishel: Yes, sir, a little.

Mr. Cowan: Nothing commercially that you could——

Mr. Fleishel: Nothing of any special commercial value until you get in close to Leesville.

Mr. Cowan: The commercial importance of the town grows
6447 out of the fact that the people live there because they have been attracted there on account of the enterprise that you established?

Mr. Fleishel: Some of them, yes.

Mr. Cowan: Practically all of them, either directly or indirectly?

Mr. Fleishel: It depends on how direct you are going to be.

Mr. Cowan: There might be a doctor there and he might be there for the purpose of serving those people.

Mr. Fleishel: I would call him direct.

Mr. Cowan: Can you operate your trains more cheaply by handling the heavier trainloads, as you say, than your connecting lines?

Mr. Fleishel: Well I don't know as to that; I should think I could, yes.

Mr. Cowan: Do you pay your engineers and conductors on the basis of labor contracts with railroads generally, or so much per month?

Mr. Fleishel: No, sir, we do not.

Mr. Cowan: How much do you pay your engineers?

Mr. Fleishel: Three dollars a day.

6448 Mr. Cowan: That is about half what they get on the main line?

Mr. Fleishel: I think so, yes.

Mr. Cowan: Are there any expenses in the operation of your railroad or in the item of expense that is material where you pay out greater expenses than the Santa Fe or the Southern Pacific?

Mr. Fleishel: Well I don't know as to that; I don't know.

Mr. Cowan: What did your rails cost you per mile to construct that sort of road?

Mr. Fleishel: I think about seventeen or eighteen thousand dollars a mile.

Mr. Cowan: Including ballast?

Mr. Fleishel: Yes, sir.

Mr. Cowan: Can you maintain your track more cheaply having it ballasted and constructed in the form you have it than would be the case with your connecting lines?

Mr. Fleishel: Well, we can from now on, I think.

Mr. Cowan: That is what I mean.

Mr. Fleishel: From now on we can, yes.

Mr. Cowan: The maintenance of your equipment is not more expensive per mile of line than the Santa Fe or the Southern
6449 Pacific?

Mr. Fleishel: I think it has been, but now we have first class facilities for rebuilding, and our maintenance of locomotives will not be so great in the future.

Mr. Cowan: That is altogether on account of the rebuilding process?

Mr. Fleishel: Yes, sir.

Mr. Cowan: Do you know actually what it does cost you for hauling the lumber to the mill, delivering it to the junction point of your connecting line?

Mr. Fleishel: We don't haul any lumber to the mill.

Mr. Cowan: From the mill?

Mr. Fleishel: No, I do not. We do not keep those expenses separate.

Mr. Cowan: Just what do you expect the Interstate Commerce Commission to base its conclusions as to the rights of the roads you now have upon, what you will be doing after you get these other roads built?

Mr. Fleishel: I don't know——

Mr. Saunders: I object to that question, Mr. Commissioner.

Examiner Burchmore: I suggest we do not go into that.

Mr. Cowan: I want you to sustain the objection.

6450 Examiner Burchmore: Then withdraw the question.

Mr. Cowan: All right. Who holds the bonds that were issued?

Mr. Fleishel: My understanding is the Gulf Lumber Company does.

Mr. Cowan: Do you know whether they actually have them or whether they have been taken over, financed, as you call it, by the Southern Pacific interests?

Mr. Fleishel: I know that we have been trying to sell those bonds in the open market and have not been able to do so.

Mr. Cowan: These private cars that you speak of, those parties were up there for fishing?

Mr. Fleishel: Why no, as a general proposition they come up to see the road and the mills, the plant of the Gulf Lumber Company.

Mr. Cowan: You have got a newly constructed mill with the latest patterns of machinery of all sorts?

Mr. Fleishel: We think so; yes, sir.

Mr. Cowan: It is worth anyone's while to see, if they come up there?

Mr. Fleishel: Yes, sir, we think so, and a great many other people who have come up there think so.

6451 Mr. Cowan: In regard to the Lutcher-Moore proposition, there has been no arrangement made for that outside of negotiations?

Mr. Fleishel: Yes, sir, there is nothing, no negotiations concluded at all.

Mr. Cowan: That is all.

Examiner Marble: You testified regarding the excellence of your roadbed. How many cars of lumber did you say you had hauled with a single train?

Mr. Fleishel: We can haul from fifty to seventy cars with a heavy locomotive.

Examiner Marble: Have you ever done so?

Mr. Fleishel: The highest that I recall is fifty-three. We went down there one day with fifty-three cars.

Examiner Marble: What is your average train?

Mr. Fleishel: I should say about twenty-five cars.

Examiner Marble: That is an ordinary train?

Mr. Fleishel: That is about what we usually ship every day.

Examiner Marble: Those are not bigger trains than your connecting lines haul?

Mr. Fleishel: Yes, sir.

6452 Examiner Marble: How many cars do they haul in an average train?

Mr. Fleishel: Most of them I think would go from fifteen to twenty.

Examiner Marble: They would haul more if they had them?

Mr. Fleishel: I think they would if they could, if they had the roadbed to put them over.

Examiner Marble: What is the load of your cars, I mean the average load?

Mr. Fleishel: Forty tons or fifty—no, I should say thirty-five or forty tons. We load the cars as heavy as we can. We ship a great deal of big, square, green timber, you know that runs——

Examiner Marble: Thirty-five to forty tons is the average load, and twenty-five cars is the average train?

Mr. Fleishel: I should say so.

Examiner Burchmore: You said that you had endeavored to sell these bonds on the general market?

Mr. Fleishel: The Gulf Lumber Company have since they have had them.

Examiner Burchmore: Have they made any special efforts?

Mr. Fleishel: I think they have.

6453 Examiner Burchmore: Have you gotten out any literature?

Mr. Fleishel: No, we did not have enough to go behind the literature.

Mr. Garwood: It has been stated somewhere in this record that about 92 per cent of the Santa Fe tonnage from that Jasper & Eastern branch is lumber.

Mr. Fleishel: I should judge more than that. They have their mills and, of course, they get all of it.

Mr. Garwood: Did I understand you to say that the physical characteristics of your track were better than the Santa Fe and the Lake Charles & Northern?

Mr. Fleishel: I think they are, yes, sir, they all think so.

Mr. Garwood: That is all.

Mr. Saunders: Just one question. Judge Cowan asked you about the service you performed there in hauling the lumber from the mill over to Nitram. You haul the empty cars in from Nitram——

Examiner Burchmore: I think that is well understood.

Mr. Fleishel: Yes, sir.

Mr. Saunders: He also asked you if it would be less expensive to keep up the track hereafter than for some of the connecting carriers to keep up their track, as I understood his question.

6454 Is that due to the fact that you have spent more money originally and ballasted your road?

Mr. Fleishel: Yes, spent more in the track.

Mr. Saunders: You put in a better track and maintain it in better conditions than the connecting lines?

Mr. Fleishel: Yes, sir.

Examiner Marble: What is the capacity of these mills at Fullerton?

Mr. Fleishel: In what respect, as to tonnage?

Examiner Marble: Number of cars per day.

Mr. Fleishel: About thirty or thirty-five cars.

Examiner Marble: I am not talking about theoretical capacity, but what you actually do.

Mr. Fleishel: About twenty-five cars a day.

Examiner Marble: About one train a day?

Mr. Fleishel: Yes, sir.

Examiner Marble: Your business is normal at the present time?

Mr. Fleishel: Well I think it is a little below normal.

Examiner Marble: What is normal?

Mr. Fleishel: I don't know. During the fall we had a pretty severe car shortage and the shipments at that time were

6455 nothing like what they are now.

Examiner Marble: Your statements of tonnage handled and amount received will cover all that?

Mr. Fleishel: Yes, sir, there has been quite a material increase.

Mr. Garwood: What mills are there between De Ridder and Oakdale along the Santa Fe Line?

Mr. Fleishel: There is the Ludington—Wells & Van Schaack Lumber Company connecting with the Santa Fe line, and then there is the Cravens mill and the Little mill at Royal, and then the Santa Fe mills at Elizabeth.

Examiner Marble: Is the Elizabeth mill on the Santa Fe?

Mr. Fleishel: No, the others are.

Mr. Garwood: What is the general character of the country there outside of these mills?

Mr. Fleishel: Along the Santa Fe?

Mr. Garwood: Yes.

Mr. Fleishel: Nothing but pine forests.

Mr. Garwood: How many of those mills were there prior to the construction of the Santa Fe, if any?

Mr. Fleishel: None of them except the Cravens mill.

Mr. Garwood: That is all.

6456 Mr. Cowan: I did intend to examine Mr. Fullerton and I was going into the matter of the prices, marketing, and the methods of the sale of lumber and the like, but I guess that has been sufficiently gone into with that witness. If he happens to be in Chicago, we may take a little time to do it there.

Examiner Burchmore: Very well.

Mr. Saunders: It was simply general matters?

Mr. Cowan: Yes, he did not testify to much else.

Examiner Burchmore: Mr. Saunders, do you desire to offer this map in evidence?

Mr. Saunders: Yes, I will offer this map in evidence as Exhibit No. 2.

The statements you have called for we will, of course, make up and supply.

(The map so offered and identified, was received in evidence and thereupon marked "Fleishel Exhibit No. 2, received in evidence January 28, 1911," consisting of one page, and is attached hereto.)

6457 *England & Clear Lake Railroad Company.*

Mr. Saunders: Mr. Commissioner, the England & Clear Lake Railroad Company of Arkansas would like to be heard, and I am advised that about nineteen months ago, the Cotton Belt cut off the divisions it was then receiving and since that time it has received no divisions. However, since the Commission has ordered the road to appear, and I understand that the road was called in New Orleans two or three times, I think it is proper that Mr. Locke, the President of the road, should appear here before the Commission and offer to give testimony in regard to the status of his road. As stated above, the road has not been receiving any divisions for the past eighteen months. Our finished track consists of five miles, from a place called Lockeville to England, and the road has been extended five miles further through a very rich farming territory consisting of about 200,000 acres, that the road now serves.

Examiner Burchmore: When was this extension made?

Mr. Locke: In September.

Examiner Burchmore: In September last year?

Mr Saunders: Until that time the road was operating exclusively in the interests of a lumber company, wasn't it?

6458 Mr. Locke: Yes, sir.

Mr. Saunders: Was it not?

Mr. Locke: Yes, sir.

6459 Examiner Burchmore: Mr. Saunders, this road has been called repeatedly and has not answered, and it is too late to take it up now, and I may say further that if it receives no divisions and has no joint rates, why——

Mr. Fullerton: It would not be in court under those circumstances.

Examiner Burchmore: It is not exactly in court, and I suggest that if Mr. Locke as an officer of the lumber company thinks he ought to have joint rates on his shipments of lumber, it will be proper for him to file a complaint with the Interstate Commerce Commission as a shipper, asking for joint rates or through rates, or for proper rates, for reasonable rates, and such complaint will go through the usual course. Of course I suppose it would be more proper for him to await the outcome of this proceeding, and not make any such application, or possibly such a complaint at this time.

Mr. Saunders: I would like to suggest this, Mr. Commissioner, that Mr. Lock has a number of statements with him from shippers on his line, showing that he is serving a considerable shipping community, and if those statements can be filed, I would like to do so.

Examiner Burchmore: It is too late. This road has been called before repeatedly, and you ought to have appeared. If they
6460 are not getting any division now, it does not seem that the large question that is involved in this case is really an issue. It is a moot question with this road. The question in this case is whether the Short Line railroads, as I take it, that are related closely to lumber companies, may properly participate in joint through rates, or on what basis they may so participate on lumber that they handle through such roads. This is not a road that gets any divisions, and isn't it a moot question with this road?

Mr. Fullerton: I think it is.

Mr. Saunders: I think perhaps your Honor is right in your ruling, but at all events I desire the road to appear.

Examiner Burchmore: The record would indicate that he is here and desires to be heard. I may say further that if he desires to be heard at Chicago as a shipper or as one who feels that he is being discriminated against because others are getting divisions, I think his testimony could be taken, but not as to the rights of your road.

Mr. Saunders: Then I might say that at this time the road has not filed the report required by the Commission, but the report is now being prepared and he is endeavoring to comply with all the rules of the Commission, and subsequently perhaps he
6461–6464 can make an application as your Honor suggests, either as a railroad or as a shipper.

Examiner Burchmore: The hearing will be resumed at Chicago, Monday, at 10 o'clock.

Whereupon, at 1 o'clock P. M. an adjournment was taken until Monday, January 30, 1911, at 10 o'clock A. M. at Chicago.

STAR GRAIN AND LUMBER COMPANY et al., Complainants,
against
ATCHISON, TOPEKA & SANTA FE RAILWAY COMPANY et al.,
Defendants.

6465 CHICAGO, ILL., *January* 30, 1911.

Met pursuant to adjournment, in the Congress Hotel, at 10:00 A. M.

Present:

Commissioner J. S. Harlan.
Parties as before.

(Mr. Walter filed copies of Exhibits previously referred to and identified, of the Angelina & Neches River Railroad Company, Mansfield Railway & Transportation Company, and Nacogdoches & Southeastern Railway.)

Commissioner Harlan: Judge Cowan, are you now ready to proceed?

Mr. Cowan: Yes, sir. If your Honor please, we wish now to call attention to the request made at New Orleans for certain tonnage statistics of the Trunk Line railroads of the traffic which they receive from the tap lines, dividing it between those who do get and those who do not get divisions; and tonnage statistics of lumber which comes from mills which are not operated by railroads at all, and supposing that it is intended to be filed, having asked that
6466 it be done at this hearing, we want to press the matter that it may be filed as soon as it is practicable to be made up. Some of the roads have done so.

Commissioner Harlan: Is that information available on the part of the carriers?

Mr. Jeffery: As far as the Iron Mountain is concerned I feel it is a critical element of our defense to the case, and I have had our people prepare it, and I expect it will be here in a day or so. I may say that I did not know that Judge Cowan had made a request until the other day. I did not order a copy of the record, and was not there at the close of the hearing. However, I had ordered those statistics and data prepared anyhow for our defense.

Commissioner Harlan: What is the basis of your exhibit?

Mr. Jeffery: It is the basis of showing the tonnage originating on the main line, and originating on the tap lines, and the net revenue, you might say the ex-tap line allowances revenue, and our main line revenue.

Mr. Cowan: I think that is very important from all the lines. I am sure the figures are available. I do not want to point out now why I say it is very valuable, but I do think so, and Mr.
6467 Jeffery seems to have borne me out in that.

Mr. Wood: I was not aware that a request for such statistics had been made until the request was made at St. Louis last week, because it was made after I left New Orleans, and I was not advised. I took the matter up with our accounting officer, and it will be possible to give the information that Judge Cowan requests, I think, although I am advised to secure the same for a period of three years will take possibly two weeks, and possibly longer. Because while, of course, the figures are available in the accounting department, they are not consolidated now in such a way that they can be easily drawn off, and it will require a great amount of clerical labor to take out the items. But we are preparing to furnish that information both for the Frisco lines and for the Southwest lines, the New Orleans, Texas & Mexico. There is no difficulty about giving the figures. As I understand, Judge Cowan wants that originating on tap lines, and that which originates on the main line. Judge Cowan has also asked for a list of all mills and for the output of those mills. It will be impossible for us to give that information accurately.

We can furnish a list so far as we have it, and the estimated
6468 capacity of those mills as reported to us from time to time.

Commissioner Harlan: That is, reported by your own officials?

Mr. Wood: Reported by our own officials, and they get their information from various sources. As I said in St. Louis, we do not think those statements are to be relied upon to any great extent.

Another thing Judge Cowan has requested is a sketch showing the location of main line tracks, side tracks, and tap line tracks, and all mills. I will not say it is not possible to get it; it is possible to get it, but it would take a great deal of time, and would involve the expenditure of a great deal of money to furnish such sketches.

Commissioner Harlan: I assume Judge Cowan does not want a survey, but only a rough indication.

Mr. Cowan: That is all.

Mr. Wood: We have several hundred mills on the Frisco proper, and that would involve the making of several hundred separate blue prints. I do not know how long it would take. I know we are engaged now in an effort to give the Corporation Commission of Oklahoma blue prints in regard to enlargement of road,
6469 station grounds, and so forth, and I learned in that that it was quite a task just to make the blue prints.

Commissioner Harlan: Do you mean you think you cannot do that reasonably?

Mr. Wood: I do not think we can, Mr. Commissioner. I would make the suggestion that I think all these tap lines have been here before the Commission and they have furnished such information so far as their own roads are concerned, and the Commission, I believe, from its own investigation has a large amount of that data. Now we wish to co-operate in this matter just as far as we can, and if the

Commission desires sketches of all the tracks serving all of the lumber mills on our system, although there are several hundreds of them. we will try to furnish that information; but it will take a long time to get it, and the suggestion was that possibly we could supplement, by request from the Commission or Judge Cowan, by additional maps, such evidence as is already in the record, and that possibly from a practical standpoint that might satisfy the requirements.

Mr. Cowan: I think, so far as we are concerned, the yellow pine lines in Louisiana would be all that we would request, and that certainly would not involve much labor.

6470 Mr. Wood: You mean just the land from New Orleans to Houston?

Mr. Cowan: Yes. Our interest lies largely in the yellow pine, and not the hardwood proposition.

Mr. Wood: We can furnish you without very much delay a sketch of all the tracks on the line of the New Orleans, Texas & Mexico, which runs from New Orleans to Houston. We can at least furnish that.

Mr. Cowan: Yes.

Commissioner Harlan: Very well; for the present that will probably do. The Commission has a good deal of general information. We know in a general way the location of the switch tracks to the mill, but we do not know the location of the mill with respect to the main line in every case. If the Commission finds it needs additional information, we will request it.

Mr. Wood: We will give you all the information as to the New Orleans, Texas & Mexico.

Mr. Cowan: I think you will find the data very complete, and that was my reason for asking it, supposing it was in the engineer's record for each road.

6471 Mr. Garwood: In respect to the Texas & New Orleans, and the Houston, East & West Texas, I think we have the data as requested by Mr. Cowan. At any rate, I took his notice to produce copies of that, and gave it to the proper department, and I have the statistics requested, and have had them subject to Mr. Cowan's examination at any time, and I have them now. As to the blue prints or maps requested, I beg to say that I have got two large packages in my room which are supposed to contain all. I have not had time to go through each one, but I assume that they are all there. At any rate, they are subject to his inspection.

Commissioner Harlan: They are available in some form for the Commission?

Mr. Garwood: I think they contain everything he asks, and I am ready to deliver them for his inspection. At this time I would like to inquire of counsel if the copies of the various contracts, and the estimates that we asked the intervenors to have ready at this hearing will be available.

Mr. Cowan: I have been informed that they have been prepared. Of course there are some of those things that we would object to presenting, but I think that it is available so far as the parties could

make it up. It was my instruction to do it, and I think they
6472 have complied as nearly as they could.

My reason for asking the information about the maps and the tonnage statistics should be considered in connection with the request which I made at St. Louis the other day of the Commission to get some map maker to take up the matter so as to get a map that any of us can have some sort of comprehensive view of this case, and it seems to me the tonnage statistics likewise could be compiled by the accounting department, so that we would be in a position so that each one of us might have a correct copy. The Commission might have them printed, even.

Commissioner Harlan: We went over that matter at St. Louis. The Commission can get pretty fair information on that line.

Mr. Cowan: It was not for my personal benefit that I requested this, but for proper information for all parties.

Commissioner Harlan: Is the Rock Island here? I suppose you have asked them for statistics.

Mr. Cowan: Yes. It has been asked of every one.

Commissioner Harlan: You might make inquiry of railroad counsel after the session, and see what is being done in the matter.

Mr. Cowan: Yes. I have, but I put it in the record now,
6473 so that nobody would think I had waived it.

Mr. Coleman: I would like to ask Judge Cowan if the statement I have filed is satisfactory.

Mr. Cowan: I have not looked at it.

Mr. Coleman: It shows the tonnage revenue, but on account of our records having been destroyed, I understand it would have been impossible to furnish the detailed tonnage statistics.

Mr. Cowan: What records do you speak of being destroyed?

Mr. Coleman: The records showing the tonnage.

Mr. Cowan: You speak of the old records?

Mr. Coleman: Yes, at Galveston.

Mr. Cowan: That is a long time back.

Mr. Coleman: We have prepared the revenue, but we have not the tonnage.

Mr. Cowan: I will call Mr. Kirby.

6474 JOHN H. KIRBY, was called as a witness, and having been duly sworn and examined, testified as follows:

Mr. Cowan: Without intending to embarrass you, how old are you?

Mr. Kirby: Fifty.

Mr. Cowan: Where do you live?

Mr. Kirby: At Houston, Texas.

Mr. Cowan: How long have you lived in Texas?

Mr. Kirby: Fifty years, and a couple of morths.

Mr. Cowan: You are engaged in the lumber business

Mr. Kirby: I am.

Mr. Cowan: How long have you been engaged in that business?

Mr. Kirby: I have been engaged in the manufacture and sale of

lumber about 10 years; but I have been engaged in the timber business, buying and selling trees and logs, 25 years.

Mr. Cowan: Where have your operations been carried on in both lines?

Mr. Kirby: In southeast Texas always.

Mr. Cowan: Have you any experience in connection with railroad construction or operation?

Mr. Kirby: I have had some experience. I have built a
6475 railroad in Texas and operated it seven years.

Mr. Cowan: What road was that?

Mr. Kirby: That was the Gulf, Beaumont & Kansas City, now part of the Santa Fe system, running from Beaumont north to San Augustine.

Mr. Cowan: How far?

Mr. Kirby: From Beaumont to San Augustine is about 140 miles; but at the time I sold to the Santa Fe there was only 75 miles in operation; the balance was under contract. I became the contractor, and built it into San Augustine before delivery to the Santa Fe.

Mr. Cowan: At that time were you engaged in the lumber manufacture?

Mr. Kirby: No, sir.

Mr. Cowan: Had you ever been so engaged before?

Mr. Kirby: I had not.

Mr. Cowan: Was this road operated in connection with any lumber operations?

Mr. Kirby: No, sir.

Mr. Cowan: During the time you have been engaged in the lumber manufacture and timber business, have you been acquainted with the industry known as the yellow pine lumber manufac-
6476 turing business, and the commerce in the product, lumber product and forest products?

Mr. Kirby: Yes, sir; that was largely my business to know about such things, and I thought I did.

Mr. Cowan: In the course of the disposition of the output of the various mills engaged in the yellow pine district, is there not and has there not been competition between the producers at the various markets and points of sale and construction?

Mr. Kirby: Yes, sir, there has always been very sharp competition.

Mr. Cowan: Who do you consider the principal buyer from the manufacturers?

Mr. Kirby: Well, the buyers of yard stock are largely the dealers; that is, the retailers throughout the country, and the buyers of saw bills are the railroads and other large builders, I mean the buyers direct from the manufacturers. There are certain large industries like car companies and harvester companies, and people of that kind that buy largely for their own consumption, that buy direct from the manufacturer; but the general user of lumber buys it in a retail yard, buys from the retailer, and the retailer buys from the manufacturer.

6477 Mr. Cowan: Can a man who desires to build a house, for example at Fort Worth, or Chicago, or build some factory, buy the stuff direct from the manufacturer under the rules and regulations of the trade?

Mr. Kirby: Well, yes; not as a rule, because the manufacturers are not in the retail business, and their customers would not permit them to sell to their customers.

Mr. Cowan: A somewhat similar situation to what it would be if a man wanted to buy his groceries from a wholesale grocery man.

Mr. Kirby: Yes, sir, the principle is the same in nearly all merchandise.

Mr. Cowan: That is considered a moral element in the trade, in the wholesaling and retailing of almost all commodities?

Mr. Kirby: Yes, sir.

Mr. Cowan: In the ratio of the amount of consumption, what proportion, in your opinion, of the yellow pine material, is purchased by railroads in the country for their own use, if you can give us some approximate idea.

6478 Mr. Kirby: Well, under normal conditions the railroads buy from long leaf mills somewhere from 25 to 38 per cent of the output of long leaf mills; that is, when there is construction work going on, and the conditions throughout the country are normal, or what you would call prosperous. At the present time, or since the panic of 1907, the railroad purchases have been only for repairs and improvements, and they have probably not reached as much as ten per cent of the output of long leaf mills. Their purchases from short leaf mills I am not so well posted about, because that is largely car material or ties for treating plants.

Mr. Cowan: I observed in the testimony of Mr. Ripley given before this Commission in connection with the rate advance cases recently heard, that he estimated that the railroads of the company consumed fifty per cent of the forest products. How do you harmonize that with your statement?

Mr. Kirby: Well, forest products include hewn ties and piling, and all that sort of thing, the wood. In my statement here I was talking about the products of mills.

Mr. Cowan: I understand, but I wanted to punctuate the point.

Mr. Kirby: For instance, we furnish the Santa Fe about seventy-five or eighty million feet a year of hewn ties, and probably
6479 fifteen or eighteen million feet, I don't know just how much, of piling.

Mr. Jeffery: What number of ties does that amount to? Excuse me for the interruption.

Mr. Kirby: 2,500,000 six by eight, with a lot of switch ties, and I do not know how many sets; but we have never furnished them that much, 2,500,000, but we hope to.

Mr. Jeffery: That is a pretty large percentage of the total number they use, is it not?

Mr. Kirby: Well,——

Mr. Cowan: I think, if I may be permitted, I am going to try to give Mr. Kirby a pretty thorough examination on the direct, and it

would be a great accommodation to both myself and Mr. Kirby if counsel would let us go ahead with the direct examination, making their notes, because I will then be able to continue it with some regularity, which otherwise I could not.

Mr. Kirby: Well, I started to say, concluding that inquiry that you made, that while we sold the Santa Fe that much of forest products, we probably did not sell them ten million feet of lumber
6480 out of the mills. The figures are here, but I do not remember just what they are.

Mr. Cowan: What proportion of the ties used, speaking in general terms, are hewn, and what proportion sawn ties, and why are the hewn ties used?

Mr. Kirby: I have not seen the statistics to take the entire country, of what proportion are hewn. In our country down there the Santa Fe uses hewn ties in every case where they are available for the reason that they take treatment better, they are a little cheaper, and then they are a little bigger. Now the specification under which we furnish ties to the Santa Fe is that they shall have an 8 inch face; that is, we will take a little tree and hew two sides and peel the edges, and there is a tie. You put a seven inch tie plate under a big rail on a six by eight tie, and your spike is so near the edge it does not hold very well. But you take one of these pole ties you have more surface, and it is more desirable for that reason, and besides it is cheaper.

Mr. Cowan: Where are the points of the greatest consumption of lumber? I mean localities, when I say points, the greatest consumption of lumber of the sort we are talking about.

Mr. Kirby: Well, that changes, Judge. I would not know
6481 how to say, because I have not the statistics.

Mr. Cowan: But generally speaking, not by statistics, where are the general districts which consume yellow pine lumber?

Mr. Kirby: Oklahoma, Kansas, Nebraska, Iowa, Illinois—in fact, the whole country. We ship as far east by rail as Buffalo, New York, and ship as far west as Denver and beyond.

Mr. Cowan: You do not ship to the Atlantic Seaboard by rail?

Mr. Kirby: No.

Mr. Cowan: Is there any considerable amount of lumber shipped by the coastwise boats to the Atlantic Seaboard?

Mr. Kirby: There is a very large amount of yellow pine used in the New York district, but it does not come from our territory, so I am not posted. In the main it would come from Georgia, the Carolinas, and perhaps Alabama and Mississippi and Florida, ship into New York. I am not advised.

Mr. Cowan: You do not ship much in the northwest direction beyond Colorado common points?

Mr. Kirby: No.

6482 Mr. Cowan: You do go up on the Missouri River, Missouri River territory, and the states on each side as far north as Iowa and Nebraska?

Mr. Kirby: Yes, and we ship some into the Dakotas.

Mr. Cowan: What figure does the freight rate cut in the market places to which the lumber goes?

Mr. Kirby: The freight rate fixes the market for you, because the price is a delivered price always, and the cost to the consumer is what it costs to get the lumber to his locality.

Mr. Cowan: How do you figure the price in your mill—do you figure a price at the mill so that if I buy, living in Kansas City, and get a 22 cent rate or 24 cent rate, and another man buys at Denver who pays a 37 cent rate, do we get the same price at the mill?

Mr. Kirby: You do not. You get the mill price plus the freight rate.

Mr. Cowan: So the standard is the mill price and the freight rate added, and the dealer who purchases pays the whole thing?

Mr. Kirby: Yes, sir, he does. We base our price list on the common point rate to any point of destination, and our price list
6483 will be our mill price plus the freight rate to the common point of 17½ cents; if the freight rate is higher than that or lower than that, then the price is either raised or lowered to the buyer, according to what additional amounts he pays in freight.

Mr. Cowan: It was said by Mr. Johnson on the stand the other day that while his companies, and I believe he expressed himself generally that was the case with others, that lumber companies had price lists, that these lists are not adhered to, but the lumber is sold in competition with the trade, either maintaining the scale or discounting the price list, according to the circumstances. Is that your experience?

Mr. Kirby: That is true, yes, sir.

Mr. Cowan: Is that generally the case in the lumber trade?

Mr. Kirby: So far as I have any information, I see my competitors' prices once in a while, and hear of them through a dealer and I find that we have often quoted under him and he got the business; I don't know what he got, but I am convinced he did not get the price he was supposed to quote, so I take it there is not a salesman who adheres absolutely to his price list all the time.

6484 Mr. Cowan: When you spoke a while ago of the price list in connection with the freight rate, that is simply showing what the general rule is with respect to adding the freight to some standard price, and as a matter of quotation to the public.

Mr. Kirby: Yes, sir, all manufacturers who put out a price list of that kind, of the kind that I told you about. That is our practice, but all manufacturers sell at the mill price, that is every manufacturer's price is influenced by what it cost him to get the product from his mill to the point of sale.

Mr. Cowan: I understand that the blanket system of rates applies so that from a given territory the rates are the same from all points in the producing territory to any given market; for example, I may use Fort Worth, Kansas City and Chicago. Will you explain briefly the system that exists with respect to the blanket rates?

Mr. Kirby: I understand the blanket rate to have been put in—of course, I had nothing to do with putting it in—to promote the general thrift of the country. In the first place, not meaning to put one interest above the other, but in order that all manu-
6485 facturers under the blanket system are permitted to sell in all markets, so that they have an equal opportunity of get-

ting to those markets, and all buyers in those markets are permitted to obtain the competition of all manufacturers throughout all the territory for their trade, so that it is one of those plans to promote general thrift and equality of opportunity to every man, whether he be buyer or seller.

Mr. Cowan: And the object of that is, so far as the freight rate is concerned, to put both the manufacturer and the dealer on an equality?

Mr. Kirby: Well, it is to put manufacturers on an equality, and it is to give all dealers the benefit of competition from all manufacturing sections.

Mr. Cowan: Equally to each blanket territory where the rates apply.

Mr. Kirby: Yes.

Mr. Cowan: But for the object of equality, could the blanket system be justified, ignoring distance as it does?

Mr. Kirby: Well, I should think not. I think that is the sole purpose.

Mr. Cowan: Do you think the system is necessary?

Mr. Kirby: I do.

6486 Mr. Cowan: That is, because you think equality is necessary?

Mr. Kirby: Yes.

Mr. Cowan: Are you acquainted, or do you know the effect upon this equality that appears to be the general governing principle of having made these blanket systems, of railroads' divisions between themselves? I will give an example. Take the Rock Island and the Santa Fe, both connecting with the Denver & Rio Grande at Pueblo, and the Denver & Rio Grande is the purchaser of timber, ties or lumber in the yellow pine district. State whether or not the divisions that would be given as between the Denver & Rio Grande and the Rock Island, or the Denver & Rio Grande and the Santa Fe, would determine the locality to which the Denver & Rio Grande would go to buy a given sale of lumber.

Mr. Kirby: Yes, sir.

Mr. Cowan: It would determine it?

Mr. Kirby: The Denver & Rio Grande in that case, whatever its division was, could be used to reduce the cost of the lumber at its connection, of course, and it would be influenced as any other purchaser, it being desirous of buying as cheaply as it can; that

6487 would of course enable them to buy cheaper from a mill upon a line of road which gave a large division than they could from a mill upon a line of road which gave the Rio Grande the smaller division.

Mr. Cowan: That illustrates the necessity of having equality with respect to the divisions of rates as well as the rates themselves?

Mr. Kirby: Yes, sir.

Mr. Cowan: Do you have in mind an instance in which any important order of lumber was in fact transferred from one locality to another, on account of a change in the amount of division?

Mr. Kirby: I have in mind a particular instance, that is probably the one you had in mind when you formulated your question. The

Denver & Rio Grande were in the market some time ago for a large amount of ties. Our mills are located largely upon the Santa Fe, but we went after that business. We found that the Denver & Rio Grande's division on lumber tonnage originating at Santa Fe points and delivered on their line was about four cents, whereas with other lines of road down there they had in a division of seven cents, and the business after we had secured it as we thought on an equal freight basis was lost to us because of this condition. The
6488 other lines of road gave the larger division, and the Santa Fe mills lost out.

Commissioner Harlan: You are now referring to the effect of divisions where the railroad is the purchaser of the material.

Mr. Kirby: Yes, sir; and the effect, Judge, of the through rate, the net rate to the buyer or seller, and its influence upon the purchase.

Mr. Cowan: The place of purchase?

Mr. Kirby: Yes, sir.

Mr. Cowan: Was this division that the Denver & Rio Grande got which took the trade away from you in a given case changed, as you understand it, was the amount of that division changed after you had secured the order for the lumber?

Mr. Kirby: I so understood, Judge, but I am not sure about that, because I am not on the inside, but I was told that that was the reason for withdrawing the business from us, that other roads had increased their divisions, and they could buy cheaper.

Mr. Cowan: I suppose those orders for lumber from large
6489 concerns of that kind are generally subject to cancellation by either party under certain conditions. How is that?

Mr. Kirby. Oh, Yes.

Mr. Cowan: What is there to show that? When the order comes in is it generally stampd with a stamp, or has it written upon it "Subject to the right of cancellation within so many days"?

Mr. Kirby: No, it is just commercial practice.

Mr. Cowan: It is just a practice?

Mr. Kirby: It is just a universal practice. You go out and sell a dealer 100 cars of lumber, and if he concludes he does not want it, he cancels it. If you want his business in the future, you cannot afford to make him take it. You probably could, as a legal proposition, but you do not. It is the same with railroads, and any other purchasers.

Mr. Cowan: So in your opinion the divisions are capable, at least, of being so adjusted as to determine the place at which the purchase may be made by a connecting road which is the purchaser of supplies?

Mr. Kirby: Yes, sir, anything that reduces the cost of that transportation to the party interested in its delivery, whether it be the purchaser or the seller influences the sale, because the freight
6490 rate is a part of the cost in getting the lumber from the mill to the point of consumption.

Mr. Cowan: What is the extent of the pine forests, generally speaking, competing with each other in this yellow pine business?

Mr. Kirby: I could not tell you in billions of feet, because there

are no reliable statistics, but there are various estimates; but the area is from Georgia to Texas, including Missouri, Arkansas, Louisiana, Texas, Mississippi, Alabama, Florida and Georgia.

Mr. Cowan: At the present rate of cutting of yellow pine, what is the general opinion of well informed lumber men as to how long it will last?

Mr. Kirby: Around 15 years.

Mr. Cowan: What effect does concrete and steel construction have upon the consumption of lumber for building purposes generally?

Mr. Kirby: Well, they reduce the consumption in general lines. For instance, steel in the manufacture of cars has largely reduced the use of wood; and concrete in various kinds of construction has subsituted wood. But the statistics show that the per capita
6491 consumption in this country increases, notwithstanding the competition of steel and concrete, and other characters of construction.

Mr. Cowan: Will you describe the method of milling and lumber operations briefly in the past and the evolution up to the present time within your knowledge, of the yellow pine country and elsewhere, if you please.

Mr. Kirby: Do you mean the operation of the mills?

Mr. Cowan: Yes, the method of logging and milling.

Mr. Kirby: Well, it used to be at least 20 years ago, 28 years ago, when the Kountzes built a line of railroad down in East Texas, now part of the Southern Pacific, through the county where I was raised, in making ties, the practice was for the mill man to set up his little mill out in the forest, of course right on the railroad track, and he would haul his logs in with oxen. Then a little later, when his timber got farther away, he laid down wooden rails and put some mules on trucks and hauled his logs in in that way. And in a little while, in the process of evolution, he got in a little engine and put on that truck, and pulled his logs in with steam.

Mr. Cowan: Over the wooden rails?

Mr. Kirby: Over the wooden rails. Then he substituted
6492 steel or iron for the wooden rails, rather small to start with, and then got him some regular little locomotives; and so in the modern method of logging at the present time, we use the best character of railroad that we have got the money to build; other conditions of course being considered as to the permanency of it, that is the period you want to use it, and the best motive power. Where we used to haul logs with a couple of mules which would cost us 75 dollars, we now haul logs with a locomotive which will cost us $12,000. So that is the process of evolution insofar as the logging is concerned. The mills have operated in substantially the same way, and are still doing it. Formerly, 30 years ago, we did not have in our territory down there, any edgers or trimmers, or any method of utilizing the outside of the log; we used thick circular saws which cut half an inch; and now we used thin band saws and gangs, and then we have re-saws to take up the slabs, so we try to burn up nothing but the bark, and save every piece of lumber which is four inches wide and four feet long, and sometimes

smaller sizes. So there has been evolution both in the logging end and in the milling end, and it is going on constantly; they are improving every day in their methods.

6493 Mr. Cowan: I suppose the saving of sawdust which is converted into lumber now, compared with what it used to be, is a very large item.

Mr. Kirby: It is a very large item, and of course as the timber grows more valuable they use every device to save sawdust and waste of every kind insofar as the mill operations are concerned.

Mr. Cowan: Well, to-day is a railroad, and by that I am not talking about a corporation, but about a railroad, and the facilities used in operating it a necessity in a mill operation in the country in which we are talking about.

Mr. Kirby: Absolutely.

Mr. Cowan: Now will you state the number of sawmills which the Kirby Lumber Company has, where they are, and how they are operated, having relation in particular to the railroad operation in connection with these mills; and you may just take them up without my asking questions, and describe them in a brief way, of course, and give the circumstances and the situation surrounding each, and the matters pertaining to the manufacturing operation, and to the disposition of the products, the getting in of the logs, and so on. And in that connection I wish you would tell here,

6494 before you get very far along with it, the method in which they cut these trees and get them on to the tram. Nobody has told that, and we would like to have it go in the record along with this, and without my asking questions you may take up that subject.

Mr. Kirby: You have given me a big task, Judge.

Mr. Cowan: Well, you probably have a list of your mill there.

Mr. Hancock: I have a list here (handing paper).

Mr. Kirby: I do not think I need it.

Mr. Cowan: You are personally familiar with the whole matter from the stump to the bank account?

Mr. Kirby: Yes, sir, I have run rabbits where nearly every track is located down there. The Kirby Lumber Company owns thirteen mills, and with each one we have a railroad. At eleven of these mills the railroads are standard gauge, and of standard construction. At the other two they are narrow gauge. At Bronson we maintain about 12 miles of standard gauge railroad running easterly in the direction of Hemphill. Bronson is a town in Sabine County of 1,000 or 1200, I suppose, and Hemphill is the county seat of that

6495 county. Our railroad runs out within four or five miles of the county seat. We operate that railroad for the purpose of bringing logs to the mill, and for no other purpose.

Answering your question, I presume at this point as well as any, as to the method of getting the logs upon the car, in the first place those logs are sawn down—that is, the trees are sawn down and cut into log lengths by contract. I suppose every manufacturer pays about the same price for that service. Then some manufacturers pick up those logs after they are cut into log lengths with teams; but most

of them nowadays do it by steam. While we used to cart entirely with oxen, then we afterwards substituted mules as being quicker and more economical, but of late years most of us use steam. That is, we have a steam skidder, and sometimes we throw the cable out automatically on a line, but at other times it is carried out by a horse, and there is a tree out there 500 or 1,000 feet away which has been felled and cut into log lengths: the cable is carried out there and grabs on to the end of the log, and you pull it in by steam, your skidder being located upon your railroad, and being elevated
6496 so that your empty logging car can go under it; and then that skidder is sometimes as well a loader? that is, you have another derrick and drum, and you pick up that log when it has been brought in alongside your railroad track, and lay it on your car, and keep on that process until you load your car. Then your engine pulls ahead, and there is another empty. That is the process most manufacturers follow now, that is the steam process.

Mr. Cowan: Do you cut the trees next to the railroad first, or go farther away?

Mr. Kirby: No, you go away from the railroad so as to get the debris always behind you. Now, your distance will depend upon your cable, and upon the machine you are using. Sometimes they will go out a thousand feet. So you lay the railroad track, this temporary railroad track upon which you locate your skidder, and for anywhere from 400 to 1,000 feet on either side you are throwing out your cables and taking up all the trees beginning at the farthest extent of the length of your cable to start with, so that the tops are always thrown behind you, and not in the way of your operations. Then when all the timber in that area has been removed, your skid-
der is then put on another track lying parallel or substan-
6497 tially so, to that one the necessary distance away, so then the cable on one side of your loader will reach the point where you have just operated, and extend into the timber there. So that is the process at the present time. And that track expense, of course, is pretty large for laying these temporary tracks. You have got to have tracks sufficient to get your train over, although you do not tramp it, and you do not often pay much attention to grade, although you have to do some work, and of course clear your right of way; but the picking up of the track is a large expense in everybody's logging operation. Then it is brought off those spurs on to your main line.

Commissioner Harlan: Tell us a little about a skidder, and its construction, and the length. Is it a mere structure near the track for loading the logs on the track, or does it run out with the cable?

Mr. Kirby: No.

Commissioner Harlan: You haul the logs over the ground or have some sort of truck?

Mr. Kirby: We drag them right on the ground.

Commissioner Harlan: So the skidder is simply a structure at the railroad track to aid in loading?

6498 Mr. Kirby: Yes, sir, right over the track, and it is usually built so it can be elevated or lowered, but you make it stationary and tie it with guy wires.

Commissioner Harlan: Logs are pulled by the cable right over the ground?

Mr. Kirby: Yes, sir, and your railroad track runs under the skidder, and the log train comes down and backs under the skidder, and you pull through one car at a time, and when one car is loaded, the toggle chains are fastened to another at that point, and it is loaded.

Mr. Cowan: The length of your cable therefore, will determine the distance the spur loading tracks will be apart in the forest?

Mr. Kirby: Yes, sir. Sometimes you do not have a steam skidder but pull them in by mules and carts and lay them on skid poles by the side of the tracks, and another team will come along and move the logs on the logging cars; the same process as with the steam skidder, but instead of that the steam skidder shakes or pulls the log by cable, where your teams will cart them. That is the difference.

Mr. Cowan: On log wagons?

6499 Mr. Kirby: Yes, sir, a logging cart which runs astraddle of a log or two or three and drops them along the railroad track, and when your train is ready, there is another loading team that loads the logs on the car.

Mr. Cowan: Now, then when you get to where your junction point of the spur track is, in the practice with you, do you send the same engine on which spotted the ties for loading to the mill, or stop it and turn it over to another?

Mr. Kirby: Well, rarely so. There is a cable on this skidder as a rule that will handle your empties; you do not have to have the engine to pull your cars; the steam power that operates your skidder will move your train with the cable, rock it on to the track end.

Mr. Cowan: For loading purposes?

Mr. Kirby: For loading purposes. Now you take those cars when they are loaded and pull them off on the spur track and set them out on the main line until you have a train. We have a siding there on the main line. And you haul your loads there until a train is made up, and then ordinarily you have an engine that has already gone in perhaps with one train load, and it may be a train load of ten, or it may be a trainload of forty cars, it is different in different

6500 localities, and if the mill is not far away, they often run with a lighter load than if you have a longer haul. Then your main line engine will take up those cars and carry them into the mill, and that main line engine often operates solely on the main line, and does not do any loading or operation on the spur track.

Mr. Cowan: Is it customary to carry on loading at different spurs during the same time, so the main line engine will get the output from various spurs?

Mr. Kirby: Yes, sir, and where you do not load with steam, you are bound to have an engine to handle your train that you are loading.

Mr. Cowan: In that case you would have to have an engine?

Mr. Kirby: Yes, sir, where you do not load with steam, where you have not got a steam skidder or loader, where you load with mules or a force of that character, of course you have to have an engine to

operate the train, otherwise you might load one car or a few cars in a train, but you could not load consecutively, nor couple them up continuously.

Mr. Cowan: Does this method you have described generally apply to the principal saw mills in the country, so far as you know?

6501 Mr. Kirby: So far as I have any information, yes, sir.

Mr. Cowan: And it does apply to all your operations?

Mr. Kirby: Yes, sir.

Mr. Cowan: Is the loading or bringing in of logs to the spur tracks, in any case with you, done by the use of mules or teams, or do you in all cases use the loaders?

Mr. Kirby: No, we load some with teams. We operate at 12 or 14 points, and we only have six skidders.

Mr. Cowan: You may proceed with the description of your other mills now, having gone into the question of the detail of operation.

Mr. Coleman: If you do not object, there is one little point I am not clear upon. How would you use the skidder to get the car down?

Mr. Kirby: With a cable. You mean to move the train?

Mr. Coleman: Yes, from the loading point down to the junction.

Mr. Kirby: No, you could not do that; you could only move the train through your skidder. You could not move it beyond that.

Mr. Coleman: That is what I wanted to find out.

Mr. Cowan: Now, taking up this operation at this mill

6502 you have spoken of,—what was the name of it?

Mr. Kirby: Bronson.

Mr. Cowan: How do you get the logs to the place where they are sawed; I mean by that you first unload them in a pond?

Mr. Kirby: Yes. After we have gone through this process of loading the cars and making up the train, you haul it over your main line railroad to the saw mill, alongside of your log pond, and then you unload the logs off the cars into that pond. Then they are brought up with a bull chain out of that pond into the mill. The logs are sorted in the pond so as to fit your orders, and the logs you want to saw at any particular time are selected by the log pond man, and they are pushed on to the chain and carried up into the mill?

Mr. Cowan: How do you get your output of your lumber to the cars? You load it on to the main line track in this particular instance you speak of?

Mr. Kirby: The Santa Fe sends the cars into our mill, and we load them out. We load from a dry shed, or sometimes from the timber dock right at the mill, depending on what you have to load, or from the yard sometimes, if you are shipping rough

6503 stock.

Mr. Cowan: Are extensive lumber yards where lumber is stacked, necessary at large mill operations?

Mr. Kirby: Always, yes, sir.

Mr. Cowan: Is the planing mill operation carried on at the same building where the storing is done?

Mr. Kirby: Not in the same building, no; it is a separate building a few hundred feet away. The idea is——

Mr. Cowan: Yes, I just wanted to inquire why that was?

Mr. Kirby: Well, you save room and save insurance, and often for economy of operation. For instance, your stock that is not dry kilned will have to go in the yard and stay for sixty days to air dry, because you do not plane any wet stock or green stock; you do not use any of that character of stock in your planing mill. And you have to have your planing mill a little removed from your saw mill, otherwise you would carry the lumber away out there and stack it, and then bring it in, whereas now you stack it between the mill and the planing mill, and then you are always moving in the direction of the car loading track.

Mr. Cowan: How do you transport the lumber from the saw to the places to be stacked in the yard, or the dry kiln?

6504 Mr. Kirby: In most cases we do it on little dolly cars with a mule. The lumber is sorted on the sorting tables, and certain of it will go into the dry kiln, and it is loaded on cars and pushed into the dry kiln, which is usually about a hundred feet away, and the other lumber going into the yard is put on these dolly cars and pulled into the yard.

Mr. Cowan: When it goes to the planer, does it go through the same operation?

Mr. Kirby: The stuff will go to the planer either from the dry kiln or from the yard. Often the car on which this was loaded for the dry kiln sets in the dry kiln during the process of drying, and then when the process is complete, the same car is pushed on over to the planing mill, so you do not reload it.

Mr. Cowan: By car you mean a little dinky truck?

Mr. Kirby: It is a mere truck. We call it a car because it operates on rails, and for that purpose we have small steel rails.

Mr. Cowan: And when your lumber comes out of the planer then, it is carried by some sort of truck——

6505 Mr. Kirby: Carried by the same trucks to the car.

Mr. Cowan: To the railroad car, box or flat, or whatever it is loaded in?

Mr. Kirby: Yes, sir.

Mr. Cowan: This process from the stump to the loading on the car for transportation to market is one of continuous transportation as a part of the saw mill operation.

Mr. Kirby: All the time.

Mr. Cowan: Is there any way to segregate one from the other, so as to say one is not of the same necessity as the other?

Mr. Kirby: No, sir, they are all of the same consequence. You cannot get——

Mr. Walter: Some of these questions in form have not been objected to, but I would prefer Judge Cowan should ask the question so it will pass muster as to being leading or not.

Commissioner Harlan: You have observed the admonition of counsel. Will you endeavor to do what you can, Judge Cowan?

Mr. Cowan: I will do what I can to accommodate Mr. Walter in that particular.

6506 Now you may go ahead with your list of mills.

Commissioner Harlan: Let me ask about the Bronson mill. You say the Santa Fe puts the car at the planing mill?

Mr. Kirby: No, not at the planing mill. We do that ourselves. The Kirby Lumber Company does all the switching at the lumber mill.

Mr. Cowan: Is it done with a locomotive of your own?

Mr. Kirby: By our own locomotive, yes, sir; one of the locomotives which handles our logging train switches — the planing mill.

Commissioner Harlan: Where do you get the car from the Santa Fe?

Mr. Kirby: They set it out for us on a connecting track, their track; but the track into the planing mill, however, is our track.

Commissioner Harlan: Built by you?

Mr. Kirby: Built by us.

Commissioner Harlan: And in this case how long is that track?

Mr. Kirby: Well, I cannot give you that, sir. I could not even guess at it.

Mr. Marble: Is it a matter of miles?

6507 Mr. Kirby: No, it is not over 2,000 feet, I should not think, anyway.

Mr. Garwood: How long?

Mr. Kirby: I should not think it was over 2,000 feet; a mere estimate.

Mr. Cowan: What other buildings have you at your mill besides the saw mill and the planer and the dry kiln? You have an office, I suppose?

Mr. Kirby: Yes, sir.

Mr. Cowan: Have you any other buildings customarily?

Mr. Kirby: Well, we always have—now this town at Bronson, that is a country town; but in most localities our mills are located where we control all the property, and of course we have a great many buildings, residences for employees and store buildings, and grain houses and——

Mr. Cowan: But the tracks inside your plant reach ordinarily all the buildings?

Mr. Kirby: They would only reach the storerooms to store hay or potatoes, or anything of that sort used in our stores department.

Mr. Cowan: Do they come into your lumber yard?

Mr. Kirby: Oh, yes, they go all through the lumber yard.

6508 the tracks are all through the lumber yard and to the planing mill.

Mr. Cowan: Now at Bronson is the plant defined by a fence or other enclosure?

Mr. Kirby: No.

Mr. Cowan: How many miles or feet of track have you inside of what we might speak of as the plant itself where you switch back and forth?

Mr. Kirby: I can get you that later. I do not remember it.

Mr. Cowan: I do not know that it is important, but do you remember it in a general way?

Mr. Kirby: I should think there are about 2,000 feet of that planing mill track.

Mr. Cowan: That is to the Santa Fe interchange track?

Mr. Kirby: Yes.

Mr. Cowan: But I mean between your own buildings.

Mr. Kirby: Then there are a number of tracks laid about that planing mill, but I cannot tell you whether it is three or five.

Mr. Cowan: I do not know that it is important.

Mr. Kirby: But we handle all the cars to and from that
6509 Planing mill. Of course that is our business to get it to market. If we did not, we could not ship from that mill. Ordinarily, however, the Santa Fe comes into our planing mills and does that work, but they decline to do it at Bronson because the track is not constructed to suit them, and the physical conditions did not permit us to change it, so we do the work ourselves rather than abandon the mill.

Mr. Cowan: But at your mills the Santa Fe switches the cars in?

Mr. Kirby: Yes.

Mr. Cowan: And deposits them at the loading track?

Mr. Kirby: Yes.

Mr. Cowan: Whether in the planing mill or your storage yard.

Mr. Kirby: Yes.

Mr. Cowan: And when it is loaded they take it out?

Mr. Kirby: Yes, sir. We have a large double mill at Call, Newton County, which is two miles from the Santa Fe. We maintain the track and do all the switching from the mill at Call over to the main line of the Santa Fe. The Santa Fe sets the empty——

6510 Commissioner Harlan: Perhaps we will get at that mill in due course.

Mr. Kirby: Yes.

Mr. Cowan: How long is the main line and permanent track, or that which has been permanent in connection with the Bronson mill?

Mr. Kirby: That is about 12 miles.

Mr. Cowan: What sort of a railroad is that?

Mr. Kirby: It is a substantial standard gauge rail laid mostly with 35 pound new steel rail.

Mr. Cowan: What sort of locomotives do you use?

Mr. Kirby: Standard gauge locomotives. We use some rod engines, and a good many Shays, and I do not know about the assignment to Bronson, whether there is a Shay engine there, or whether they are rods.

Mr. Cowan: Do you haul other stuff than lumber at this mill?

Mr. Kirby: Other stuff than lumber?

Mr. Cowan: Yes.

Mr. Kirby: Well, we haul some stuff, yes.

Mr. Cowan: You have a statement, I believe, somewhere, as to all your mills, as to the amount of your traffic.

6511 Mr. Kirby: Yes, sir.

Mr. Cowan: And we will reach that when we have finished describing the various mills. Now describe the next mill.

Mr. Kirby: As I have started on Call, I will go to that and conclude it.

Mr. Andrews: Before you leave Bronson: You said you had 12 miles of main line track. You have not stated how much tram trackage you had to use at Bronson to get the lumber in.

Mr. Kirby: Well, I do not know just what that is, the spur tracks from the main line, I do not know just how much we have. Sometimes it is one thing, and sometimes it is another. I would have to know what section of land they were logging to know whether they had two miles of such track or four, and I do not know just where they operate.

Commissioner Harlan: On that point our records seem to indicate you have 7 miles at Bronson of what our people have regarded as main line track, and then underneath is a memorandum of twelve miles noted here in the timber track. Does that refresh your recollection as to the mileage of your permanent track at Bron-

6512 son?

Mr. Kirby: Well, we had been logging when I had the 12 miles in view over near Hemphill. In the last few months, perhaps within a year, it may have been as long as a year, we fell back to nearer timber, and this seven mile point would be on this nearer timber.

Commissioner Harlan: You still have five miles of track beyond which has not been taken up?

Mr. Kirby: We still have five miles beyond which have not been taken up, and which we cannot take up for a number of years, although there might be times when we are not using it.

Commissioner Harlan: Before you leave Bronson, it might be well to indicate whether you are hauling logs for anyone else over this 12 miles of track.

Mr. Kirby: No, nor at any other point.

Commissioner Harlan: Or any other merchandise?

Mr. Kirby: Well, we haul some merchandise for ourselves, and merchandise for the merchants that trade with us. They will consign the stuff shipper's order, and of course it is their freight until paid for.

Commissioner Harlan: On what sort of basis of compensation do you perform that service?

6513 Mr. Kirby: It is free. We do not charge anything for it. There is not enough of it to make it desirable from a railroad standpoint——

Commissioner Harlan: Well, is there a railroad standpoint; in other words, do you operate that railroad for the public as a common carrier?

Mr. Kirby: We do not, and we try to avoid that all the time, because in our state, Judge, that is not the only reason, but one of the reasons I might state here would be that you cannot take up a piece of road in Texas that is a common carrier, without the consent of the Legislature, and we would have a lot of investments there when our logging operations ended that would not earn interest on the spikes from the little traffic there is in the country.

Commissioner Harlan: Is there any community or outside interest on the Bronson line?

Mr. Kirby: Yes, the farmers along there, but their trade does not amount to anything much, and our front, about five miles to the front, is the town of Hemphill. There is no railroad there. It is the County seat. But there is not business enough there even at the town of Hemphill all thrown together to pay to operate
6514 a railroad where we have to run trains every day when the timber is done. Of course we could take it along with our present business and it would be a pick-up to that extent, but when we got through we would have a railroad there with no traffic, and perhaps no legislative consent to remove it.

Mr. Marble: Do you actually carry stuff that is offered to you by whoever offers it?

Mr. Kirby: Well, we do not as a rule. I do not know of anybody that has been refused, but it is generally understood that we do not do it. I do not know of anybody that has been refused, but we would like if they would not ask us.

Mr. Marble: You are willing to be a neighbor, but——

Mr. Kirby: Yes.

Mr. Cowan: You may describe your mill at Call, and the railroad operation.

Mr. Kirby: We have a large double mill at Call.

Mr. Cowan: What is meant by that? I have heard that expression several times.

Mr. Kirby: That is two sawmills under one shed; one is a circular saw mill, and the other a band saw mill. The Santa Fe owns the piece of track two miles long from our main line into Call.
6515 We maintain that piece of track, and we take empties for the Call mill at the Santa Fe junction.

Mr. Marble: What is the Santa Fe junction called?

Mr. Kirby: Call Junction, and we take them into the mill at Call and load them, and return the load to the Santa Fe at Call Junction.

Mr. Cowan: What is the length of your road?

Mr. Kirby: Our tram road running our of Call is thirty miles standard gauge part 60 pounds and part 35 pounds rail.

Mr. Cowan: Where does it run to?

Mr. Kirby: It runs northeasterly from Call up into that same county, Newton, at a point east of the town of Newton, about six miles, may be eight miles.

Mr. Cowan: Does it reach the town of Newton?

Mr. Kirby: It does not. It is tending in that direction. We will come right up through the town of Newton in time, because our timber comes right up to the town.

Mr. Cowan: What is the object of having the line thirty miles long?

Mr. Kirby: That is where our trees are, and we have to build to them.

Mr. Cowan: How far from Call is Kirbyville?

Mr. Kirby: Four miles.

Mr. Cowan: Is that also on the Santa Fe rails?

6516 Mr. Kirby: Yes. We have a double mill, circular and band at Kirbyville.

Mr. Cowan: I do not mean to go into that for a moment until we finish the operation of the railroad.

Mr. Kirby: We have 20 miles of standard gauge railroad extending northwesterly from Kirbyville up in the direction of Magnolia Springs, and we haul logs—all these lines are operated just as the Bronson line is operated in respect to the log haul.

Mr. Cowan: Is the manner and method of hauling logs on these main lines you speak of of your tram substantially the same?

Mr. Kirby: Substantially the same, yes, sir, at every point.

Mr. Cowan: Is it substantially the same as it is on these other lines serving other saw mills than the Kirby Lumber Company?

Mr. Kirby: Yes, sir. At Roganville we have about ten miles of——

Mr. Cowan: I want to get back to Call. How much spurs do you have at Call, what length of spurs?

6517 Mr. Kirby: Well, that depends largely upon where you are logging at a particular time. Generally there is in use there about five miles, and sometimes more, of these temporary spur tracks going out to your main line.

Mr. Cowan: All this railroad property and manufacturing property and everything connected with it belongs to the Kirby Lumber Company?

Mr. Kirby: Yes, sir.

Mr. Cowan: You have no separate railroad incorporation?

Mr. Kirby: No, nor organization.

Mr. Cowan: But you do keep separately your railroad operations?

Mr. Kirby: Oh, yes.

Mr. Cowan: Just like you would any other part of your manufacturing business?

Mr. Kirby: Yes, we keep separately what it costs us to feed a mule. You know we want to know what it costs in a particular mill, of course.

Mr. Cowan: Now as to the other mills, the amount of line of road and logging spurs and such special matters as you think material.

Mr. Kirby: We have at Roganville a single mill, and our tram road runs in the direction of the county seat of Newton

6518 County. We have been out very near to that county seat. We haul our logs about 12 or 13 miles to Roganville, and we do not do any business except for ourselves, and do not haul anything from that except for ourselves. Roganville is a country town in Jasper County, of four or five hundred people. There is no business of any consequence except our mill. Newton is the county seat of Newton County, and the Frisco road runs there, and it has no other railroad, and we are within two or three miles of the county seat, and there is no traffic in that country except our business.

Commissioner Harlan: Are there any farms there?

Mr. Kirby: A few.

Commissioner Harlan: What do they produce?

Mr. Kirby: Corn, and a little cotton and some sugar cane, potatoes and vegetables, generally for the supply of the mill trade. They have not anything much for shipment.

Commissioner Harlan: They send the cotton out, do they not?

Mr. Kirby: Yes, but a farmer rather than be bothered by you with only a bale or two would rather take it out on his cart two or three miles and save that cost, if it cost him anything, and a
6519 little road would not haul any cotton unless there was some way of rewarding the man who gave it to it as an inducement.

At Browndel we have a single hand mill and a re-saw with a capacity of about 80,000 feet a day, and we have, I think, about ten miles of railroad there, probably not more than six or seven operating at the present time. We have had much larger mileage around there in the past, because we have had a larger mill, and we are operating in another direction.

At Silsbee we have about forty miles of road. Silsbee is a town of 6,000 people located on the Santa Fe. Our railroad runs from Silsbee to Village, 24 miles, Village being a general town of probably 1,000 or 1,200 people, located on the Southern Pacific. We have there 23 miles or 24 miles of main line of railroad running between those two points, between the two termini. However, we spring tram roads off; we have two, one that logs the mill at Village, and one that logs the mill at Silsbee, and in those two tram roads we probably have 15 miles of temporary line that is taken up and shifted from time to time, as the timber supply in particular localities is exhausted.

There are some farmers along in that country, but they do
6520 not produce anything but hogs and cows for the locomotive to romp on; there is not any traffic much, except our own. We handle a good deal of stuff, merchandise, and foodstuff and grain, and all that sort of thing, but it is largely for our own use, and we make no charge. Sometimes we haul lumber from Silsbee over to Village in order to ship it out over the Southern Pacific, because it fits an order we have on the Southern Pacific, and we have got to move it.

Commissioner Harlan: That haul is how long?

Mr. Kirby: 24 miles. We do that ourselves and get nothing from the railroad or anybody else. The Mill Department, however, is debited in favor of the Logging Department $5.00 a car for that service, but that is just a method of keeping our accounts. Sometimes we take lumber from Village over to Silsbee. We often do that because we have no planing mill at Village, and we will take rough stock over to Silsbee and dress it and sometimes bring it back for shipment over the Southern Pacific.

Commissioner Harlan: Mr. Kirby, what becomes of this country after you have gone over it and cut down the trees, do you own the land?

Mr. Kirby: No.

6521 Commissioner Harlan: You do not own the land?

Mr. Kirby: No.

Commissioner Harlan: Is it taken up by farmers, in other words, is it a good country for agriculture?

Mr. Kirby: No, Judge, it is not a good country for agriculture, though there are areas down there that are capable of being made very productive by scientific farming with the right kind of fertilizer to aid it; because the soil is such that it holds the fertilizer well, and gives the very finest results, but in its natural state it is not productive except along the creeks.

Commissioner Harlan: Is it level country or hilly?

Mr. Kirby: As a rule it is fairly level country, but there are some sections rather hilly. Around Browndel and Bronson it is a hilly section. Up to the north it grows more hilly, but in the south part, down in the southern part of Jasper and Newton and Hardin Counties, and a large part of Tyler County, the country is practically level. Those forests reproduce themselves in the course of time. I do not know how long it would take.

Commissioner Harlan: Do they grow up in pine?

Mr. Kirby: They grow up in pine, yes, sir; that is, in
6522 the long leaf belt. Of course, in the short leaf there is another character of wood, but the soil in the territory growing long leaf pine does not seem adapted to any other but long leaf; that is, there is no natural growth up there. The country is open except for the long leaf pine, except for a little growth of brushwood along the creeks.

Mr. Marble: Do you have any hardwood in these tracts?

Mr. Kirby: Well, along the tracts there are oaks of all kinds.

Mr. Marble: Are you lumbering that?

Mr. Kirby: No, we confine our operations entirely to pine.

Mr. Marble: Is anyone lumbering that hard wood?

Mr. Kirby: Not in our locality. In fact, there is very little done in the hard wood way in Southeast Texas. I believe I have described all the tram roads.

At Fuqua on the Santa Fe, we have 12 or 14 miles of main line running down in the direction of an oil field at Saratoga. We operate that just as the others. It is a standard gauge railroad with steam locomotives and——

Commissioner Harlan: Where is the mill with reference to the Santa Fe's main line?

Mr. Kirby: It is on the main line, about 20 miles west of
6523 Koontz.

Mr. Cowan: How many mills have you altogether?

Mr. Kirby: 13.

Commissioner Harlan: Have you a mill at Bessmay?

Mr. Kirby: Yes, I had overlooked that. That is a double mill with two bands and a gang. We have been maintaining quite a large mileage there, probably 25 or 30 miles of main line. We are not maintaining quite so much now because we have moved in another direction. That is a standard gauge railroad laid in part with 60 pound rail, and in part with 35 pound, with seven locomotives, and used entirely to serve the mill; probably ten miles of tem-

porary line used in logging that mill nearly all the time, on account of its size.

Mr. Cowan: How many employees about, do you have at that mill? I mean in connection with the operation of that mill generally?

Mr. Kirby: I could not say, generally Judge. I would not want to make a guess at that.

Mr. Cowan: Well, a sufficient number to build up considerable of a town?

Mr. Kirby: The town of Bessmay is a town of probably
6524 2,000 people. The Bessmay and Buna, they call them all one; they are probably a mile apart. Our logging forces live at Buna, and the operating forces at Bessmay, but there is quite a little town around there, a number of stores and other establishments there; probably 2,000 people.

Mr. Cowan: Generally speaking you can give some idea. I have not any at all, and probably the Commission has not, and will want to know—what number of people does a large saw mill bring together as a community?

Mr. Kirby: Nearly any saw mill would bring together eight hundred to one thousand people, that is, as people.

Mr. Cowan: Who either live off the saw mill, or off one another?

Mr. Kirby: Yes, sir, there would not be much doing around Buna or Bessmay when the saw mill operation ceased. There are some farmers who raise stuff to trade with the saw mill people.

Mr. Cowan: Do they build their own houses?

Mr. Kirby: The saw mill company builds houses at local points. At large places like Kirbyville and Bronson and Roganville where there was a town before the saw mill was built, the residents of the town work at the mill, and they have their own homes.

6525 Mr. Cowan: Ford's Bluff you have not described.

Mr. Kirby: Ford's Bluff is a mill on the Santa Fe in Jasper County; it is a single mill, and it operates about 17 or 18 miles of narrow gauge tram road in logging. It will not do that permanently, but it is operating about that now, because the line north of the mill has not been withdrawn. We will probably operate less than that in the future, but we have been operating there about 17 or 18 miles of tram road for one little mill.

Commissioner Harlan: Is that mill on the Santa Fe?

Mr. Kirby: That mill is on the Santa Fe, and the spur line runs up the Naches River. This town is on the Naches River, and our line runs parallel to the river north, connecting almost with the Bessmay tram road.

Commissioner Harlan: Have you mentioned the Roganville mill?

Mr. Kirby: Yes, sir, I have described it.

Commissioner Harlan: And the Evadale?

Mr. Kirby: Yes, Ford's Bluff and Evadale are the same.

Mr Cowan: There are Mobile and Lyric which seem to be down on this list.

Mr. Kirby: Well, Mobile we are not operating.

6526 Mr. Cowan: Well, the plant is there.

Mr. Kirby: The plant is there. We had about 15 miles of narrow gauge. Those are the two narrow gauge, one at Ford's Bluff or Evadale, and one at Mobile.

Mr. Cowan: Where is that, please?

Mr. Kirby: It is in Tyler County, on the M. K. & T.

Mr. Cowan: And Lyric you have not described.

Mr. Kirby: That tram road was built to get ties. We have no saw mill on that railroad at all. We built a railroad out there 12 miles to get the ties for the Santa Fe.

Mr. Coleman: May I ask if Buna has another railroad.

Mr. Kirby: The Orange & Northwestern runs into Buna, Bessmay and Call.

Mr. Coleman: That is part of the Frisco line?

Mr. Kirby: That is part of the Frisco line.

Mr. Cowan: How do the conditions of the establishment of towns and the conditions with respect to farming and other production of lumber on the lines that you have described—the lines of the Kirby Lumber Company compare with the conditions on the tap lines, I will call them, serving other saw mills in that part of the state?

6527 Mr. Kirby: The conditions are substantially the same with all us lumber folks in the long leaf belt. They are substantially the same. Of course they vary in the short leaf. The character of the country, and the topography of the country changes, and the character of the logging and extent of the logging changes a little.

Mr Cowan: Does that extend along into Louisiana?

Mr. Kirby: Yes, clear up into Arkansas.

Mr. Cowan: When you say long leaf, you refer not only to Texas, but also in Louisiana?

Mr. Kirby: Yes, sir.

Mr. Cowan: You are personally familiar with the territory through this country?

Mr. Kirby: Yes.

Mr. Cowan: Varying in details, the general conditions *as* are substantially the same?

Mr. Kirby: The general conditions are substantially the same.

Mr. Cowan: The manner of logging operations and operating the saw mill and railroad to the mill are substantially the same?

Mr. Kirby: Substantially the same.

6528 Mr. Cowan: You have a statement showing the location and mileage, and the equipment and tonnage of logs, and camp supplies and operating expenses of your rail operations. Have you a statement of that kind?

Mr. Kirby: Yes, sir.

Mr. Cowan: You may file that table as an exhibit, but state the totals.

Mr. Kirby: We operate 206 miles of railroad, own 44 locomotives, 566 cars, and the approximate tonnage handled during the year ending June 30th, 1909, was 351,781 tons of forest products, and 6,277

tons of camp supplies in one form or another. The operating expenses of that 206 miles of railroad for that year was $399,683.24.

Mr. Cowan: Does that include any of the logging operations on the spurs?

Mr. Kirby: Yes.

Mr. Cowan: Is it all included?

Mr. Kirby: Yes.

Mr. Cowan: What is the proportionate cost of the logging operation on the spurs, if we estimated it say by the ton or carload, and the handling of those cars to the main line track, and the expenses of operation of the main line in pulling the logs to the mill, if you have some idea——

6529 Mr. Kirby: The main line expense should be relatively small as far as the expense goes.

Mr. Cowan: Why is that?

Mr. Kirby: Well, your main line expense involves only the maintenance, which is not much when your road is once in, and the movement of your trains over that part. That requires a very short time relatively. The time is consumed in making up your train, loading your cars, and so on, and when you run by steam you can run five or ten miles in a very short time. The expense, however, if you include interest account, would be another matter, because that would be a considerable item, your interest on the investment. But there is no interest on anything of that kind in these figures.

Mr. Cowan: That is because it is all one investment?

Mr. Kirby: Yes.

(The table so offered and identified was received in evidence, and thereupon marked Intervenor's Exhibit No. 1, Witness Kirby, January 30th, 1911, and is attached hereto.)

Mr. Walter: Will you not ask him why not, instead of suggesting to him?

Mr. Cowan: No, I believe I will decline to do that. Con-
6530 sidering the ratio of the investment in the railroad compared with the investment in the saw mill, is it or not your opinion that there would be any material difference in the cases at your mills to what would be the case with other mills if they had to have the same length of track.

Mr. Kirby: Substantially——

Mr. Garwood: Your Honor, it occurs to me that a general conclusion drawn from the entire record is one that the Commission should draw rather than counsel or the witness.

(Question read.)

Mr. Garwood: That depends upon various conditions covering a vast expanse of territory.

Commissioner Harlan: I am not sure that I understand that question, Judge Cowan.

Mr. Cowan: The point was in regard to the ratio of the expense or expenditures, perhaps it should be put, as between the saw mill and the railroad, whether in this case the ratio of investment is in his

opinion substantially the same or not with other saw mill interest where there would be a similar length of track or of railroad. In other words, he has a saw mill of a certain sort, and perhaps
6531 another lumber company has a similar saw mill and similar conditions some place else. Are there conditions in the country which would make them materially different as applicable to his mill than what they are applicable to others.

Commissioner Harlan: Do you feel you know enough about conditions elsewhere to give the Commission an opinion on that question? Have you gone over these other properties somewhat?

Mr. Kirby: Yes, there are neighboring properties down there in Louisiana. I have not been over Arkansas property to amount to anything, and all I know is what I have heard upon the witness stand here and general information.

Commissioner Harlan: I think considering the witness's wide experience he is competent to answer that question, and in substance I understand it to be whether if the conditions are substantially the same, he knows any reason why the cost of operating a railroad of like length with one of his railroads should be more at another mill than at his mill if the substantial conditions are the same.

Mr. Cowan: The cost of ownership and of operation of that part of the saw mill plant has a ratio to the cost of operating the saw mill.

6532 Mr. Garwood: I would ask that counsel's first question be read.

(Question read.)

Mr. Garwood: That question in that form I think it will be admitted, calls for the conclusion of the witness as applied to all mills everywhere regardless of the particular conditions applicable to each territory, and each mill.

Commissioner Harlan: Perhaps the question is subject to that criticism. Judge Cowan, suppose you direct the attention of the witness to his mills and other mills that he knows of where the conditions are substantially similar.

Mr. Cowan: I intended it to be confined to the part of the long leaf district where he is acquainted, and to ask whether there would be a different ratio of investment in railroads by reason of any local conditions that he knows of in his case, to what there would be in the other cases, if the length of track was similar.

Mr. Garwood. That is an entirely different question from that propounded by your Honor.

Commissioner Harlan: But we are going back to Judge Cowan's question.

Mr. Garwood: Yes. Now he asks if there should be, if I
6533 understand his question, a different ratio between the amount of the investment in the lumber railroad as compared to that investment in the milling properties with him than with some other enterprise. That, is seems to me in addition to other objections that readily occur, could not be relevant here because that is largely a matter of business judgment as to the ratio between the investments.

Commissioner Harlan: The witness may answer if he understands the question, for what it may be worth. What is your answer to the question?

Mr. Kirby: I do not know that I understand just what I am asked.

Mr. Garwood: I confess I do not either.

Mr. Kirby: But I can answer——

Commissioner Harlan: Judge Cowan will you put this question in some other form? I confess I have not grasped it, and apparently the witness has not grasped the point.

Mr. Cowan: The point to which I wish to direct his attention is the ratio of expenses for the railway part of plants and the sawmill part of plants, whether in his cases that would be fairly repre-
6534 sentative of what it would be anywhere in that district generally speaking, provided the length of the railroad was the same in each case, the ratio would be the same. Then length of railroad is not the same. We have longer railroads than anybody else, and our logging cost is higher than the average.

Mr. Cowan: I was asking about the amount of investment relatively in the railroad part of a sawmill plant and the sawmill part of it in your case compared to the relative investment of others, provided they have the same lengths of road.

Mr. Kirby: If they have the same length of road they all have the same investment, because the character of construction is substantially the same in every instance.

Mr. Cowan: The character of the country is the same, of course.

Mr. Kirby: Yes, sir.

Commissioner Harlan: You have stated if the character of the country and the length of the road and the use of it are substantially the same, the investment ought to be about the same substantially.

Mr. Kirby: Yes, sir.

Commissioner Harlan: What about the cost of operation? Do you know any reason why your road costs more or less to operate
6535 than another road doing substantially the same business, and of the same length, and in the same kind of territory?

Mr. Kirby: Our roads would cost more to operate than a road of the same length better built, but assuming that the construction cost is about the same, then the operating cost ought to be about the same. We think we are pretty economical in that line. Of course we do our best to get the work done as cheaply as possible.

Commissioner Harlan: Then to put what I first thought Judge Cowan had in mind, in my own way, suppose there are two mills substantially alike, with the same general modern devices, with the general same output, is there any reason why your investment in the railroad that is necessary to operate that mill should be any less or greater than the investment of the other mill providing the forests are the same distance from the mill.

Mr. Kirby: No reason, except sometimes there may be a physical reason; for instance, a man's timber may be beyond a creek or stream, and it would cost him considerable money to get across. There might be a physical reason of that kind, so——

6536 Commissioner Harlan: Of course, we would always understand that.

Mr. Kirby: Yes, but barring that, there is no reason why the cost should not be the same for operating both, the purchasing of the property and operating it.

Mr. Walter: We might suggest that instead of these generalizations that counsel produce here definite details as to these various matters he is asking about.

Commissioner Harlan: Well, you cannot produce details as to matters which do not lie within the absolute knowledge of the witness. He does not know the cost of other mills.

Mr. Walter: Yes, but of his own he ought to be informed.

Commissioner Harlan: Up to this time I must rule that the inquiry has been within bounds. I see nothing to strike from the record.

Mr. Walter: I am not asking that, but for further light.

Mr. Coleman: I endeavored to get a chance to say this before. It occurs to me that any question based upon a ratio of operating expenses to the mill investment should be determined. He has already stated what the operating expenses amounted to, $390,000. I think the proper way to solve the problem is to tell what the mill

6537 operations are, and then it would be a mathematical computation.

Commissioner Harlan: My attention was diverted. Will you state that again.

Mr. Coleman: The witness has stated in money the cost to operate the railroad which is an exact sum, and he is asked a question which requires him to state the ratio between the operating expenses of his railroad and mill expenses, and the operating expenses and expenses of another road and their mill expenses. He should not do that, but tell what milling expenses are, and then the question can go on.

Commissioner Harlan: Well, can you give us any figures that would enable us to test the accuracy of the statement you have just made?

Mr. Kirby: Of the mill operations?

Commissioner Harlan: Yes, you have given us on the exhibit which you had a moment ago, the cost of operating the various railroads. Now counsel suggests in order that we get an absolute basis for the judgment you have expressed, if we had in a particular case the cost of operating the mill——

Mr. Kirby: We could get to that cost. I haven't it at my

6538 finger tips. These figures——

Mr. Cowan: We will not want to put in the detailed cost of the operation of the mills. That branches, of course, immediately to the exact cost of the production of lumber and so on, which we have decided we do not want to supply.

Mr. Kirby: I would like to state in connection with this, Judge——

Mr. Coleman: And I wish to make this motion on behalf of the Santa Fe Railroad, to strike out the answer of the witness unless the ratio of the milling cost is given, and the reason for that will become obvious as we proceed in the case.

Mr. Marble: Mr. Commissioner, I do not understand that a man building a logging line out into the forests is entitled to any more or any less out of his freight rates, because his mill is a very expensive one or a cheap one, or economically managed or extravagantly managed. Now it may be that this is very relevant, but I do not perceive at the present moment what difference it makes what the ratio is.

Mr. Cowan: In order to save argument, we would have to decline to furnish the information. We have considered it.

6539 Let the matter be passed up to the Commission. If they should see fit to require it, even in that case we would only want to furnish it to the Commission. If these people want to know the exact expense of every bit of Mr. Kirby's business, we might want to learn it of the other men's business, but I do not think the lumber men here would desire and demand of one another that which would be an unfair advantage possibly, and could not be used for any valuable purpose here, as Mr. Marble has very well put it.

Mr. Garwood: It would seem to me that where the gist of the complaint in this case is a discrimination that is alleged to result from the construction and operation of railroads under a charter as common carriers, who as such are entitled to receive and do receive divisions of rates, where the intervenors and the witness complain that discriminations result as against them from those facts, that the inquiry into the cost of production, the selling price, his market, where he meets competition of others, is an unescapable field that the mind is naturally directed to, and it goes into that as the most necessary and proximate field of inquiry. If he has been excluded from a market——

Commissioner Harlan: Do you mean the mill cost is a proper inquiry here?

6540 Mr. Garwood: Yes.

Commissioner Harlan: I do not see why it should be, but I would like to have your views on the subject, Judge Garwood.

Mr. Garwood: The contention will be here that by reason of the operation of these short line roads which are also doing a common carrier business, or at least holding themselves out as such, by reason of money that they are supposed to make by the operation of the road, which if they make it goes ultimately to the pocket of the same stockholding interest, that thereby in some way, the lumber interest that also owns an interest in a railroad has an advantage in the production and sale of lumber. Now it would seem to me that you cannot escape the inquiry as to whether he is put at an advantage or disadvantage, or whether they are at an advantage or disadvantage. You cannot escape the inquiry into the cost of production and the selling price of the lumber. Why? Suppose they contend, as they must contend in order to sustain any such proposition as this, that they cannot sell as cheaply as those who are not situated as well as they are. That must be the contention; otherwise, I see no discrimination. Suppose they make that contention, and they

6541 must make it, then it certainly becomes an unescapable inquiry as to what you do sell at, and as to what the other man

sells at. If it should appear that his selling price is the one or the other, lower or higher than his competitors, it would certainly be relevant to that.

Then if he claimed that their cost of production is greater or less than his, certainly as resultant from the operations that we are inquiring into, it seems there is no way to get at any testimony that will be of the slightest benefit to Your Honors except by going into the actual cost. Now we have had opinions from almost everyone here. Why rest a case of this importance on opinions when we can get at the facts in the case?

Mr. Marble: May I be pardoned just one moment, because I think it was the thing I said which drew out the discussion from Judge Garwood. It seems to me the difficulty with Judge Garwood's view is this. He is assuming the Commission has jurisdiction over the entire field of industry. It has *not*. It is assuming that the discriminations which the Commission is set to correct are discriminations in anything affecting the marketing of products. We have no such jurisdiction. The Commission has jurisdiction to correct discriminations relating to transportation.

6542 Now then it might well be that Mr. Kirby's company bought its land at one dollar an acre, and that some other company bought its land at fifty dollars an acre, and that one must figure an income upon a small investment, and the other upon a large investment. It might be that Mr. Kirby's companies were favored in some way by the railroads, and that the other concerns were not, and you get into such a maze of indeterminable facts that nobody could tell them what the answer would be to any question. Now it may well be that the concern which pays the most for its land is the favored party in a discrimination by a railroad, an absolutely criminal discrimination, and that the concern which pays the least for its land is suffering from that discrimination, and yet through good investment it is such that it survives and crushes the favored party in the market. Now, then, this Commission is not set to correct the advantages which arise in any way except in the dealings with the railroad companies.

That brings me to my point. I do not believe the selling price of this lumber, or the cost of it at the mill is the thing which the Commission is set to correct at all, and the fact that the person

6543 discriminated against is crushed in the market is only evidence after all subject to explanation as to the way in which he suffers. If the Commission tries to cover too much ground it will succeed in covering none at all. If we have to take into consideration and undertake to correct the inequalities arising in any other way than transportation arrangements, we will spread over such a territory—I say we, through my employment by the Commission, but I should address them as an outsider—that it will succeed in getting a firm grip on nothing at all. So here, as far as I have to do with the matter, I shall argue that the Commission shall define in these cases what is transportation subject to the act, and having determined and draw a sharp line of cleavage between transportation subject to that and outside operations, then it should inquire

whether or not there is discrimination in the rates and the facilities for the transportation subject to the act and that advanages or disadvantages arising outside of that field do not concern the Commission. Now it may be that advantages under the act may arise otherwise than by divisions. I have that in mind during this discussion. There may be loans of money, contractual relationships, there may be devices by which the same result may be accom-
6544 plished for the concern which does not get divisions as for the concerns which do. Anything of that sort which arises with the transportation companies we should of course go into.

Mr. Walter: I was going to inquire whether this inquiry is to be limited to transportation companies. For example, take the investment here, in the railroad as compared with the investment in the mill, which he says bears a certain proportion; suppose the investment in the mill was made by the railroad or trunk line, are we not to look into that and see how it goes into the market? We are ready to offer anything that throws any light upon this, and there has not been anything asked but what has tended to the final result of getting to market, and we think this is one of the material questions.

Commissioner Harlan: No one has told us the cost of mill operations. That has not been asked of anyone.

Mr. Walter: But you have asked questions relating to it.

Commissioner Harlan: I think not.

Mr. Cowan: For the purpose of the record I will say first I subscribe to what Mr. Marble says with the one qualification,
6545 that in regard to the loan of money which may have been made by transportation interests, that I would have to disagree with him probably. I do not want to argue that now as it is not up. But in regard to the matter of discrimination and the matter of rates and advantages and disadvantages, I wish to say that there is nothing in the case either by questions I have propounded, by our petition, and nothing in the jurisdiction of the Commission under the Act which will enable the Commission to regulate, and therefore it would have no right to take proof to show that there was a discrimination arising out of anything except the transportation charge or some rule, regulation or practice in connection with it. And with that statement I will subscribe to what Mr. Marble has said.

Mr. Coleman: At this point, it seems to me, everybody agrees that the cost of the mill does not come into it, therefore the question asked Mr. Kirby, to compare his operating cost with his mill cost, and then compare that with his competitors, is plainly irrelevant, and I renew the motion that it be stricken out or at least; if you determine it is relevant, then we must insist on having the figures so we can figure with our lead pencils as well as Mr. Kirby.

6546 Commissioner Harlan: I think the suggestion made by Mr. Coleman is well taken, and all the evidence along this line may be stricken out except the one question, whether he knows any reason why it should cost more to operate another railroad in this same territory under like conditions than it costs him, and that is

asked this witness only as a test from one of long experience, of the figures that are already before the Commission.

Mr. Cowan: I do not think the Commission ought to exclude from this statement the actual amount that it did cost in operating expenses for operating the 206 miles of railroad.

Commissioner Harlan: No, my ruling expressly indicated that, as a test given by the actual experience of this witness of the correctness of figures, that are already in the record.

Mr. Walter: Have you figured in that the investment?

Mr. Kirby: No.

Commissioner Harlan: Just the cost of operation?

Mr. Kirby: Yes, sir.

Commissioner Harlan: Now proceed, Judge Cowan.

Mr. Cowan: The complaint of the Intervenors' petition, I wish to direct your attention to pages 2 and 3, of the intervening peti-
6547 tion, and reciting the names of certain railroads that operate in this territory, either themselves or by their connections, and transport lumber from these various tramways and saw mill industries either in hauling lumber or logs and charge therefor the regular through published rate, and allow the short lines and tramways divisions of said rate which inures to the benefit of the owners of the saw mills which said short lines and tramways serve, and to which they belong in whole or in part, which allowance or division of rates amounts to rebates, and an undue and unreasonable preference and charge in favor of the owners of the saw mills and shippers of lumber who own or are interested in the ownership and management of said short line railway serving such saw mill industries and constitute an unjust and unreasonable prejudice and disadvantage to the complainants and others similarly situated and shipping lumber under the same tariffs upon the same rates to the same and other interstate points, and who do not receive any such division or allowance out of the published rate. The effect is that complainants and others who do not enjoy such divisions and allowances are compelled to pay more for the same service in transportation of such lumber and the owners of saw mills and shippers who are the owners of and
6548 operating tap lines to receive such divisions of the rate."

Directing your attention to that allegation in the complaint, I desire to inquire with respect to the matter of divisions and how they operate, as is pleaded in the petition, to the disadvantage of those who do not get them.

Mr. Kirby: Well, those saw mill people who get divisions have the advantage to the extent of that division, whatever it may be, in getting to market. The equality of opportunity so far as transportation is concerned, is disturbed to that extent.

Commissioner Harlan: For example, or as an example, can you go into any more detail?

Mr. Kirby: Take the testimony that has been given on the stand. The Kirby Lumber Company, our rate to Chicago is 26 cents, and we pay 26 cents; and another man getting a six cent division would pay 20 cents. If a dealer in Chicago wanted to buy 100 carloads of

lumber, and often one dealer wants that much, a difference of five cents a thousand feet would make a difference of $750 on that order. Well, a difference of five cents a thousand feet is not more than three tenths of one cent per hundred pounds. Yet here is this fellow with his six cent division or his four cent division getting an ad-
6549 vantage that would not be five cents a thousand feet, but it would be $1.50 or $2.00 a thousand feet, and he is getting that out of the rate. Of course nobody objects is he can sell it for more, that is his business, and I think he should be commended; but I do not think he ought to get it out of the rate, the basis upon which all of us must figure.

Mr. Cowan: Now suppose that in all of these operations of lumber mills by means of logging roads through the sentence you used, and which generally seems to be in vogue, it was so arranged that everyone would be allowed an equal amount out of the through rate to the same point——

Mr. Kirby: That would not make any difference, that would be all right. But every miller gets to market then on the same basis. It is not a fact that one fellow pays a lower rate, that the rate is lower to the one man, and that it is higher to the other. If the rate is equal to all, it does not make any difference how much they get out of it.

Mr. Cowan: Do you think the amount of the divisions which should be allowed, if any were allowed to a railroad serving the saw mill, could in anywise be so adjusted as to be based on the cost of operation of that particular railroad?

Mr. Kirby: I do not know that I understand your question.

Mr. Cowan: Well, take a given railroad. Here is a rail-
6550 road of the Fullerton interests, we will say, down at Fullerton. Should the divisions they get be regulated by the cost of the operation of their railroad? Assume that they were entitled to a division, could it be done and equalized with somebody else, for example Mr. Crossett up in Arkansas, who may not make any money?

Mr. Kirby: Well, it is possible to do that, but I should not think it feasible; I should not think the regulating authority, which in this instance would be the Commission, would want to take up such detail as to that to base it on the profits of the operator, because they are not the operator.

Mr. Cowan: There would be such difference in the cost of operation of the different roads serving the saw mills by reason of their length and other conditions, that it would not be possible to have a division based upon the theory of paying the cost of the mill road operation.

Mr. Kirby: I should not think so at all.

Mr. Cowan: That would produce a worse inequality, if anything, than exists to-day?

Mr. Kirby: It would produce a great deal of confusion. You have no basis to figure on at all insofar as fixing the amount
6551 is concerned. If there is a division, everybody ought to get the same division, and everybody could get to market on the

same basis, but that is as to the transportation feature, and the fellow that has the high cost so far as his operation goes, timber costs or anything of that sort, that is his misfortune; it is not produced by the law, and cannot be regulated by the law I should not think.

Mr. Cowan: By an equal division if a division system should be adopted, do you mean a per cent of the rate, or so many cents per hundred pounds?

Mr. Kirby: So many cents per hundred pounds, I should think, would be a feasible method of handling it.

Mr. Coleman: May I ask Mr. Kirby, I do not quite get your answer. Do you mean that the tap lines should be handled so that every mill gets the blanket at the same rate?

Mr. Kirby: Yes, sir, that is what I mean, if any tap line division is to be allowed at all.

Mr. Coleman: That is the premise, yes.

Commissioner Harlan: How would you manage such a situation with your mill? You have one line that is 39 miles with a mill at each end. You have no haul to get to one line and 39 miles to get to the other. How would you meet such condi-
6552 tions?

Mr. Kirby: My statement was that I did not think the cost ought to be taken into consideration.

Commissioner Harlan: Of getting to the junction point?

Mr. Kirby: Of getting to the junction point.

Commissioner Harlan: Whichever road you take.

Mr. Kirby: Whichever road you take, yes, sir.

Mr. Marble: Would not that lead to the theory that if you went out from the main line to get your logs with your mill on the main line, that you ought to have the same division there?

Mr. Kirby: Any man that has got a sawmill ought to have the division, it does not make any difference how long his tram road is, whether one mile or forty, and he ought to have the same division because if his line is forty miles long, the chances are that he has overcome that disadvantage another way by buying cheaper lumber out there. But when he bought that timber he figured what it would cost to get it to transportation points, but those are conditions not created by the law, and I do not think the law can correct them. But as a transportation problem, the law can fix the condition on which we all go to market. If we are to maintain the blanket system, let us have it, but if there are to be favorites, I would like to have
6553 it figured in such a way so we could take care of ourselves if there was a way.

Mr. Cowan: Is it your opinion that the division system, considering the conditions with respect to the mill road serving them, the fact that in many instances they could not operate when the timber is gone, would it be practicable in your opinion to have equality upon any system of divisions, or do you think it is better to have the divisions all abolished and leave the blanket system of rates in effect? I am not speaking now of the legal right to abolish, but suppose there was nothing illegal in the way?

Mr. Kirby: I do not know whether it would make any difference

whether the divisions were paid or whether the divisions were withdrawn. What I contend for as a lumber man in the manufacture, and I think the principle is right, or I would not contend for it, I do not contend for it for any selfish reason of my own to get an advantage over my neighbor, but I contend for it because I think the principle is right, of equal opportunity for all insofar as the transportation feature is concerned. It is indispensable to every manufacturer, every fellow has got to go to market, he has got to use the railroad to get there. The rate to him under the blanket
6554 system is presumed to be the same, and the law forbids discriminations and favoritisms in those matters. I think we ought all to be on the same basis and paying the same rate. I am not discussing what that rate should be because I do not know, without any favoritism towards any. But insofar as manufacture is concerned, that is an economic matter that has to take care of itself all over the world. The law does not create the conditions under which we act, nor can it supply conditions that do not exist. It is a sort of doctrine of the survival of the fittest in that respect, the most capable will make money, and the incapable will fail, but certainly we ought all alike to have the opportunity to get to market on the same freight rate under the theory of industry in this country.

Mr. Cowan: Have you a statement by states of the output and sales of your mills?

Mr. Kirby: Yes.

(The statement referred to was received in evidence and thereupon marked Intervenors' Exhibit No. 2, Witness Kirby, January 30th, 1911, and the same is attached hereto.)

Mr. Cowan: I will ask you to read enough to illustrate some of summaries by months and by states. You might read the
6555 summary to show where the lumber goes to different states.

Mr. Kirby: This information was asked by Judge Garwood, and this paper was prepared in accordance with that request. This statement shows the states into which we have shipped lumber. It is the lumber delivery, the lumber that moved out of the mill from January, 1910 to November, 1910, both inclusive. We shipped into Colorado, Illinois, Indiana, Iowa, Kansas, Michigan, Nebraska, New Mexico, New York, Ohio, Oklahoma, South Dakota, Texas, Wisconsin, Mexico and then there are some export, and Pennsylvania, Massachusetts, Tennessee, a little bit to Minnesota, a little bit to Canada.

Mr. Cowan: Give the number of cars to each state.

Commissioner Harlan: Take a given month.

Mr. Kirby: The total cars are out here in this column for the eleven months.

Commissioner Harlan: Very well.

Mr. Cowan: Take the whole eleven months and read the total number to each state.

Mr. Kirby: Colorado 23 cars; Illinois, 910 cars; Indiana, 439 cars; Iowa, 569 cars; Kansas, 1860 cars; Michigan, 317 cars;
6556 Missouri, 750 cars; Nebraska, 702 cars; New Mexico, 112 cars; New York, 64 cars; Ohio, 251 cars; Oklahoma, 1257 cars;

South Dakota. 72 cars; Texas, 2,933 cars; Wisconsin, 124 cars; Mexico, 23 cars; export shipments 546 cars; Pennsylvania, 54 cars; Massachusetts, 103 cars; Tennessee, 24 cars; Louisiana, 2 cars; Minnesota, 14 cars; Canada, 3 cars; Wyoming, 1 car; Maine, 2 cars.

Mr. Cowan: Does that pretty well represent generally the range and ratio of sales of lumber?

Mr. Kirby: Yes, sir; sometimes we sell more in one locality, and sometimes less. The quantity and the localities change, this is fairly representative of the area which it is distributed over.

Mr. Wood: Would you mind having him read the total number of cars. It is a matter of computation, but I have not the details.

Mr. Kirby: 11,781.

Mr. Wood: For what period is that?

Mr. Kirby: Eleven months, beginning January 1st and ending November 30th, 1910.

Mr. Cowan: Have you got a statement that shows the amount of material sold to the Santa Fe?

6557 Mr. Kirby: Yes, sir. You mean the stuff shipped by the Santa Fe or to the Santa Fe?

Mr. Cowan: Shipped by the Santa Fe is what I mean.

Mr. Kirby: Yes, I have a statement there. That is a number of these same cars, but if they are not all accounted for, probably that is the export business.

"Statement of carload shipments of lumber made by the Kirby Lumber Company from mills on the Santa Fe Line in Texas, and percentage showing proportion destined Santa Fe system points and points beyond." That is the statement?

Mr. Cowan: Yes. That is the output by the different mills you own?

Mr. Kirby: Yes, sir, from January 1st 1910, to November 30th, 1910, inclusive.

Mr. Cowan: Now read the substance of that statement; the summary will do, I guess.

Mr. Kirby: The total shipments were 11,133 cars.

Mr. Cowan: How many on the Santa Fe—I mean to Santa Fe points?

Mr. Kirby: 3,821 went to Santa Fe points, and 7,312 cars to points beyond.

Mr. Cowan: And what percentages?

6558 Mr. Kirby: The percentage to Santa eF points was 34, and the percentage beyond was 66. Of that 34 per cent, that is the lumber that stopped on Santa Fe rails, probably 50 per cent or more than that went to competitive points on the Santa Fe.

Mr. Cowan: Would not practically all large consuming points like Chicago, Kansas City, St. Jo——

Mr. Kirby: They are all competitors.

Mr. Cowan: Do they not consume by far the largest amount of the lumber?

Mr. Kirby: Yes. It is a very liberal estimate to say 50 per cent of this stopped at local points; probably not 20 per cent did.

Mr. Garwood: You have no separate estimates as to what goes to local points?

Mr. Kirby: No; we did not have an opportunity to make that up.

Mr. Garwood: Could that be done without great trouble?

Commissioner Harlan: Local Santa Fe points you mean?

Mr. Garwood: Yes.

Mr. Kirby: The Santa Fe might have it.

Mr. Cowan: We will file the statement he has just referred
6559 to.

Commissioner Harlan: Do I understand you cannot get that information?

Mr. Kirby: We could pick it out in time, but we have not had time to do it.

Commissioner Harlan: Would it be too much trouble to do that for us?

Mr. Kirby: We will try to get it if the Commission asks for it.

Mr. Cowan: Mr. Hancock's statement is that we would have to pick out the expense bills on the 11,000 cars.

Mr. Hancock: We would have to pick out those expense bills and some of those are gone. We can do it, but we cannot do it in a day.

Commissioner Harlan: Perhaps you could indicate a month or two which would be typical for lumber shipments, and that might meet your desire.

Mr. Garwood: Can we have—what would be a typical heavy and light month?

Mr. Kirby: The average is the same; they do not vary ten per cent.

Mr. Garwood: Take any two typical months.

6560 Mr. Kirby: You name the months.

Commissioner Harlan: You suggest some particular months.

Mr. Garwood: Take the first three months of last year.

Mr. Hancock: Can you make it two? It would be a whole lot less work.

Commissioner Harlan: Take January and March of 1910.

(The paper referred to was received in evidence, and thereupon marked Intervenor's Exhibit No. 3, Witness Kirby, January 30th, 1911, and the same is attached hereto.)

Mr. Cowan: You have a statement to show the total of all shipments covering the period from 1904 to November, 1910, and the amount of freight charges?

Mr. Kirby: Yes, sir.

Mr. Cowan: We will offer that as an exhibit.

(The paper so offered and identified was received in evidence, and thereupon marked Intervenor's Exhibit No. 5, Witness Kirby, January 30th, 1911, and the same is attached hereto).

Mr. Cowan: You may read that pretty largely into the record.

Mr. Kirby: Total number of cars shipped from 1904 to November 30th, 1910, inclusive, was 118,978 cars. Freight charges
6561 paid $8,896,306.79. Average per car $89.46. That is what we paid on commercial lumber only shipped by us for that

period. There was a lot of other lumber sold f. o. b. in the mills to the railroads and others, and the freight rate is not figured on.

Mr. Hancock: 19,534 cars in that total sold f. o. b. the mills, that is not figured on the average freight charge?

Mr. Kirby: Yes.

Mr. Hancock: The total number of cars upon which the freight charges were paid was 99,444.

Mr. Cowan: The freight rates have been the same from each blanket point during this period, have they not?

Mr. Kirby: Yes, sir.

Mr. Cowan: There have been no changes?

Mr. Kirby: Well, yes, there have been some little changes, but the blanket system has been maintained substantially.

Mr. Coleman: I would like to inquire the purpose of this. What light it sheds on the question, the amount of money paid by the lumber company in the past seven years. I confess I cannot see how that helps us here.

Commissioner Harlan: I do not understand that counsel objects to that testimony. If he does, I must overrule it. I think it
6562 bears a general relation to the question. It shows the extent of the business of this company, and affords a basis for some examination of the effect of the non-allowance of divisions to this Commission. That is one suggestion that may arise on this exhibit.

Mr. Coleman: There is no objection, if that is the understanding, but wherever a rate is involved I think we should know whenever changes in the rates have taken place, and that revenue should not be testified on any general rate where it has been changed.

6563 Mr. Cowan: Now you speak of the blanket system being necessary. Suppose the blanket system should be destroyed, and a mileage basis of rates established, what would be the result in the marketing of lumber in the various states and various points; what would be the change in the commercial side of the proposition?

Mr. Kirby: Of course the fellow nearest the market would have an advantage and a very substantial one; it would depend upon the amount of the rate, of course. He would have the advantage to the extent of his shorter mileage. I expect my mills would be ideally located; that is my judgment of the situation. The State of Texas alone consumes about as much lumber as she makes. Of course we would have the short mileage, and we would have an advantage in most sections of the State over Arkansas or Louisiana, our competitors.

Mr. Cowan: When you say "she consumes as much as she makes," you mean she consumes an amount in the aggregate equal to the output of Texas mills?

Mr. Kirby: Yes, she consumes the largest amount from Louisiana and Arkansas, but the quantity is about the same.

Mr. Cowan: Do you have in mind the amount of interstate lumber shipped into Texas, as shown from the Texas Commis-
6564 sion's annual report?

Mr. Kirby: No.

Mr. Cowan: At this point we will ask if counsel will not all con-

cede that we may use the statistical tables in the annual report of the Commission of Texas and their figures as to the amount of state and interstate traffic.

Mr. Garwood: I think that is understood, that it is to be used.

Commissioner Harlan: There being no objection, that will be understood.

Mr. Cowan: Do you remember to have observed the percentage of the lumber into Texas interstate as compared with intrastate?

Mr. Kirby: No, I do not recall.

Mr. Cowan: As a business man and acquainted with the industry, what is your opinion with respect to whether the Texas mills supply a majority of the lumber sold in Texas or whether they do not.

Mr. Kirby: They do not. Our concern is the largest in the state, and we do not make, of course, half as much as the state consumes, yet we do not sell over twenty-five per cent of our product in Texas.

6565 Mr. Cowan: What I meant was, if in your opinion the total consumption of Texas is supplied mostly from the state or outside points.

Mr. Kirby: From Louisiana.

Mr. Cowan: And your answer is Louisiana.

Mr. Kirby: Yes, sir. Of course Arkansas ships quite a lot in there.

Mr. Cowan: Are rates of freight from Louisiana through to Texas consuming points the same as from the Texas producing points to consuming points in Texas?

Mr. Kirby: Well, they are substantially the same. Of course we have sort of a mileage basis in Texas; not exactly a mileage basis, but the rates nearer the forest are a little lower. For instance, Houston has one rate and Galveston has one rate. That is water competition in there. San Antonio has another rate. San Antonio, Dallas and Fort Worth are common point territory and are all in the blanket system. But the mills situated near Houston have a little advantage in getting in there.

Mr. Cowan: And by the term common point territory, do you mean common point territory as to lumber and not the general transportation conditions?

6566 Mr. Kirby: No, we have general common point tariffs on lumber.

Mr. Cowan: So you mean you can ship from any point in Louisiana to Fort Worth on the general rate of 18¾ cents, and that is what you would pay from your mill to Fort Worth?

Mr. Kirby: Yes, sir; the rates are all the same to consuming points in Louisiana.

Mr. Cowan: If your Honor please, we have a few more questions. I had a long list to run over, but I want to have the opportunity of going over it during the recess. I think it will economize the time if we could adjourn at this point.

Whereupon, at 12.25 P. M., a recess was taken until 2.00 P. M.

6567 After Recess.

2:00 P. M.

Mr. Garwood: I have a telegram from Mr. S. P. Kennedy, Secretary of the Alabama Commission, to this effect:

"MONTGOMERY, ALA., *Jan.* 30, '11.

Mr. H. M. Garwood, Auditorium Annex:

What is known as tap lines in this state are largely and very nearly without exception common carriers in the strictest sense of the word in that in addition to their development of the lumber interests of this state they are aiding in the agricultural development and they are under the jurisdiction of this commission as intrastate carriers; this being true this commission thinks that it is nothing but equity that they should participate in through rates as common carriers; that is to say, all lines that are fulfilling the duties of common carriers kindly make known to the interstate commerce Commission the attitude of this commission.

S. P. KENNEDY, *Secretary.*"

And in accordance with his request I present the telegram
6568 and ask that it be made a part of the record. Now as to whether they desire leave to formally intervene in this case, this telegram does not state. I assume that you will be further advised.

Commissioner Harlan: The telegram will be received.

Mr. Cowan: Not to make an objection, but I would like to know if it be received that it be received on this condition that the member of the Alabama Commission sending that telegram come forward, as did the gentlemen from Louisiana and Arkansas to tell us the reason. We would like to have that, if such telegram is to be received as a matter of opinion, for the purpose of cross examination.

Commissioner Harlan: It has been the purpose of the examination to confine it as largely as it may to the conditions of the tap lines west of the river. Our understanding is that very few relatively of the tap lines east of the river are receiving allowances, and we will assume that whatever disposition will be made in this case will be controlling east of the river, without the necessity of another record, if the deposition is of a general nature. And if it is of a special nature, then we will take up the conditions east of
6569 the river. For what it is worth, and what bearing it may have, the telegram may be filed.

(The telegram above referred to was marked "Filed.")

J. H. KIRBY was recalled as a witness, and having been previously sworn, testified as follows:

Mr. Cowan: What is the size of the town of Kirbyville?

Mr. Kirby: I think about 3,000 people.

Mr. Cowan: What industries are there there, apart from the saw mill industry, from which people can obtain a means of living?

Mr. Kirby: The main industry at Kirbyville and in fact the only

industry there, is the saw mill and the things incident or contingent on or supported by the saw mill. There is a bottling works and perhaps some few smaller things like that, a lot of stores and a couple of banks and a pretty good school.

Mr. Cowan: How can the people gather sustenance for the purpose of supporting these institutions you have just mentioned, except through the operation of the saw mill industry at that point?

Mr. Kirby: A very large percentage of the population of all the saw milling territory is supported directly or indirectly by
6570 the saw milling industry. The agricultural interests of that section are small relatively, and it is so in all saw milling territory; the agricultural interest is relatively small.

Mr. Cowan: To what extent is that dependent upon the sales, directly or indirectly to those who are operating the saw mill industry?

Mr. Kirby: It is very largely dependent. It is their local market for everything except cotton. Of course where they produce cotton they send it elsewhere. That is not marketed locally. But their sugar cane and corn and cabbages and peanuts and tomatoes and watermelons and all that sort of thing are marketed locally to the mill people, or those living directly or indirectly out of the milling industry.

Mr. Cowan: Taking Kirbyville as an illustration, supposing the Kirby mill were destroyed, and the railroad could not operate, assuming that the timber should take fire and burn and destroy the timber in the country tomorrow, what would necessarily become of the town of Kirbyville?

Mr. Kirby: Well, it would have to hunt a new location, if the men were employed, because there is no employment for them, or nothing to sustain them.

6571 Mr. Cowan: How many people are employed at your mills of a certain standard; say, a double mill or single mill?

Mr. Kirby: In a single mill it requires in the operating department, that is, the logging and manufacturing, about 225 people, and a double mill, depending upon its capacity. Our best mill would require about 600 men, and our Call mill about 500 men.

Mr. Cowan: What do you figure the population?

Mr. Kirby: It is usually about four to one, I think.

Mr. Cowan: That is, the direct employees?

Mr. Kirby: Direct employees, are, as I have named, about 225 for a single mill and about 500 for a double mill.

Mr. Cowan: And about four to one; that is, for the families, however, of the particular ones employed?

Mr. Kirby: Yes.

Mr. Cowan: Then come the doctors, school teachers and dentists?

Mr. Kirby: Well, there are not many of those. There are a few, but there are a lot of industries conducted at all these points, markets where fresh meats and other things of that kind are sold, and ice cream parlors and things for the entertainment of the
6572 people and their doctors and dentists and preachers, school teachers and all kinds of people necessary to make up a community.

Mr. Cowan: The reason I am asking these questions it has been testified several times in this case that by the construction and operation of these tap lines as common carriers they develop certain things in the community, and they have maintained all those things. My general question is whether or not the development is precisely the same, whether it is a common carrier or not, and results primarily from the saw mill industry.

Mr. Kirby: That is my judgment. It makes no difference whether it is a carrier or is not.

Mr. Cowan: How many men do you work altogether?

Mr. Kirby: In all the departments, including our hewn tie and piling department, and including the employees of sub-contractors, between 6,000 and 6,500 men.

Mr. Cowan: And that is the operation of the thirteen mills, is it?

Mr. Kirby: Yes, sir. Well, there are two mills not in operation now, but that is it substantially.

Mr. Cowan: And 200 miles of railroad is main line or main line and spurs?

6573 Mr. Kirby: It includes both, and then there are a lot of rails that may be laid today and up tomorrow.

Mr. Cowan: Does this 200 miles——

Mr. Kirby: There is 206 miles in operation all the time.

Mr. Cowan: Independent of the rails which you may have put down in other places?

Mr. Kirby: Yes, sir, independent of the rails we might have unlaid, or which may be laid today and up tomorrow.

Mr. Cowan: Do you have your locomotives equipped with air brakes?

Mr. Kirby: Some of them; most of them.

Mr. Cowan: What is your situation with respect to liabilities for injuries and the like to people?

Mr. Kirby: Our liability, I am advised, is substantially the same as a carrier, as a trunk line or any other line.

Mr. Cowan: In practical effect?

Mr. Kirby: In practical effect. We used to think down there that there was no liability for injuries resulting in death, but our Supreme Court whacked us one on that, and we recently had to pay a death claim of some $20,000.

Mr. Cowan: In regard to stock killed on the track, and the like, you spoke a while ago——

6574 Mr. Kirby: The same liability as a carrier, except this that where a railroad proper does not fence its right of way they cannot be heard to make any defense against any stock killing they may make, because that is prima facie negligence.

Commissioner Harlan: We mean under the laws of that state?

Mr. Kirby: Under the laws of Texas.

Mr. Cowan: There are a good many questions along that line that I might ask, but I will forego them, and you may take the witness.

Cross-examination:

Mr. Garwood: From your statement this morning I do not understand that you contend that you have been shut out of any market or that those whom you call your competitors have under sold you in any particular market by reason of any supposed divisions that the owning interests of the railroad serving those competitors may have received. You do not make that contention in this case?

Mr. Kirby: Well, I do not know about being shut out of any market. We get into market. We do not get in on the same basis that they do, where they have a lower rate.

Mr. Garwood: You do not contend in this case that you have been shut out of any consuming territory which may be
6575 served and is served by your competitors by reason of those divisions?

Mr. Kirby: I am shut out in so far as the same rate is concerned. I am not shut out entirely, because I might be willing to go there at a loss to market my stuff.

Mr. Garwood: You either do not apprehend the question or the answer does not reach the question. You do not contend that there is any lumber market from which you are shut out by reason of the fact that any competitor of yours is owned by the same interest that owns a short line.

Mr. Kirby: There are some localities where that might be true.

Mr. Garwood: Well, do you contend then that that is true?

Mr. Kirby: Well, I might give you a concrete example. At Galveston, for example, we cannot sell any lumber in Galveston because the Long-Bell Company gets divisions, and they can go to Galveston at a two cent rate against our eight cent rate. That is sufficient to keep us out of Galveston. But we might overcome the two cents or four cent division, but a six cent division could not be successfully overcome, consistent with any profit at all in the business.

Mr. Garwood: I understand you contend then, that Gal-
6576 veston is one market. Is that a large consuming market of lumber?

Mr. Kirby: Not very large. There was a large piece of work going on there recently, where we came in contact with that situation. I do not know now who sold the lumber. I did at the time. That was in the causeway construction.

Mr. Garwood: That is an intrastate market, and is not considered by lumbermen a large consuming market at any time?

Mr. Kirby: Well, it is not a very large city; it is not a large market relatively.

Mr. Garwood: It is not a distributing point in any sense, is it?

Mr. Kirby: No, not of lumber. All the lumber that goes to Galveston is for local use; that is the market I speak of. I speak of it in that sense.

Mr. Garwood: Is there any territory now that you can name from which you, as a producer of lumber, have been kept out by reason

of any division of a rate given to a short line road, the substantial interest in which is owned by a lumber company?

Mr. Kirby: There is not any market where we have
6577 actually been kept out, but I have not gone to market on the same rates, if that is what you mean, because——

Mr. Garwood: That is a matter of argument which I wish to avoid, as far as possible. The Commission, I think, has indicated a preference to hear the argument at the end of the investigation.

Mr. Kirby: I do not intend to make an argument, but I want to answer your questions intelligently.

Mr. Garwood: No, I do not mean that. I mean I did not want to argue the question with you myself. If you can, just state that as a——

Mr. Kirby: I do not know of any market where we have been absolutely shut out. We have rates to all markets, and go to all of them, but we do not go to them on the same basis as our competitors who get tap line divisions.

Mr. Garwood: So you reach all of the great lumber consuming markets?

Mr. Kirby: Yes, and less lumber consuming markets. We have rates to substantially all markets.

Mr. Garwood: You reach all markets?

Mr. Kirby: Yes.

Mr. Garwood: And they are all open to you?

6578 Mr. Kirby: Yes, sir.

Commissioner Harlan: Let me put just one question. Do you know of any market in this country that is supplied by competitors that get allowances and where you——

Mr. Kirby: Exclusively?

Commissioner Harlan: Exclusively. Of course you have rates there, that is, rates are published which you could use, but as a matter of fact, is there any market in this country supplied by your competitors to your exclusion?

Mr. Kirby: Well, there may be some, but I do not recall them just for the moment. There are localities where we do not sell any goods, but whether that is because of the rate——

Commissioner Harlan: Where goods are sold by others?

Mr. Kirby: Yes, sir.

Commissioner Harlan: That is the point I want to get at.

Mr. Kirby: I had not looked up that piece of information so as to make myself intelligent on that subject, but of course we do not sell everywhere, but we have rates to all points. Just to what extent rates to these particular points keep us from selling in that particular territory I am not prepared now to say.

6579 Mr. Garwood: At any rate the territory of which the Commissioner inquired has not been of sufficient importance to impress itself on your mind?

Mr. Kirby: It might have been very important, but I do not handle the sales department personally.

Mr. Garwood: I do not understand, either, that you contend that you have been undersold in the market by any of the mills, sub-

stantial interests, which also own short line railroads in various parts of the country. You do not make that contention, either, do you?

Mr. Kirby: I am undersold every day; otherwise I would have all the business to the extent of my ability to supply it.

Mr. Garwood: That is a matter of general competition?

Mr. Kirby: Yes.

Mr. Garwood: You all compete with each other vigorously, I understand, everywhere?

Mr. Kirby: Yes, sir.

Mr. Garwood: All the lumber men do that in all territory, wherever they can get a chance at each other, I understand that.

Mr. Kirby. Yes.

6580 Mr. Garwood: But the question is, are you substantially undersold, or do you contend that you are substantially undersold in any market by any of the interests that also own interests in short lines?

Mr. Kirby: All the time; every day.

Mr. Garwood: Can you name the places and times?

Mr. Kirby: I can gather you many instances. I have not got them at my finger tips just now. You go into any market in Texas; you go in any market in any part of the country where a tap liner enjoying a fat division is your competitor, he undersells you. He is able to do so, and if he is getting $1.50 and I am getting nothing, he can sell his lumber for ten cents lower than I can, and that takes the business. He has therefore made $1.40 more than I would have made had I sold the same bill, by reason of his tap line refund.

Mr. Garwood: You are also undersold occasionally and in the ordinary stress of business competition by mills who are not, as you term them, tap liners?

Mr. Kirby: That is true.

Mr. Garwood: That is a fact?

Mr. Kirby: That is true.

Mr. Garwood: Now, can you indicate to the Commission

6581 any substantial and continuous underselling as against your interests in any market by those lumber interests that also own an interest in these so-called short line roads?

Mr. Kirby: I think it is done every day. I doubt if there is a transaction in the whole country that does not involve that principle, and so to mention any one sale——

Mr. Garwood: That is a matter of opinion——

Mr. Kirby: It is not a matter of opinion. And——

Mr. Garwood: And I think we are endeavoring to get this to a question of fact as much as possible. Can you indicate, Mr. Kirby, any places or any mills where as a continued line of business, not a mere sporadic or occasional undersale, but where there is a substantial and continual underselling as against you or any interest that is also interested in short line railroads?

Mr. Kirby: I can give you any number of instances from our salesmen and from our sales managers——

Mr. Garwood: Can you mention any of them?

Mr. Kirby: But I never sold a car of lumber in my life, and so I cannot——

Mr. Garwood: Well, you of course are familiar in a general way with your business transactions?

6582 Mr. Kirby: Yes.

Mr. Garwood: Now, can you indicate any territory or any place where there is a continuous underselling as against your interest upon the part of any interest that is connected by ownership or otherwise with these short line railroads? I mean, so substantial and continuous as would indicate to your mind a continued line of policy? In other words, Mr. Kirby, I wish to separate that from such sporadic cases of competition where all of you go in and bid and one under-bids the other.

Mr. Kirby: The practice is so universal that you cannot mention an exception. I cannot mention an exception to the rule you have laid down. It applies in every sale, every sale.

Mr. Garwood: You are not, then, able to indicate to the Commission any particular place, time or territory?

Mr. Kirby: I cannot indicate from any information I have in hand here where our lumber went last month or the month before, or any other time, but every car of lumber in this list that I read over this morning, is sold on that basis in competition with the follow who gets to market at a lower price.

6583 Mr. Garwood: We understand the general proposition, of course. You all compete wherever you can. Now, you are not able to give any particular instances of that character. I will now ask you, since you say you are undersold, of course everybody else is occasionally undersold too, is he not?

Mr. Kirby: I presume he is, because these tap liners are competing with each other, as well as the rest of us.

Mr. Garwood: You are all competing; I understand that. I am now asking you if you can state to the Commission what you have received, say, during the past twelve months, as an average per thousand feet board measure for your product?

Mr. Andrews: Now, if the Commission please, we object to the question of what he received for the market price of his lumber, on the same grounds that we objected this morning upon the query of what it cost him in the mill to make it; that what he sells it for might prove nothing unless every other mill had its sales prices to lay down here before us.

Commissioner Harlan: I must confess I do not see the relevancy of this line of inquiry. Let me make this suggestion. Do you propose to argue as a matter of law, that if Mr. Kirby or similar interests are able, through better advantages or closer attention

6584 to business to absorb this difference in rates, that then there is no discrimination resulting from the divisions that are allowed to some and denied to him?

Mr. Garwood: I will state this, your Honor, and we wish it to go into the record, and go in as accurately as possible. I did not understand from the contention of Mr. Kirby this morning, that he made any contention that he was shut out of any market by reason

of these supposed allowances. I did not understand from his position this morning that he made any contention that he was forced to sell his product in order to sustain himself, at a lower price than he otherwise would have done, in order to meet this competition. The answers which he has now given, your Honor knows. Now he has gone this morning under the interrogation of his own counsel, largely into the question of his cost of operations.

Commissioner Harlan: Cost of operations of the railroad only?

Mr. Garwood: Yes, and of the whole plant, including his logging spurs, all of them, and he has been asked the general questions as to comparisons of these with other territories. He now advances the claim that he has been discriminated against. Now, as a
6585 matter of primary inquiry, I should have been disposed to agree largely with the position taken by Mr. Marble this morning, that the inquiry should have been limited at its inception to the proposition as to each particular carrier. But we have gone beyond that, and this branch of the inquiry is as to whether there is actually a discrimination against one situated as Mr. Kirby: Now, if we can show from Mr. Kirby himself, as I think we have shown so far as he has gone, at the outset, that there is no market in the United States from which he is eliminated; if we can show by him that he has ever been compelled to sell below these competitors in order to maintain the business, these very [illegible] which are connected with short line roads, I submit that there can be no question, if that may be a fact, that this is a matter of inquiry; I do not state that it will be shown or that it will not be shown; but we are inquiring as to whether it can be shown. If it should be shown that he is eliminated from no market, that he is not compelled to sell at any lesser price in order to maintain his markets, than his competitors, does not that bear directly and forcibly and with the most powerful probative force upon the proposition that as a competitive proposition and as a proposition of discrimination that he has no
6586 standing in the Commission. In other words, was there ever a case of discrimination that does not involve the question whether the man who claims to be discriminated against cannot get to the market as favorably as the man who it is alleged has the unfavorable discrimination, as against him? And I submit——

Commissioner Harlan: I understand your point fully, and I must sustain the objection to the inquiry. It seems to me you are dealing with the whole range of the business of the Kirby Company in ascertaining from the standpoint of the operation of their mills, their investment and everything else, they are able to get into the market and successfully compete with others. The inquiry before the Commission is whether there is a discrimination in the rates that these people have to pay.

Mr. Garwood: Yes, sir, and it has been permitted here to show in a general way that there is a discrimination. Doubtless Mr. Kirby thinks so, but that is a conclusion both of law and fact. Now, I urge this, because, speaking with all sincerity and candor——

Commissioner Harlan: Counsel always does, I know.

Mr. Garwood: I try to always. I cannot see how it is possible in

any tribunal to determine whether a man has been discrimi-
6587 nated against without we get the facts upon which discrimination can or cannot be proved. Now, it occurs to me that there ought not to be any disagreement between the court and myself upon that proposition.

Commissioner Harlan: I think there ought not, Judge Garwood, either——

Mr. Garwood: And so much so that in answer to the suggestion made by Mr. Cowan that it would involve the comparison of his prices with the prices of those who have interests by stock ownership or otherwise in the affairs of the lines that have been under investigation; now I wish to say to counsel that we are prepared to meet that very issue and prepared with the facts, and so much do we feel that we are entitled to this information—and I must confess that it never occurred to me that it, being such a necessary consequence in this inquiry—it never occurred to me for a moment that there would be objection upon the part of counsel that this should be inquired into——

Mr. Cowan: I would like to ask Mr. Garwood a question, if he will permit me at this point.

Mr. Garwood: I have no objection to your asking it, but whether I will answer, is another proposition.

6588 Mr. Cowan: If he does not know from the very start at New Orleans that we would object to going into the private business of any particular company, and that that same objection was being offered by others, and we consented there, as shown by the record, that we had no right to go into the private business of any concern in the matter.

Commissioner Harlan: I must insist upon the ruling. The objection is sustained.

Mr. Garwood: We wish to have it in the record so that we may avail ourselves of it and get our several questions in the record.

Commissioner Harlan: Very well.

Mr. Garwood: And that upon objection of counsel, or whether of counsel or upon objection by your Honor, the question was not permitted.

Commissioner Harlan: To that particular question I have already ruled that the objection to it is sustained. If you have some other questions, you may propound them.

Mr. Garwood: And the question which is not permitted to be answered is as to his average selling price for the year ending June 30, 1910 of all his lumber products sold.

Mr. Marble: At what point? At the mill?

6589 Mr. Garwood: At the mill.

Commissioner Harlan: I understand the objection is made and it is sustained. Have you some further questions, Judge Garwood?

Mr. Garwood: I will put it the calendar year instead of the fiscal year ending June 30, 1910.

Commissioner Harlan: Very well, the question will be so understood.

Mr. Garwood: We now repeat that question as to the several grades of lumber, B and better, No. 1, common, No. 2 common, and it goes down to 4, does it not?

Mr. Kirby: Yes.

Mr. Garwood: No. 3 and No. 4. We ask that those questions be incorporated in the record, and upon objection, the witness is not permitted to answer.

Commissioner Harlan: Your objection extends to those questions?

Mr. Cowan: Yes.

Commissioner Harlan: The objection is sustained.

Mr. Garwood: I wish to state in that connection, your Honor, that we will be prepared to prove upon the part of those interests which, as shown by this record, by stock ownership or other-
6590 wise, also own interests in the so-called short line roads, their average selling price for the same period——

Mr. Cowan: We do not object to that. We admit that now, as far as that is concerned.

Mr. Garwood: Certainly they will not object, but it only becomes material in the event the Commission permits the inquiry here. In connection with this testimony we are prepared to prove for the several interests involved, their average selling prices for the same material covering the same period of time, and will be prepared to prove that they have not undersold Mr. Kirby or the Kirby Lumber Company in the market.

Commissioner Harlan: Very well, is that all?

Mr. Cowan: We will not object to it when he offers it, and I would like to know why they have not offered it heretofore. They have been all here.

Mr. Garwood: The Commission understands why I couple the two things together.

Commissioner Harlan: Yes. Counsel stands ready to offer that testimony, I suppose not in behalf of all the tap lines.

Mr. Garwood: No, the substantial interests.

6591 Commissioner Harlan: Very well; the record will show it.

Mr. Cowan: I do not think the record should show that he offers it, because if he offers it and it is material——

Commissioner Harlan: We will not stop on it. Counsel has made the offer in good faith, and we will understand that he stands ready on behalf of a substantial number of tap lines represented in this inquiry to offer such testimony if the inquiry which he has been making of this witness had been allowed to proceed.

Mr. Garwood: Yes.

Mr. Coleman: Do I understand that relates to cost at the mill, or the selling price?

Mr. Garwood: We have not got to the cost. That is selling price.

Commissioner Harlan: The selling price in the general market.

Mr. Garwood: I intended to include in that statement, I am not sure whether I did or not, that the prices of the Kirby Lumber Company, the average sale prices, were less than the interests to which I have referred.

Commissioner Harlan: You mean your offer embraces testimony tending to so prove?

6592 Mr. Garwood: Yes.

Mr. Marble: Are those prices at the mill again?

Mr. Garwood: Yes, sir, at the mill.

Mr. Cowan: I think if your Honor please, Mr. Garwood is slipping up on the Commission here. I want to call attention to it. Mr. Kirby has testified he has been undersold. These gentlemen say they propose and would be prepared to prove that that is not so, if you permit him to prove by Mr. Kirby what his average prices are. I say Mr. Kirby has already testified that he is undersold, and in answer to Mr. Garwood. If he wants to prove that is not true, then put witnesses on to do it, and I undertake to submit that I would do it if the record is permitted. That is a different thing to stating the average price, the fact of being undersold has no relation to what the price was. It may have been 15, 20, 30 or 40 cents——

Commissioner Harlan: I do not understand that Judge Garwood offers to prove that Mr. Kirby was not undersold, but that the facts in his possession of the price in the market of other lumber, and also the information in his possession as to the Kirby prices, leaving the Commission to ascertain whether there was any underselling on that testimony or not.

6593 Mr. Cowan: I am taking what he said and putting in the record the proposition that he proposes to prove that, and I do not think it should go in the record.

Mr. Coleman: Do I understand that Judge Garwood offers to prove that Mr. Kirby's selling price at the mill is necessarily lower than the price of his competitors?

Mr. Garwood: Not necessarily lower, no.

Mr. Coleman: Or was lower?

Mr. Garwood: That it was lower.

Mr. Coleman: And that relates to the price he makes, and not the price he sells it for?

Commissioner Harlan: Your language is wrong. Mr. Garwood has not offered to prove anything, but simply to offer testimony tending to sustain the facts he has indicated might be sustained by such testimony.

Mr. Cowan: And that on the sole condition if Mr. Kirby had been permitted to testify as to the average price of lumber. We are getting into an interminable mix-up in the record.

Commissioner Harlan: That clearly appears. Will you proceed, Judge Garwood?

Mr. Garwood: I will now ask the witness what is his average cost of production for the calendar year ending December 31st

6594 on all classes of lumber mentioned in the prior interrogatory.

Mr. Andrews: And we object.

Commissioner Harlan: The objection is sustained.

Mr. Garwood: I would like to ask in that connection this question of the witness: Has he any personal objection to answering those questions?

Commissioner Harlan: Well, I do not think that is proper, to

produce a situation between the witness and his counsel. The question is overruled.

Mr. Garwood: We now ask the same question as applied to each grade of lumber as mentioned in the prior interrogatory.

Mr. Andrews: Same objection.

Commissioner Harlan: Objection sustained.

Mr. Garwood: We except to the rulings, so that we may lay a predicate, if it should be thought material and advisable, in view of further testimony adduced, to ask the ruling of the Commission that it be furnished.

Commissioner Harlan: Very well, the record will show the exception to the ruling.

Mr. Garwood: You stated in your examination this morning Mr. Kirby, that you built the Beaumont, Kansas City & Great
6595 Northern?

Mr. Kirby: Well, you have got the name wrong.

Mr. Garwood: The Gulf, Beaumont & Kansas City?

Mr. Kirby: Yes, sir.

Mr. Garwood: There is another railroad up there that I always confuse with it.

Mr. Kirby: Yes, sir; I built it.

Mr. Garwood: You sold that to the Gulf, Colorado & Santa Fe?

Mr. Kirby: Well, or the Atchison.

Mr. Garwood: The substantial interests; that or the Atchison?

Mr. Kirby: Yes.

Mr. Garwood: About what time was that sale made?

Mr. Kirby: June, 1900.

Mr. Garwood: Did you construct another railroad in that locality, the Gulf, Beaumont & Great Northern, or the Beaumont & Great Northern?

Mr. Kirby: That was an extension of the Gulf, Beaumont & Kansas City from Rogan north to San Augustine.

Mr. Garwood: What time did you construct that, and did you sell that to the Santa Fe, and if so, when?

6596 Mr. Kirby: I began that construction in 1899, but I had not completed it at the time I sold it to the Santa Fe, and then I became after selling that, the contractor and built the line into San Augustine.

Mr. Garwood: Was that sold at substantially the same time that you did the first road constructed?

Mr. Kirby: All sold together; yes, sir.

Mr. Garwood: When did you begin the construction of each of those lines?

Mr. Kirby: I began in 1893 the construction of the G. B. & K. C. at Beaumont, and the other line I began probably in 1898 or 1899, I don't remember just when; 1897 perhaps.

Mr. Garwood: Now, at the time you began this construction had you begun to acquire by purchase, option or otherwise lumber holdings in the territory through which these roads ran?

Mr. Kirby: Nothing of consequence, no, in that intermediate territory.

Mr. Garwood: Well, north of that?

Mr. Kirby: Yes, at the time I started the road, concerns that I represented had some timber interests up in the northern part of Jasper County, which is 115 or 120 miles from Beau-
6597 mont.

Mr. Garwood: Those were lumber companies, were they?

Mr. Kirby: No.

Mr. Garwood: What kind of company?

Mr. Kirby: They were Boston gentlemen, investors.

Mr. Garwood: Were you interested in any lumber company at that time?

Mr. Kirby: No, sir.

Mr. Garwood: About how much, in a general way——

Mr. Kirby: Yes, I had some interest in the Warren Lumber Company, over on the Southern Pacific.

Mr. Garwood: Were these Boston companies that you represented lumber companies or timber companies or——

Mr. Kirby: They were timber companies; they were not operators.

Mr. Garwood: They were not operators?

Mr. Kirby: No.

Mr. Garwood: How much did you acquire for them?

Mr. Kirby: Well, I do not know—what ones are you talking about; prior to the start of the railroad?

Mr. Garwood: Yes.

Mr. Kirby: I represented two companies in Texas, one
6598 the Texas & Louisiana Land & Lumber Company and one the Texas Pine Land Association. The two of them had scattered over the thirteen counties of east Texas probably 200,000 acres of land, 150,000 anyway.

Mr. Garwood: How much of that was in the section of the country through which you built these roads?

Mr. Kirby: Very little; that is, very little on the first 75 miles. After passing the town of Jasper up there on that new line, which was sold to the Santa Fe?

Mr. Garwood: Yes.

Mr. Kirby: And under construction at the time we sold to the Santa Fe, we run through quite a lot of timber land, probably 100,000 acres in that neighborhood. Of course we did not go through it all.

Mr. Garwood: Now, take the whole line, the two lines, about how much timber lands and timber rights did these parties own?

Mr. Kirby: Well, those two companies—are you talking about the people who built the railroad?

Mr. Garwood: No, I am talking about these companies for whom you said you were acting.

Mr. Kirby: They had somewhere between 150,000 and
6599 200,000 acres at that time. They sold out some ten years later, and had about that amount at that time.

Mr. Garwood: Did you own then, or did you subsequently acquire any interests in these companies and their holdings?

Mr. Kirby: I had a little interest then. I was on a commission

basis, and they paid for my services in stock. I did not have any money invested in either one of them.

Mr. Garwood: Did you have a substantial interest?

Mr. Kirby: No, not very substantial in either one of those two companies.

Mr. Garwood: Now, I understand the date of this sale to the Santa Fe was about 1900?

Mr. Kirby: June, 1900.

Commissioner Harlan: That is the sale of what branch?

Mr. Kirby: The G. B. & K. C. and the G. B. & G. N.

Commissioner Harlan: Both of them?

Mr. Kirby: Yes, sir.

Mr. Garwood: At that time had the Santa Fe constructed its branch from Somerville eastward?

Mr. Kirby: Yes, but not all the way.

Mr. Garwood: It was under construction?

Mr. Kirby: No, they had not built any in years?

6600 Mr. Garwood: How far did it come eastward from the connection with its main line at Cleveland?

Mr. Kirby: Cleveland?

Mr. Garwood: Yes, from Sommerville.

Mr. Kirby: I do not know what the distance is.

Mr. Garwood: They came to Cleveland?

Mr. Kirby: The line was completed a few miles east of Cleveland. They had a line probably for twenty years from Sommerville to Conroe, and then a man named Putnam built a little line running east, crossing the Houston, East & West Texas at Cleveland, and for a few miles east of Cleveland.

Mr. Garwood: They acquired that?

Mr. Kirby: They bought that.

Mr. Garwood: About how much mileage was that?

Mr. Kirby: I think about thirty miles from Conroe, perhaps.

Mr. Garwood: Then after the acquisition of your lines to the connection with that line——

Mr. Kirby: They built over to Silsbee to the connection, I think about seventy miles.

Mr. Garwood: At what time did you begin the acquisition of timber lands on your own account?

Mr. Kirby: After I sold the railroad and got some money.

6601 Mr. Garwood: After you sold the railroad, and then began the acquisition of timber land. About how much did you acquire at that time?

Mr. Kirby: Something over 200,000 acres. You mean personally?

Mr. Garwood: Yes.

Mr. Kirby: Of course I had interests in a good many concerns, partnerships and corporations and things, but my personal interest would have been about 225,000 or 230,000 acres.

Mr. Garwood: Without going into all these various companies and co-partnerships in which you were interested, about how much

did these companies and yourself personally own or control, either by fee title or timber rights?

Mr. Kirby: At what time?

Mr. Garwood: Well, prior to the organization of the Kirby Lumber Company, say.

6602 Mr. Kirby: Something like 500,000 acres.

Mr. Garwood: Five hundred or six hundred thousand?

Mr. Kirby: No, something like 500,000.

Mr. Garwood: Something about 500,000 acres?

Mr. Kirby: I think so.

Mr. Garwood: When you sold, and the Santa Fe acquired these lines of which I speak, had you in immediate contemplation your subsequent development in the lumber territory?

Mr. Kirby: I had in contemplation the purchase of timber lands over there when I sold the railroad. I did not expect to go to lumbering except I would log, but not manufacture. I did not have that in mind at that time.

Mr. Garwood: How much land did the Kirby Lumber Company acquire in its corporate name?

Mr. Kirby: I think something like 130,000 or 140,000 acres. Do you mean at that time?

Mr. Garwood: Yes. 130,000 or 140,000 acres.

Mr. Kirby: Yes.

Mr. Garwood: Was that in addition to the amount you owned, or had you transferred any of your personal holdings?

Mr. Kirby: No, none of my personal holdings were transferred to the Kirby Lumber Company at the time. That has been

6603 ten years ago since the lumber company was organized. Since that time we have had some transactions. Two years ago I had some personal land——

Mr. Garwood: I understand, you had your personal holdings which amounted to about 200,000 acres.

Mr. Kirby: Well, my proportion of this 500,000 we are talking about would have been about 230,000 acres.

Mr. Garwood: Now the 500,000 acres, did that include 130,000 acres of the Kirby Lumber Company, or was it separate?

Mr. Kirby: That is separate.

Mr. Garwood: So that you have 500,000 acres which you and your associates control, and 130,000 acres additional which the Kirby Lumber Company controls.

Mr. Kirby: We do not control that now, if that is what you are talking about. We sold it all in 1901.

Mr. Garwood: Yes, we will get at that later. Now, when was the Houston Oil Company organized?

Mr. Kirby: In July, 1901 it was started.

Mr. Cowan: If your Honor please, I do not think it appropriate to go into tracing out titles in the various controversies between

6604 the Kirby Lumber Company and the Houston Oil Company.

Commissioner Harlan: We have not got very far yet.

Mr. Cowan: We are just starting, and I know what he is starting into, and it will take the Commission two weeks to go into it.

Commissioner Harlan: We will not take much time on it.

Mr. Cowan: If they go into it at all——

Commissioner Harlan: Let us see what counsel is going to ask, and then we will determine.

Mr. Garwood: When was it organized?

Mr. Kirby: In July, 1901, was its charter.

Mr. Garwood: Did the Kirby Lumber Company sell any land to the Houston Oil Company?

Mr. Kirby: It did not.

Mr. Garwood: Did the Houston Oil Company acquire lands of its own?

Mr. Kirby: Yes, sir.

Mr. Garwood: To what extent did it acquire pine lands in that territory particularly?

Mr. Kirby: They bought something over 800,000 acres.

Mr. Garwood: Now in a general way I understand the Kirby Lumber Company operates the Houston Oil Company's
6605 land.

Mr. Kirby: We cut the timber from that land.

Mr. Garwood: That is what I mean by operating. You cut the timber from those lands?

Mr. Kirby: Yes.

Mr. Garwood: What do the joint holdings of the Houston Oil Company, the Kirby Lumber Company, and yourself amount to?

Mr. Kirby: Well, do you mean the present holdings?

Mr. Garwood: Yes, I will put it now.

Mr. Kirby: Well, I do not know just what area the Houston Oil Company has, but something over eight hundred thousand acres, and the Kirby Lumber Company has probably forty thousand acres, and I personally have probably twenty-five thousand acres, altogether may be nine hundred thousand acres in those interests.

Mr. Garwood: Have you at this time any option or right to purchase what is commonly known as the Kountze lands?

Mr. Kirby: Yes, sir.

Mr. Garwood: How many acres do they comprise?

Mr. Kirby: That is 180,000 acres, in round figures.

6606 Mr. Garwood: About where, in a general way, do they lie?

Mr. Kirby: Well, they lie in Angelina, Jasper, San Augustine, Sabine, Newton, Tyler, Hardin and Polk and Liberty Counties.

Mr. Garwood: From whom did you acquire that option?

Mr. Cowan: We object to that. It is just an attempt to go into the private business of the Kirby Lumber Company, and does not bear on the question of the rates.

Commissioner Harlan: I do not see that that is a relevant question.

Mr. Garwood: I will vary the question——

Mr. Cowan: We object to all such questions without having to get up at all for each question.

Commissioner Harlan: If you will indicate clearly to the Com-

mission just what you expect to prove, it may throw some light on the question.

Mr. Garwood: My next question would have indicated that.

Commissioner Harlan: Very well, then ask the next question first.

Mr. Garwood: That is very difficult to do. Did you acquire that option from what is commonly known as the Santa Fe interests?

Mr. Cowan: Our objection, you understand, goes to this
6607 whole line.

Mr. Garwood: I think that is pertinent, your Honor.

Commissioner Harlan: With what thought in mind? Let us see what the relevancy is. Counsel in making that statement may decide the question, leaving me no opportunity to know what his purpose is.

Mr. Garwood: I did not expect to indicate my entire line of what I expected to show by the witness. Of course an objection can be interposed to each particular question, when all the questions put together and their answers will conclusively show their materiality. If it is a fact, and this witness will know, that these lands are owned substantially by the Santa Fe interests, that those holdings combined with his own occupy an immense territory in that section served by the Santa Fe, we think that it will explain to this Commission the policy of the Gulf, Colorado & Santa Fe road which seeks to prevent the construction of short lines in that territory, and will also serve to explain contracts which will subsequently be called for and notices to produce which have been given, and which are in the record, and which I do not now stop to take time to discuss.

6608 Commissioner Harlan: Let me put the question somewhat bluntly, Judge Garwood. Are you undertaking to show to the Commission that there is something in the relation between the Kirby Lumber Company or Mr. Kirby, or any of these other companies you have mentioned and the Santa Fe that affects the transportation of this lumber favorably or unfavorably?

Mr. Garwood: Yes, sir, I think so, that unquestionably does, your Honor.

Commissioner Harlan: The question may be answered.

Mr. Cowan: We will simply have to advise the witness as to certain points not to answer those things we think ought not to be answered.

Mr. Garwood: Oh, of course.

Mr. Cowan: For that reason we want to make our objections as we go along to the questions we do not think should be answered. We do not want to be foreclosed by the fact of permitting one question to be answered, and not having the objection to the others sustained.

Mr. Coleman: Judge Garwood has practically offered to show some kind of a common plan in regard to the lands in question

Before the examination proceeds in detail, could Mr. Kirby
6609 indicate the percentage of those lands which are at all tributary to the Santa Fe, the percentage which are tributary to the Houston East & West Texas, a line which I believe Judge Gar-

wood indirectly represents with other railroads? In other words, before you go into that discussion, see what railroads the land is tributary to.

Mr. Garwood: That can be developed on cross examination.

Mr. Coleman: I think it should be developed now.

Commissioner Harlan: I think it is open to Mr. Coleman to bring that out later.

Mr. Cowan: I would like to make the suggestion at this point that so far as the contracts between Mr. Kirby and the Santa Fe are concerned, we are perfectly willing for the Commission to have them. We simply think it is not a matter to go into the record. Being willing to submit the contracts, they speak for themselves, and it would seem to me therefore, when we have offered to do that for the private information of the Commission subject to its ruling whether it should be made a public document, that ought to end the matter until the Commission should have decided——

Mr. Garwood: As a matter of course——

Commissioner Harlan: We have not reached the matter of the contracts now. Now what was the question?

6610 Mr. Andrews: You have reached the contracts in this way, that he is interrogating the witness as to the rights or options to acquire, and leaving the witness to make his statements and return to them, and that *we* may necessitate if carried on, the offering on our part of portions of the instruments and explanation, and the witness might answer a question propounded with reference to it that the answer would compel us to offer voluntarily other portions of it, whereas we propose to tender the contracts to the Commission without interrogating the witness as to the contents of the contracts, and then if the Commission decides they are to be made public and are to be given to the public, and his business affairs as contained in those contracts are to be given to the public, we are helpless in the matter. But if the Commission holds that they should not be so published, then we do not think that the witness should be interrogated as to the contents of them.

Commissioner Harlan: We have not reached that point yet, and of course the Commission will endeavor, as far as it lawfully may, and it has throughout this inquiry, to protect the commercial

6611 interests of any person engaged in the inquiry. But so far as the relations between any shipper and a carrier are concerned, we have brought those out, and it is the duty of the Commission to bring them out. Counsel offers, I assume in good faith, to make his questions relevant, and what he proposes to prove. We must get ahead. I think the question should be answered.

Mr. Garwood: It is not my purpose, of course, to inquire into the private business of any man except insofar as that private interest becomes affected with a public interest by reason of its direct relation to a transportation problem which is being probed by the Commission, and it has been continuously probed throughout this entire inquiry along the very lines that I have been proceeding upon.

(The previous question was then read as follows:)

"Did you acquire that option from what is commonly known as the Santa Fe interests?"

Mr. Kirby: Why couldn't I save time by stating the whole case from start to finish? You are inquiring about the Kountze lands?

Mr. Garwood: That is just with you. Of course I am bound to frame my interrogatories in a direct way so they can be objected to.

6612 Commissioner Harlan: Answer the question in your own way, Mr. Kirby.

Mr. Kirby: Answering the question, the present option contract on this land is held by Mr. David L. Gallup, as I understand, for the Atchison Railroad, that is with him. The title to the property is in Mr. Gallup, as I understand, and my option with Mr. Gallup to buy it.

Mr. Garwood: Is that option a recent option, or is it of long standing?

Mr. Kirby: Well, there were two. I obtained from Kountze Brothers in New York an option to buy these lands in 1900. Then I got a renewal of that option in 1901. I assigned the second option to the Houston Oil Company. They could not raise the money, the option price was $2,135,000, and the Houston Oil Company was to buy the land for the purpose of subjecting the timber to the timber contract with the Kirby Lumber Company which had been previously executed. The Houston Oil Company could not raise the money, and they extended me the privilege of exercising the option, if I could find the money, so I got Mr. Ripley of the Santa Fe to advance $2,000,000 to buy those lands, and took the title in Mr. Gallup, and gave him a five year option in which to repurchase the land. That option expired a long time ago, but a new

6613 option was executed with me in about July, 1909. The original transaction was in 1902.

Mr. Garwood: In order to acquire the original option, were you required to make any tonnage contract with the Santa Fe?

Mr. Kirby: Well, as a part of the transaction there was a tonnage contract.

Mr. Garwood: What was that tonnage contract?

Mr. Kirby: The lumber manufactured in mills located upon the Santa Fe rails in a certain territory—not all the mills, because one was excluded, but all mills east of the Neches River, if you get the location of the Santa Fe there you can see it——

Mr. Garwood: Yes.

Mr. Kirby: All lumber manufactured in mills east of the Neches River, the routing of that lumber was to be given to the Santa Fe so long as their rates were equal.

Mr. Garwood: Taking into consideration the 187,000 acres owned by the Santa Fe and the acreage owned by the Houston Oil Company which you were lumbering and the acreage owned by the Kirby Lumber Company and yourself, about how much lumber acreage would have been affected by that routing con-

6614 tract?

Mr. Kirby: Well, it only relates to that part of it east of the river.

Mr. Garwood: Yes.

Mr. Kirby: And it only relates to that part of it that might move within five years.

Mr. Garwood: Yes, well, within five years.

Mr. Kirby: So that would probably relate to five hundred million feet of timber out of seven or eight billions.

Mr. Garwood: In addition to the contract upon your part to give that tonnage to that interest, were you required to make other concessions relative to the lumber which you would sell to the Santa Fe.

Mr. Kirby: That had no relation to this transaction, no. I know what you are referring to.

Mr. Garwood: Of course your information is more accurate than mine.

Mr. Kirby: Well, when the Kirby Lumber Company was first organized, I made a contract with the Santa Fe for their supplies, ties, and material of that kind.

Mr. Garwood: Let me be exact about that. You say that this tonnage contract had no connection with your option to pur-

6615 chase——

Mr. Kirby: I did not say that.

Mr. Garwood: That is what I want to get at.

Mr. Kirby: My option to purchase was conditioned first that I should repay the money with five per cent interest, and all carrying charges and that sort of thing——

Mr. Garwood: Of course.

Mr. Kirby: It being semi-annual interest as it accrued. Second, that up to the time of declaring this option, I should have performed that tonnage contract routing out of these local mills on the Santa Fe, and I would not have as a legal proposition any right to route it otherwise, as it originated with them; but under that contract, whatever that value was, they controlled the routing of that tonnage. Of course, I sold the way I pleased. I might sell it export but it has to move over those rails. And in the extent that in its march to market it could pass over their rails, I presume they would put it over their rails.

Mr. Garwood: Now, as a part of the option contract, did you make any agreement with the Santa Fe by which you would sell them any given amount of material per year, at any given price?

6616 Mr. Kirby: I do not think that was a part of that option contract, but there was a contract between me and the Santa Fe by which I was to sell them ties, and the price was fixed, hewn ties so much, and sawn ties so much, and then lumber up to a certain quantity per year.

Mr. Garwood: Was that an independent contract?

Mr. Kirby: They may have been tied together, I have not examined them in so long, but the contract was made, and my recollection is it had no relation to the option contract on the Kountze land, but it may have. I think not.

Mr. Garwood: In order that you may not be misled, I will say to you that my information is, and I will disclose the source of it in a moment to you, that it was a part of the original option contract, so you may refresh your memory about it, if you care to.

Mr. Kirby: Well, I could only refresh my memory by looking up the document itself.

Mr. Garwood: You have the document here with you?

Mr. Kirby: I do not know that it is here; I presume it is.

Mr. Garwood: If it is here, you can advise us of that fact?

Mr. Kirby: Yes.

Mr. Garwood: And also refresh your own memory about it.

6617 Mr. Kirby: Yes, sir. I——

Mr. Garwood: Now, what was that contract by which you agreed to sell a certain amount of material to the Santa Fe road at given prices?

Mr. Kirby: I agreed to furnish the Santa Fe road with a certain number of hewn ties and piling at a price fixed, and I agreed to sell the Santa Fe certain mill products up to ten million feet a year at 20 per cent under the monthly market to other people, of the same class of goods. While that was the agreement they bought about three million feet under that agreement each year, and the agreement of course fell in 1904 when the properties went in the hands of a receiver. It was in operation about 18 months.

Mr. Garwood: But it continued in operation that time?

Mr. Kirby: That is this material agreement you speak about.

Mr. Garwood: You agreed then, in addition to selling certain specified lumber at certain specified prices to sell them 10,000,000 feet a year at 20 per cent below the market price.

Mr. Kirby: No, that was not the agreement.

Mr. Garwood: Well, I——

Mr. Kirby: Twenty per cent below my price on the stuff
6618 they wanted, that is the price at which I sold to others. Very probably I did not sell anybody any material in that length of time, but then——

Mr. Garwood: You do not mean to say you would fix your price on it, and then sell it 20 per cent below that price?

Mr. Kirby: I certainly would, and that is what I did substantially.

Commissioner Harlan: You mean your price to the public?

Mr. Kirby: Well, we did not have any published. The Santa Fe's was special sawing, Judge, so there was no public.

Mr. Garwood: You were not considering the public?

Mr. Garwood: Mr. Hodges was a fine purchasing agent.

Mr. Garwood: I want to see if I understand it. I confess I do not. What did the contract mean by saying that you would sell at 20 per cent below the market price?

Mr. Kirby: It did not say that.

Mr. Garwood: I am talking merely from memory. You have the contract.

Mr. Kirby: It said 20 per cent below our prices on the same material to other customers during the same months. Well, we had no such customer.

Mr. Garwood: Such public as you had then——

6619 Mr. Kirby: There wasn't any. There was special sawing to the Santa Fe, and that is the only price made. Of course

the Santa Fe still got it at our price as cheap as everyone else, otherwise we would not have gotten any order.

Mr. Garwood: Will you explain what benefit the Santa Fe would have got out of the 20 per cent reduction——

Mr. Kirby: I cannot see any.

Mr. Garwood: Under your theory?

Mr. Kirby: I cannot see any for them, and as evidence that there wasn't any, they did not order but three million feet a year, although they had a right to call for ten million.

Mr. Garwood: Have you that contract?

Mr. Kirby: It is here among the papers.

Mr. Garwood: I wish you would get that and look up these particular provisions, because I confess the 20 per cent reduction is not clear, or its meaning, from your statement of it.

Mr. Kirby: I think it is very clear.

Mr. Coleman: I think if you had understood it you would not have persisted in that line of questions.

Mr. Garwood: That possibly may be correct, Mr. Coleman, but I think for your benefit that we will understand it thoroughly
6620 before we get through; with Mr. Kirby's assistance, I think we will make it perfectly clear. Now did the Santa Fe make any contract with you by which it agreed to cancel all through routes with its connections?

Mr. Kirby: Yes, sir,—no, not that.

Mr. Garwood: Now you say yes and no. Just explain that.

Mr. Kirby: This is what you are driving at, Judge. (Producing paper.) That is with the Atchison, Topeka & Santa Fe.

Mr. Garwood: Well, whichever it is, the Atchison, Topeka & Santa Fe or the Santa Fe.

Mr. Kirby: When I sold them my rights on the 28th of June, 1900, this is the original contract with the Santa Fe, I tried to get in a provision and I got it in this contract, that they would pursue the Missouri Pacific policy of maintaining their territory of cancelling out when they had completed over into East Texas and got their lines all constructed, their divisions with lumber originating lines. We made the contract, but it has never been enforced. There has never anything of that kindness been done.

Mr. Garwood: Well, that is a matter to be determined later. You have no objection to our seeing the contract?

6621 Mr. Kirby: No.

Mr. Cowan: I would like to ask Mr. Garwood if he knows any law which prohibited any such contract in 1900 and 1904.

Mr. Garwood: I do not care to state——

Commissioner Harlan: Counsel does not insist upon an answer. If he did, we would not stop to hear it. Proceed with your inquiry, Judge Garwood.

Mr. Garwood: We may see the contract, Mr. Kirby?

Mr. Kirby: Yes, sir. (Handing paper.)

Mr. Garwood: Will your Honor permit us to inspect it?

Mr. Kirby: The last clause is the only thing. Everything else relates to the sale of the securities of the road.

Mr. Andrews: And the date?

Mr. Kirby: June 28th, 1900.

Mr. Andrews: And the date of the charter of the Kirby Company?

Mr. Kirby: July 5th, 1901. A little over a year after. This is a personal transaction between me and the Santa Fe.

Mr. Garwood: Get that part of it. I do not care to see that part of the contract, except it relates to the transportation end of it.

Mr. Kirby: "Whereas the vendor"—that is what you want to see.

6622 Mr. Garwood: The clause of the contract to which you refer is this which I shall read: "And whereas, the vendor"——

Mr. Kirby: Kirby.

Mr. Garwood (Continuing): —"John H. Kirby is largely interested in timber lands adjacent to the lines of railroad of the Beaumont Company"—that is the company you were selling?

Mr. Kirby: Both companies.

Mr. Garwood "—and the proposed extensions thereof to be built by the Gulf, Beaumont & Great Northern Railway Company, and is prepared to engage in the business of manufacturing and dealing in lumber, ties, piling and timber, and is interested in the permanent adoption by the Atchison Company of the policy of promoting the advantageous distribution of the lumber, ties, piling and timber to be manufactured along the lines of the Beaumont Company, and of said extensions, therefore the Atchison Company agrees that upon the performance of this agreement by the vendor, and upon completion of the connection between said Montgomery branch, and the line of the Beaumont Company, and so long as the commercial demand for lumber, ties, piling and timber shall be supplied by ship-

6623 pers on the line of the Beaumont Company, it, the Atchison Company, so far as it legally may do so, will cause to be cancelled, all divisions of through rates upon lumber, ties, piling and timber between the lines in its systems and other connecting lines originating such lumber, ties, piling and timber in the States of Texas and Louisiana, and so far as it may lawfully do so it will refuse to make such divisions."

That is correctly read, is it?

Mr. Kirby: I think so.

Mr. Garwood: Now, Mr. Kirby, is there anything else in this contract relative to your transportation relations with the Atchison road?

Mr. Kirby: Not a thing. You mean that contract?

Mr. Garwood: In this contract here.

Mr. Kirby: Not a thing.

Mr. Garwood: I want to avoid reading the contract if I can.

Mr. Kirby: Not a thing. The balance of the contract relates to the sale and delivery of the road, and sale of its securities. Mr. Morowitz wrote the contract.

Mr. Garwood: Is there anything in this contract by which

6624 you bind yourself not to incorporate any road or anything of that kind?

Mr. Kirby: Not a line.

Mr. Garwood: I do not want to go farther than the transportation end of your contract.

Mr. Marble: May I see the contract?

Mr. Kirby: Yes.

Mr. Marble: Without stopping counsel, I wish to examine it.

(Paper handed to Mr. Marble.)

Mr. Garwood: What price did you get for those roads which you sold?

Mr. Kirby: Well, we got a good amount. I don't remember just now what it was. The original line, the 75 mile line, was bonded for $20,000 a mile, and——

Mr. Andrews: It does not seem to me that a road that was sold by an individual before the incorporation of the company which is now doing the business is legitimate subject matter for inquiry here.

Mr. Garwood: It possibly may be a little remote. I thought it was so immediately connected with it that it might shed some light on it.

Mr. Kirby: I did not get as much as the property was worth.

6625 Mr. Garwood: Well, I hope you got a good deal. I do not care to press it, if there is objection to it.

Commissioner Harlan: Well, counsel does object. Do you care to press the question?

Mr. Garwood: I thought it might shed light on the entire transaction, but it is not of sufficient moment to argue.

Commissioner Harlan: Then we will pass to something else.

Mr. Garwood: Whether in this contract or not, is there anywhere, or have you at any time made, any agreement with the Santa Fe in writing or orally by which you bound yourself not to incorporate your lines?

Mr. Kirby: No, sir.

Mr. Garwood: Or not accept divisions?

Mr. Kirby: No. The Santa Fe offered them, and I declined them.

Mr. Garwood: They offered to give you them?

Mr. Kirby: Yes, sir.

Mr. Garwood: Not the Santa Fe?

Mr. Kirby: Yes, sir. I am here to give you full information. I am the sole offender. The Santa Fe is not responsible for my not getting divisions.

Mr. Garwood: That was a voluntary exclamation of surprise. I thought the Santa Fe never did that. Of course I do not

6626 mean to question the accuracy of your statement, Mr. Kirby. What did they offer you?

Mr. Kirby: At the beginning the offer made was two cents per hundred pounds; then that offer was made while the receivership was pending upon my property, and the property was being administered by the federal court, and the proposition was that the lines should be incorporated, and the Santa Fe would immediately put in divisions with the lines of two cents per hundred pounds.

Mr. Garwood: What date was that?

Mr. Kirby: Well, that was four or five years ago.

Mr. Andrews: The receivership began on the first of February, 1904.

Mr. Kirby: And it closed in July, 1908, and it was before the panic in 1907, it must have been four years ago anyway.

Mr. Garwood: Now the Santa Fe on the date of that contract agreed with you to cancel out all through rates?

Mr. Kirby: Yes, sir.

Mr. Garwood: Did they do that?

Mr. Kirby: They never did.

Mr. Garwood: Never at any time?

6627 Mr. Kirby: Not that I have any information of.

Mr. Garwood: You expected them to do it, did you not?

Mr. Kirby: I did not.

Mr. Garwood: Why did you make the contract?

Mr. Kirby: Well, at the time I made the contract we had no rate from our territory down there in Southeast Texas, where I was largely interested, and which I often call my country, except Southern Pacific rates, and they were east and west rates, and did not go anywhere, and the Missouri & Pacific would not let us get into their territory, and the Southern Pacific had no general rates to the market, and I wrote this in here for the purpose of protecting our territory as much as I could when we got the Santa Fe in there, that we would have as wide rates as possible. And after the Santa Fe entered this territory, the whole rate situation has changed. We want interchanges with everybody, and it has never been to my advantage to ask the Santa Fe to cut out divisions. It might have been to a temporary advantage.

Commissioner Harlan: You mean cut out divisions?

Mr. Kirby: Cut out divisions with the originating line, because we all got a blanket rate, and we are supposed to go to market together.

Mr. Garwood: Well, you considered it a valuable contract

6628 to you if they would cut out divisions with all connecting lines, did you not?

Mr. Kirby: It might be a valuable contract to the territory down there, it might become so.

Mr. Garwood: I mean to you and your interests, the Kirby Lumber Company.

Mr. Kirby: I thought it was of some value to me at that time. The Kirby Lumber Company had not been dreamed of at that time.

Mr. Garwood: I know, but the Kirby Lumber Company succeeded to the benefits of that contract.

Mr. Kirby: Not necessarily, except that the Kirby Lumber Company has acquired large interests in the territory served by the Santa Fe road down there. I never conveyed this contract, or any right under it, to anybody else in the world.

Mr. Garwood: Can you estimate the value per thousand feet of lumber of that contract to cancel out through rates?

Mr. Kirby: I do not think it is worth five cents on a million feet of lumber, but I may be mistaken about it.

Mr. Garwood: I will ask you, after the receivership of the Kirby Lumber Company was instituted, if you did not allege in
6629 a pleading filed in court, that the Kirby Lumber Company had succeeded to the benefits of this contract, that this contract was in force after you had acquired the Kountze option, and that you yourself estimated the benefit to you and your interests of this cancellation of the through rate by the Santa Fe at not less than one dollar, or one dollar and fifty cents per thousand feet of lumber.

Mr. Kirby: You know, Judge when you lawyers go to prepare pleadings and present a case, you put everything in it you can. I understand something of that character was put into that pleading——

Mr. Garwood: But, Mr. Kirby, this was an equity answer——

Mr. Kirby: Prepared by the lawyers, nevertheless, is the point I make.

Mr. Garwood: And was it not signed and sworn to by you——

Mr. Kirby: I do not remember about that. We usually sign whatever you prepare for us.

Mr. Garwood: Would it refresh your recollection if I should show you the allegation?

Mr. Kirby: No, I read that in your notice, it was called to my attention then. I didn't really know until that time that it had ever been made.

6630 Commissioner Harlan: We will not stop on that, Judge Garwood. You have stated in substance.

Mr. Garwood: I think it is material in this connection, to see if I have stated its substance.

Mr. Kirby: That was not a contract with the Santa Fe Railroad Company, Judge, or any parties to this contract.

Mr. Garwood: This pleading purports to have been filed at some time subsequent to March 25th, 1905. Now I will ask you if in that pleading——

Commissioner Harlan: Will you be kind enough to let the witness read it?

Mr. Kirby: Whatever was in the pleading was stated in the pleading.

Commissioner Harlan: Will you let me see it, and let the witness see it.

Mr. Garwood: Surely, beginning at paragraph 13—paragraphs 13 and 14.

Commissioner Harlan: What do you want to do, read all this in the record?

Mr. Garwood: I will offer it at some time in the proceedings, your Honor.

Commissioner Harlan: Very well.

6631 Mr. Garwood: But I want to call the witness's attention to his allegation. You say this contract——

Mr. Kirby: You had better put the lawyer on the stand who drew them. They are not mine.

Mr. Andrews: It seems to me there can be but one possible purpose to read the declaration in the answer, and that purpose would

be in contradiction of what the witness has just stated. He has explained how the answer was made, and his connection with it, and it seems to me that is all that could be said in connection with it, with the question of a pleading in a case concerning a contract, that the witness says has never been enforced, and that no one here is ready to assert was ever in force, or is in force now, is immaterial and useless consumption of time.

Commissioner Harlan: The pleading seems to indicate that the contract gave an advantage to the witness. I would like to ask the witness whether that was or was not the fact. If it was not the fact, state why it was not the fact.

Mr. Kirby: I do not know of any advantage in the world that cancelling out divisions with the Santa Fe down there would be of any value to us at all. There is no local market on the Santa Fe to amount to anything, and since that contract was made, the Santa Fe has itself extended into Louisiana and has some 80 miles
6632 of road over there, so that under present conditions I cannot see any value in the world to such mills as we have on the Santa Fe from cancellation of rates.

Commissioner Harlan: Well, did you think it had a value at the time this answer was prepared and filed?

Mr. Kirby: I do not remember that I was consulted about that at the time, and I do not think it had any more value then than now, because the Santa Fe had extended into Louisiana then, is my recollection, at the time this pleading was prepared.

Mr. Garwood: How could your attorneys have drawn up an equity pleading of this character without that information from you?

Mr. Kirby: They would get it from the general records. You have prepared many a one without consulting your clients, knowing the facts yourself.

Mr. Garwood: Not when he has to sign it and swear to it——

Commissioner Harlan: I do not think we will stop longer on that.

Mr. Garwood: He asked me the question.

Commissioner Harlan: If you desire to offer it, it may be copied and attached as an exhibit.

Mr. Garwood: I wish to ask if you did not in that answer
6633 allege that this contract that we have just read, by which the Santa Fe agreed to cancel out all through rates would give the Kirby Lumber Company an advantage of about one dollar per thousand feet of lumber over and above what its competitors would receive, located on other lines of railway.

Commissioner Harlan: I think that sufficiently appears.

Mr. Kirby: So far as the allegation is concerned, the allegation is there, but of course nobody could find out the fact. Why would it be?

Mr. Garwood: That was your idea at the time?

Mr. Kirby: I do not think so; I do not think that feature was brought to my attention, but that document——

Mr. Garwood: Let us see whether or not you were correct about it. If through rates with connecting lines were cancelled out, your mill being situated on the Santa Fe, and your competitors not being situ-

ated on the Santa Fe, you would go in on the through Atchison rate, and your competitors would go into Atchison territory on the combination of the rates, and is it not entirely possible that when you set up in this equity pleading that you would get one dollar a thousand advantage over your competitors that you were alleging the actual absolute fact?

Mr. Kirby: No, sir, you do not state the fact, because we
6634 have got lots of competition on the Santa Fe rails. If I had a monopoly of the business of originating lumber on the Santa Fe, and then I had the monopoly of delivering lumber on the Santa Fe, that is one thing; but that condition does not exist.

Mr. Garwood: You say you had——

Commissioner Harlan: Will you oblige the Commission by proceeding to some other point? I think we have all in the record on that point that we desire.

Mr. Garwood: The witness stated——

Commissioner Harlan: Are you going to pursue that inquiry farther?

Mr. Garwood: I will tell you, the question I am going to ask right now——

Commissioner Harlan: Very well.

Mr. Garwood: The witness has stated that if he had a monopoly of the territory on the Atchison that would inure to his benefit. I am now going to ask him if he himself did not allege in the same pleading, and if it were not a fact that if his dealings with the Santa Fe were carried out, he would have the very monopoly that
6635 he says would have produced that result.

Commissioner Harlan: Can you answer that question?

Mr. Kirby: It may be alleged in the document, but then it is not the truth.

Commissioner Harlan: Very well.

Mr. Garwood: I want to ask him if he did not at that time allege that with his own holdings, and his co-related companies, with the Kountze land, and the Houston Oil Company's land, if he would not have practically all the territory along the Santa Fe, and that thereby the benefit of that contract would inure exclusively to him and his interest.

Commissioner Harlan: Are you asking him what he alleged?

Mr. Garwood: I am asking him if he alleged that in the pleadings.

Commissioner Harlan: The pleading shows for itself. The witness need not answer. Will you proceed with some other question.

Mr. Garwood: After these relations concerning which I have inquired were terminated, did you take up further relations with the Santa Fe interests relative to the financing of your properties?

Mr. Kirby: Well, I do not know what you mean by
6636 financing, Judge.

Mr. Garwood: That is a little general. That objection is well taken. I will ask you if you now owe the Atchison interests any amount of money in connection with these enterprises over there. Not outside; I want to confine it as to these properties situated on the Santa Fe.

Commissioner Harlan: You refer to this loan which has already been referred to?

Mr. Garwood: No, this is another branch of it.

Mr. Andrews: The objection is as to the form, and not as to the substance of the question. I am perfectly willing for the witness, without objection, to state what the transaction was, but in the form the question is put, it carries with it a conclusion which I object to in the form stated.

Commissioner Harlan: Perhaps you can re-form that question.

Mr. Garwood: I do not want to suggest any conclusion. All I want is the fact.

Mr. Andrews: Just let him tell it.

Mr. Kirby: We owe the Santa Fe some money. Is that what you want to get at?

Mr. Garwood: Well, that is the direction my question
6637 pointed.

Mr. Kirby: I borrowed from the Santa Fe in July, 1909, 18 months ago, $500,000, and gave them a mortgage on eight million dollars' worth of property, and I paid them interest at the rate of seven per cent per annum, and still owe $400,000 of that money.

Commissioner Harlan: When you say "I," do you mean the Kirby Lumber Company?

Mr. Kirby: Yes, sir.

Mr. Garwood: Does that loan embrace the Kirby Lumber Company's holdings as well as your own?

Mr. Kirby: It is no part of my own; I am not a party to that. It is a Kirby Lumber Company loan, and the Kirby Lumber Company executed a general mortgage upon all its assets. They are recorded down there in the deed records, to secure $500,000.

Commissioner Harlan: The mills, and lands, and railroads?

Mr. Kirby: Yes, sir.

Mr. Garwood: That mortgage was made to a trustee?

Mr. Kirby: The American Trust Company & Savings Bank of this city.

Mr. Garwood: What is the name, Chapman?

6638 Mr. Kirby: Well, Mr. Chapman is an officer of the bank. The bank has changed its name now, and has another name, but that was the name at the time.

Mr. Garwood: Did the Kirby Lumber Company convey to this party who holds this in trust, all of its properties?

Mr. Kirby: Well, substantially so, according to my recollection. It may not have the personal properties.

Mr. Garwood: I mean its landed properties.

Mr. Andrews: I beg pardon for the interruption, but there are two transactions. I think Mr. Kirby understood you as talking about one, and he answered as to the other. The mortgage was upon the entire property to secure $500,000, but the transaction with Chapman was in a different form.

Mr. Garwood: Just state it, please.

Mr. Kirby: The Kirby Lumber Company sold its land which in-

cluded my previous holdings which amounted to about 130,000 acres is my recollection, to Mr. J. R. Chapman, for three million dollars practically—I think that is about the sum. It was sold on a timber basis to Mr. Chapman, and then we took a contract back; the contract is personal to me, my personal option upon those lands to rebuy them in the course of five years; very similar to the Gallup
6639 option.

Mr. Garwood: I see, as counsel stated there are two transactions.

Mr. Kirby: Yes.

Mr. Garwood: You borrowed in one, $500,000 from the Atchison interest?

Mr. Kirby: Yes, sir.

Mr. Garwood: And that is secured by a mortgage?

Mr. Kirby: Yes, sir.

Mr. Garwood: And then you sold——

Mr. Kirby: In the other transaction.

6640 Mr. Garwood: In the other transaction for three million dollars, to the same interest, all of your timber holdings?

Mr. Kirby: No, certain of our timber holdings.

Mr. Garwood: About what proportion?

Mr. Kirby: We have 30,000 or 40,000 left; I don't know accurately just what it is.

Mr. Garwood: All but that?

Mr. Kirby: Yes. We sold up to three million dollars of value, because that was the sum of money we needed.

Mr. Garwood: The Kirby Lumber Company made one deed to Mr. Chapmon, acting for the Santa Fe?

Mr. Kirby: Yes.

Mr. Garwood: Then you made another deed, did you, in person?

Mr. Kirby: Yes, sir; instead of passing my lands over to the Kirby Lumber Company and having double record fees, I conveyed them direct to Mr. Chapman.

Mr. Garwood: And those two transactions covered all the land conveyed to the Santa Fe?

Mr. Kirby: Yes.

Mr. Garwood: So then, the Santa Fe, in addition to 187,000 acres of the Kountze land, has got title subject only to your
6641 option to repurchase *to* all of the other land with the exception of thirty or forty thousand acres?

Mr. Kirby: Well, about 130,000 or 140,000.

Mr. Garwood: The two deeds from you and the Kirby Lumber Company cover about 130,000 or 140,000?

Mr. Kirby: I think so.

Mr. Garwood: So the Santa Fe has fee titles to the 187,000 acres of the Kountze land and 130,000 acres acquired from you and from the Kirby Lumber Company?

Mr. Kirby: Whatever it is, I cannot testify as to the acreage exactly, but in that neighborhood.

Mr. Garwood: Now, in your examination this morning, as illustrative of the influence of divisions upon sales, you instanced a case

where the Denver & Rio Grande was in the market for a large supply of material?

Mr. Kirby: Yes, sir.

Mr. Garwood: And you tried to get the contract of sale? Do you know who did get the contract?

Mr. Kirby: Well, I have heard, but I don't know definitely. I do not recall; it is among our papers. I do not know whether Mr. Bonner knows, if he is here.

Mr. Garwood: I will ask you if it was not some lumber
6642 broker down there who got the contract?

Mr. Kirby: Part of it.

Mr. Garwood: And he went around and filled it up from this, that or the other lumber company?

Mr. Kirby: Well, any lumber broker has to do that.

Mr. Jeffery: What was that date?

Mr. Kirby: But it had bought all on Santa Fe land. He could not buy it on the Santa Fe where our mills were.

Mr. Jeffery: What date was that?

Mr. Kirby: Last year some time.

Mr. Jeffery: 1910?

Mr. Kirby: Yes, sir.

Mr. Garwood: You stated this morning, and I think correctly, that under the Texas laws, a common carrier regularly incorporated as such and holding itself out to the public as such, has not the right to take up its track when it gets through its operations, and as I understand, that was the reason why you never incorporated?

Mr. Kirby: No, it is only one of the reasons.

Mr. Garwood: That is one of the reasons why you never incorporated. The Texas laws as a rule are more or less strict and severe, are they not? I ask you these questions. You are a lawyer
6643 as well as a lumber man.

Mr. Kirby: No, I used to have a license, but there is a distinction.

Mr. Garwood: They are quite strict in both their laws and their decisions as to the requirements they make of common carriers, are they not?

Mr. Kirby: Well, we think so down there, you know. We sympathize with your clients who think that thing.

Mr. Garwood: Very often they need it. In their requirements as to full crews, equipment of trains of every character, the station facilities and conveniences around stations.

Mr. Kirby: Yes.

Mr. Garwood: All of those can be required, and a multitude of others that I do not now mention can be required by our laws and our Commission?

Mr. Kirby: Yes, sir.

Mr. Garwood: And they are enforced with more or less severity, are they not?

Mr. Kirby: On the trunk lines.

Mr. Garwood: Are they not enforced on other lines?

Mr. Kirby: I do not know of any tap line that is getting it applied to them.

6644 Mr. Garwood: Don't you know of tap lines that have been required to furnish equipment, and things of that kind?

Mr. Kirby: No.

Mr. Garwood: And if a tap line——

Mr. Kirby: That is, you mean required?

Mr. Garwood: Yes, required by the Commission.

Mr. Kirby: I know of them furnishing equipment, but then the word "required" is different.

Mr. Garwood: Don't you know of instances where they have been required to furnish the equipment?

Mr. Kirby: No.

Mr. Garwood: If the mere fact that you could not take up your rails was one of the reasons you would not incorporate as a common carrier, all these additional reasons would apply with added force?

Mr. Kirby: Yes, sir.

Mr. Garwood: In the State of Texas?

Mr. Kirby: Yes, sir.

Mr. Garwood: Now, you say that you carefully refrained from being acted upon as a common carrier, as far as you could?

Mr. Kirby: Yes.

6645 Mr. Garwood: Then those with timber lands adjacent to your various trams of course have no way of marketing that timber unless somebody else builds a line in there and incorporates it?

Mr. Kirby: They have the same way I have; they can build their own roads.

Mr. Garwood: Yes, they can build their own roads.

Mr. Kirby: Yes.

Mr. Garwood: But a man who cannot command a loan of three millions of dollars is not——

Mr. Kirby: We did not put any of that in a tram road, Judge.

Mr. Garwood: Is not apt to rush into and contract the obligation to build a railroad in Texas, as a general proposition, is he?

Mr. Kirby: I don't just understand the question. The man cannot borrow the money?

Mr. Garwood: A man who cannot raise large sums of money is not apt to do it, so that the small landholder located along any of your lines cannot get to market——

Mr. Kirby: Oh, yes, he can.

Mr. Garwood: With his stuff, without either he builds a

6646 road or somebody else builds it for him.

Mr. Kirby: That is true; there is no market whether he is a big or small landholder unless he has facilities to get to the trunk line.

Mr. Garwood: Unless he has facilities to get to the trunk line. Now, coming back just for a moment, you stated this morning that equality of rates was the prime consideration——

Mr. Kirby: In rate making; yes, sir.

Mr. Garwood: In your judgment. Of course you understand that

there can be no system of rates mathematically and theoretically perfectly equitable and just to everybody; that is a matter of impossibility.

Mr. Kirby: I presume it is; that is, considering the carrier and the consumer and the producer everywhere, perhaps all of them have some hardship somewhere.

Mr. Garwood: Don't you think a contract upon which the line upon which all your mills were situated would cut off people in the same business as yourself from through rates to consuming territory would be unjust to all of those that were situated on the connecting lines and who were cut off?

Mr. Kirby: It would depend entirely upon what the connecting line did to them. If you are under a blanket system where
6647 those things are reciprocated—but suppose no line in the country had any divisions with the originating line except the one I was on; I would be at a disadvantage against every lumber man who could get into the market, and I would be limited to one.

Mr. Garwood: Do you think that condition existed at that time?

Mr. Kirby: It did not altogether, but that was long before you were associated with the Southern Pacific, and we only had one line down there, and we suffered from "Southern Pacific fly."

Mr Garwood: I am not associated with the Southern Pacific. We are mutually correcting each other.

Mr. Kirby: Then I am sorry.

Mr. Garwood: I am associated with the Houston, East & West Texas and the Texas & New Orleans, so that the record may be straight.

Mr. Kirby: Well, the T. & N. O., when we did not have but that one railroad running east and west, we suffered from what we called "Southern Pacific fly" a very unjust designation of the Southern Pacific in that regard, because it did not have power to make rates when it had no rails.

6648 Mr. Garwood: It tried to do the best it could under the circumstances?

Mr. Kirby: I think so.

Mr. Garwood: You have not always been opposed to incorporation and allowance of divisions to short lines, have you?

Mr. Kirby: It is owing to what you call a short line. The length of the railroad does not determine its merits.

Mr. Garwood: Would you term your various lines short lines?

Mr. Kirby: They are nearly all short lines, but they are not railroads. There are lines shorter than mine that are called railroads.

Mr. Garwood: You stated a short time ago that the Santa Fe offered you two cents, was it?

Mr. Kirby: Yes, sir.

Mr. Garwood: And that you declined to take it.

Mr. Kirby: Well, that was probably an erroneous statement to say I declined. I asked them not to pursue the matter any farther until I could see Mr. Ripley. I wanted to discuss it with him, as to the necessity for it.

Mr. Garwood: At any rate you did not take it, but dropped it?

Mr. Kirby: Yes, sir.

6649 Mr. Garwood: I want to ask you if you did not at one time enter into a contract with Mr. Yoakum to incorporate all of your lines, and operate them as a common carrier?

Mr. Kirby: No, sir.

Mr. Garwood: Now, by "you," I mean the Kirby Lumber Company.

Mr. Kirby: I know what you are talking about. I sold to the Rock Island, or made a contract to sell to the Rock Island rather, about 140 out of our 200 miles of road, such mileage as they wanted in building a trunk line through that territory. They advanced $600,000 on the contract, but we got in litigation over the contract in the receivership and before the litigation was ended the period of time in which we would do these things had expired, and the Rock Island refused to go forward with it, but it was a sale to a railroad corporation to be organized for a certain consideration, reserving the trackage rights on a wheelage basis over the lines of road, and 49 per cent of the stock to be owned by the Kirby Lumber Company; it was a mere sale of these existing roads, but no stipulation as to any division to the Kirby Lumber Company unless there was an earning on the stock.

Mr. Garwood: Not to the Kirby Lumber Company, but to the——

6650 Mr. Kirby: To the Rock Island Road, who would own a majority of the stock, or to the railroad company.

Mr. Garwood: You say there was no stipulation as to the division?

Mr. Kirby: No, sir.

Mr. Garwood: Was not that——

Mr. Andrews: I beg your pardon for the interruption, but I think he does not understand the question you asked.

Mr. Garwood: I do not want to mislead him of course.

Mr. Andrews: I do not think the thing should be misstated. I think he understood you to ask if there was no provision in the contract for divisions.

Mr. Kirby: Yes, sir.

Mr. Andrews: I think you answered no, meaning that the Kirby Lumber Company would get anything.

Mr. Kirby: That is what I meant.

Mr. Andrews: There was a provision in there that your railroad company should receive a division?

Mr. Kirby: A division of what?

Mr. Andrews: A division of the through rates, with whoever handled the traffic out that originated on that road.

Mr. Kirby: Well, that would be a matter that could not

6651 concern the Kirby Lumber Company.

Mr. Andrews: I understand that, but I did not want you to misunderstand each other.

Mr. Garwood: He did say the Kirby Lumber Company, but I was about to call his attention to the error. The railroad would receive it?

Mr. Kirby: Yes, because the lumber was destined beyond its line.

Mr. Andrews: And the contract was made with Mr. Yoakum too, in name?

Commissioner Harlan: Well, the contract was not made effective, was it?

Mr. Kirby: No.

Mr. Garwood: The allowance of divisions to the railroad was a part of your plan of organization, was it not?

Mr. Kirby: Well, I do not know anything about that——

Mr. Garwood: Well, it was contemplated——

Mr. Kirby: It was contemplated they would earn some money on the transportation, on the tonnage that they handled, if that is what you mean, but——

Mr. Garwood: Certainly, but it was to get divisions.

Mr. Kirby: Of course it was to get divisions with the con-
6652 necting lines, but I do not remember about anything of that sort being in the contract, although it may have been.

Mr. Garwood: Well, the contract consisted of an exchange of letters between you and Mr. Yoakum, did it not?

Mr. Kirby: And B. F. Yoakum.

Mr. Garwood: That correspondence would show whether or not the question of divisions was discussed?

Mr. Kirby: Yes, and we would be perfectly willing for it all to go in, so far as that goes.

Mr. Garwood: Yes, we will look into that later. It is your opinion, then, that you expected to get divisions on the lumber tonnage that would be originated on the roads of the Kirby Lumber Company which you proposed to incorporate as a railroad?

Mr. Kirby: I had no idea, Judge, that trunk lines were so liberal in the matter of divisions——

Mr. Garwood: Well, I am asking you——

Mr. Kirby: Let me give you the reasons, I would like to answer your questions.

Mr. Garwood: All right.

Mr. Kirby: So I did not consider the matter of divisions and did not suppose that would be so profitable. But the condition
6653 of the contract was that we would realize on an asset which otherwise we could not.

Mr. Garwood: You say you did not realize they were so liberal in their divisions. Did you not have some exact divisions in mind?

Mr. Kirby: Not that I recall. Mr. Yoakum may have in his correspondence. I do not remember.

Mr. Garwood: My recollection is that you had the matter very well reasoned out, and that you had——

Mr. Kirby: That may be true.

Commissioner Harlan: I think we have covered this matter enough. It would not control the Commission, what this witness thought about that matter. It might affect his testimony, but I think he has sufficiently cleared that up.

Mr. Garwood: Your Honor, I think from a legal standpoint that this testimony is admissible, else of course I should not ask it.

Commissioner Harlan: I assume that is so, but——

Mr. Garwood: I think it shows the attitude of the intervenor, and gives us a side light upon the value of his opinions and his standpoint, and while I do not wish to pursue it to any undue length, and I think your Honor must acquit me of any dereliction
6654 in this regard——

Commissioner Harlan: I will acquit you if you stop at this point, Judge Garwood, but I think you have covered the thing fully, and that was the suggestion I made.

Mr. Garwood: Now, I will ask the witness if the contract did not contemplate that you would secure for this railroad that was to be made by the roads hitherto owned by the Kirby Lumber Company——

Commissioner Harlan: Have you some letter which indicates that? If so, be kind enough to state it.

Mr. Garwood: Yes, I was about to state it.

Commissioner Harlan: Very well.

Mr. Garwood: "A division on joint freight rates with connecting lines which will afford to the railroad company on all oil and lumber traffic delivered by it to connecting lines a revenue of not less than three cents per hundred pounds, and on all other traffic received by the railroad company delivered from or by the railroad company to other connecting lines a revenue of not less than five cents per hundred pounds, and if such divisions on business within the State of Texas are fixed at higher rates by the Texas Railroad Commission, in that event such higher rates shall also apply
6655 on interstate business."

Commissioner Harlan: Is that a letter?

Mr. Garwood: That is a letter from Mr. B. F. Yoakum to Mr. Kirby as president of the Kirby Lumber Company of date November 8, 1903.

Commissioner Harlan: Very well.

Mr. Garwood: That is a correct statement of the contract as set out in the letter?

Mr. Kirby: I guess that is correct. I do not recall that the matter of divisions was discussed.

Mr. Garwood: How many of those lines were included within this deal by which you were to incorporate a railroad and operate them?

Mr. Kirby: My recollection is there was about 140 miles, including about five or six miles of terminals in the city of Beaumont.

Mr. Garwood: What was the consideration of that deal?

Mr. Kirby: Well, Judge, the papers there show. I have not looked at them.

Mr. Garwood: I do not care to put it in——

Commissioner Harlan: You mean as stated in the contract?

Mr. Garwood: Yes.

6656 Commissioner Harlan: If you have it there, just state it.

Mr. Garwood: There was a good deal of it, and I did not want to stop to read it right now. It is quite a long contract.

Mr. Andrews: I can answer, if you want me to.

Mr. Garwood: I would be glad if you would.

Mr. Andrews: It was a million dollars, to be issued guaranteeing such additional amount as the Railroad Commission of Texas might authorize, less $1,000 a mile for stock. It was definitely known as one million dollars.

Mr. Garwood: That statement by Mr. Andrews is correct?

Mr. Kirby: That is my recollection of it. I think that is right.

Mr. Garwood: What was to become of the stock of the railroad company which was to be organized?

Mr. Kirby: My recollection is that the Kirby Lumber Company should own 49 per cent and the Rock Island or Mr. Yoakum the other 51 per cent.

Mr. Garwood: And the Kirby Lumber Company as such would own the stock directly of the New Railroad corporation?

Mr. Kirby: Yes, sir.

Mr. Garwood: And the Rock Island interests would own
6657 the majority of the other stock?

Mr. Kirby: Yes, sir.

Mr. Garwood: Now you actually incorporated that railroad?

Mr. Kirby: Well, there was a charter obtained.

Mr. Garwood: Did you not go so far as to make a transfer of all of your roads embraced within these preliminary negotiations to the newly organized corporation and make a deed?

Mr. Kirby: That may have been. I don't remember; I do not think so. Possibly it may have been so.

Mr. Garwood: I will state to you that is my understanding.

Mr. Kirby: Papers were executed for $600,000 that was advanced to us, but I do not think any transfer was actually made to the railroad company.

Commissioner Harlan: If counsel ascertains that afterward he may state it for the record.

Mr. Garwood: Who constructed the Orange & Northwestern Railroad?

Mr. Kirby: I do not know except from hearsay.

Mr. Garwood: Well, just state it.

Mr. Kirby: The Orange mill interests are supposed to have done it.

6658 Mr. Garwood: That runs from Orange to a connection with the Santa Fe about Buna?

Mr. Kirby: Yes, sir.

Mr. Garwood: And thence out to Newton?

Mr. Kirby: Yes.

Mr. Garwood: Do you know what interests own that railroad?

Mr. Kirby: The Frisco.

Mr. Garwood: I notice you have a mill at Call.

Mr. Kirby: Yes, sir.

Mr. Garwood: There is Call Junction and Call. Where is Call Junction?

Mr. Kirby: Call Junction is on the Santa Fe, and the mill at Call is on the Frisco.

Mr. Garwood: What is the production of that mill?

Mr. Kirby: It is about 150,000 feet a day.

Mr. Garwood: About what is your average output of cars of lumber?

Mr. Kirby: I suppose, running the mill day and night, as we often do, about 300 cars a month, maybe more than that.

Mr. Garwood: Can you state about what proportion of that traffic goes to the Frisco on which your mill is situated, and what to the Santa Fe?

6659 Mr. Kirby: There is not a great deal going to the Frisco now. Probably it will all go Frisco after a while.

Mr. Garwood: Has any been going to the Frisco up to this time to any great extent?

Mr. Kirby: Yes, sir.

Mr. Garwood: What proportion?

Mr. Kirby: I could not tell the percentage; it is not very large. Where the Frisco have better rates than the Santa Fe, if that is what you want to know. The Santa Fe, so long as the rates are equal, would have the right to the first call on the business out of that mill, but there are a number of points where the rates are not equal.

Mr. Garwood: And then you ship over the Frisco?

Mr. Kirby: Yes, sir.

Mr. Andrews: For your information, here is a statement as to the cars by the year, but not by the mill, which was offered in evidence. It gives the Santa Fe and other railroads, and shows those on the Frisco. It does not specify any individual mill.

Mr. Garwood: That proposition applies to all of these mills, wherever you have a connection with another line, the Santa

6660 Fe has the call on the traffic, provided the rates are equal?

Mr. Kirby: Yes, sir.

Mr. Garwood: And that is applicable to all of your mills wherever situated?

Mr. Kirby: Yes, sir—well, no; all mills east of the Neches River.

Mr. Garwood: And those west are not embraced within that agreement?

Mr. Kirby: No; you see we have some mills on your line and you get all of it.

Mr. Garwood: Now, you are a railroad man also, are you not, as well as a lumber man and a lawyer?

Mr. Kirby: Well, I am a director in a company—yes, I am president of a railroad company.

Mr. Garwood: What railroad is that?

Mr. Kirby: That is an important road down there, the Burrs Ferry, Browndel & Chester. You may not know it by its name, but doubtless you have transportation over it.

Mr. Garwood: I receive transportation over it?

Mr. Kirby: I had supposed Judge Andrews would exchange with you.

Mr. Garwood: I hope you will regulate that and put me on

6661 your list. Where does the Burrs Ferry, Browndel & Chester appear on the map?

Mr. Kirby: There is only eleven miles in operation. It begins at Rockland on the Southern Pacific and runs east eleven miles.

Mr. Garwood: Where is its ultimate destination?

Mr. Kirby: Well, the chartered termini west is at Chester, on that orphan of the M. K. & T., as they call it, and the east is at the Sabine River, about eighty miles.

Mr. Garwood: How far is it from connection with the Santa Fe?

Mr. Kirby: About twenty miles at the present time.

Mr. Garwood: What is the general character of that road?

Mr. Kirby: It is laid with new 60 pound rail, rock ballasted, and the best piece of property in east Texas for its length—I mean physically, I do not mean in earning power.

Mr. Garwood: Is it a common carrier?

Mr. Kirby: Yes, sir.

Mr. Garwood: What enterprises are situated along there?

Mr. Kirby: There is one saw mill owned by the Aldridge Lumber Company, and a rock quarry, I believe owned by Dar-
6662 ragh Brothers of Galveston, and a turpentine concern, a New Orleans concern, and there are three or four little neighborhood mills out there, but they have not shipped any in two or three years.

Mr. Garwood: Your chief tonnage is rock and lumber?

Mr. Kirby: A little more rock than lumber on the tonnage basis.

Mr. Garwood: Where do you ship your rock to?

Mr. Kirby: Sabine Pass, when there is any work going on there. It is crushed rock for construction material, concrete and road building.

Mr. Garwood: Then if there is not any jetty going on at Sabine Pass, your rock tonnage will be cut off very much?

Mr. Kirby: No, there is a large commercial demand for crushed rock for road building and building all that sort of thing.

Mr. Garwood: You say that is one of the best roads in east Texas?

Mr. Kirby: Physically.

Mr. Garwood: And you of course expect it to get better as the country develops, do you not?

Mr. Kirby: Well, I don't know that that will improve
6663 very largely, because we have it rock ballasted. I don't know much else to do to it.

Mr. Garwood: I mean its general business and conditions will improve as the country develops.

Mr. Kirby: I could not say that; after the lumber is cut out I don't know about its general business. Improve? I do not think so, because its tonnage will diminish of course.

Mr. Garwood: You think, then, that the lumber will disappear along the line very soon?

Mr. Kirby: No.

Mr. Garwood: About how long will the lumber tonnage be left there?

Mr. Kirby: That is something like asking how big is a piece of chalk; it depends how fast it is cut off. If it is not cut any faster than it is now, it would be there a hundred or two years.

Mr. Garwood: There is not much cutting going on, then, those mills are not large on that branch?

Mr. Kirby: No. I have graded that road over as far as the Santa Fe on my way to Sabine and got my bridges in and was ready to lay the track when the panic came on in 1907 and I stopped and have not done anything.

6664 Mr. Garwood: It is graded, then, to Browndel?

Mr. Kirby: Yes, sir, it crosses the Santa Fe there.

Mr. Garwood: You have a mill at Browndel?

Mr. Kirby: The Kirby Lumber Company has a mill at Browndel.

Mr. Garwood: When you complete over to Browndel you will have an additional outlet besides the Santa Fe, then, for your lumber, will you not?

Mr. Kirby: Where?

Mr. Garwood: If you build over to Browndel——

Mr. Kirby: Oh, for the product of that mill?

Mr. Garwood: Yes.

Mr. Kirby: Yes, of course that would be a two-line mill.

Mr. Garwood: You own a controlling interest in the stock of the Burrs Ferry, Browndel & Chester?

Mr. Kirby: I own it all.

Mr. Garwood: You own the whole thing, then?

Mr. Kirby: Yes, sir.

Mr. Garwood: You are a stockholder in the Kirby Lumber Company, are you not?

Mr. Kirby: Yes, sir.

Commissioner Harlan: Do you mean the Kirby Lumber Company owns it or you personally?

6665 Mr. Kirby: I do personally. The Kirby Lumber Company has no interest in it, and is not a shipper over it.

Mr. Garwood: But when you complete into Browndel you will then have an outlet for your lumber. You of course see no reason why the Burrs Ferry, Browndel & Chester should not receive a transportation charge for any lumber of yours that it might ship from Browndel over to the T. & N. O., do you?

Mr. Kirby: No, sir.

Mr. Garwood: None in the world?

Mr. Kirby: No.

Mr. Garwood: Well, neither do I; we agree thoroughly on that proposition. Now, are——

Mr. Kirby: There might a reason arise, however.

Mr. Garwood: Well, there would not be any from the condition of facts I have stated to you?

Mr. Kirby: No.

Mr. Garwood: Things might happen subsequently that would change things, but on that situation you see no reason why your road over there should not receive a transportation charge as one of the best roads in that section?

6666 Mr. Kirby: I see no more reason why the Kirby Lumber Company should deny the Burrs Ferry, Browndel & Chester a division or complain of a division than they could complain

of the Santa Fe or the Southern Pacific or anybody else that did. The Kirby Lumber Company did not build this road as a plant facility, and is in no way interested.

Mr. Garwood: But you did build it.

Mr. Kirby: I have not done it yet, because I have not built to get the product.

Mr. Garwood: But you are the Kirby Lumber Company.

Mr. Kirby: Not quite. I am 51 per cent.

Mr. Garwood: Are any officers of the Kirby Lumber Company or its employees officers and employees of the Burrs Ferry, Browndel & Chester Company?

Mr. Kirby: Yes, sir.

Mr. Garwood: Who?

Mr. Kirby: Well, I am president of both concerns.

Mr. Garwood: That is one.

Mr. Kirby: Mr. Hancock is the only other one. He acts as traffic manager of the Burrs Ferry, Browndel & Chester.

Mr. Garwood: Are there any others?

Mr. Kirby: I do not recall any other.

Mr. Garwood: Who is the general attorney of the Burrs
6667 Ferry, Browndel & Chester?

Mr. Kirby: That is Judge Hornsby.

Mr. Garwood: Has he any duties in connection with the Kirby Lumber Company?

Mr. Kirby: Yes, sir, he is connected with it as well.

Mr. Garwood: What place does he hold with the Kirby Lumber Company?

Mr. Kirby: He is land and tax commissioner.

Mr. Garwood: By virtue of their official position on the Burrs Ferry, Browndel & Chester, these officers are entitled to receive, and do receive, transportation, do they not?

Mr. Kirby: From some roads, yes.

Mr. Garwood: Do you?

Mr. Kirby: Well, not necessarily for that. I am a big railroad man, too. I am a director in other systems.

Mr. Garwood: Well, that is gratifying. What other system are you also a director of?

Mr. Kirby: The Frisco and the Santa Fe, local lines down there.

Mr. Garwood: You are a director in those roads?

Mr. Kirby: Yes, sir.

6668 Mr. Garwood: And of course you do not know whether the transportation which you receive is issued to you by virtue of your directorship in these larger systems, or by virtue of your connection with the Burrs Ferry, Browndel & Chester?

Mr. Kirby: I have not looked at the passes; in fact haven't been any this year. They used to be issued to me, however, on account of my directorship in those other lines. Whether they are on account of the Burrs Ferry now I do not really recall.

Mr. Garwood: I will say there is a general complaint, as appears from the record, of the very great scarcity of passes since the first

of January. I do not know the cause. You do considerable traveling for the interests of the Kirby Lumber Company, do you not?

Mr. Kirby: Well, some.

Mr. Garwood: So do these other officers that you mentioned?

Mr. Kirby: Well, it is pretty rarely that either Hancock or Hornsby are away on business for the Kirby Lumber Company.

Mr. Garwood: Now, when you travel on these free passes, you do not undertake to disassociate yourself as a railroad director as or a railroad president from yourself as president of the Kirby Lumber Company, do you?

6669 Mr. Kirby: No, sir.

Mr. Garwood: You travel in your general capacity, and do such business as comes to you in the general course of business?

Mr. Kirby: Yes, sir; wherever I am to go, if I have any transportation over the road, I use it.

Mr. Garwood: And you assume——

Mr. Kirby: That is what it is given to me for.

Mr. Garwood: You are entirely correct. Are you a large stockholder in—was it the Frisco and Santa Fe?

Mr. Kirby: Yes.

Mr. Garwood: Are you a large stockholder in those roads?

Mr. Kirby: No, sir; I do not own any stock in either one except the qualifying shares in the corporations of which I am a director, some of the little lines down there.

Mr. Garwood: You did not acquire that as an independent investment?

Mr. Kirby: No.

Mr. Garwood: That is merely a qualifying share?

Mr. Kirby: Yes.

Mr. Garwood: Do you participate in directing the general policies of the Frisco or Santa Fe?

6670 Mr. Kirby: I have not yet.

Mr. Garwood: You do ride, however, on the transportation; that is about the extent of your participation in the operations of the Santa Fe?

Mr. Kirby: Well, yes; but I attend directors' meetings of the other concerns, though.

Mr. Garwood: Of the Burrs Ferry, Browndel & Chester?

Mr. Kirby: No, of the Frisco and vote on mortgages and things of that sort.

Mr. Garwood: You help make a quorum?

Mr. Kirby: Yes.

Mr. Garwood: What mercantile establishments are there on the Burrs Ferry, Browndel & Chester?

Mr. Kirby: Well, all of these concerns that I have mentioned maintain stores. The Aldridge Lumber Company——

Mr. Garwood: They are merely commissaries largely?

Mr. Kirby: Yes, they have a good big store there, though.

Mr. Garwood: What towns or settlements are there on it?

Mr. Kirby: There are none except around these plants; that is,

on the eleven miles completed. Of course there is a town at Rockland, but that is a mill plant too.

Mr. Garwood: Does the Burrs Ferry, Browndel & Chester
6671 road receive divisions on interstate traffic?

Mr. Kirby: Yes, sir.

Mr. Garwood: And on state traffic?

Mr. Kirby: Yes, sir.

Mr. Garwood: Does it receive divisions from the Gulf, Colorado & Santa Fe?

Mr. Kirby: I think so.

Mr. Garwood: Your divisions on the Burrs Ferry, Browndel & Chester have not been cancelled by the Santa Fe or any of its other connecting lines; I mean no notice of cancellation has been given, so far as you know?

Mr. Kirby: No, I think not.

Mr. Garwood: Do you know what those divisions are with the Burrs Ferry, Browndel & Chester?

Mr. Kirby: Well, in a general way. I would rather speak from the tariffs, but they are from one to four cents.

Mr. Garwood: Have you any higher than four cents?

Mr. Kirby: I think not.

Mr. Garwood: You think those are reasonable divisions, don't you?

Mr. Kirby: Well——

Mr. Garwood: Considering that you originate the traffic——

6672 Mr. Kirby: I guess so. I would get more if I could, but that is all the T. & N. O. will let me have.

Mr. Garwood: You at least do not think they are unreasonably high?

Mr. Kirby: No.

Mr. Garwood: You would not be willing to concede that they were, would you?

Mr. Kirby: No.

Commissioner Harlan: I understood you to say that the Kirby Lumber Company is operating no mill on that line?

Mr. Kirby: Not at all. It has never shipped a pound of freight of any kind over that line.

Commissioner Harlan: Have you or the Kirby Lumber Company any interest in the Aldridge mills on that line?

Mr. Kirby: No, sir.

Commissioner Harlan: Or in the quarry?

Mr. Kirby: No, sir.

Commissioner Harlan: Have you any interest in any industry on that line?

Mr. Kirby: No, sir.

Commissioner Harlan: When I ask you about the interest, I mean direct or indirect or equitable or otherwise.

6673 Mr. Kirby: No, no interest. We have a lot of lumber land through the territory and there is a lot of this Gallup timber

which will have to come out some time, but none has ever moved yet.

Commissioner Harlan: Have you any interest in any of those industries on that line as holder of mortgages or bonds or any financial relation at all?

Mr. Kirby: No. At one time I endorsed Mr. Aldridge's note. Mr. Aldridge is a friend of mine who owns a mill and owns the stock in the corporation, but he has since paid it off, all but a little. There may be a little balance still outstanding.

Commissioner Harlan: It did not give you any interest in the operations of his property?

Mr. Kirby: No.

Mr. Walter: You have graded the line up to your mill at Browndel?

Mr. Kirby: You mean—yes, we crossed the railroad at Browndel near our mill.

Mr. Walter: You are building up to that mill?

Mr. Kirby: No, we are not now. We would if we had the money; that is, if I had the money.

6674 Mr. Walter: You have graded the road?

Mr. Kirby: Yes.

Mr. Walter: And made all preparations to get there?

Mr. Kirby: Yes, sir.

Commissioner Harlan: What is the length of the grade?

Mr. Kirby: About 20 miles from the end of the track over to the Santa Fe.

Mr. Walter: When you get up there, you expect to ship products of your mill over that line?

Mr. Kirby: That will depend upon circumstances. If it is any benefit, yes; otherwise not.

Mr. Walter: If you can get to the markets on the same rate you get over the Frisco, over the Browndel or Santa Fe, you would ship over your line?

Mr. Kirby: No, the Santa Fe would get the business then under our contract; that is, at the same rate.

Mr. Walter: Suppose the Santa Fe does not reach it?

Mr. Kirby: It does, though.

Mr. Walter: If it does not reach the point you are going to reach, you will ship over the Browndel, Burrs Ferry & Chester?

Mr. Kirby: Yes.

6675 Mr. Walter: You do not consider that that will interfere in anywise with the railroad's collecting and receiving just and reasonable rates, whether joint or local?

Mr. Kirby: No, so far as divisions are concerned with the connecting lines.

Mr. Walter: That is purely a railroad proposition?

Mr. Kirby: Yes, sir.

Mr. Walter: And it does not affect the Kirby Lumber Company in anywise?

Mr. Kirby: It does not, because the Kirby Lumber Company does not patronize it.

Mr. Walter: I say when you get to shipping over it, it will not affect the lumber company in anywise. It is a railroad proposition?

Mr. Kirby: It is a railroad proposition, but it could affect the Kirby Lumber Company; yes, sir. It could affect the majority interest in the Kirby Lumber Company very substantially. Suppose the connecting lines would give me ten cents.

Mr. Walter: But you say a reasonable rate is one to four cents. If you only get a reasonable allowance for that service, will that affect the Kirby Lumber Company at all?

6676 Mr. Kirby: If you perform the service, you are entitled to charge for it, in my judgment.

Mr. Walter: Who?

Mr. Kirby: If the railroad company performs the service, and is a bona fide carrier, it is entitled to make rates and charge for it.

Mr. Walter: Regardless of who owns the product which goes over it?

Mr. Kirby: The only feature there, I should think, which would authorize any interference with it, would be whether the rates created a condition of inequality amounting to discrimination.

Mr. Walter: We will suppose your line has reached Browndel and you are shipping over it. Here is the Aldridge plant. You now have a blanket rate reaching all markets. If the joint rate is cut out because of the ownership of the lumber shipped from the Kirby mills, you being president of the road, what would you say as to the effect upon the Aldridge plant?

Mr. Kirby: I do not think I followed you there.

Mr. Walter: I understood you to say this morning that the only justification for a blanket rate was the equality it put every-

6677 body upon.

Mr. Kirby: Yes, sir.

Mr. Walter: The Kirby Lumber Company is shipping from Browndel.

Mr. Kirby: Yes.

Mr. Walter: And the Aldridge company is shipping from its plant.

Mr. Kirby: Yes, sir.

Mr. Walter: Both over the Burrs Ferry, Browndel & Chester. We will suppose the joint rate has been cut out solely because and only because you happen to be the president and owner of the railroad, and a majority holder of the Kirby Lumber Company. What do you say as to the effect of that action upon the Aldridge plant?

Mr. Kirby: The Aldridge plant would be at a disadvantage.

Mr. Walter: What reason can you give for that?

Mr. Kirby: The only reason you could give for that would be that the Kirby Lumber Company was getting such divisions that it was occupying an advantageous position with respect to its competitors, creating a condition of inequality in rates to markets, and therefore the conditions would have to be regulated.

6678 Mr. Walter: Then you would make the Aldridge man pay more money by that action?

Mr. Kirby: Yes. Before I got any divisions with the T. & N. O.

after building this line he had to pay the local, and they are at a disadvantage.

Mr. Walter: Are you willing to say that the Aldridge plant located on that road should be compelled to pay upon the blanket rate solely because some other shipper on that line is interested indirectly through you in the railroad company?

Mr. Kirby: Not solely for that reason; no.

Mr. Walter: Is there any justification for that action at all in your mind?

Mr. Kirby: There would not be in this case, Mr. Walter, if that is what you are inquiring about.

Mr. Walter: Yes. Supposing your mill is operating and shipping over the line.

Mr. Kirby: Mr. Aldridge ought to have the same rate to market that everybody else located as he is here, and I understand that to be involved in this inquiry.

Mr. Walter: He is located upon a line of which you are the president, and you are also the president of the Kirby Lumber
6679 Company and the majority stockholder?

Mr. Kirby: Yes.

Mr. Walter: And we will suppose that line has been completed up to Browndel and you are shipping over it. Do you say the fact he now is entitled to the joint rate would be changed by your shipping over that line?

Mr. Kirby: I doubt if it would.

Mr. Walter: Do you think there is any justification for it at all——

Mr. Kirby: I doubt if there is any. The only objection I have is where they are put in as a plant facility; I think a carrier that is doing business in good faith is entitled to compensation for that business.

Mr. Walter: You say a railroad is necessary for the lumber business?

Mr. Kirby: Yes.

Mr. Walter: Which is the more necessary, the line leading from your mill to the market or the line leading from the tree to your mill?

Mr. Kirby: There is not either one more necessary. They are both indispensible.

Mr. Walter: How can you say one is a plant facility and
6680 the other is not?

Mr. Kirby: Because one is owned and directed by the plant, just the same as the carrier which hauls the logs into the mill. It is a plant facility, without which you cannot operate. You can build your plant on the other railroad, and of course you have to have the main railroad when you ship, but if you had your plant facility in the form of your railroad and no saw mill and therefore no plant, you would not have anything to ship.

6681 Mr. Walter: It is purely a question of ownership, is it not?

Mr. Kirby: No, sir, not necessarily a question of ownership at all.

Mr. Walter: Suppose I go down there and build a railroad, and you locate your mill on it, and I haul logs for you; is that railroad a part of your plant facility?

Mr. Kirby: Not necessarily, that railroad is not, but the railroad I build to get my logs on to your railroad is a plant facility.

Mr. Walter: Would you make any difference because one man built it or another man built it?

Mr. Kirby: No, but it would make a difference as to whether one is a trunk line and the other is not, whether one is a carrier performing service to the public, and the other is a mere plant facility. There is a distinction.

Mr. Walter: Where do you draw the line?

Mr. Kirby: I draw the line—the true basis of drawing the line is the interest served.

Mr. Walter: The interest served?

Mr. Kirby: It does not make any difference how long your tram road is, or the character of its construction, if it only serves
6682 one interest, or substantially one, it is a plant facility, a private property.

Mr. Walter: Then if I should say of all the tonnage hauled over the Santa Fe rails in Louisiana 98 per cent was lumber, would you say that it made any difference, the fact it is all one commodity?

Mr. Kirby: No, the Santa Fe does not own the tonnage, and if it did, I presume it would.

Mr. Garwood: Suppose it does substantially own the tonnage?

Mr. Kirby: Well, I think probably you ought to have a commodity law in that case.

Mr. Coleman: The remark of Mr. Garwood is uncalled for——

Mr. Garwood: I withdraw the statement.

Mr. Coleman: It is not personal to the Santa Fe, but I want to call your attention to the way the examination is proceeding. When Mr. Garwood started to examine Mr. Kirby, we asked the relevancy and materiality of it, and he promised to show it. He then proceeded to show that the Santa Fe controlled Mr. Kirby, and then switched around and showed that Mr. Kirby had some kind of contract by the signing of which he controlled us absolutely. He then went
6683 on to produce a contract with Mr. Yoakum which would show that Mr. Kirby did not consider anybody owned him. Mr. Walter is going into his opinions, and it seems to me we are wasting time.

Commissioner Harlan: I have had that view myself for some time, but at the same time Mr. Kirby has expressed some opinions about this, and I assume Mr. Walter wants to test this matter.

Mr. Walter: Yes, and I do not want his opinion to stand without some examination. This morning, Mr. Kirby, you spoke of equality. You are down in Southeast Texas.

Mr. Kirby: Yes, sir.

Mr. Walter: You have a line at Beaumont.

Mr. Kirby: Yes.

Mr. Walter: Let us take a line located in Southern Arkansas, started as a common carrier, serving two or three small mills, as well

as serving the larger interests. You understand that the effect of abolishing the joint rates altogether will mean those that are chartered as common carriers must charge their local rate up to the junction point.

Mr. Kirby: Yes, sir.

Mr. Walter: Now that mill is located 200 miles nearer the
6684 market than a mill, we will say, on this line. Here is a small mill on a small road chartered as a common carrier, and it has no interest whatever in the road. All the investment is there. What do you say as to your right to get to market on the same rate he does?

Mr. Kirby: That is the blanket system——

Mr. Andrews: Just a moment——

Commissioner Harlan: Yes, we will not go further into that.

Mr. Walter: The Burrs Ferry, Browndel and Chester has in effect a Texas rate, whereby it refunds rates on logs for the lumber companies down there.

Mr. Kirby: Yes.

Mr. Walter: Do you ship anything over the Orange & Northwestern to Beaumont?

Mr. Kirby: No.

Mr. Walter: Do you ship anything over the Orange & Northwestern to your mill?

Mr. Kirby: No.

Mr. Walter: Do you furnish logs to anybody else who ships over that line?

Mr. Kirby: No. Probably what you are inquiring about, we ship logs into Beaumont over the Beaumont & Sour Lake & Western.

6685 Mr. Walter: When those logs are sawed in your mill you have it refunded, have you?

Mr. Kirby: Yes, sir, that is for the main line haul, but not for the cost of maintaining our tram roads.

Mr. Walter: What difference is there in that road which hauls logs to your mill and anybody else's road, suppose you built it?

Mr. Kirby: The difference is entirely whether it is a plant facility and necessary for the business. We have got to maintain it, and the difference is whether it produces an equality of opportunity among the manufacturers. There is no difference to the public.

Mr. Walter: In that case the refund on your freight is refunded to you for no investment in that line?

Mr. Kirby: The amount I pay the Beaumont, Sour Lake & Western is refunded. None of my cost of logging is refunded.

Mr. Walter: On the road to your mill——

Mr. Kirby: Not from the junction point to the mill.

Mr. Walter: Is not that just as much of a necessity to you in marketing your logs as any other mill?

Mr. Kirby: No, because I would go and build my mill out there.

Mr. Walter: Then it is purely the location of the mill.

6686 Mr. Kirby: Insofar as that goes.

Mr. Walter: Suppose in every case the mill is built in the

forest, and only the lumber is hauled out; does that change the situation in your view as to the justness of the situation, of divisions to the railroad?

Mr. Kirby: Yes, sir.

Mr. Walter: They are justified then if they are reasonable?

Mr. Kirby: No, I do not think they are entitled to anything any more than the man who hauls his logs out, because the lumber is cheaper tonnage and easier to handle.

Mr. Walter: In calculating the cost of these operations of your road and spurs, what did you take into consideration?

Mr. Kirby: Track laying, maintenance of track and train expense; the whole expense.

Mr. Walter: Did you calculate in that the material you had to carry in order to lay these roads?

Mr. Kirby: The cost of material went in, of course.

Mr. Walter: It is not all down at all times, is it?

Mr. Kirby: Well, the material is not in, this is an operating cost, and not capital account.

Mr. Walter: This is purely the cost of laying the rails and
6687 hauling the logs over them?

Mr. Kirby: It is the operating cost. We charge the rails in the capital account. That would be in another account all together.

Mr. Walter: Does it go into the cost of moving your forest products?

Mr. Kirby: Not the value of the rails.

Mr. Walter: You have an average movement, I think you said, of 351,781 tons of forest products, and that the operating cost of that was $399,000, over one dollar a ton for the mere cost of operation.

Mr. Kirby: Yes, sir.

Mr. Walter: What was the average haul on those logs?

Mr. Kirby: Well, you could tell by looking at that table. I should say about 12 or 15 miles.

Mr. Walter: Then the average cost of transporting the logs was——

Mr. Kirby: It might be 20 miles.

Mr. Walter: Why do you increase it from 12 to 20?

Mr. Kirby: I was thinking about the length of the tram roads, because some of the tram roads including the spur line and
6688 the logs come from the spurs as well as from the main line, and we have one forty miles long.

Mr. Walter: It is a good deal more expensive to operate the short lines than the main line, is it not, that is the trunk line, per ton? It costs a good deal more to transport a ton over one of these short lines than over the main line?

Mr. Kirby: I do not know that the transportation is greater, but the——

Mr. Walter: Well, take all expenses then.

Mr. Kirby: The cost of laying those tracks, of course you do not construct them as substantially as you do your main line, but that is very frequent and constant, so it makes your terminal cost of that

kind much higher according to the movement per foot or yard that your main line cost.

Mr. Walter: And for the same distance a short line would be entitled to a greater compensation than would the main line for a similar distance?

Mr. Kirby: If you are going to absorb the cost, yes.

Mr. Walter: That is part of the business of a railroad, to take care of the cost out of its rates.

Mr. Kirby: No,I think not.

6689 Mr. Marble: These figures concerning which you have been questioned, was that three hundred thousand and some odd tons of lumber or logs?

Mr. Walter: Logs and forest products generally, whatever he hauled.

Mr. Kirby: Yes, ties and everything.

Mr. Marble: That is the weight of the inbound shipments of logs to your mill?

Mr. Kirby: Yes.

Mr. Marble: And the outbound shipments of lumber would be about how many thousand tons?

Mr. Andrews: Those are what are handled on the tram roads of the Kirby Lumber Company up to the mill.

Mr. Walter: And from the mill out to the trunk line road.

Mr. Andrews: No.

Mr. Walter: Does not that include the tonnage you hauled from Call to Call Junction?

Mr. Kirby: No.

Mr. Walter: How much was that tonnage?

Mr. Kirby: I do not remember the figures there. It is the number of cars shipped last year from Call, and most of them passed over the Santa Fe.

6690 Mr. Walter: Did this movement include the cost of that tonnage, the $399,000?

Mr. Kirby: No, this is logging cost there, and this is a mill operation, moving the lumber out there.

Mr. Walter: Why did you make a difference?

Mr. Kirby: One is one thing, and one another. You keep your mill and logging account separately.

Mr. Walter: That is, you would say the movement of the lumber was not a part of your plant facilities then?

Mr. Kirby: We have no facilities of that kind for moving lumber.

Mr. Walter: Don't you haul lumber sometimes from Call to Call Junction?

Mr. Kirby: We do, with the Santa Fe Railroad.

Mr. Walter: With your own engines?

Mr. Kirby: Yes, sir.

Mr. Walter: But you do not consider that part of your plant facility?

Mr. Kirby: It is not our plant facility.

Mr. Walter: Well, the movement?

Mr. Kirby: Our mill is on the Santa Fe Railroad.

Mr. Walter: You haul it two miles?

6691 Mr. Kirby: I perform a service over the Santa Fe Railroad.

Mr. Walter: Why didn't you include that in the cost of operating the railroad part of your mill?

Mr. Kirby: That is a mill cost.

Mr. Walter: That is a mill cost?

Mr. Kirby: Yes, sir.

Mr. Walter: Why should the movement of the finished material out be a part of the mill cost, when the movement of the logs in is considered otherwise as a railroad cost?

Mr. Kirby: Well, one is a movement of logs, and the other of lumber. In your mill cost you are making lumber and putting it in the market, and in the railroad cost you are getting the logs to the mill.

Mr. Walter: Then you make no difference in the cost of unloading——

Mr. Kirby: I do not understand.

Mr. Walter: What is the difference?

Mr. Kirby: One is logs, and the other is lumber. It may be two by four, or something else.

Mr. Walter: That is all the difference you know?

Mr. Kirby: There may be a little else.

6692 Mr. Walter: I wanted to know why you had logs in here and did not count the lumber cost of moving it by your engine.

Mr. Cowan: He already explained it fully, that it is a matter of accounting of the mill, that they kept it that way. Whether there is any good reason or not, they kept it. It was on the logging side of the account.

Mr. Walter: Then the movement of the lumber is not kept separately from the cutting of logs in the mill and drying of them and planing them?

Mr. Kirby: All the movement of lumber—there is no movement of lumber except loading it in the cars. It is part of your mill cost and loading expense.

Mr. Walter: I asked you if your engine did not take those loaded cars and move them.

Mr. Kirby: They certainly do.

Mr. Walter: I want to ask you why you do not include in your railroad operations the movement of the lumber as well as the logs.

Mr. Kirby: Because it is no part of the logging. I have no railroad operation. My accounts reflect my logging or my mill manufacture. I have no other kind of account.

Mr. Walter: Where would we find this account?

6693 Mr. Kirby: In the mill account.

Commissioner Harlan: I see the point. Counsel has a definite thought in his mind and wants to work it out of the witness. Can you answer the question?

Mr. Kirby: I cannot, except that it is a mere accounting matter. We have no purpose in it.

Commissioner Harlan: Are there any other questions?

Mr. Walter: Now you spoke of the $397,000 as the cost of the spurs and bringing your logs over the main line to the mill.

Mr. Kirby: Yes.

Mr. Walter: How much of that cost was spurs only, and how much main line?

Mr Kirby: We have not made up those figures. I could not tell you.

Mr. Walter: You have been in the business many years. What is your best judgment?

Mr. Kirby: Estimating it on the percentage basis, I should say the main line cost was probably thirty per cent of the total; that is just a guess. Main line and train service, that would include train service.

Mr. Walter: And by the spur service you mean only the
6694 small spurs which run out and pick up the log and bring it to the main line, including the team skidder and loader, and all that sort of thing?

Mr. Kirby: Yes, sir, it would not exceed that. That would be a very liberal estimate. That would be over 60 cents per thousand, and it would not cost that.

Mr. Walter: How much of your total investment is railroad property, and how much mill property?

Mr. Andrews: If the Commission please, I understood that that question was passed on almost directly this morning.

Commissioner Harlan: I hardly understood that the question put now was put this morning.

Mr. Andrews: The immediate question was not, but the question as to the value of his investment in milling interests was, and was the subject of discussion. We object to it, as to what his mills cost him.

Commissioner Harlan: The objection is sustained.

Mr. Walter: I think it is but fair to show that every one of these short lines that has been mentioned at all in any of these proceedings, leaving out of course the Burrs Ferry, Browndel, and Chester, have given every particle of information that has been asked for.

6695 Commissioner Harlan: I do not understand that question has been asked of any witness since the hearing started.

Mr. Walter: Of all of them.

Commissioner Harlan: That question as asked is, what is the value of the investment including the mill and railroad.

Mr. Walter: I asked him how much of it is railroad.

Commissioner Harlan: There is no objection to asking him how much is railroad cost, but you included the mill, and that is what counsel objected to.

Mr. Walter: Very well, let us have that railroad valuation.

Mr. Kirby: The valuation shown on our books, which is a good deal less than the cost, but that is the valuation placed on it by Price, Waterhouse & Company, is $1,503,861.30.

Mr. Walter: Does that include the equipment?
Mr. Kirby: Yes, sir.
Mr. Walter: And right of way?
Mr. Kirby: Right of way, and everything. We do not obtain any permanent right of way.
Mr. Walter: How much did it cost?
Mr. Kirby: I have not the figures, but more than that.
6696 Mr. Walter: How much?
Mr. Kirby: I could not tell you.
Mr. Walter: Just an estimate.
Commissioner Harlan: Can you give any impression on that question?
Mr. Kirby: I would not want to give any impression. We have increased our book value, but our book cost was less than the actual cost. We have written off since then 7½ per cent for depreciation.
Mr. Coleman: I would like to ask whether Mr. Kirby will be available during all the present hearing.
Mr. Kirby: Yes, I will be here.
Mr. Walter: You spoke a while ago about your company's inability to get into Galveston because of some division of the rate. Will you kindly state that again.
Mr. Kirby: No, I was talking about a specific instance.
Mr. Walter: Give us that specific instance.
Mr. Kirby: When the causeway down there was buying its stuff, the material for its construction, we bid on that business, and we found the condition to be such as I stated this morning.
Mr. Walter: What was it?
Mr. Kirby: Our rate was eight cents, and the Lake Charles
6697 rate to begin with was only six cents, and that is to meet water competition, and we do not complain of it, but when you take four cents division out of it, the Southern Pacific only gets two cents for hauling the stuff to Galveston.
Mr. Walter: Who was it gets four cents?
Mr. Kirby: The log mill company.
Mr. Walter: You are mistaken about that.
Mr. Davis: It is two cents.
Mr. Walter: Two cents is the correct division.
Mr. Davis: We get two cents regardless of the haul.
Mr. Marble: Going to this contract with the Santa Fe company, which has as one of its features, an agreement by the Kirby Lumber Company for exclusive routing when the rates are the same, you are still acting under that contract?
Mr. Kirby: Yes, sir.
Mr. Marble: That was a consideration on your part in that contract, that promise to the Santa Fe?
Mr. Kirby: Yes, sir.
Mr. Marble: What did it give you in return for that?
Mr. Kirby: Well, I do not know of anything that it gave actually, but the Santa Fe had these lands, and I wanted to buy them, and I made an option contract with them, and have an option con-
6698 tinuing as long as this routing exists, so that may be a consideration or not; but I wanted that timber for my mills when I needed to use it.

Mr. Marble: Could you have secured the option without that agreement?

Mr. Kirby: I doubt if I could.

Mr. Marble: Could you have secured the option at a higher rate of interest without that agreement?

Mr. Kirby: I very much doubt it.

Mr. Marble: Was there a concession to you in the rate of interest?

Mr. Kirby: I think not. They have loaned other people money for less.

Mr. Marble: Without such agreement for routing?

Mr. Kirby: I do not know what their agreements are.

Mr. Marble: You have stated that the interest on the amount loaned was five per cent?

Mr. Kirby: Yes.

Mr. Marble: And on this other amount——

Mr. Kirby: That is five per cent.

Mr. Marble: No, on the $500,000 you borrowed, you paid seven per cent?

6699 Mr. Kirby: Yes.

Mr. Marble: Why two per cent difference in the interest given on the two transactions?

Mr. Kirby: I do not know; that is what they charged for the money, and I have always had to pay what the other fellow charged me.

Mr. Marble: Was there an agreement for exclusive routing on the seven per cent contract?

Mr. Kirby: Well, my recollection is, Mr. Marble, that it is all involved, that the mortgage—no, I believe not. I was going to say that the mortgage related also to the routing, but possibly it does not.

Mr. Marble: Now, Mr. Kirby, you of course recognize that as far back as the history of secret or discriminatory rates or arrangement goes, there is constantly recurring this feature of a contract for exclusive routing of tonnage, and that is a valuable thing to the railroad company; it has always been, for which it usually gave something of value, and I want you to tell us precisely what you think about this contract. You know the suspicions about this contract which have been voiced throughout this hearing by other parties.

6700 Mr. Kirby: Yes. I do not see anything in the world objectionable to this feature, and insofar as routing my tonnage over the Santa Fe was concerned, I probably would have done so, even without any option contract or any other kind of contract, or anything else involved. The Santa Fe, however, assures to itself the performance on my part of the observation of the routing clause by holding these lands in the form of an option instead of selling them to me straight out on mortgage for that length of time.

Mr. Marble: That is to say the Santa Fe was the absolute owner of these lands to start with.

Mr. Kirby: Well, not to start with. They bought them under options which I held. They bought them from us, they became the owner.

Mr. Marble: There was a time when the Santa Fe was the owner?

Mr. Kirby: Yes, sir, and is now.

Mr. Marble: And is now?

Mr. Kirby: Yes, sir.

Mr. Marble: And your option is a privilege of buying at some time in the future?

Mr. Kirby: Yes.

6701 Mr. Marble: In the meantime are you cutting off of those lands?

Mr. Kirby: I cut some timber in my logging operations, if I come to a tract of land that would be left, anticipating that at some time I will exercise that option and that my tram road will be gone from there and the timber will be left, I cut it, and I pay $5.00 a thousand plus five per cent from the time these contracts were made, which at the present time is five and a quarter per cent. Next year it will be five and a half per cent. I pay for the stumpage cut from that land, and I have the option to cut as much or as little as I please under my option.

Mr. Marble: When you buy that timber in that way on the stumpage or when you shall finally exercise your option to buy the land itself your understanding is that the Santa Fe has reserved the right to control the routing of the traffic.

Mr. Kirby: No, sir.

Mr. Marble: On that land?

Mr. Kirby: There is no obligation as to when that shall be cut, but if it is cut during the period of the option of course it would apply, if it is in the proper locality because the Santa Fe tonnage contract does not apply to all our mills, and then the

6702 Santa Fe tonnage contract does not relate specially to this timber except as to—to illustrate what I mean, that Kountze land of probably 180,000 acres is largely on the Southern Pacific and not on the Santa Fe. I probably will not cut any quantity of that timber under my option contract until my routing contract has expired. For instance, the routing in relation to that tract only exists for a period of eight years, and in that period I will probably cut none of that timber of any consequence, so when I do buy that timber I am absolutely free to ship it any way I please.

Mr. Marble: Do you consider that you secured any concession on the amount of the purchase price of these lands by reason of making that stipulation as to the routing?

Mr. Kirby: No, sir, I am to pay them what is cost them, and they bought it through me.

Mr. Andrews: In all substantial respects, it is a loan?

Mr. Kirby: Well, it does not take that form, but that is the nature of it, with five per cent and the taxes and care and every charge connected with the carrying of the property.

Commissioner Harlan: So long as you do not avail yourself

6703 of the option, the five per cent is running and the Santa Fe controls the routing, if the option should become a purchase tomorrow, you would be released from their right to routing?

Mr. Kirby: No, they would not let me declare it tomorrow, under the contract. They would have the option of making me wait, and route the tonnage, so much as they had contracted for. They would have the option of making me wait for that period without declaring the option.

Mr. Garwood: Is that solely with reference to the Kountze land or the land——

Mr. Kirby: That is with reference to both bodies; that is the Chapman lands and the Gallup lands, except the Chapman lands are involved in the five year contract from July, 1909, and the Gallup lands for a ten year period.

Mr. Marble: Does it come to this, then, that if these transfers of these lands by you to the Santa Fe and the giving of the option, as I understand was the suggestion, was merely by way of securing a loan of money to you, that the Santa Fe Railroad is financing your operations there?

Mr. Kirby: Not my operations, but in so far as this particular timber tract, you might say they are doing that. They own it and they gave me an option to buy it in the future, and they
6704 bought it at my suggestion and at my request.

Mr. Marble: It might be about as an ordinary deed in trust, such as banks so frequently make when making loans, your transfer to them with the option to purchase back.

Mr. Kirby: We try to relieve them of that future, because there is no obligation on our part to buy it back.

Mr. Marble: You will buy it back or else lose your loan as an ordinary borrower on land would?

Mr. Kirby: I borrowed the value of it.

Mr. Marble: You borrowed the full value of it?

Mr. Kirby: Practically so.

Mr. Marble: Did you get any more than the full value in consideration of this agreement as to routing?

Mr. Kirby: No.

Mr. Marble: You think you struck that squarely.

Mr. Kirby: It is the substantial market value of the land. Of course the expert valued it some higher. I think there is probably twenty-five per cent difference between the expert's valuation of the stumpage, as he put in a lot of oak stumpage which we did not utilize.

Mr. Marble: What is the difference in the element of
6705 these two transactions which makes in your opinion the difference of the two rates of interest, between five and seven per cent?

Mr. Kirby: In one case the loan, if you call it a loan, is secured by timber land where the security is unquestioned and the title put absolutely in the lender or buyer, if you may call it. In the other case it is a mortgage by an industrial enterprise upon general assets that a banker or anybody else would not regard as favorable or in no way as substantial as the other. It is a difference in security, rather than otherwise.

Mr. Marble: Of course I have no judgment, but you know abso-

lutely about this thing and other gentlemen in the room will perhaps have their suggestions to make. It is your judgment, then, that the two rates of interest are not to be explained by the routing contract which was made at the time of the securing of the five per cent interest?

Mr. Kirby: No, and the securing of the other, they are all contemporaneous transactions; they certainly would not charge me a high rate of interest because I wanted to do them a favor in giving them the tonnage.

6706 Mr. Marble: Have you any other contracts with the Santa Fe Railroad other than those referred to here, which would affect the consideration of this problem?

Mr. Kirby: No, sir. The only other contract I have with them at all is their hewn tie contract which I mentioned this morning, and that is entirely on a percentage of profit basis. We get out the ties for them at the cheapest price we can, and they pay us for the use of our facilities and so forth fifteen per cent, or something like that. Fifteen per cent it is on the cost of the tie. It is supposed to represent our expense, profit and all that sort of thing.

Mr. Marble: Ties for the use of the Santa Fe Company?

Mr. Kirby: Yes.

Mr. Marble: Does the Santa Fe merchandise those ties at all?

Mr. Kirby: No, they treat them at their treating plant at Somerville. I suppose they sell their connections once in a while. I have heard of their selling their connections once in a while out of their treating plant up there. I think I have heard of them selling the Milwaukee and perhaps the Great Western, and they go out themselves and buy ties. I have heard of their buying ties at the creosoting plant at Texarkana on the T. & P.

6707 Mr. Marble: Does the Santa Fe Railway own any stock of the Kirby Lumber Company?

Mr. Kirby: Not a share.

Mr. Marble: Does the Kirby Lumber Company own any Santa Fe Railway Company stock?

Mr. Kirby: No, not a share.

Mr. Marble: Or any of its subsidiary corporations?

Mr. Kirby; No, not a share.

Mr. Marble: Has the Santa Fe any contingent interest of any sort in the profits of your lumber companies?

Mr. Kirby: Not a cent, in any form whatever.

Mr. Marble: Does it make any difference to the Santa Fe except in the freight money it receives for transportation whether or not you sell lumber next month?

Mr. Kirby: It does not.

Mr. Marble: Is this interest money to be at all affected in amount by the amount of lumber merchandised and shipped by you?

Mr. Kirby: No, sir, no obligation on my part to run any particular mill, but whatever material I may cut in certain localities must be delivered at points on the Santa Fe.

6708 Mr. Marble: Could you at all change the amount of that interest by shipping over some other line than the Santa Fe?

Mr. Kirby: No.

Mr. Marble: Would you cause your interest to increase if you did?

Mr. Kirby: I do not think so.

Mr. Marble: Would you cause your loan to fall due by making a breach of the contract in that respect?

Mr. Kirby: Well, I would forfeit the right to buy the land under the option agreement by breaching the contract.

Mr. Marble: That would be the penalty?

Mr. Kirby: That would be the penalty.

Mr. Marble: That is to say, then, you would cause a forfeiture of your right to pay the loan which the Santa Fe made you on this deed of trust?

Mr. Kirby: Yes, sir.

Mr. Marble: And your equity in the contract would be forfeited?

Mr. Kirby: Yes.

Mr. Marble: And that would be your penalty for breaking the contract?

Mr. Kirby: Yes.

Mr. Andrews: I do not know which you refer to when you
6709 say "deed of trust." Do you mean the $500,000, the Chapman transaction?

Mr. Marble: I mean the option agreement where you transferred the land.

Mr. Andrews: You said this deed of trust, and that was the only deed of trust given.

Mr. Marble: The other I had understood was practically a deed of trust, that is, that Mr. Kirby or Mr. Kirby's company owned the land and transferred it to the Santa Fe for its value and then took an option to repurchase at five per cent at some time in the future, and that that was really a loan, rather than a purchase for the interest of the Santa Fe, I understood you to say.

Mr. Andrews: I did not say it was a loan. I said it had the supposed effect of a loan. I merely wanted to distinguish the question as applying to the $500,000 loan about which you had asked him many questions concerning the interest rate.

Mr. Marble: That was at seven per cent.

Mr. Andrews: There is no forfeiture in that for the failure to do or otherwise, and nothing attached to it except the ordinary conditions of a mortgage of that class.

6710 Mr. Marble: I understand the thing, but in order that the record may be entirely clear, what you meant to say was that this option to buy certain lands which you transferred to the Santa Fe for value, your option to buy at five per cent is what you would lose if you violated this contract in regard to the routing?

Mr. Kirby: Yes, sir.

Mr. Marble: Then there would be no forfeiture under your contract by which you borrowed the $500,000 at seven per cent?

Mr. Kirby: No.

Mr. Marble: You have been asked a great many questions about the effect of Texas laws and rights of people operating under them,

and while hardly proper, I will pursue the thing one step further. You have testified that the Texas laws will not allow a road which has incorporated as a common carrier to take up its track without permission.

Mr. Kirby: Without the legislative permission, yes, sir.

Mr. Marble: Without legislative permission?

Mr. Kirby: Yes, sir.

Mr. Marble: Do the Texas laws require common carriers which are really such to qualify and take the obligations of the law?

6711 Mr. Kirby: I think not.

Mr. Garwood: Yes, they do.

Mr. Andrews: I do not understand what you mean by qualify and take the obligations of the law.

Mr. Kirby: I suppose something like taking an oath of office.

Mr. Marble: As I understood Mr. Kirby's testimony, he said one reason he did not incorporate as a common carrier was that if he did so he would incur certain obligations to continue in business. I was asking him simply if there is an obligation on his part if he is such common carrier to so qualify and not stay outside the law?

Mr. Andrews: There is nothing in the statute on the subject. I can give you a succinct history of the organization if you wish, but there is nothing in the statute of that character.

Mr. Marble: That is really all I care for. I understand your mill at Call is on the Frisco.

Mr. Kirby: It is on both, but it is not on the main line of the Santa Fe. The Santa Fe has a spur two miles long running into the mill.

Mr. Marble: So you make delivery to the Santa Fe at Call?

6712 Mr. Kirby: At Call Junction.

Mr. Marble: How far is that from Call?

Mr. Kirby: Two miles.

Mr. Marble: Where is your mill?

Mr. Kirby: At Call.

Mr. Marble: Does the Santa Fe come to the mill?

Mr. Kirby: No.

Mr. Marble: They require you to go to the junction?

Mr. Kirby: We perform that service. We have a line of road into the mill, but we maintain it and do the switching over it of empties and loads.

Commissioner Harlan: In two cases he does that, I understand.

Mr. Kirby: Call is the only place we do that except the planing mill at Bronson; that is, the planing mill service only on a switch, but this is a short line service over the Santa Fe's own rails in addition to doing the switching.

Mr. Walter: Who maintains that two miles?

Mr. Kirby: The Kirby Lumber Company.

Mr. Marble: This cost of operating the logging road which has been testified to, $399,000, do you include in that the cost of operating the skidder?

6713 Mr. Kirby: Yes.

Mr. Marble: The cost of *m*aking the log from the stump to the car?

Mr. Kirby: Yes, sir; that is part of the loading process.

Mr. Andrews: Here are the figures made up by the Interstate Commerce Commission's experts from which that is a summary, if you wish to look over them.

Mr. Hancock: This is an investigation of industrial lines, and this is the totals of the Interstate Commerce Commission.

Mr. Marble: We have the originals.

Mr. Andrews: Yes, and they will show you in detail what is taken into consideration.

Mr. Marble: For the sake of the record at this point, does it include the cost of cutting the tree and trimming up the log?

Mr. Kirby: To my understanding of the figures; I do not understand it includes that.

Mr. Marble: When you first opened your mill, was there timber immediately adjacent to the mill site which you cut?

Mr. Kirby: Yes, sir; some of the mills I am operating now were built long before the Kirby Lumber Company was ever
6714 dreamed of, like at Call, for instance, it was built some years before the Kirby Lumber Company was organized. But when we build mills ourselves in nearly every instance we started right out in the forest and worked the mill right in the forest.

Mr. Marble: In that instance would the skidder work at the mill in the first instance?

Mr. Kirby: No, we would pull it in with teams or mules.

Mr. Marble: I think that is all.

Mr. Walter: You said you were to pay the Santa Fe $5.00 a thousand stumpage. Now how long is that to continue?

Mr. Kirby: Until the option contract is declared.

Mr. Walter: Suppose you do not declare that option, can you go ahead cutting that timber and paying them the stumpage charge?

Mr. Kirby: Not after I waive the option, after the option period has expired.

Mr. Walter: When does that expire?

Mr. Kirby: On the Chapman lumber September 1st, 1914 and the Gallup timber September 1st, 1919.

Mr. Walter: Suppose you do not do anything whatever and keep on cutting the timber after September 1st, 1914, what would happen on the Chapman lumber?

6715 Mr. Kirby: If I kept on cutting the lumber?

Mr. Walter: Yes.

Mr. Kirby: I might cut enough at $5.00 a thousand to pay the whole $3,000,000 and then I would have enough for what is left.

Mr. Walter: So the $5.00 is applied on the purchase price?

Mr. Kirby: Yes, sir.

Mr. Walter: Up to that time, September, 1914, do you pay any interest unless you take over this property?

Mr. Kirby: No.

Commissioner Harlan: You pay interest on what you cut?

Mr. Kirby: No, we pay for it accordingly as we cut it, $5.00 for the first year, five and a quarter for the second year and five and a half for the third.

Commissioner Harlan: That would be five per cent.

Mr. Kirby: It would be for any period five per cent, but I pay it on the basis of the present value, paying $5.00 and paying five per cent interest.

Mr. Walter: So the only interest you are paying is that on which you are cutting the timber?

Mr. Kirby: No, I have to pay it all in the end.

6716 Mr. Walter: If you take it?

Mr. Kirby: If I take it.

Mr. Walter: But if not, it is simply a contract for stumpage?

Mr. Kirby: That is all it is, yes, sir.

Mr. Walter: Yes.

Mr. Kirby: But it is a contract for land as well.

Mr. Walter: You are buying not only the timber, but the land as you cut the trees?

Mr. Kirby: But the interest I have in it is the tree.

Mr. Walter: And the railroad has simply carried that for you. When you buy stumpage outside down there, what do you pay?

Mr. Kirby: I have paid different prices. Most of my consumption now is on Houston Oil Company's timber, and I pay $5.00.

Mr. Walter: Is that a pretty fair price?

Mr. Kirby: I think so; yes, sir. That is about the market value of the stuff.

Mr. Walter: And that is all increasing in value every year or not?

Mr. Kirby: I think so.

6717 Mr. Walter: Who is paying taxes on this timber?

Mr. Kirby: Which timber?

Mr. Walter: The timber you cut this year, who paid taxes on it last?

Mr. Kirby: The Houston Oil Company.

Mr. Walter: The Santa Fe timber, I mean.

Mr. Kirby: They pay it, and I will have to pay it when I buy it.

Mr. Walter: Suppose you do not buy it?

Mr. Kirby: Well, they pay it.

Mr. Walter: Up to 1919 you can hold the Gallup timber?

Mr. Kirby: Yes, sir.

Mr. Walter: On all you have not cut up to 1919 the Santa Fe has carried it and paid taxes and been without the use of the money?

Mr. Kirby: That is right.

Mr. Marble: Is that to be compounded or do you pay annually?

Mr. Kirby: Compounded.

Mr. Marble: But you do not pay it annually.

Mr. Kirby: I do not pay it annually until I declare the option. Of course I would not pay the interest then.

6718 Mr. Walter: But you pay the purchase price for the stumpage, I understand, which is figured to include interest?

Mr. Kirby: Yes.

Mr. Walter: You can violate that contract at any time and there is no penalty attached other than that you cannot take the property?

Mr. Kirby: Yes, sir, that is all.

Mr. Garwood: Do not the ordinary industrial bonds in that section of the country usually bear at least six per cent, and can you place them without pretty liberal discount, selling them, say, from 85 to 95 on the dollar?

Mr. Kirby: It depends entirely on the condition of the times. Three or four years ago five per cent was a reasonable interest rate for a lumberman to pay. Today he might have to pay ten per cent. I do not know. We are not in very good credit. We are not making money.

Mr. Garwood: There are not many of them less than six per cent that you know of?

Mr. Kirby: No, I think that is a pretty fair rate.

Mr. Garwood: And bonds usually have to be discounted some?

Mr. Kirby: Well, yes, the seller of the bonds usually discounts them, but the ultimate buyer usually pays par and
6719 sometimes a little more.

Mr. Garwood: You buy through the country adjacent to your territory other small tracts at considerably less than $5.00 do you not, from time to time?

Mr. Kirby: Sometimes; yes.

Mr. Garwood: You buy them as low as $2.00?

Mr. Kirby: Sometimes.

Mr. Garwood: Well, right often, don't you?

Mr. Kirby: No, it is not often. We pay, as a rule, around $3.00.

Mr. Garwood: $3.00 is a pretty fair average price for the small tracts?

Mr. Kirby: Yes. In our case we have not bought much because we have not had the means. We try to accommodate a neighborly farmer down there who has a little tract of land, and when our tram road goes in, at his price, and that is usually the small farmer's holding price, $2.50 or $3.00.

Mr. Garwood: You sometimes get it as low as $2.00?

Mr. Kirby: Yes. A man can go out in that forest country and buy little tracts here and there at a dollar and a half where the parties want to realize on it and want to sell.

Mr. Andrews: They are very small and very thin?

6720 Mr. Kirby: Yes.

Mr. Coleman: The Beaumont, Sour Lake & Western is a Frisco road?

Mr. Kirby: Yes.

Mr. Coleman: That is all.

Commissioner Harlan: We will adjourn at this point.

Mr. Cowan: Before your Honor adjourns, I assume your Honor is going to leave; I do not know, but if that be the case, I want to call attention to something which was remarked at New Orleans before we opened the hearing, in regard to the use of the record of facts obtained by the Examiner of Accounts and perhaps of the Commission on those subjects. What is expected may be done in regard to the use of those records? It was mentioned there, and it was left indefinite, and I do not know and would like to inquire.

Commissioner Harlan: We have made a point of bringing out in

this record substantially all the facts that we have in our own records with respect to the roads that came before us.

Mr. Cowan: Well, I thought so.

Commissioner Harlan: And in some respects our own records have been corrected by the testimony, so that this record is perhaps
6721 a more accurate record in respect to the roads which came before us than our own records.

Mr. Cowan: I am just inquiring.

Commissioner Harlan: There have been additions to equipment, mileage and in other ways, so our record is somewhat out of date and is corrected by this record.

Mr. Cowan: I just wanted to inquire.

Commissioner Harlan: I understand the hotel will put another room at our service tomorrow and we will be notified. We will adjourn to 9:30 tomorrow morning.

Mr. Garwood: I assume the several contracts inquired about, about which Mr. Kirby has testified, will be filed in the record, or copies of them? Will they?

Mr. Marble: I have not heard that statement made. You had better pursue it a little further.

Mr. Cowan: No, the Commission will have to require it if they do want them.

Commissioner Harlan: We will take that up tomorrow morning.

Whereupon, at 5:30 P. M. an adjournment was taken to Tuesday, January 31, 1911, at 9:30 A. M.

6722 CHICAGO, ILL., *January* 31, 1911.

Met pursuant to adjournment at 9:30 A. M.

Present: Parties as before.

J. H. KIRBY was recalled as a witness, and having been previously sworn, testified as follows:

Commissioner Harlan: Have you any questions of this witness, Mr. Marble?

Mr. Marble: Just a few.

Mr. Garwood: Just one question before you begin.

Mr. Marble: I will yield to Mr. Garwood.

Mr. Garwood: I would like to ask if it was not a part of your general plan in the acquisition of these large tracts of land to control as far as possible the pine lands of southeast Texas and southwestern Louisiana and surround and isolate and thereby control the tracts held in small ownership that would be surrounded by your lands and have no outlet except through or over your lands, and by your facilities?

Mr. Kirby: In my original purchases, when I had a little bit of money and wanted to cover a big territory, that was long before the Kirby Lumber Company was organized or thought of, I made my purchases with a view of building out. I would isolate a
6723 piece of timber if I could; that is, I would buy between them and transportation, and try to hold it so when I got some

money I could buy that too. But that had no relation to the Kirby Lumber Company, because that company did not buy any lands upon its own account of any consequence, and it did not have relation to the two companies organized at the same time, the Houston Oil Company and the Kirby Lumber Company, because there is more timber in Louisiana on the Louisiana side of the Sabine River than on the Texas side, and we bought none of that, or only a little tract.

Mr. Garwood: And that being your purpose——

Mr. Cowan: He has not said it was his purpose in the sense you put it.

Mr. Garwood: His answer stands for itself, and my question will not change his answer.

Mr. Cowan: It will not, when I call attention to it.

Mr. Garwood: That also was the effect.

Mr. Kirby: It never produced any effect like that of a control. The question you asked was control.

Mr. Garwood: Well, the natural effect of surrounding and isolating smaller ownerships and smaller tracts——

Mr. Kirby: Sometimes it would have that effect. The
6724 tracts we sought to isolate were not necessarily small ones, that would render them less attractive—I know why your question was asked, because I remembered that allegation in the pleading of the so-called strategic value of the so-called Kirby lands that went to the Houston Oil Company.

Mr. Garwood: Yes.

Mr. Kirby: Those were lands that I had acquired from ten years to one year prior to the organization of the Kirby Lumber Company and prior to its inception. Those were lands bought largely for myself and the Boston concerns I testified to yesterday, and purchased beginning in 1887.

Mr. Garwood: To put it in your own words in the pleading to which you refer: "That said Kirby controlled the opportunity of gathering into one body under one ownership the yellow pine timber and oil lands of southeast Texas and southwestern Louisiana, and that the lands so owned by said Kirby, his co-partnerships and corporations, were so located that they isolated and controlled large bodies of similar land." That is the idea that you now convey.

Mr. Kirby: Well, that is the allegation of the lawyers. Of course it had that effect to an extent, that is, the original purchases I made between 1887 and 1900, that 13 years, had that effect in
6725 instances.

Mr. Garwood: You say that is the allegation of the lawyers. That is practically your statement now, is it not?

Mr. Kirby: Yes, except to the extent of the control. It only controlled what we owned.

Mr. Garwood: That is the statement as your lawyers put it in your answer signed by yourself personally as well as by the Kirby Lumber Company, being the answer in equity——

Mr. Kirby: Yes, there is no misunderstanding on that between us.

Mr. Cowan: Mr. Garwood has got the book before him. I do not

think that Mr. Garwood intends to have Mr. Kirby state something that is not true.

Mr. Garwood: I could not do that if I had any such desire, which I certainly have not.

Mr. Cowan: You said yesterday that Mr. Kirby had sworn to this answer. Now, I would like for you to look there and state to the Court whether it is true or not.

Mr. Garwood: I said that on the general proposition that answers in equity are sworn to, and I state now that it is my purpose——

Mr. Cowan: That is a mistake.

6726 Mr. Garwood: That it is my purpose to introduce the answer. It was attested by the secretary. In turning it over rapidly yesterday I——

Commissioner Harlan: The answer will speak for itself. Are there any further questions?

Mr. Garwood: No.

Mr. Cowan: But when he offers in evidence a statement of fact in an answer, coupled with the statement that the answer was signed and sworn to by the witness, it is very important for me to point out in the record that the thing did not happen.

Commissioner Harlan: I do not think we will spend any more time on it.

Mr. Cowan: I think we are entitled to have it go in the record.

Commissioner Harlan: My recollection is there is a very respectable authority to the effect that pleadings are not receivable as admissions against interest anyway. I may be wrong about it.

Mr. Cowan: There is a conflict of authority, but if they are sworn to, it is a very different thing.

Commissioner Harlan: We will work it out some way and

6727 see what the effect of it is. Have you some questions, Mr. Marble?

Mr. Marble: Going to this contract between you and the Santa Fe Railroad Company, the contract under which you have the option to purchase the timber lands which you had at a previous time transferred to the Santa Fe Railway Company and the feature of the contract by which you cut trees from time to time as you come to them in your lumbering operations, what is the price you pay for stumpage?

Mr. Kirby: $5.00 for the first year; that is, the year ending June 30, 1910; $5.25 for the second year; that is, the year ending June 30, 1911, and then it would be $5.50, adding 25 cents each year, being substantially five per cent on $5.00.

Mr. Marble: The point I want to come to is this: Will that enable you to cut over these lands and take the timber at a price different from that expressed in your option to purchase?

Mr. Kirby: No, sir; these are mere payments on account of the option. If I should not declare that option at the end of the period, the result would have been that I would have bought back from the Santa Fe certain timber; that is, that I have already used at

6728 these prices, $5.00, $5.25, $5.50, and so forth. If I do declare my option, then the money I had paid in on account would

be credited against the $3,000,000 plus carrying charges and interest that the option calls for.

Mr. Marble: If you cut all the timber under the stumpage arrangement, would not that result in getting the timber for you at less than the price expressed in the option for the purchase?

Mr. Kirby: No, sir, it would not: If I cut all the timber and had paid the option price, then I would not pay any more. All the money they are entitled to have out of the timber is the option price plus carrying charges, taxes and so forth, with their interest.

Mr. Marble: What I am getting at is this, would not the stumpage at the $5.00 per thousand and the succeeding prices expressed in the contract be the cheaper way to take this timber?

Mr. Kirby: Oh, no.

Mr. Marble: That is what I want to get at.

Mr. Kirby: No. The Santa Fe took the timber over at substantially $3.00, and I am buying it back at $5.00 plus interest, so you see it will cost me 40 per cent more to take it under the cut-
6729 ting clause.

Commissioner Harlan: If you continue to cut and pay the Santa Fe under the option, there is enough timber there to meet the option fully, is there not?

Mr. Kirby: Yes, sir.

Commissioner Harlan: And leave you a lot of timber besides?

Mr. Kirby: Yes, sir.

Commissioner Harlan: And as the option price has thus been paid in full, you get all the timber back without charge at all?

Mr. Kirby: Without any further payment; yes, sir.

Mr. Marble: You are basing this answer on the estimates of skilled cruisers of the timber?

Mr. Kirby: Yes, sir.

Commissioner Harlan: Let me ask how the taxes are taken care of. You said yesterday the Santa Fe paid them.

Mr. Kirby: Yes, sir.

Commissioner Harlan: And you pay $5.00 and the next year $5.00 and five per cent?

Mr. Kirby: That is correct, on a stumpage price, you call it five per cent.

6730 Commissioner Harlan: But ultimately who pays the taxes?

Mr. Kirby: I will have it to do if I take the lands, but——

Commissioner Harlan: You will pay the taxes after you take the land, but who pays the past taxes?

Mr. Kirby: The Santa Fe pays the taxes currently.

Commissioner Harlan: Do you repay that?

Mr. Kirby: I repay that; that is part of the option price, at the end of the five years, or whenever I exercise the option I will have to reimburse them for all money they are out, whether taxes, titles, lawyers' fees, cruisers, or what not, plus interest on their disbursements from the time they were made by them up to the time I have repaid them.

Commissioner Harlan: And you think there is no doubt about

that proposition, that there is enough timber to repay the option price on the basis of the contract and leave you a lot of lumber besides?

Mr. Kirby: There is no doubt about it. The lands were cruised by John P. Braydon, of this city, who is a very experienced lumber man and timber man in that line of business, and selected by the Santa Fe for that purpose or by Price, Waterhouse & Company, I don't know which; at any rate, he came down there with his army of cruisers and examined the lands very carefully, and the
6731 thing was made on his report of the quantity of timber.

Mr. Marble: In referring to this deal, we have spoken of it as being between you and the Santa Fe Railway Company. Is that technically correct; is it the Santa Fe Railway Company, the corporation as such with which you have your dealings in this regard?

Mr. Kirby: Well, I don't know, Mr. Marble; my dealings have been with Mr. Ripley, the president of the Atchison Company, and of these other companies. Of course you know Mr. E. P. Ripley and who he is; and I don't know who furnished this money for the purpose, the Santa Fe or somebody else, as far as that goes.

Mr. Marble: Is the Santa Fe Railway Company, the corporation which is also a carrier, a party to the written contract?

Mr. Kirby: I think not.

Mr. Marble: You think it is not?

Mr. Kirby: I think not.

Mr. Marble: Whose name do you go to as meaning the Santa Fe?

Mr. Kirby: J. R. Chapman is the name in this contract, the same as D. L. Gallup is the name in the other contract.

6732 Mr. Marble: Who is J. R. Chapman?

Mr. Kirby: I do not know; I have been informed that he is connected with the American Trust Company and Savings Bank here; probably an active vice president and a man of affairs here in Chicago, but I have never met him personally, so I speak of these transactions as Santa Fe transactions, because in so far as the negotiations and closing and all that is concerned, I did it with Mr. Ripley. Now, whose money was used, I do not know. Mr. Chapman or the American Trust and Savings Bank sent the money which was paid to us for these lands to the First National Bank of Houston, Texas.

Commissioner Harlan: There is just one other question I would like to ask, and that is whether you wish the Commission to understand that upon the conclusion of this option contract and the repayment in the manner you have indicated and that the contract calls for of the option price, the results will be your results or the Kirby Lumber Company. In other words, is there any equity in this whole proposition accruing to the Santa Fe or Santa Fe interests, except as you have disclosed it in your testimony?

Mr. Kirby: Not a thing, Judge. The substance of the whole transaction is that they have loaned me this money, or I
6733 mean they have loaned the Kirby Lumber Company this money at five per cent interest.

Commissioner Harlan: And you are standing for yourself and

the company and not in any ultimate sense standing for the Santa Fe or Santa Fe interests?

Mr. Kirby: In no sense whatever. I stand solely for the Kirby Lumber Company and I have no personal interest except as a stockholder of the Kirby Lumber Company.

Mr. Walter: Now, you said that there was ample timber on the tract to take care of this entire three million dollars.

Mr. Kirby: Yes.

Mr. Walter: How much have you cut?

Mr. Kirby: In the past year and a half we have cut about $200,000 worth at $5.00 a thousand.

Mr. Walter: How many million feet would that be?

Mr. Kirby: Well, that would be 40 million feet, would it not?

Mr. Walter: Forty million feet?

Mr. Kirby: We hereafter will cut a good deal less, because the timber which we cut in the past year and a half was timber adjacent to existing tram roads, and there will not be any considerable quantity cut in the future, for the next two years probably.

6734 Mr. Walter: Was that all cut from these Santa Fe lands?

Mr. Kirby: And from the Chapman lands, that $200,000 yes, sir.

Mr. Walter: Does that include any that you bought in among the other timbers you were cutting near these trams?

Mr. Kirby: That item does not, but we have bought a few little tracts along there.

Mr. Walter: The 40 million feet does not include anything but Chapman timber?

Mr. Kirby: No.

Mr. Walter: You are sure of that?

Mr. Kirby: Yes, sir.

Mr. Walter: Now, how much was the report of the cruiser Braydon on that land?

Mr. Kirby: I cannot tell you the exact figures, but something like a billion feet.

Mr. Walter: Something like a billion feet?

Mr. Kirby: Yes, a little more or less.

Mr. Walter: Was it more or less?

Mr. Kirby: It was right in that neighborhood; it was substantially a billion feet. It was not all pine; some oak, ash, hick-

6735 ory and woods of that character.

Mr. Walter: And how much pine was there?

Mr. Kirby: I would have to get the figures. I haven't them in mind exactly, but I can approximate it.

Mr. Walter: About half of it pine?

Mr. Kirby: I should say there were 900 million feet of pine.

Mr. Walter: 900 feet of merchantable pine?

Mr. Kirby: I should say so, but those are approximate figures. I cannot testify exactly, but I can get you that information. Price, Waterhouse & Company, I could go to their office and get it.

Mr. Walter: Was that a desirable bargain from your standpoint?

Mr. Kirby: To sell the property for that money?

Mr. Walter: Yes.
Mr. Kirby: No, sir.
Mr. Walter: Why did you make that trade, then?
Mr. Kirby: Because I needed the money.
Mr. Walter: Then they did relieve you from very serious embarrassment, is not that true?
Mr. Kirby: Not necessarily. I needed the money. Of
6736 course if I didn't get it from the Santa Fe, I would go to somebody else.
Mr. Walter: Why did the Santa Fe do it instead of sending you to the banks?
Mr. Kirby: They are friends of mine.
Mr. Walter: Pretty close friends?
Mr. Kirby: They are. Mr. Ripley and I are close friends.
Mr. Walter: You mutually help each other as much as you can?
Mr. Kirby: Yes, sir.
Mr. Walter: Do you know the Southwestern Land or Lumber Company?
Mr. Kirby: I have heard of it.
Mr. Walter: Where is it located?
Mr. Kirby: My understanding is that it is incorporated under the laws of New Jersey, and its office, I think, is in New York. I understand it to be a concern of Santa Fe ownership.
Mr. Walter: Does it operate any mills?
Mr. Kirby: I do not know. I do not think so. It may, but I do not know.
Mr. Walter: Are you connected with it in any way?
6737 Mr. Kirby: No.
Mr. Walter: Directly or indirectly?
Mr. Kirby: No.
Mr. Coleman: I wish you would look over this list and tell me if it is in the main the correct list of the mills of the Santa Fe operating without tap lines (handing paper).
Mr. Cowan: That is, his and others, I suppose?
Mr. Coleman: These are without any tap lines; that is, without any railroad at all.
Mr. Kirby: I cannot testify as to all these, Mr. Coleman. I know such concerns are reputed to be over there, but I am not familiar with them at all.
Mr. Coleman: I wish you would look at this, a published list of all the saw mills located on the Santa Fe lines, and see if you have seen that before. That comes into the hands of the lumbermen, I take it.
Mr. Kirby: Well, I have not seen it before, that is a long list. I do not see anybody here who is not on the line, but I could not tell as to the accuracy of this.
Mr. Coleman: I wish to offer those two lists in evidence.

(The papers so offered and identified were received in evidence, and thereupon marked Santa Fe Exhibits Nos. 1 and 2,
6738 witness Kirby, received in evidence January 31, 1911, and are attached hereto.)

Mr. Coleman: The purpose is to show that in spite of insinuations which have been thrown in the record that Mr. Kirby and the Santa Fe have planned to stifle everybody, we have 46 little fellows on our line who operate with mules.

Reference was made repeatedly yesterday to a contract with the Santa Fe purporting to give control of your freight traffic to it. Did not that contract provide that all those things were to be done if they could lawfully be done?

Mr. Kirby: Oh, yes, all those contracts are with that end in view.

Mr. Walter: Did you say you had a mill at Mobile?

Mr. Kirby: Yes, sir.

Mr. Walter: Is that operating now?

Mr. Kirby: No.

Mr. Walter: On what line of road is it?

Mr. Kirby: The Katy.

Mr. Cowan: There is one question we want to ask Mr Kirby. Yesterday you testified that your railroad divisions of your operations was of the value carried on your books at so and so, and that that was based upon a valuation made by somebody. Now,

6739 I wish to get as nearly as you may be able to give it what the railroad investment was.

Mr. Kirby: Of this 206 miles?

Mr. Cowan: Yes.

Mr. Kirby: Well, substantially two and a half million dollars.

Mr. Walter: How do you arrive at that?

Commissioner Harlan: That was stated by the witness yesterday.

Mr. Kirby: The figures in the balance sheet I gave yesterday were one and a half million dollars, but in the construction of these roads we absorbed an operating expense; that is, the capital account on account of tram roads, construction of the roads, is absorbed largely in operating expense. For instance we will lay three or four miles of spur track and that is absorbed in operating expenses, all except the rails. Then that construction becomes permanent and it is put into the capital account only at its rail value.

Commissioner Harlan: It it — torn up, it only appears in the operating account?

Mr. Kirby: Yes.

Commissioner Harlan: So the two and a half million dol-

6740 lars you have just mentioned as the actual cost of the road does not include road that has been laid temporarily and taken up?

Mr. Kirby: No.

Commissioner Harlan: It does include the steel?

Mr. Kirby: Yes.

Mr. Walter: Is that the present value?

Commissioner Harlan: No, its book cost.

Mr. Kirby: Its book cost.

Mr. Walter: What do you say as to its comparison with the present value?

Mr. Kirby: its present value would depend on what you wanted

to use it for. If you wanted to call it a railroad and capitalize it, it is probably worth three or four million dollars.

Mr. Walter: That is something over $10,000 a mile?

Mr. Kirby: Yes, sir.

Mr. Walter: And you think it is worth considerably more than that?

Mr. Kirby: With the rolling stock and all that; yes sir. As a railroad, valuing your earthwork, your roadbed, your ties,
6741 your rails, your turn-outs, switches, spikes, and everything else as they do in valuing railroads, with a reasonable value for your right of way and all that, your property would have a railroad value of not less than $15,000 a mile.

Mr. Walter: That is about the average value of railroads of that type in east Texas?

Mr. Kirby: Yes, sir.

Commissioner Harlan: You mean that would be its value as it stands now, or are you speaking of a railroad of 200 and some miles, connected together?

Mr. Kirby: No, I am speaking of our railroads as they stand now, including the rolling stock.

Commissioner Harlan: Three or four million dollars?

Mr. Kirby: Yes, sir.

Mr. Walter: It is 35 pound steel?

Mr. Kirby: No, it is part 35 pound and part 60 pound.

Mr. Walter: How much 35 pound and what 60 pound?

Mr. Kirby: About half and half.

Mr. Walter: And it is divided into each road about half 35 pound and half 60 pound?

Mr. Kirby: No, some are all 60 pound and 35 pound. For in-
6742 stance, the narrow gauge roads would be laid entirely with 35 pound rail.

Mr. Marble: You have testified that two and a half million dollars is the actual cost of construction of this 206 miles?

Mr. Kirby: About that; I am using approximate figures.

Mr. Marble: And that appraisers who were appraising the property for loan purposes gave it a present actual value of about one and a half million dollars?

Mr. Kirby: No, they adopted the figures of the receivers. When the receivers were appointed they revalued all the properties of the Kirby Lumber Company, ignoring altogether their book values, cost values, and they got things down to the lowest basis possible, as you know those things are sometimes done. When Price, Waterhouse & Company were engaged to go out and revalue the properties they sent this Mr. Braydon, I told you about, and he gave the properties a higher value than the book values of the receivers, but for our bookkeeping purposes we retained the old value that the receivers had put on, and since that time we have written off seven and one-half per cent, as we write off five per cent a year for depreciation and the figures I gave yesterday, one and a half million, was the net present figure after deducting the seven and one-half per cent

from the receivers' figures and Price, Waterhouse & Com-
6743 pany's figures.

Mr. Marble: What is taken into consideration by the receivers or this appraiser in reducing the two and a half million to one and a half million?

Mr. Kirby: In our saw mill operations we try to absorb during the life of the timber all the plant cost, and the receivers in valuing these properties put them down to almost their wreckage value, that is, the value of the rolling stock and the rail. And it is safe operation and it is sound bookkeeping not to have a great big capital value there in a dead plant when your lumber is exhausted. Of course when your lumber is exhausted your mill is worthless, only for junk, and your railroad is only worth what you could sell it at second-hand. The ties are valueless, the rails would have second-hand value. As to the rolling stock, it would not be worth much.

Commissioner Harlan: But you have indicated it might have a value as a railroad.

Mr. Kirby: As a carrier, permanent and valued as railroads are valued, these properties of ours would run with their rolling stock an average of $15,000 a mile.

Commissioner Harlan: Do you think you could sell your
6744 properties for railroad purposes at $15,000 a mile?

Mr. Kirby: There is no demand for them, and I do not think we could sell them.

Mr. Marble: Is not that a little bit like trying to reach an estimate of the value of these properties on the theory that they are situated somewhere else than where they actually are?

Mr. Kirby: Of course I do not mean to say they are worth that. I mean to say as railroads, if you regarded them as such, they would have a certain book or cost valuation and estimated value. They might not be worth a cent, because they might not be able to earn interest on the spikes. That would be the case of our railroads unless they had the Kirby Lumber Company's tonnage.

Mr. Andrews: I think I can make plain what Mr. Kirby has been stating. The Texas Railroad Commission has a system of valuation of railroads without regard to commercial value, or any other sort of value except the actual cost of production or the cost of reproduction when they go to make the examination, and they value every spike at so much a pound and every tie at so much a tie and every rail at so much a pound, and take in all the
6745 elements which make an aggregate and give it as the value to that railroad. I presume that is what Mr. Kirby has in mind in speaking of valuing it as a railroad.

Mr. Kirby: That is it exactly. Under the Railroad Commission's rule for establishing values, our property would be about on that basis, and I understand nearly all railroads adopt substantially the same method.

Mr. Marble: In the case of your proposition at least, that would be a theoretical value and not an actual market value.

Mr. Kirby: Certainly; they are not worth it.

Mr. Marble: It has been suggested to me you should tell us who

assumes the hazards of storms or other calamaties which might affect the value of this timber and destroy it.

Mr. Kirby: What timber are you talking about?

Mr. Marble: The timber which you have the option to purchase from the Santa Fe.

Mr. Kirby: Well, that would be the Santa Fe's hazard; they take that risk.

Mr. Marble: And the increment of value, the unearned increment, would be the Santa Fe's insurance against that; that would be the other side of that?

6746 Mr. Kirby: I do not know that I just understand that question.

Mr. Marble: Well, as to the storms at any rate; that is the Santa Fe's hazard?

Mr. Kirby: Yes, sir.

Commissioner Harlan: Suppose they were destroyed by fire; is there and understanding by which that loss falls on you?

Mr. Kirby: No.

Commissioner Harlan: Of the Chapman timber?

Mr. Kirby: No.

Commissioner Harlan: Directly or indirectly?

Mr. Kirby: No, nor the Gallup, because this is in the form of an option. I am under no obligation in the world unless I exercise the option.

Commissioner Harlan: Then you wish the Commission to understand that the Santa Fe is not carrying this property for you except as you have described it; there is nothing left undisclosed?

Mr. Kirby: That is it.

Commissioner Harlan: No inference which can justly be drawn from anything you have said to that effect?

Mr. Kirby: That is absolutely true; there is nothing about
6747 it except that which I have disclosed here.

Mr. Garwood: Will you file the option contract or a copy of it?

Mr. Cowan: We have offered to furnish it to the Commission and have submitted it and will do it, but do not want to file it for the record as an exhibit.

Mr. Garwood: Will you permit us to inspect it?

Mr. Cowan: That is just the reason we would not file it as an exhibit. We do not see any purpose for it. I do not suppose there would be any objection to your personally inspecting it, because you are all friends, but when it goes to the public that would be a different thing. But I am not speaking for the company in that particular.

Mr. Garwood: Have you constructed any material amount of trams and bought any material amount of locomotives since 1903, the latter part of it, or the first of 1904?

Mr. Kirby: Oh, yes.

Mr. Garwood: About to what extent?

Mr. Kirby: I could not give you the figures. We bought quite

a good many locomotives and cars, and bought rails and relaid railroads and we have taken up some railroads.

Mr. Garwood: How much of that was replacement?

6748 Mr. Kirby: I could not tell you that without an examination of the accounts.

Mr. Garwood: In November, 1903, when you were preparing to incorporate and made your conveyance to Mr. Hilliard as security for the $600,000 loan from Mr. Yoakum, you valued all your railroad properties, including equipment of all characters at $1,219,436.60.

Mr. Kirby: No, that was only the 120 miles, or whatever it was, involved in that. That was the book value, at that time, of that property.

Mr. Garwood: That was the book value?

Mr. Kirby: Yes.

Mr. Garwood: How much have you built since then?

Mr. Kirby: Oh, a great deal. I could not tell you how much.

Mr. Garwood: Do these figures of yours make allowance for depreciation?

Mr. Kirby: Yes, sir.

Mr. Garwood: How much?

Mr. Kirby: That is the balance sheet figures I gave you yesterday of $1,503,000; that is after deducting depreciation for a year and a half, which would be seven and one-half per cent.

6749 Mr. Garwood: But the figures which you gave this morning of your total value——

Mr. Kirby: The figures I gave this morning of the total value of the property were the cost value of the property. Of course there is no cost value.

Mr. Garwood: There is no cost value?

Mr. Kirby: And the railroad value. For instance, if we were to be valued for railroad purposes.

Mr. Walter: Have you any rails from the Santa Fe?

Mr. Kirby: We have some; yes, sir.

Mr. Walter: What do you pay for those rails?

Mr. Kirby: Six per cent is my recollection, on a pretty high valuation, but I do not know what it is.

Mr. Walter: How many tons of rails, or how many miles?

Mr. Kirby: I don't know. We were to get 15 miles from the Santa Fe. I do not know how many have been delivered; I think six or seven. We got some from the Frisco.

Mr. Walter: What size?

Mr. Kirby: They are from 52 pounds to 60 pounds in different sections.

Mr. Cowan: I do not believe you stated the aggregate

6750 capacity of the Kirby mills, which you described yesterday.

Mr. Kirby: About 300 million feet a year; that is about what they could do.

Mr. Cowan: But of course the output does not amount to that. You showed what it was?

Mr. Kirby: Yes.

Mr. Cowan: In regard to the charging off point; in answer to

Mr. Marble, I believe you stated about it; just briefly what does that mean? You say the lumber company charges off, so when the timber is cut off——

Mr. Kirby: You carry into your depreciation account a sufficient sum so that at the end of your operations, for instance, say you have a mill property costing you $500,000 when you begin that goes into capital account, when you begin operations. When you finish operations, notwithstanding your mill from daily repairs you make upon it may be of as high efficiency as when you began, yet these repairs and renewals and betterments all being made from the operating account, and notwithstanding your mill is still of that high efficiency, yet it is of no value because there are no trees to operate on; it is of no value as a mill. Its value is what is the second-hand value of the machinery and other things you may take out
6751 of it. So it is good bookkeeping to write off a certain percentage of the value of that property every year, so that your capital account is substantially reduced or practically wiped out.

Mr. Cowan: At the end of your operations?

Mr. Kirby: At the end of your operations.

Mr. Cowan: Now that same thing applies with respect to your timber holdings?

Mr. Kirby: Yes.

Mr. Cowan: And to your railroad and whatever else is necessary as part of the means of carrying on your operations?

Mr. Kirby: Yes, sir; you would write off your timber holdings consumed every year, if you carried them in capital account, but from your mill and tram roads you write off an arbitrary sum?

Mr. Cowan: That is usual in timber operations?

Mr. Kirby: Yes, sir.

Mr. Cowan: And includes the mill, timber and railroad and everything else?

Mr. Kirby: Yes, sir.

(Witness excused.)

6752 J. W. LINK was called as a witness, and having been duly sworn, testified as follows:

Mr. Cowan: Where do you live?

Mr. Link: I live at Houston, Texas.

Mr. Cowan: Formerly you lived at Orange?

Mr. Link: Yes, sir.

Mr. Cowan: You have been engaged in the lumber and timber and saw mill business for a number of years?

Mr. Link: I have been actively engaged in the saw mill business from 1905 until January, 1910. I have been engaged in the timber business and in the purchasing of timber probably for fifteen years.

Mr. Cowan: You are acquainted with the location of the forests in Louisiana and Texas?

Mr. Link: Very well acquainted, yes, sir.

Mr. Cowan: Acquainted with the situation as to saw mill operations, tap lines, and so forth?

Mr. Link: Well, I think so, in a way.

Mr. Cowan: What was the business which you operated?

Mr. Link: Our company is the Miller-Link Lumber Company.

Mr. Andrews: Will your Honor suspend for a moment for a conference, by which we think possibly we may shorten the ex-
6753 amination materially?

Commissioner Harlan: Very well.

(Whereupon counsel withdrew for consultation.)

Mr. Link: You asked the name of the company, I believe.

Mr. Cowan: Yes.

Mr. Link: It is the Miller-Link Lumber Company.

Mr. Walter: That is the concern you are with now?

Mr. Link: No, sir, I am not with any concern now. That was the concern I was formerly interested in. I parted with my interest in the Miller-Link Lumber Company a year ago in January, and have no interest whatever now.

Mr. Cowan: Where does and where did the Miller-Link Lumber Company operate?

Mr. Link: The Miller-Link Lumber Company had a mill at Orange, Texas, and one at Newton, Texas, on the north end of the Orange & Northwestern, a little road running out from Orange 60 miles in length. The headquarters were at Orange.

Mr. Cowan: What was the extent of their timber holdings?

Mr. Link: Well, about three or four hundred million feet.

Mr. Cowan: Situated where?

Mr. Link: In the counties of Houston, Orange, Jasper and
6754 a little in Louisiana.

Mr. Cowan: How did the Miller-Link Lumber Company procure its logs to its saw mill?

Mr. Link: I think at the time I was with the company, and I think they operate in the same way and have the same logging arrangements, we had a tram road running out from a place called Bunker Hill on the Orange & Northwestern 27 miles north of the town of Orange. We had tram headquarters there, and had our tram road running into the forest. We cut the timber and logged it into the railroad with the Orange & Northwestern, and they hauled it down for us to the mill, for which we paid them, I believe, $1.25 a thousand feet. That was for the Orange mill. Now the Newton mill we logged from about ten miles south of Newton, and we had a trackage arrangement for which we paid them so much a mile, I don't remember what the compensation was. I think it was a difference in empties and loads, I think it was so much for an engine and so much for the empty train and so much for the load, but I am not clear as to whether it was fifty cents a mile, or something like that.

Mr. Cowan: Then when you milled the logs at Newton, what operations did you carry on there by rail as a part of your
6755 saw mill operation?

Mr. Link: We had our little tram road running out connecting with the railroad down south of Newton, and it went out into the woods.

Mr. Cowan: When the lumber was sawed and milled and ready for shipment, who handled it?

Mr. Link: The Orange & Northwestern was bound to handle it, because there was no other railroad running there.

Mr. Cowan: Did your saw mill operation involve the use of tracks to handle your lumber, or was it handled by the Orange & Northwestern?

Mr. Link: The Orange & Northwestern handled the lumber. We did not handle any lumber from the mill at all.

Mr. Cowan: How far was your planer from the main track of the Orange & Northwestern?

Mr. Link: About fifty feet, I think; that is, from the Orange & Northwestern spur. The main line, I believe, used to stop down about four or five hundred yards.

Mr. Cowan: And it was a spur out from that?

Mr. Link: Yes, it had the appearance of the main line, because it was the extension of the main line apparently, but I think it was considered as a spur. That was the end of the road, and this
6756 spur extended in a northerly direction and had the appearance of being an extension of the main line, but I think it was considered as a spur.

Mr. Cowan: In the case of the Orange mill, what was the operation there in connection with handling the lumber from the mill to the trunk line?

Mr. Link: We had two railroads at the time I was with the company operating in there, one the T. & N. O. and the other the Orange & Northwestern. Both had spurs and switches running into our yard, and sometimes we loaded part of the lumber out on one and part on the other. Generally we were shipping by both roads.

Mr. Cowan: Did your company get any division of rates?

Mr. Link: No, sir, we did not while I was with the company.

Mr. Cowan: What was the capacity of your mill?

Mr. Link: The Orange mill had a capacity of about 125,000 feet daily and the Newton mill about 60,000.

Mr. Cowan: Was your lumber marketed in the same general market you heard the witnesses testify that lumber is marketed in?

Mr. Link: Yes, we market it in the same general markets as other-, I presume.

6757 Mr. Cowan: You have sold out your interest in the Miller Link Lumber Company?

Mr. Link: I have no interest.

Mr. Cowan: Explain the method of operation of your tram roads to get your logs in in each case.

Mr. Link: Well, we build our trams out into the woods——

Mr. Cowan: Take Newton, for example.

Mr. Link: Well, Newton was a little peculiar in that respect because they never put in what you might call a permanent tram into the Newton mill. We had only owned that mill something like a year prior to the time I left there, and we owned very scattering tracts of timber south of Newton; that is, it was not compact bodies, and I think we only had three or four miles of railroad there, and we

would run out our track and have a camp and everything, but it was temporary in a way. We did not have what you would call a permanent tram road. The main timber lands were north. We were not operating that timber, and we simply ran out the spurs from the Orange & Northwestern two or three miles, I think was probably as long as any spur they had from that mill, and I was advised they are not operating those trams at all. I do not know whether they are operating the Newton mill at all, but I think it has been
6758 logged from down below, but they were all temporary tracks.

At the Orange mill it was a different operation. We had a permanent camp at Bunker Hill, and had commissary houses like an ordinary camp, and we had the main line track, and we built our spurs off from this main line that went into the timber. Of course we tried to lay out, and they always do, to lay out a main line which would take into consideration the timber holdings of the company, and they generally lay out a main line which will be of permanency, and build it so you can maintain it and run over it safely. They build it up better then they do the laterals or switches which run out into the forest sections of land. Our main line we built a little bit better track because we expected to stay there until we finally finished logging in that locality, whereas the spurs were merely here until this tract of timber was absorbed and then were taken up and moved.

6759 Mr. Cowan: How many miles of main line track?

Mr. Link: I think they have got probably eight to ten miles of track.

Commissioner Harlan: This is at Newton?

Mr. Link: No, sir, this is at the Orange mill, Bunker Hill, they call it.

Mr. Cowan: Are there other sawmills in your locality which you know of, which do not perform any materially different service in the matter of the railroad and logging operations and mill operations to what you do, who do get divisions of the rates, which you can point out?

Mr. Link: I think so, yes, sir.

Mr. Cowan: Have you any particular one in mind?

Mr. Link: Well, I do not know that I could particularize them, I guess I could. There are a number of them. I never could see much distinction between the fellow who was getting a division and the fellow who was not. They all necessarily now, in order to operate a sawmill of any capacity, must have a railroad. Of course you can operate a small mill in the old primitive way of hauling them in with ox teams, but in order to operate a mill, you might say of 25,000 capacity and up, it is practically impossible to log it
6760 other than by the modern way of having a tram road.

Mr. Cowan: Are there a good many of the mills operating by teams?

Mr. Link: Oh, little jerk water mills, you know, who will go in and cut off 160 acres, they put in a mill generally of a small and temporary character. Some mills probably cut as much as twenty thousand to twenty-five thousand feet, which operate for a time by

teams, but they are bound to be short lived, because when they get a mile or a mile and a half away they cannot do it. I think a two mile haul by ox team, they charge $2.50 per thousand for hauling the logs, and when you go to pay that and take the additional expense of hauling the lumber and all, it makes the tramming too high, and you cannot stand it.

Mr. Cowan: If the tramroads in Eastern Texas are to be considered as railroads, what would you have to say with respect to the relative amount of railroads in that community to other parts of Texas?

Mr. Link: If you were to make a map, I think that with all the tram roads in East Texas on it, it would look like we had a country which was rather dense in population, and a wonderful railroad knowledge. The roads are winding around there very thick,
6761 around every saw mill in the country, and there would be an immense mileage of railroad.

Mr. Cowan: How is the country generally with respect to its productive capacity other than of lumber?

Mr. Link: The country generally is a poor country; that is true of all piney wood country. When you get the timber off you get the principal part of its productiveness. It is not considered a good agricultural country, and not very productive of tonnage other than the natural growth of timber, similar of course to all pine wood country. The land is worth for agricultural purposes after the timber is cut off, and frequently sells, where it does sell, at about $2.00 an acre. You can tell from that about the value it has as a producer.

Mr. Cowan: How much agricultural development has there been in that country since you have been operating in buying and selling timber there for 15 years, in that pine wood country in East Texas?

Mr. Link: I think there is less agricultural development——

Mr. Garwood: Do you include in that all East Texas, Mr. Cowan? That is an im-ense scope.

Mr. Cowan: The part he is acquainted with, I should have
6762 stated. I meant to do that. That is where he has been buying.

Mr. Garwood: I do not want to see all East Texas indicted as not having agricultural possibilities. We are booming that country too much for that to go out to the public.

Mr. Cowan: Let us see what he says about it.

Mr. Link: There are some parts of East Texas which are fairly good agricultural land. You take what is known as Red River Country, around Nacogdoches, the earliest settlement in the state was in that country. But take the counties of Newton, Jasper, San Augustine and Tyler, and a number of counties known as the Long Leaf Belt, I do not believe there is as much farming in that country now as 15 years ago. Those people have quit the farms and followed up the sawmills, and you see more abandoned farms than you do new ones going in. I do not think there is as much farming there as there was prior to the development of the lumber industry in that country. The lands are poor, and those people seemed to make a

living there in former years, but now that other opportunities are offered such as tramlines and saw mills they have gone to work, and there is very little farming.

Mr. Cowan: These facts you have mentioned are perfectly well known and observable to everybody.

Mr. Link: I think so. I do not think it would apply to
6763 all East Texas. Probably the northern part of East Texas is better agriculturally, and there are probably hard wood countries, and what is known as the short leaf country, the lands are a little more productive than the long leaf.

Mr. Cowan: How is this condition you have just described in Louisiana as compared with Texas?

Mr. Link: I think it is very similar. The forests are very similar.

Mr. Cowan: Did you know in regard to the matter of export of lumber what arrangements existed in that part of the country as to seeking a market for export?

Mr. Link: Well, there is quite a good deal of lumber exported from that country. Now from our Orange Mill, we exported a good big per cent of our product, because we were on the water and had cheap transportation to Port Arthur, where we loaded on board a vessel. We probably exported 25 to 30 per cent of our product from the Orange mill, and from the Newton mill—from group of mills in that long leaf belt, there was a freight rate, I think, ranging from five to possibly eight cents per hundred pounds to Deep Water may be from four cents up to eight cents. When the export market was brisk, that is when freight rates on the sea were down, it generally shoved the lumber market upward, and frequently there
6764 were seasons of the year when there was a large amount of lumber being exported by the interior mills that had a rate of 5, 6, or 7 cents. And there were other times when those mills could not reach the export market very well for the reason that in order to absorb that freight rate to the ship, they could better afford to sell their lumber in the interior, whereas the mills located immediately on the water had the advantage in that they had a very light cost to put their lumber on board the ship, and I could not say what percent of the lumber of Southeast Texas and West Louisiana was exported, but quite an amount.

Mr. Cowan: What was the comparative price of the lumber lands which you were acquainted with, and what were they generally sold for in the pine districts you have mentioned in Louisiana and Texas, going back to the time you began operations, and coming up to this time, what has been the range of prices?

Mr. Link: Well, I do not know what you mean by the time we began operations——

Mr. Cowan: I mean when you went into the timber business.

Mr. Link: Say going back fifteen years you could buy the timber land in East Texas and Western Louisiana from $2.00 to $5.00 an acre. There might have been a little sold as high as $8
6765 or $10, but you could buy a large amount of average land for $5.00. I remember buying some for some clients, I think eighty thousand odd acres in one body, I bought it from various people, some from the railroad company, and a large quan-

tity from the Texas Central and different individuals. I think I bought up eighty thousand or ninety thousand acres of good virgin timber, and my recollection is that the average price was about $5.16 per acre. That was either in 1900 or in 1899. That same body of timber to-day I suppose would sell, if put on the market, for $75 an acre. It could not be bought for $100 from people who do not want to sell it, but if put on the market I am satisfied it would sell for $75, and might sell for $100. Stumpage was then from 50 cents to one dollar, and now the ruling price of stumpage, you might say, is five dollars. The present price of lumber I do not think justifies $5.00 stumpage, but at the same time since the panic —lumber fell off during the panic very rapidly, and has not recovered, so I am told. It had not up to the time I sold out. Timber did not seem to go off. The mill man was willing to sacrifice his lumber to keep up his interest payments, but he held on to his timber lands; so that while there has been a great deal of
6766 timber land selling, I do not think there has been any reduction in the price. I do not think there is very much to sell. They are pretty hard up, but seem to be holding on to all the timber lands expecting better times in the future, of course.

Mr. Cowan: Did the increase in land values mentioned result in any sense from the increase in the value of the land if the timber were off of it?

Mr. Link: No, there may be a little increase in the value of the naked land. There has been of all lands over the United States in the past few years. I have heard of some cut over land selling for as high as four or five dollars an acre in the past two or three years, but the ruling price used to be one dollar. You could buy it for one dollar an acre. But now I think the ruling price of the cut over timber land, if you found somebody who wanted to sell, might be considered $2.00 or $2.50. I do not think there is much selling. They are holding pretty well, and a great many are holding it for the growth of timber.

Mr. Cowan: Does it reforest?

Mr. Link: Well, it does in a way. It does not very rapidly, but pine grows pretty fast when it is given lots of water.

Mr. Cowan: That is long leaf?

Mr. Link: Yes. It does not grow as rapidly as the short
6767 leaf. Short leaf will reforest much faster than long leaf. Long leaf is a very slow growth.

Mr. Cowan: The conditions you have stated as to prices would apply generally to that long leaf belt of East Texas or Southwest Louisiana?

Mr. Link: Yes, sir, I think so.

Mr. Cowan: Did you have anything to do with the marketing of your lumber when you were engaged in the sawmill business with the Miller-Link Company?

Mr. Link: In a way I overlooked it—that is I tried to keep in touch with it, but we had a sales agent who had active charge of the marketing of lumber.

Mr. Cowan: But you had general knowledge of it?

2755

Mr. Link: Yes, I kept pretty well up to it, as well as I could.

Mr. Cowan: Will you state whether or not you thought or believed—I suppose it could not amount to more than a thought or a belief—or you may state whether or not you knew that those persons who had their investment in tap line railroads and sawmills, who were getting a division of the rate had any advantage of you in the marketing of the lumber.

Mr. Link: We thought so; that was my opinion, that is all
6768 I could give.

Mr. Cowan: You have been controverting this matter ever since the matter arose three or four years ago?

Mr. Link: Yes, sir, I was somewhat active in the matter when I was in the lumber business.

Mr. Cowan: What did you think that advantage was?

Mr. Link: Well, I thought that advantage was whatever the amount of division they got. I found——

Mr. Cowan: Did you in the course of entering this controversy, pay attention to the general situation in that part of the country?

Mr. Link: Yes, I looked at it pretty closely.

Mr. Cowan: Was it your opinion or not that that advantage generally applied in behalf of those who had divisions as against those who did not.

Mr. Link: I could not figure it out any other way, and if we operated a tram road the same way as the other fellow, and if he got a division from the trunk line and we did not, that he had the advantage.

Mr. Cowan: Did you feel any effect of it in the competitive sales of lumber?

Mr. Link: We thought we did after the panic. We did not
6769 notice any prior to the panic, because we were all getting a big price for the lumber, and that matter did not make much difference, we could sell our lumber anyway.

Mr. Cowan: You had money to burn, then?

Mr. Link: We had money to burn then, yes, but when the price dropped down three or four or five years ago, we began to feel it, or that is we thought we did.

Mr. Cowan: Are there any other points you have in mind which you would like to state, or that I have not asked you about?

Mr. Link: Well, I do not know of anything that I care to state unless somebody wants to hear it. I suppose the matter has been very thoroughly explained down there, and the conditions as they exist are pretty well known to everybody. I do not think of any explanation I have to make.

Mr. Cowan: That is all.

Cross-examination.

Mr. Garwood: Mr. Link, you stated that you thought that it was your opinion that you were at a disadvantage in the market to the extent of divisions. Now you have been requested to file here a statement by your company of your average selling price of your
6770 lumber for a given period stated in the notice; you have also been requested to file a statement of the average cost of pro-

duction; each of those statements being general in their nature, and also as applied to the several grades of the products. Now would not the production of those figures be more valuable in determining as compared with others whom you say have tramroads on which they get a division and a comparison of what the other man is selling at, and what you are selling at, and what it cost him to produce, and what it cost you to produce—would not that be more valuable than your mere general opinion or as you say, your thought on the subject?

Mr. Andrews: We object, if the Commissioner please, because that is asking a legal opinion from the witness as to the weight and value of his evidence.

Commissioner Harlan: The objection is sustained. That is a matter for the Commission to decide.

Mr. Garwood: Note our exception. All then that you propose to say on that subject is that after the panic when the shoe was pinching, that you thought in all likelihood the other fellow must have an advantage of you, that is about the size of it?

6771 Mr. Link: Yes, sir. As long as everybody was making plenty of money it was not noticeable whether that one fellow might be making any more than the other.

Mr Garwood: But when prices went down you discovered in a general way, without any figures to sustain it, but you just thought that the other fellow must have the advantage of you.

Mr. Link: No, I did not just think it, Judge. I did not know the extent of these divisions. I had heard rumors of this concern getting a division and that concern getting a division, but never have paid a great deal of attention to it, but when the fact became known better I could not figure it out, and I cannot yet why if there are two mills located similarly and are operating the same amount of railroad, and operating under similar conditions and paying for labor about the same, and one gets say four cents back from the trunk line, and the other one does not, I cannot analyze that question in my mind so as to figure that the fellow who is not getting a division is getting just as much out of his lumber as the other man. In other words, I cannot see why he does not have about four cents the advantage.

6772 Mr. Garwood: If it should appear that the other fellow, as you term it, never undersold you in the market at any place or time, substantially, other than that fugitive competition that you all have with each other, or if it should appear that the other fellow had not made anything especially out of his railroad, then of course your opinion would differ?

Mr. Link: Well, I do not know whether it would or not. I might be thoroughly convinced that he might not make a dollar, he might not. He might get a division and not make a penny, but at the same time we might sell lumber on the market at the same price and lose a dollar. He would have that advantage. He might not undersell, but he would be getting an advantage. In other words he would be getting more for his product than we would.

Mr. Garwood: That would be entirely conditioned upon the

proposition whether he made anything out of his railroad, would it not?

Mr. Link: We never figure in operating a sawmill on making anything from our railroad. It is just part of the expense of operation.

Mr. Garwood: You do not figure on making anything out of that?

Mr. Link: No, it is just part of the logging expense, and is charged up to logging expense.

6773 Mr. Garwood: If the other fellow never made anything out of his railroad, you cannot conceive he would have even remotely a small advantage of you by virtue of his stock ownership.

Mr. Link: If he got anything out of it at all he would get that much more than the fellow who did not get anything. Anything he would get would be that much over the other fellow, that is if they are located similarly. Of course there might be different conditions and one man might be entitled to it and the other not, but assuming they are similarly located and similarly situated.

Mr. Garwood: You then attach no importance to the proposition that simply because a man owns stock in a lumber company that he cannot own stock in a railroad?

Mr. Link: He can certainly do that, if he is able to, I guess.

Mr. Garwood: There is no reason why if he has really got a railroad he should not be permitted to earn on the transportation facilities?

Mr. Link: There is no question but what a man can be in the sawmill business and in the railroad business too. There is a difference in the way he operates his railroad in connection with the sawmill. I have always thought that the sawmill and railroad

6774 were two different propositions and should be.

Mr. Garwood: And there is no reason in your mind why a man who owns stock in a lumber company cannot also operate a railroad, provided it is a railroad.

Mr. Link: Yes, sir, none whatever provided it is a railroad.

Mr. Garwood: And your remarks are confined entirely to those cases where the railroad is substantially a plant facility and nothing else?

Mr. Link: Yes, that is exactly what I am getting at.

Mr. Garwood: It is a mere tram, in other words?

Mr. Link: Yes, that is what I would like to be understood as saying.

Mr. Garwood: And no further than that?

Mr. Link: If it is a railroad and complies with the law and after examining all the facts surrounding it it is shown that it is a common carrier within the meaning of common carrier, then there is no question but what the sawmill man would have a perfect right to have stock in it the same as any other citizen of the United States.

Mr. Garwood: And to earn reasonable rates on the products.

6775 Mr. Link: Yes.

Mr. Garwood: Who composed the firm of Miller & Link before you went out of it?

Mr. Link: The stock was owned by Mr. Miller and myself and one of Mr. Miller's boys. I owned half of it, and Mr. Miller and his son owned the other half.

Mr. Garwood: Who composes the firm now?

Mr. Link: I think Mr. Miller owns practically all the stock. I think Mr. Tam owns a little stock, and Mr. Miller's boy, but the company is practically owned by L. Miller. I sold my interest to Mr. Miller.

Mr. Garwood: Who built the Orange & Northwestern?

Mr. Link: It was promoted by Gilbert L. Moore, who is now dead, and I think at the time there were a number of Orange people interested in it, and Mr. Miller had some stock in it, and I had a little stock in it myself, a small amount. A number of local people were interested, but Gilbert L. Moore was the big stockholder.

Mr. Garwood: Was he interested in the lumber business?

Mr. Link: He was at that time. He sold out his interest in the lumber business about ten years ago.

Mr. Garwood: To whom?

6776 Mr. Link: To Lutcher Brown & Company, the Lutcher Brown people were his associates.

Mr. Garwood: That road was essentially a lumber road to start with?

Mr. Link: Well, it was built as an outlet to get to the Santa Fe. We only had one road then which was the Texas & New Orleans, and we always imagined we did not have very good shipping facilities, and that was built as an outlet for the lumber to get to the Santa Fe, and further to reach into that country up there, but it did not reach the timber holdings of any mill at that time operating in Orange. I do not think they owned an acre at that time. They might have owned a little, but it went through the Houston Oil Company's holdings mostly.

Mr. Garwood: Having but one road, whether correctly or not, the lumber company people felt they were not afforded sufficient facilities and could not get cars when they wanted them, and so they built over to Buna.

Mr. Link: That was the idea.

Mr. Garwood: A great part of that stock was held by the heavy lumber operators, was it not?

Mr. Link: I think so. They were the only people that had

6777 any means.

Mr. Garwood: And were interested in its construction Orange about that time was what sized town?

Mr. Link: About 4,000 perhaps.

Mr. Garwood: There was not anything at Buna?

Mr. Link: No, just a kind of logging camp, several hundred people.

Mr. Garwood: Kind of a logging camp?

Mr. Link: Yes, sir.

Mr. Garwood: So that the primary construction and the ownership of it was for the purpose of getting better facilities for the purpose of getting your lumber out to another connection, and getting

more cars, and in other words inducing the competitive element into the lumber situation.

Mr. Link: Yes, sir, and everything else, but the lumber being the principal product, of course that was the main thing.

Mr. Garwood: About when was that built?

Mr. Link: That must have been built about 1899, I am not sure.

Mr. Garwood: About 1899?

Mr. Link: Somewheres along that.

Mr. Hancock: 1900.

6778 Mr. Link: 1900.

Mr. Garwood: When did you build from Buna to Newton?

Mr. Link: It must have been three or four years later. The Frisco people built that. They bought the line from the Orange people.

Mr. Garwood: When did the Frisco people buy from the Orange people?

Mr. Link: It must have been five years ago—I cannot give the dates of those transactions.

Mr. Garwood: Do the Frisco people own the stock in it now substantially?

Mr. Link: I think so, or the Yoakum interest—I cannot follow it up.

Mr. Garwood: Oh, yes, but substantially the Frisco interests?

Mr. Link: Yes.

Mr. Garwood: Do any of your partners still own any interest?

Mr. Link: I think Mr. Miller owns a little, and he is president of it.

Mr. Garwood: He is president of it?

Mr. Link: Yes. I think he has been president of it all the time. I think he has about one share of stock.

6779 Mr. Garwood: Have the Miller-Link people got any contract of any kind relative to the transportation either of logs or lumber over that road?

Mr. Link: I have been told, and I could only speak from hearsay—up to the time I left the Miller-Link Company they had not. Let me understand your question. Any contract?

Mr. Garwood: Any contract——

Mr. Link: We had a contract prior to the time I left by which they hauled our logs for $1.25 a thousand.

Mr. Garwood: From where?

Mr. Link: From anywhere on the line to Orange.

Mr. Garwood: Anywhere between Buna——

Mr. Link: Anywhere between Newton and Orange.

Mr. Garwood: Anywhere between Newton and Orange?

Mr. Link: Yes, sir, when we delivered them f. o. b. cars they brought them down there for $1.25 a thousand feet log scale, which is about $5.00 a car.

Mr. Garwood: And you had your trams connected with the Orange & Northwestern?

Mr. Link: Yes, sir, we delivered them to them in train lots.

6780 and they generally ran a solid train of logs for us once a day of about thirty cars.

Mr. Garwood: That was a contract in force before you left them?

Mr. Link: It was in force practically during the entire period I was connected with the operation of the Miller-Link Lumber Company.

Mr. Garwood: Was there any provision in that contract for a refund of this charge in after the lumber went out?

Mr. Link: I think not. There was no provision in the contract we had for any refund. There had been some kind of a tariff placed on record allowing us so many cars of logs, so much return freight, if we got in so many logs and gave them back so much lumber we got so much return.

Mr. Garwood: Yes, that is it.

Mr. Link: But we never collected a cent of that tariff, in fact I did not know there was such a tariff for two or three years until someone told me there was one, and I looked it up and found there was, but we never got paid a penny from the railroad company. But they afterwards withdrew it.

Mr. Garwood: Did you ship out over that line?

Mr. Link: We shipped out over that line. That arrange-
6781 ment was made with Mr. Beard of the T. & N. O., and Mr. Hoe in some way, in which the Orange & Northwestern was to turn the stuff over to the Southern Pacific. I do not remember the details of it. That was before they went with the Frisco. That arrangement seems to have been made, this tariff was authorized by the Commission, and the fact is I don't know much about it, because we never lived up to it, and neither did they. We did not get anything at all; we never got a penny. I think Mr. Miller is trying to make them pay an amount that they owe him now. I understood that he has filed a claim there for quite a little amount of money.

Mr. Garwood: Would Mr. Miller know about that arrangement, that contract?

Mr. Link: Mr. Miller I presume would know about it. I do not think he knew much more about it than I did at the time. I suppose he has looked into them since.

Mr. Garwood: Was that the only contract you had relative to the transportation of those logs?

Mr. Link: I think the contract we had relative to the transportation of the logs was a written contract by which the Orange & Northwestern agreed to haul them, say 250,000,000 feet of timber,
6782 anywhere from the north end of the line to Orange for the sum of $1.25 per thousand feet, they to furnish the cars, and that contract provided further that all things being equal, we were to give them the return freight, but did not provide that we were to receive any compensation for giving them the lumber. It was a written contract that was entered into between the Miller-Link Lumber Company and the Orange & Northwestern Railroad. That is my recollection of that contract. I am sure there was no stipulation as to any return in it, but this tariff I speak about was some sort of verbal arrangement which had gone into effect prior to the time the contract was entered into. The fact is it was called to my attention, I remember, by Mr. Duff at Austin. They could not understand why

we had not got this return from the road. The Miller-Link Lumber Company had not up to the time I had left, received a penny, and that will be borne out by the Orange & Northwestern and the T. & N. O. records.

Mr. Garwood: The contract was that you were to pay $1.25 a thousand to the Orange & Northwestern?

Mr. Link: Yes, sir.

Mr. Garwood: It was owned by yourself practically?

Mr. Link: No, it was not. I did not have a penny's interest in it in the world.

6783 Mr. Garwood: Did you not say you were a stockholder?

Mr. Link: I was prior to the time this contract was executed, but this contract was made after it went into the hands of the Yoakum interests. I will draw the distinction. This return business when this tariff was promulgated was issued prior to the time this contract was made. The contract was made after that. I do not know how long before this tariff was got out, but it went into the hands of the Yoakum interests, and it was some kind of a contract between the Orange & Northwestern and the T. & N. O. I have the idea the Orange & Northwestern was to bring down the logs and to turn them over to the T. & N. O., and they were to give us some kind of a return for the log haul.

Mr. Garwood: Sort of a milling-in-transit proposition?

Mr. Link: Sort of a milling-in-transit proposition, but they did not do it. We never got anything out of it, and I understand Mr. Miller—in fact, some one told me not long ago that Mr. Miller was trying to make them pay him for that now.

Mr. Garwood: If there was a recovery of any sort against the road, would you have any interest in that recovery?

Mr. Link: No.

6784 Mr. Garwood: Did the Lutcher-Moore people use that road for the transportation of their logs into Orange?

Mr. Link: The Lutcher-Moore people never used that road for the transportation of their logs except I remember at one time they bought, I suppose eighteen or twenty million feet from a party up there, and it was delivered over that road. That was seven or eight years ago. I think it was three sections of land they bought from somebody, and they hauled it down over that road. I do not think they ever got another foot of log. The Lutcher-Moore people were operating on the other side over in Louisiana.

Mr. Garwood: Do you ship any lumber over the Orange & Northwestern?

Mr. Link: I always did when I was connected with the Company.

Mr. Garwood: Did the Lutcher-Moore people ship any over it?

Mr. Link: Yes, sir.

Mr. Garwood: Did they ship any lumber over it prior to its acquisition by the Frisco people?

Mr. Link: I presume so. I believe they always shipped over it more or less.

Mr. Garwood: Did the company collect the published rates
6785 from them?

Mr. Link: I assume so, I do not know.

Mr. Garwood: That is your understanding, of course.

Mr. Link: It is my understanding they collected the same rate as if it was going out over the T. & N. O.

Mr. Garwood: There was practically nothing shipped up from Orange to this place, Buna, except the products of these two mills, was there?

Mr. Link: Well, those were the principal shipments. There was quite a little incoming freight which came by the Santa Fe and the Orange & Northwestern at all times, merchandise and stuff of that kind. But I suppose——

Mr. Garwood: That did not amount to a great deal?

Mr. Link: No, but a pretty good line of business, though. They did quite a little business, not as compared with the other roads however.

Mr. Garwood: In the other way you used that for the shipment of your lumber?

Mr. Link: It was used largely just like the T. & N. O. The T. & N. O. shipped ten carloads of lumber out of Orange to one carload of anything else. Any road that ran in there would ship that.

6786 Mr. Garwood: No question but that is true. You never regarded the Orange & Northwestern in any sense as a plant facility of the Miller-Link or the Lutcher-Moore Companies, although you owned the stock in it?

Mr. Link: It was not a plant facility at all. It was a railroad.

Mr. Garwood: It performed a real transportation service?

Mr. Link: It was very easy for me in my own mind to distinguish a road of that kind from a plant facility.

Mr. Garwood: And it was incorporated as a railroad?

Mr. Link: Yes, sir.

Mr. Garwood: And in your judgment performed the services of a railroad?

Mr. Link: Yes, sir.

Mr. Garwood: And was therefore entitled to its legal charges?

Mr. Link: As I understand it, yes sir. That was my understanding.

Mr. Garwood: You spoke of the agricultural development of East Texas. The term East Texas includes a vast scope of territory.

Mr. Link: I understand it. I will limit it to those counties, Judge.

6787 Mr. Garwood: Just let me——

Mr. Link: The pine wood counties.

Mr. Garwood: You mean the counties of——

Mr. Link: Where the pine timber has been taken off.

Commissioner Harlan: Suppose you state the facts as you understand them with respect to this part of Texas. Is not that what you are inquiring about?

Mr. Garwood: I understand, your Honor, that some of the richest agricultural country in the world is in East Texas, and some of it

is right in the very country where these railroads are developing, and counsel's question just applies in a general sweeping way to East Texas, and I want Mr. Link to limit it.

Commissioner Harlan: We will let it stand on your statement.

Mr. Garwood: I hate to testify.

Commissioner Harlan: The Commission has asked you to make the statement. I think we will stand on that. I do not see the value of it except in a general way.

Mr. Garwood: I thought it was somewhat remote, but he has already stated——

Commissioner Harlan: You have corrected it, and the record will show you have given your view, and I think that is sufficient.

6788 Have you some other point you want to go into?

Mr. Garwood: No.

Mr. Walter: The panic of 1907 was very disastrous to the lumber interests.

Mr. Link: Yes, very disastrous.

Mr. Walter: And I believe you said that notwithstanding the hard times, a number of these men had to cut their lumber in order to meet the carrying charges, interest, and so forth.

Mr. Link: I suppose that is the case.

Mr. Walter: If a man had no interest charges to meet, he could have shut down and saved his timber?

Mr. Link: Yes, sir. There is not much in it by cutting it now.

Mr. Walter: You said our company got no division. You mean the Miller-Link Lumber Company?

Mr. Link: Yes, sir.

Mr. Walter: You do not understand that the lumber companies as such receive divisions, do you?

Mr. Link: The lumber companies?

Mr. Walter: Yes.

6789 Mr. Link: Well, now, I suppose they receive those through the incorporation of their tram roads, but my construction is and was, and my idea, of course that it is a mere matter of opinion, my impression and opinion has always been that in many instances those incorporated tram roads are merely part and parcel of the sawmill operation incident to it, and a necessary part of it.

Mr. Walter: You say your company got no part of it?

Mr. Link: No.

Mr. Walter: The lumber interests and your concern along it owned the Orange & Northwestern.

Mr. Link: At the time I was in the sawmill I did not have a penny of interest.

Mr. Walter: Well, other lumber people did?

Mr. Link: I think Mr. Miller owned one share. The Yoakum interests owned it, the Frisco people owned the Orange & Northwestern.

Mr. Walter: Were there any stockholders in the railroad company other than Mr. Miller who owned stock in lumber companies or timber lands along that line?

Mr. Link: I think we had a few directors there, and in order to

have a directorate they had a nominal amount of stock,
6790 one share, but I do not think there was five hundred dollars' worth all told owned outside the Yoakum people.

Mr. Walter: You are speaking after the Frisco took the road?

Mr. Link: Yes, sir.

Mr. Walter: I am speaking of the time the road was built.

Mr. Link: At the time the road was built it was built by a company organized there locally, and the saw mill people; that is Mr. G. B. Moore, who operated—by the way I do not know whether he built the road prior to the time he parted with his interests with the Lutcher-Moore people, or after.

Mr. Walter: It was built by lumber shippers along the railroad?

Mr. Link: Not entirely.

Mr. Walter: Not entirely, but built for that purpose?

Mr. Link: It was built from Orange to the Santa Fe to have shipments of lumber travel over it, and operate everything else, as a general railroad.

Mr. Walter: The large owners of that railroad when it was first built were men who were interested in the lumber traffic which moved over it?

Mr. Link: Yes, sir.

6791 Mr. Walter: That railroad received the division, did it not?

Mr. Link: I think it did.

Mr. Walter: How can you say your company received no divisions, and yet these lumber companies who have an incorporated railroad and receive it in substantially the same form as you receive it.

Mr. Link: If they have a road like the Orange & Northwestern as distinct from their manufacturing plant as the Orange & Northwestern was from ours, and operated as the Orange & Northwestern was operated and owned as the Orange & Northwestern was owned, they are certainly entitled to get a division, but their sawmill—if the facts will bear out the same as the facts will bear out the building and operation of the Orange & Northwestern, then there is no question but what they would be entitled to divisions. That is a question of fact, as I understand it, surrounding each particular proposition.

Mr. Walter: Now if you will just answer my questions, we will get along much faster.

Mr. Link: I want to make it plain.

Mr. Walter: That road, I believe you said, furnished a highway for the logs going into the mill.

6792 Mr. Link: No, it did not. I do not think there was a log hauled over that road four or five years after it was built.

Mr. Walter: Where did they come from?

Mr. Link: The logs came down the Sabine River at that time altogether.

Mr. Walter: How soon did you commence hauling logs over that part of the land extending from Buna to Newton?

Mr. Link: That road was constructed I think in 1900, and we started hauling logs there in 1905.

Commissioner Harlan: In the meantime they had hauled lumber?

Mr. Link: It was used as an outlet for lumber. I think the Lutcher-Moore Company had hauled a few logs, probably eighteen or twenty million feet prior to the time we hauled logs over it, but that is hearsay. There was not any logs hauled over it except the few months the Lutcher-Moore people used it, for five years.

Mr. Walter: But lumber did move out over it?

Mr. Link: Yes, sir.

Mr. Walter: Ninety per cent of the lumber came from mills who were interested in the railroad.

Mr. Link: I do not know that ninety per cent did, because I do not think it did. There were some mills that did not own
6793 any interest, the owners of the mills owned no interest in the roads, and of course they shipped more or less lumber over the roads.

Mr. Walter: But ninety percent was lumber?

Mr. Link: I suppose it was.

Mr. Walter: And a large portion of that 90 per cent was owned by interests who owned the railroad.

Mr. Link: A portion of it was. The Lutcher-Moore people at that time shipped over it to a large extent. I believe they owned a good big interest in the railroad. But at the time the Kirby Lumber Company operated a sawmill there, they owned, and they shipped over that road. The Bancroft Lumber Company shipped over it and the Kirby Lumber Company purchased the Bancroft plant, and the Orange Railroad Company owned no interest in the mill.

Commissioner Harlan: Was that your lumber Company?

Mr. Link: It was owned by the M. T. Jones interests at that time.

Mr. Walter: Do you know what percentage of the lumber that was shipped over this road prior to the time you indicate belonged to interests that were also part owners of the roads?

Mr. Link: No, it would require a detailed statement show-
6794 ing who shipped each car.

Mr. Walter: You have not any estimate?

Mr. Link: No.

Mr. Walter: Is it 50 or more than 50 per cent?

Mr. Link: I do not know; I should think it was more than 50 per cent anyway. If you will let me explain the number of mills at Orange it will give an idea. The Lutcher-Moore Company had two; the Kirby Lumber Company had one. These were of about the same capacity. The Orange Lumber Company had a big mill, and D. R. Wingate Lumber Company at that time had a mill, and all those mills, I assume, shipped more or less. I think probably Lutcher-Moore shipped a little bigger per cent than these other mills, but there was not more than half the lumber people in Orange who had any interest in this road at all. But it is hard to state when they are all shipping lumber to divide the per cent.

Commissioner Harlan: You have answered the question.

Mr. Walter: And the witness unduly prolongs his answers. I think we could save a great deal of time if he would answer responsively. At the time the lumber was moving over it the railroads received divisions?

Mr. Link: I guess they did.

6795 Mr. Walter: That movement of lumber was absolutely indispensible to reach the market?

Mr. Link: No, they could move it over the T. & N. O.

Mr. Walter: Could they reach the same market?

Mr. Link: I assume so.

Mr. Walter: When was the road extended to Newton?

Mr. Link: I think about four or five years later: I cannot give the year.

Mr. Walter: About 1905?

Mr. Link: I think the road was extended in about 1904.

Mr. Walter: Was there a mill at Newton?

Mr. Link: No mill there at that time.

Mr. Walter: Was there no mill along up that line?

Mr. Link: One of the Kirby Lumber Company's mills at Call.

Mr. Walter: Any log haul from this extension from Buna any time after it opened this extension from Buna to Orange?

Mr. Link: We hauled logs there, yes, sir.

Mr Walter: That was absolutely indispensible to get those logs to the mill?

Mr. Link: Yes, sir, it was necessary to haul those particular logs over that road.

6796 Mr. Walter: Was not that railroad then the plant facility?

Mr. Link: It was then owned——

Mr. Walter: I am asking whether it was a plant facility.

Mr. Link: I don't understand.

Commissioner Harlan: Let us confine what the relation to the plant was. By whom was the railroad owned at that time.

Mr. Link: It was owned by the Frisco interests, I think all the stock was owned by the Frisco except a few shares held by some other people.

Commissioner Harlan: But the extension was also made by the Frisco?

Mr. Link: The extension was also made by the Frisco, and paid for by Frisco interests.

Commissioner Harlan: Counsel's question is whether at that time the railroad was a plant facility, and if so, to what plant?

Mr. Link: I cannot understand that it was a plant facility at all. It was serving no particular plant, but everybody along the line.

Mr. Walter: That is your distinction?

Mr. Link: Yes, sir.

6797 Mr. Walter: If the railroad serves everybody along the line it is not a plant facility, and if it serves only the interest that owns it it is a plant facility.

Mr. Link: I——

Mr. Marble: It strikes me that question is for the Commission to decide.

Mr. Walter: There has been no objection to the witness answering——

Mr Marble: I am suggesting that we might get something of value out of the examination——

Commissioner Harlan: Well, the objection is made.

Mr. Marble: I am not objecting.

Commissioner Harlan: Then I will make the objection. That is a question for the Commission to decide. You may bring out the fact, and the fact seems to be that at this time the road was owned by the Frisco, and the extension of it was owned by the Frisco.

Mr. Walter: Does the ownership of the road make any difference in your judgment?

Commissioner Harlan: You need not answer that question. That is a matter of judgment. We cannot spend time on objections of that kind.

6798 Mr. Walter: I hope I shall not have to make them. I want to find out the fact as to the operation of this road. He has given his judgment not based upon particular figures, but his thought as to whether he was discriminated against. I want to ask him whether he thinks the ownership of the road makes any difference as to whether it is a plant facility or not, if he distinguishes on the plant facility.

Commissioner Harlan: I think that is a question of law, but still answer the question.

Mr. Walter: Do you think the ownership of this railroad makes any difference as to whether it is or is not a plant facility?

Mr. Link: Whether the ownership makes any difference?

Mr. Walter: Yes, as to whether it is or is not a plant facility.

Mr. Link: Yes, I do.

Mr. Walter: Now, explain.

Mr. Link: It does not necessarily make a difference. In other words I can own a sawmill and a railroad, and the railroad would not be a plant facility, while on the other hand I can own a sawmill and railroad, and it would be a plant facility.

Commissioner Harlan: Confine your answer to this road.

6799 Mr. Link: This road was not a plant facility, according to my understanding.

Commissioner Harlan: It was extended out into the woods by the Frisco?

Mr. Link: Yes, sir.

Commissioner Harlan: And then it commenced to haul logs to your mill?

Mr. Link: Yes, sir.

Commissioner Harlan: Did you regard it as your plant facility?

Mr. Link: No.

Commissioner Harlan: Or a facility attached to your plant?

Mr. Link: I certainly did not, because it was operated as a general common carrier.

Mr. Walter: I understood you to say that during the last year prior to your leaving the lumber company, all your logs for the Newton mill were brought in over spurs to the main line of the Orange & Northwestern.

Mr. Link: Yes, sir.

Mr. Walter: Now, then, did the Orange & Northwestern
6800 Railroad from the junction point with your spurs to the mill afford you a plant facility?

Mr. Link: They afforded us a plant facility, and we paid for it.
Mr. Walter: You paid for it?
Mr. Link: Yes, sir.
Commissioner Harlan: Suppose you had built the road yourself, would you regard it as a facility attached to your plant?
Mr. Link: If I had built the road and operated it as the Orange & Northwestern has been operating, I would not consider it a plant facility.
Commissioner Harlan: Explain why.
Mr. Link: Because that road has been operated—in the first place it was not built in connection with any sawmill, and did not bring logs to any particular sawmill, or take lumber from any particular sawmill; it did not run out into anybody's forest, or at least any particular timber holdings of any company.
Commissioner Harlan: You now refer to the whole road?
Mr. Link: I now refer to the whole road, yes, sir.
Commissioner Harlan: My question referred to the exten-
6801 sion by the Frisco from your mill into the woods you were lumbering. Suppose you had built that extension and had hauled your logs over it to the mill.
Mr. Link: I do not think you exactly understand the situation.
Commissioner Harlan: Perhaps not.
Mr. Link: It did not build from our mill into the woods. This road was first built from Orange thirty miles to a place called Buna.
Mr. Andrews: That was the connection with the Santa Fe?
Mr. Link: That was the connection with the Santa Fe. Then afterwards I think it was contemplated to build through to Marshall, two or three hundred miles; at any rate they built on to Newton, the county seat of Newton county. We had no mill at that time on that line. It was at the other end of the line. Afterwards when it was in operation for three or four years, we bought a mill at Newton, at the extreme other end of the road. We ran our spurs out about ten miles south of Newton and cut the timber, and logged it over the Orange & Northwestern to Newton, and paid them a trackage of probably fifty cents a train mile; I do not remember the exact amount, but we paid them, I think, 50 cents a train mile.
Mr. Walter: Whose engine hauled those logs?
6802 Mr. Link: Our engine.
Mr. Walter: That is the lumber company's engine?
Mr. Link: Yes, sir.
Mr. Walter: You simply had trackage rights?
Mr. Link: Yes, sir.
Mr. Walter: But you think the trackage rights did not change the situation at all as to whether the road over which they ran was a common carrier or not?
Mr. Link: I did not so understand. They furnished the pilot to run our trains over, and we had to pay them.
Mr. Walter: Who is president of the lumber company?
Mr. Link: Which lumber company?
Mr. Walter: The Miller-Link Lumber Company.
Mr. Link: Mr. Miller.

Mr. Walter: He is also president of the railroad?

Mr. Link: Yes, sir.

Mr. Walter: Does he have transportation over the various lines?

Mr. Link: I think so, yes, sir.

Mr. Walter: Are you connected in any way with the Orange & Northwestern?

Mr. Link: No, sir.

6803 Mr. Walter: Any lumber company?

Mr. Link: No, sir, not at this time.

Mr. Walter: At any time during the last year?

Mr. Link: No; I sold the last interest I had in the lumber business on the 20th of January, 1910.

Mr. Walter: Then you are not an intervenor in this case?

Mr. Link: No, sir, not at this time.

Mr. Walter: Mr. Miller, the president of that concern, would be much better able to give information as to all the facts in connection with his operation?

Mr. Link: He would, for the last year, for I do not know anything whatever of the operation in the last 12 months.

Mr. Walter: Is Mr. Miller here?

Mr. Link: I have not seen him.

Mr. Walter. Do you know whether or not he is here?

Mr. Link: I do not think he is.

Mr. Cowan: He was at New Orleans, but he is not here.

Mr. Walter: Is it not true that during all this time either by a contract or under an understanding, logs when hauled over the Orange & Northwestern to the mill when sawed into lumber, and the lumber shipped out were the basis of a refund for each three cars of logs in proportion to one car of lumber going out.

6804 Mr. Link: Was there an understanding of that character?

Mr. Walter: Yes.

Mr. Link: There was no understanding of that character not so far as I know, except this tariff I spoke to Judge Garwood about.

Mr. Walter: This tariff is the one which controls the operation, is it not?

Mr. Link: That tariff was in effect there for two or three years, it seems, and I did not know it.

Commissioner Harlan: That has been fully covered, except the element which counsel states, 3 to 1. If you want to press any question on that, go ahead, but otherwise this witness has fully explained the matter.

Mr. Walter: I want to ask whether or not, whenever a carload of lumber goes out, the refund is made on the inbound log rate on three cars.

Mr. Link: They never made us a refund of a penny.

Commissioner Harlan: Is that what the tariff meant?

Mr. Link: I think that is what the tariff meant.

Mr. Walter: That tariff is in effect to-day, is it not?

Mr. Link: That tariff was cut out a year before I sold out the company.

6805 Mr. Walter: Then if the tariffs in this record will show there has been a tariff during that entire time, you are mistaken about it?

Mr. Link: Yes. If it was not changed I am certainly mistaken, but that is my information, that the tariff was changed.

Mr. Walter: I want to ask you this question. You know about the Burrs Ferry, Browndel and Chester road?

Mr. Link: I was a director in that road once for a little while. I don't know much about it.

Mr. Walter: It was organized as a common carrier, and chartered as such?

Mr. Link: I understand so.

Mr. Walter: And was operated as such serving a quarry and certain lumber interests?

Mr. Link: I think so. I know nothing whatever of the operation of that road. I have never seen it and been on it.

Mr. Walter: During the time you were a director?

Mr. Link: I never attended a meeting while I was director, and consequently I don't know much about it.

6806 Mr. Walter: Well, for the purpose of this question, take my statement as correct. The road then grades an additional mileage into Browndel where Mr. Kirby has a mill. Mr. Kirby proceeds to ship over that line, and he owns the railroad. What change, if any, do you think that change of fact warrants in the rates and revenues of that road?

Mr. Link: I do not think his building that road, as I understand it, across from the T. & N. O. to the Santa Fe—that is, it was projected across there; it is about 12 miles built, and the rest is graded to Browndel?

Mr. Walter: Yes.

Mr. Link: You want to know my opinion there as to what would be the effect if he were to build into Browndel, and ship Browndel lumber——

Mr. Walter: Ship Kirby lumber, the owner of the railroad.

Mr. Link: I think he would have a perfect right to do it.

Mr. Walter: And on joint rates?

Mr. Link: Yes, sir.

Mr. Walter: Do you think there is anything immoral in that railroad receiving a division of the rates under those circumstances?

Mr. Link: No.

6807 Commissioner Harlan: Have you any questions, Mr. Marble?

Mr. Marble: No questions.

Mr. Cowan: The Browndel mill already has its plant facility?

Mr. Link: It already has its tram roads.

Mr. Cowan: And this could not be built in as a plant facility?

Mr. Link: Knowing the physical facts up there as I do, I would not consider this a plant facility at all.

Mr. Walter: Are you acquainted with the tram lines and their location to these various mills which you say you thought had advantages over you?

Mr. Link: In a general way I am, yes, sir.
Mr. Walter: What ones have you been over?
Mr. Link: What ones have I been over?
Mr. Walter: What ones have you been over prior to the time in 1907——
Mr. Link: You mean the plants that are receiving divisions?
Mr. Walter: Yes.
Mr. Link: I have not gone over the plants. I know the maps where they run into the woods in a general way, but I have never inspected their plants, because there is no way of getting to
6808 them unless you go out on their engines.
Mr. Walter: I understand you to say you do not know how these plant facilities were located at these various mills that you thought had an advantage.
Mr. Link: I know in a general way.
Mr. Walter: You say you have not seen them?
Mr. Link: I have seen some of them. I have never gone out and ridden over the tram roads going into the woods—I have on some of them.
Mr. Walter: You do not know what were lines having plant facilities and what were lines having main line connections?
Commissioner Harlan: It already appears he does not.

(Witness excused.)

6809 F. H. FARWELL was called as a witness, and having been duly sworn and examined, testified as follows:

Mr. Cowan: State your place of residence and your business and your experience in the business.
Mr. Farwell: Orange, Texas; I am a stockholder and director in the Lutcher-Moore Lumber Company at that point.
Mr. Cowan: How long have you been engaged in the lumber business?
Mr. Farwell: 17 years.
Mr. Cowan: What part do you look after?
Mr. Farwell: At the present time sort of all of it.
Mr. Cowan: Where is the spur owned by the Lutcher-Moore Lumber Company?
Mr. Farwell: In East Texas and West Louisiana.
Mr. Cowan: What is the extent of those spurs?
Mr. Farwell: You mean the acreage?
Mr. Cowan: Anyway you want to state it, yes.
Mr. Farwell: At Calcasieu and Vernon parishes in Louisiana we own about 100,000 acres, and about the same number in East Texas.
Mr. Cowan: Is that situated on or near the Sabine River in both cases?
6810 Mr. Farwell: Yes, sir, practically so, anyway.
Mr. Cowan: How far from Orange?
Mr. Farwell: Well, the lower end of our Louisiana land is approximately eighteen miles, that is the forest, but that of course was

cut over years ago. We are now operating about fifty miles from Orange.

Mr. Cowan: Now, as to the Texas lands, where are they located with respect to Orange?

Mr. Farwell: The lower edge of our Texas timber is in and around the town of Newton, the northern terminus of the Orange & Northwestern Railroad, in around there close by.

Mr. Cowan: That is how far?

Mr. Farwell: About sixty miles.

Mr. Cowan: Where are your mills?

Mr. Farwell: Orange.

Mr. Cowan: How many mills have you?

Mr. Farwell: Two.

Mr. Cowan: What is the aggregate capacity of the mills?

Mr. Farwell: About 350,000 feet daily.

Mr. Cowan: When were they located there?

Mr. Farwell: Lutcher-Moore's first operations in Orange were in 1877, and one of the mills is the outgrowth of that first plant.

6811 Mr. Cowan: Was there any railroad there then?

Mr. Farwell: I don't know. I have heard a great deal about the road from Houston in, but I do not know when it first went in.

Mr. Cowan: How do you get the logs to the mill?

Mr. Farwell: We tram them about 34 miles and dump them into the river at a little point we call Nibletts Bluffs, and then float or tow them from this point to Orange.

Mr. Cowan: What length of tram road do you operate?

Mr. Farrell: About 34 miles main line.

Mr. Cowan: How many miles of the logging spurs?

Mr. Farwell: That varies from five to seven miles, according to where we operate.

Commissioner Harlan: How long is the movement by water?

Mr. Farwell: About 18 miles.

Mr. Cowan: How long has the tram been there?

Mr. Farwell: It was started in 1886.

Mr. Cowan: And was built and extended in length from time to time?

Mr. Farwell: It extends in a northeasterly direction from time to time as we got into our body of timber.

6812 Mr. Cowan: Is your railroad incorporated?

Mr. Farwell: It is not.

Mr. Cowan: How much investment has your company in the railroad?

Mr. Farwell: We are carrying it on the books at the present time at around three hundred thousand dollars. I am not prepared to say what the investment is worth. I have never had it estimated.

Commissioner Harlan: The question is what it cost. Can you tell that?

Mr. Farwell: I cannot, no, sir.

Mr. Cowan: What sort of road is it?

Mr. Farwell: It is a good road. We only have 35 pounds steel

on the main line at the present time, but it has a good dump, and the bridges are very substantial, and the roadbed is a better roadbed than the Kansas City Southern, for it is an older roadbed, and kept up in better shape.

Mr. Cowan: Do you operate it for any other purpose than the sawmill interests?

Mr. Farwell: No, sir, excepting we—oh, we haul for the accommodation of wholesale houses in Orange, groceries and hardware
6813 and stuff like that for its stores at Stark, Louisiana, which is the crossing of the Kansas City Southern, and two or three little stores out in the woods.

Mr. Cowan: Any other sawmills than those at Orange?

Mr. Farwell: No other sawmills except those.

Mr. Cowan: Have you hardwood mills?

Mr. Farwell: Two cypress.

Mr. Cowan: Where?

Mr. Farwell: One at Donner, Louisiana, and one at Lutcher, Louisiana.

Mr. Cowan: Connected with this road?

Mr. Farwell: No, sir, it is over in the other part of Louisiana.

Mr. Cowan: How many trains a day do you run over this main track?

Mr. Farwell: Two.

Mr. Cowan: And one way is loaded and the other empty?

Mr. Farwell: No, two trains of loads go into the Bluff every day.

Mr. Cowan: But the cars have to go back?

Mr. Farwell: Yes, sir.

Mr. Cowan: What sort of locomotives and cars have you?

Mr. Farwell: On our main line we have a brand new Bald-
6814 win 50-ton locomotive, and we have five or six locomotives, but only keep two in the woods' end in use. The others are ready to use as we need them.

Mr. Cowan: Have you any railroad in Orange serving your mills that belongs to your company?

Mr. Farwell: Nothing but a little spur. Of course we own tracks into our mills, and the little spur tracks, perhaps nearly ¾ of a mile long from a certain point just above our upper mill around down to what we call our lower plant; we own that.

Mr. Cowan: Do you own the tracks connected with the main lines from which the lumber moves when it starts to market?

Mr. Farwell: As I say, at the upper mill we own the tracks in our yard, but at this mill the Southern Pacific engine goes in and takes the loads out, and at the lower one the Frisco goes in and takes the loads out.

Mr. Cowan: Do you get any division of rate from the Southern Pacific?

Mr. Farwell: Absolutely none from either.

Mr. Cowan: Your tracks connect with the Orange & Northwestern?

Mr. Farwell: Yes, sir.

Mr. Cowan: Do you get anything for hauling the merchan
6815 dise that you take to Stark?

Mr. Farwell: Oh, yes, we have three tugs, and about ten barges, and we have one little barge and one of the smaller tugs that makes trips two or three times a week as the merchandise is wanted up there, and we charge them about $7 a car or something like that for taking the stuff up and reloading it in our box car, and hauling it on up.

Mr. Cowan: Have you more than one box car?

Mr. Farwell: No.

Mr. Cowan: How are the main line engines equipped?

Mr. Farwell: The main line engine is equipped with air.

Mr. Cowan: Is it economy to operate a good track and good equipment, operating a railroad as you are, for the purpose you are operating it?

Mr. Farwell: Yes, sir, absolutely.

Mr. Cowan: Have you any damages to pay for injury to people or stock?

Mr. Farwell: Yes, sir, we do. There is more thoroughbred stock in that section than I ever thought existed.

Mr. Cowan: You are acquainted with the other plants in the country, sawmill plants and industry tracks?

6816 Mr. Farwell: Not in a specific way. I think I have learned more about railroads in the last couple of hearings at New Orleans and St. Louis than I ever did before.

Mr. Cowan: Do you know any other industry at which any other mill is logged partly by rail to the water, and then floated by water to the mill?

Mr. Farwell: There is one at Lake Charles, I believe; the Lake Charles Railway & Navigation Company, I believe they call it, that operates a railroad, and has a part of the Calcasieu River chartered as a common carrier and connecting with their mill.

Mr. Cowan: What do you mean by part of the Calcasieu River chartered——

Mr. Farwell: Well, I don't know just the point now, but they come down to a landing and the logs float from that landing to their mill. It is a Kelly-Webber mill, and I have been told, I have never been to the plant, but that the charter of the Lake Charles Railway & Navigation Company covers the whole proposition from the back end of their road down to their mill.

Commissioner Harlan: You do not mean they have laid a right of way in the river?

6817 Mr. Farwell: No.

Mr. Cowan: Do they get any division of the rate in that case?

Mr. Farwell: I don't know; I am not familiar with that feature.

Mr. Cowan: With what railroad do they connect at Lake Charles, or do you know?

Mr. Farwell: I do not care to say; the record would show that, and the rates and division sheets. I am not familiar.

Mr. Cowan: Does this sawmill company—I am asking for information now, I do not know as it has any relation——

Mr. Garwood: Can we not get it from somebody who knows?

Mr. Walter: It is in the record here.

Mr. Cowan: Does that sawmill interest have any relation to any of these big interests which have testified, may be it is one of the Long-Bell companies?

Mr. Walter: No, it was fully disclosed by the president of that road.

Commissioner Harlan: The record will show it.

Mr. Cowan: You get no division, you said, from either road?

Mr. Farwell: That is true.

6818 Mr. Cowan: Does any one else get any division?

Mr. Farwell: I do not know anything about the operations of the other mills. They are——

Commissioner Harlan: That is enough, if you do not know.

Mr. Cowan: What is the extent of farming or other business in the localities to which your road extends?

Mr. Farwell: Very little. I might answer that the reason of that is that the theory under which we are operating our forest is to save the little timber, and we have about 75,000 acres of cut-over land that at the present time will log reasonably good logs at four or five thousand feet to the acre, and the policy of our company is to hold that land and log it at some future time. That is why there is no farming in that section. We will not sell the cut-over land.

Mr. Cowan: You have heard the testimony of Mr. Kirby in regard to the method, manner and places of marketing the lumber in the general market. Is that substantially your view about it?

Mr. Farwell: I think so.

Mr. Garwood: Well, your Honor—that is a "me too" proposition.

6819 Commissioner Harlan: We will strike that out.

Mr. Cowan: Then you may state generally at what points in the United States you market your lumber.

Mr. Farwell: In the Northwest, in Texas, and through this portion of the Central Freight Association territory. Then we do quite a substantial business coastwise from Wilmington north.

Mr. Cowan: What is your situation respecting that latter traffic?

Mr. Farwell: The water traffic?

Mr. Cowan: Yes.

Mr. Farwell: We are on the Sabine River about thirty miles from Sabine Pass, and the Sabine River is forty or fifty feet deep, and we have a line of barges and our own tugs, and we load our outbound cargoes on lighters and put them alongside boat at Port Arthur or Sabine Pass; and we have been in that trade substantially for several years.

Mr. Cowan: Why don't you market all your lumber that way?

Mr. Farwell: We would if we could.

Mr. Cowan: You cannot get the sale for it?

Mr. Farwell: There are certain grades of stuff we cannot sell in a foreign market. They demand certain things.

Mr. Cowan: You do not select your trees out of a forest, you just log as you come to it?

Mr. Farwell: Our loggers have instructions as to how small a tree they must cut. When they have reached that minimum size they cut everything above it that is purchasable.

Mr. Cowan: What proportion of that timber in your case makes the lumber which would be exported, or which would go in the export trade?

Mr. Farwell: Our last year's sales show about thirty-three per cent of our product manufactured went by water.

Mr. Cowan: How do you prepare it for that purpose for export? I have heard they fixed it in some different form to what they do cutting into sizes of lumber.

Mr. Farwell: That would be a long story, Judge.

Commissioner Harlan: Then we won't go into it if it is not necessary.

Mr. Cowan: But they do ship very largely square timber.

Mr. Farwell: Yes, you have to cut your timber differently than you do your export stuff and all that sort of thing.

Mr. Cowan: Do you know whether or not in marketing your lumber in various parts of the United States that you are put at a disadvantage with those who get divisions of rates
6821 from your locality?

Mr. Farwell: Well, that is a much mooted question.

Commissioner Harlan: Is it a mooted question in your own mind?

Mr. Farwell: My theory of that is this: It is the man that makes the price that gets the business, and my opinion is that the man that has a chance at an advantage in some other way can, if he wants to, make the lowest price, which we all have to meet if we want to sell lumber.

Mr. Cowan: And it does not matter in what way he has that advantage?

Mr. Farwell: No.

Mr. Cowan: Then you have an advantage on the water transportation?

Mr. Farwell: Yes, sir.

Mr. Cowan: That is an advantage that arises by reason of your situation?

Mr. Farwell: Yes.

Mr. Cowan: Does your company operate on borrowed capital?

Mr. Farwell: No.

Mr. Cowan: Then you might have an advantage over somebody who might have to borrow to operate?

6822 Mr. Farwell: Oh, yes; if you want to look at it in that light. We have this timber land. Mr. Lutcher bought it years and years ago, when, in fact, a man who owned an acre of yellow pine lumber was looked upon with suspicion, because the more he owned, the poorer he was supposed to be.

Mr. Cowan: Now he is suspected of getting rebates.

(No reply.)

Mr. Cowan: Now, Mr. Farwell, is it or not your opinion that

transportation charges should be so made as to take care of the advantages and disadvantages which might arise by reason of location, situation, capital and the like?

Mr. Farwell: Yes, sir.

Mr. Cowan: Make transportation charges to equalize that?

Mr. Farwell: Why, I don't catch exactly your question.

Mr. Cowan: Well, you do not mean that the freight rate ought to take care of the differences in advantages between you and any other one?

Commissioner Harlan: I do not think we will go into that.

Mr. Cowan: I will withdraw that. I know that as well as anybody, and I don't suppose anybody ever attempted to do it. You have given what you carry your road at, and you said you could not give the cost, but can you state, did that cost cover the
6823 equipment?

Mr. Farwell: I said around $300,000 is what we are carrying our road and equipment at. It is a very nominal figure.

Mr. Cowan: What do you think it would be worth to construct it, estimated on what it actually costs you now to extend your main line from time to time?

Mr. Farwell: If you mean calculating the equipment, I should say it would be worth around $8,000 to $10,000 a mile, something in that neighborhood.

Mr. Cowan: I think there are no other questions, unless there is something you want to state.

Mr. Farwell: I do not know. The ground has been pretty well covered.

Mr. Coleman: I would like to ask, prior to the time that the Orange & Northwestern connected up with the Santa Fe, you then had but one road out, I understand?

Mr. Farwell: Yes.

Mr. Coleman: And that was the Southern Pacific connection, or the Houston & Texas Central?

Mr. Farwell: The T. & N. O.

Mr. Coleman: Prior to the time the connection was made, what was the car situation at Orange?

6824 Mr. Farwell: Well, that was one reason why the mills and people at Orange built the Orange & Northwestern, was to get relief from the car situation. Orange in a way was sort of a whistling station on the Southern Pacific, so far as empties were concerned.

Mr. Coleman: In other words, they would not furnish you with sufficient cars?

Mr. Farwell: We were a one-line point.

Mr. Coleman: That is all.

Cross-examination:

Mr. Garwood (handing paper): Will you kindly indicate to me there, there is Orange and there is Sabine, and just run a line there and show me how you get in there.

Mr. Farwell: Just about like that (indicating). I have a map here which I will give you, which will show it.

Mr. Garwood: If you will.

(Witness explains map to Mr. Garwood.)

Mr. Garwood: I understand you transport your logs over your tram line by cars and locomotives down to Nibletts Bluff and there put them in the river and *two* them down to your mill at Orange.

Mr. Farwell: Yes.

6825 Mr. Garwood: Now, is the cost of your barge line also figured into the cost of your transportation facilities which you gave to counsel?

Mr. Farwell: No, that is carried in what we call our river account?

Mr. Garwood: You do charge for the transportation services on your barge line, as I understand?

Mr. Farwell: Yes, if any stores up there want anything, we charge them so much for this barge load, which is substantially a good big carload of material.

Commissioner Harlan: Do you make any charge on the rail line?

Mr. Garwood: We will charge for a full load say $10 and credit the barge line with half and the railroad with half.

Commissioner Harlan: You are referring now to outside tonnage?

Mr. Farwell: I am referring now to outside tonnage of the wholesale grocery house or hardware or foundry.

Commissioner Harlan: Are you referring to your own logs, do you make any charge against your mill?

Mr. Farwell: Yes, sir, we charge $1.50 a thousand to the milling company for the handling of these logs from the back end

6826 of the spurs down to where they are dumped into the river.

Mr. Garwood: So you keep separate accounts, then, for your railroad and for your mill?

Mr. Farwell: Oh, absolutely; yes, sir. The saw milling interests or our incorporation papers do not take into account the timber end of it at all. The Lutcher-Moore Mill Company has an incorporation and owns the mill.

Mr. Garwood: And you have another corporation?

Mr. Farwell: Simply a partnership that owns the railroad and timber land.

Commissioner Harlan: It is practically the same investment?

Mr. Farwell: Yes, sir.

Commissioner Harlan: That is also true of the water line?

Mr. Farwell: Yes, sir.

Mr. Garwood: The same parties own the stock of the corporation which owns the mill?

Mr. Farwell: Yes, sir; absolutely.

Mr. Garwood: And the same parties as partners own the railroad and the barge line?

Mr. Farwell: That is true.

6827 Commissioner Harlan: And the timber?

Mr. Farwell: That is true.

Mr. Garwood: Now, you operate the transportation line in so far as the barges are concerned?

Mr. Farwell: Oh, yes, you might call it so.

Mr. Garwood: Can anybody who wants to ship up there?

Mr. Farwell: Yes, sir, we take anything that is offered.

Mr. Garwood: Then you are a common carrier as to that?

Mr. Farwell: Well, in a way, yes.

Mr. Garwood: You are a common carrier and you charge for your services?

Mr. Farwell: Yes.

Mr. Garwood: Well, now suppose one of these Orange merchants wanted to ship over some point on your logging road, would you do that service for him too?

Mr. Farwell: As I explained to you, there is a store at Stark, Louisiana, two of them. There is a store or two in here somewhere, and at this point here and there, and we are not interested in those stores at all, but whatever goes up there for them, we haul for them.

Mr. Garwood: What is your charge for your service from
6828 Orange up to the stores on your line?

Mr. Farwell: I just stated we charge them—we have no regular rates, but for this carload we will say we charge them $10, covering the barge and the rail line.

Mr. Garwood: How do you enter that on your books?

Commissioner Harlan: He has stated he set it half to the rail line and half to the water line.

Mr. Garwood: You then carry separate accounts for the barge line and for the rail line?

Commissioner Harlan: He so stated, and for the lumber company, all separate.

Mr. Garwood: Do you file tariffs covering these shipments?

Mr. Farwell: We do not.

Mr. Garwood: That is an interstate proposition, is it not; you start at Orange and go up a navigable river, and you are under the same control and you transport over into Louisiana. You say you transport for anybody that asks you and you charge for it. Are you not in a better fix than the man who has got to publish his tariff——

Mr. Coleman: Wait a minute. If your Honor please, I think that if there is any limit, it has been reached in that question.
6829 Mr. Garwood is trying to make the witness say that at law what he does makes him a common carrier. It does not at all. He is in precisely the same position as a man that has a team——

Commissioner Harlan: You are trying to make out that he is not?

Mr. Coleman: No, but what good will it do to get the opinion of the witness on it?

Commissioner Harlan: I think your objection is well taken. The whole field is open to Judge Garwood to argue on the statement made by the witness.

Mr. Garwood: I do not want to argue the facts or the law with the witness.

Commissioner Harlan: Let us get to some other field.

Mr. Garwood: I do get the fact that he is hauling for the public and makes a charge——

Mr. Coleman: He has not stated that.

Mr. Cowan: He said he carried what they offered him; some merchants down there.

Mr. Garwood: I will not stop to dispute that with counsel.

Commissioner Harlan: Take up some other line, then, Judge Garwood.

6830 Mr. Garwood: What is this town here (indicating). You deliver here at Nibletts Bluff?

Mr. Farwell: Yes. Like everybody, we have hopes, and at our last directors' meeting we decided to put surveyors into the field and survey that line. We have come to the conclusion that logging on the river is too expensive and we are going to quit it.

Mr. Garwood: What proportion of your business is export?

Mr. Farwell: I stated about 33 1/3 per cent of our business.

Mr. Garwood: Do you ship to New Mexico?

Mr. Farwell: Very little.

Mr. Garwood: Do you ship to Kansas and Oklahoma?

Mr. Farwell: Yes.

Mr. Garwood: Have you prepared a statement showing by states the number of thousand feet or number of cars that you shipped out during the past year?

Mr. Farwell: Yes.

Mr. Garwood: Have you that here?

Mr. Farwell: Yes.

Mr. Garwood: Will you let me see it, please?

(Witness produces paper.)

6831 Mr. Farwell: That simply shows the cars per month and the road over which they went, and it shows the total number of cars, but does not show the total cars by states. I have no reason why it does not, except that I only fixed up these statements the afternoon I left for St. Louis and have not had a chance to look at them.

Mr. Garwood: Without pausing to go into what the statement shows, will you put that in evidence as part of your cross examination?

Mr. Farwell: Yes.

Commissioner Harlan: I would like to have the map go in too, if you will.

(The map so offered and identified was received in evidence and thereupon marked Exhibit No. 1, witness Farwell, received in evidence January 31, 1911, and is attached hereto.)

(The statement so offered and identified was received in evidence and thereupon marked Exhibit No. 2, witness Farwell, received in evidence January 31, 1911, and is attached hereto.)

Mr. Garwood: You have been asked in this case to prepare a statement showing your cost of production and also your average selling price, both for all grades of lumber and for specific grades. Were those statements prepared?

6832 Mr. Andrews: Just a moment. If the Commission please, we deem it immaterial whether they were prepared or not, as the Commission has uniformly ruled they would not be admitted, and we will make the same objection.

Mr. Garwood: I make it for the purposes of the record.

Commissioner Harlan: And the objection is sustained.

Mr. Garwood: And I ask him if they were prepared.

Commissioner Harlan: That question may be answered, whether they were prepared.

Mr. Garwood: Were they prepared?

Mr. Farwell: They were.

Mr. Garwood: Have you got them here?

Mr. Farwell: Yes, sir, I have them with me.

Mr. Garwood: I now ask that they be produced.

Mr. Andrews: We make the same objection.

Commissioner Harlan: The objection is sustained.

Mr. Garwood: To which we except. Now, for the purpose of the record, I ask the witness, and of course you need not answer until after objection has been made, what was your average selling price for all grades of lumber, and separately for each grade during the past calendar year, and also what was your average production cost?

6833 Mr. Andrews: Same objection.

Commissioner Harlan: The objection is sustained.

Mr. Garwood: By selling price I mean as before, at the mill and with the freight rate excluded.

Commissioner Harlan: The objection to the modified question is sustained.

Mr. Garwood: Exception is taken. Now, for the purpose of the record, without bringing Mr. Link back, will you consider that the same question has been asked him for the Miller-Link Company?

Mr. Andrews: We will consider they have been asked, but as a matter of fact, Mr. Link has not any papers here about it. You can consider that the questions have been asked him.

Commissioner Harlan: The objection and ruling go to those same questions.

Mr. Cowan: Let it be understood that you have made that request of all these different industries, and that the right to it has been denied by the ruling of the Commission.

Mr. Garwood: Yes.

Commissioner Harlan: Therefore the questions need not be again put. It will be understood that that exception is saved to all the witnesses who may hereafter testify.

6834 Mr. Garwood: And in that same connection we make the offer that we stated yesterday to produce from the interest mentioned the same figures we would call upon the intervenors to introduce on this subject.

Mr. Andrews: The Commission understands that we have no objection to their offering that testimony if they wish to.

Mr. Cowan: But he offered it yesterday on the condition that we were required to furnish it, and we declined to comply with the condition, but there is no objection to their putting it in if they want to.

Mr. Garwood: Of course it is not material, if the other is not put in.

Commissioner Harlan: Your offer yesterday, then, was to prove by other sources the general cost, not the particular cost?

Mr. Garwood: Not his cost, no, but our own cost for each particular one.

Commissioner Harlan: In a general way?

Mr. Garwood. Yes, but giving definite figures for definite interests.

Mr. Andrews: Yesterday the offer was made specifically that for a substantial number, that was the term, if I recall it.

6835 Mr. Garwood: Yes.

Mr. Andrews: For a substantial number of those receiving divisions, the specific prices would be put in, about which he was asking the intervenors?

Mr. Garwood: Yes.

Mr. Andrews: We understood that was offered only upon the condition that the intervenors should be first examined upon the proposition and disclose their testimony, and the point that I rose to make a moment ago is that we still wish to be understood as not objecting to their offering their testimony, if they want to do it.

Commissioner Harlan: As a part of their case, and as a part of the condition referred to yesterday?

Mr. Andrews: Yes.

Commissioner Harlan: I think the record is clear on that point.

Mr. Cowan: I would like to make the suggestion by saying that they can prove the selling prices at places where they do not get divisions, or where they get one, two, three, four and five cents, and if the object of the evidence which they ask us to put in is to show what effect divisions have on the average price at the places where they sell the lumber or at the mill where they make it, they

6836 have got within their own power to show what it is in cases where they get divisions and do not, and in cases where they get little divisions and big divisions. I make that suggestion so that it may come into the record at this time.

Mr. Garwood: Thank you, sir.

Commissioner: Are there any further questions.

Mr. Garwood: I have no further questions.

Mr. Coleman: On this general subject of saving exceptions and making offers, counsel for the tap lines seem to be preparing a record. Now, I think perhaps it should appear just why the offers are refused and why the Commission refuses to make the private interests produce their private records or in other words, put it on certain grounds.

Commissioner Harlan: Well, the view of the Commission, so far

as I spoke for the Commission in ruling on these questions was that the injury was irrelevant to the issue now before us.

Mr. Coleman: And that applies to every offer?

6837 Commissioner Harlan: So far as I now recall them. There were some other offers on other questions.

Mr. Cowan: And the objection being sustained, that covers the entire range of the subject. If it should be excluded for any subject, it would be proper to exclude it.

Commissioner Harlan: I think it is now clear.

Mr. Walter: What is the extent of the production of your mills?

Mr. Farwell: About 60 million feet annually.

Mr. Walter: You spoke of several concerns up on your line of railroad. They furnish supplies for the men engaged in work there in your timber operations?

Mr. Farwell: Only one of them does. The balance of them are little country stores.

Mr. Walter: Then there is a farming community in there?

Mr. Farwell: Oh, more or less; it does not amount to much.

Mr. Walter: I do not know whether or not I have got the correct impression, but I understand you were discriminated against by reason of divisions given to connecting lumber interests; is that it?

Mr. Farwell: I do not know that I stated it in just those words. I believe I remarked that our experience in the sale of lum-

6838 ber was that the man who could make the lowest price usually got the business, and——

Mr. Walter: That is only one small element in making the price, the freight rate or the division of the freight rate.

Mr. Farwell: The freight rate shows the delivering end of the matter and is an important factor in the sale of the lumber.

Mr. Walter: You receive some revenue for that haul of that material?

Mr. Farwell: Yes, sir.

Mr. Walter: Do you take that into consideration in figuring the cost of your lumber?

Mr. Farwell: We do not. The——

Mr. Walter: You also go into the lumber market in competition with some of the intervenors in this case, do you not?

Mr. Farwell: I think we all find each other there.

Mr. Walter: Do you find the competition any keener and stronger between the intervenors in this case and yourself and the so-called tap line interests and yourself?

Mr. Farwell: I could not distinguish; neither could any other manufacturer distinguish one competitor from another in the open market.

Commissioner Harlan: If you received a division and he

6839 did not, could you draw a distinction then?

Mr. Farwell: I believe I remarked a little while ago——

Commissioner Harlan: I am talking now about your competitors in the country that are supposed not to get any allowances, and operating under the same general conditions and running their mills under the same general conditions. Now, if you were getting

an allowance and he did not know it, you could then enter the market in a way that would make a distinction in your mind, could you not?

Mr. Farwell: That is my opinion. If I had a division on our road or on our log haul, and if I wanted to—this is my idea about it—if I wanted to and the business was such that I wanted it, it would be immaterial whether I simply cut my price or simply threw away all or a portion of that division, so long as I maintained my mill value.

Mr. Walter: Then whether or not that division is taken into account, is to be determined by the figuring as to the sale price?

Mr. Farwell: As to the sale price.

Mr. Walter: And the only way to tell is to know the sale price?

Mr. Farwell: I suppose so.

6840 Mr. Walter: Were you connected with the Orange & Northwestern?

Mr. Farwell: Personally, no.

Mr. Walter: Did you have any relation to it?

Mr. Farwell: None whatever, excepting Mr. Link told about all the story of the company's relation to it.

Mr. Walter: Were you an officer?

Mr. Farwell: No.

Mr. Walter: Were you an officer in any railroad?

Mr. Farwell: None.

Mr. Walter: Any connection with any railroad now?

Mr. Farwell: None whatever, except I say I am really tentatively the manager of our tram road.

Mr. Walter: Were your superiors connected with the Orange & Northwestern?

Mr. Farwell: They were.

Mr. Walter: And at the time the operation went along, the Lutcher-Moore mill, you were then connected with the Lutcher-Moore mill?

Mr. Farwell: Yes, sir.

Mr. Walter: At that time was the railroad getting a division of the freight rates?

6841 Mr. Farwell: I presume so.

Mr. Walter: And the interests that were interested in the railroad were interested in the lumber mill?

Mr. Farrell: Now, don't get that confused as to the Lutcher-Moore railroad. It was built by the Orange interests for relief to get an outlet on another line of railroad, and we built some thirty-two miles northwest to Buna.

Mr. Walter: "We;" who?

Mr. Farwell: I say "we," the Orange interests, Mr. L. Miller, who was president of the Orange & Northwestern Railroad was at this time operating a store and I think a shingle mill. Mr. Alexander Gilmer was operating a saw mill in Orange at that time. We were operating one, and there was a rice mill and a foundry, and I know in particular a bank, all of which joined their interests together and

built this road, with this understanding, that it was to be operated as a railroad.

Mr. Walter: Common carrier?

Mr. Farwell: Yes, sir. Then later, in 1901, when the Lutcher interests purchased the Moore interests in our end of the company, Mr. Moore was the practical—he owned a majority of the stock of the Orange & Northwestern individually.

6842 Mr. Walter: That road then was constructed by shippers?

Mr. Farwell: By shippers.

Mr. Walter: Operated as a separate corporation?

Mr. Farwell: Yes, sir, absolutely.

Mr. Walter: Received divisions of the rate?

Mr. Farwell: I suppose they did.

Mr. Walter: Did those shippers receive any part of that freight rate?

Mr. Farwell: They never did.

Commissioner Harlan: Was the banker a shipper?

Mr. Farwell: No, but he was simply interested in the building of this road for an outlet to help the town out. It was a town road; it was not an individual road.

Mr. Walter: The great tonnage was lumber, was it not?

Mr. Farwell: Yes, sir.

Mr. Walter: Do you receive any logs over that road?

Mr. Farwell: No. Mr. Link testified, and I think substantially correct, when we purchased what we now call our lower mill in 1901 or 1900, we at that time had a contractor in our forest, and in order to just simply keep on operating that mill and not shut it

6843 down until we could get equipment, we sent our contractor over on the Orange & Northwestern, where we could buy some timber right alongside the railroad quick, and he logged that to our mill and kept it going until we could buy additional equipment and get into our own forest; that is all.

Mr. Walter: The Orange & Northwestern in furnishing those logs to your mill was just as essential to their milling and manufacturing as is your present tram line in Louisiana to your milling operations?

Mr. Farwell: Why, yes, and no. It was, because we used it. We could just as well, if we had wanted to, have bought or borrowed logs right there in the boom in Orange and continued our operation. We were not compelled to go onto that line of railroad to get those logs.

Mr. Walter: But as a matter of fact the railroad did furnish you the facility for getting those logs to the mill?

Mr. Farwell: Oh, yes.

Mr. Walter: And still furnishes the Miller-Link logs?

Mr. Farwell: Yes, they haul them over that road.

Mr. Walter: Would you say, speaking as a man who has had great experience in this matter, that these facilities afforded by the Orange & Northwestern in hauling those logs to that mill,

6844 were any more or any less a plant facility on that business than is your own railroad in hauling the logs over your present operation?

Mr. Andrews: It seems to me that is the very point for the Commission to determine from the physical facts.

Commissioner Harlan: We will take less time, perhaps, if the witness will answer, if he has any opinion.

Mr. Farwell: I would not care to say.

Commissioner Harlan: That is enough.

Mr. Walter: Why would you not care to say?

Mr. Farwell: It goes into matters I am not very familiar with——

Commissioner Harlan: That is enough. You have given a sufficient reason.

Mr. Walter: As a matter of fact, you are in charge of the part of the Lutcher-Moore interests that get the logs to the mill, are you not?

Mr. Farwell: I look after it from the log end until make our collections; yes, sir.

Mr. Walter: Let me ask if there is anybody better equipped to determine that question than Mr. Farwell.

Mr. Farwell: I started to say——

6845 Commissioner Harlan: Never mind. You need not answer that question.

Mr. Walter: You are an intervenor in this case?

Mr. Farwell: Our company is.

Mr. Walter: We want to point out that we think this is a most material question.

Commissioner Harlan: I suppose the questions mean that, but I have ruled them out.

Mr. Walter: We save an exception. Why did you not incorporate that line of road?

Mr. Farwell: Well, our attorneys advised us not to.

Mr. Walter: For what reasons?

Mr. Farwell: Well, I cannot tell you their reasons. They were the legal end of it. The prime reason was, it was their opinion, or so I understood at least, that it would be in a measure considered as a rebate, and we had better not do it.

Mr. Walter: Is that the reason?

Mr. Farwell: That is absolutely the reason.

Mr. Walter: Why was the Orange & Northwestern incorporated?

Mr. Farwell: I haven't any idea. As I explained a while ago, it was a town road and went out to connect with other trunk

6846 lines for the purpose of giving the town relief on outbonud movements of lumber or anything.

Mr. Walter: Do you understand there are tariffs in effect which allow a refund on logs hauled to your mill on the Orange & Northwestern?

Mr. Farwell: You mean the Lutcher-Moore?

Mr. Walter: Logs hauled down there, brought in by the Orange & Northwestern?

Mr. Farwell: I think there was.

Mr. Walter: And is now?

Mr. Farwell: I am not interested in it, and do not know. We haul no logs over that line.

Mr. Walter: You said the Orange & Northwestern hauled the logs for you that you bought up on that line.

Mr. Farwell: I said for a few months back we sent our contractor in there and got logs out on that. Just offhand, I would say that that refund was not in there at that time, but I would not care to say positively. But I know we got nothing.

Mr. Walter: That is, the lumber mill got nothing?

Mr. Farwell: The lumber mill got nothing.

Mr. Walter: You understand in all these cases that the
6847 railroad itself is the party and not the shipper, to the tariffs.

Mr. Farwell: I understand, but I would like to have you understand that the Lutcher-Moore Company, with whom I am connected, were not the controlling factor in the railroad.

Commissioner Harlan: Are you through with the witness?

Mr. Walter: Yes.

Mr. Marble: What is the name of this road which extends from the river into the forest?

Mr. Farwell: The Gulf, Sabine & Red River Railroad.

Mr. Marble: Are you on your way to Alexandria with that road?

Mr. Farwell: Mr. Fleishel has told you so, and I should like to say——

Mr. Marble: If you will pardon me one minute, I will say for the Commissioner, this matter came out at a hearing at which he was not present, that the Gulf & Sabine River Railroad has put in evidence of its lines, which shows lines constructed and intermediate connections to be constructed, which indicate that that line is to run from Orange to Alexandria, and the examination developed that the tracks of this witness' company were shown on that map
6848 as connected lines, and the explanation was made that they expected to connect up this road and make it reach from Orange to Alexandria. What about that plan?

Mr. Farwell: I can make a little explanation which may clear that up. Ever since I have been with Lutcher-Moore I have had drummed into me the fact that that road was going to Alexandria. It travels in a northeasterly direction, and we own a large body of timber in Vernon Parish immediately above and this road will ultimately serve the mills through this forest in Vernon Parish of some 70,000 acres, and in going there, we will cross the Santa Fe Railroad, and Mr. Fleishel, of the Gulf & Sabine, has spoken to us once or twice regarding the connecting up of his property and ours for the purpose of getting better facilities, and by that the town of Orange would get a substantial return, because we have hopes of his making Orange the southern terminus for his export movements, and it would not be such a bad proposition.

Mr. Marble: Is it a live proposition now or simply——

Mr. Farwell: Oh, no; we have just talked it over; there has nothing been done about the matter.

Mr. Walter: You have had it up in your directors' meet-
6849 ings, I suppose?

Mr. Farwell: Not that part of it. We did the building of

the southern and for about twelve miles, because the logging by the river we think is getting too expensive to operate.

Mr. Walter: You say your directors have not ordered the connecting up with the other road?

Mr. Farwell: No; there is nothing definite. We just have hopes.

Mr. Walter: It was discussed in an official manner, was it not, at your directors' and stockholders' meetings?

Mr. Farwell: This northern end may have been discussed, but we were more interested in the southern end, on account of the expense of logging by the river.

Mr. Walter: You would expect to get a division if you got that in?

Mr. Coleman: Oh, I object.

Mr. Farwell: Well, that is in the future.

(Witness excused.)

Whereupon, at 12:45 P. M., a recess was taken to 2:00 P. M.

6850 After Recess.

2:00 P. M.

Before John S. Burchmore, Special Examiner.

Examiner Burchmore: In the last question which was asked Mr. Farwell I do not know that I understood his answer, and I will ask the stenographer to read it.

(The question and answer were read as follows:)

"Mr. Walter: You would expect to get a division if you got that in?

"Mr. Farwell: Well, that is in the future."

Examiner Burchmore: Do you remember the question you were asked, if you would expect to get the division, and you said that was in the future?

Mr. Farwell: I don't quite catch the drift of it.

Mr. Andrews: To refresh your memory, they were asking you about building your road and connecting up with Mr. Fleishel's road, and he said if this was done, did you expect a division.

Mr. Farwell: You want an interpretation of that?

Examiner Burchmore: You said that was a thing for the future. Is it settled or agreed?

6851 Mr. Farwell: In no way, shape or form. Just to be frank with you, at our directors' meeting when the extension of the line from our present southern terminus to Orange was taken into consideration we decided to get estimates on what it would cost to build it, and the whole matter would hinge entirely upon what the decision of the Interstate Commerce Commission was on this subject of tap line divisions.

Mr. Cowan: If they say it is lawful and you are entitled to it, you want to go after it?

Mr. Farwell: Absolutely.

Mr. Cowan: And there are no strings upon you in getting it?

Mr. Farwell: Nothing in the world.

Mr. Walter: In other words, if the Commission does not interfere, you propose to develop that country?

Mr. Farwell: Yes, sir.

Mr. Cowan: No, no, wait a minute. You did not watch that gentleman.

Mr. Farwell: What was the question?

Mr. Cowan: Read the question and answer.

(The question and answer were then read.)

Mr. Walter: Now, you would not change that answer
6852 would you?

Mr. Farwell: I could expand on it, if you would like.

Mr. Cowan: What do you mean by developing the country, if the Commission does not interfere?

Mr. Farwell: That word "interfere" perhaps should not be in the question.

Mr. Cowan: Well, of course not.

Mr. Farwell: But if they are going to legalize tap line divisions, we expect to extend our road and get what we are entitled to.

Mr. Cowan: And all you can?

Mr. Farwell: Certainly.

Mr. Walter: You do not want anything you are not entitled to?

Mr. Farwell: No, sir, not a thing in the world.

Examiner Burchmore: Call your next witness.

6853 H. S. FILSON was called as a witness, and having been duly sworn, testified as follows:

Mr. Cowan: Where do you live?

Mr. Filson: My home is in Houston, Texas.

Mr. Cowan: What business are you engaged in?

Mr. Filson: In the manufacture of lumber.

Mr. Cowan: And what is the name of the company which you are interested with and represent?

Mr. Filson: The Alexander Gilmer Lumber Company.

Mr. Cowan: How long has that company been engaged in the manufacture of lumber?

Mr. Filson: Since 1905.

Mr. Cowan: Where are the plants of the company now located which are in operation?

Mr. Filson: The office and principal plant is maintained at Remlig, Jasper County, and the other mill is at Jasper, Jasper County, Texas.

Mr. Cowan: Have you a map of the plant, or any sketch of the situation on your tracks?

Mr. Filson: No, I have not with me.

Mr. Cowan: On what railroad; that is, what trunk line, are you located?

6854 Mr. Filson: The Center branch of the Santa Fe.

Mr. Cowan: That is not on the main line of the Santa Fe?

Mr. Filson: No, sir; I do not think they consider it a main line. It is a branch running from Beaumont north.

Mr. Cowan: That branch of the Santa Fe runs from where to where?

Mr. Filson: It runs from Beaumont north now, I believe to Long View.

Mr. Cowan: Where is your mill situated and each of your mills, with respect to the Santa Fe tracks?

Mr. Filson: Our Jasper mill is on the edge of the town of Jasper and about three-quarters of a mile west of the Santa Fe track. Our Remlig mill is seventeen miles north and about two miles east of the Santa Fe track.

Mr. Cowan: You have timber in both localities?

Mr. Filson: What is the extent of your timber holdings?

Mr. Filson: We have uncut something like 40 or 45,000 acres.

Mr. Cowan: Yellow pine?

Mr. Filson: Yes, sir.

Mr. Cowan: Taking up each of your mills, describe how they are situated with respect to the Santa Fe Railroad, and how they
6855 are operated with respect to the railroad operations as mill facilities.

Mr. Filson: I don't know as I know just what you want to get at.

(Question read.)

Mr. Cowan: I mean your own railroad operation.

Mr. Filson: We are connected with the Santa Fe at each mill by a spur track. As I stated, we are not on the Santa Fe rails.

Mr. Cowan: How far are each of your mills from the Santa Fe?

Mr. Filson: The Remlig mill is about two miles east of the Santa Fe, and the Jasper mill about three-quarters of a mile west of the Santa Fe.

Mr. Cowan: You reach the Santa Fe in what way?

Mr. Filson: We have a track from each mill to the Santa Fe, over which we get our empties at the Santa Fe stations and deliver our loads to them at the stations.

Mr. Cowan: Take your north mill; what one do you call that?

Mr. Filson: Remlig.

Mr. Cowan: How many miles of railroad have you in con-
6856 nection with your plant, from your plant to the Santa Fe and out to the timber?

Mr. Filson: We have these two miles from the Santa Fe to the mill, and then our logging operations in an opposite direction, and we had there a year ago fifteen miles, including spurs, and we have since added possibly two miles during the year.

Mr. Cowan: Is that railroad necessary to the operation of the mill?

Mr. Filson: Yes, sir, it is.

Mr. Cowan: What sort of road is it?

Mr. Filson: It is a standard gauge, of which ten miles that we call our main line is pretty good railroad. We have got about four miles of it in heavy steel and the balance in new 35 pound, which we are replacing as fast as we can with heavy steel, taking up the light rail and putting heavy in place.

Mr. Cowan: What is the weight of the heavier rail you are putting in?

Mr. Filson: 65 pounds.

Mr. Cowan: Is the heavy rail and the good construction a matter of economy in the operation of the mill and logging
6857 business?

Mr. Filson: I think it pays to build a good track for main lines where it is permanent, for the life of the timber.

Mr. Cowan: What sort of locomotives have you?

Mr. Filson: Our main line engine is a rod engine, built by Baldwin & Company, and weighs about 45 tons. Then we have three Shay engines which do the switching.

Mr. Cowan: What is a Shay engine? It has been mentioned several times.

Mr. Filson: A Shay engine is a geared engine and has three engines on the right hand side——

Mr. Cowan: Three cylinders, you mean?

Mr. Filson: Three engines on the right hand side; three vertical engines; and it is intended for heavy work, heavy grades, sharp curves, and things of that kind.

Mr. Cowan: Geared in the sense that the stroke of the piston turns some——

Mr. Filson: Turns a shaft, which is geared to the drivers.

Mr. Cowan: And that is geared so the power is applied to a slow movement?

Mr. Filson: Yes, sir.

6858 Mr. Cowan: Whereas, in the case of the rod, every two strokes of the piston turns the drivers around?

Mr. Filson: Yes, the drivers, like they ordinarily use on a railroad.

Mr. Cowan: What sort of equipment have you in use on your railroad?

Mr. Filson: At Remlig we have 35 log cars, I believe, and we have two flat cars and two cabooses.

Mr. Cowan: Do you carry anything else except your logs and your lumber?

Mr. Filson: Yes, sir; we do. We have a turpentine camp out at the end of the track, or near the end of it, and we haul their supplies to them and bring out their product to the Santa Fe at Brookland, which is our shipping point on the Santa Fe. Besides that we have hauled out for other parties considerable hard wood and some staves, loaded on our tram line.

Mr. Cowan: Then does this turpentine business have any relation to your company?

Mr. Filson: No.

Mr. Cowan: Do the producers of staves and hard wood have anything to do with your company?

6859 Mr. Filson: No.

Mr. Cowan: Do they get their timber from you?

Mr. Filson: No.

Mr. Cowan: Any farmers in the country there?

Mr. Filson: There are some farmers; yes, sir.

Mr. Cowan: Do you haul anything for them?

Mr. Filson: Well, yes; most of the farmers out there do their trading at our company store, and we haul stuff out to them, principally stuff that we sell them ourselves through our store.

Mr. Cowan: Do you haul anything to them that you do not sell at your store?

Mr. Filson: Well, if it is anything at all, it does not amount to much.

Mr. Cowan: You would do it, though, if they wanted you to, as a matter of accommodation?

Mr. Filson: Yes, sir.

Mr. Cowan: What quantity of stuff do you haul other than your logs and lumber product?

Mr. Filson: Well, I do not know; I have not got figures with me It would not amount to probably more than five or six cars a month.

6860 Mr. Cowan: Including both turpentine and staves?

Mr. Filson: Probably 100 cars a year would cover it.

Mr. Cowan: Do you have an arrangement whereby these people pay you for that?

Mr. Filson: We charge the turpentine people for hauling that stuff; yes, sir; and charge the people for hauling hard wood and staves.

Mr. Cowan: How far is the turpentine camp from the Santa Fe station?

Mr. Filson: About twelve miles.

Mr. Cowan: You haul your lumber from the mill to the Santa Fe station?

Mr. Filson: Yes, sir.

Mr. Cowan: Did you have any arrangement with the Santa Fe at any time for a switching allowance there?

Mr. Filson: Yes, sir; at one time they promised to pay us a switching charge on interstate business that remained on the Santa Fe rails.

Mr. Cowan: Going to Santa Fe stations?

Mr. Filson: Going to Santa Fe stations.

Mr. Cowan: As final destination?

Mr. Filson: Yes, sir.

6861 Mr. Cowan: How long was that in force?

Mr. Filson: Well, they only paid us for one month.

Mr. Walter: What month was that?

Mr. Filson: I think it was the first month we operated, probably January or February, 1906. We did not start up until 1906.

Mr. Cowan: February, 1906, you think?

Mr. Filson: Yes, sir.

Mr. Cowan: Who owns the rails from the Santa Fe Road to the mill?

Mr. Filson: They are rails we secured from the Santa Fe Company.

Mr. Cowan: Leased them?

Mr. Filson: Yes, sir.

Mr. Cowan: But that without rental?

Mr. Filson: The rails between the mill and Brookland we are not paying any rental for. We have other rails from them, however, that we are paying rental under their regular contracts.

Mr. Cowan: How is the engine equipped; with air brakes?

Mr. Filson: Our main line engine is equipped with air, yes, sir.

6862 Mr. Cowan: Do you do that because there is any law requiring you to, or as a matter of proper protection in operation?

Mr. Filson: The delivering of lumber to Brookland from our mill?

Mr. Cowan: No; do you get an engine with air brakes because any law requires you to do it?

Mr. Filson: I do not think there is any law requiring us to equip our engine with air.

Mr. Cowan: You simply prefer that?

Mr. Filson: Yes, sir; for that purpose.

Mr. Cowan: Do you carry any passengers over there?

Mr. Filson: Not for hire.

Mr. Cowan: Do you carry people who want to go back and forth?

Mr. Filson: Yes, sir, we do give them permission to ride on our trains.

Mr. Cowan: Do you have any liability for injuries and the like and running over stock?

Mr. Filson: Yes, sir, we have paid for stock, and we paid for a dog also.

Mr. Cowan: Do you not charge anything for men?

Mr. Filson: We do not charge anything for carrying them.

6863 Mr. Cowan: I say the men do not charge anything if you hurt them?

Mr. Filson: We have not hurt anybody by our railroad, that I remember.

Mr. Cowan: Going over to Jasper mill, you might take a piece of paper and show the Examiner about how your mill and terminus track and railroad are located and leave it with the Examiner.

Mr. Filson: I can do it roughly.

Mr. Cowan: That will be sufficient.

Mr. Filson: The Santa Fe runs north and south approximately. Brookland is about ninety miles north of Beaumont——

Mr. Cowan: Do not make the sketch too large.

Mr. Filson: You want to show the logging operations east of the mill?

Mr. Cowan: Yes.

Mr. Filson: Brookland would be about here, and our logging operations are about here (indicating). The turpentine camp is about here, and Jasper is seventeen miles south of here, and there the town of Jasper is located on this side of the track, and our mill is about here; that is about the way it is, roughly (indicating).

6864 Mr. Cowan: Where do you run your logging road from the mill at Jasper, parallel to the Santa Fe?

Mr. Filson: Yes, sir, it goes about seven miles north. Another turpentine camp is at the end of that logging road.

Mr. Cowan: And you lay your laterals out in the ordinary way that has been testified to here into the timber?

Mr. Filson: Yes, sir; at Remlig we are operating a separate steam skidder there, and can get our swiitches a little further, and at Jasper we use a combination loader and skidder and we have to get our tracks a little closer, still the topography of the country has a great deal to do with it.

Mr. Cowan: The ability to skid the logs?

Mr. Filson: Yes.

Mr. Cowan: How far generally are those tracks laid apart in the woods?

Mr. Filson: With our separate skidder, we find the practical distance is 600 feet. We find it cheaper to lay more tracks than to go a greater distance out for the logs. Going farther out it works a hardship on the horses used to pull the lines out.

Mr. Cowan: Your equipment down at the mill at Jasper, what have you there?

6865 Mr. Filson: We have a main line rod engine that we bought from the Lima Locomotive Works, that was their standard gauge and one of their latest type of engines for logging purposes; in fact all our machinery was bought new and built specially for the purposes it was intended for. Then we have a Shay engine there also that does the switching in addition to the main line engine.

Mr. Cowan: Do you get any allowance there from the Santa Fe for switching, or did you ever do so?

Mr. Filson: No, sir.

Mr. Cowan: How do you get the cars from the mill to the Santa Fe station; do you do the switching?

Mr. Filson: We go into the Jasper station and get our empties and take them out to the mill and when loaded take them back to the station at Jasper.

Mr. Cowan: What is your total investment in the railroad part of your plant, taking both plants?

Mr. Filson: The two places amount to about $160,000.

Mr. Cowan: What do you figure it costs you to build your main stem out from the Remlig mill?

Mr. Filson: Well, our grading costs about $2,500 a mile. It was originally laid with 35 pound steel, and it costs as
6866 much more per mile. Then there are the ties and the cost of putting it down.

Mr. Cowan: I thought you might have some general figure which would give some idea.

Mr. Filson: Five or six thousand dollars a mile.

Mr. Cowan: And laying it with heavy steel will raise that cost?

Mr. Filson: Yes, sir.

Mr. Cowan: About how much per mile; have you it in mind?

Mr. Filson: Possibly $1,500 or $2,000 more per mile.

Mr. Cowan: What is the capacity of your Remlig mill?

Mr. Filson: It gives us about three million feet a month, 150,000 a day, 130,000 to 150,000.

Mr. Cowan: What sort of mill is that?

Mr. Filson: Double band and circular.

Mr. Cowan: Have you any gangs at either of your mills?

Mr. Filson: We have at Jasper. The Jasper mill is a band and gang.

Mr. Cowan: What is the capacity of the Jasper mill?

Mr. Filson: About 85,000 to 100,000 board measure a day.

Mr. Cowan: Gang has been several times referred to, and
6867 for the purposes of the record, I wish you would state what a gang is.

Mr. Filson: Well, a gang mill—ours has 26 saws in it. It is a small gang. Twenty-six saws in a frame which goes up and down like this (indicating,) and make 26 or 24 boards at a time.

Mr. Cowan: Then you first must slab your logs?

Mr. Filson: We take two slabs off unless we are cutting the flitches.

Mr. Cowan: What is a flitch?

Mr. Filson: Two or three small boards.

Mr. Cowan: After you have got the width of your log so you can get the width of the gang, do you run through more than one log at a time?

Mr. Filson: Yes, sir; if it is small material, we can put in two or three logs.

Mr. Cowan: When it goes through the gang it cuts the entire log into boards?

Mr. Filson: Yes, sir, or two-inch lumber, whichever the saws are set to cut.

Mr. Cowan: What is the extent of the hard wood?

Mr. Filson: In that country the creek bottoms are covered
6868 with hard wood, but in our immediate section the bottom is not very wide, so there is not a great deal of hard wood in there.

Mr. Cowan: That depends on the width of the bottom?

Mr. Filson: It only grows in the bottoms.

Mr. Cowan: The pine trees are in a sandy, poor soil generally?

Mr. Filson: Pretty poor soil.

Mr. Cowan: Is that the case in that part of Texas, in the pine forests, and throughout western Louisiana?

Mr. Filson: That is the case in southeast Texas, and I think the same thing applies across the river in Louisiana.

Mr. Cowan: Where do you market your lumber?

Mr. Filson: Most of our lumber remains in Texas. We ship, however, to Oklahoma and Kansas and some to Chicago. Our trade is pretty widely distributed. We ship over a large territory. Some into New Mexico.

Mr. Cowan: Do you look after the sales department yourself?

Mr. Filson: No, we have a sales manager who handles the sales.

Mr. Cowan: You are in the general management of the business?

6869 Mr. Filson: Yes, sir.

Mr. Cowan: You might state what official position you hold with the company.

Mr. Filson: Secretary and treasurer and general manager.

Mr. Cowan: With whom do you compete at places where you sell lumber?

Mr. Filson: Well, we compete with everybody that ships into territory that we ship to. In some territory we compete with Pacific Coast stuff. I suppose we compete with white pine. Of course our principal competition is the other yellow pine mills.

Mr. Cowan: In what territories do you meet the yellow pine competition from Arkansas and Louisiana?

Mr. Filson: I think the Arkansas mills ship into central and northwest Texas, and I think the Louisiana mills ship to all parts of Texas.

Mr. Cowan: Do you know whether, or do you think you know whether the fact that mills in Louisiana and Arkansas under certain conditions, and some of them in Texas, get a division of the rate puts you at a disadvantage in the sale of lumber?

Mr. Garwood: We object to that question. That is asking an opinion without the facts upon which the opinion is based

6870 so that we may cross examine upon the facts upon which the opinion is based. We have sought at every time possible in this record to get in the only facts upon which such an opinion might properly be predicated and upon objection of counsel for intervenors, such questions have been objected to and have been uniformly sustained. Now, even an expert cannot state an opinion without the facts upon which his opinion is based. Now we say here is a bald, unsupported opinion without facts upon which an opinion might properly be predicated.

Mr. Cowan: Well, I do not care anything about it. We offer to prove it by other witnesses.

Examiner Burchmore: Do I understand you withdraw the question?

Mr. Garwood: You think the objection is good, do you?

Mr. Cowan: No, sir; don't take too many liberties with counsel.

Mr. Garwood: I will take the liberty of asking the question.

Examiner Burchmore: I understand the question is withdrawn.

Mr. Cowan: Are you acquainted with the other saw mills in the pine forests of Texas, and their location and how they are

6871 logged and how the business is handled?

Mr. Filson: Well, I have been in most of the mills in our immediate neighborhood, and in two or three in southwest Louisiana.

Mr. Cowan: Have you been to some of those who are getting tap line divisions?

Mr. Filson: I was at one time in a mill at De Ridder, which is owned by the Long-Bell Lumber Company.

Mr. Cowan: Is your railroad any more a necessary plant facility than the one of theirs which you saw there?

Mr. Filson: Well, our railroad is a necessity to our business. I do not see how they could get along without a railroad for bringing in logs.

Mr. Cowan: Do they ship lumber over into Texas?

Mr. Filson: I have heard of them shipping lumber over into Texas; yes, sir.

Mr. Cowan: Have you heard of them getting the business where you wanted to get it yourself in some cases?

Mr. Garwood: State the specific instance; when, where and under what circumstances, the price offered and the price sold at. I think that is the only way that such an answer can be given with any propriety.

6872 Mr. Cowan: I will stand by that question. He can answer it any way he pleases.

Mr. Filson: I cannot specify any specific case.

Mr. Garwood: That is what I thought.

Mr. Filson: But he got the business away from us.

Mr. Cowan: But you selling there and he selling there, it naturally follows that either he got the business from you or you from him?

Mr. Garwood: The objection to that——

Mr. Cowan: Well, he need not answer. I know that to be so.

Mr. Garwood: When you are willing to be sworn, Judge, we will take your statement.

Mr. Cowan: Have you any particular facts in connection with your mill that you would like to mention.

Mr. Filson: No, sir; I do not know of any.

Mr. Cowan: I think that is all.

Cross-examination:

Mr. Walter: Mr. Filson, you find competition pretty heavy with the tap line owners?

Mr. Filson: Well, we have found competition pretty hard with somebody lately. I suppose they are in the bunch.

6873 Mr. Walter: Could you distinguish as between the Kirby Lumber Company, the Industrial Lumber Company, the Lutcher-Moore Company or any other of the individuals?

Mr. Filson: I don't know as I could.

Mr. Walter: You cannot say, then, that this competition is any different from any other of the lumber companies than it is from the intervenors?

Mr. Filson: They are all after the business and somebody gets it.

Mr. Walter: What rate do you pay to Guthrie, we will say?

Mr. Filson: I am not familiar with freight rates. I think to Guthrie we have a 27½ cent rate. I am not sure about that, however, because I have no occasion to keep in touch with the rates.

Mr. Walter: Is it not 24 cents?

Mr. Filson: Possibly; I would not say.

Mr. Walter: You know where Nacogdoches is?

Mr. Filson: Yes, sir.

Mr. Walter: If I say to you that the rate from Nacogdoches which is nearer to Guthrie, is 27½ cents, what do you say as to whether your rate, three and one-half cents less, does not really and in effect afford you a three and one-half cent division
6874 to all intents and purposes on all your investment?

Mr. Filson: If we had a less rate to Guthrie than Nacogdoches we would have an advantage.

Mr. Walter: And it would be just the same advantage as if it were a division of the freight rate accorded to you?

Mr. Filson: Well, I think so; yes, sir.

Mr. Walter: You do not see any difference at all——

Mr. Marble: Do you agree to that, too, Mr. Walter?

Mr. Walter: I am talking to the witness. What do you say to that?

Mr. Filson: What is that?

Mr. Walter: What do you say to that?

Mr. Filson: What is the question?

Mr. Walter: Don't you in effect, get a division?

Mr. Filson: I don't think so; no, sir.

Mr. Coleman: Is there such a rate?

Mr. Walter: Is not that just the same effect as if you got a division?

(Previous question and answer read.)

Mr. Walter: Take any local point on the Santa Fe, where your local rate is three and a half cents less than it is from your
6875 competitor at Nacogdoches, do you say that the division of three and one-half cents makes any difference?

Mr. Filson: I say we have the advantage of that Nacogdoches mill if we have a three and a half cent rate less than they have.

Mr. Walter: Do you complain of that?

Mr. Filson: I have not complained of that; no, sir.

Mr. Coleman: What has that got to do with this case?

Mr. Walter: Is not that true of all points where the rate from Santa Fe points is less than it is from your competitors——

Mr. Filson: We have the advantage in places of that kind, of course.

Mr. Walter: Do you complain of it?

Mr. Filson: No, we are not complaining.

Mr. Walter: Do you think it is unlawful?

Mr. Filson: I would not say.

Mr. Cowan: That is not for him to say, whether he thinks it is unlawful or not.

Mr. Walter: You say you take these cars and haul them from Jasper to your mill, that is, the empties, and take them back?
6876 Mr. Filson: From Brookland. Jasper is the railroad station, and our mill is three-quarters of a mile west from there. We go from the mill to the station of Jasper and load them at the mill and take them back to the station at Jasper.

Mr. Walter: Suppose I came in there to buy that piece of line and operate it; do I render any more service to the mill than I do to the Santa Fe in getting the tonnage for the Santa Fe?

Mr. Filson: How is that?

Mr. Walter: Do I render any more service to you, delivering your tonnage over my road to the Santa Fe, than I do for the Santa Fe in going out and getting the tonnage for the Santa Fe?

Mr. Filson: If you come in there and switch those cars for us, you relieve us of that service?

Mr. Walter: Don't I also relieve the Santa Fe of that service?

Mr. Filson: Well, we are relieving them now.

Mr. Walter: Are you not rendering a service for the carrier?

Mr. Filson: Yes, sir.

Mr. Walter: And that is true of all these lines that oper-
6877 ate in that way?

Mr. Filson: Anybody similarly situated would be doing the same thing.

Mr. Walter: Are you not also serving the consumer in affording him a source of supply in taking it from the mill to the trunk line?

Mr. Filson: Yes, sir, and we are giving them facilities for getting their stuff out to the trunk line.

Mr. Walter: And one is just as necessary as is the service from Brookland on into Oklahoma.

Mr. Filson: I don't understand the question.

Mr. Walter: The service that is rendered over that track from Brookland to your mill is a service that is rendered for the shipper or consignee; it is also a service for the railroad in getting the tonnage for the main line, is it not?

6878 Mr. Filson: Yes, sir.

Mr. Walter: That service over that system is just as much a service in getting it to the consumer as is for a similar distance the movement by the Santa Fe over its lines?

Mr. Filson: Yes, sir; they would have to haul that stuff in some way if we did not haul it to them.

Examiner Burchmore: From where to where?

Mr. Walter: From this mill to the Santa Fe tracks.

Examiner Burchmore: I thought you called it Brookland?

Mr. Walter: Brookland is the loading point on the Santa Fe.

Examiner Burchmore: I thought Jasper was the loading point on the Santa Fe.

Mr. Filson: We have two. Our mill at Remlig is two miles from the Santa Fe and we have a post office there which we call Remlig.

Mr. Walter: In the same way if your mill was located at Guthrie, the hauling of that log from the end of the track of the railroad through to Guthrie would be a service likewise in transportation, would it not?

Mr. Coleman: I object to that kind of a question.

Mr. Walter: I should expect you would.

6879 Mr. Coleman: It is nothing for the witness to give his opinion on.

Mr. Walter: They have been doing that from the beginning of this investigation.

Mr. Coleman: Commissioner Harlan expressly ruled on it this morning.

Mr. Walter: No, he did not. What do you say to that, Mr. Filson?

Mr. Filson: If somebody hauls it up there somebody performs a service.

Mr. Walter: And it is just as necessary to move the logs some distance as it is to move the lumber.a distance, is it not?

Mr. Filson: It is necessary to get the logs into the mill, yes.

Mr. Walter: And whether the mill is located at Guthrie or at your point does not affect the consumer, does it? He has no concern where it is milled?

Mr. Filson: I don't suppose he cares.

Mr. Walter: You say you haul for everybody along the line?

Mr. Filson: We have hauled.

Mr. Walter: Do you refuse to haul for anybody?

6880 Mr. Filson: I don't know that we have refused to haul for anybody.

Mr. Walter: Is it not necessary for the development of that country for you to have railroads?

Mr. Filson: Well, railroads are good developers of the country.

Mr. Walter: Are not they the greatest developers in the transportation line?

Mr. Filson: I think so.

Mr. Cowan: Surely, it seems unnecessary to take time with that. We are sitting here paying hotel bills, and what is the use of proving that a railroad is necessary for the development of the country? If the Commission don't know that, they had better resign.

Mr. Walter: How long a haul do you have from your mill to Jasper?

Mr. Filson: From the mill to the station?

Mr. Walter: Yes.

Mr. Filson: Three-quarters of a mile.

Mr. Walter: Is it the same distance from Brookland to your mill?

Mr. Filson: From Brookland to our mill at Remlig it is

6881 two miles.

Mr. Walter: Does any other material go over that line than lumber?

Mr. Filson: We haul the products of the turpentine camp and some staves and hard wood.

Mr. Walter: Do you get any revenue for hauling those staves?

Mr. Filson: We have made a charge for it; yes, sir.

Mr. Walter: What charge do you make?

Mr. Filson: For staves we have charged them 3 cents per hundred pounds with a minimum of $12 a car, I believe.

Mr. Walter: For the two mile haul?

Mr. Filson: No, sir.

Mr. Walter: How far?

Mr. Filson: Wherever the cars are loaded on our tram road.

Mr. Walter: How far would that be on an average?

Mr. Filson: We haul the products of the turpentine camp about 12 miles.

Mr. Walter: Do you haul other materials?

Mr. Filson: Yes, sir.

Mr. Walter: Do you charge the same rate to everybody?

Mr. Filson: No, sir; we do not.

6882 Mr. Walter: On the same commodity you make a difference?

Mr. Filson: We are charging the turpentine camp $10 a car flat.

Mr. Walter: What do you charge for staves?

Mr. Filson: We charge 3 cents per hundred pounds with a minimum charge of $12 a car.

Mr. Walter: Which is the more valuable on the carload?

Mr. Filson: The naval stores.

Mr. Walter: Much more and the risk is much greater?

Mr. Filson: Yes, sir.

Mr. Walter: Why did you not incorporate that road?

Mr. Filson: Well, sir, we did not figure it would pay us to do so.

Mr. Walter: If you did that you would have to have some regulating authority over your charges, too, would you not?

Mr. Filson: Yes, sir.

Mr. Walter: I will ask you whether or not the liabilities entailed upon you by state legislation and state commissions would not be a very material item in operation, if you were incorporated?

Mr. Filson: We considered that when the matter was discussed.

Mr. Walter: And that is true, is it not?

6883 Mr. Filson: Yes, sir.

Mr. Walter: Now, I will ask you whether in determining the cost of your lumber you calculated into it the revenue derived from hauling this over your road for other people?

Mr. Filson: Our logging expenses got credit for whatever we charged for hauling stuff over the tram.

Mr. Walter: No, I am asking whether in figuring your cost of lumber you figured this in it?

Mr. Filson: The cost was reduced by the receipts for hauling this stuff.

Mr. Walter: Are you sure of that?

Mr. Filson: Yes, sir.

Mr. Walter: How much did it reduce it?

Mr. Filson: Whatever it amounted to.

Mr. Walter: Did you figure it in the cost of the lumber?

Mr. Filson: We give the logging expenses credit for whatever we got out of it.

Mr. Walter: I am asking if you figure that revenue in determining the cost of the lumber per thousand?

Mr. Filson: Yes, sir; we figure the lumber at the cost per thousand feet, and the logging got credit for whatever we got for hauling this stuff and reduced the cost that much.

6884 Mr. Walter: How much revenue did you receive?

Mr. Filson: Well, I believe I stated we hauled about ap-

proximately 100 cars a year; it would amount to $1000 in the course of a year's business. That is problematical, however.

Mr. Walter: How much have you invested in your mill?

Mr. Filson: You mean the mill itself?

Mr. Walter: The mill and timber.

Mr. Andrews: If the Examiner please, we have been making objections to that question and the objections have been sustained and we make the same objection in this case.

Examiner Burchmore: I believe objections have been offered to that line of questions and my impression is they have been sustained and exceptions have been noted.

Mr. Walter: I do not understand that the Commissioner ruled on that particular question.

Examiner Burchmore: As to the value of the mill investment?

Mr. Walter: The investment in the mill and timber.

Mr. Andrews: I do not remember whether it was before or after you came in yesterday, but this specific question was put to
6885 Mr. Kirby as to the cost of his mills, or the value of his mill properties, in connection with the statement that he had given of the cost of the railroad but had not given the cost of the mills, and upon objection the cost of the mills was excluded.

Examiner Burchmore: I think the Commissioner sustained that objection to that very question.

Mr. Walter: We will note an exception.

Mr. Garwood: For the purposes of the record will counsel consider that the question is asked of each of the witnesses, as to the Lutcher-Moore Company and the others?

Mr. Andrews: Yes.

Mr. Marble: That was agreed to this morning.

Mr. Cowan: No, that was applicable to the selling cost and the price of lumber.

Mr. Marble: Well this is the same class of testimony.

Mr. Cowan: Yes.

Examiner Burchmore: It is understood such objection will be noted.

Mr. Walter: Did you sell lumber any cheaper because of this revenue?

Mr. Filson: I do not think we did.

Mr. Walter: You say the greater portion of your lumber
6886 is sold in Texas.

Mr. Filson: Well, yes, sir. I have got the figures here, I believe.

Mr. Walter: All right, can you give us the figures showing us where your lumber was sold?

Mr. Filson: Yes, sir. (Produces paper.)

Mr. Walter: Do you sell it to the Santa Fe Railroad?

Mr. Filson: We try to sell them but have not been able to lately.

Mr. Walter: Mr. Kirby gets most of that business, doesn't he?

Mr. Filson: No, I don't think they have been buying much.

Mr. Walter: When they did buy were you able to sell them any?

Mr. Filson: Yes.

Mr. Walter: You sold most of your business on Santa Fe points?
Mr. Filson: No.
Mr. Walter: Put that statement in the record.
Mr. Filson: I do not think that is made just as you asked for it, but it will answer the purpose, probably.
Mr. Walter: Do you have sales agents?
6887 Mr. Filson: We have a general sales agent at the office and we have a man at Fort Worth on salary.
Mr. Walter: The man who is selling that lumber, does he take into consideration the freight charge in fixing his price?
Mr. Filson: You mean the cost of freight to get it from mill to destination?
Mr. Walter: No, in making up his figures to the consumer or purchaser does he consider the freight charges?
Mr. Filson: Yes, sir.
Mr. Marble: Concerning whom is this question asked?
Mr. Andrews: His sales agent.
Mr. Walter: You take a local point on the Santa Fe, you have a rate less, we will say, 3½ cents than your competitor off the Santa Fe——
Mr. Andrews: Just a moment. If the Examiner please, I am not willing for the statement to go in. I do not think counsel intends it that way, but it seems to me that would be the effect of it, that this witness would have a 3½ cent less rate to all Santa Fe points than people who are not on the Santa Fe.
Mr. Walter: No, I do not say that at all.
6887*a* Mr. Andrews: I did not think you meant it, but that is the way it sounded. Now, if that difference is between isolated points and you want to put them in evidence, we have no objection, but we do not want it to appear in the record that that is general.
Mr. Walter: I will confine my question to points in Oklahoma reached exclusively by the Santa Fe. I will ask you whether your salesman in fixing his price, his offer to the consumer or retailer or jobber or whatever it be, makes his price, taking into consideration the freight rates from your mill as compared with the freight rates from, say, Nacogdoches for example
Mr. Filson: He takes the freight rate into consideration.
Mr. Walter: And makes his price accordingly?
Mr. Filson: Yes, sir; he tries to get all he can for his stuff.
Mr. Walter: How is that sold, f. o. b. the mill?
Mr. Filson: No, sir; our stuff going to retail yards is sold delivered.
Mr. Walter: Who pays the freight?
Mr. Filson: The dealer pays the freight and charges it back to us and the invoice is made covering freight charges.
Mr. Walter: I will ask you whether in fixing that delivered
6888 price you take into consideration your freight rate as compared with the freight rate, for example, from Nacogdoches?
Mr. Filson: If a desirable piece of business shows up and we find

some other mill has a little lower rate than we have, we reduce our price.

Mr. Walter: Suppose your rate is less than his?

Mr. Filson: We would get all we could in that case.

Mr. Walter: You would maintain the rate from Nacogdoches, then?

Mr. Filson: We would try to take advantage of our advantage in the freight rate, yes, sir.

Mr. Walter: In fixing that price would you take into consideration this revenue you have received of $1,000?

Mr. Filson: It would not cut much ice, $1000 on the amount we ship.

Mr. Walter: It is wholly negligible, what your railroad earns?

Mr. Filson: Yes, sir, almost.

Mr. Walter: You do not take it into consideration at all?

Mr. Filson: Only we credit the logging cost——

Mr. Walter: But in fixing your selling price you do not take it into consideration at all?

6889 Mr. Filson: In fixing the selling price we do not take it into consideration at all.

Mr. Walter: Would you have any objection to letting us know your average selling price?

Mr. Andrews: Just a moment. Counsel who represent the intervenors have objections, and as long as they are willing to retain the counsel, it seems to me that it is an improper question and the same objection was made on yesterday and sustained by Mr. Commissioner Harlan, when Mr. Kirby was being examined.

Examiner Burchmore: The objection will be sustained.

Mr. Walter: We would like to have go into the record in connection with the witness's testimony the table furnished by him showing destination points and the amounts sold in various states.

(The paper so offered and identified was received in evidence and thereupon marked Exhibit No. 1, Witness Filson, received in evidence February 1, 1911, and is attached hereto.)

Examiner Burchmore: Is that an exhibit to your testimony?

Mr. Filson: Yes, sir; I understood they have asked for it.

Mr. Andrews: They have offered it. We have no objec-

6890 tion to their offering it.

Mr. Marble: You have been questioned somewhat as to the necessity of certain operations for getting lumber into the market. The first necessity is for the tree to grow in the soil, is it not?

Mr. Filson: Yes, sir.

Mr. Marble: Then you must put in a mill?

Mr. Filson: Yes, sir.

Mr. Marble: And you must chop down the tree?

Mr. Filson: Yes, sir.

Mr. Marble: You must transport the log to the mill either with oxen or with a railroad?

Mr. Filson: In some manner; yes, sir.

Mr. Marble: And you must there saw the tree into lumber?

Mr. Filson: Yes, sir.

Mr. Marble: And prepare the lumber for shipment and load it on the cars?

Mr. Filson: Yes, sir.

Mr. Marble: And take it out to the main line carrier?

Mr. Filson: Yes, sir.

Mr. Marble: And the main line carrier must take it across state lines and to destination?

6891 Mr. Filson: Yes, sir.

Mr. Marble: If the living tree is to go to the retail yard for sale, each one of these operations is absolutely necessary, is it not?

Mr. Filson: Yes, sir.

Mr. Marble: Could any one be omitted and the tree go to the yard?

Mr. Filson: No, it could not.

Mr. Marble: And it was in that way that you testified, was it, that this transportation from your mill to the main line carrier was as neccessary as the transportation by the main line carrier?

Mr. Filson: It was necessary; yes, sir.

Mr. Marble: And I presume you are willing to leave it to the Interstate Commerce Commission to decide which of those operations is transportation subject to the Act to regulate commerce and which is outside the Act?

Mr. Filson: Yes, sir.

Mr. Marble: And I shall leave it to the Commission instead of to you.

Mr. Walter: There are two operations, one is converting and the other is carrying, are there not?

6892 Mr. Filson: Yes, sir.

Mr. Walter: Can you see that it makes any difference where the carrying is done, whether it is before there is any milling done or after it is all done or whether the milling is done with transportation on each side?

Mr. Filson: There is a limit to the practical distance to where you could carry the log before manufacturing it. I do not think you could carry it to Guthrie and manufacture it up there.

Mr. Walter: But within reasonable limits.

Mr. Filson: Well, the reasonable limits would be considerably less than from our mill to Guthrie.

Examiner Burchmore: It does not seem to me to be profitable to carry that further because it would readily occur that logs are sometimes carried 500 miles and then manufactured into baskets.

Mr. Walter: I wanted to see if it was any less transportation service because it is a log than lumber.

Mr. Walter: Let me ask you whether logs are not transported across the Atlantic Ocean and there manufactured?

Mr. Filson: Yes, sir; we have shipped them, that is, we have sold them to people who have shipped them.

6893 Mr. Walter: And they mill them over there?

Mr. Filson: Yes, sir; in Germany.

Mr. Garwood: Have you prepared any statement in addition to that showing the states and countries to which you have shipped your product during the past year or so or is the one you introduced in evidence the only one you have prepared?

Mr. Filson: That is the only one.

Mr. Andrews: Your trans-Atlantic transportation of logs was square timber?

Mr. Filson: No; round timbers.

Mr. Andrews: Pine logs or hard wood?

Mr. Filson: Pine logs.

Mr. Andrews: Is that indulged in extensively?

Mr. Filson: I understand there is quite a little movement out of New Orleans, but this is the only Texas shipment I ever heard of.

Mr. Andrews: There is a great deal of hardwood shipped that way, is there not?

Mr. Filson: Yes, sir; of hickory and cedar.

Mr. Andrews: And ash, particularly.

Mr. Filson: Hickory, ash and cedar are generally shipped
6894 in the round.

Mr. Coleman: Just to pursue Mr. Walter's questions to an absurdity, does the transportation line over in Germany absorb the ocean haul on the log?

Mr. Garwood: I object to the question on the ground the gentleman himself says it is an absurdity, and if so I do not think it would throw any light on the situation.

Mr. Marble: I don't suppose the witness knows.

Mr. Filson: No, I do not know.

Mr. Cowan: There was one question I forgot to ask you, why your mill was located away from the Santa Fe track?

Mr. Filson: At Remlig the main reason was to get on an unfailing supply of water?

Mr. Cowan: You have to be at a place where you can get water?

Mr. Filson: Water is an absolute necessity to a saw mill, and plenty of it.

Mr. Cowan: I suppose Mr. Walter will not contend that the rates from Nacogdoches to Texas points are different than the rates from Santa Fe points to the same blanket territory?

Mr. Walter: It is a great deal different to Oklahoma points, due entirely to the action of the Santa Fe carrying out certain promises referred to in this record.

6895 Mr. Cowan: You just answered the question I asked you, and then went on to something else I did not ask. I asked it with a view of asking this witness and trying to get some information.

Mr. Walter: All right.

Mr. Cowan: I observe in your statement that in your shipment to Texas points on the Santa Fe there was 1,733,334—feet, I suppose that is.

Mr. Filson: That is in feet; yes, sir.

Mr. Cowan: Whereas to Texas points not touched by the Santa Fe there was 8,477,434 feet, which is very nearly one-third of your entire

output. I observe also in your statement that to Oklahoma points local to the Santa Fe you shipped 714,125 feet, whereas to local points in Oklahoma not touched by the Santa Fe you shipped 993,369 feet. Would those figures indicate to your mind that your relations to the rates confine you to sales on the Santa Fe railroad?

Mr. Filson: They do not confine us to the Santa Fe rails.

Mr. Cowan: If a man from Nacogdoches was shipping lumber for the purpose of sale to Guthrie, Oklahoma, what route could he take, do you know?

Mr. Filson: No, sir; I do not know, but I——

6896 Mr. Marble: The Commission would know that.

Mr. Filson: But he can get it in there over other roads than the Santa Fe and get the same rates. I do not think Guthrie is a local point.

Mr. Walter: I qualified that to make it a local point.

Mr. Cowan: But you used Guthrie as an illustration and I wanted to show it was not a local Santa Fe point.

Mr. Walter: But I qualified it.

Mr. Cowan: What railroads are there at Nacogdoches?

Mr. Filson: I think it is the Houston, East & West Texas, and I do not know what other line.

Mr. Cowan: The T. & N. O.?

Mr. Filson: The T. & N. O. I believe, yes, sir; both Southern Pacific.

Mr. Cowan: Do you know of any saw mills in your district, and by that I mean in the district that takes this same blanket rate to different interstate destinations which have to pay a higher rate than you do to get to the same consuming points which are the important places of consumption, like large towns and cities?

Mr. Filson: No, sir; the large towns I think are all on the same basis. There are other ways to get into them. Those high

6897 rates only apply to strictly Santa Fe points, as I understand it.

Mr. Cowan: But if you did have a lower rate of 3 or 3½ cents per hundred pounds than your competitors, you would have necessarily that much advantage of them?

Mr. Filson: We would have that much advantage and would work that field pretty strong too.

Mr. Cowan: It does not make any difference whether you would have that given as a division of rates or a lower blanket rate?

Mr. Filson: No matter how we got it we would have the advantage.

Mr. Cowan: Then the man who has the division of the rate shipping from Nacogdoches over the Houston, East & West Texas to Guthrie would have the same advantage that you have by his trunk line?

Mr. Filson: To the sum that he gets as a division he would have an advantage over us.

Mr. Walter: You know the rate from Nacogdoches to the Santa Fe connection over the Houston, East & West Texas and thence over the Santa Fe to Guthrie is 3½ cents higher than if it went over

the Houston, East & West Texas without touching the Santa
6898 Fe rails?

Mr. Filson: I do not know.

Mr. Walter: If the tariff shows that——

Mr. Filson: It is so; yes, sir.

Mr. Walter: Do you know any explanation for that on the part of the Santa Fe?

Mr. Filson: No, sir; I do not.

Mr. Cowan: You do not think the man would use it when he could get there cheaper the other way, do you?

Mr. Filson: I think he would ship the cheapest route.

(Witness excused.)

I. STEPHENSON, was called as a witness, and having been duly sworn, testified as follows:

Mr. Cowan: Where do you live?

Mr. Stephenson: I live in Louisiana.

Mr. Cowan: And what part?

Mr. Stephenson: Ludington.

Mr. Cowan: Where is that?

Mr. Stephenson: On the Kansas City Southern, south of Shreveport.

Mr. Cowan: On what railroad?

6899 Mr. Stephenson: Kansas City Southern.

Mr. Cowan: How far is that from Lake Charles?

Mr. Stephenson: About sixty miles, I guess.

Mr. Cowan: And from Beaumont?

Mr. Stephenson: Something about 90 miles I believe.

Mr. Cowan: And from Orange?

Mr. Stephenson: I don't know just what it is.

Mr. Cowan: Are you engaged in the manufacture of lumber?

Mr. Stephenson: Yes, sir.

Mr. Cowan: What is the name of the lumber company with which you are connected?

Mr. Stephenson: Ludington, Wells and Van Schaick Lumber Company.

Mr. Cowan: Where is your mill located?

Mr. Stephenson: At Ludington.

Mr. Cowan: Where is your timber located?

Mr. Stephenson: Both east and west of there.

Mr. Cowan: Nearby or far away?

Mr. Stephenson: Right there, 12 miles each side of us.

Mr. Cowan: What is the extent of your timber holdings?

Mr. Stephenson: About 50,000 acres uncut.

Mr. Cowan: What character of logging operations do you
6900 carry on?

Mr. Stephenson: We have about 11 miles of logging road or tram is what we call it.

Mr. Cowan: How much of that is what has been denominated as main line, or rather, permanent track?

Mr. Stephenson: Well, there is about 6½ miles of it is main line.

Mr. Cowan: And the balance logging spurs?

Mr. Stephenson: And the balance logging spurs and part of the main line which will be taken up when the timber is cut off.

Mr. Cowan: Do you have any other railroad connection except the Kansas City Southern?

Mr. Stephenson: Yes, sir, we have the Santa Fe and the Lake Charles & Northern.

Mr. Cowan: Do they all reach your mill?

Mr. Stephenson: They are five miles from the mill, about.

Mr. Cowan: How do you reach those roads from your mill?

Mr. Stephenson: Over our tram roads.

Mr. Cowan: Do you haul your lumber to those roads?

Mr. Stephenson: Yes, sir, and we receive cars from them on the Santa Fe line at Ikes and bring them to the mill and load
6901 them with lumber and return them again.

Mr. Cowan: Who performs that service?

Mr. Stephenson: The lumber company with the tram road.

Mr. Cowan: Do you get anything for it?

Mr. Stephenson: No, sir.

Mr. Cowan: How do you get your cars from and to the Kansas City Southern at Ludington?

Mr. Stephenson: We put them on our Y in connection with their siding and our station, and we take them from there to the planing mill and saw mill.

Mr. Cowan: Who does that?

Mr. Stephenson: The lumber company.

Mr. Cowan: Do you get anything for that?

Mr. Stephenson: No.

Mr. Cowan: How does your track compare with the Kansas City Southern?

Mr. Stephenson: I guess it is just about the same thing, maybe a little better than most places in our section.

Mr. Cowan: Are you acquainted with the mill and location at Fullerton?

Mr. Stephenson: Not very well.

Mr. Cowan: Have you been there?

6902 Mr. Stephenson: I have been there once, yes, sir.

Mr. Cowan: They handle the cars and lumber in connection with the road with which they connect about six miles, I believe?

Mr. Stephenson: That is what I understand, something like that.

Mr. Cowan: Is this service you perform in going over to the Santa Fe and the L. C. & N. and different materially *to* the character of service they perform in hauling the lumber?

Mr. Stephenson: I don't know that it is.

Mr. Cowan: How many cars do you take out at a time?

Mr. Stephenson: It is according to how many we can get. We have taken as high as 20.

Mr. Cowan: Is the track whereby you connect with the Santa Fe

and the L. C. & N. the same main track over which you haul your logs to the mill?

Mr. Stephenson: Within about half a mile of it.

Mr. Cowan: How is that?

Mr. Stephenson: About half a mile of spur from our main line to the connection with the Santa Fe.

Mr. Cowan: Otherwise it is the same track you handle your logs over?

6903 Mr. Stephenson: Otherwise it is the same track we handle our logs over, yes, sir.

Mr. Cowan: Do you handle logs over more track than you do the lumber?

Mr. Stephenson: Yes, sir.

Mr. Cowan: Have you ever had any division of the rates, or any allowances for this service?

Mr. Stephenson: Yes, sir. Not from the Santa Fe or the L. C. & N.; we did at one time from the K. C. S.

Mr. Cowan: But you do not get it from them now?

Mr. Stephenson: No.

Mr. Cowan: What service did you perform at that time different from what it is now?

Mr. Stephenson: Not any different.

Mr. Cowan: Have you had any chance to get divisions from the L. C. & N. and the Kansas City Southern of late?

Mr. Stephenson: I have had from the Kansas City Southern about a year ago.

Mr. Cowan: Did you take it?

Mr. Stephenson: No, sir.

Mr. Cowan: Why?

Mr. Stephenson: Well——

6904 Mr. Garwood: What proposition does this illustrate? Is it going into this witness's reasons for doing or not doing a thing? What is the materialty of it?

Mr. Cowan: I do not care to ask it, but I supposed you would ask it and I thought I would beat you to it.

Mr. Garwood: That is a very violent supposition, that I shall do or not do a particular thing.

Mr. Cowan: I do not think it is violent. It may not be justified but I supposed you would ask it.

Examiner Burchmore: Has that question been asked of any other witness?

Mr. Marble: It was asked of Mr. Farwell. I do not think myself that it is relevant, though, but it was asked by Mr. Walter, I believe.

Examiner Burchmore: There seems to be a general objection. We will proceed with some other question.

Mr. Cowan: What is the output of your mill?

Mr. Stephenson: Thirty-five to forty million feet a year.

Mr. Cowan: To what places do you ship your lumber for market?

Mr. Stephenson: Texas, Missouri, Illinois, Oklahoma and the last few months of last year there was a great deal went to places in

Louisiana and east of the river, some places that we don't
6905 know anything about.

Mr. Cowan: Have you any list of the states to which you shipped?

Mr. Stephenson: No, sir.

Mr. Cowan: Do you export any?

Mr. Stephenson: No, sir; only a few cars.

Mr. Cowan: Why don't you export?

Mr. Stephenson: That is a line of business we don't know anything about. We have not done any.

Mr. Cowan: Do you ship mostly over the Kansas City Southern or the Santa Fe?

Mr. Stephenson: Since we have had connection with the Santa Fe we ship mostly over that road on account of our markets being mostly over in that direction.

Mr. Cowan: Well, do you ship to any other places than Santa Fe stations of consumption when you ship on the Santa Fe?

Mr. Stephenson: Yes, sir.

Mr. Cowan: Do you get the same rates shipping to the same places as you would by shipping over the L. C. & N.?

Mr. Stephenson: Yes, sir. Some places we do. I guess almost every one of them that I know of.

6906 Mr. Cowan: Do you ship as far as Chicago?

Mr. Stephenson: Yes, sir.

Mr. Cowan: Your forest adjoins the Fullerton properties?

Mr. Stephenson: I believe they are east of us.

Mr. Cowan: It is the same general forest?

Mr. Stephenson: Yes.

Mr. Cowan: The same kind of timber?

Mr. Stephenson: Yes, sir; and I guess practically the same kind of timber; it is supposed to be.

Mr. Cowan: If the Fullerton interests get 4 cents per hundred pounds for taking their lumber to the L. C. & N. and you take your lumber there and do not get anything, do you figure that that would give them an advantage of you?

Mr. Garwood: We object to this question upon the ground that we have heretofore continuously endeavored to procure from every witness the facts upon which alone such an opinion could be predicated. Those facts, upon objection of counsel for Intervenors, have uniformly been excluded. Now, having deprived the court of the facts upon which alone the opinion could be based, we make the objection that the calling for an opinion without the facts upon which it alone can be based is improper.

6907 Mr. Marble: I should like to add to that the suggestion that it simply calls for an opinion of the witness. The effect of the freight he pays and the amount that is returned out of them to some one else is a conclusion the Commission can arrive at. I do not object at all but am simply calling *objection* to it.

Mr. Cowan: I am asking for a specific case in the same neighborhood. One man gets paid for hauling it and the other does not.

Mr. Garwood: We have gone over this a great many times and

counsel for the Intervenors have been allowed a latitude which is indeed, in my judgment, extraordinary, but where the effort has been made upon the part of those interested from our point of view to get all of the facts and put them freely before the Commission, that effort has been met upon the part of the other side by equally strenuous effort to keep the facts out, which up to this time, have been successful. It seems to me it is just simply calling for a general opinion or guess which ought not afford the Commission any light, and I think at this stage we ought to abandon that line of interrogatory.

Mr. Marble: Inasmuch as I made I believe, in the first
6908 place, the objection to the proposed plan that the presence or absence of discrimination should be proved by figures as to cost of manufacture or sale price, and inasmuch as the Commissioner is absent, who to my mind very properly ruled that that was not a way to prove discrimination subject to the act, I feel somewhat inclined to resent such a statement going into the record in this way at this time.

Mr. Garwood: What part of it?

Mr. Marble: Simply this. The counsel has spoken of extraordinary freedom being allowed the attorneys for the Intervenors or the other side. I do not know whether that includes me or not, and there is the implication that they had been unfairly dealt with. Mr. Garwood knows there is a distinction between jurisdiction subject to the act and jurisdiction not subject to the act.

Mr. Garwood: Yes.

Mr. Marble: And a distinction between jurisdiction of industrial acts, and the Commission in ruling upon the evidence had that distinction in mind, and I do not think this is the time to argue that matter or make any imputations of that sort.

Mr. Garwood: I do not care to argue it as a matter of
6909 course, but I think there ought to be a limit on that, and I now rise to see if we cannot put a limit upon it.

Mr. Marble: I thought this question called for an opinion and therefore that the objection was well made.

Mr. Cowan: I do not think Mr. Garwood is very serious. I think this is kind of made for the audience when he says we have tried to keep out facts. He knows we tried to keep out the ones we objected to, and I suppose he means that, and I am going to make the suggestion, which I think he will agree to, that what Mr. Garwood means was the evidence which was excluded, and he did not mean anything else.

Mr. Garwood: I could not have meant anything else——

Mr. Cowan: I did not intend to impute anything to counsel.

Examiner Burchmore: Do you feel the interests you represent will be prejudiced by an answer to that question?

Mr. Garwood: I would have no objection if we were permitted to follow it up, but to go through the same line of procedure and argument on questions every time it is asked is a waste of time.

Examiner Burchmore: I think the objection should be sustained.

Mr. Cowan: I will withdraw the question, Mr. Stephenson.
6910 I asked a good deal like Mr. Garwood makes the objection, more for the question of punctuating it than otherwise. I know as much about that as he does.

What are the conditions in that part of the country which is about to be developed by Mr. Fleishel's railroad, a map of which you saw, with respect to affording a country which would support a railroad other than the timber interests?

Mr. Stephenson: I did not see the map.

Mr. Cowan: Well, it is to be built in connection with Lutcher-Moore Company's road over to Alexandria, probably via Fullerton or that neighborhood.

Mr. Stephenson: I could not answer that.

Mr. Cowan: Well, it would have to go through your forest would it not?

Mr. Stephenson: No, according to that he would go west of us.

Mr. Cowan: You are not acquainted with the country through which it is planned to go?

Mr. Stephenson: No.

Mr. Cowan: Are there farming operations in your district?

Mr. Stephenson: Very few.

6911 Mr. Cowan: What sized town is there at the place where you have your mill?

Mr. Stephenson: Just a saw mill town.

Mr. Cowan: How many people?

Mr. Stephenson: There are about four hundred employés there and their families; and some towns on both sides of us.

Mr. Cowan: A population of how many for this 400 people

Mr. Stephenson: Maybe 1200 or 1500 people around there.

Mr. Cowan: Depending entirely on the saw mill interests?

Mr. Stephenson: Yes, sir.

Mr. Cowan: Is there any traffic to haul except for people who could not be there except for the saw mill operations?

Mr. Stephenson: Nothing to haul; only a little station at Ikes, there are some buildings going up and we haul some there.

Mr. Cowan: Do you haul lumber and stave bolts for people?

Mr. Stephenson: No.

Mr. Cowan: Do you haul any passenger cars?

Mr. Stephenson: No.

Mr. Cowan: Do you haul them on your lumber cars?

Mr. Stephenson: No, unless a person wants to go to the woods.

6912 Mr. Cowan: What sort of equipment have you?

Mr. Stephenson: Two locomotives, five flat cars, a water car, 42 logging cars and a motor car.

Cross-examination:

Mr. Walter: When you deliver to the Kansas City Southern how far do you have to haul the loaded cars?

Mr. Stephenson: From the saw mill it is about nearly three quarters of a mile and from the planing mill about half a mile.

Mr. Walter: When you haul it to the Santa Fe, how far?

Mr. Stephenson: About five miles.

Mr. Walter: Why do you haul the most of your tonnage that five miles?

Mr. Stephenson: Well, we have several reasons.

Mr. Walter: What are they?

Mr. Stephenson: The first one, when we located there we only had a connection with the Kansas City Southern and cars were scarce, and one thing and another, and we did not think they treaed us right compared with what they were doing with some others, and as soon as there was a chance to get a connection we built the road through and got it, and we give them a good many cars, just the same to the Kansas City Southern as we do
6913 to the others, the rates and all being the same, unless they had a surplus of cars and others had not, we would use the other line. We would give it to the L. C. & N. or to the Santa Fe or whichever road had them to offer.

Mr. Walter: What does it cost you to haul five miles?

Mr. Stephenson: We do not get any revenue.

Mr. Walter: Not revenue but cost.

Mr. Stephenson: I could not tell you. It is done in connection with our logging. We keep no separate account of it.

Mr. Walter: Why do you haul it that five miles other than to spite the Kansas City Southern?

Mr. Stephenson: It is right on our connecting lines to the wood where we go, so it is not out of the way to do it.

Mr. Walter: The car that carries the lumber does not go to the woods?

Mr. Stephensn: No, we stop about half way out.

Mr. Walter: You bring the logs down and haul the lumber back?

Mr. Stephenson: Yes, sir.

Mr. Walter: Why do you send it Santa Fe other than that?

Mr. Stephenson: No other reason.

Mr. Walter: You said a while ago something about markets.

6914 Mr. Stephenson: Well, that is all.

Mr. Walter: What about the markets on the Santa Fe which makes them desirable as against the Kansas City Southern?

Mr. Stephenson: We have a good many customers over in Texas that want it routed on the Santa Fe.

Mr. Walter: Those that live on the Santa Fe want Santa Fe routing of course.

Mr. Stephenson: Yes.

Mr. Walter: Let me ask you whether you get more for the same grade of lumber loaded at local points Santa Fe than you do when it is going Kansas City Southern?

Mr. Stephenson: Not that I know of, the same rate——

Mr. Walter: I am not speaking about the rate. The mill price of the lumber when it is sold Santa Fe local points as compared with the mill price delivered elsewhere.

Mr. Stephenson: The same.

Mr. Walter: You want to be understood as saying in this record that your mill price for the same grade of lumber delivered to a local Santa Fe point is the same as your mill price delivered to a Kansas City Southern point?

Mr. Stephenson: We figure about the same.

Mr. Walter: About the same is different than "the same."

6915 Mr. Stephenson: I cannot give you just the figures.

Mr. Walter: Don't you know as a matter of fact you get a better price for your lumber delivered at a local Santa Fe point?

Mr. Stephenson: No, sir; I do not.

Mr. Walter: Did you make any promise to the Santa Fe before they came to your place?

Mr. Stephenson: No, sir.

Mr. Walter: Did they buy anything from you?

Mr. Stephenson: Yes, sir.

Mr. Walter: How much?

Mr. Stephenson: I don't know the amount, but whenever we can get a bill in, price and all being equal.

Mr. Walter: When they were buying lumber rather freely did you not sell them a bit of lumber?

Mr. Stephenson: We have sold them quite a bit in the last few years and would sell them more if we could.

Mr. Walter: That price is satisfactory to you?

Mr. Stephenson: Yes, sir. I will not — that either, because it has not been satisfactory for the last two or three years.

Mr. Walter: You take the empty cars from the Santa Fe at what point?

6916 Mr. Stephenson: At Ikes.

Mr. Walter: Are you a member of the per diem association?

Mr. Stephenson: No, sir.

Mr. Walter: Do you pay per diem on these cars?

Mr. Stephenson: No.

Mr. Walter: Do you pay demurrage?

Mr. Stephenson: No.

Mr. Walter: Regardless of the time you keep them on there you do not pay demurrage?

Mr. Stephenson: We have not paid any yet, no, sir.

Mr. Walter: You sometimes keep the cars there several days without paying demurrage?

Mr. Stephenson: Sometimes they are at Ikes Station for several days on the Santa Fe.

Mr. Walter: Don't they wait at Ludington sometimes?

Mr. Stephenson: Sometimes, yes, sir.

Mr. Walter: A week or so.

Mr. Stephenson: I don't think that they have that long.

Mr. Walter: Three or four days?

Mr. Stephenson: Well, they might.

Mr. Walter: The Santa Fe making no charge for the time you keep those cars?

6917 Mr. Stephenson: No, sir; not that I know of.

Mr. Walter: How long ago was it you were getting these divisions?

Mr. Stephenson: In the latter part of 1907, I believe.
Mr. Walter: What was the amount of your division?
Mr. Stephenson: If I remember correctly it was 1 to 3 cents.
Mr. Walter: Now that was not any too much, was it?
Mr. Stephenson: I don't know anything about it.
Mr. Walter: You have an idea about it. Was that too much?
Mr. Stephenson: No, I don't know as it was.
Mr. Walter: A reasonable amount?
Mr. Stephenson: A reasonable amount I believe.
Mr. Walter: Have you anything to do with the sale of lumber?
Mr. Stephenson: Very little.
Mr. Walter: Then when you answer as to the price received on the Santa Fe as compared with other points you are not definitely informed upon that.
Mr. Stephenson: I may not be.
Mr. Walter: Why didn't you incorporate?
Mr. Stephenson: It was the opinion of our attorneys it was not according to law.
6918 Mr. Walter: To incorporate according to law was not according to law?
Mr. Stephenson: No, sir; it was a saw mill proposition.
Mr. Walter: If it was a saw mill proposition why did you accept divisions?
Mr. Stephenson: Well, that is the reason they stopped it.
Mr. Marble: I thought that question was objected to.
Mr. Coleman: I think it is objectionable.
Mr. Walter: What other reason was there why you were not incorporated?
Mr. Stephenson: No other that I know of.
Mr. Walter: Was the mere incorporation of your railroad what your attorney said was unlawful?
Mr. Stephenson: I don't know just how he fixed it. He said——
Mr. Walter: Just what did he say?
Mr. Cowan: Give the witness a chance to answer.
Mr. Stephenson: According to his opinion as attorney it was nothing but a logging road in connection with the mill.
Mr. Walter: And could not be incorporated?
Mr. Stephenson: That was his opinion of it.
Mr. Walter: Did he give you any opinion as to whether when you were incorporated as in the manner you were doing business
6919 you would be entitled to a division of the rates?
Mr. Stephenson: He did not.
Mr. Walter: So that his opinion was entirely upon the question whether there was any right to incorporate?
Mr. Stephenson: Yes.
Mr. Walter: Are you connected with any other railroad?
Mr. Stephenson: No, sir.
Mr. Walter: Have you any interest in a railroad in Michigan or in the north?
Mr. Stephenson: No.
Mr. Walter: None whatever?

Mr. Stephenson: No.

Mr. Walter: Has your lumber company?

Mr. Stephenson: No.

Mr. Walter: Is there not a very great need for an east and west line in Louisiana.

Mr. Stephenson: Yes, sir; I believe there is: somewheres north of us would be a good thing I think.

Mr. Walter: Don't you think that speaking by *and* large these short lines serve a great purpose in developing in that they afford existing links which when completed make a through line?

6920 Mr. Stephenson: Well, that is a question of the district they are in.

Mr. Walter: Is that the only answer you can give?

Mr. Stephenson: That is the only one I would give.

6921 Mr. Walter: In your own territory there what do you say to that question?

Mr. Stephenson: What is the question?

Mr. Walter: As to whether these existing short lines do not form available lines of railroad, which, when the links are bridged, give transportation across a wide area of country that otherwise would be without it?

Mr. Stephenson: I don't know of any of them.

Mr. Walter: Don't know of any of these lines that have been absorbed and become parts of systems?

Mr. Stephenson: Not that I know of.

Mr. Walter: How long have you been down in Louisiana?

Mr. Stephenson: Since 1903.

Mr. Walter: You have lumbered a good deal in the north, have you not?

Mr. Stephenson: Yes, sir.

Mr. Walter: Is that your experience there?

Mr. Stephenson: Up there we did not use logging roads.

Mr. Walter: How do you log up there?

Mr. Stephenson: Horses and sleds in the winter.

Mr. Walter: A good deal of that timber is away from the main line, is it not?

6922 Mr. Stephenson: Yes, sir.

Mr. Walter: How do you get to a railroad?

Mr. Stephenson: You don't get in. You go down the river in open times.

Mr. Andrews: I do not want to consume any time objecting, but it seems to me that is certainly not the subject of inquiry here.

Mr. Walter: It is probably a little bit afield, but I thought we might see whether a railroad was absolutely essential to the development of the lumber industry.

Mr. Marble: Why can we not stipulate that?

Mr. Coleman: That is our contention.

Mr. Marble: Why can we not stipulate that it is essential?

Mr. Walter: Would you be willing to stipulate that?

Mr. Marble: Certainly.

Mr. Walter: That in that country or in the lumber interests generally, that the lumber interests are not required to have a railroad?

Mr. Marble: I thought you said——

Mr. Walter: That it is not a part of the plant facility.

Mr. Marble: I will ask the reporter to read the suggestion Mr. Walter made. That is what I was willing to stipulate.

6923 Mr. Walter: I will ask you whether in Wisconsin the main line roads build these up to the mills and operate them.

Mr. Stephenson: In some places I believe they do.

Mr. Cowan: You can find out from me. I have been fishing up all over that country and find they have been taken up since the timber has been taken out.

Mr. Coleman: I can testify to that.

Mr. Cowan: You were made to say a few minutes ago in the form of question and answer——

Mr. Walter: I object to that. Mr. Stephenson knows I did not intend to make him say anything——

Mr. Cowan: That the sole reason for not incorporating was the mere matter of the opinion of your attorney that the matter of incorporation itself would be illegal, which leads me to ask the question where you got your advice?

Mr. Stephenson: Where?

Mr. Cowan: Yes.

Mr. Stephenson: Our attorneys at Milwaukee.

Mr. Cowan: And that was in the form of a letter?

Mr. Stephenson: No, sir; in the form of a conversation.

Mr. Cowan: What other object of incorporation could there have been except to get divisions?

6924 Mr. Stephenson: Well, that is the only one we knew of. In fact, we did not know of the division being made, or so much of it, when we took it up with them, and they said it was a logging proposition as they figured it, and not a railroad proposition, and until the——

Mr. Cowan: What did he advise you about your right to divisions?

Mr. Stephenson: He advised me to take it up with the Interstate Commerce Commission and let them give me a ruling whether we were entitled to the division or not, if we should incorporate.

Mr. Cowan: And if the Commission holds you are entitled to it, you will incorporate?

Mr. Stephenson: We will incorporate.

Mr. Cowan: And otherwise not?

Mr. Stephenson: And otherwise not.

Mr. Cowan: You said the Santa Fe had not charged you any demurrage on cars, and in view of the fact that the tariffs provide demurrage rules, and that would be a violation of law if they did not——

Mr. Stephenson: Not that I know of, I said.

Mr. Cowan: I wondered if you knew whether they make a

6925 demurrage charge which goes along with the freight charges.

Mr. Stephenson: Not that I know of, I said.

Mr. Cowan: You do not mean to be understood that they do not charge you demurrage where you hold a car off their line?

Mr. Stephenson: Not that I know of, I said.

Mr. Walter: But you were right in your answer, were you not, that the only opinion that your lawyer gave you was as to the legality of incorporating?

Mr. Stephenson: That is what I stated.

Mr. Cowan: I don't understand that.

Mr. Coleman: That is not so.

Mr. Cowan: He came back and he said he told him if the Interstate Commerce Commission——

Mr. Marble: What possible difference can it make? This lawyer has not qualified as learned in the law, and we do not know who it was.

Mr. Walter: That would not be a violent assumption.

Mr. Marble: But it would not be a statement of fact, and it would be going afield from the purposes of this inquiry anyway. The lawyer might have been mistaken and might have advised him he could legally take a rebate.

Mr. Coleman: Mr. Walter is trying to get him to say that
6926 it would be illegal to incorporate rather than illegal to receive a division.

Mr. Marble: I do not think Mr. Walter is trying to make him say anything.

Mr. Walter: Not at all.

Mr. Coleman: If it is going to go in, it should be put in right.

Mr. Walter: The witness stated it right.

Mr. Cowan: What do you say he said about it?

Mr. Walter: I am not saying anything.

Examiner Burchmore: I think we have gone far enough with the question. The witness has answered it four or five times.

Mr. Cowan: I want to move to strike out Mr. Walter's last question and the answer to it, wherein he repeated that the lawyer had not told the witness anything other than it was unlawful to incorporate, and the witness had previously said, in answer to my question, that the only purpose of incorporating was to get the divisions, and that it was the division that would be unlawful, and if he put it up to the Interstate Commerce Commission and they allowed it, he would incorporate. We understand that that is the testi-
6927 mony. I will waive going any farther.

Mr. Walter: You are not answering the question——

Examiner Burchmore: We will not go any farther on that question.

Mr. Cowan: I have no questions.

(Witness excused.)

JOSEPH MUTH was called as a witness, and having been duly sworn, testified as follows:

Mr. Cowan: You have stated your name?
Mr. Muth: Yes.
Mr. Cowan: Where do you reside?
Mr. Muth: At Elizabeth, Louisiana.
Mr. Cowan: What part of the state is that?
Mr. Muth: That is in the southwestern portion.
Mr. Cowan: On what railroad?
Mr. Muth: The Santa Fe.
Mr. Cowan: Is that the line that runs through De Ridder?
Mr. Muth: Yes, sir.
Mr. Cowan: How far are you from De Ridder?
Mr. Muth: About thirty miles.
Mr. Cowan: Which direction?
6928 Mr. Muth: East.
Mr. Cowan: What business are you engaged in there?
Mr. Muth: The manufacture of lumber.
Mr. Cowan: What is your relation to the company?
Mr. Muth: I am the auditor.
Mr. Cowan: Auditor of the company?
Mr. Muth: Yes.
Mr. Cowan: What is the name of the company?
Mr. Muth: The Industrial Lumber Company.
Mr. Cowan: Now, what is the location of your mill or mills?
Mr. Muth: Well, we have three mills. One is located at Elizabeth on the line of the Santa Fe Railroad; another one is located at Oakdale, on the Missouri Pacific and the Santa Fe, and the other one is about two miles southwest of Oakdale on our own line.
Mr. Cowan: Taking up the mill at Elizabeth; what is its capacity?
Mr. Muth: It is about to run night and day, but we only operate it one shift now, and the capacity is approximately 175,000 feet for a ten hour run.
Mr. Cowan: How do you get the logs to the mill?
6929 Mr. Muth: We haul them in over a tram road.
Mr. Cowan: How far does that tram road run from the mill?
Mr. Muth: Well, it connects Oakdale with Elizabeth by a roundabout route.
Mr. Cowan: That is, your tram road does?
Mr. Muth: Yes.
Mr. Cowan: What distance is that?
Mr. Muth: Thirty miles, approximately.
Mr. Cowan: Does that run through your forests?
Mr. Muth: Yes, sir.
Mr. Cowan: And you get your logs by laterals thrown out from that called logging spurs?
Mr. Muth: Yes, sir.
Mr. Cowan: What is the class of this road?
Mr. Muth: It is a fairly good tram road; it is a comparatively

flat country and not much grading necessary. It is 35 pound steel mostly.

Mr. Cowan: What equipment have you got on that line?

Mr. Muth: We have 116 cars.

Mr. Cowan: Logging cars?

Mr. Muth: Yes, sir. They are not all logging cars. Of those, seven are flat cars, and we have seven locomotives and a
6930 motor car besides the usual logging equipment such as steam loaders and skidders.

Mr. Cowan: How many locomotives did you say?

Mr. Muth: Seven.

Mr. Cowan: Is that road used for logging the mill at Oakdale?

Mr. Muth: Yes, sir.

Mr. Cowan: Is it used for logging the mill south of Oakdale?

Mr. Muth: Yes, sir.

Mr. Cowan: Does it run through any other forest than yours?

Mr. Muth: No. There is some land along or near the line which we do not own, but most of it is our land.

Mr. Cowan: Do you parallel the Santa Fe?

Mr. Muth: We do not parallel it. We make a curve around it. The Santa Fe runs between Elizabeth and Oakdale, and we go between the same points, but their line is only about nine miles, while ours is thirty miles long.

Mr. Cowan: You make a horseshoe out into the forest?

Mr. Muth: Yes, sir.

Mr. Cowan: What other railroad have you beside that?

Mr. Muth: We have at Oakdale the Missouri Pacific.

6931 Mr. Cowan: No, I mean what other tram road in connection with your mill?

Mr. Muth: We have no other tram road.

Mr. Cowan: Then go ahead with what you were going to say about the Missouri Pacific.

Mr. Muth: We have at Oakdale the Missouri Pacific, formerly the St. Louis, Watkins & Gulf, and the Santa Fe, and at Elizabeth the Santa Fe only.

Mr. Cowan: Do you use any of these roads under any trackage rights?

Mr. Muth: No, we do not.

Mr. Cowan: Have you a special tram road in addition to this for any of your other mills?

Mr. Muth: No, sir.

Mr. Cowan: What is the capacity of your mill at Oakdale?

Mr. Muth: They are approximately 85,000 apiece, board measure.

Mr. Cowan: Two of them there?

Mr. Muth: Yes, sir. Well, at Oakdale and South Oakdale.

Mr. Cowan: You are counting those as the two mills?

Mr. Muth: Yes.

Mr. Cowan: What do you do with the lumber output at
6932 Elizabeth?

Mr. Muth: We sell it.

Mr. Cowan: How do you get it to the railroad?

Mr. *Cowan:* The mill is located immediately on the Santa Fe railroad.

Mr. Cowan: Do you perform any service in regard to handling the cars between the Santa Fe and your mill?

Mr. Muth: Not at Elizabeth; we do not. We do at Oakdale and at the Calcasieu mill, as we call it.

Mr. Cowan: Does all of the lumber manufactured at the Elizabeth mill go out over the Santa Fe?

Mr. Muth: Yes, sir, it has to.

Mr. Cowan: Does all the lumber manufactured at Oakdale go out over the Santa Fe?

Mr. Muth: No.

Mr. Cowan: How is that divided?

Mr. Muth: The larger portion of it goes Santa Fe, but then considerable of it goes Missouri Pacific.

Mr. Cowan: Your rate is the same on both to the same points?

Mr. Muth: Not always.

Mr. Cowan: Well, generally speaking, say you were ship-
6933 ping to——

Mr. Muth: The Missouri Pacific does not generally make rates to Santa Fe local points, of course, and vice versa.

Mr. Cowan: Nor the Santa Fe to the Missouri Pacific local points?

Mr. Muth: No.

Mr. Cowan: But to all competitive points the rates are the same?

Mr. Muth: The rates are usually the same; yes, sir.

Mr. Cowan: How do you get your lumber from the Oakdale mill to the railroad?

Mr. Muth: We take the empty cars from the Santa Fe interchange track and put them on our loading tracks at the mill and load them and then set them back loaded with lumber on the Santa Fe interchange track.

Mr. Cowan: How far is that, about?

Mr. Muth: It is only a short distance for the Oakdale mill, but it is approximately a mile and a half the way we carry it at the Calcasieu mill.

Mr. Cowan: You own that track?

Mr. Muth: Yes, sir.

Mr. Cowan: What does it cost you for the operation of
6934 this logging road?

Mr. Muth: What do you mean?

Mr. Cowan: I mean the road between Elizabeth and Oakdale; have you any figures on the unit cost per ton or per car or otherwise to show what the expenses of the railroad operations are?

Mr. Muth: The cost of operation of the main line and the maintenance of the tram road for the year, per thousand feet of logs, was 71½ cents per thousand last year.

Mr. Cowan: That applies to the logs going to all the mills?

Mr. Muth: Yes, average cost.

Mr. Cowan: What would be about your average haul of logs, do you think?

Mr. Muth: Approximately fifteen miles on the main line.

Mr. Cowan: Does that expense include the logging on the log spurs or just the main line?

Mr. Muth: Just the main line.

Mr. Cowan: What is the name of this railroad?

Mr. Muth: It is not named. We call it the tram road.

Mr. Cowan: What is the aggregate of the investment in your railroad and equipment serving these mills?

6935 Mr. Muth: Our tram road account shows a net investment of $223,988.77. That includes the road and logging equipment.

Mr. Cowan: Road and logging equipment?

Mr. Muth: Yes, sir.

Mr. Cowan: Well, it includes all equipment you have given a list of?

Mr. Muth: Yes, sir.

Mr. Cowan: And the loaders and skidders and log spurs?

Mr. Muth: Well——

Mr. Garwood: I think we are going now into the very field where we were told to keep out; that is, the cost of equipment. Is not a skidder pretty much part of the mill, as well as anything else?

Mr. Cowan: Well, leave out skidders, just to save time, but I never saw so much quibbling about a small thing.

Mr. Muth: Do you want the separate items of the investment?

Mr. Cowan: No, the aggregate investment in your railroad you have already given.

Mr. Muth: Yes.

Mr. Cowan: That is sufficient for my purpose. How long have you been operating?

6936 Mr. Muth: Well, I think we commenced operating there about 1898 or 1899.

Mr. Cowan: Do you pay attention to the sales end of the business?

Mr. Muth: No.

Mr. Cowan: Have you any table or list showing the different states in which you market your lumber and the respective amounts in each?

Mr. Muth: I do not think we have. I do not think our record has been kept so we could give it very readily.

Mr. Cowan: Generally to what states do you send your shipments?

Mr. Muth: We sell in the Middle West very largely, Texas, some east of the river points, Mexico, and we export some.

Mr. Cowan: Somewhat similar to the market that is reached by your competitors in the same locality?

Mr. Muth: Yes, sir, very similar.

Mr. Cowan: Is there any other fact in connection with the case and your operations there that you want to speak of?

Mr. Muth: Not that I know of particularly.

Mr. Cowan: That is all.

6937 Cross-examination:

Mr. Walter: From whom did the Industrial Lumber Company buy its timber land?

Mr. Muth: A great many different people.

Mr. Walter: Did they buy any large amount from anyone?

Mr. Muth: Yes, sir, they bought a good many thousand acres from the Calcasieu River Lumber Company, and a good many more from the Wright-Blodgett Company.

Mr. Walter: In what name is the title to those lands? The Southwestern Land and Lumber Company?

Mr. Muth: The particular lands I am speaking of are in the name of the Industrial Lumber Company.

Mr. Walter: There are large bodies there in the name of the Southwestern Lumber Company, are there not?

Mr. Walter: That has been referred to in their records, I think, sufficiently. I have no more questions.

Mr. Garwood: I think all that was gone into perhaps in the original case.

Mr. Cowan: It was, and Mr. Muth——

Mr. Muth: I think that entire contract is in the record in the Star Grain and Lumber Case, at least it was so said to me in another hearing.

6938 Mr. Walter: You were there in about 1898 or 1899?

Mr. Muth: Yes, sir.

Mr. Walter: Was the Santa Fe there then?

Mr. Muth: No.

Mr. Walter: When did the Santa Fe come into the territory?

Mr. Muth: I don't think it commenced to operate to Oakdale until the latter part of 1907.

Mr. Walter: Do you know whether there is any arrangement made with the Santa Fe, to furnish most of the tonnage to the Santa Fe?

Mr. Muth: Made with the Santa Fe to furnish most of our tonnage?

Mr. Walter: Yes.

Mr. Muth: I think there is; yes, sir.

Mr. Walter: Does the Santa Fe take any cars from your mill loaded and turn them over at Oakdale to the Missouri Pacific?

Mr. Muth: Yes, sir—which mill do you mean?

Mr. Walter: Either one of them.

Mr. Muth: The Elizabeth mill and the Calcasieu mill; yes, sir.

Mr. Walter: Is the Calcasieu mill on the Santa Fe only or

6939 on the Missouri Pacific as well?

Mr. Muth: It is on our line only, and the Santa Fe is nearest, and they have a station called Calcasieu between Elizabeth and Oakdale.

Mr. Walter: How far is it from Oakdale?

Mr. Muth: Two miles.

Mr. Walter: On that the Santa Fe gets its division, does it not-

Mr. Muth: I don't know.

Mr. Walter: Do you pay any switching charge on it?

Mr. Muth: No; we forward it on the through rate.

Mr. Walter: So if the Santa Fe gets paid, it must come out of the through rate?

Mr. Muth: I should judge so.

Mr. Walter: For a two-mile haul?

Mr. Muth: Yes, sir.

Mr. Walter: Is that true of the Oakdale mill; does the Santa Fe turn over any cars loaded at the Oakdale mill and give them to the Iron Mountain?

Mr. Muth: We do not ship anything from this mill to the Iron Mountain, because there are no rates in effect.

Mr. Walter: No rates in effect?

6940 Mr. Muth: Not via the Santa Fe. If such a car were routed, it would be given to the Iron Mountain direct at Oakdale.

Mr. Walter: Do you have any logs hauled from the main line of the Santa Fe through Elizabeth to Oakdale.

Mr. Muth: No.

Mr. Walter: Any logs hauled at all on either of these main lines for your line?

Mr. Muth: No.

Mr. Walter: None at all?

Mr. Muth: I think there was a little storm timber maybe—I do not know, but I understood there was possibly half a million feet of storm timber which was hauled a year ago.

Mr. Walter: How were those logs paid for?

Mr. Muth: I don't know.

Mr. Walter: You don't know about that?

Mr. Muth: No, I think they were paid for by the Santa Fe, though.

Mr. Walter: All you know is in regard to the accounts of this lumber company?

Mr. Muth: Not entirely.

Mr. Walter: Do you go out and see the operation in any 6941 way?

Mr. Muth: Yes, sir.

Mr. Walter: What do you do in the way of looking after the operation?

Mr. Muth: I have no specific duties in that regard, but have kind of a general supervision.

Mr. Walter: Are there any other mills out on your line than your own?

Mr. Muth: No.

Mr. Walter: Anybody ships from there?

Mr. Muth: No.

Mr. Walter: Has anybody wanted to ship from out there?

Mr. Muth: No.

Mr. Walter: You do not haul anything for anybody except for the lumber company?

Mr. Muth: Directly or indirectly? There is a company store out at our logging camp.

Mr. Walter: Do you haul that material?
Mr. Muth: Yes.
Mr. Walter: Get any revenue from it?
Mr. Muth: No.
Mr. Walter: Do you haul anything for which you get revenue?
6942 Mr. Muth: From the Producers Turpentine Company, an affiliated corporation, we do; yes, sir.
Mr. Walter: What do you get for hauling that?
Mr. Muth: $5.00 a car.
Mr. Walter: Where do you haul that to?
Mr. Muth: Any point along the tram line where their turpentine is.
Mr. Walter: To what point?
Mr. Muth: Elizabeth.
Mr. Walter: Is it handled in tank cars?
Mr. Muth: No, on flat cars; barrels of crude gum.
Mr. Walter: Do you haul for anybody else any of that material?
Mr. Muth: No.
Mr. Walter: Has anybody else asked you to haul anything which you have refused to haul?
Mr. Muth: No.
Mr. Walter: Did you ever receive any divisions?
Mr. Muth: No.
Mr. Walter: You are not incorporated?
Mr. Muth: Not separately.
Mr. Walter: Just a nameless railroad?
6943 Mr. Muth: Yes, sir; merely a tram road.
Mr. Walter: What percentage of your business goes Santa Fe and what Iron Mountain?
Mr. Muth: I could not tell you exactly. The larger per cent goes Santa Fe.
Mr. Walter: A good deal larger percentage?
Mr. Muth: A good deal larger percentage.
Mr. Walter: Practically all of it?
Mr. Muth: No, not practically all.
Mr. Walter: Would you say 75 per cent?
Mr. Muth: I should say at least that much.
Mr. Walter: Is it as much as 90 per cent?
Mr. Muth: I should not think so.
Mr. Walter: Somewhere between 75 and 90?
Mr. Muth: Somewhere between 75 and 90.
Mr. Walter: Do you use the main line of the Santa Fe?
Mr. Muth: No.
Mr. Walter: Does the Santa Fe use your main line?
Mr. Muth: No.
Mr. Walter: You were able to give us the cost of operation on your main line only?
Mr. Muth: Yes.
6944 Mr. Walter: How do you get those figures?
Mr. Muth: The reason we can do that is because the

tram line main line runs between Oakdale and Elizabeth, and the main line engines do not leave the main line. The logs are sawed in the woods and skidded and loaded and brought to the junction point of the logging road with the main line, and trains are there made up and carried to the different mills by the main line engines.

Mr. Walter: You took for this $223,000 your main line engines with a train load of empty logging cars down to your junction with your spur?

Mr Muth: Yes, sir.

Mr. Walter: Leaving these cars there and taking up a load of loaded cars?

Mr. Muth: Yes, sir.

Mr. Walter: Now, then, the operation for that for how long a time was $223,000?

Mr. Muth: $223,000 was not the operating cost. That was the investment.

Mr. Walter: You said 71½ cents was the cost per thousand feet.

Mr. Muth: Per thousand feet of logs.

6945 Mr. Walter: For hauling over that main line?

Mr. Muth: Yes, sir.

Mr. Walter: How did you get that?

Mr. Muth: Well, we took the cost of keeping up the main line of road, and the cost of maintaining the logging cars and the cost of maintaining the main line engines and cost of paying the main line engine crews, brakemen and so forth, and added it al- together and divided by the number of logs hauled, and that is the answer.

Mr. Walter: You maintain those logging cars?

Mr. Muth: Yes, sir.

Mr. Walter: Those logging cars went off your main line into the spurs?

Mr. Muth: Yes, sir.

Mr. Walter: That is a much harder service on the spurs than on the main line, is it not?

Mr. Muth: Possibly so.

Mr. Walter: You made no allowance, then, for spur usage?

Mr. Muth: We did not make any allowance for spur wear and tear on the logging cars, because we did not — how to differentiate it.

Mr. Walter: Did you allow anything for depreciation?

6946 Mr. Muth: Not on those figures.

Mr. Walter: Would not that make some change?

Mr. Muth: It would add to the cost; yes, sir.

Mr. Walter: Would it add very much?

Mr. Muth: About eight per cent, I should judge.

Mr. Walter: Eight per cent on the investment, $223,000?

Mr. Muth: Well, possibly so, yes, sir.

Mr. Walter: How many thousand feet did you haul?

Mr. Muth: Approximately 63,000,000.

Mr. Walter: 63,000,000?

Mr. Muth: Log scale.

Mr. Walter: That would be 63,000 thousands.

Mr. Muth: Yes, sir.

Mr. Walter: And that eight per cent on the $223,000 would be about $17,000?

Mr. Muth: Yes, sir.

Mr. Walter: Now, 63,000 into that would give you about in the neighborhood of thirty cents, would it not, to be added to the cost?

Mr. Muth: Yes, a little less than thirty cents.

Mr. Walter: So it costs you about one dollar to haul on the main line?

6947 Mr. Muth: Of course our depreciation was figured on an estimated basis. We do deduct approximately eight per cent depreciation, but the $223,000 is not all main line, it covers the skidders, loaders and laterals in the woods and spurs in the woods, so you must not take it all from main line operation.

Mr. Walter: Would you say 25 per cent of that investment was in spurs and in engines used on the spurs?

Mr. Muth: I would have to figure that before I could say what it was.

Mr. Walter: Now, you have 71½ cents cost for hauling your lumber out per thousand?

Mr. Muth: Hauling the logs in.

Mr. Walter: How much of a haul do you make on the finished lumber?

Mr. Muth: We do not make any at Elizabeth. We make a few hundred yards at Oakdale and maybe a mile and a half at Calcasieu.

Mr. Walter: Is that counted at all into this logging cost?

Mr. Muth: No.

Mr. Walter: That would still further add to the cost of delivering to the trunk line?

6948 Mr. Muth: Yes, sir, but it had nothing to do with the logs.

Mr. Walter: But in taking from the spur and carrying the rough material through the mill and the lumber out, it would add rather materially to the cost per thousand of lumber?

Mr. Muth: It is a cost of manufacture of lumber, yes, sir, and we charge it to our aggregate expense.

Mr. Walter: You say it is an item of cost of manufacture?

Mr. Muth: In our opinion; yes, sir, in our accounts it is.

Mr. Walter: The way you keep your accounts?

Mr. Muth: The way we keep our accounts.

Mr. Walter: What difference does it make whether you count it manufacture or transportation, if the Santa Fe comes into the mill and takes the lumber out, then would you say it is a transportation haul?

Mr. Muth: At our Oakdale and Calcasieu mills they are somewhat differently situated than most mills. We have two mills there very nearly together and we have two lumber yards and we sell from them as a unit, and consequently we keep a switch engine there and load half a car at one mill and carry it up to the other and finish loading, and when we finish loading we hand it to the other, and the extra switch expense on that account is little or nothing. We have to maintain the switch engine anyway.

6949 Mr. Walter: That is not part of the manufacture, is it?

Mr. Muth: Yes, sir.

Mr. Walter: Delivering it to the Iron Mountain or Santa Fe you think is part of the manufacturing?

Mr. Muth: In our particular case I think it is, yes, sir.

Mr. Walter: What about this two mile haul?

Mr. Muth: The two mile haul of course at the mill would not be a part of it.

Mr. Walter: That would be a transportation haul?

Mr. Muth: Yes.

Mr. Walter: Are you a member of the Per Diem Association?

Mr. Muth: No.

Mr. Walter: Do you pay demurrage on cars?

Mr. Muth: We have not had to, because we do not hold them too long.

Mr. Walter: How long do you hold them?

Mr. Muth: Not more than 48 hours, except at Oakdale, where we do our own switching. We used to hold them 72 hours, but since that has been cancelled we only hold them 48 hours.

Mr. Walter: Do you have any bills for demurrage?

Mr. Muth: We have paid some demurrage; yes, sir.

Mr. Walter: You pay those bills, of course?

6950 Mr. Muth: Yes.

Mr. Garwood: Did I understand you to say that you were under contract obligations with the Santa Fe to deliver some portion of your tonnage to them?

Mr. Muth: No specified proportion, no.

Mr. Garwood: Are you — any contract obligations to deliver tonnage to them?

Mr. Muth: As I remember it, we are under obligations to deliver them the tonnage from those mills where the rates are equal.

Mr. Garwood: Where the rates are equal?

Mr. Muth: Yes, sir.

Mr. Garwood: Is it all the tonnage when the rates are equal or some specified proportion?

Mr. Muth: I don't remember the exact wording of the contract in that regard but——

Mr. Garwood: Have you the contract?

Mr. Muth: No, I think it is part of the record, though.

Mr. Garwood: Is it on file with the Commission?

Mr. Muth: I think it is part of the record in this same case.

Mr. Garwood: How is that, gentlemen?

6951 Mr. Coleman: That is in the Star Grain case.

Mr. Cowan: They all say it is; I do not know.

Mr. Garwood: If it is not in the record you will of course be glad to produce it?

Mr. Muth: Yes, sir.

Mr. Garwood: At the time the Santa Fe built in there, state whether or not it is a fact that your company took up or at least did not use a portion of its track that was practically parallel to the Santa Fe.

Mr. Muth: No, sir; we did not take up anything. We built eleven miles additional.

Mr. Garwood: Eleven miles additional?

Mr. Muth: Yes, sir.

Mr. Garwood: Do you use all of the track now that was there before the Santa Fe came in there?

Mr. Muth: Yes, sir.

Mr. Garwood: You do use part of the main line track of the Santa Fe?

Mr. Muth: No, only if we go on their tracks at Oakdale.

Mr. Garwood: I was under the impression, I may be wrong, I think I got it from some of these former hearings, and I wanted to see if it was correct, that you had a trackage contract of some
6952 character with the Santa Fe. Is that true?

Mr. Muth: I believe that is in the contract; yes, sir.

Mr. Garwood: Now, what does that trackage contract cover?

Mr. Muth: I think it permits us to use the main line of the Santa Fe at a trackage charge of fifty cents per thousand feet for logs.

Mr. Garwood: What part of the main line of the Santa Fe would you have occasion to use?

Mr. Muth: I could not tell you. Our present operations do not make it advantageous to use any part of it, and we probably will not for some years to come.

Mr. Garwood: Have you used any of it in the past is what I want to ascertain.

Mr. Muth: No, with the exception of that little storm timber I was telling you about, which was just an emergency.

Mr. Garwood: And the price is fifty cents a thousand feet?

Mr. Muth: Yes, sir.

Mr. Garwood: Logs?

Mr. Muth: Yes, sir.

Mr. Garwood: That is all.

Mr. Cowan: As you have gone into the matter of the trackage contract, I would inquire if there was some provision in the
6953 contract about taking up track. Judge Garwood asked you if you took up any.

Mr. Muth: We did not.

Mr. Cowan: There was some provision about taking up your track after the Santa Fe built in there?

Mr. Muth: I believe there was some provision we were to take up our then existing tram roads.

Mr. Cowan: But that never was insisted on and never was done?

Mr. Muth: Nothing was done and it was not spoken of.

Mr. Walter: Why was it put in the contract?

Mr. Muth: I am sure I cannot tell you.

Mr. Cowan: That is all.

(Witness excused.)

Examiner Burchmore: Have you any further witnesses?

Mr. Cowan: I have not any further witnesses here that we think would elucidate the case, or any particular point in the case that it

would be worth while to put on the witness stand. The intervenors asked the Commission at St. Louis to ask certain of the railroad officials to appear for examination, and at that time it was my intention to examine some of the traffic men with regard to the
6954 manner in which the system of rates on lumber in this territory and elsewhere in the United States had been made. My information is, however, that that has frequently been put before the Commission in the various investigations. I also wanted to call on the traffic managers to present the division sheets other than those applying in the district where the lumber is produced, so we might know what the range of the divisions was on lines reaching the lumber fields and then connecting with other lines which deliver the lumber to points of destination. I am informed that most of that has been presented to the Commission.

I want in that connection now to make the inquiry if the Commission has called for the division sheets in such a case. I suppose the railroads are not required to file division sheets except where the Commission may require them, and if that is known, I would like the information. Some of you gentlemen may know.

Examiner Burchmore: It is not customary for carriers to file division sheets.

Mr. Cowan: I know it is not, but I wondered if the Commission had called for them with respect to this traffic.

Examiner Burchmore: With respect to joint rates on lum-
6955 ber out of the southwest?

Mr. Cowan: With respect to divisions——

Examiner Burchmore: I think we have all the division sheets which apply over all these short line railroads.

Mr. Cowan: I understand that, but I am talking about division sheets when you get beyond that, what the delivering carriers and intermediate carriers get.

Examiner Burchmore: I think the same sheets show what all the carriers get, do they not?

Mr. Cowan: I do not think so. No doubt it does in some cases, and wherein it does not, if there are such cases, I wish to inquire of the Examiner if the Commission will ask for the filing of such division sheets as we may want in that matter without calling on any witness to produce them.

Examiner Burchmore: Can you file a specific request for certain classes of division sheets?

Mr. Cowan: I can, if that will serve the purpose. I am trying to shorten the hearing and not have to call witnesses to prove that situation, and call on them for division sheets. I suppose that will be called for if we request it. It is only with that understanding that I want to announce that we are through with our testimony.
6956 I suppose the trunk lines will be willing to furnish them. I do not know who are present—Mr. Jeffery, you will be willing to furnish them?

Mr. Jeffery: It is always a pretty large task to get up these division sheets; they have to be copied and we do not have them in printed form, but if it will help the case any and throw any light on the

contention of the intervenors or tap lines, we will be glad to do it. I cannot see myself how it will help the case, for this reason——

Mr. Cowan: We will not argue it now, but I will ask if you are willing to do it?

Mr. Jeffery: Then I will say briefly that I am not willing to do it. I would like to suggest that the divisions of these things very often do not help. At least five different times I have filed the divisions as to what we pay the short lines, but as to what we pay the long lines I do not think it will help any.

Examiner Burchmore: You will not need all the division sheets, will you, Judge Cowan? Certain representative ones will do?

Mr. Cowan: Why limit it? They are little documents that they all have printed.

Mr. Jeffery: What purpose do you want them for? What do you want to show by them? Maybe we will admit it.

6957 Mr. Cowan: I want to show how much each road gets to the point it is delivered, in order to show how much they get from the point where the lumber starts until it gets to that point, and I want to show as to each particular road, and I have no doubt the Commission will order them filed.

Examiner Burchmore: I will be glad to call it to the attention of the Commission——

Mr. Cowan: If the Commission did not require it, I could call a witness and ask him, but I do not think that is necessary. I am trying to avoid taking the time.

Mr. Jeffery: It is an awful job, your Honor.

Mr. Cowan: I do not think it is.

Mr. Marble: As I understand the matter, while the law is open to the interpretation that carriers should file these sheets, it has not been required by the Commission, but that upon the distinct understanding when called for they should be sent in, and in some cases to my knowledge division sheets have been secured for use when necessary, in order to determine issues before the Commission. My impression is these division sheets will be very useful, and that being my impression, my further impression is that if the request is presented through Examiner Burchmore, it will be required.

6958 But why not leave it that way, and if they should not order them, you could call your witness.

Mr. Cowan: That is precisely it. If the Commission calls for the division sheets I would not call the traffic managers whom I should otherwise call and examine.

Examiner Burchmore: Could you make that request specific now, or do you want all the division sheets, and if so, to what territories?

Mr. Cowan: I will say now that we want division sheets which apply to points in the Central Freight Association territory, in the Western Trunk Line Association territory and in the Trans-Missouri territory and to Texas and Oklahoma and New Mexico points. That will cover it.

Mr. Garwood: Is that just on lumber or everything?

Mr. Cowan: Just on lumber.

Examiner Burchmore: Yellow pine lumber or hard wood also?

Mr. Cowan: Yellow pine is all I care for.

Mr. Marble: It strikes me Judge Cowan has stated a larger request than he needs to make. The rates into C. F. A. territory in many cases break on base points, and the rates beyond the basing points would not be of interest in this inquiry. It is the division of
6959 the rates to which the tap line is a party that I think is important.

Mr. Cowan: That is what I am talking of, the joint rates.

Examiner Burchmore: And it will not be necessary to file such sheets as have already been filed.

Mr. Walter: We do not think it should be limited to the tap lines only. We think the Santa Fe division sheets will throw a little light.

Mr. Cowan: That is right; I am not exempting them. That means all trunk lines parties to this case, their divisions with other roads on through rates from originating territory to the points of delivery. I do not think it will be much of a job to file them.

Mr. Garwood: I would be glad if counsel could further consider the matter and get it down to as narrow a scope as will be useful to him. Of course we will be very glad to furnish him anything along that line that he desires, but I would be glad if he would limit it. I have about half a car load now of blue prints in my room upstairs, which I must insist that he take before he goes away.

Mr. Cowan: I am not through with my statement yet. I can only state one thing at a time.

Mr. Garwood: Pardon me, I thought you were through.

6960 Mr. Cowan: No, I am trying to get through the hearing this evening by seeing if I can eliminate the calling of certain witnesses, and it is all in good faith.

The requests made at New Orleans and repeated at St. Louis and again here for certain statistical information which I need not now describe—everybody knows what I mean—which Mr. Garwood has furnished; that is, he has it to furnish, for a part of this record, and which is to be furnished by the other roads, is as I stated yesterday morning, I believe, in no wise waived, and we ask it to be filed as promptly as conditions will permit by the trunk lines reaching the yellow pine territory.

Mr. Garwood: I will give it to you, Mr. Cowan.

Mr. Cowan: If it is just sent to the Commission. If you give me yours, I will simply turn it in.

Examiner Burchmore: It might be pertinent to inquire if counsel for the trunk lines present understand that their lines are preparing that information.

Mr. Cowan: I am informed in the case of the Cotton Belt that they have already sent that information to the Commission, and it is there. Mr. Dickinson asked me, intimating he is willing to
6961 furnish it, and Mr. Hughes said he was willing to furnish it, and Mr. Jeffery I believe said he was willing to furnish it for the Iron Mountain.

Mr. Jeffery: Yes; it is something we are very anxious to put in.

Mr. Cowan: And we will ask Mr. Coleman.

Mr. Coleman: The tonnage statistics?

Mr. Cowan: It is practically tonnage statistics, and the amount of lumber on which divisions are paid, and the amount on which none is paid.

Mr. Coleman: In the case of the Santa Fe, I submit the statement drawn up by our auditor, which shows the amounts paid up to the year 1907, I believe. Now, after that time——

Mr. Cowan: I think we had better have it down to date.

Mr. Coleman: That is just the point. In 1907 we no longer paid divisions to tap lines, and consequently we have no way of designating them in our way bills, you see.

Mr. Cowan: Your statement would show the absence of divisions.

Mr. J. J. Coleman: Judge Harlan accepted the statement we put in, which covered the amount of money we paid out during the time we were paying tap line divisions.

Mr. Cowan: We do not need to go back and restate that, if that is what you mean.

6962 Mr. J. J. Coleman: Now to be able to distinguish and select the lumber which came to us from the tap lines, or from the lines which we paid divisions to, as compared with some given us at a local point, we could not, for we have no means of designating it, we have no through billing. We explained it to Commissioner Harlan, and he said he thought the statement filed would be satisfactory to you, because it showed the final result.

Mr. Cowan: The point in this tonnage statement is to know how much of the tonnage is taken from mills which do not get tap line divisions from the trunk line road taking that tonnage, and how much of it comes from mills—I will use that expression—I do not mean to say the mills get the division, but you know what I mean—which do get the division. Then the aggregate amount of divisions that are paid to what we have been designating as tap lines. I can remember now those three important points in that request. There are probably some others.

6963 Mr. Jeffery: The blue prints are in there. You want the blue prints too?

Mr. Cowan: I want to get the blue print showing the connection with the main line tracks and saw mills on these respective lines. The reason I wanted that was because I was satisfied that in a majority of the cases here, or maybe not a majority, but in a good many cases, that that situation has not been shown like it would be in an engineer's office of the railroad company, because they have it in their offices with some accuracy.

Examiner Burchmore: Your requests are before the counsel and Commission.

Mr. Cowan: I would like to have those requests complied with so far as possible, and see that they are to be complied with, and if they are not, hoping that the Commission will make application to the roads to furnish the information in case they should not, we have no further examination from the trunk lines so far as we are concerned. The suggestions and requests that have been made heretofore with regard to what the Commission ought or ought not to do about calling witnesses we do not feel incumbent upon us to repeat, and with

this statement for the purpose of the record and in order that
6964 the audience may understand it, we rest our part of the case.

Mr. Wood: At this point I should like to interpose an objection in order that it may be spread upon the record along with Judge Cowan's request; an objection to the furnishing of these division sheets or a statement of the divisions as called for. I do not know of course what Mr. Marble had in mind in suggesting that he thought they would be helpful to a determination of the case. I cannot myself see how they can possibly bear upon any issue that is in the case, and that is our opinion in connection with the matter, and it involves a great deal of labor and detail and besides involves giving up information as to the internal management of the various railroad companies that are interested here and of their relations with each other in connection with a matter in which it seems to me that internal management and those relations have no possible relation to the case itself. We feel that we should interpose an objection to the request that Judge Cowan has made.

Mr. Marble: I would say simply that my idea was this: if the Commission — to decide that these short lines of railroad are altogether industrial facilities, that no division whatever should be allowed them on that account, then I do not see that the divisions would be
6965 of any assistance whatever. But if as to all of them or any of them the Commission is to decide that they are railroads entitled to switching allowances or to divisions of joint rates, then I can only speak for my own mind, that if I had to decide that question I should like to get the entire division of the joint rate out of which that division was to be made, so as to decide the reasonableness of the division.

Mr. Wood: You will understand those divisions vary, probably to the same point of destination, with respect to a great many different lines; and it is simply a matter of barter and trade between the railroads.

Mr. Marble: I understand, and there is no law governing it——

Mr. Wood: And they are no index, it seems to me of what a proper and fair division is.

Mr. Marble: I understand the weight of that testimony is open to very strong argument.

Mr. Cowan: But the same sort of differentiation arising from barter and sale applies on the divisions to the tap line.

Mr. Marble: You are going to argue the entire case if you start that.

Mr. Cowan: Then I will withdraw what I have said.

6966 Examiner Burchmore: Mr. Garwood, have you any witnesses whom you desire to introduce?

Mr. Garwood: Without reading it, your Honor, I will introduce in evidence the 13th, 14th and 15th paragraphs found on pages 103, 104, 105 and 106 of the joint and several answers of the defendants, Kirby Lumber Company and John H. Kirby, to the amended bill of complaint of the Maryland Trust Company, Trustee, Complainant, filed March 25, A. D. 1905, in the case of the Maryland Trust Company, Trustee, versus Kirby Lumber Company, and Houston Oil

Company of Texas, No. 54 in Equity, Circuit Court of the United States for the Southern District of the United States at Houston.

From the same answer I also introduce in evidence the 23d paragraph found on pages 110 and 111.

From the same answer I introduce that portion of the 35th paragraph found on pages 409 and 410, beginning at the word "that", on the first line of page 409.

I will not stop to read them at this time but will give them to the stenographer so he can spread them on the record.

Examiner Burchmore: I do not understand you desire those to be copies in the record?

Mr. Garwood: Well, that is the only copy I have got. I do
6967 not want to encumber the record with the whole of it. They are not very long.

Mr. Andrews: We interpose an objection. First, that the testimony is immaterial and irrelevant.

Second, that it is an unsworn pleading that the parties cannot be bound by.

And, third, that the substance, if not the exact language, has all been read into the record in the examination of the witness Kirby.

Mr. Coleman: On behalf of the Santa Fe I wish to interpose an objection that the Santa Fe is not a party to the proceeding and can in no way be bound by any opinions or allegations set forth in the pleading. It must be remembered that the Santa Fe Railway Company up to the time of the intervention of the intervening petitioners was the moving party in this case, and we object on the ground it is not binding upon us.

Mr. Cowan: This is the part which you had reference to yesterday or which you referred to?

Mr. Garwood: Yes, sir, largely.

Mr. Cowan: You did not refer to anything here now that you did not refer to yesterday?

Mr. Garwood: No, I think not.

Mr. Cowan: You gave certain pages.

6968 Mr. Garwood: I think it is covered.

Examiner Burchmore: The document will be received subject to the objections noted, but it cannot be copied into the record. I say that on the impression that your questions have covered it rather fully.

Mr. Garwood: Have we another copy?

Mr. Cowan: I think Mr. Hancock has a copy.

Mr. Coleman: I would like to ask if there was any paragraph of that which was not commented upon during the examination of the witness? It might save serving us with a copy of it.

Mr. Garwood: No, I think that covers whatever paragraph- are in there which refer to prior financial dealings of Mr. Kirby with the Santa Fe, which I took it from his testimony were merged into those about which he testified yesterday, and therefore I did not call attention to those other than those that I referred to by specific paragraph and page.

Mr. Coleman: Would you then object to furnishing us with one of those?

Mr. Garwood: That is the only one I have. It is subject to your inspection there.

Examiner Burchmore: You might take that book and mail us a typewritten copy of those sections.

Mr. Garwood: I will do that.

6969 Examiner Burchmore: And then you can keep the book.

Mr. Garwood: And I will be glad to give Mr. Coleman any of them he desires.

Examiner Burchmore: I take it there will be no objection to the filing of a typewritten copy?

Mr. Andrews: No, the objection goes to the form rather than to the substance. It is not even a signed copy, as far as that goes, but we do not make any objection on that ground.

Mr. Coleman: We do not waive our objection to the offer, however.

Mr. Garwood: We now ask that there be filed with the Commission a copy of the contract exhibited by Mr. Kirby yesterday, of January 28, 1900, was it?

Mr. Cowan: The one he pulled out of his *pcoet* and read from?

Mr. Garwood: Yes.

Mr. Andrews: June 28, 1900.

Mr. Cowan: I think he read that part of it.

Mr. Walter: Mr. Andrews knows about that.

Mr. Coleman: Mr. Garwood had it I think.

Mr. Garwood: I gave it back to Mr. Kirby.

Mr. Andrews: Just a moment. I presume we might as well make one objection to all of this as a conclusion, as they were all

6970 submitted yesterday to Commissioner Harlan and as I understand the matter he left without deciding the question. But the question was asked and the objections were all made, and when they are all in I will make the objection at one time so as not to interrupt you.

Mr. Garwood: Now as to the proposition made by the gentlemen that there may be private matters in there that you do not care to be made public, I of course recognize the force of that and I have no desire to have it made public, but I understood you to say you had no objection to filing the matter with the Commission.

Mr. Andrews: We have repeatedly offered to leave them with the Commission for inspection but not to file them as a record in the case.

Mr. Garwood: If you will furnish to me a copy of that paragraph of the contract to which reference was made, and also that paragraph which I think is immediately preceding it, relative to the construction of the branch of the Santa Fe from Somerville to Silsbee within a limited time, I would have no occasion for any of the other parts

Mr. Andrews: Furnish it to you personally?

Mr. Garwood: To go into the record.

6971 Mr. Andrews: That was read into the record yesterday.

Mr. Garwood: Substantially all of that was, I think, but

the preceding paragraph was not. I take it there would be no objection to that, so that difficulty might be obviated with reference to that.

Now, while the testimony was fairly well covered by Mr. Kirby yesterday I introduce copies of the Conveyances from the Kirby Lumber Company and Mr. Kirby to Mr. Chapman as testified to.

Mr. Andrews: Are those certified copies from the record?

Mr. Garwood: Yes, sir; I take it that they are correct. I note this, however, that that is a pencil signature for the clerk, which is a little unusual.

Mr. Andrews: If it is correct I do not care anything about it except that its correctness is ascertained.

Mr. Garwood: You might correct it if it is not.

Examiner Burchmore: Is there any objection to the filing of that agreement?

Mr. Andrews: I have no objection. It is a matter of public record.

Mr. Cowan: Assuming it is a correct copy.

Examiner Burchmore: Well, it is a correct copy as you
6972 understand?

Mr. Garwood: It is certified to by the clerk.

Mr. Cowan: We assume it is, but in case it is found to be incorrect it can be corrected.

(Paper referred to was marked and filed and is attached hereto.)

Mr. Garwood: As I understand it the relations of the Industrial Lumber Company and the Southwestern Lumber Company, of which Mr. Ripley is president, have been quite fully gone into at prior hearings, so we will not at this time take up any time to go into that, but in order that there may be record evidence in addition to the testimony heretofore given I file a certified copy of a conveyance or contract between the Southwestern Lumber Company and the Industrial Lumber Company.

Mr. Andrews: Where is that on record?

Mr. Garwood: Lake Charles, Louisiana, referring to the original contract of conveyance concerning which Mr. Parks has testified. I ask that it be filed as a part of the record.

(Paper marked and filed and is attached hereto.)

6973 Mr. Garwood: I now have a summation of the shipments by distribution to the various states of 51 yellow pine lumber concerns, all of which, with the exception of a few which are noted are interested in various short line railroads, from January to October 10th, showing the distribution by states, similar to the information that has been furnished by a number of intervenors. This compilation has been made under the direction of Mr. George K. Smith, of the Lumbermen's Association, and is statistical/y in its nature, and I could just spread it on the record.

Mr. Cowan: How many copies have you?

Mr. Garwood: That is the only one I have.

Mr. Andrews: If it is made up by the owners of those properties

personally, I have no objection to it, but I understand that he gets his statistics for his newspaper in a very different way from what you would get them.

Mr. Garwood: My understanding from him is that these are made up by reports from the owners of the property.

Mr. Andrews: I do not think those reports are made in a way which we would be willing for this to go in without objection, coming from that source. It may be that you can show that they are correct. We have no objection to the figures, but we would
6974 like to have assurance of their correctness.

Mr. Cowan: I wonder if the Department of Commerce and Labor, or the Forestry Department do not have those figures?

Mr. Garwood: I will just ask Mr. Smith how they are made up.

Examiner Burchmore: Do you wish him to take the stand?

Mr. Garwood: Yes.

6975 GEORGE K. SMITH was called as a witness, and having been duly sworn, testified as follows:

Mr. Garwood: Do you occupy any official relation with reference to the Lumbermen's Association?

Mr. Smith: I am Secretary of the Yellow Pine Manufacturers' Association.

Mr. Garwood: Was this statement which I now present to you made up under your direction?

Mr. Smith: It was.

Mr. Garwood: Please state to the Commission in what manner it was made up, and from what sources the information was gathered.

Mr. Smith: We have monthly report cards, which we call our clearing house, coming in from about 300 manufacturers. We selected 51 of these who are reporting regularly from month to month, and at the time this was made up, we had not the reports for November and December, consequently we took the ten months; and the original cards for each company are these jackets, from which the reports were compiled. They are authentic in that regard, in that they come in from each company each month showing the distribution by states, and if you would like to inspect them, or have any one inspect them, you are at liberty to do so.

6976 Examiner Burchmore: Would it be of interest to attach a blank card to your report, showing in what form the reports come in?

Mr. Smith: I would be glad to do it.

Mr. Garwood: Yes, we would be glad to do it.

Mr. Andrews: Would you let me see one of those cards?

Mr. Smith: Yes, sir. (Producing card.) Is there any particular firm you would like?

Mr. Andrews: No.

Mr. Smith: There is the Southern Lumber Company of Warren.

Mr. Andrews: There is one each month?

Mr. Smith: And they give the number of feet which go into each state? We have been doing this for a great many years. It was

not gotten up for any purpose such as this, to show where the lumber goes.

Examiner Burchmore: Are those reports considered confidential?

Mr. Smith: Yes, sir, they are not supposed to be given out to show where each shipper sells—but I do not consider it any breach of confidence to show where the total amount of lumber went.

6977 Examiner Burchmore: No, but I wondered if the mills were rendering reports to you in a confidenital way.

Mr. Smith: They are rendering them with the idea that the information as to what an individual mill is shipping to Ohio, say, is not to be given out, but to make up the total of all the mills shipments going into a single state to show the volume going into that state.

Mr. Andrews: Why did you select 51 or 52 out of the 300?

Mr. Smith: Well, we selected those, with very few exceptions—I notice one or two, that have tap lines. We could give others, if desired, but the request came to select those where the lumber originated on tap lines.

Mr. Andrews: Did you select all that have tap line divisions?

Mr. Smith: I do not think we did.

Mr. Andrews: Why did you omit some of them?

Mr. Smith: Simply we thought we had enough. We couldn't select more, if required.

Mr. Garwood: The time was short, I will state, Mr. Andrews, that we tried to cover the larger interest, and get as much as we could during the limited time that we could get the information.

Mr. Cowan: The principal manufacturers are represented?

6978 Mr. Garwood: Yes, I think so.

Mr. Andrews: You have 300——

Mr. Smith: No, we have 218 who have reported regularly for 12 months consecutively, and out of the 218 we selected 51.

Mr. Andrews: And these 51 are all concerns that get tap line divisions?

Mr. Smith: There are a few who do not.

Mr. Andrews: And they represent the more prominent lumber companies?

Mr. Smith: Yes.

Mr. Andrews: I really don't know, your Honor, anything about the accuracy of this, and I do not believe there is anything reflected about the accuracy of it from the statements made. I do not think we would insist upon any objection to it, if they want to put it in for whatever it is worth.

Mr. Cowan: Let that go with the suggestion that in case we should want any of the others Mr. Smith would be willing to make it up and forward it to the Commission.

Mr. Smith: Yes, sir, anything I have.

Mr. Garwood: Anything that is material to this inquiry.

Mr. Cowan: I mean anything of the same sort with re-

6979 gard to other companies.

Mr. Garwood: Yes.

Examiner Burchmore: What information is that statement intended to give?

Mr. Garwood: It is intended to show the movement of the lumber, states, and the amounts in which it goes to the different states.

Examiner Burchmore: It might be well to ask the witness whether he thinks that that statement clearly indicates the territory to which lumber moved, and the proportion in which it moved to those territories.

Mr. Garwood: It gives all the territory.

Mr. Smith: It gives all the states in the United States.

Examiner Burchmore: Well, you have selected certain mills. Does that fairly show the trend of traffic?

Mr. Smith: I think it is the fair average, because I believe the better class of mills distributes their products over a wider territory than the smaller class of mills.

Mr. Coleman: How many mills do not report to you?

Mr. Smith: Well, there are about 1700 mills on my mailing chain.

Mr. Coleman: And you only get reports from——

Mr. Smith: 300, and 218 regularly.

6980 Mr. Coleman: And then you selected fifty of those?

Mr. Smith: Yes, sir.

Mr. Coleman Were you advised or aided in your selection in any manner?

Mr. Smith: No, sir, only in the way of selecting those companies who are interested in short line railroads largely.

Mr. Coleman: I do not suppose it would have much value if it represents such a small proportion.

Mr. Garwood: That is a matter of argument.

Examiner Burchmore: I think it may be received for what it is worth.

Mr. Andrews: Does that show the list of concerns which are figured in the report?

Mr. Smith: Yes, sir, at the head of each column.

Mr. Garwood: It shows also the tap line that is connected with it?

Examiner Burchmore: Could you furnish a copy to Judge Andrews?

Mr. Garwood: How many copies have you got?

Mr. Smith: We have none, but that. It could me made up, if desired.

Mr. Garwood: If you could give us two more, one for us

6981 and one for the other gentleman, we would be obliged.

Mr. Coleman: I think we would like one, if it would be just as easy.

Mr. Smith: It would not be just as easy. It has to be made up with pen and ink.

Mr. Coleman: I would like one.

Mr. Andrews: May I ask you where these 1700 pine mills are located, in what states?

Mr. Smith: I could not tell you what states, but we keep a list

of the mills from Arkansas, Texas, Louisiana, Mississippi, Alabama, and a few in Georgia and Florida.

Mr. Andrews: And they are substantially those mills in Texas, Louisiana, Arkansas, Mississippi?

Mr. Smith: And Alabama.

Mr. Andrews: You do not have them all, do you?

Mr. Smith: No, we try to keep a list of mills of twenty thousand feet a day and up. Anything below that we do not attempt to keep track of because they are so movable that you cannot know where they are.

Mr. Andrews: Will you file that list of 1700 mills, with the location of them, with the Commission?

Mr. Smith: I would be glad to run our Addressograph chain, and send it to them, I think.

6982 Examiner Burchmore: In what form would it reach the Commission, in separate cards?

Mr. Smith: If you desire, or on strips, if you desire.

Examiner Burchmore: We would take it on a strip.

Mr. Smith: You know what an Addressograph is. We will transfer them in any way we can.

Mr. Andrews: I supposed it could be written on several sheets of legal cap. I see no objection to his running through a strip of paper.

Examiner Burchmore: Do you think it would be worth while to have it filed in this record?

Mr. Andrews: I can conceive of reasons why I might like to discuss it.

Mr. Coleman: Do all the large mills report to you from that country?

Mr. Smith: No.

Mr. Coleman: For instance the Kirby mills?

Mr. Smith: No.

Mr. Coleman: Long Bell?

Mr. Smith: No.

Mr. Coleman: Industrial?

Mr. Smith: No, sir.

6983 Mr. Coleman: Could you name a few others of the larger ones?

Mr. Smith: That do?

Mr. Coleman: No, that do not. I am merely getting at the value of that statement as representing the general situation.

Mr. Smith. Well, I think Lutcher-Moore do not, and the Great Southern Lumber Company at Bogaloosa does not.

Mr. Coleman: Well, that is enough.

Mr. Cowan: What about my freind, Mr. Johnson of the Frost-Johnson Company; does he report?

Mr. Smith: Yes, sir.

Mr. Walter: I might say you called for the last year's report. It is embraced in that list. I suppose you do not care to have it filed separately?

Mr. Cowan: What report?

Mr. *Cowan:* You asked us to file a statement of our tonnage, and it is in that. Now do you want an additional report filed for his line?

Mr. Cowan: I think you had better file it. That information comes from Mr. Smith, and I asked Mr. Johnson to file it, and I like to read his handwriting anyway. He doesn't mind.

6984 Mr. Walter: We will offer it now and have it in the record, for the year ending December 31st, 1910.

(The paper presented by the witness was marked Exhibit No. 1, Witness Smith, January 31, 1911). The exhibit was afterwards returned to the witness for the purpose of copying.

(Witness excused).

Mr. Garwood: We introduce a copy of letter of Mr. Kirby, as President of the Kirby Lumber Company to Mr. Yoakum, of date November 8th, 1903, as found in the records of the suit above referred to in the report of the Master in Chancery; that was the letter which was referred to by Mr. Kirby yesterday.

Mr. Andrews: To that we interpose the objection that the matter is irrelevant and immaterial, that no contract was ever consummated, and no transaction ever had under it, and no property was ever controlled by virtue of the contract in any way at all, and that the whole subject matter has long since expired, and is entirely dead and is wholly irrelevant and immaterial to any issue in this hearing; and the further objection that the substance of it has been read

6985 into the record on the cross examination of the witness Kirby already.

Examiner Burchmore: Do you desire to file that document?

Mr. Garwood: Yes, I will file a copy of it.

Examiner Burchmore: Judge Andrews' objection is noted on the record. I shall have to receive the document subject to that objection.

Mr. Andrews: I understand. I am merely going through the formalities.

Mr. Wood: What contract is that?

Mr. Garwood: A letter of Mr. Kirby to Mr. Yoakum of date November 8th, 1903, which has been referred to by Mr. Kirby in his examination yesterday.

Mr. Wood: I think I should have to interpose the same objection to the correspondence with Mr. Yoakum. I do not see that it bears on this controversy.

Examiner Burchmore: Your objection is noted, Mr. Wood.

(The paper referred to is filed, and attached hereto).

Mr. Garwood: Purely as a matter of form, to make the record clear in connection with the exceptions taken we renew the notice to produce which was made at the hearing at New Orleans on the 8th of December, 1910, as to your cost sheets, and so forth. You are familiar with the notice. I understand the gentlemen de-

6986 cline to produce such information.

Mr. Cowan: We have done it several times.

Mr. Andrews: We have repeatedly repeated it.

Examiner Burchmore: Is this the one which Mr. Diebold introduced?

Mr. Andrews: No, it is the one in regard to the cost, practice, and so forth.

Examiner Burchmore: Has any action been taken by the Commissioner?

Mr. Andrews: It was excluded.

Mr. Garwood: And I renew it, and I now make a formal request in pursuance of this notice, and it is formally refused, as I understand.

Mr. Coleman: In view of the importance you attach to several contracts in this case, I thought I would ask you if you would mind producing the Trust Company deed which Mr. Parker is trustee in, regarding the financing of the Beaumont & Great Northern Railway, and the dealings of Mr. Carlisle.

Mr. Garwood: Some one asked for some document.

Examiner Burchmore: With reference to that, let me say
6987 that the testimony with respect to the Beaumont & Great Northern is filed in a separate record made up in their case. Mr. Carlisle has forwarded to the Commission,—whether it was requested or not, I do not remember, but at any rate he has forwarded a copy of the second mortgage in which Mr. Orr is Trustee. It was my impression that at the hearing the first mortgage was filed.

Mr. Coleman: No, at that time I believe serious objection was made because that was irrelevant, and I believe the attorney for Mr. Carlisle qualified it is impertinent. Now it seems to have been considered by the gentlemen on the other side that such things are material. Mr. Carlisle in his testimony stated——

Mr. Garwood: Excuse me just a moment. I must insist, your Honor, that that hearing was closed, and Mr. Carlisle is not represented here, and I certainly should not break into any other man's case and assume to act for him in a case in which I have no connection.

Examiner Burchmore: I think your objection must be sustained, but I will say this, that I understand from what Mr. Coleman says that he desires that mortgage to be filed in connection with the Beaumont & Great Northern case, and his request or desire will
be brought to the attention of the Commission for such action
6988 as they may deem proper, together with the notice that Mr. Carlisle and his attorney were absent when the request was made here.

Mr. Coleman: I wanted to be a good deal easier than that. I understood from Mr. Carlisle that the Mr. Parker referred to was in Mr. Garwood's office, and I was going to ask Judge Garwood if he would request Mr. Parker to file just that part which was pertinent to the case. I did not wish to make the demand for the entire document, and I will leave it in that shape.

Examiner Burchmore: Let me suggest, if parties can agree on that matter here, it would be better, perhaps.

Mr. Garwood: I should certainly not accept any notices in a case in which I have no conceivable connection. Mr. Carlisle had an attorney there representing him who seemed to be entirely capable——

Examiner Burchmore: We will not discuss that any further at this time. Have you any further request to make, Judge Garwood?

Mr. Garwood: No.

Examiner Burchmore: May I inquire what further testimony, if any, counsel propose to introduce at this hearing, so we
6989 may ascertain whether it is wise to adjourn until tomorrow?

Mr. Coleman: It has just been suggested to me that the Beaumont hearing was very pertinent to this case, and that on motion to make it a part of this case it perhaps would be favorably considered. I take it there is no connection. It deals with the general proposition. I will make the motion for the consideration of the Commission that the record in the Beaumont case be made a part of this record.

Examiner Burchmore: Very well, your motion will be noted.

Mr. Garwood: Before closing, your Honor, I am not thoroughly familiar with the record in the Star Grain case, but my information is that that record shows that there were cancellations of through rates upon the part of the Santa Fe from points on the Iron Mountain, and its short line connections on March 1st, 1900; from points on the Kansas City Southern and its short line connections, March 1st, 1903; from the Frisco and points on its short line connection, March 31st, 1904; from points on the Cotton Belt and its short line connections, October 1st, 1907; from points on the short line connections of the T. & P., October 1st, 1907——

Examiner Burchmore: The Star Grain case contains some showing to that effect. Whether your dates are correct, I do not know.

6990 Mr. Garwood: Is that substantially correct?

Mr. J. J. Coleman: That is all in the Star Grain case.

Examiner Burchmore: It is all in there. Whether your dates are correct, of course I do not remember.

Mr. Garwood: If these dates are not correct, I would be glad if the Commission would call attention to it.

Mr. J. J. Coleman: Did I understand you to say that the record shows that the Santa Fe cancelled the rates?

Mr. Garwood: That is the impression I had.

Mr. J. J. Coleman: That is not the understanding with the Cotton Belt and T. & P.

Mr. Garwood: I understood the divisions allowed the Cotton Belt were so unsatisfactory to the Cotton Belt that they cancelled them.

Mr. J. L. Coleman: I think that is what the record showed

Mr. Garwood: So it is rather vague——

Mr. J. J. Coleman: I just wondered if you wanted to know if those are all included in that record. They are.

Mr. Garwood: We will have a few more witnesses, perhaps three or four, and it is now after five o'clock, and we can easily get through

with them tomorrow, that is if the cross examination is not too extensive.

Examiner Burchmore: So that counsel may make their
6991 plans, I would like to inquire how long you think it would take, and also whether there are other witnesses to be called by other parties.

Mr. Garwood: I think we will easily get through tomorrow.

Examiner Burchmore: Do the Trunk Lines propose to introduce any testimony?

Mr. Wood: It is not the present expectation of the Trunk Lines to introduce testimony. I wish to make that statement for all lines, but if there is any contrary policy, I presume it can be stated.

Examiner Burchmore: Any further statements counsel wish to make tonight?

Mr. Cowan: In connection with Mr. Wood's suggestion, we would like to know—I don't know whether we are entitled to it or not,—but we want to know what the position of the Trunk Lines may be, or rather what it is now, whether they are going to crawl to bed with us or the other follow. We are prepared to express that desire.

Mr. Jeffery: Do you also want to know what the Santa Fe's attitude is? I did not know whether you wanted any answer from them or would let their actions speak stronger than their words.

6992 Mr. Cowan: Their attitude would seem to indicate they are very strongly opposed to divisions.

Mr. Garwood: I do not think that is material. I do not think it matters much to the Commission.

Mr. Cowan: It does. They are the people who cancelled out the rates, and were the occasion of this proceeding. When they cancelled out their rates, the tap lines and others came in to tell the Commission "We want the Commission to suspend the cancellations", and they have sat here with their mouths closed—I do not say offensively, perhaps that is the best for all of us but——

Mr. Jeffery: So far as the Iron Mountain is concerned, we are in the attitude of the innocent bystander, and my only hope is that we do not get what the innocent bystander usually gets.

Mr. Cowan: I move to strike out the word "innocent". You are a bystander, all right.

Mr. Garwood: Well, I believe it is the general desire if the court can, to suspend about this time.

Examiner Burchmore: We will now adjourn to ten o'clock tomorrow morning.

Whereupon, at five o'clock P. M., the hearing in the above entitled matter was adjourned to Wednesday, February 1st, 1911, at 10 o'clock A. M.

6993 CHICAGO, ILL., *February* 1, 1911.

Met pursuant to adjournment at 9:30 A. M.

Present: Examiner Burchmore; other parties as before.

Mr. Walter: We will call Mr. Church.

W. Q. CHURCH was recalled as a witness and having been previously sworn, testified as follows:

Mr. Walter: What is your business, Mr. Church?

Mr. Church: Traffic manager of the Louisiana Central Railroad.

Mr. Walter: How long have you been in the railroad business?

Mr. Church: Twenty-eight years.

Mr. Walter: Briefly state what that experience was.

Mr. Church: Fifteen years with the Santa Fe, six years with the Kansas City Southern and five years with the Louisiana Central.

Mr. Walter: With the Kansas City Southern what was your position; what department?

Mr. Church: I have always been in the traffic department,
6994 practically.

Mr. Walter: Have you examined the current tariffs on lumber?

Mr. Church: I have.

Mr. Walter: Have you examined Southwestern Lines Tariff 48-B, I. C. C. No. 804?

Mr. Church: I have.

Mr. Walter: Have you prepared a statement as to what that tariff shows?

Mr. Church: Yes, sir.

Mr. Walter: Hand that statement to the stenographer. We offer it as an exhibit to this witness' testimony. He may briefly explain what it shows.

Mr. Andrews: I think we may be entitled to see it before it goes into evidence or otherwise.

Examiner Burchmore: What is it, a statement of what the tariff shows?

Mr. Walter: It is a brief statement of what the tariff contains.

Mr. Andrews: I do not know that we have any objection

Mr. Coleman: Well, I have. In your brief you can explain the tariff if you want to.

Mr. Walter: We shall insist that this witness, who is an
6995 expert tariff man, can state what he finds from the tariff

Examiner Burchmore: As I understand, Mr. Church, this is a short description or analysis of that tariff which you have made up?

Mr. Church: Yes, sir.

Examiner Burchmore: I think it may be received, subject to the objection. It may be inaccurate and reference may be made to the tariff itself as to whether it is accurate.

Mr. Walter: Yes.

Mr. Andrews: I have not any idea whether I have any objection to it, but I should like the privilege of seeing whether I have.

(Mr. Andrews then proceeded to examine the paper.)

Mr. Andrews: The first objection is that the tariff is the best evidence and that is on file with the Commission. The second objection is it merely states the conclusions of the witness. The third objection is that it appears upon its face to be not accurate in detail, in that it does not cover the entire subject matter about which it purports to speak, and therefore could not be accurate in the statements made. The fourth objection is that it is utterly irrelevant
6996 and immaterial to any issue we are hearing here. And in order to avoid repetition, if you will permit me to do so, I will make that objection to all the testimony that they are going to ask him about on this proposition and then say nothing more about it.

Mr. Coleman: I make the same objection.

Examiner Burchmore: The objection will be noted, and the document will be received for what it is worth, subject to those objections.

(The statement so offered and identified was received in evidence and thereupon marked Exhibit No. 1, witness Church, received in evidence February 1, 1911, and is attached hereto.)

Mr. Walter: About how many lumber producing roads in Missouri, Louisiana, Arkansas and Texas are named as parties to that tariff, in round numbers?

Mr. Church: Upwards of 215. I do not know accurately.

Mr. Walter: Of those roads, does your statement give the names of those that are given the right and do by that tariff participate in through rates to Santa Fe points.

Mr. Church: I think so.

Mr. Walter: I notice a list of the g[illegible]
6997 as to what is true of the Houston & Texas Central, the San Antonio & Aransas Pass, the Galveston, Harrisburg & San Antonio and the Trinity & Brazos Valley Railroad as to lumber producing tonnage from the main line.

Mr. Church: I do not think they produce very much. I do not know of any.

Mr. Walter: What is the condition of the lumber lands along the main line?

Mr. Church: They are practically cut out.

Mr. Walter: Now, what is the difference in that tariff between basis 5 and basis 6; what is its range?

Examiner Burchmore: Pardon me. Are you going into the question of the group adjustment of rates?

Mr. Walter: No, just the difference between these two.

Mr. Cowan: Does not the tariff show that?

Mr. Walter: Yes.

Mr. Cowan: What in the world can be the use of taking it up with the witness?

Mr. Walter: I will show you later. It is easier to take an objection to the question and let us proceed.

Mr. Church: The range is three and one-half cents.

Mr. Cowan: Of course I do not understand that answer.
6998 He says the range is three and a half cents. I would not know from that what he meant.

Mr. Walter: Give me an illustration.

Mr. Church: The rate from any typical point, say Perry, from group 5, is 24 cents. From group 6 it is 27½ cents. That is generally the range through this tariff to all Santa Fe consuming points. In some places the range may be greater, but that is the general average.

Examiner Burchmore: You mean that is the prevailing differential or difference?

Mr. Church: Yes, sir, the average.

Mr. Cowan: From where?

Mr. Church: Producing points on the Santa Fe and producing points on other lines.

Mr. Walter: That are parties to this tariff?

Mr. Church: Yes.

Examiner Burchmore: The difference between the Santa Fe rate from a point of origin on its line and another company's rate from a point of origin on its line is usually three and one-half cents in the groups you have given?

Mr. Church: In connection with the Santa Fe, yes.

Mr. Cowan: I suppose that means if they see fit to ship
6999 over the Santa Fe they have to pay that much more to do it?

Mr. Church: That is what this tariff shows.

Mr. Coleman: Now we are pretty well agreed that the tariff speaks for itself. If——

Examiner Burchmore: I understand this is simply preliminary.

Mr. Coleman: If they are going to go into that, we will merely promise our right to insist upon a very lengthy cross examination.

Mr. Walter: We have no objection to that.

Mr. Coleman: Well, it will use up time.

Mr. Walter: You have as much as we have. That is to say, when a shipment is made from one of these connecting lines over the Santa Fe, the basis is about three and a half cents higher than the local rates on the Santa Fe?

Mr. Church: Yes, sir.

Mr. Walter: I will ask you what effect that difference has upon the mills located exclusively upon the Santa Fe.

Mr. Church: It tends to give them a monopoly of that business.

Mr. Walter: What effect does that have upon the purchaser at these local points, of lumber.

Mr. Church: It restricts his purchasing.

7000 Mr. Cowan: I would like to inquire if these gentlemen are asking for through routes and rates and divisions with the Santa Fe in this proceeding.

Mr. Walter: A number of them that have filed complaints are asking.

Mr. Cowan: Who?

Mr. Walter: For example, the Peach River lines.

Mr. Cowan: Any others?

Mr. Garwood: The Beaumont & Great Northern ask for it.

Mr. Cowan: I am trying to get at your position, if you are trying to get joint rates with the Santa Fe I would be glad to see you have it, but I have never found out your position.

Mr. Garwood: I do not think we are called upon to argue the case at this point. We have several positions.

Examiner Burchmore: I do not think the Commission intends to go into the blanket rate question and the adjustment of rates at this time.

Mr. Walter: You will recall in this contract with Mr. Kirby, which was filed, dated along about 1900—we have shown the cancellations, and we want to show that the same situation which was promised under that contract, namely, an advantage to
7001 the Santa Fe producing mills, is still being accorded the intervenors in this case. That is the purpose.

Mr. Cowan: My remark is with the qualification of course that they cut out the divisions. When they do that, I think they are entitled to the through rate.

Mr. Walter: What can you say as to the St. Louis, Iron Mountain & Southern points?

Mr. Church: I think the range there is even greater, perhaps as high as nineteen cents against them.

Mr. Walter: That is to say, to reach a local point on the Santa Fe from some one of the Iron Mountain points in connection with the Santa Fe, they will have to pay as high as nineteen cents from certain points?

Mr. Church: That is my understanding.

Mr. Coleman: Can you give us an example of that right off the bat?

Mr. Garwood: I suggest the cross examination should be deferred.

Mr. Coleman: No, but you are going into something and the witness says he understands what the tariff says, and I think we are wasting a lot of time.

Examiner Burchmore: Unless there is serious objection to
7002 some of these questions, suppose we allow counsel to proceed with the direct examination.

Mr. Cowan: We made a serious objection at the start that to allow the witness to prove what is in a tariff before the Commission is absurd.

Mr. Walter: What would you say, Mr. Church, if you know, in a general way, is the comparison between the amount of tonnage that originates on the lines that are permitted to carry through rates with the Santa Fe, as compared to the tonnage which would be made available to consumers in Santa Fe territory if all the lines named in the tariff were permitted to carry through rates on a competitive basis?

Mr. Andrews: The fifth objection to that is that the witness has not shown himself qualified to answer the question as an expert or statistician or otherwise.

Mr. Cowan: We have no objection to his testifying if he knows, but he should not guess at it.

(Question read.)

Examiner Burchmore: Isn't that rather a large question to answer?

Mr. Walter: Well, if he can answer it——

Mr. Cowan: Let him take a shot at it if he thinks he
7003 can.

Examiner Burchmore: Give your opinion, Mr. Church.

Mr. Church: I think the percentage is perhaps eight to one.

Mr. Walter: Which would be the eight and which the one.

Mr. Church: By including these additional lines, you would have at least eight more sources of supply than you have at present.

Mr. Walter: Would it be eight times the tonnage probably available?

Mr. Church: I think so in a general way.

Examiner Burchmore: Is not the purport of your testimony something like this? You recall the Star Grain Case, as I remember it, opened up Santa Fe markets to the Cotton Belt mills, did it not, and you are now saying that the same condition that formerly obtained to the Cotton Belt mills going into the Santa Fe markets now obtains with respect to Iron Mountain mills, for example?

Mr. Walter: Exactly.

Examiner Burchmore: Can you not shorten it up by asking him that?

Mr. Walter: You are familiar with the Star Grain case?

Mr. Church: Yes, sir.

7004 Mr. Walter: The Commission made an order opening up joint rates to certain points on the Cotton Belt?

Mr. Church: Yes, sir.

Mr. Walter: Was that complied with by the Santa Fe, so far as you know?

Mr. Church: So far as the order is concerned; yes, sir.

Mr. Walter: When did that order expire, if it has?

Mr. Church: It expired, I think, the first of September, and the rates were restored to the old basis December 10, 1910.

Examiner Burchmore: Joint rates have been cancelled?

Mr. Church: The order of the Commission has expired, so they restored the same basis which obtained to other lines. That is, the restoration of the old rates from Cotton Belt main line points, but not from short lines.

Examiner Burchmore: Was that change suspended by the Commission?

Mr. Church: I do not know as to that.

Mr. J. J. Coleman: The rates in effect from Cotton Belt points to points on the Santa Fe other than to Oklahoma and New Mexico are the same as carried from mills on the Santa Fe.

Examiner Burchmore: At the present time?

7005 Mr. J. J. Coleman: Yes.

Mr. Walter: But the order in the Star Grain case when

it expired was no longer carried in effect by the Santa Fe and raised the rate?

Mr. J. J. Coleman: No.

Mr. Cowan: Let us let this witness answer. He is making his guesses.

Mr. Andrews: I rise again to protest, that it seems to me to be so utterly inadmissible to have a bunch of witnesses sit around here and talk about what a mass of records discloses, and I must again object that we are not only wasting time, but are getting a lot of valueless information.

Examiner Burchmore: If you could ask some general brief question——

Mr. Cowan: How long is it going to take on cross examination to show he does not know anything about it?

Mr. Garwood: It might possibly take you to eternity.

Mr. Cowan: Well, it will not.

Examiner Burchmore: Is it your understanding that in complying with the Commission's order in the Star Grain case the Santa Fe, or some of them, at least, by joint action of the carriers, extended those joint rates thus established back to the tap lines
7006 and gave the tap lines divisions of those rates?

Mr. Church: No.

Examiner Burchmore: They applied only from points on the Cotton Belt?

Mr. Church: That is all.

Mr. Walter: When that order expired, did the Santa Fe raise the rates from the Iron Mountain or reduce the rates from certain points, if you know, before the order expired?

Mr. Church: When the rates expired, did they raise them?

Mr. Walter: What action did they take?

Mr. Church: It is my understanding they raised the rates.

Mr. Cowan: Now the idea of a man saying his understanding, when the tariff shows.

Examiner Burchmore: That is his understanding. The Commission will refer to the tariffs.

Mr. Walter: We will proceed to the next tariff.

Mr. Cowan: It seems to me impossible to have a witness testify as to his understanding of the tariffs, when the tariffs speak for themselves.

Mr. Walter: Yes, the tariffs speak for themselves.

Mr. Cowan: And these gentlemen tell me he is entirely
7007 mistaken as to his understanding. That is the reason I object.

Examiner Burchmore: I will ask Mr. Walter to state the facts as he understands them, and allow reference to be made by the Commission to the tariffs for verification of his statement, if you wish it in the record.

Mr. Walter: My understanding is this, before the order expired in the Star Grain case they reduced the rate from Santa Fe points to these points in Oklahoma, for example, and thereby brought about the difference which the Commission had condemned——

Examiner Burchmore. Is it your understanding that the order in the Star Grain case did not fix any specific rate, but ordered them to maintain the Santa Fe rate from the Cotton Belt mills? I may be wrong, but that is my understanding.

Mr. Andrews: That illustrates the objection we have made. It is all of record, and we are sitting here guessing about it.

Mr. Walter: Let that go, and we will take up the next tariff. Have you examined Southwestern Lines Tariff 50-C, I. C. C. 768?

Mr. Church: I have.

Mr. Walter: That tariff names rates on lumber from certain lumber producing lines in Arkansas, Louisiana and Texas to
7008 points in Arizona, Arkansas, Colorado, Iowa, Kansas, Missouri, Nebraska, New Mexico, Utah and Wyoming?

Mr. Church: Yes, sir.

Mr. Walter: About how many lines are parties to that on which lines lumber is produced in greater or less degree?

Mr. Church: Upwards of 235.

Mr. Walter: Out of that total number, how many are permitted by that tariff to carry rates on lumber to Santa Fe System points except Santa Fe points in New Mexico?

Mr. Church: I think twenty.

Examiner Burchmore: You do not know whether any other tariff contains such rates from other system points?

Mr. Church: I have not examined any other tariffs recently.

Mr. Walter: Do you know of any others that do?

Mr. Church: No.

Mr. Walter: My information is that they do not. If that is not correct, let us have it stated now.

Mr. Coleman: You have an expert here. We will show you where you are incorrect, when our turn comes.

Mr. Walter: Briefly state the effect of that tariff on destination in Kansas, as to lumber rates.

Mr. Church: To local points it restricts the consumer's market.

7009 Mr. Walter: What is the differential, speaking in cents per hundred pounds? In this case we will offer the statement as prepared as to that tariff.

Examiner Burchmore: I think we are consuming time needlessly. I feel——

Mr. Walter: We will shorten it up by simply filing these statements and asking the witness if they are correct as he understands them.

Mr. Cowan: If he has figures, they may be all right, but I do not know.

Examiner Burchmore: I think you can cover the point by making the general statement that your understanding is that the general adjustment is so and so, and then in your brief you can refer to the tariffs themselves for what those tariffs show, and the Commission will go to the tariffs undoubtedly, rather than rely on the testimony of this or any other witness as to what the tariffs contain.

Mr. Walter: Have you prepared a statement as to tariff 50-C, I. C. C. 768?

Mr. Church: Yes.

Mr. Walter: Hand it to the stenographer.

Mr. Cowan: We make the same objection.

7010 Examiner Burchmore: It may be received subject to the original objections.

Mr. Cowan: Then it will be subject to cross examination as to a lot of statements in typewriting.

Examiner Burchmore: The objection will be noted.

(The statement so offered and identified was received in evidence and thereupon marked Exhibit No. 2, witness Church, received in evidence February 1, 1911, and is attached hereto.)

Mr. Walter: Are there any joint rates, so far as you have been able to find them, from any of those points to New Mexico points?

Mr. Church: No, sir.

Mr. Walter: Of those twenty lines that carry those joint rates, two of them are Santa Fe lines, are they?

Mr. Church: Yes, sir.

Mr. Walter: The Gulf, Colorado & Santa Fe, and the Texas & Gulf?

Mr. Church: Yes.

Mr. Walter: Is there any tap line, speaking in general terms?

Mr. Church: Burrs Ferry, Browndel & Chester.

7011 Mr. Walter: That is the nearest you can come to a tap line?

Mr. Church: Yes, sir.

Mr. Walter: Have you examined Santa Fe tariff 5,769-A, I. C. C. No. 4080.

Mr. Church: I have.

Examiner Burchmore: May I ask you what tap lines you would expect to find in a tariff of that sort?

Mr. Church: Under the situation, only that one.

Mr. Walter: Have you prepared a statement as to that tariff?

Mr. Church: Yes.

Mr. Walter: We offer it as Exhibit No. 3.

Examiner Burchmore: It may be received, subject to the objection made to the other statements.

(The statement so offered and identified was received in evidence and thereupon marked Exhibit No. 3, witness Church, received in evidence February 1, 1911, and is attached hereto.)

Mr. Walter: Does that exhibit show the differential as you get it from the tariff between the originating points outside of Texas and originating points in Texas destined to points named in that tariff?

7012 Mr. Church: There is a range from one and a quarter cents to ten cents, although the average range, I think, would be about one and one-quarter cents.

Mr. Walter: Over or under the Texas rate?

Mr. Church: Over the Texas rate.

Mr. Walter: Are there any joint rates from Kansas City Southern points to these points on the Santa Fe?

Mr. Church: None whatever.

Mr. Walter: You may examine the witness.

Examiner Burchmore: I will ask you to sum up your testimony, Mr. Church. That is, what the effect of it is, as you understand it.

Mr. Church: As I understand the effect of these rates, it restricts the shippers on other lines in producing territory and it also restricts the consumers in their purchase; their markets are very much restricted, and the Santa Fe local points have to buy from Santa Fe mills or from the mills located on the lines that are shown on those lists, which some of them are not very heavy producing lines, and where they are able to go off the Santa Fe, they do not always go on the same rate; they frequently have to pay a differential higher than the Santa Fe shipping points, so it does not as a rule
7013 produce a very satisfactory market for the consumer. It puts him at the mercy, in a way, of the dealers located on the Santa Fe. That is, the manufactures, I should say.

Examiner Burchmore: I had considerable doubt as to the admission of your testimony over the objection of counsel for the intervenors and for the Santa Fe, because it is so largely based on your opinion of what the tariffs show.

Mr. Church: Well, the tariffs speak for themselves.

Examiner Burchmore: And I did not wish to deny to the interests that Mr. Walter and Judge Garwood represent the full opportunity to present their case in that connection, but I must say now that I think you cannot rely very much on Mr. Church's testimony in your argument, but all should refer to your tariffs as to what the facts are.

Mr. Walter: He has filed statements.

Examiner Burchmore: I do not think the statements can be relied on fully, but reference should be made to the tariff.

Mr. Church: Reference is made to the tariffs, and I have endeavored to show the facts as I understand them to be, relying on the tariffs to show what they are.

Examiner Burchmore: I will ask counsel to limit their cross examination, with the thought that if there are any errors
7014 in the statements so made, an examination of the tariffs will develop those errors.

Mr. Cowan: But your Honor has asked him for an opinion on the traffic and the business. It necessarily is based upon what he knows, or is supposed to know about these tariffs. If he is in error on what he bases his opinion, the whole thing falls like a cob house. I want the stenographer to read Mr. Walter's question and the answer that Mr. Church gave, and I either want it stricken out or the opportunity for full cross examination to demonstrate whether he knows facts that would justify him in making the statement or not.

Mr. Walter: We request that he be given the right to cross examine.

(The question and answer referred to were then read as follows:)

"Mr. Walter: What would you say, Mr. Church, if you know, in a general way, is the comparison between the amount of tonnage that originates on the lines that are permitted to carry through rates with the Santa Fe, as compared to the tonnage which would be made available to consumers in Santa Fe territory if all the lines named in the tariff were permitted to carry through rates on a competitive basis?

7015 "Mr. Church: I think the percentage is perhaps eight to one.

"Mr. Walter: Which would be the eight and which the one?

"Mr. Church: By including these additional lines you would have at least eight more sources of supply than you have at present.

"Mr. Walter: Would it be eight times the tonnage probably available?

"Mr. Church: I think so, in a general way."

Examiner Burchmore: May I ask one question? That condition clearly obtained with reference to mills on the Cotton Belt, as I under-tand it, but the Commission in the Star Grain case opened up Santa Fe markets, if you can use that expression, to Cotton Belt mills by restoring the former basis of joint through rates. What was the result of that restoration in the matter of sales from mills on the Cotton Belt line in that respect?

Mr. Andrews: We object on the ground the witness has already shown that his knowledge does not entitle him to any opinion on the subject. He has no mill connection in the world, so far as his evidence discloses.

Examiner Burchmore: Have you any positive knowledge
7016 on that?

Mr. Church: No, I have not.

Examiner Burchmore: I will withdraw the question.

Cross-examination:

Mr. Cowan: You heard the question and answer read. I of course must assume you are a fair minded man. Do you still persist in making the answer to that question as a matter of evidence, or would you prefer that it be stricken out as an opinion that is too vague and uncertain to be the basis of evidence? If you insist, I want to cross examine, and if you do not, there would be no use in it.

Mr. Church: That percentage may not be correct, but from the general knowledge I have learned, I should say that it is very nearly correct.

Mr. Cowan: Well, percentage of what?

Mr. Charch: Shipments.

Mr. Cowan: To where?

Mr. Church: This territory involved.

Mr. Cowan: What territory are you talking about?

Mr. Church: Santa Fe local territory.

Mr. Cowan: And what do you mean by Santa Fe local territory?

7017 Mr. Church: What those words imply?

Mr. Cowan: In your meaning, yes.

Examiner Burchmore: You asked the percentage of what, and I ask how much is now moving to Santa Fe local points.

Mr. Church: I have not the figures.

Mr. Cowan: Have you any idea about how many million feet move to Santa Fe local points today?

Mr. Church: I have no figures.

Mr. Cowan: Have you any idea about how many million feet move to Santa Fe competing points?

Mr. Church: I have not any of those figures in feet or cars.

Examiner Burchmore: Do you know that any move?

Mr. Church: Yes.

Mr. Cowan: From where?

Mr. Church: I know from my own knowledge that shipments move to Santa Fe local territory.

Mr. Cowan: From where?

Mr. Church: Cravens, Louisiana.

Mr. Cowan: Where else, of your own knowledge?

Mr. Church: That is all of my own knowledge.

7018 Mr. Cowan: Now, you answered the Examiner that you did not know anything about what resulted when the Commission changed the rate system on the Cotton Belt?

Mr. Church: He asked me about information that I have no knowledge about. I have not any access to those figures.

Mr. Cowan: And you do not know what change that did produce; change in the rate basis? Well, you have already admitted that. Do you know how many carloads of freight are shipped to Santa Fe competing points off the Frisco lines?

Mr. Church: I have no access to those figures.

Mr. Cowan: Do you know how many are shipped from Rock Island points?

Mr. Church: I have no access to their figures.

Mr. Cowan: That would be the same as to each railroad?

Mr. Church: The only thing that I base my conclusion on is talk from people who do know.

Mr. Cowan: Who was that?

Mr. Church: Railroad people.

Mr. Cowan: Well, let them be called.

Mr. Church: That is up to you.

Mr. Cowan: You don't know yourself? Let us see what they told you. Who was it that told you it would increase it eight times?

7019 Mr. Walter: He never said they told him that.

Mr. Cowan: What did they tell you?

Mr. Church: I said that was my conclusion from conversation.

Mr. Cowan: It was not what they said, but you concluded it from what they said?

Mr. Church: They told me.

Mr. Cowan: Who was it?

Mr. Church: I have talked with various traffic people. I have

talked with Mr. Coleman, Mr. Hershey and Mr. Voorhees and Mr. Gorman, and a number of other railroad people.

Mr. Cowan: And they told you it would increase this movement?

Mr. Church: Well, in a general way, they gave me no figures, but that was the conclusion I reached by their conversation.

Mr. Cowan: You have the opinion it would restrict it, the fact that the rate from Cravens, say, to a Santa Fe point—or is that a Santa Fe point?

Mr. Church: Cravens is on the Santa Fe.

Mr. Cowan: I was asking you if you knew any place off the Santa Fe, which shipped to local points on the Santa Fe, or I thought I was.

Mr. Church: You asked me if I knew any point that shipped.

7020 Mr. Cowan: I meant the other thing. Of course Cravens would ship to a Santa Fe point, but I wanted to ask you if you know any place on any other line which does ship to local points on the Santa Fe.

Mr. Church: Hearsay only.

Mr. Cowan: Do you know of any point on the other lines that ship traffic to competing points on the Santa Fe?

Mr. Church: Yes.

Mr. Cowan: To competing points in Kansas?

Mr. Church: Yes.

Examiner Burchmore: May I interject a question? I want to ask this: have you any idea at all as to the extent of tonnage moving from mills on the other lines, Kansas City Southern, Iron Mountain, and so forth, in the Southwest, to Santa Fe local stations at the present time?

Mr. Church: At the present time I have no knowledge of those figures.

Examiner Burchmore: Do you know that anything moves?

Mr. Church: There may be some. I do not know how extensive. I do not think it is very heavy.

Examiner Burchmore: Your estimate is that tonnage would increase eight times if the rates were readjusted?

7021 Mr. Church: My conclusion is that that tonnage would have been about that ratio if the rates had been continued. It might not result that way if the rates were restored at the present time, because a good deal of the business is perhaps lost and operators are going in other territories for markets.

Examiner Burchmore: Have you any further facts you can state in support of your opinion?

Mr. Church: No, I have not.

Mr. Cowan: Were you through, your Honor?

Mr. Burchmore: It seems to me the witness has stated his opinion, and given a full statement of the basis on which it rests and disclaims any positive knowledge. I doubt whether it is worth while for us to examine further into that point.

Mr. Cowan: It is not that point I am going to examine into. It is another point, which I think your Honor will see the moment I ask the question. If you think it is not pertinent after I ask the

question, you can rule on it. It takes two questions to do this. You have stated it to be your opinion that if the Santa Fe local territory were opened up by giving the through routes and rates equal over the Santa Fe to what it would be, I suppose, to
7022 competing points on the Santa Fe from these originating points other than the Santa Fe, that it would increase the traffic about eight times, at least very materially increase the traffic to those local points, and I suppose you mean, would thereby afford to mills on these other lines commerce which they do not now enjoy; is that correct?

Mr. Church: That was my idea.

Mr. Cowan: Now, the reason they do not enjoy it is because the mills on the Santa Fe get a lower rate to those points; is that it?

Mr. Church: That is the idea.

Mr. Cowan: If, therefore, a mill situated on the other line gets a tap line allowance that goes to the practical owner of the property of three and one-half cents, wherein does the difference lie?

Mr. Church: There are a good many things, the character of the investment and the conditions are not equal. The man that has the lower Santa Fe rate, may not have any investment in a tap line.

Mr. Cowan: You would expect the rate to take care of that, would you, as a rate expert?

Mr. Church: The three and a half cents?

Mr. Cowan: Whether he had any investment in a tap line.

7023 Mr. Church: Well, I don't know as that results in a rate proposition.

Mr. Cowan: When a man goes out from the Long-Bell Lumber Company, for example, to sell a car of lumber, we will say at Crawford, Texas, you can find occasionally a place where there is no other railroad, but large enough to support one public school——

Mr. Garwood: I suggest the oratorical part of the interrogatories may be left out.

Mr. Cowan: I thought that would be the most pleasurable part. Suppose the Long-Bell Lumber Company goes out to Crawford, Texas, to sell a car of lumber, and Mr. Stephenson here goes out to sell a car of lumber to the man at Crawford. Mr. Stephenson gets no allowance whatever and pays the full Santa Fe rate to Crawford; Long-Bell would have to pay the differential above or could itself deliver the lumber with its own power, and let the Santa Fe take it, just like Mr. Stephenson does from his mill; now, how would the one be at an advantage over the other on account of the Santa Fe rate?

Mr. Church: I don't understand the Long-Bell people have any railroad or power of their own.

7024 Mr. Cowan: But I will assume that they do.

Mr. Church: I do not care to assume that they do, because I know they have not.

Mr. Cowan: You mean the Long-Bell interests do not own any railroad?

Mr. Church: I am speaking of the Long-Bell Lumber Company.

Mr. Cowan: I said interests.

Mr. Church: I have heard stated that the Long-Bell had no railroad interests.

Mr. Cowan: Well, assume that to be the case for the purpose of my question. Let me assume that to be the case, that they can deliver to the Santa Fe just on equal terms and get the same rate, or the Fullertons can do that same thing and get the same rate right on over to Crawford, wherein has one got an advantage over the other that you can see?

Mr. Church: Assume that to be the case; Mr. Stephenson perhaps has not the extent of investment that you say the Long-Bell Company have.

Mr. Cowan: Is that your answer?

Mr. Church: Yes, sir.

Mr. Walter: I think Judge Cowan misunderstood the witness' answer a moment ago as to that tonnage. He did not say
7025 the tonnage would move, but it would be available to the purchasers.

Mr. Cowan: I had it read over in order to see, and I asked him what would be the case, based on the talks he had with various traffic men.

Examiner Burchmore: I understood eight times the tonnage to be moved.

Mr. Walter: No; available for movement.

Mr. Church: I did not mean it would increase that much, because there would not be the market, but it would open up that much additional territory.

Mr. Walter: To the consumer?

Mr. Church: To the consumer; that is what I intended to convey.

Mr. Cowan: Why would it not move?

Mr. Church: There is not the demand for it. This territory takes so much lumber. You cannot increase it without some different condition.

Mr. Coleman: It is a paper proposition; is that it?

Mr. Church: The eight to one? I did not say so; no more than some of your rates are paper propositions.

Mr. Cowan: Let us see who you represent and what your
7026 interest is. Let us see what your opinion is based on.

Mr. Church: I think I explained that my opinion is based on talks with traffic people.

Mr. Cowan: You represent the Pickering interests, do you not?

Mr. Church: Yes, sir.

Mr. Cowan: And they own and operate a tap line. You testified about that.

Mr. Church: I have testified about the Louisiana Central.

Mr. Cowan: And they get a division?

Mr. Church: The Louisiana Central gets a division.

Mr. Cowan: Have you got any greater investment in proportion to the capacity of your mills than have other lumber interests?

Mr. Church: I do not know what the investments of the Pickering interests are in the mills.

Mr. Cowan: I mean investment in railroads.

Mr. Church: The Louisiana Central has a larger investment in their railroads than some others in that neighborhood.

Mr. Cowan: And some others have larger investments than you, dependent on the length of line?

Mr. Church: Yes, sir.

7027 Mr. Cowan: And amount of service performed.

Mr. Church: Yes, sir.

Mr. Cowan: Proportionate to the cost per ton of the output, are you able to say that your mill has a larger railroad investment than does Mr. Stephenson?

Mr. Walter: Now, let us have that cost per ton.

Mr. Cowan: If he wants to give it, he can.

Mr. Walter: We are going to object unless you first make your proffer of the cost, and give the basis of what the cost is, as compared one with the other, and then the witness can tell you.

(Question read.)

Mr. Cowan: Strike out the word cost. Proportionate to the volume of the output.

Mr. Walter: Now state the volume.

Mr. Cowan: That is absurd.

Mr. Garwood: I want to call attention at this time to the proposition that we have never been permitted to go into the cost of production at all. We made some slight endeavor to do it, but we were not permitted to, and we have of course acceded to that ruling. Now, if we start back into it, and the rulings are to be reversed, and I take it they are not, we will have to go back over all

7028 that and get our witnesses back here.

Examiner Burchmore: Will you ask your question again?

Mr. Cowan: Strike it out, and I will ask it again. Proportionate to the volume of the output, is the investment in railroad appliances of the Pickering Company greater than the investment of your competitors in that part of the country?

Mr. Church: It is greater than some. I do not know the extent of others.

Mr. Cowan: And probably less than others?

Mr. Church: It is probably less than some and greater than some.

Mr. Cowan: You can haul your traffic and deliver it to the Santa Fe without any difficulty?

Mr. Church: The Louisiana Central can, yes, sir.

Mr. Cowan: Well, that is you, is it not? Practically? Does not the lumber company own it?

Mr. Church: No, the lumber company does not own it?

Examiner Burchmore: That has been fully testified to.

Mr. Cowan: Suppose we take an interest which does get the four cent division of the rate, and the same people that own the lumber company own the railroad which gets it, and they

7029 are going out to Crawford and compete for this supposed sale of lumber, won't they have just as much advantage as if they delivered it to the Santa Fe and took the straight rate?

Mr. Church: Well, the Santa Fe does not join with any other lines to Crawford; it is a local point. They apply that rate from

their main line. The expense of getting that car to the main line may be different between the two situations.

Mr. Cowan: Exactly, and the people on the Santa Fe main line have to get the lumber to the main line, do they not, from the stump into the mill, they have to get it to the Santa Fe line?

Mr. Church: The Santa Fe main line does not participate with through rates with anybody.

Mr. Cowan: If their cost is equal in getting the lumber from the mill to the main line, wherein lies the advantage that they have?

Mr. Church: I do not understand the cost of getting it to them is the same in each instance.

Examiner Burchmore: We will have to turn to some other fact.

Mr. Cowan: You said there were not rates in by any other line via the Santa Fe to New Mexico.

7030 Mr. Church: I think there are none. The tariff is the best evidence.

Examiner Burchmore: Is it your understanding there are, Judge Cowan?

Mr. Cowan: We had the Roswell case up before the Commission and after the decision my clients told me the Santa Fe finally put in through rates from certain points, but I think they make a differential from certain points, but the rates are in. Now, will you name some important local point on the Santa Fe that consumes lumber?

Mr. Church: Woodward, Oklahoma.

Mr. Cowan: What is the line that runs out from there, building in this direction?

Mr. Church: This is a local Santa Fe point in Northwest Oklahoma.

Mr. Cowan: Name some in Texas.

Mr. Walter: You have got one there. What do you want to know about it?

Mr. Cowan: He says it is an important place, and has named it.

Mr. Church: I have been told it is about four or five thousand people.

7031 Mr. Andrews: How many cars of lumber a month does it consume?

Mr. Church: I have no figures. Mr. Coleman can tell you.

Mr. Coleman: Have you ever been there?

Mr. Church: I never have.

Mr. Cowan: I have tried too many law suits, and you have——

Mr. Church: There has been a good deal of increase in the population and immigration in that country. I am told that is the population.

Mr. Cowan: What other place is there on the Pan Handle lines of the Santa Fe in western Oklahoma?

Mr. Church: I don't know as to that country very well.

Mr. Walter: We will give you one, if you want it. Alva.

Mr. Cowan: You say that is only on the Santa Fe? You had better get your geography.

Mr. Walter: It is a junction point now; yes.

Mr. Cowan: Let us see if he can name some more.

Examiner Burchmore: We can refer to the tariffs for a list of the stations.

Mr. Cowan: But the witness has given an opinion which is undoubtedly based on want of knowledge——

Mr. Garwood: I think that is a gratuitous and uncalled-
7032 for and incorrect statement.

Mr. Cowan: I do not mean to reflect on the witness——

Mr. Garwood: I do not think you do, but it is just your general exuberance of spirit.

Mr. Cowan: I have not had any this morning.

Mr. Garwood: But I do not think counsel ought to fill the record with these unintended reflections on the witness. The witness is here and has shown his connections, and I think it is altogether improper for counsel to make such a statement.

Mr. Cowan: If it is improper, I withdraw my remark, but I do not want to withdraw the question.

Mr. Walter: Try Quinlan.

Mr. Cowan: Yes, let us see if he knows. Do you know how large a place it is?

Mr. Church: No, I do not.

Mr. Cowan: Go down into Texas on the Pan Handle lines——

Examiner Burchmore: Let me ask what your line of questions is going to be. Are you trying to get a list of towns——

Mr. Cowan: No, I am trying to find if the witness, who comes here and expresses an important opinion, has ever considered the real facts.

Mr. Garwood: It does not require proof to show there are
7033 thousands of local stations on a system as extensive as the Santa Fe, and for the benefit of counsel we can introduce a map of the Santa Fe, and all of its connections, which will show the points which are local and those which are not local.

Mr. Walter: And when the new census figures are announced, we will give him the population of all the towns.

Mr. Coleman: Why cannot counsel agree, in order to stop this to strike out the testimony of the witness, and let us get down to something substantial.

Mr. Walter: Not at all.

Mr. Coleman: Then we want to cross examine.

Examiner Burchmore: I think the cross examination has gone far enough.

Mr. Cowan: I think so too.

Mr. Coleman: I would like to ask if your 233 lumber producing roads, and 200 lumber producing roads do not include the tap lines?

Mr. Church: The tariff shows for itself.

Mr. Coleman: I know; we wanted that tariff to show for itself, but you have gone on to explain it. Tell me that.

Mr. Church: Some are short lines; yes, sir.

Mr. Coleman: How many?

7034 Mr. Church: That statement shows that twenty are taken as larger producing lines. The balance are not all short lines, because destination lines are shown, as well as originating line.

Mr. Coleman: If you do not know, say so, but——

Mr. Church: I have told you, I think, what the tariff shows.

Mr. Coleman: I want to know if you included all the tap lines, and if so, how many there are.

Mr. Church: I did not count the tap lines, as you call them, but the tariff speaks for itself, and shows trunk lines as well as short lines.

Mr. Coleman: Does the tariff distinguish them at all?

Mr. Church: No.

Mr. Coleman: I am asking you if you cannot distinguish them and tell me how many tap lines you included which get allowances.

Mr. Church: I do not know all the tap lines which get allowances. I have not access to their records.

Mr. Coleman: Well, in the question if it is your opinion there is a difference of say three and one-half cents in favor of a point open to one market and open to one producer and not to another;

7035 that is a discrimination against the one that cannot get in.

Mr. Church: Yes.

Mr. Coleman: That is our opinion too. That is all.

Mr. Walter: That seems to be settled.

(Witness excused.)

Mr. Coleman: This statement on Exhibit 1 should be stricken out: "The lumber tonnage produced by the lines permitted to carry through rates to Santa Fe points is a drop in the bucket, compared with the tonnage that would be made available to consumers in Santa Fe territory if all the lines participating in the tariff were permitted to carry through rates on a competition basis." Will you agree to strike that out as not surely reflected in the tariff from which the witness is said to have gained his knowledge?

Mr. Garwood: I think perhaps the expression "drop in the bucket" might come out.

Mr. Coleman: No, the whole paragraph.

Examiner Burchmore: That surely is not a description of anything in the tariff.

Mr. Walter: Let it go out.

7036 M. B. NELSON was called as a witness, and having been duly sworn, testified as follows:

Mr. Garwood: Where do you reside?

Mr. Nelson: Kansas City, Missouri.

Mr. Garwood: Have you any connection with the Long-Bell Lumber Company?

Mr. Nelson: Yes, sir, I am a director and general sales manager.

Mr. Garwood: How long have you held that position there?

Mr. Nelson: I have held the position of sales manager for some thirteen years, and a position as director for some seven years.

Mr. Garwood: Are you a stockholder in the Long-Bell Company?

Mr. Nelson: Yes, sir.

Mr. Garwood: Is that stockholding a substantial business interest?

Mr. Nelson: Yes, sir.

Mr. Garwood: In other words, it goes beyond any mere qualifying interest?

Mr. Nelson: Yes, sir.

Mr. Garwood: It is a substantial business interest?

7037 Mr. Nelson: Yes, sir.

Mr. Garwood: Do you own any stock in any way in either of the three railways in which other stockholders in the Long-Bell Company own stock interests?

Mr. Nelson: No, sir.

Mr. Garwood: None whatever?

Mr. Nelson: No, sir.

Mr. Garwood: I will ask you, Mr. Nelson, whether in making sales of lumber for the Long-Bell Company, your sales departments take into account in any way whatsoever any division of the rates that either of the roads in which other stockholders of the Long-Bell Lumber Company have any interest?

Mr. Nelson: None whatever.

Mr. Garwood: Is there any connection between the sales departments of your company and the railway departments in any sense?

Mr. Nelson: No more than any other line of railroad over which we ship.

Mr. Garwood: Do your salesmen know of the divisional arrangements which these roads that I have mentioned have with other railroads?

Mr. Nelson: Not with my knowledge.

7038 Mr. Garwood: And those arrangements are not taken into account in any manner whatsoever in the selling of lumber?

Mr. Nelson: No, sir.

Mr. Garwood: From your observation and experience in the selling of lumber, does that condition obtain generally with regard to other lumber interests, the stockholders in which are supposed to have stockholding interests in railroads?

Mr. Nelson: They do not so far as I have been able to learn.

Mr. Garwood: So far as you know that applies to all?

Mr. Nelson: Yes, sir.

Mr. Garwood: Have you any yards at local points in Kansas territory?

Mr. Nelson: Yes, sir.

Mr. Garwood: On the Santa Fe, I mean.

Mr. Nelson: Yes.

Mr. Garwood: Can you state what effect, if any, the cancellation of rates by the Santa Fe with its connections has on the lumber markets at local points in its territory, Santa Fe territory, in Kansas, for instance?

Mr. Nelson: It restricts the territory in which the yards located

at local points on the Santa Fe are able to purchase their
7039 lumber. The restriction with our yards in the State of Kansas is not quite so great as it is in the states of Oklahoma and New Mexico.

Mr. Garwood: I will ask you whether those rate arrangements, in addition to restricting the territory from which the local dealers can purchase, conversely does not also of course restrict the market in which the producing territories can sell?

Mr. Nelson: Yes, sir.

Mr. Garwood: I will ask you if it follows from both of those propositions that mills situated directly on the Santa Fe are given an advantage in all those local markets?

Mr. Nelson: It does give them an advantage.

Mr. Garwood: Does it tend to restrict the market of those situated on such local points to mills situated on the Santa Fe directly?

Mr. Nelson: It forces the dealers located at local points on the Santa Fe to buy largely of the mills that are located on the Santa Fe proper.

Mr. Garwood: You have mentioned Santa Fe territory in Kansas and Oklahoma. Does those same general conditions apply in New Mexico?

7040 Mr. Nelson: More so in New Mexico than either Kansas or Oklahoma.

Mr. Garwood: Can you give any illustrations?

and Oklahoma. Oo those same general conditions apply in New Mexico have, I believe the tariff will show, a five cent lower rate than from mills located on any other line of road.

Mr. Garwood: What effect does that have on first the dealer at such local point and also as to the producer not situated on the Santa Fe?

Mr. Nelson: Well, the lumber is consumed in almost all territory largely by farmers and settlers surrounding the stations and the dealer that is located at a local point on the Santa Fe is limited in his source of supply to the mills that can reach there on the Santa Fe rate. The dealer that is located on some other line of road has a much larger territory from which to buy his lumber. Consequently it gives the dealer located on some other line of railroad than the Santa Fe that advantage over the dealer located on the Santa Fe, and in making investments, our company has avoided, so far as possible, locating new yards on the Santa Fe for that reason, figuring that we would have an advantage by locating the yards on some other
7041 line, where we had a wider territory in which to purchase our lumber.

Examiner Burchmore: I shall have to ask what bearing this has on the issues in this case.

Mr. Garwood: I think it is quite apparent. It is in evidence here that a contract has been entered into by the principal intervenor with the Santa Fe road, in which the Santa Fe agreed to cancel out all joint rates. Now, we are showing that——

Examiner Burchmore: Do you think the record is full on that point?

Mr. Garwood: Yes; now, we are showing that there has been a continuous operation in consonance with the terms of that contract. I think we have gone far enough to illustrate it, and I was just closing when your Honor interposed the question.

Mr. Coleman: Mr. Kirby's testimony distinctly showed, and it is the only testimony in the case, that absolutely no action had ever been taken toward cancelling out the joint rates.

Mr. Walter: We are showing that it has been done.

Examiner Burchmore: I think we will not discuss the point any further. We can read the testimony in the case to see what
7042 it does show, and as to the rates, we can look to the tariffs to see what they are.

Mr. Garwood: Your yards do not always buy their lumber from the Long-Bell mills, do they?

Mr. Nelson: No, sir; they do not.

Mr. Garwood: In other words, they are conducted as any other independent yard, and buy where it is to their best advantage to buy their supplies?

Mr. Nelson: Yes, sir; the investment is treated on our books entirely separate, and treated as a separate corporation.

Mr. Garwood: You mentioned New Mexico. Have you a yard in New Mexico?

Mr. Nelson: We have one at Clovis, and perhaps we have others; I am not in charge of that department.

Mr. Garwood: Where do you buy your supplies for the Clovis, New Mexico, yard?

Mr. Nelson: We buy it wherever we think we can buy it to the best advantage.

Mr. Garwood: Do you purchase any there from mills situated on the Santa Fe?

Mr. Nelson: Yes, sir.

7043 Mr. Garwood: In large amounts?

Mr. Nelson: Whatever the requirements are.

Mr. Garwood: Whatever the requirements are?

Mr. Nelson: It might be considered large or small.

Mr. Garwood: What effect on your purchases at that mill does the cancellation of rates by the Santa Fe have?

Mr. Nelson: It forces us to pay a higher price for our lumber at that point on the rate of freight to Clovis than we would be forced to pay if that territory—if other shipping territory was opened up to us.

Mr. Garwood: That is all.

Cross-examination:

Mr. Cowan: Most of your supply at the Clovis yard you get from your own mills in Louisiana, do you not?

Mr. Nelson: No, sir.

Mr. Cowan: Where do you get most of it?

Mr. Nelson: I am not prepared—I have not any statement here which would show where we get the most of it. I do not handle the purchases personally. If it was thought necessary I could furnish

the Commission with a statement for the last five months showing where we have purchased it.

7044 Mr. Coleman: Do you handle the products of the De Ridder mill?

Mr. Nelson: I sell it, that is through the Sales Department of the Long-Bell Lumber Company.

Mr. Coleman: Let me ask you if you could not get into Clovis by way of the Santa Fe on the lower rates from De Ridder.

Mr. Nelson: We could by paying the L. & P. local rate of five cents.

Mr. Coleman: Is the L. & P. dominated by the Long-Bell interests?

Mr. Nelson: The L. & P. is owned by some of the stockholders that are stockholders in the Long-Bell Lumber Company.

Mr. Coleman: How far are they from the Santa Fe rails at De Ridder?

Mr. Nelson: I have no accurate measurements in my mind. Only a short distance.

Mr. Coleman: You have in Kansas, I believe, about forty yards at local Santa Fe points, have you not?

Mr. Nelson: No.

Mr. Coleman: How many?

Mr. Nelson: I could get you those figures.

7045 Mr. Coleman: You could give me a guess right now, could you not?

Mr. Nelson: Local Santa Fe points?

Mr. Coleman: Yes.

Mr. Nelson: I think we have only four or five at local points in Kansas.

Mr. Coleman: How many have you altogether?

Mr. Nelson: Retail yards?

Mr. Coleman: Yes.

Mr. Nelson: About 85, I think. I have not any list of them.

Mr. Cowan: You say that no consideration is given in selling lumber to the fact that the railway which I will call a tap line, in order to designate it, which is owned by the same individuals that own the lumber company or saw mill gets a division of the rate; that that does not bind its reflex in the selling price of the lumber.

Mr. Nelson: The division of the rate from the mill to destination has no bearing whatever upon the sale of our lumber.

Mr. Cowan: Nor on the price at which you sell it?

Mr. Nelson: Nor on the price at which we sell it It is immaterial with us what roads get the long or short haul, or the division

7046 of the through rate.

Mr. Cowan: And I understood you to apply that generally to other companies who sell lumber also.

Mr. Nelson: I do not know what they base theirs on. I only know what we base ours on. I understand, that is from hearsay——

Mr. Cowan: I am just seeing if I understood your evidence, in order that I might ask you a question. As I understood it, you testified that you make no difference in the price at which you sell

the lumber to the dealers on account of the fact that the Louisiana & Pacific Railroad is owned by some of the stockholders in your Long-Bell Lumber Company, and that that railroad gets a division of the rates. I think I have stated it correctly, have I not? That is what you said?

Mr. Nelson: I stated that it was immaterial.

Mr. Cowan: And that you made no difference in the price on account of that fact.

Mr. Nelson: No, we make no difference on account of the divisions we get, because we are not interested in it.

Mr. Cowan: That is what I understood you to say, and then I understood Mr. Garwood, or if my memory serves me, Mr. Garwood then asked you whether other lumber companies which have
7047 these short railroads serving them, make any difference in their selling price to the dealer on account of the fact that they do or do not get a division, and you answered that in this way, that you had never observed it if they did.

Mr. Nelson: I have no means of knowing. You are correct in that, that I have no means of knowing whether they did or not.

Mr. Cowan: I think you answered so far as you had observed, they did not.

Mr. Nelson: Yes, sir, so far as I observed.

Mr. Cowan: Then if it is immaterial as you have stated, and the practice is general to not make a difference, as you have stated it to be in the case of the Long-Bell Company and the Louisiana & Pacific division, what effect would it have, and what difference would it make if the Kirby Lumber Company should incorporate their railroad, and apportion out the stock of that incorporated railroad to the stockholders in the Kirby Lumber Company, or some of them, and upon that incorporation being perfected, should get a division of seven cents per hundred pounds from their mills to Galveston? Now, who would get the trade at Galveston, in your opinion?

Mr. Nelson: The chances are the man that gave the best
7048 service and had the lowest price for delivery at Galveston, would get the business.

Mr. Cowan: Would it be a disadvantage to your business if such a thing as I have stated should happen?

Mr. Nelson: Not if the Kirby Lumber Company had no interest in the railroad.

Mr. Cowan: I assumed in my question a case similar to the Long-Bell situation, that the stock in the incorporated road should be apportioned out to a portion of the stockholders in the Kirby Lumber Company, say to a majority interest. Now do you say that would not make any difference in your trade in Galveston if such a thing should happen?

Mr. Nelson: I do, so long as the same through rate applied from both mills.

Mr. Nelson: That is to say it would not affect the price of lumber nor enable the Kirby Lumber Company to undersell you, because of the fact that that seven cent division was given.

Mr. Nelson: Oh, I don't know what effect it would have on the price.

Mr. Cowan: Suppose that the through rate is charged from a Santa Fe station to New Mexico, and that Mr. Kirby, being an owner of 51 per cent of stock in the Kirby Lumber Company,
7049 should be given a rebate by the Santa Fe of all the rate to New Mexico, do you think that would make any difference in the price of the lumber delivered in New Mexico that he would sell compared to what you would sell, who did not get the rebate?

Mr. Nelson: That would depend entirely upon the fact whether Mr. Kirby took advantage of that and charged—took the rebate as a profit, or whether he took advantage of that and used his rebate to lower the price.

Mr. Cowan: Can you conceive of a case in which human nature has gone to the point that he would not take advantage of it?

Mr. Nelson: I do not know that my conception would be worth anything for the record.

Mr. Cowan: Now, Mr. Andrews suggests the question if it makes no difference to your company, the Long-Bell Lumber Company who gets the long haul or the short haul, or what division they get, why do you ship all your traffic practically over the Louisiana & Pacific Railroad?

Mr. Nelson: We start it over that road because of arrangements or contracts with the Louisiana Pacific, that is all.

Mr. Coleman: Referring to your De Ridder mill, you said that the only way you could get into our local Kansas points would be by paying this five or six cent local rate——

7050 Mr. Nelson: Five cent local rate.

Mr. Coleman: That is from your own mill up to our junction point, a very short distance.

Mr. Nelson: Yes.

Mr. Coleman: Now that could be performed as a switching charge, I suppose, at a very small expense?

Mr. Nelson: I am not a railroad man, I do not know what the switching charge—I cannot distinguish a switching charge from a charge of any other nature performed by the railroad company.

Mr. Coleman: You ship some stuff of course from your De Ridder mill. Over what road, in the main, does that move?

Mr. Nelson: I think it moves over the Louisiana & Pacific altogether.

Mr. Coleman: Now, then, what is the next connection with the Louisiana & Pacific?

Mr. Nelson: It depends on the destination.

Mr. Coleman: Will you name any road and any distance.

Mr. Nelson: The Frisco system, Southern Pacific, Iron Mountain, Kansas City Southern——

Mr. Coleman: Take the Frisco, how far is that from your
7051 mill?

Mr. Nelson: At De Ridder?

Mr. Coleman: Yes.

Mr. Nelson: I think 25 or 27 miles. I am not familiar with the exact distance.

Mr. Coleman: The Iron Mountain is how far?

Mr. Nelson: It is about forty-five miles.

Mr. Coleman: And you have to pay a rate on the Louisiana & Pacific on that business, do you not?

Mr. Nelson: If it is going to the junction point with the Iron Mountain, we pay the local rate between——

Mr. Coleman: What would that be?

Mr. Nelson: The local rate to Lake Charles where the delivery would be made, is five cents.

Mr. Coleman: If it was going on a joint through rate, what part of that would the Louisiana & Pacific get?

Mr. Nelson: I don't know.

Mr. Coleman: Do you mean to tell us that you as sales agent absolutely do not know the divisions you get with that railroad?

Mr. Nelson: I do.

Mr. Garwood: Mr. Nelson, if you have no personal objection, I would be obliged if you would state to the Commis-
7052 sioner what is the extent of your stock owning interest in the Long Bell Lumber Company.

Mr. Nelson: Would you want par value, or book value?

Mr. Garwood: Well, the par value.

Mr. Nelson: Inventory value?

Mr. Garwood: Yes.

Mr. Nelson: Or par value?

Mr. Garwood: Give your book value of it.

Mr. Nelson: About $270,000.

Mr. Andrews: I did not understand what value you were asking him about.

Mr. Garwood: I asked him the value, and he asked me whether it was par value or book value.

Mr. Andrews: But I did not know what the subject matter was.

Mr. Garwood: His stockholdings in the Long-Bell Company.

Mr. Andrews: His personal holdings?

Mr. Garwood: Yes. I will ask you if you own any interest in the stock of any railway in which other stockholders of the Long-Bell Company own stock.

Mr. Nelson: None whatever.

Mr. Garwood: None at all?

Mr. Nelson: No.

7053 Mr. Garwood: You therefore have no financial interest in any way in either of the railroads that have been testified to in this record?

Mr. Nelson: None whatever.

Mr. Garwood: Now you compete with the lumber interests such as the Pickering, the Central Coal & Coke Company, the Kirby Lumber Company, and others, do you?

Mr. Nelson: Yes.

Mr. Garwood: And your answer to the question as to whether the divisions in rates have any bearing on your sale is drawn from your

contract and competition with all of these varied interests in the market.

Mr. Nelson: I do not believe I caught that.

(Question read).

Mr. Nelson: I don't believe I understand.

Mr. Garwood: From your general observation of the trade, in other words, is what I am getting at. Your statements that so far as you have observed and know with others, independent of your own individual business, the divisions that are allowed these so called tap lines, have no effect on the sales of lumber; your opinion on that is drawn from your observation of the general trade as you
7054 have been thrown in contact with it?

Mr. Nelson: Yes, sir.

Mr. Garwood: Now do you have any transportation over any line of railroad?

Mr. Nelson: No.

Mr. Garwood: Free transportation, I mean.

Mr. Nelson: No, I have none whatever, that is all.

Mr. Cowan: Was the list of stockholders in the lumber company and the railroad company filed as requested at New Orleans?

Mr. Farrar: Yes, sir, all of them.

Mr. Cowan: In what particular part of the business is your stock ownership?

Mr. Nelson: Long-Bell Lumber Company. I have interests in other companies in which the Long-Bell Company are interested, and some in which they are not.

Mr. Cowan: When you said $270,000, that is the aggregate?

Mr. Nelson: On the investment in the Long-Bell Lumber Company, and not what is called the allied companies.

Mr. Cowan: Does the Long-Bell Lumber Company, as itself, as a corporation, operate the retail business?

Mr. Nelson: Yes, sir.

7055 Mr. Cowan: Or is it done under a separate corporation?

Mr. Nelson: No, it is done under the name of the Long-Bell Lumber Company proper, the only distinction being that a separate amount is set out for them to operate under.

Mr. Cowan: I guess the records taken at New Orleans will show the relations of those various companies. I do not want to go into that.

Mr. Andrews: Has a list of stockholders been filed?

Mr. Garwood: They have all been filed. I think it is very fully in the record.

Mr. Cowan: Does the Long-Bell Lumber Company handle the entire output of all these mills of subsidiary companies?

Mr. Nelson: Yes, sir, it does.

Mr. Cowan: Have you a statement showing the amount of lumber that you do ship to Santa Fe local stations?

Mr. Nelson: I haven't it here, but it could be furnished, if it is desired.

Mr. Cowan: I would like you to furnish that, I think, in view of the statement.

Mr. Andrews: Furnish a statement showing the amount of lumber shipped to Santa Fe local points, and the places from which you get it.

7056 Mr. Nelson: Well, you mean you want a statement of our retail yards for how long a period, that they bought their lumber?

Mr. Andrews: No, take a limited period, say the latest three months you can figure.

Mr. Nelson: Take some three months?

Mr. Andrews: September, October and November of last year; that would be the most recent business.

Mr. Nelson: You want where we purchased the stock?

Mr. Andrews: The point from which the yard was supplied, and the quantity used.

Mr. Nelson: I am not sure we can furnish a statement showing from what points the lumber was shipped, because some of this lumber is purchased from wholesalers who have bought the lumber from somebody else, and our records would not show the shipping points.

Mr. Andrews: The bill of sale would show the point of origin?

Mr. Nelson: I do not think we have in all cases the bills of sale on all shipments. The expense bill is returned to the shipper.

Examiner Burchmore: I wonder if you have in mind the

7057 same thought Judge Andrews has? As I understood Judge Andrews, he wanted to know how much the Long-Bell mill shipped into the local Long-Bell yards on the Santa Fe.

Mr. Andrews: No, I wanted to know the yard consumption, so to speak, determining that by the amount shipped into these local yards on the Santa Fe, and then I wanted the comparison as to where they were supplied from on the statement the witness has made that they did not supply all that lumber from their own mills. And I wanted the details for whatever they might be worth, and whatever they might show.

Mr. Cowan: Can the statement be furnished?

Mr. Garwood: Can you furnish that statement?

Mr. Nelson: I can furnish the statement as nearly correct as we can obtain from our records. As I state, in some cases we may not have the bills of lading to show just where the shipments originated.

Mr. Walter: The Santa Fe could give that information better perhaps.

Mr. Nelson: I think the Santa Fe could get from their own records a more correct statement.

Mr. Coleman: Why do you think that?

Mr. Nelson: You have a copy of the expense bills on record

7058 at your stations.

Mr. J. J. Coleman: You would first have to tell us where those yards are located.

Mr. Nelson: I could give you a list of our yards.

Mr. Andrews: Perhaps you can furnish the information without any trouble, if the inquiry be limited to lumber that originated from Santa Fe points. You would have that information, would you not?

Mr. Nelson: No, I do not know as we would. I do not think so any more than if it originated anywhere else. I am only assuming——

Mr. Andrews: Do the best you can.

Mr. Nelson: Yes.

Mr. Cowan: You do ship a substantial amount of lumber to Santa Fe local points?

Mr. Nelson: Yes, sir, we do. Our mill at Lufkin, Texas, is located on the Cotton Belt, and whatever material we can furnish to the local points in Kansas on the Santa Fe we furnish from that mill, because the rate from Lufkin to Kansas points is the same on the Cotton Belt that it is from local Santa Fe points, by order of the Commission.

Mr. Davis: How far is your mill at Lufkin—it is at Furber, within the corporate limits of Lufkin?

7059 Mr. Nelson: I do not know that it is within the corporate limits, but it is right in the town.

Mr. Davis: How far is the mill from the connection of the Houston, East & West Texas at Lufkin?

Mr. Nelson: Perhaps half a mile.

Mr. Davis: What rate is assessed on the Cotton Belt the business you desire to ship from Furber to Lufkin, when going to a point on the Houston, East & West Texas, where no through rate is applied?

Mr. Nelson: The Texas Commission rate of five cents, I believe.

Mr. Cowan: Are there other retail yards owned under other names than the Long-Bell Lumber Company that are under the general control of ownership of the Long-Bell Company?

Mr. Nelson: Yes, sir.

Mr. Cowan: And what companies are those?

Mr. Nelson: The Alfalfa Lumber Company.

Mr. Cowan: How many yards?

Mr. Nelson: I think there are 12 or 13.

Mr. Cowan: And what other company?

Mr. Nelson: So far as I know, the Long-Bell Lumber Company does not own or operate any yards under any other name. The stockholders of the Long-Bell Lumber Company own prac-

7060 tically all of the stock in the Minnetonka Lumber Company, but the Minnetonka Lumber Company has no connection whatever with the Long-Bell Lumber Company.

Mr. Cowan: Taking the yards that belong either to the Long-Bell Lumber Company, or some of the individuals associated in that company with one another in business, what is the total number of yards?

Mr. Nelson: I have not the correct number. I do not keep it in mind. If you want a statement to that effect, I could furnish it to you or to the Commission.

Mr. Cowan: Well, furnish it to the Commission. Mr. Farwell suggested a question, that he was under the impression there was somewhere around 200 yards belonging to various persons and corporations belonging to the Long-Bell Lumber Company.

Mr. Nelson: No, he is mistaken.

Mr. Cowan: Or in which Mr. Long had a substantial interest.

Mr. Nelson: Nothing like that number.

Mr. Cowan: This number which you gave a while ago in answer to Mr. Colenian applied only to the Long-Bell Lumber Company's yards proper.

Mr. Nelson: Yes, sir.

7061 Mr. Cowan: You would not want to make an estimate now until you furnished the list?

Mr. Nelson: No.

Mr. Farrar: We would say 86.

Mr. Andrews: The answer was 85 a while ago.

Mr. Farrar: I was under the impression it was 85, but a gentleman here says it is 86.

Mr. Nelson: I do not attempt to carry the number. They are buying and selling yards all the time, and that department is under Mr. Forsman.

Mr. Coleman: Could some one give the number of local yards, to save the trouble of making the statement?

Mr. Cowan: Just let the list be filed showing the yards and where each one is located.

Mr. Nelson: There are nine yards of the Alfalfa Lumber Company at the present time, and 19 owned by the Minnetonka Lumber Company.

Examiner Burchmore: Of what description, do you mean that are local to the Santa Fe?

Mr. Nelson: No, of all yards; I do not know the number. There are 68 Long-Bell proper.

Mr. Coleman: I believe Mr. Davis testified at New Orleans there was something like 30 at local points. I just wanted to know

7062 if you had sold any.

Mr. Nelson: I think the best way to get it is to file a statement showing where the yards are located.

(Witness excused.)

Mr. Garwood: Your Honor, we have testimony further to offer from the Sales Departments of lumber companies——

Mr. Andrews: Will you please name them?

Mr. Garwood: The Central Coal & Coke Company, the Pickering Lumber Company, the Chicago Coal & Lumber Company, the Missouri Lumber & Land Exchange Company, the Frost-Johnson Lumber Company, stockholders in which are also interested as stockholders in the various short lines as heretofore indicated in the record, whose testimony will be in general terms the same as that of Mr. Nelson, to the effect that the fact of divisions allowed short lines owned by stockholding interests in these several lumber companies have no effect in the sales of lumber made by their Sales Departments, and are not taken into account in any way whatsoever in those sales, and in their opinions have no effect upon the price; it being the general purport of such testimony substantially

as stated by Mr. Nelson. Now I understand that your Honor
7063 thinks that it is not desirable to go further with that line of testimony at this time, and it will be assumed that these witnesses would have testified along that line.

Mr. Andrews: I think, Judge, to shorten the time of this meeting, that we will be perfectly willing to agree, so far as the intervenors are concerned, that you have tendered the traffic men by name of each of the institutions you mentioned.

Mr. Garwood: These are the salesmen.

Mr. Andrews: The salesmen, and that each has testified concerning his business as Mr. Nelson has testified concerning the Long-Bell Lumber Company's business, with such incidental modifications as might be necessary as to the change in the individual cases. We do not care to exclude it, and we are willing to admit that that has been done, if agreeable to the Commission.

Mr. Garwood: With this addition, that the opinion of each witness that in his judgment, and from his observation of his own business and of others, that the allowances made by way of divisions to the tap lines, have no effect upon the sale of the lumber, even as a price or otherwise.

Mr. Andrews: Now, Mr. Nelson said that, and I am agreeing that these men testified to their business exactly as Mr. Nelson did, so it includes the whole thing, as he testified, only with such
7064 incidental changes as they might have.

Mr. Garwood: That is satisfactory.

Examiner Burchmore: I think we have already gone far enough on the point, and I believe Judge Andrews' suggestion meets the situation satisfactorily.

Mr. Garwood: I understand then, subject to exception as to its materiality, it will be considered that the witnesses so testified.

Mr. Cowan: Yes.

Mr. Garwood: That is all we have then.

Examiner Burchmore: Are there any other witnesses you desire to offer?

Mr. Garwood: No; that relieves us of a great deal of work.

Mr. Cowan: There is one thing, I think, wants to be given very serious consideration by all of the attorneys here, and put in the record so that you can lay the matter before the Commission when you return to Washington, and that is pertaining to the briefing and argument of this case. I do not know what the others may think about it, but we think on our side that it will be physically and practically impossible to brief this case in time for an argu-
7065 ment on March 15th. We are the people who are anxious to have this case decided, but there is hardly any use to attempt to do what is practically impossible. We think there ought to be some extension of time considered by the Commission. We are not ourselves now trying to point out what it ought to be, and *that* extension as short as may be in order to give opportunity to get this record in shape for briefing, and to brief it. You must understand that there are a number of statements that we have called for to be filed, and we may assume that it will be some little time

before some of them are filed, and some little time before the transcript of the testimony is made by the stenographer and furnished to the parties, and I just wanted to make that suggestion to go into the record.

Now, as to the matter of the Commission requiring exchange of briefs, before the date of argument, it is our belief that the railroad companies, the trunk lines, if they propose to file any brief of argument, and to argue this case before the Commission, ought to be required to present their briefs first. While they are defendants, they are the parties being investigated under this new power of the Commission, and they stand in the attitude of a judge nisi
7066 with an order to show cause, and we think the Commission ought to require the trunk line to present such briefs as they propose to file, if any, in the case, so that we may have them in order to have the right to answer them. Now we think that inasmuch as the tap lines, at least a number of them, filed their petitions asking the Commission to exercise this power under the law of suspending tariffs wherein these divisions were cancelled, stand in the next attitude of plaintiffs, and that the burden of proof is naturally upon the other parties, than us in the case, we think their briefs ought to be submitted to us, if there are going to be briefs submitted and exchanged for the argument in time that each party might reply. I do not mean by that that we should not proceed to the making of our briefs with diligence when the opportunity arises, before the other parties shall have presented their briefs as to that matter, but that we have the right to reply by brief before the date of argument to the briefs of the other side. I am not arguing the matter, and do not intend to, but am simply stating our position about that in order that the record may show.

Examiner Burchmore: I was intending to announce be-
7067 fore the adjournment that I think the Commission has formally notified the parties of the assignment of March 15th and 16th as the dates for the oral argument in this case.

Mr. Walter: Yes, sir.

Examiner Burchmore: I think notice to that effect was incorporated in the notice of this hearing.

Mr. Walter: Yes, sir, it was.

Examiner Burchmore: I think it was further announced by the Commission that the briefs of the parties would be due on March first.

Mr. Cowan: Yes, sir, that was the notice.

Examiner Burchmore: It being contemplated that each individual line might file a printed brief of not more than ten pages. I do not recollect whether the main briefs that were to be received from counsel representing all the tap lines, and in which the general questions were to be discussed were to be due on the same date or not, or whether the Commission fixed March first as the date for the intervenors' briefs.

Mr. Walter: Each one of the individual lines.

Mr. Cowan: I thought it was for all briefs.

Mr. Walter: No.

Mr. Coleman: I have so understood it, and that the tap
7068 lines were limited to a certain number of pages, and not the individual lines.

Examiner Burchmore: I mean the short lines. I was under the impression that counsel for the trunk lines had not intended to brief or argue the case, but counsel are present. I do not know——

Mr. Garwood: I do not assume for our lines that they would either file a brief or make any argument in the case.

Mr. Coleman: Of course it is our intention to file a brief and make an argument. I know there has never been any doubt about that.

Examiner Burchmore: Mr. Jeffery, what have you to say?

Mr. Jeffery: All I can say at this time is that I have not made up my mind yet.

Mr. Walter: Counsel indicated in his remarks that the burden rested somewhat on the short lines, and I am not saying anything further than to say that they did not file any tariffs which are complained of in this hearing.

Mr. Cowan: I put it on the ground that they had filed petitions asking the Commission to invoke the jurisdiction of suspending the tariffs. I said some of them. It was on that ground in part that I made my statement.

7069 Mr. Walter: I do not consider that we have any burden at all.

Mr. Coleman: Could not the matter be taken up and have the Commission determine the order in which briefs shall be filed?

Mr. Cowan: That was the object of my statement.

Examiner Burchmore: I understand that was the statement Judge Cowan made.

Mr. Coleman: In what class did you put us, as to filing a brief?

Mr. Cowan: I put you in the trunk line class.

Mr. Coleman: And require us to file the first brief?

Mr. Cowan: If you have any tariff cancelled out, you fall in that category, and if not, you do not.

Examiner Burchmore: May I make this suggestion. Would it not be convenient for counsel representing each of the several interests, to write the Commission at an early date within the next day or two making their suggestions as to their own briefs, and the briefs of other parties? The time is a little short perhaps, and yet it is desired to get this case in as soon as possible. The order suspending this tariff expires April 15th, as I recall it, and the Commission will have to take some action on that part of the matter before that time and if you can all write to the Commission within the next
7070 day or two, the matter will receive immediate action.

Mr. Garwood: I wish to concur in that portion of Judge Garwood's statement that it is going to be almost a physical impossibility to brief these cases within the time limited. I recognize the desirability and importance of as speedy a disposition of the matter as is possible, but——

Examiner Burchmore: Perhaps counsel can get together and make some concrete suggestion to the Commission.

Mr. Garwood: I think perhaps we can, but I know that Judge Cowan has to some extent limited by the same causes which limit me. I have to go from here to another hearing which will take us two or three days, I think. I do not wish, however, to be considered as concurring in the proposition that an intervenor who comes into a litigation with an entirely new and different cause of action in which he appears as in the attitude of a plaintiff, or as a proponent of a new cause of action can say that after he gets in with his new cause, that the burden of proof is on every one else in the record except himself. To the contrary, my understanding of the rule is that the burden of proof is very distinctly and directly upon him. I merely mention that so that my acquiescence in his first
7071 proposition may not be construed to be an acquiescence in the second as well.

Mr. Coleman: I would like to say that we have no objection to filing the first brief, if that is any advantage to anyone. We are as ready now as at any time, and if any matter arises we will claim the privilege of answering it in oral argument or by reply briefs.

Examiner Burchmore: Mr. Wood:

Mr. Wood: I would merely like to suggest that it occurs to me that whatever rule is fixed for the filing of these briefs that the time for the filing of the briefs by the intervenors should be sufficiently in advance of the oral argument at Washington, that the trunk lines may be advised of the position taken by the intervenors in their briefs. So far as I can see, there is no reason why the trunk lines should file any briefs in this case or participate in the argument, at least not at the present time. But I think that in view of certain suggestions that have been made by counsel for the intervenors from time to time and various vague and indefinite allegations in the petition of the intervenors, that we are entitled to have those briefs served upon us sufficiently in advance of the argument so
7072 that we may be advised of the intervenors' position.

Mr. Coleman: I would also like to suggest that since the time is necessarily short, that there be a kind of a gentleman's agreement if anyone should be three or four days late on his brief, no one will enforce the rule.

Examiner Burchmore: I do not know if the Commission would recognize a gentleman's agreement in regard to briefs. We are rather strict in that requirement.

Mr. Coleman: We have an immense record and some statements are to be made——

Examiner Burchmore: I think I will renew my suggestion that counsel get together, or each counsel advise the Commission in a letter as to their position.

Mr. Andrews: I rise to speak to that point. It will be impossible to have a consultation with counsel except those of us who are here. It is apparent it is impossible for us to agree what we are going to do about it, because each one seems to expect the other to do something in advance, and it seems to me the only solution of the proposition is for the Commission to set the order upon consideration of the question, and the time in consideration of the state of the

record. I apprehend, without knowing, that this record
7073 would not be accessible to counsel before the 15th of this month, and I also apprehend that counsel will not want to begin briefing until they can have the entire record, and probably those that want to make full briefs upon the subject will have to go to Washington to get the record in the Star Grain case, and to see the exhibits.

Mr. Garwood: That is the only way to do it.

Mr. Andrews: That will of course materially interfere with our making any agreement among ourselves as to what those movements should be, and I think therefore that will expedite the cause by agreeing here that we disagree about the proposition, and ask the Commission to take into consideration the entire situation and make such ruling about it as appears to be right.

Examiner Burchmore: Very well, the matter of dates for the briefs and the oral argument will be brought to the attention of the Commission. If there is nothing further, the case will stand adjourned without date.

Whereupon, at 12 o'clock M., the hearing in the above-entitled matter was adjourned without date.

a WASHINGTON, D. C., *May* 8, 1913.

To G. F. Snyder, Clerk United States Commerce Court, Washington, D. C.

DEAR SIR: Relating to exhibits introduced before the Commission in the Tap Line Cases, Nos. 90, 91, 92, and 93, you are requested to print only such exhibits as Dr. Needham and I designated to be printed during our conference in your office on May 8, 1913.

Yours truly, H. M. GARWOOD, *Att'y.*

1 Interstate Commerce Commission, Washington.

I, George B. McGinty, Secretary of the Interstate Commerce Commission, do hereby certify that the papers herewith attached are true copies of all the exhibits, except maps which are not attached hereto or made a part hereof, filed in the record in the proceeding entitled "In the Matter of the Investigation and Suspension of Schedules Cancelling Through Rates with Certain Tap Line Connections," Investigation and Suspension Docket No. 11, by the Louisiana and Pacific Railway Company, the Woodworth & Louisiana Central Railway Company, Mansfield Railway and Transportation Company, and intervenors, Alexander Gilmer Lumber Company, Industrial Lumber Company, Kirby Lumber Company, Lutcher-Moore Lumber Company and Yellow Pine Manufacturers Association, the originals of which are now on file and of record in the office of this Commission.

In testimony whereof, I have hereunto subscribed my name, and affixed the seal of the Commission, this 30th day of April, 1913.

[Seal Interstate Commerce Commission, 1887.]

GEORGE B. McGINTY,
Secretary of the Interstate Commerce Commission.

2 EXHIBIT No. 3.

Lumber Originating on Louisiana & Pacific Railway Company and Delivered to Connecting Lines for Six Months Ending October 31st, 1910.

	No. of cars.	Tons.	Revenue.	Aver. load. Tons.
G. C. & S. F. Ry. at De Ridder, La.	7	144	143.80	20.6

5 Louisiana & Pacific.

Interstate Commerce Commission Docket No. 11, I. & S. Exhibit No. 4. Witness, Davis. Complainants, ——. Date 12, 13, '10. Defendants, ——. Steno., Philips.

See p. 1617.

Ex. A.

The annual reports of the Railroads to the Railroad Commission of Louisiana, for the year ending June 30th, 1910, show the following to be the percentages of the tonnage of lumber, logs and staves of all freight carried, including intrastate and interstate business.

Name of railroad.		Per cent of lumber, logs and staves.
Arkansas, Louisiana & Gulf Ry. Co		65.38%
Arkansas Southeastern Railroad Co		90.23%
Bernice & Northwestern Ry. Co		98.50%
Brimstone Ry. & Canal Co		8.23%
Brimstone	60.44%	
Petroleum and oils	27.36%	
Chicago, Rock Island & Pac. Ry. Co		68.41%
Dorcheat Valley Ry. Co—		
Lumber		19.98%
Logs		76.07%
Staves		3.46%
Gulf, Colo. & Santa Fe Ry. Co		92.25%
(Only two other commodities that exceed one (1%) per cent.)		
Gulf & Sabine River R. R. Co		97.39%
Houston & Shreveport R. R. Co. (Greatest tonnage of any single commodity)		36.91%
Illinois Central R. R. Co. (Greatest tonnage of any single commodity)		25.33
Kansas City Southern Ry. Co. (Petroleum and other oils 33.17%)		39.14%
6 Kentwood & Eastern Ry. Co		93.19%
Kentwood, Greenburg & Swn. Ry. Co		61.59%
Lake Charles Ry. & Nav. Co.

On all the railroads shown above, the tonnage of lumber, logs and staves hauled, exceeds the tonnage of any other single commodity, considering the three commodities named as one.

On 31 of the railroads named, the tonnage hauled of lumber, logs and staves, is over 50 per cent. of the entire tonnage hauled.

On all of the railroads named, the tonnage of lumber exceeds 25% of all tonnage hauled except on five of them.

8 I, W. M. Barron, Secretary of the Railroad Commission of Louisiana, do hereby certify that the above statement was made by me, from the original records on file in the office of the Railroad Commission of La. at Baton Rouge, La., & the same is correct.

12 591. United States District Court for the Western District of Louisiana. United States of America vs. Louisiana & Pacific Railway Company. Judgment. Filed Feb. 20, 1911. Leroy B. Gulotta, Clerk, U. S. District Court. West. District of Louisiana.

13 District Court.

No. 591.

UNITED STATES OF AMERICA, Plaintiff,
vs.
LOUISIANA & PACIFIC RAILWAY COMPANY, Defendant.

This cause having come to be heard in due course, and the Court having considered the pleadings and the evidence in the case, by reason of the confession of the Defendant, as shown in its answer, and the law and the evidence being in favor of the Plaintiff and against the Defendant—it is therefore

Ordered, adjudged and decreed that the said Plaintiff, United States of America, do have and recover of the Defendant, Louisiana & Pacific Railway Company, the sum of One Hundred and no/100 Dollars ($100.00) and all costs of this proceeding.

Thus done, read and signed in open court on this the 20th day of February, A. D. 1911.

ALECK BOARMAN,
U. S. Judge.

Endorsed: No. 591. D. C. U. S. vs. Louisiana & Pacific Ry. Co. Judgment. Filed Feb. 20th, 1911. Leroy B. Gulotta, Clerk, U. S. District Court, West. Dist. of Louisiana.

14 Before the Interstate Commerce Commission.

Docket No. 1319.

STAR GRAIN AND LUMBER COMPANY et al.
v.
ATCHISON, TOPEKA & SANTA FE RY. CO. et al.

In the Matter of the Tap Line Allowances and Divisions, Being Docket Nos. 3400, Sub. 6, 3400, Sub. 7, 3493, 3512, 3513, 3514, 3524, 2548, 2551, 2552, and 2564, Consolidated under Investigation and Suspension Docket No. 11.

STATE OF LOUISIANA,
Parish of Calcasieu, ss:

C. M. Boswell, being duly sworn on his oath states that he is the Superintendent of the Lake Charles and Northern Railroad Com-

pany, and the General Superintendent of the Louisiana and Pacific Railway Company.

That as such Superintendent of each of said roads, on or about the Twenty Eighth day of October, 1908, he has given instructions to the joint agents of the Lake Charles and Northern Railroad Company and the Louisiana and Pacific Railway Company, that when a shipment was offered to a point on the joint track of said railroad companies, between Lake Charles and De Ridder, or to a competitive point beyond said points, that the agents should require the shipper to designate over which line of road such shipments should be sent, and to the best of my knowledge and belief, and from personal conversation with agents, all such shipments have been taken over the road so designated by the shipper, and I know of no case in which the shippers did not designate the road over which such shipment was to go.

This affidavit is made in response to request made by R. S. Davis, Traffic Manager of the Louisiana and Pacific Railway Company, pursuant to the suggestion of the Commissioner who took the evidence at New Orleans on the 8th, to the 15th days of December, 1910.

C. M. BOSWELL.

Subscribed and sworn to before me this Twenty Ninth Day of December, 1910.

[SEAL.] ROBERT JONES,
Notary Public in and for Calcasieu Parish, La.

My commission expires Sept. 1st, 1915.

15 Before the Interstate Commerce Commission.

STAR GRAIN & LUMBER COMPANY
vs.
ATCHISON, TOPEKA & SANTA FE RY. CO. et al.

In the Matter of Tap Line Allowances and Divisions at New Orleans, December 8-17, 1910.

In re Louisiana & Pacific, Sibley, Lake Bisteneau and Southern, and Woodworth & Louisiana Central Ry. Companies.

STATE OF MISSOURI,
County of Jackson, ss:

A. L. Sweet being duly sworn on his oath states that he attends to the rendering of the property of the Louisiana and Pacfiic Railway Company for taxation and knows how such property is assessed.

That said property is assessed in the same manner as any other standard railroad property in the State of Louisiana, all of which will appear by the Report of the State Board of Appraisers for the

State of Louisiana for the years 1909 and 1910, and on pages 14 and 97 of the report for 1909 and on pages 15 and 105 of the Report for 1910.

A portion of said railroad is exempt from taxation under the constitution and laws of the State of Louisiana, exempting railroads from taxation for a period of ten years.

Affiant attaches hereto copies of that portion of the Report of the State Board of Appraisers of Louisiana above referred to and affiant states that said copies hereto attached are correct copies and correctly show the manner and amount of the assessments of said road for said years.

Affiant further states that he also prepares the renditions to the State Board of Appraisers for the Sibley, Lake Bisteneau and Southern and the Woodworth and Louisiana Central Railway Companies, which are assessed in the same manner and which assessments are shown on pages 29, 36, 103 of the Report for 1909 and on pages 30, 38, 111 of the Report for 1910, copies of which are hereto attached; and for the information of the Commission one complete copy of the Report to the State Board of Appraisers, for the years 1909 and 1910, showing assessments of all railroads in the State of Louisiana and showing that the Louisiana and Pacific, Sibley, Lake Bisteneau and Southern and the Woodworth & Louisiana Central Railways are assessed in the same manner as other railroads, is herewith transmitted.

This affidavit is made in response to the question of Commissioner Harlan, at the New Orleans hearing, as to how these roads were assessed.

A. L. SWEET.

Subscribed and sworn to before me this 16th day of January, 1911.

[SEAL.] R. T. DEMSEY,
Notary Public in and for
Jackson County, Missouri.

KANSAS CITY, MO., *January* 14, 1911.

Mr. W. R. Thurmond, General Attorney—Office.

DEAR SIR: Commissioner Harlan asked me for a comparison of L. & P. Co.'s indebtedness to the various Lumber Companies on its Line, as of date June 30th, 1908, compared with April 30, 1909. The following statement shows the comparisons:

	June 30, '08.	Apr. 30, '09.
Due Hudson River Lumber Company	$115,620.00	133,842.61
The increase is caused by L. & P. purchasing 36 Log Cars and 1 Caboose.		
Due King-Ryder Lumber Company..	$137,113.00	149,820.93
The increase is due to L. & P. purchasing 20 Log Cars, 5 Flat Cars and 1 Tank Car.		
Due Calcasieu Long Leaf Lumber Company	$109,816.57	151,611.34
The increase is occasioned as follows: L. & P. purchased from the Calcasieu Co. the following:		
3 new Standard Gauge Locos. $29,204.00		
Expense converting Log Cars from N. G. to S. G $843.44		
2 Shay Locos. formerly N. G. $7,000.00		

Yours truly,

P. C. RICKEY,
General Auditor.

MANSFIELD, LOUISIANA, *Feb.* 25, 1909.

A called meeting of the Board of Directors of the Mansfield Railway and Transportation Company was held at its office this day.

Present, C. E. Jenkins, S. G. Sample, E. H. Payne and A. J. Peavy, a majority of the Board and a quorum.

Mr. E. H. Payne offered the following resolution, which after being seconded by Mr. Jenkins was regularly put and unanimously carried.

"Resolved that Seventy Five Thousand Dollars of the supplemental stock provided for in the amendment of the charter relating to that matter be issued and that it be issued to E. A. Frost.

Thereupon Mr. Jenkins offered the following resolution, which after being seconded by Mr. Sample was regularly put and carried unanimously:

"Resolved that the main tram road of the De Soto Land and Lumber Company from Mansfield, De Soto Parish, Louisiana, to Section Twenty One (21), Township eleven (11), Range Fourteen (14), in said Parish of De Soto, Louisiana, with all rights of way, etc., has been purchased by the officers of this company for and in the name of this Company for the consideration of One hundred Twenty-Eight Thousand Dollars (subject to the right of the vendor to use said track for logging purposes free of charge for the period of — years) and for said purchase price the six notes of the Company, Five for $20,000.00 each and one for $20,806.97 with 6 per cent per annum interest from date till paid, have been executed and signed in the name of the company by E. H. Payne, Secretary.

Now, said purchase having been made with the consent of all members of the Board of Directors, the same is formally ratified and made the act of the Company, as is also the act of the Secretary in executing and signing said notes which are hereby recognized and declared to be the valid obligation of the Company ab initio.

And the Secretary of the Company is authorized and directed to accept formal transfer of said property.

Thereupon, said resolutions having been adopted on motion of C. E. Jenkins duly seconded by Mr. Sample, it was moved and carried that the meeting adjourn subject to call.

(Signed) A. J. PEAVY, *Chairman.*

(Signed) E. H. PAYNE, *Secretary.*

I. C. C. No 2

Mansfield Railway & Transportation Company

Local Freight Tariff No. 3

APPLYING ON

Classes and Commodities

Between Stations on

Mansfield Railway & Transportation Company

Governed by the Western Classification No. 45, F. O. Becker's I. C. C No. 3 and Southwestern Lines' Classification Exceptions and Rules, Circular No. 1-X, F. A. Leland's I. C. C. No. 546 and Supplements Thereto and Reissues Thereof.

Issued March 12, 1909. **Effective April 19, 1909.**

Railroad Commission of Louisiana Authority No. 5616 of December 8, 1908.

ISSUED BY

E. H. PAYNE
General Freight Agent
Mansfield, La.

39

8—

NOTES.

NOTE NO. 1. Rates will only apply on HAY grown in Louisiana and the carrier reserves the right to require certificate to that effect from shipper.

NOTE NO. 2. Household Goods and Emigrant Movables with or without live stock, between stations in Louisiana. Will not apply on interstate traffic.

In case of loss or damage the carrier's liability shall be limited to $5.00 per hundred pounds on H. H. Goods.

One man shall be allowed to accompany the live stock when shipped, free of charge, to care for same.

The number of live stock to be shipped in one car shall be limited to ten head.

When the shipper instructs the goods to be shipped via the shortest line between any two points in Louisiana, and the carrier on whose line the shipment originates shall fail to so route the shipment, then the shipper shall not be required to pay more for the transportation of the goods than through rate via the shortest route to destination.

NOTE NO. 3 LIVE STOCK—CAR LOADS.

RULES AND REGULATIONS GOVERNING SHIPMENTS OF LIVE STOCK.

Standard Cars are 29 feet to and including 30 feet 6 inches in length, inside measurement.

Rates on Horses or Mules when loaded in larger or smaller cars, will be made as follows, inside measurement:

Cars less than 29 feet, 94 per cent of the Tariff for standard cars.		
Cars over 30½ feet, to and including 32 feet	104	per cent.
Cars over 32 feet, to and including 33½ feet	107	per cent.
Cars over 33⅓ feet, to and including 36½ feet	110	per cent.
Cars over 36½ feet, to and including 38 feet	113	per cent.
Cars over 38 feet, to and including 40 feet	116	per cent.
Cars over 40 feet, to and including 42 feet	125	per cent.
Cars over 42 feet, inside measurement	140	per cent.

ON ALL OTHER LIVE STOCK AS FOLLOWS:

Cars less than 29 feet,	94	per cent.
Cars over 30½ feet, to and including 32 feet,	104	per cent.
Cars over 32 feet, to and including 33⅓ feet,	107	per cent.
Cars over 33⅓ feet, to and including 36 feet,	110	per cent.
Cars over 36 feet, to and including 38 feet,	113	per cent.
Cars over 38 feet, to and including 40 feet,	116	per cent.
Cars over 40 feet, inside measurement	125	per cent.

1. **The released rates on Live Stock named in this Tariff will apply only when shippers execute the usual Live Stock contract of the form furnished by this Company, and when the animals are released to not exceed the following declared valuations:**

Each Horse or Pony (gelding, mare or stallion), Mule or Jack	$75.00
Each Ox or Bull	30.00
Each Cow	20.00
Each Calf	6.00
Each Hog	6.00
Each Sheep or Goat	3.00

When the declared value exceeds the above, an addition of 25 per cent will be made to the rate for each 100 per cent or fraction thereof of additional declared valuation per head, such rate not to exceed the not released rates shown herein; animals exceeding in value $800.00 per head will be taken only by special arrangement.

On shipments of Live Stock made without limitation of carrier's liability at common law, this Company will charge 150 per cent of rates published herein. Under this rule shippers will have the choice of executing and accepting contracts for shipments of Live Stock with or without limitation of liability, the rates to be made as provided herein.

2. **Sheep in Double Deck or Tiered Cars.**—To or from stations, Sulphur Springs, Ark., and south, the rate on Sheep in double deck or tiered cars will be 125 per cent of the Cattle rate, except as otherwise shown in Tariff.

3. **Live Stock in Mixed Car Loads.**—The rate on mixed car loads of Live Stock will be the highest rate for any grade of stock in the car, and subject to authorized percentages for cars of different lengths.

NOTE NO. 4. The following weights are established to be used in ascertaining the rates on LIVE STOCK in less than car load quantities.

One Gelding, Mare, Pony, Mule, Cow or Cow and Calf	1,000 pounds.
Burros	750 pounds.
Stallions, Jacks, Bulls	1,500 pounds.
Calves, Sheep, Goats, each, in lots of five or more	100 pounds.
When in lots of less than five each	175 pounds.
Lambs, each, in lots of less than five	100 pounds.
When in lots of more than five	75 pounds.
Hogs for market, actual weight or estimated at	250 pounds.
Pigs and Stock Hogs	Actual Weight.
Sheep, for market	100 pounds.
Yearling Colts and Cattle	1,000 pounds.
Crated or boxed	Actual Weight.

3

NOTES—Continued.

NOTE NO. 8.—Rates shown in Tariff applying on Lumber, will apply on the following: Lumber (except Walnut, Cherry, Butternut, Holly and imported woods), also on Lumber creosoted or otherwise chemically treated, and the following articles when manufactured from woods other than Walnut, Cherry, Butternut, Holly and imported woods, in straight or mixed carloads, minimum weight 30,000 pounds per car:

Agricultural Implements, Sleigh and Vehicle Wood, in the rough, not further finished than rough sawed, rived or split from the bolt.
Base Boards.
Bed Slats.
Billets, wood.
Blocks, Corner, Base Head and Plinth.
Box Lumber or Shooks, including Scarfed Berry Box Material, in bundles or racks.
Carpenters' Mouldings.
Casing.
Ceiling.
Combined Lath and Sheathing.
Fence Posts.
Flooring (except wood carpet.)
Grain Doors.
Guttering, rough.
Handle Timber, sawed square, rived or split from the bolt, not further finished.
Hoop Poles.
Lath.
Logs (also walnut logs not squared).
Paving Blocks.
Pickets.
Piling.
Sawdust.
Shavings.
Shingles.
Spools (for barbed wire), knocked down.
Staves, Heading and Hoops.
Tank Material, sawed to shape, racked.
Telegraph and Telephone Poles.
Telegraph and Telephone Cross Arms, Pins, Brackets and Braces.
Ties (Yellow Pine).
Wainscoting.
Well Tubing.

Wherever a commodity rate is established it removes the application of Class rates between the same points on that commodity.

BOUND IN BOOK

56 Mansfield Railway & Transportation Company.

SHREVEPORT, LA., *April 12th*, 1913.

Mr. E. A. Frost, President, Mansfield Ry. & Transportation Co., Shreveport, Louisiana.

DEAR SIR: Beg to hand you herewith, extract from minutes of a meeting of the Board of Directors of this company, held at Mansfield, La., on Feb. 25th, 1909, relative to the purchase of eight miles of the main tram road from the De Soto Land & Lumber Company, from which it will be noticed that this company executed its notes aggregating $120,806.97 and it will be remembered that since this, we purchased six miles of additional track from the Frost-Johnson Lumber Company, for which we executed our notes for $96,000.00.

Wish to advise that we have paid interest in full to the Frost Johnson Lumber Company on the above notes to January 1st, 1910, amounting to $11,816.48.

Our books on March 31st of the current year, shows accrued interest on the above notes amounting to $42,277.41, being interest at six per cent per annum from January 1st, 1910, to March 31st, 1913, the monthly interest charge of $1,084.04, having been taken into account each month, and credited to accrued interest.

Yours very truly,

S. H. DOWELL, *Auditor*.

56*a* Mansfield Railway & Transporation Company.

Extract from Minutes of a Meeting of the Board of Directors of the Mansfield Railway & Transportation Company, Held at the Officers of the Company, in Mansfield, Louisiana, on February 25th, 1909.

Resolved: That, the main tram road of the De Soto Land and Lumber Company from Mansfield, De Soto Parish Louisiana, to Section Twenty One (21), Township Eleven (11), Range Fourteen (14), in said Parish of De Soto Louisiana, with all rights of way, etc., has been purchased by the officers of this company for and in the name of this company for the consideration of One Hundred Twenty Eight Thousand Dollars (subject to the right of the vendor to use said track for logging purposes free of charge for the period of — years) and for said purchase price, the six notes of the company, five for $20,000.00 each and one for $20,806.97, with a 6 per cent per annum interest from date till paid, have been executed and signed in the name of the company by E. H. Payne, Secretary. Now, said purchase having been made with the consent of all members of the Board of Directors, the same is formally ratified and made the act of the company, as is also the act of the Secretary in executing and signing said notes which are hereby recognized and declared to be the valid obligation of the company ad initio, and the Secretary of the Company is authorized and directed to accept formal transfer of said property.

(Signed) A. J. PEAVY, *Chairman*.

(Signed) E. H. PAYNE, *Secretary*.

No. 576.

SOUTHWESTERN LBR. CO.
to
INDUSTRIAL LBR. CO.

Sale of Land.

Know all men by these presents, that whereas the Southwestern Lumber Company, a corporation of Jersey City, State of New Jersey, herein represented by its President, E. P. Ripley, as shown by the certified copy of a resolution of the Board of Directors of said Company dated September 4th, 1907, hereto annexed is the present Owner and holder of same Sixty one thousand and odd acres of land and timber in the Parishes of Calcasieu, Vernon and Rapides, State of Louisiana, embracing among other lands, the two sections of land hereinafter specifically described which said sixty one thousand and odd acres of land and timber the said Southwestern Lumber Company is under an obligation to convey to the Industrial Lumber Company, a corporation of Beaumont State of Texas, under and in pursuance of an agreement between the said, Southwestern Lumber Company and the said Industrial Lumber Company, dated December 30th, 1905, and which agreement is made part of this present sale, and provided the said Industrial Lumber Company, shall perform all the conditions stipulated for it to perform to entitle it to the conveyance and benefits stipulated for it in the said agreement of December 30th, 1905; and whereas it is the common belief of the said Southwestern Lumber Company and the said Industrial Lumber Company, that the interest of both Companies will be better subserved by the Southwestern Lumber Company's making a present title to the said Industrial Lumber Company of the said Two sections of land hereinafter specifically described, rather than to wait until such time as the said Industrial Lumber Company,
58 would be entitled to such conveyance under the said Agreement of December 30th, 1905, to-wit; July 1st, 1918, with the distinct Understanding that the title to the said Two sections of land however shall be conditioned upon the said Industrial Lumber Company's discharging regularly and fully all the conditions and stipulations provided for it to perform in the said agreement of December 30th, 1905, to entitle it to a conveyance of the said Two sections of land, or land and timber embraced in the said agreement of December 30th, 1905, and shall, of course, fully and finally vest in the said Industrial Lumber Company, or its successors or assigns only when such said conditions and stipulations of the said agreement of December 30th, 1905, shall have been properly and fully performed; Now, therefore be it Known, That in consideration stated in the said agreement of December 30th, 1905, to-wit; The payment in the future by the said Industrial Lumber Company to the said Southwestern Lumber Company, of the sum of Two Million, Two Hundred and Ninety thousand nine hundred and Seventy two and twenty-one hundredths Dollars, together with various other sums and the carrying out of various and sundry

other obligations by the said Industrial Lumber Company, all as and in the manner, set forth in the said agreement of December 30th, 1905, and made part hereof, and as aforesaid, and being the consideration for the aforesaid Sixty one Thousand and odd acres of land and timber as above mentioned and embracing the said two sections of land hereinafter specifically described in the said Southwestern Lumber Company, represented herein and acting as aforesaid, through its undersigned President E. P. Ripley, and
59 under the authority aforeshown, does hereby grant, sell, convey, and deliver unto the said Industrial Lumber Company, representing and acting herein, and accepting through its President, Samuel Park, and under resolution of the Board of Directors of said Company, dated September 19th, 1907, and a certified copy whereof is hereto annexed, all and singular the following described property to-wit; Those two sections of land in the Parish of Calcasieu, State of Louisiana, more specifically described as Sections Twenty and Twenty-one, of Township Two, South Range Four West embracing Twelve Hundred and Ninety one and 57/100 acres more or less, it is understood that should the said Industrial Lumber Company, cut any timber on the said described two sections of land, such timber shall be paid for at the rate and in the manner set forth in the aforesaid agreement of December 30th, 1905.

This sale is made without any warranty of title on the part of the vendor herein except as against its own acts and the acts of those claiming by, through or under it. It is stated that *on* this restriction *is* warranty is not intended to cast any cloud upon the title to the said described two sections of land but that this provision is one of the terms of the aforesaid agreement of December 30th, 1905, based upon the particular relations of the said Southwestern Lumber Company, and Industrial Lumber Company, with regard to these said Sixty one thousand and odd acres of land and timber. It is further understood and assuming, of course, that such conveyance will be made, that when the said Industrial Lumber Company shall have conveyed the remainder of these sixty one thousand and odd acres of land and timber, to-wit; July 1, 1910, or at any other time, should the Conveyance be made at any other time, in pur-
60 suance of the said agreement of December 30th, 1905, the said Southwestern Lumber Company, shall then substantially quit-claim also, these within described two sections of land, admitting and setting forth that all the conditions attached to the complete vestiture of title to the within described two sections of land in the said Industrial Lumber Company or its assigns have been complied with. The said Southwestern Lumber Company, shall at the time also subrogate the said Industrial Lumber Company to all the rights and actions in warranty that it, the said Southwestern Lumber Company, might have against all other persons. All taxes due on the within conveyed property for the three years preceding the year 1907 have been paid, as is evidenced by the certificate of th Tax Collector of Calcasieu Parish, hereto annexed. Thus done and signed by the Southwestern Lumber Company through its aforesaid president, E. P. Ripley, in the County of Cook, State of

Illinois, this 17th day of September, A. D. 1907, and by the said Industrial Lumber Company, through its aforesaid President, Samuel Park, in the County of Jefferson, State of Texas, this 19th day of September, A. D. 1907.

Resolution of Southwestern Lumber Company.

SEPTEMBER 4, *A. D.* 1907.

A Meeting of the Board of Directors of the Southwestern Lumber Company, was duly convened and held at the Office of the Company at New York City, State of New York, this 4th day of September,
A. D. 1907, present the following Directors, Edward P. Rip-
62 ley, Victor Morawetz, A. E. Waterhouse, L. C. Deming, constituting a quorum. On motion duly made and seconded, the following resolution was unanimously passed.

Resolved. That in view of the relations subsisting between this Company and the Industrial Lumber Company, of Beaumont, Texas, under and in connection with a certain agreement of sale, executed between this Company and the said Industrial Lumber Company, under date of December 30th, 1905, and with regard to the Sixty-one thousand and odd acres of land and timber embraced under, or in contemplation of, the said agreement of December 30th, 1905, and of which said land and timber the sections of land hereinafter described are a part of the further fact that it is the belief of this Company that it is to the interest of this Company that this Company should make a present title to the said Industrial Lumber Company, of the said hereinafter described two sections of land, rather than to wait until such time as the said Industrial Lumber Company, might become entitled to a Conveyance of the said Two described sections of land under the said Agreement of December 30th, 1905, to-wit; July 1st, 1918, with the understanding only, that the full vestiture of title to the said two described sections of land in the said Industrial Lumber Company, shall be conditioned upon the full and complete compliance with all the provisions and conditions of the said Agreement of December 30th, 1905; That this Company, through its President, E. P. Ripley, do make a present conveyance of said hereinafter described two sections of land to the said Industrial Lumber Company, conditioned only upon the provisions and terms as above mentioned of said agreement of December 30th, 1905, and the said two described sections of land being
the following, to-wit; Sections Twenty and Twenty One, of
63 Township Two South of Range Four West of the Parish of Calcasieu, State of Louisiana, embracing Twelve Hundred and Ninety-one and 57/100 acres, more or less. It shall be stated, that, the Industrial Lumber Company shall cut any timber on the said described two sections of land, such timber shall be paid for at the rate and in the manner set forth in the aforesaid agreement of December 30th, 1905. That the President shall be entitled to stipulate that this Company will execute to the said Industrial Lumber Company, substantially a quit-claim deed to the said described two sections of land, admitting the complete carrying out of all the conditions and stipulations attaching to the full and final vestiture of title in the said Industrial Lumber Company, should, of course, such become the case, whenever this Company, shall

convey the remainder of the aforesaid Sixty One Thousand and odd acres of land, and timber to the said Industrial Lumber Company, The President shall also stipulate that at the time such quit-claiming is done, this Company, shall then also subrogate the said Industrial Lumber Company to all the rights of Warranty that it might have against all other persons. I, the undersigned hereby certify -he above and foregoing to be a true and correct copy of a resolution passed by the Board of Directors of the Southwestern Lumber Company at a meeting hold by the said Board at the place and upon the date above set forth.

Witness my signature and seal of Office this 4th day of September, A. D. 1907.

[SEAL.] L. C. DEMING, *Secretary.*

Resolution of the Board of Directors of Industrial Lumber Co.

BEAUMONT, TEXAS, *Sept. 19th,* 1907.

A meeting of the Board of Directors of the Industrial Lumber Company, was duly convened and held at the Office of the
64 Company at Beaumont, Texas, this 19th day of September, A. —. 1907.

Present the following Directors: Sam Park, Newton R. Wilson, R. M. Hollowell, Jos. Muth, constituting a quorum.

On motion duly made and seconded, the following resolution was unanimously passed. That whereas, it is to the interest of this Company to ask and accept from the Southwestern Lumber Company of Jersey City, New Jersey, a present title of sections Twenty and Twenty-one, of Township Two, South of Range Four West, of the Parish of Calcasieu, State of Louisiana, embracing Twelve hundred and Ninety one and 57/100 acres, more or less subject to all the conditions, for a full and complete vestiture of title to this Company of the agreement between this Company and the Southwestern Lumber Company, dated December 30th, 1905, and whereas the said Southwestern Lumber Company, has expressed a willingness to convey the said described land to this Company under such conditions and certain other special conditions as to the cutting of timber and final quit-claiming of the land to this Company, upon the fulfillment of all the conditions which this company, is obliged to perform, and also a subrogation at the time of such quit-claiming of all the said Southwestern Lumber Company's rights in warranty against all other persons, as to the said two described sections of land; That, therefore, be it Resolved, That this Company accepts such Conveyance from said Southwestern Lumber Company and that the President of this Company, Samuel Park, be and he is hereby authorized and requested to execute such a deed of Conveyance accepting the said title to the said described land, for and in the name of this Company. I, the undersigned hereby certify the above and foregoing to be a true and correct copy of a resolution passed by the Board of Directors of the Industrial Lumber Company, at a

meeting hold by the said Board at the place and upon the
65 date above set forth. Witness my signature and seal of Office this 19th day of September, A. D. 1907.

[COR. SEAL.] JOS. MUTH,
Ass't Sec'y.

I, the undersigned hereby certify that an examination of the Records of this Office show that all taxes assessed against Sections Twenty and Twenty-one of Township 2 South Range 4 West, of this Parish for the years 1904, 1905, and 1906 have been duly paid.

Witness my hand of Office in the parish of Calcasieu, State of Louisiana, on this 15th day of August, 1907.

D. J. REID,
Tax Collector,
Per E. H. ANDRUS, *Deputy.*

Filed Sept. 20th, 1907. No. 22397.

Recorded Sept. 21st, 1907.

M. E. CRAWFORD,
Deputy Clerk & Ex Officio Recorder.

STATE OF LOUISIANA,
Parish of Calcasieu:

Office of Clerk, 15th Jud'l Dist. Court of La.

I hereby certify that the above and foregoing is a true and correct copy of a certain Sale of Land, from the Southwestern Lbr. Co. to Industrial Lbr. Company, recorded in Book 87 of *of* Conveyances, at page 569 et seq.

In testimony whereof, I hereunto affix my signature and seal of Office at Lake Charles, La., this 6th day of December, A. D. 1909.

35 acres more or less of T. F. Hull survey in Panola County.

83 In every instance in which an undivided acreage is conveyed by this deed out of any tract or survey out of which an undivided acreage was also conveyed by a certain deed, dated 29th day of June, 1909 from John H. Kirby to J. R. Chapman, which has not yet been recorded, said J. R. Chapman, his heirs or assigns shall be held to take under said deed referred to on acreage in any such

tract or survey to the extent of such acreage as specified in said deed prior to the rights of the grantor herein, its successors, or assigns, and in case it shall at *at* any time in the future be ascertained that on the date of the execution of the said deed from John H. Kirby to J. R. Chapman, said John J. Kirby did not own the aggregate acreage out of any such tract or survey specified in said deed from John H. Kirby to J. R. Chapman and in this deed, then said J. R. Chapman his heirs or assigns shall be held and d*a*med to take in preference to any title or right conveyed by this deed to the extent of the whole of the acreage out of any such tract or survey specified in said deed from John H. Kirby to J. R. Chapman.

Reference is hereby made to all of the deeds patents and judgments hereinabove particularly enumerated and to the records thereof as above stated particular descriptions of the land and timber above conveyed and it is understood that all of said deeds, patents and judgments mentioned in the preceding description and the record thereof shall be considered referred to for such description as fully as if special reference had been made to such one.

In every instance where timber or timber rights are conveyed exclusive of the land upon which such timber is located it is understood and stipulated that the grantee herein above named accepts the title to said timber as timbers rights subject to all of the terms, conditions and limitations under which said title is held by the
84 grantor herein.

To have and to hold said lands, premises, timber and timber rights unto the said Kirby Lumber Company its successors and assigns forever, together with all and singular the rights and appurtenances thereto belonging or in anywise incident or appertaining, and I do hereby bind myself, my heirs, executors and administrators to warrant and forever defend all and singular the said property and premises unto the said Kirby Lumber Company, its successors and assigns against every person whomsoever lawfully claiming or to claim the same or any part thereof, by through or under me but no further.

Witness my hand at Houston, Texas on this the 2nd day of July A. D. 1909.

JOHN H. KIRBY.

THE STATE OF TEXAS,
County of Harris:

Before me, the undersigned authority on this day personally appeared John H. Kirby, known to me to be the person whose name is subscribed to the foregoing instrument and acknowledged to me that he executed the same for the purposes and consideration therein expressed.

Given under my hand and seal of office on this the 3rd day of July A. D. 1909.

[L. S.] W. L. COOK,
Notary Public in and for the County of Harris, State of Texas.

Filed for record July 29, 1909 at 4 o'clock P. M.
W. J. GARRETT, *Co. Clerk,*
By EVIE MILL, *Deputy.*

50 acres out of R. E. Powell Survey.
All timber on 160 acres, J. J. Riley Survey.
All timber on H. L. Hall Survey.
All timber on 120 acres, the Sarah E. Hudson Survey.
All timber on G. & B. N. Co. Sec. No. 57.
507 acres undivided out of 742 acres, Sarah Fields Survey.
743 acres out of C. C. Tyler Survey.
All Pine timber on 95 acres out of Burrell Blackman Survey.
100 acres out of William Pamhhlin 20½ Labors.
200 acres out of Robert Lucas League.
37 acres out of Hiram Johnson Survey.

Reference is hereby made to all of the deeds, patents and judgments above particularly enumerated and to the records thereof as above stated for particular descriptions of the lands and timber above conveyed, and it is understood that all of said deeds, patents and judgments mentioned in the preceding descriptions and the records thereof, shall be considered referred to for particular descriptions as fully as if special reference had been made to each one.

In every instance when timber or timber rights are conveyed exclusive of the land upon which such timber is located, it is understood and stipulated that the Grantee accepts the title to said timber or timber rights subject to all the terms, conditions and limitations under which said title is held by the Grantor herein.

To have and to hold the above described and conveyed land and premises together *will* all and singular the rights and appurtenances thereto in any wise belonging unto the said J. R. Chapman,
90 his heirs and assigns forever; This deed is absolute and unconditional and without reservation of any title or lien whatever express or implied, and shall and does vest in the said J. R. Chapman, his heirs and assigns complete and perfect title to the lands herein conveyed; and I hereby covenant with the said J. R. Chapman, his heirs and assigns that no right, title, interest or lien, express or implied thereon or therein — owned, held or retained by me. And I do hereby bind myself, my heirs, executors and administrators to Warrant and forever defend all and singular the said premises unto the said J. R. Chapman, his heirs and assigns against every person whomsoever lawfully claiming or to claim the same or any part thereof.

Witness my hand on this the 29th day of June, A. D. 1909.

JOHN H. KIRBY.

THE STATE OF TEXAS,
County of Harris:

Before me, the undersigned authority on this day personally appeared John H. Kirby, known to me to be the person whose name is subscribed to the foregoing instrument, and acknowledged to me that he executed the same for the purposes and consideration therein expressed.

Given under my hand and seal of office on this the 3rd day of July, A. D. 1909.

[L. S.] W. C. COOK,
Notary Public within and for the County of Harris, State of Texas.

91 THE STATE OF TEXAS,
County of San Augustine:

I, W. J. Garrett, County Clerk of San Augustine County, Texas, do hereby certify that the above and foregoing and hereto attached three deeds, which are substantial copies of the originals, were sent to me for record by Mess. Terry, Cavin & Mills, attorneys at Galveston, Texas, and after being recorded by me, were by me returned to the said Mess. Terry, Cavin & Mills.

Witness my hand and the seal of the County Court of San Augustine County, Texas, on this the 7th day of December, A. D. 1909.

[SEAL.] W. J. GARRETT,
Co. Cl'k, San Augustine County, Texas.

Exhibits I, II, and III, Introduced by Various Short-Line Railways at Chicago.

In re Investigation and Suspension of Schedules Cancelling Through Rates with Certain Tap Line Connections—Chicago Hearing.

Exhibits Introduced by Various Short-Line Railways at Chicago.

Extract from Joint and Several Answers of Defendants, Kirby Lumber Company and John H. Kirby, to the Amended Bill of Complaint of Maryland Trust Company, Trustee, in Case of Maryland Trust Company, Trustee, vs. Kirby Lumber Company and Houston Oil Company of Texas, No. 54, in Equity, in the Circuit Court of the United States for the Southern District of Texas, at Houston. Filed March 25, A. D. 1905.

EXHIBIT NO. I.

Thirteenth, fourteenth and fifteenth paragraphs of said answer signed Kirby Lumber Company by John H. Kirby, its President, and attested by Secretary of said Company with corporate seal attached and by John H. Kirby, as found on pages 103, 104 and 105 of said answer as follows:

"13th. Say that the lumber to be cut from the timber on the Kountze lands is tributary to the Gulf, Colorado & Santa Fe Railroad system, which in turn is owned by and is a part of the
93 Atchison, Topeka & Santa Fe Railroad system, operating nearly 10,000 miles of railway, extending from Chicago, Illinois, to San Francisco, Cal., with numerous branches in the State of Texas, Oklahoma, Kansas, Missouri, Illinois, Colorado, New Mexico, and Arizona, through which it runs, and that it has connections at El Paso, Texas, for points in Mexico, enabling defendant, Kirby Lumber Company, to reach all points on the line of the said Atchison system under the contract herein mentioned of said Kirby with said Atchison railroad company, at rates, or rather under conditions, that would give said Kirby Lumber Company an advantage of about $1 per thousand feet of lumber over and above what its competitors, located on other lines of railway, could realize from shipments to

points reached by said Atchison railroad, and this for the reason that said Atchison & Santa Fe railroad, under said contract with said Kirby, of which said Kirby Lumber Company is a beneficiary, had canceled all through and joint rates on lumber with the connecting lines, thereby giving the lumber manufacturers, located along the lines of said Atchison railroad, an advantage in freight rates in reaching all points located on the line of the said Atchison railroad system.

"14th. Say that said Houston Oil Company of Texas already owned numerous bodies of land interspersed with said Kountze lands in such a way that it would, if such Kountze lands were not acquired, greatly increase the original cost as well as the expense of operating the tramroads required to log said Houston Oil Company's lands so interspersed, wherefore it was highly important, as an economic movement, that said Kountze lands be acquired, so much so that thereby an estimated difference in the profit to be realized by defendant, Kirby Lumber Company, amounting to at least $2 or $3 per thousand, would result; that the said Kountze lands were for sale by the owners at a rate of about $2 per thousand feet for the yellow pine timber thereon, and some of said Kirby Lumber Company's competitors in the lumber business, as these defendants knew, were making efforts to acquire parts of said Kountze lands; that the arrangement herein stated between said Kirby and said Atchison, Topeka & Santa Fe Railroad, of which defendant, Kirby Lumber Company, is the beneficiary, is not and under the law could not be exclusively for its benefit, but would apply equally to all shippers along the lines of the Gulf, Colorado & Santa Fe Railway Company; that if said Houston Oil Company of Texas acquired said Kountze lands, then there would be no other large bodies of lands along the lines of said Atchison railroad, not owned by either said Houston Oil Company of Texas or said Kirby Lumber Company, to tempt competitors, wherefore such regulation by said Atchison railroad would practically result in said Kirby Lumber Company being the sole beneficiary thereof.

"15th. Say that said group of Kountze lands constituted such a large number of acres, and was so well distributed in reference to the other lands owned by said Houston Oil Company of Texas, that it formed with them large and compact bodies of timber
94 land, conveniently located and easily and economically to be logged by said Kirby Lumber Company; that, containing so large a quantity of yellow pine timber, to-wit, about one billion feet, and being so located, they, said Kountze lands, could not be replaced by other acreage, even containing as great a quantity of timber, that would produce the same financial results to this defendant, Kirby Lumber Company; that if such lands were acquired by competing lumber manufacturers on the basis of $2 per thousand for stumpage, while the defendant, Kirby Lumber Company, was paying $5 to said defendant Houston Oil Company of Texas for similar stumpage, such competitors would enjoy all the advantage of aforesaid rate regulation so made by said Atchison system concerning shipment of lumber from the territory tributary to the Gulf, Colorado & Santa Fe Railroad, and the competition, so existing, would result in the

inability of said Kirby Lumber Company to manufacture lumber at a profit, so that it would lose the advantages named, not only as to logging of timber as aforesaid, but the result would so decrease its profits on the whole output of its lumber, that it would be impossible for it to make any money on the entire eight billion feet; that, put in other words, the result would make a difference altogether of a great deal more than $1 per thousand, and which its estimate makes as high as even $2 and $3 per thousand; that, consequently, it would not be possible for it, said Kirby Lumber Company, to pay to said Houston Oil Company of Texas the prices mentioned in said timber contract, nor with said competition could it, in that event, pay per annum for the quantity of stumpage as provided in aforesaid timber contract of July 7, 1901, so that while it might be possible for said Houston Oil Company of Texas to replace the lands of Saunders, Campbell, Rice and Sternenberg with other properties containing an equal or greater quantity of stumpage and milling facilities of equal capacity, it was not possible to so replace the Kountze lands, and hence failure to acquire them would, as aforesaid, be disastrous in its final result; threatening the collapse of the properties of both the defendants, Kirby Lumber Company and Houston Oil Company of Texas, as the latter would be responsible on account of its breach in failing to acquire such lands to the former for its losses thence accruing.

"15th. Say that these facts, as well as other similar facts and statements, often repeated until June, 1902, were laid before said Calhoun and his associates, and as well before said Houston Oil Company of Texas and each of its board of directors as early as July, 1901, about which time the option of said Kirby to said lands had expired; that the question then arose and was under discussion of obtaining an additional option by said Houston Oil Company of Texas from said Kountze Brothers; that said Kirby, during all that time, again and again importuned said Houston Oil Company of Texas and each of its officers and directors, and especially said Calhoun, who then controlled the action of the board of directors of said Houston Oil Company of Texas as well as that of his associates, to take measures to secure and purchase all of said lands, and warned them and each and all of the disaster which threatened both said companies if said lands, especially said Kountze lands, were not acquired, giving the reasons as hereinbefore stated."

95 EXHIBIT II.

Paragraph twenty-three of said answer as found on pages 110 and 111 thereof as follows:

"23rd. Say further, that these defendants, realizing that failure of said Houston Oil Company of Texas to purchase such lands and subject them to said stumpage contract would be disastrous to its manufacturing interests as aforesaid sought in every way they could to aid the Houston Oil Company of Texas in this crisis, and, relying implicitly on the representations of said Calhoun and said Houston Oil Company of Texas, that the latter would later take over said

lands and relieve defendant, Kirby Lumber Company, of the burden thereof and repay to these defendants their respective outlays in that behalf, with interest thereon, cast about to see what plan could be adopted for saving the situation and preventing said Kountze lands from falling into the hands of aforesaid competitors; that said Kirby sought his friend E. P. Ripley, president of said Atchison, Topeka & Santa Fe system, with the result that, after some weeks of negotiation, the board of directors of said system agreed to advance $2,000,000 towards said purchase if, but only if, the title to such lands was conveyed to them for said $2,000,000, the balance of the purchase money to be paid by these defendants, or one of them; that this negotiation culminated in the contract, known as the Gallup contract, under which said Atchison Railroad System, gave to said Kirby an option on such lands for a period of five years, requiring him, said Kirby, to pay the sum of about $165,000, besides interest semi-annually at the rate of 5 per cent per annum on said sum of $2,000,000, which said option said Kirby at once assigned to defendant, Kirby Lumber Company, whereupon it paid said sum of $165,000 in cash and likewise has paid since three of said semi-annual installments of interest; that, as further consideration for said Gallup contract, defendant Kirby Lumber Company was required to enter into a contract to sell to said Atchison Railroad System 10,000,000 feet of lumber per year at low prices, to-wit, 20 per cent less than the market price thereof, and was also required to route over said railroad system all lumber manufactured by said Kirby Lumber Company at such of its mills as were located on the railroads of such system."

Exhibit No. III.

Extract from the thirty-fifth paragraph of said answer beginning at the word "that" on the first line of page 409 and extending to the end of said paragraph as follows:

96 "That he, said Kirby, was also a co-partner in various land-holding and land-owning co-partnerships, and was also a large stockholder in various land-holding and land-owning corporations, and that said Kirby's distributive share in said land-holding co-partnerships and corporations was not less than 135,000 acres, making a total landed estate of more than 225,000 acres of lands, all of which were in the recognized oil belt of Southeast Texas, and had standing upon them more than 1,500,000,000 feet of yellow pine timber, as well as a large stumpage of other timber, being of the value of more than $5,000,000, and that the total holdings of said Kirby individually, the co-partnerships of which he was a member and the corporations of which he was a stockholder and which he controlled, exceeded 535,000 acres, all of which, as aforesaid, are in the recognized oil belt of Southeast Texas, and have standing upon them more than 3,500,000,000 feet of yellow pine timber, and further that many of said Kirby's co-partners and co-stockholders, so associated with him in holding said lands other than his individual lands, were men of wealth and high financial standing, and

that said Kirby controlled the opportunity of gathering into one body, under one ownership, the yellow pine timber and oil lands of Southeast Texas and Southwestern Louisiana, and that the lands so owned by said Kirby, his co-partnerships and corporations were so located that they isolated and controlled large bodies of similar lands, and that Kirby's co-partners and co-stockholders would follow him into a movement to combine, under one management and ownership, the oil and timber lands of Southeast Texas and Southwest Louisiana, but would not join any such movement unless said Kirby did, and further that said Kirby, by just and honest dealings with the owners of lands in Southeast Texas and Southwest Louisiana, and with the people there residing generally, had inspired them with such confidence as to give him great influence over them, and that Kirby was a man of great business ability, having started in 1885 without any capital in money and having acquired his great landed estate in a period of sixteen years, during which time he had organized, constructed and financed the Gulf, Beaumont & Kansas City Railway Company, owning a railroad 75 miles in length, which opened up and developed said oil and timber lands, and had also sold the said railway for nearly $2,000,000, at a great profit to himself, and further that said Kirby stood high in the estimation of the people of his State generally as a man of upright character, integrity and probity of dealing, and that the credit and financial standing of said Kirby in Texas and in Boston, Mass., was very high, and that said Kirby had under consideration the project of combining under one ownership all his own lands, all the lands of his said co-partnerships and corporations, as well as other lands in Southeastern Texas and Southwestern Louisiana, and in the said oil and timber territory belonging to other individuals, co-partnerships and corporations; having ascertained these facts, he, said Calhoun, conceived a scheme and plot to defraud said Kirby and his said co-partners and
97 co-stockholders out of their said properties, and to himself gain possession of all or as much as was possible, so as to convert the same to the use of himself and his said co-conspirators, but under such circumstances and in such a manner as not to subject them or himself to criminal prosecution."

Filed as a part of the record herein, as per instruction of Examiner Burchmore at Chicago hearing.

H. M. GARWOOD,
Attorney for Short Lines.

a United States Commerce Court.

No. 90.

LOUISIANA & PACIFIC RAILWAY COMPANY, HUDSON RIVER LUMBER Company, King-Ryder Lumber Company, Calcasieu Long Leaf Lumber Company, Longville Lumber Company, and The Long-Bell Lumber Company, Petitioners,

vs.

THE UNITED STATES OF AMERICA, LOUISIANA WESTERN RAILROAD Company, Morgan's Louisiana & Texas Railway & Steamship Company, New Orleans, Texas & Mexico Railroad, and The St. Louis & San Francisco Railroad Company, Respondents; Interstate Commerce Commission, Atchison, Topeka & Santa Fe Railway Company, Gulf, Colorado & Santa Fe Railway Company, Railroad Commission of Louisiana, Interveners.

UNITED STATES OF AMERICA, *ss:*

Be it remembered that in the United States Commerce Court, in the City of Washington, District of Columbia, at the times hereinafter mentioned, the following papers were filed and proceedings had in the above entitled cause, to wit:

Petition and Exhibits.

(Filed January 6, 1913.)

1 In the United States Commerce Court.

LOUISIANA & PACIFIC RAILWAY COMPANY, HUDSON RIVER LUMBER Company, King-Ryder Lumber Company, Calcasieu Long Leaf Lumber Company, Longville Lumber Company, and The Long-Bell Lumber Company, Petitioners,

vs.

THE UNITED STATES OF AMERICA, LOUISIANA WESTERN RAILROAD Company, Morgan's Louisiana & Texas Railway & Steamship Company, New Orleans, Texas & Mexico Railroad, and The St. Louis & San Francisco Railroad Company, Respondents.

Petition.

To the Judges of the United States Commerce Court:

Your petitioners complain of the respondents, and for cause of action say:

1. That the petitioner Louisiana & Pacific Railway Company is a railway corporation duly chartered, incorporated and existing

under the laws of the State of Louisiana, and by its charter
2 duly empowered to acquire rights of way, construct, maintain and operate railroads and branches thereof in the State of Louisiana, as a common carrier of freight and passengers, and to acquire by lease or otherwise, and to operate as a common carrier freight and passenger railways and trains, and to carry express, United States mail and all other articles usually conveyed and transported by railroads, and to do all things necessary and proper, which may be incident to the above mentioned purposes, and now has and exercises franchises, powers, rights, privileges and immunities conferred by law upon corporations created and organized for railroad purposes.

That the Constitution and Laws of the State of Louisiana provide as follows:

Constitution, Art. 271. "Any railroad corporation or association organized for the purpose shall have the right to construct and operate a railroad between any points within this state and connect at the state line with railroads of other states. Every railroad company shall have the right with its road to intersect, connect with or cross any other railroad, and shall receive and transport each other's passengers, tonnage and cars, loaded or empty, without delay or discrimination." Const. 1879, Art. 243.

Constitution, Art. 272. "Railways heretofore constructed, or that may hereafter be constructed in this state, are hereby declared public highways, and railroad companies common carriers." Const. 1879, Art. 244.

Constitution, Art. 273. "Every railroad or other corporation,
organized or doing business in this state, under the laws or
3 authority thereof, shall have and maintain a public office or place in this state for the transaction of its business, where transfers of stock shall be made, and where shall be kept for public inspection books in which shall be recorded the amount of capital stock subscribed, the names of owners of stock, the amounts owned by them respectively, the amount of stock paid, and by whom, the transfers of said stock, with the date of transfer, the amount of its assets and liabilities, and the names and places of residence of its officers." Const. 1879, p. 245.

Revised Statutes, Sec. 1479. "Whenever the state or any political corporation of the same, created for the purpose of exercising any portion of the governmental powers in the same, or the board of administrators or directors of any charity hospital, or any board of school directors thereof, or any corporation constituted under the laws of this state for the construction of railroads, plank, roads, turnpike roads or canals for navigation; or for the construction or operation of waterworks or sewerage to supply the public with water and sewerage, or for the purpose of transmitting intelligence by magnetic telegraph, cannot agree with the owner of land which may be wanted for its purchase, it shall be lawful for such state, corporation, board of administrators, directors or person to apply by petition to the District Court in which the same may be situated, or if it extends into two districts, to the judge of the District Court in

which the owner resides, and if the owner does not reside in either district, to either of the District Courts, describing the land necessary for the purposes, with a plan of the same, and a statement of the improvement thereon, if any, and the name of the owner thereof, if known at present in the state, with a prayer that the land be adjudged to such state, corporation, board of administrators or directors upon payment to the owner of all such damages as he may sustain in consequence of the expropriation of said land for
4 such public works; all claims for lands or damages to the owner caused by its taking or for expropriation for such public work shall be barred by two (2) years' prescription, which shall commence to run from the date at which the land was actually occupied and used for the construction of the works." (As amended by Act 227, 1902, p. 457.)

Said petitioner Louisiana & Pacific Railway Company operates a line of railroad from De Ridder, Louisiana, to Lake Charles, Louisiana, a distance of about forty-four miles, with a branch line from De Ridder, Louisiana, to Bundick, Louisiana, a distance of nine miles; a branch line from Lilly Junction to Walla, Louisiana, a distance of eight miles, and a branch line from Fayette to Camp Curtis, a distance of nine and one-half miles, and a branch line from Longville to Vandercook, a distance of about five and one-half miles. Making a total mileage of main and branch lines of about seventy-eight miles. Said road also has about nine miles of yard and side tracks.

Said Louisiana & Pacific Railway Company is engaged in both state and interstate commerce. It connects with the Louisiana Western Railroad at Lake Charles, Louisiana, and with the New Orleans, Texas & Mexico Railroad at Fulton, Louisiana; with the Kansas City Southern Railway at Bon Ami and De Ridder, and at Lake Charles, Louisiana; the Gulf, Colorado & Santa Fe Railway at De Ridder, Louisiana, and the St. Louis, Iron Mountain & Southern Railway at Lake Charles, Louisiana.

The petitioner Louisiana & Pacific Railway Company complies with the rules and regulations promulgated by the State Rail-
5 road Commission of Louisiana and by the Interstate Commerce Commission, and complies with all the laws of the State of Louisiana and the United States relating to common carriers by railroad.

It carries a full line of class and commodity rates between points on its own line in Louisiana and concurs in joint tariffs applying between points on its own road and points on connecting lines in Louisiana, and carries a full line of class and commodity rates from and to all interstate territory via all connecting lines, excepting the Gulf, Colorado & Santa Fe Railway Company.

It has invested in physical property $623,014.28, which represents about $8,000 per mile, including equipment, and including the "joint track" hereinafter referred to, or about $14,000 per mile, exclusive of the "joint track."

It has an equipment consisting of:

9 locomotives,
12 box cars,
17 flat cars,
5 cabooses,
1 work car,
1 derrick car,
1 office car,
335 logging cars,
1 motor car,
1 hand car.

It maintains an operating force consisting of a general superintendent, local auditor, car accountant, chief dispatcher, two telegraph operators in chief dispatcher's office, five agents, who also are telegraph operators, fifteen clerks, five stenographers, eight
6 train crews, and the necessary section gangs and track men, varying from time to time; none of which operating force is in any way connected with any of the lumber companies, petitioners herein, or of any other lumber company located on its line of road.

In addition to the lumber traffic handled, it receives from and delivers to various connections merchandise in carload and less than carload quantities, and handles passengers on mixed trains between De Ridder and Lake Charles under tariffs filed with and approved by the Louisiana Railroad Commission and the Interstate Commerce Commission.

There are on the line of this road twenty cities, towns, villages or stations, from and to which it receives and delivers all kinds of freight. Three of these towns, De Ridder, Bon Ami and Longville, have a population of about 2,000 each; Lake Charles has a population of over 12,000.

There are various corporations, individuals and industries located on its line of road and which it serves as a common carrier, none of which, nor the stockholders in which have any interest in the Louisiana & Pacific Railway Company, or in any of the petitioners herein. Among other such industries the W. A. Brown Lumber Company have a saw mill located at Bannister, Louisiana, to which saw mill, prior to the 1st of May, 1912, they shipped logs over both the branch and main lines of the Louisiana & Pacific Railway and shipped the finished product out over the main line of the Louisiana & Pacific Railway.

The Brown Lumber Company have about 8,000,000 feet of timber on the line of the Camp Curtis branch of the Louisiana &
7 Pacific Railway; said Company has about 6,000,000 feet of timber on the Lilly Junction branch and about the same amount on the De Ridder branch, or a total of about 20,000,000 feet of timber on the lines of the Louisiana & Pacific Railway.

From June 1, 1911, to May 1, 1912, the Brown Lumber Company moved 3,428,162 feet of logs over the Louisiana & Pacific road. Since May 1, 1912, they have only shipped 97,405 feet over this road, for the reason that on account of the decision of the Interstate Commerce Commission, hereinafter complained of, they were unable

to ship without a loss, and they cannot reach their timber over the Lake Charles & Northern.

There are also several million feet of timber which the Brown Lumber Company had examined and expected to purchase had it not been for said decision.

There is also located at Bannister the W. A. Brown Mercantile Company, which operates a store and sells goods to the surrounding country.

At De Ridder there is the Waters-Pierce Oil Company, the Gulf Refining Company, an ice company (all of which are reached by the tracks of the Louisiana & Pacific Railway), a bottling works and more than thirty mercantile houses, all or most of which ship over the Louisiana & Pacific Railway.

Between De Ridder and Bon Ami, extending almost from the city limits of one town to the other, is a large experimental farm, containing 480 acres of land, on which farm has been expended $65,-
000.00 in demonstrating what the soil in this section of the
8 country will produce; and it has been demonstrated that this land, which is no better than the other land along the main and branch lines of the Louisiana & Pacific, will produce peaches, figs, pears, plums, grapes, oranges, and almost all kinds of fruit, potatoes, corn, half and alfalfa, and that this whole section of country is a splendid fruit country.

On this farm is a large cannery with a daily capacity of 300 ton-ounce jars, 270 sixteen-ounce jars and 700 four-ounce jars.

Quantities of fruits, vegetables and farm products are shipped from this farm at the station called Experimental Farm over the Louisiana & Pacific Railway.

Cut-over land between De Ridder and Bundick has recently sold for $25.00 an acre and the current price of such land in this section is from $10.00 to $15.00 an acre. Agricultural land between De Ridder and Bundick ranges from $10.00 to $30.00 per acre and upward.

At Longville, besides the Longville Lumber Company, there is a large mercantile establishment, which sells goods, wares and merchandise of all kinds, not only to the citizens of Longville, but to the surrounding country, much of which is shipped in over the Louisiana & Pacific Railway.

At Fulton, Louisiana, there is a general merchandise store.

At Gaytine, Louisiana, there is located the Calcasieu Naval Stores Company, which ships turpentine and rosin over the Louisiana & Pacific Railway.

At Bon Ami, the King-Ryder Mercantile Company, a general store.

9 The Losg-Bell Naval Stores Company, a company the majority of whose stock is owned by stockholders having no interest in the Louisiana & Pacific Railway, is engaged in the business of selling naval stores products, such as turpentine and rosin, and gets its products from trees growing in the vicinity of Bundick on the Bundick branch of the Louisiana & Pacific Railway, and

ships all its products over this branch and over the main line of the Louisiana & Pacific Railway, to the market.

For the year 1911 it shipped 520,240 pounds of rosin and 34,431 gallons of turpentine.

Near the station of Walla, upon the Bon Ami branch of the Louisiana & Pacific Railway, is located the G. R. Harris Lumber Company, which, up to the 1st day of May, 1912, was engaged in the sawmill business, and was a shipper over the Louisiana & Pacific Railway.

No stockholder in said company has any interest in any stock of the Louisiana & Pacific Railway, nor in any of the petitioner-' lumber companies herein; and none of the stockholders in any of the petitioners herein have any interest in the Harris Lumber Company.

For the eight months preceding the 1st of May, 1912, the Harris Lumber Company shipped lumber and forest products over the Louisiana & Pacific Railway to the extent of 52 cars.

Lake Charles, Louisiana, is a large jobbing center with all the various lines of industries to be found in a city of its size, many of which ship over the Louisiana & Pacific.

The following are true and correct statements in reference to the tonnage on the Louisiana & Pacific Railway Company for the period stated, to-wit:

10 *Statement of Lumber and Forest Products Originating on the Louisiana & Pacific Railway for the Fiscal Years Ending June 30th, 1908, 1909, 1910, and 1911, in Tons.*

1908	137,457 tons
1909	200,717 tons
1910	243,122 tons
1911	270,960 tons

The following tonnage which is included in the above figures was originated by mills other than the petitioner mills above mentioned, and in which the stockholders in the petitioners are in no wise interested:

1908	973 tons
1909	684 tons
1910	675 tons
1911	4,393 tons

The following tonnage, consisting of lumber and forest products, was originated on and by the Louisiana & Pacific during the period July 1, 1911, to April 30, 1912: 215,172 tons.

Of this amount 70,138 tons were shipped by parties in no way connected with the above named petitioners.

11 *Statement of Merchandise Received from Various Connections of the Louisiana & Pacific Railway for Period July 1st, 1911, to April 30th, 1912. By Stations.*

2. That the petitioners Hudson River Lumber Company, King-Ryder Lumber Company, Calcasieu Long Leaf Lumber Company, and the Longville Lumber Company are each of them corporations organized under the laws of the State of Missouri, for the purpose of manufacturing and selling timber and lumber, and all owning timber lands for the purpose of obtaining timber therefrom to manufacture into lumber; each of said companies owns and operates a lumber mill, planing mill and plant for the manufacture of
22 lumber along the line of the road of the petitioner Louisiana & Pacific Railway Company, said mills being located respectively at De Ridder, Bon Ami, Lake Charles and Longville, Louisiana; each of said Lumber Companies is a large shipper over the Louisiana & Pacific Railroad.

3. The petitioner The Long-Bell Lumber Company is a corporation organized under the laws of the State of Missouri, for the purpose of engaging in the wholesale and retail lumber business. It acts as a selling agent for the product of the lumber companies herein last above mentioned, and it is a party to the contracts hereinafter set out.

4. That the respondents Louisiana Western Railroad Company, Morgan's Louisiana & Texas Railway & Steamship Company, the New Orleans, Texas & Mexico Railway Company, are each corporations organized under the laws of the State of Louisiana; the Louisiana Western Railroad Company owns and operates a railroad from the town of Lafayette, in Louisiana, to the western line of the State of Louisiana; Morgan's Louisiana & Texas Railway & Steamship Company owns and operates a line of railroad from the town of Lafayette, Louisiana, to the cities of New Orleans and Baton Rouge, Louisiana, and also a line of railway from the town of Lafayette, in a northwesterly direction through the State of Louisiana; and said

companies, the Louisiana Western Railroad Company and Morgan's Louisiana & Texas Railway & Steamship Company, are parts of what is generally known as the Southern Pacific System, and together constitute one line of railroad between New Orleans and the western line of the State of Louisiana, and constitute a part of a con-
23 tinuous line of railroad from New Orleans to San Francisco, generally known as the Southern Pacific System, and are managed and controlled by the same interests.

The respondent New Orleans, Texas & Mexico Railway Company is a corporation organized under the laws of the State of Louisiana and owns and operates a line of railway from the cities of New Orleans and Baton Rouge to the city of Houston, Texas, and is a part of what is known as the "Frisco System."

5. The St. Louis & San Francisco Railroad Company is a railroad corporation organized under the laws of the State of Missouri, and owns and operates railroads in the States of Louisiana, Arkansas, Missouri, Texas and elsewhere.

6. That on or about the 28th day of January, 1908, the Interstate Commerce Commission entered upon a hearing and investigation in a certain cause entitled "Star Grain & Lumber Company et al. v. Atchison, Topeka & Santa Fe Ry. Co. et al., Docket No. 1319." Hearings were had at various times and places, and on the 23d day of June, 1908, the Interstate Commerce Commission made a report and rendered an opinion, which report and opinion will be found in the 14 Interstate Commerce Commission Reports, at page 364 et seq., reference to which is hereby made. Further hearings were thereafter had in said case of Star Grain & Lumber Company et al. v. Atchison, Topeka & Santa Fe Railway Company et al., Docket No. 1319, and on December 7, 1909, respondent the Interstate Commerce Commission made a supplemental report, which is published in the 17th Interstate Commerce Commission Reports, at page
24 338 et seq., reference to which supplemental report is hereby made, and the same is made a part hereof as fully as if set out herein.

7. By reason of the rendition of this report and opinion, and because the Interstate Commerce Commission demanded under threat of criminal prosecution that they comply with the requirements thereof, the trunk line railroad companies of the United States, or a large number of them, including the respondent Railroad Companies herein, about the month of August, 1910, filed with the Interstate Commerce Commission new tariffs or supplemental tariffs on lumber, to become effective in thirty days, which new tariffs or schedules canceled all joint tariffs which the said respondent Railway Companies had theretofore had and maintained with the petitioner Louisiana & Pacific Railway Company, and except for the order of the Interstate Commerce Commission, set out in paragraph 8 hereof, would have left said petitioner without any joint interstate rates or through routes on lumber with the other railroads of the country.

8. Thereupon the Interstate Commerce Commission made and entered of record an order, in words and figures as follows, to-wit:

At a General Session of the Interstate Commerce Commission, Held at Its Office in Washington, D. C., on the 3d Day of September, A. D. 1910.

Docket No. 3400. Sub. 7.

In the Matter of the INVESTIGATION AND SUSPENSION OF SUPPLEMENT No. 3 to I. C. C. No. 23, Filed by the Texas & New Orleans Railroad Company, the Galveston, Harrisburg & San Antonio Railway Company, Houston & Texas Central Railroad Company, Houston, East & West Texas Railroad Company, Houston & Shreveport Railroad Company, Louisiana Western Railroad Company, and Morgan's Louisiana & Texas Railroad Company.

It appearing from the records of the Interstate Commerce Commission that there has been filed with the Commission by the Texas & New Orleans Railroad Company, the Galveston, Harrisburg & San Antonio Railway Company, Houston & Texas Central Railroad Company, Houston, East & West Texas Railroad Company, Houston & Shreveport Railroad Company, Louisiana Western Railroad Company, and Morgan's Louisiana & Texas Railroad Company, schedule designated as Supplement No. 3 to I. C. C. No. 23, effective 10th day of September, 1910, which schedule states new individual or joint rates, fares or charges, applicable upon the articles named therein, that are in excess of the rates, fares and charges now in effect,

It is ordered that the Commission, upon complaint, without formal pleading and without answer by the interested carriers, do enter upon a hearing concerning the propriety of such advances and the lawfulness of the rates, fares, or charges stated in said schedule, with a view to making such order in the premises as may, after full hearing, seem just and proper; and that such hearing be held at such time and place as may be hereafter fixed by the Commission.

The Commission being further of the opinion that, pending such hearing and decision of the Commission concerning the propriety of such rates, fares or charges, the operation of such schedule should be postponed for the reason that from a consideration of the character and amount of the advances and the circumstances under which they have been made, it appears to the Commission there is sufficient ground for claiming that said advances are unlawful and that the rates, fares or charges established by said schedule are unjust
26 and unreasonable, and therefore unlawful, and that the public interest requires that the operation of said schedule be deferred until sufficient time has been given for an investigation by this Commission.

It is further ordered that the operation of the aforesaid schedule be suspended, and that the use of the rates, fares or charges therein specified be deferred until January 5, 1911.

It is further ordered that the several carriers above named that have filed schedules be and they are hereby made defendants to this

proceeding, and that a copy of this order be forthwith served upon each of them; and

It is further ordered that the carriers named in said schedule and supplements thereto as participating therein be and they are hereby made defendants to this proceeding, and that a copy of this order be forthwith served upon each of them.

A true copy.

EDW. A. MOSELEY, *Secretary.*"

Thereupon the Interstate Commerce Commission made similar orders on or about the same date, suspending the operation of the schedules of various other railroad companies within the United States, and thereby kept in force and effect the joint tariffs and the maintenance of through routes and joint rates between the petitioner Louisiana & Pacific Railway Company and the respondent railroad companies herein mentioned, and the various other trunk line railroads and systems of the United States for a period of 120 days. Reference to which orders is hereby made and the same are made a part hereof.

And the said Interstate Commerce Commission, from time to time, continued by appropriate orders, similar in form to the order hereinabove set out, the suspension of the cancellation of rates be-
27 tween various railroad companies of the United States, including the respondent railroad companies, and the petitioner the Louisiana & Pacific Railway Company, until the end of the 30th day of April, 1912; the last of said orders being in words and figures as follows, to-wit:

"At a General Session of the Interstate Commerce Commission, Held at Its Office in Washington, D. C., on the 16th Day of January, A. D. 1912.

Charles A. Prouty, Judson C. Clements, Franklin K. Lane, Edgar E. Clark, James S. Harlan, Charles C. McChord, Balthasar H. Meyer, Commissioners.

Investigation and Suspension Docket No. 11.

In the Matter of the Investigation and Suspension of Schedules Canceling Through Rates with Certain Tap Line Connections.

It Appearing That, by orders heretofore entered, the Commission instituted an investigation and hearing concerning the propriety of various tariffs filed by certain carriers wherein joint rates with and divisions or allowances to so-called tap line connections were to be canceled and withdrawn; and the Commission, by orders duly filed and served, having suspended and deferred the effectiveness of such tariffs until June 1, 1911; and that under authority of an order entered herein on May 18, 1911, the various carriers withdrew their said tariffs canceling such divisions or allowances and refiled them to

become effective on November 1, 1911; and that under authority of a further order entered herein on October 16, 1911, the various carriers withdrew their said tariffs canceling such divisions
28 or allowances, and refiled them to become effective on February 1, 1912; and,

It Further Appearing, That a full investigation of the said matters has been had, but it has been impossible for the Commission to reach a final decision of the questions and matters involved within the period for which the operation of the said schedules has been voluntarily postponed by the carriers; namely, on or before February 1, 1912; and,

It Further Appearing, That the various carriers by which the cancellations in question were published, republished and filed with the Commission are desirous of withdrawing the said cancellation tariffs and refiling them, thereby further postponing their effectiveness to May 1, 1912;

It Is Ordered, That each and all of the carriers that are parties to this record be, and they are hereby, authorized on three days' notice to the Commission and to the public, to cancel and withdraw all such tariffs filed with the Commission, and under their present terms to become effective on or before February 1, 1912, in which are contained cancellations or withdrawals of joint rates or divisions with or allowances to so-called tap line connections, and, Provided, the said tariffs are forthwith refiled to become effective on May 1, 1912;

It Is Further Ordered, That all tariffs or supplements issued under authority of this order shall bear the following notation on title page:

Issued by authority of the Interstate Commerce Commission's Order of January 16, 1912, in Investigation and Suspension Docket No. 11.

A true copy.

C. A. PROUTY, *Chairman*."

9. Pursuant to the orders of date the 3d day of September, 1910, one of which is hereinabove fully set out, the Interstate Com-
29 merce Commission did enter upon a further hearing of the matter of the propriety of the advances and the lawfulness of the rates, fares or charges, stated in said schedules, mentioned in said orders, and thereupon, and on the 15th day of November, 1910, gave to the petitioner the Louisiana & Pacific Railway Company, and to various other railroad companies in the United States, including respondent railroad companies herein, a notice in words and figures as follows, to-wit:

"NOVEMBER 15, 1910.

Docket No. 1319.

STAR GRAIN AND LUMBER COMPANY et al.
vs.
ATCHISON, TOPEKA & SANTA FE RY. CO. et al.

In the Matter of TAP LINE ALLOWANCES AND DIVISIONS, BEING Docket Nos. 3400, Sub. 6, 3400, Sub. 7, 3493, 3511, 3512, 3513, 3514, 3524, 3548, 3551, 3552 and 3564 Consolidated under Investigation and Suspension Docket No. 11.

The above entitled proceedings are assigned for hearing on Thursday, December 9, 1910, 10 o'clock a. m., at United States Court rooms, New Orleans, Louisiana.

By THE COMMISSION,
EDW. A. MOSELEY, *Secretary.*"

Your petitioners aver that notwithstanding that by the Act to Regulate Commerce it is required that the Commission serve upon the defendants in any proceeding before it a copy of the petition with directions to answer the same or to satisfy the petition, nevertheless, no such service was made upon the defendants and no answers were made by said defendants to said petition before the said Interstate Commerce Commission.

30 Pursuant to said notice and the orders of the Interstate Commerce Commission hereinabove set forth, the petitioner the Louisiana & Pacific Railway Company, together with numerous other railroad companies, appeared before the Interstate Commerce Commission, at New Orleans, on December 8, 1910, and subsequent days, and at St. Louis, Missouri, and at Chicago, Illinois, upon adjournments of said hearing, and thereupon the Honorable James S. Harlan, one of the Interstate Commerce Commissioners, examined the officers and agents of the petitioner the Louisiana & Pacific Railway Company, concerning the matters under investigation in said proceeding, and said petitioner Louisiana & Pacific Railway Company also thereafter submitted to the Interstate Commerce Commission certain documentary evidence, by filing the same with the secretary of said Commission at Washington; and thereafter, and within the time fixed by the Commission, said petitioner filed with the Interstate Commerce Commission a statement of facts, abstract of the evidence which had been taken before said Commission, in reference to said petitioner, and a brief and argument, reference to which statement and brief is hereby made, and in said statement and brief said petitioner the Louisiana & Pacific Railway Company petitioned the Interstate Commerce Commission in words as follows, to-wit:

"While this Commission has not all of the powers of a court of equity, and while we recognize that if the Louisiana & Pacific is not entitled to through routes and joint rates and fair divisions, its contracts will not give it that right, yet with these contracts existing,

with the vested rights based thereon and on the previous de-
31 cisions of this Commission, we respectfully and most earnestly ask that this Commission, under its power to compel the trunk line railroad companies to maintain through routes and joint rates, issue an order to those trunk line roads to continue the through routes and joint rates heretofore existing with the Louisiana & Pacific."

At the beginning of said hearing at New Orleans on December 8, 1910, the Honorable James S. Harlan, the commissioner presiding at said hearing, made the announcement to the parties interested and appearing at said hearing, that each so-called "Tap Line" would be treated as though it had filed a formal petition.

There was also filed before the Interstate Commerce Commission in said case of Star Grain & Lumber Company et al. v. Atchison, Topeka & Santa Fe, "Investigation and Suspension Docket No. 11," a "Brief and Argument for Various Tap Lines," signed by H. M. Garwood, N. S. Brown and Luther M. Walter, which contained, among other things, the following:

"The facts, therefore, of each case are so widely divergent as to render classification impossible, and to necessitate, however burdensome it may become, the analysis of the facts of each case. It would be unjust to the several lines above, many of which are not represented by the writers of this brief, to undertake any arbitrary classification, and we therefore invoke as a part of that due process of law to which each is entitled, the examination by this body of the facts of each case and the entry of a special and separate order thereon, to the end that the rights of each line may be duly regarded."

32 And at the close of said brief was the following:

"We submit, therefore, with confidence that the basic questions underlying this investigation have been fully and carefully decided by the decisions of this Commission, by the practices in accordance therewith extending over a long period of years, by the decisions of our courts, state and federal, by the approval of the Federal Congress; and that investments made in full accord with the constitutions and laws of the several states, with the approval of Congress, and under the prior decisions of this Commission, ought not now to be confiscated in the absence of clear legislative requirement; and that railway corporations legally formed, sustaining all the burdens of state and federal legislation, and assuming, under charters legally issued, all of the common law and statutory obligations of a common carrier, cannot here be denied the right to engage in interstate commerce, establish through rates with connecting carriers and joint rates applicable thereto."

The said brief and the request therein for the entry of a special and separate order in each case was filed on behalf of the petitioner the Louisiana & Pacific Railway Company among others.

10. On the 29th day of April, 1912, the Interstate Commerce Commission rendered an opinion, No. 1853, entitled "Investigation and Suspension Docket No. 11, the Tap Line Case," which opinion will be found in the 23d Interstate Commerce Commission Reports, p. 277, et seq., reference to which opinion is hereby made, and which is made a part hereof, as fully as if set out herein in full.

And in said opinion and supplemental report is the following, to-wit:

33 "The cancellations by the trunk lines will be allowed to become effective on May 1, as provided in the tariffs now on file."

Your petitioners then believed and now believe that in and by said opinion and supplemental report and by the language hereinabove last quoted the Interstate Commerce Commission made an order authorizing, permitting and commanding the trunk line railroad companies of the United States, including the respondent railroad companies herein, to cancel all joint interstate rates on lumber with the petitioner the Louisiana & Pacific Railway Company, on the 1st day of May, 1912.

And said trunk line companies of the United States, including the respondent railroad companies, have construed said opinion herein last above referred to, as an order from the Commission to cancel said joint rates and tariffs with the petitioner the Louisiana & Pacific Railway Company, and now have canceled and have ceased to maintain any joint tariffs or through routes and joint rates with said petitioner on lumber. And the Interstate Commerce Commission, through its secretary, notified the trunk line railroads of the United States that said cancellation did take effect at midnight on the 30th day of April, 1912, and that rates, as filed, must be observed by carriers and shippers, if criminal violation of Interstate Commerce Act and Elkins Act is to be avoided.

Your petitioners further state that while "the matter of the investigation and suspension of schedule canceling through rates with certain tap line connections, Investigation and Suspension Docket No. 11," was pending before the Commission upon the applica-

34 tion of the petitioner Louisiana & Pacific Railway Company, and on account of the course of procedure which had theretofore been taken by the Interstate Commerce Commission, your petitioners were led to believe, had the right to believe, and did believe that the Interstate Commerce Commission would further postpone the effectiveness of the tariffs referred to in the order of January 16, 1912, hereinbefore set out, until after the Interstate Commerce Commission had rendered its opinion and made its order in said cause.

Your petitioners further state that the Opinion No. 1853 and the order contained therein, hereinbefore referred to, and reported in the 23d Interstate Commerce Reports, at page 277, et seq., purports to have been decided, and is dated on April 23, 1912. But your petitioners allege that said opinion was not made public until the 29th day of April, 1912, and if it was rendered on the 23d day of April, all knowledge and information thereof was withheld from your petitioners, and the public generally, and your petitioners had no opportunity to know the contents thereof until about 4 o'clock in the afternoon of April 29, 1912, and a copy of said opinion was not received by your petitioners until after the 30th day of April, 1912, by reason of which your petitioners were unable, on account of lack of time, to prepare any petition or application for injunction to this, or any other, Court, to prevent the cancellation of rates by the respondent

railroad companies becoming effective as hereinabove stated, or, before the 1st day of May, 1912, to make any application to this Court to enjoin, set aside and annul the order of the Interstate Commerce Commission hereinbefore set out.

35 Your petitioners further state that on the 1st day of June, 1912, the Interstate Commerce Commission made a supplemental report entitled "Investigation and Suspension Docket No. 11, the Tap Line Case," Opinion No. 1898, which is reported in the 23d Interstate Commerce Reports, at page 549, reference to which is hereby made and which is made a part hereof as fully as if set out herein.

Said supplemental report or opinion, in so far as it relates to the so-called "Tap Line" case in general, and in so far as it makes a finding of the facts in reference to the petitioner Louisiana & Pacific Railway Company, is in words and figures as follows, to-wit:

Investigation and Suspension Docket No. 11, the Tap Line Case, Decided May 14, 1912.

Supplemental Report of the Commission.

By the COMMISSION:

In the original report herein (ante, page 277), after stating the history of the several tap lines there mentioned and setting forth the salient features in connection with their ownership, physical condition, general character, source of traffic and revenue, and the manner in which their operations for the proprietary company are conducted, we found that in none of the cases there disposed of did the tap line perform a service of transportation, either in the movement of the products of the mill of the proprietary company or in the movement of its logs from the forest to its mill. We held that the service in each case, so far as the logs and lumber of the proprietary company are concerned, was a plant service. It was also said at the close of the report that in a supplemental opinion, to be announced in the near future, we would state the facts in

36 relation to all the other tap lines whose affairs are disclosed in the record before us, pointing out from among them such as, in the judgment of the Commission, bear a different relation to their respective proprietary lumber companies; and that in connection with the supplemental report we would enter such order with respect to all the tap lines before us as the conclusions announced might require.

Many of the tap lines described in this report differ only in detail from the lines described in the original report and consequently are controlled by the same principles. At the conclusion of the statement in each case we have noted a finding to which effect will be given in the order to be entered. It seems well, however, before describing the remaining tap lines of record, to call attention to a practice that finds frequent illustration in the pages that follow. In a number of cases, the tap line, without charge, hauls the logs of the lumber company that owns it. In other cases the lumber company

itself hauls its logs over the tap line rails to its mill. In some instances its right to do this is evidenced by a formal trackage contract; in other instances it is done under a verbal understanding. In some cases no charge is entered up by the tap line against the lumber company for this use of its tracks, and in a few cases the lumber company pays a small compensation. In several instances the trunk lines themselves have given trackage rights for a small toll to lumber companies. We have not understood that special privileges of this kind may lawfully be granted to a shipper. It is not uncommon for one railroad to give the use of its rails to another railroad under a trackage agreement, but we see no way in which a shipper may enjoy such a privilege over the rails of a common carrier, particularly when the compensation for the privilege is not published and the privilege is not open equally to other shippers.

37 Except in one or two cases where the tap line crosses the state boundary line, such arrangements are possibly to be regarded as purely local, and, therefore, beyond our control. But they are inherently unlawful, and afford strong evidence that a tap line whose rails are used in that manner by its proprietary lumber company is a mere plant facility. On the other hand, such an arrangement with a shipper, even though it be purely local, and, therefore, beyond our control, may nevertheless operate as a rebate and be punishable as such under this law when it appears that the concession is made in order to secure the interstate traffic of the shipper. All such arrangements are wrongful and we shall expect them to be discontinued. It may be well again to say that in the disposition made of these cases we have had in mind the special conditions that exist in this territory, and have taken such action as, under all the circumstances developed, seemed necessary in the prevention of unlawful discriminations and preferences. Doubtless, the same or generally similar conditions exist in other extensive lumber producing districts and may be duplicated elsewhere in connection with different classes of traffic. But it is obvious that matters of this nature cannot be dealt with in a wholesale manner, but must be considered separately and in the light of the surrounding conditions and special facts. It will, therefore, be fully understood that all that is here said is intended to relate specifically to the conditions found to exist in this territory. * * *

The Louisiana & Pacific Railway.

The Louisiana & Pacific Railway Company was incorporated June 6, 1904, with an authorized capital stock of $200,000, of which only $51,000 has been issued. It is controlled by what is referred to on the record as the R. A. Long interests, 70 per cent of its capital stock being held by R. A. Long, and the rest apparently by his agents and associates. The record indicates that Long owns the

38 same proportion of the capital stock of the Hudson River Lumber Company, King-Ryder Lumber Company, Longville Lumber Company and the Calcasieu Long Leaf Lumber Company, all of which have sawmills on the Louisiana & Pacific.

The Long-Bell Lumber Company, which is a part of the same general interest, does not manufacture lumber, but markets the output of these mills. Only $30,000 of the capital stock of the tap line was issued for cash, and the balance was subsequently distributed to its stockholders as a stock dividend. It has outstanding bonds to the amount of $582,200, which were issued for the purpose of taking up notes payable to the various lumber companies and covering purchases of track and equipment. All of the tracks of the Louisiana & Pacific, as hereinafter described, were originally constructed as private logging roads by the individual lumber companies.

The Lake Charles & Northern Railroad, which is owned by the Southern Pacific, extends from De Ridder, Louisiana, southward for a distance of about forty-six miles to Lake Charles. It was originally built by the R. A. Long interests as part of the Louisiana & Pacific, and was sold to the Southern Pacific, which thereupon incorporated the Lake Charles & Northern to operate the property. In the sale of the property to the Southern Pacific, however, the R. A. Long interests reserved to the Louisiana & Pacific the right of jointly operating the track between Lake Charles and De Ridder. The Louisiana & Pacific pays the Lake Charles & Northern 25 cents per train-mile for the trains that it operates over that track, and also bears a certain proportion of the station expenses; the payments aggregated for the fiscal year 1910 approximately $7,000. The two companies, as the record indicates, enjoy equal rights over the track, and in view of the price received by the R. A. Long interests from the Southern Pacific the trackage arrangement is obviously a most advantageous one.

The Louisiana & Pacific is a peculiar property. There are
39 five separate branches or tracks not directly connected with each other, but all joining at different points the track conveyed to the Lake Charles & Northern. The five tracks may be described as follows: (1) A track connecting with the Lake Charles & Northern at De Ridder Junction, and extending eight miles to Bundicks, which is apparently a logging camp with a company store. The mill of the Hudson River Lumber Company, in whose interest this track is operated, is at De Ridder, being within a few hundred feet of the rails of the trunk line. (2) At Lilly Junction, a second section of the track of the tap line connects with the Lake Charles & Northern, extending therefrom about seven and one-half miles to a point in the woods known as Walla, where the King-Ryder Lumber Company has a commissary, and there is a small independent yellow pine mill, owned by the Bundick Creek Lumber Company. The mill of the King-Ryder Company is at Bonami, on the track jointly operated by the tap line and the Lake Charles & Northern. This is a town of 2,000 people, but apparently has no other industries. (3) Two miles of incorporated track of the Louisiana & Pacific connect with the Lake Charles & Northern track at Longville, a town of 2,000 population, where the Longville Lumber Company has its mill and a store. There are also several independent stores. (4) There are nine miles of track connecting with the Lake Charles

& Northern at Fayette, and extending to Camp Curtis, a settlement of 200 people, where the Calcasieu Long Leaf Lumber Company has a company store, its mill being at Lake Charles. (5) A track one mile in length described on the record as connecting with the Lake Charles & Northern at Bridge Junction and running to Lake Charles station. Through its operating rights over the Lake Charles & Northern, the tap line connects with the Kansas City Southern and the Santa Fe at De Ridder, with the Frisco at Fulton, and with the Southern Pacific, Iron Mountain and Kansas City South-
40 ern at Lake Charles. The equipment of the Louisiana & Pacific consists of 22 locomotives, 6 cabooses, 41 freight cars and 270 logging cars. It also owns a private car which is used in traveling around the country by its officers, who hold free transportation, and who are connected with the lumber companies. The lumber companies have many miles of unincorporated logging track connecting with the several sections of the Louisiana & Pacific at various points. There are a number of other towns or settlements named on the record, which it is unnecessary to mention; and there is a second small independent mill, owned by the Brown Lumber Company and located at Bannister, on the Lake Charles & Northern.

The logs are loaded by the lumber companies and switched by them over the logging spurs to the point of connection with the incorporated line. The cars are then hauled by the tap line to the mill, a distance on the average of about thirty miles, as is stated of record. No charge is made by the tap line against the lumber companies for the log movement. The tap line switches the carloads of lumber a distance of three-fourths of a mile from the mill at Lake Charles to the Southern Pacific, or a distance of a few hundred feet from the De Ridder mill to the trunk lines. It moves lumber for a distance of eighteen miles from the Lake Charles Mill to the Frisco; the movement from the mill at Bonami to the Southern Pacific at Lake Charles is forty miles; and the lumber movement from the Longville mill to the Southern Pacific at Lake Charles is twenty-four miles. The average haul of the tap line on lumber movements of the controlling companies is said to be nearly twenty miles. The steel for these tracks is apparently supplied by the tap line without charge. There are written agreements under which 50 per cent of the lumber tonnage must be routed over the Frisco and 40 per cent by the Southern Pacific; but the record indicates that
41 these obligations are not rigidly adhered to and more than 10 per cent is delivered to the other trunk lines. The total movement of lumber for the fiscal year 1910 was 243,122 tons, and the merchandise and other commodities aggregated 8,819 tons. As much as 98 per cent of the entire tonnage was supplied by the controlling interests. A few passengers are carried, the receipts from that source for the year 1910 being $473.77. A logging train runs daily on each of the branches, and there is one 'mixed train,' loaded chiefly with logs and lumber, moving over the track between Lake Charles and De Ridder.

The allowances paid by the trunk lines range from 1½ to 5½

cents per 100 pounds out of their earnings under the group lumber rate.

The annual report to the Commission for the year ending June 30, 1910, shows an operating revenue of $220,985.94, with operating expenses amounting to $145,433.69. There was an accumulated surplus on that date of $73,581.07.

In this case we have another instance of a service performed for a lumber company by a tap line claiming to be a common carrier for which no charge is made, namely, the service of hauling the logs to the several mills. For the switching service of a few hundred feet from the mill at De Ridder to the trunk lines, and three-fourths of a mile from the mill at Lake Charles to the Southern Pacific, allowances are made out of the rate of from 1½ to 5½ cents. There are other important facts of record with respect to this tap line which we have not thought necessary to include in this statement. We regard the whole arrangement as indefensible and unlawful, and see no grounds upon which any allowance may lawfully be made. * * *

Irregular Practices of Tap Lines.

It appears from the foregoing statements respecting the several tap lines described in this supplemental report, as well as from the statement of those described in the original report, that there
42 are many respects in which the law and the rules and regulations of the Commission are not observed by them. Although claiming to be common carriers, some of them did not file annual reports with the Commission until recently. The reports of others are so far from being complete that they cannot be said to comply with the requirements of the Act. Many of them, also, do not publish any local rates to apply on traffic received from or delivered to their trunk line connections. Many of them carry passengers and less-than-carload shipments without charge at all; others make a charge without the authority of the published tariffs. We have already referred to the use made by controlling lumber companies of their tap lines under formal and informal agreements for trackage rights with and without charge, and all without any tariff authority. The Hours of Service Law, the Safety Appliance Act and other Acts imposing certain requirements on common carriers engaged in interstate commerce are not fully complied with in many cases, and in others are wholly disregarded. There is a lack of attention also to our rules and regulations respecting the filing of tariffs and the keeping of accounts. In some cases, our examiners have been refused full access to the books of tap lines. With respect to all these matters, the law makes no exception in favor of any railroads that purport to be common carriers. While our conclusions, in no instance, have been based on the failure of a tap line to comply with our rules and regulations, we must give warning to all such companies that purport to hold themselves out as common carriers that such irregularities must promptly be corrected.

General Comments.

The rates of the trunk lines for the movements of logs in this territory are penalty rates; that is to say, the inbound rate to the mill is higher than it should be and is reduced to a net rate,
43 provided the lumber goes out over the rails of the same carrier. Such rate adjustments are adverted to and criticised in Red River Cotton Oil Co. v. T. & P. Ry. Co., 23 I. C. C. 437. So far as we can see from a careful examination of the record, there is no real necessity for any such rate adjustment in this territory. The penalty rates should be withdrawn, and in their place the carriers ought to fix reasonable flat rates for the inbound log movement.

Orders will be entered as soon as possible to give effect to the views expressed in the original and supplemental reports herein. Tariffs fixing rates and switching charges in accordance with our conclusions may be filed on three days' notice. The carriers will also be expected to submit for the approval of the Commission the basis of allowances to lumber companies, under Section 15, in the cases where in the original and supplemental reports we have said that such allowances might properly be paid. When approved by the Commission such allowances must be published.

In the majority of cases the tap lines have made no joint class and commodity rates with their trunk line connections. In other cases joint rates have been established, at least to some destinations. Where joint through class and commodity rates are in effect or hereafter made effective to or from points on tap lines, the trunk lines and the tap lines will be expected to submit to the Commission for approval the basis of their divisions. It is expected also that they will submit for our approval reasonable and non-discriminatory rates on forest product when shipped from tap line points other than the mills of the controlling companies, and will also submit the bases of the divisions thereof.

When all these matters shall have been adjusted in compliance with the views of the Commission, an order will be entered authorizing trunk lines to make settlements on these bases with
44 respect to all traffic moving after May 1, either under Section 15 or as allowances out of the rate, as provided herein in the respective cases.

Orders in other cases in which these or other tap lines in this territory are parties defendant may be called to our attention in case they are in conflict herewith.

By the Commission.

[SEAL.] JOHN H. MARBLE, *Secretary.*"

Your petitioners further state that the Opinion No. 1898, reported in the 23d Interstate Commerce Commission Reports, at page 549, et seq., purports to have been decided and is dated on May 14, 1912, but your petitioners allege that said opinion was not made public until the 1st day of June, 1912.

Petitioners further state that on the 11th day of June, 1912, the Interstate Commerce Commission made and entered of record, or at

least made public on that day, an order in words and figures as follows, to-wit:

Order.

"At a General Session of the Interstate Commerce Commission, Held at Its Office in Washington, D. C., on the 14th Day of May, A. D. 1912.

Investigation and Suspension Docket No. 11.

In the Matter of the INVESTIGATION AND SUSPENSION OF SCHEDULES Canceling Through Rates with Certain Tap-Line Connections and Certain Other Cases Consolidated Herewith.

It Appearing, That a full investigation of the matters and things herein involved has been had, and the Commission, on April 23, 1912, having made and filed a report containing its findings of fact and conclusions thereon, and having also on the date hereof
45 made and filed a supplemental report containing its further findings of fact and conclusions thereon, which said reports are hereby referred to and made a part hereof;

It Further Appearing, That the Commission has found that in the case of the following named parties to the record, and each of them, namely:

Malvern & Freeo Valley Railway Company;
Wilmar & Saline Valley Railroad Company;
Arkansas & Gulf Railroad Company;
Little Rock, Maumelle & Western Railroad Company;
Beirne & Clear Lake Railroad;
Mississippi, Arkansas & Western Railway Company;
Bearden & Ouachita River Railroad Company;
Arkansas Eastern Railroad Company;
Blytheville, Burdette & Mississippi River Railway Company;
Brookings & Peach Orchard Railroad Company;
Crossett Railway Company;
Fordyce & Princeton Railroad Company;
Homan & Southeastern Railway Company;
Little Rock, Sheridan & Saline River Railway Company;
L'Anguille River Railway Company;
Ouachita Valley Railway Company;
Griffin, Magnolia & Western Railway Company;
Saline Bayou Railway Company;
Enterprise Railway Company;
Natchez, Ball & Shreveport Railway Company;
Black Bayou Railroad Company;
The Bodcaw Valley Railway Company;
Mill Creek & Little River Railway & Navigation Company;
Red River & Rocky Mount Railway Company;
Woodworth & Louisiana Central Railway Company;
46 Freeo Valley Railroad Company;
Natchez, Urania & Ruston Railway Company;

Bernice & Northwestern Railway Company;
Dorcheat Valley Railroad Company;
Manghan & Northeastern Railway Company;
Galveston, Beaumont & Northeastern Railway Company;
Peach River & Gulf Railway Company;
Riverside & Gulf Railway Company;
Jefferson & Northwestern Railway Company;
Beaumont & Saratoga Transportation Company;
Angeline & Neches River Railroad Company;
Missouri & Louisiana Railroad Company;
Saginaw & Ouachita River Railroad Company;
Warren, Johnsville & Saline River Railroad Company;
Blytheville, Leachville & Arkansas Southern Railroad Company;
The Caddo & Choctaw Railroad Company;
Manila & Southwestern Railway Company;
Louisiana & Pine Bluff Railway Company;
Mansfield Railway & Transportation Company;
Louisiana & Pacific Railway Company;
Roosevelt & Western Railroad Company;
Tioga & Southeastern Railway Company;
Louisiana Central Railroad Company;
Monroe & Southwestern Railway Company;
Victoria, Fisher & Western Railroad Company;
Ouachita & Northwestern Railroad Company;
Lake Charles Railway & Navigation Company;
Louisiana Railway Company;
Zwolle & Eastern Railway Company;
Sabine & Northern Railroad Company;
Gidean & North Island Railroad Company;
47 Poplar Bluff & Dan River Railway Company;

the service performed for the respective proprietary lumber companies in moving the logs from their respective forests to their respective mills and in moving the product from the mills to the trunk lines is not a service of transportation by a common carrier railroad and that any allowances or divisions out of the rate on account thereof are unlawful:

It Further Appearing, That the following parties to the record, namely:

Little Rock, Maumelle & Western Railroad Company;
Bearden & Ouachita River Railroad Company;
Arkansas Eastern Railroad Company;
Crossett Railway Company;
Fordyce & Princeton Railroad Company;
Ouachita Valley Railway Company;
Freeo Valley Railroad Company;
Dorcheat Valley Railroad Company;
Galveston, Beaumont & Northeastern Railway Company;
Peach River & Gulf Railway Company;
Riverside & Gulf Railway Company;
Angelina & Neches River Railroad Company;
Saginaw & Ouachita River Railroad Company;

Blytheville, Leachville & Arkansas Southern Railroad Company;
The Caddo & Choctaw Railroad Company;
Manila & Southwestern Railway Company;
Louisiana & Pine Bluff Railway Company;
Mansfield Railway & Transportation Company;
Lake Charles Railway & Navigation Company;
Louisiana Railway Company;
Zwolle & Eastern Railway Company;
Gideon & North Island Railroad Company; have hereto-
48 fore filed with the Commission petitions asking for the establishment or re-establishment of through routes and joint rates on forest products to interstate destinations, which said petitions or complaints are filed on or consolidated with the record herein and on which a full hearing has been had:

It Is Ordered, That said petitions, so far as they relate to rates on the products of the mills of the proprietary companies, be, and for the reasons set forth in said reports they are hereby, dismissed.

It Is Further Ordered, That the defendants the Chicago, Rock Island & Pacific Railway Company; St. Louis & San Francisco Railroad Company; New Orleans, Texas & Mexico Railroad Company; Beaumont, Sour Lake & Western Railway Company; St. Louis, Iron Mountain & Southern Railway Company; The Texas & Pacific Railway Company; International & Great Northern Railway Company; The Missouri, Kansas & Texas Railway Company of Texas; St. Louis Southwestern Railway Company; St. Louis; Southwestern Railway Company of Texas; The Paragould Southeastern Railway Company; Eastern Texas Railroad Company; The Kansas City Southern Railway Company; Texarkana & Fort Smith Railway Company; The Houston, East & West Texas Railway Company; Texas & New Orleans Railroad Company; Louisiana Western Railroad Company; Morgan's Louisiana & Texas Railroad & Steamship Company; Lake Charles & Northern Railroad Company; Vicksburg, Shreveport & Pacific Railway Company; Louisiana & Arkansas Railway Company; Louisiana Railway & Navigation Company; Gulf, Colorado & Santa Fe Railway Company; The Texas & Gulf Railway Company; Missouri & North Arkansas Railroad Company; Illinois Central Railroad Company; Southern Railway Company; Northern Alabama Railway Company; New Orleans Great Northern Railroad Company, and Mobile & Ohio Railroad Company be, and they are
49 hereby, authorized, on not less than three days' notice, to reopen through routes and publish joint rates with the following parties to the record, and each of them, on the products of the mills of their respective proprietary companies:

Saline River Railway Company;
Warren & Ouachita Valley Railway Company;
El Dorado & Western Railway Company;
Thornton & Alexandria Railway Company;
Doniphan, Kensett & Searcy Railway;
Fourche River Valley & Indian Territory Railway Company;
Prescott & Northwestern Railroad Company;
Memphis, Dallas & Gulf Railroad Company;

Crittenden Railroad Company;
De Queen & Eastern Railroad Company;
Central Railway Company of Arkansas;
Gulf & Sabine River Railroad Company;
The Sibley, Lake Bisteneau & Southern Railway Company;
North Louisiana & Gulf Railroad Company;
Arkansas Southeastern Railroad Company;
Red River & Gulf Railroad Company;
Tremont & Gulf Railway Company;
The Nacogdoches & Southeastern Railroad Company;
Texas Southeastern Railroad Company;
Timpson & Henderson Railway Company;
Shreveport, Houston & Gulf Railroad Company;
Groveton, Lufkin & Northern Railway Company;
Moscow, Camden & San Augustine Railway Company;
Trinity Valley & Northern Railway Company;
Trinity Valley Southern Railroad Company;
Caro Northern Railway Company;
Butler County Railroad Company;
Deering Southwestern Railway;
Mississippi Valley Railway Company;
50 Paragould & Memphis Railway Company;
Salem, Winona & Southern Railroad Company;
Fernwood & Gulf Railroad Company;
New Orleans, Natalbany & Natchez Railway Company;
Albany Central Railroad Company;
Washington & Choctaw Railway Company;

Provided, The allowances or divisions out of such joint rates to be paid on the products of the mills of the said proprietary companies shall not exceed the divisions or allowances specified in the aforesaid supplemental report of the Commission.

It Is Further Ordered, That, for the reasons specified in the said supplemental report, no allowances or divisions shall be made on the products of the mills of the lumber companies owning or controlling the following companies party to the record:

Gould Southwestern Railway Company;
Kentwood & Eastern Railway Company;
Kentwood, Greensburg & Southwestern Railroad Company;
Liberty-White Railroad Company;
Natchez, Columbia & Mobile Railroad Company;

And It Is Further Ordered, That the joint rates hereinabove authorized may be published on three days' notice to the public and to the Commission, the tariffs to refer to this order by date and number, and on like notice any of the said defendants or parties to the record may republish rates on class and commodity traffic and on products of mills other than those of the respective proprietary lumber companies.

By the Commission.

[SEAL.] JOHN H. MARBLE, *Secretary.*"

11. Your petitioners, believing the reports and decisions
51 and orders of the Interstate Commerce Commission hereinbefore set out under paragraph 10 hereof to be void and unlawful, filed in this Court, on or about the 21st day of June, 1912, their petition asking this Court to suspend and annul said orders. Said suit is numbered 71 in this Court.

Thereupon, upon the motion of the United States and of the Interstate Commerce Commission, this Court, basing its decision upon the case of Proctor & Gamble v. The United States, on the 29th day of June, 1912, dismissed the petition of these petitioners for want of jurisdiction in this Court; and thereupon, to meet the decision of this court, these petitioners and other railroad companies, affected by the report, decision and order of the Interstate Commerce Commission, filed an application before the Interstate Commerce Commission for a modification of the order hereinabove set out, which application is in form and substance as follows, to-wit:

Before the Interstate Commerce Commission.

I. & S. Docket No. 11.

Petition.

Comes now the undersigned, attorney for the various tap line railroads whose status was determined by the Commission in the above entitled investigation, and respectfully requests that the Commission will, at the earliest possible date, issue an affirmative order substantially in form as follows:

"It is ordered that Malvern & Freeo Valley Railway Company; Wilmar & Saline Valley Railroad Company; Arkansas & Gulf Railroad Company; Little Rock, Maumelle & Western Railroad Company; Beirne & Clear Lake Railroad Company; Mississippi,
52 Arkansas & Western Railway Company; Bearden & Ouachita River Railroad Company; Arkansas Eastern Railroad Company; Blytheville, Burdette & Mississippi River Railway Company; Brookings & Peach Orchard Railroad Company; Crossett Railway Company; Fordyce & Princeton Railroad Company; Homan & Southeastern Railway Company; Little Rock, Sheridan & Saline River Railway Company; L'Anguille River Railway Company; Ouachita Valley Railway Company; Griffin, Magnolia & Western Railway Company; Saline Bayou Railway Company; Enterprise Railway Company; Natchez, Ball & Shreveport Railway Company; Black Bayou Railroad Company; The Bodcaw Valley Railway Company; Mill Creek & Little River Railway & Navigation Company; Red River & Rocky Mountain Railroad Company; Woodworth & Louisiana Central Railway Company; Freeo Valley Railroad Company; Natchez, Urania & Ruston Railway Company; Bernice & Northwestern Railway Company; Dorcheat Valley Railroad Company; Manghan & Northeastern Railway Company; Galveston, Beaumont & Northeastern Railway Company; Peach River & Gulf Railway Company; Riverside & Gulf Railway Company; Jefferson & Northeastern Railway Company; Beaumont & Saratoga Trans-

portation Company; Angelina & Neches River Railroad Company; Missouri & Louisiana Railroad Company; Saginaw & Ouachita River Railroad Company; Warren, Johnsville & Saline River Railroad Company; Blytheville, Leachville & Arkansas Southern Railroad Company; The Caddo & Choctaw Railroad Company; Manila & Southwestern Railway Company; Louisiana & Pine Bluff Railway Company; Mansfield Railway & Transportation Company; Louisiana & Pacific Railway Company; Roosevelt & Western Railroad Company; Tioga & Southeastern Railway Company; Louisiana Central Railroad Company; Monroe & Southwestern Railway Company; Victoria, Fisher & Western Railroad Company;
53 Ouachita & Northwestern Railroad Company; Lake Charles Railway & Navigation Company; Louisiana Railway Company; Zwolle & Eastern Railway Company; Sabine & Northern Railroad Company; Gideon & North Island Railroad Company, and Poplar Bluff & Dan River Railway Company be and each of them are required, on or before September 15, 1912, to cease and desist, and for a period of two years thereafter to abstain from maintaining joint interstate rates for the movement of logs to the mills of the respective proprietary lumber companies in Opinions Nos. 1853 and 1898 (which opinions are made part hereof), and for the movement of the products of such logs and mills to interstate destinations.

It is further ordered that the defendants named, the Chicago, Rock Island & Pacific Railway Company; St. Louis & San Francisco Railroad Company; New Orleans, Texas & Mexico Railroad Company; Beaumont, Sour Lake & Western Railway Company; St. Louis, Iron Mountain & Southern Railway Company; The Texas & Pacific Railway Company; International & Great Northern Railway Company; The Missouri, Kansas & Texas Railway Company of Texas; St. Louis Southwestern Railway Company; St. Louis Southwestern Railway Company of Texas; The Paragould Southeastern Railway Company; Eastern Texas Railroad Company; The Kansas City Southern Railway Company; Texarkana & Fort Smith Railway Company; The Houston East & West Texas Railway Company; Texas & New Orleans Railroad Company; Louisiana Western Railroad Company; Morgan's Louisiana & Texas Railroad & Steamship Company; Lake Charles & Northern Railroad Company; Vicksburg, Shreveport & Pacific Railway Company; Louisiana & Arkansas Railway Company; Louisiana Railway & Navigation Company; Gulf, Colorado & Santa Fe Railway Company; The Texas & Gulf Railway Company; Missouri & North Arkansas Railroad Company; Illinois Central Railroad Company; Southern Railway Com-
54 pany; Northern Alabama Railway Company; New Orleans Great Northern Railroad Company and Mobile & Ohio Railroad Company; Saline River Railway Company; Warren & Ouachita Valley Railway Company; El Dorado & Wessen Railway Company; Thornton & Alexandria Railway Company; Doniphan, Kensett & Searcy Railway; Fourche River Valley & Indian Territory Railway Company; Prescott & Northwestern Railway Company; Memphis, Dallas & Gulf Railroad Company; Crittenden Railroad Company; De Queen & Eastern Railroad Company; Central Railway Company of Arkansas; Gulf & Sabine River Railroad Company; The Sibley,

Lake Bisteneau & Southern Railway Company; North Louisiana & Gulf Railroad Company; Arkansas Southeastern Railroad Company; Red River & Gulf Railroad Company; Tremont & Gulf Railway Company; The Nacogdoches & Southeastern Railroad Company; Texas Southeastern Railroad Company; Timpson & Henderson Railway Company; Shreveport, Houston & Gulf Railroad Company; Groveton, Lufkin & Northern Railway Company; Moscow, Camden & San Augustine Railway Company; Trinity Valley & Northern Railway Company; Trinity Valley Southern Railroad Company; Caro Northern Railway Company; Butler County Railroad Company; Deering Southwestern Railway; Mississippi Valley Railway Company; Paragould & Memphis Railway Company; Salem, Winona & Southern Railroad Company; Fernwood & Gulf Railroad Company; New Orleans, Natalbany & Natchez Railway Company; Alabama Central Railroad Company, and Washington & Choctaw Railway Company be and they are hereby authorized and required on or before September 15, 1912, to reopen through routes and publish joint rates upon lumber destined to interstate points, provided the maximum of such joint rates shall not exceed those in effect April 30, 1912.

It is further ordered that the divisions or proportions of
55 the joint rates accruing to the Saline River Railway Company; Warren & Ouachita Valley Railway Company; El Dorado & Wesson Railway Company, Thornton & Alexandria Railway Company; Doniphan, Kensett & Searcy Railway Company; Forche River Valley & Indian Territory Railway Company; Prescott & Northwestern Railway Company; Memphis, Dallas & Gulf Railroad Company; Crittenden Railroad Company; De Queen & Eastern Railroad Company; Central Railway Company of Arkansas; Gulf & Sabine River Railroad Company; The Sibley, Lake Bisteneau & Southern Railway Company; North Louisiana & Gulf Railroad Company; Arkansas Southeastern Railroad Company; Red River & Gulf Railroad Company; Tremont & Gulf Railway Company; The Nacogdoches & Southeastern Railroad Company; Texas Southeastern Railroad Company; Timpson & Henderson Railway Company; Shreveport, Houston & Gulf Railroad Company; Groveton, Lufkin & Northern Railway Company; Moscow, Camden & San Augustine Railway Company; Trinity Valley & Northern Railway Company; Trinity Valley Southern Railroad Company; Caro Northern Railway Company; Butler County Railroad Company; Deering Southwestern Railway Company; Mississippi Valley Railway Company; Paragould & Memphis Railway Company; Salem, Winona & Southern Railroad Company; Fernwood & Gulf Railroad Company; New Orleans, Natalbany & Natchez Railway Company; Alabama Central Railroad Company, and Washington & Choctaw Railway Company upon the products of the mills of the proprietary companies named in Opinions Nos. 1853 and 1898, located on said lines, shall not exceed the divisions, proportions or allowances specified in said opinions."

The basis for the aforesaid request is contained in the following statement of facts and circumstances arising subsequent to the entry of the order of May 14, 1912:

(1) The order of May 14, 1912, entered in such proceed-
56 ing is not such an order as is required by Sections 14 and 15 of the Act to Regulate Commerce as amended June 29, 1906.

(2) Subsequent to the entry of said order of May 14, 1912, the Supreme Court of the United States announced its opinion in the Proctor & Gamble case, in which it was held that the Commerce Court had no jurisdiction of suits brought to enjoin so-called negative orders of the Commission.

(3) There was much difference of opinion as to whether said order of May 14, 1912, was or was not an affirmative order within the definition of the Supreme Court in the said Proctor & Gamble case. Application was made to the Commission for modification of said order substantially in form with that set forth above, which said application was denied.

(4) Three test suits were filed in the Commerce Court to enjoin such order of May 14, 1912, and the Commerce Court, upon motion of the Commission and the Department of Justice, dismissed the same on the authority of the Proctor & Gamble decision.

(5) The time limit within which appeals from such decree of dismissal must be made will expire August 18, 1912.

(6) The trunk line railroads connecting with the so-called tap lines have accepted the Commission's requirement of May 14, 1912, as an affirmative order, and the said tap lines are without any recourse whereby to protect their lawful rights.

(7) The modification above requested will not change in any wise the present status of any of the tap line carriers so far as joint rates are concerned; the only effect of the order will be to confer jurisdiction upon the court to determine the lawful rights of the said tap lines and their shippers, and, so far as the law may require or permit, protect the tap lines and their shippers from unlawful acts of the trunk line connections.

57 (8) In the case of fifty-seven (57) lines in which the Commission held that the transportation of logs from the forest to the mills and the product from the mills to the trunk lines was not a service of transportation when performed for the proprietary lumber companies, the trunk lines have refused to establish joint rates upon other forest products, notwithstanding the Commission's suggestion so to do, the position taken by the trunk lines being that if the tap lines are not common carriers of logs and lumber for the proprietary lumber companies such tap lines are not common carriers of any logs and lumber.

(9) Members of the Commission have stated since the entry of this order that the questions of law involved in the tap line cases are important and should be determined at an early date. These questions can be determined at the present time by the entry of the form of order requested herein.

(10) Since May 14, 1912, the Commission has established joint rates upon lumber transported by short line railroad companies for proprietary lumber companies, and has entered an affirmative order requiring the publication of such joint rates. We are asking in the case of the Saline River Railway Company and other carriers recog-

nized by this Commission as properly entitled to participate in joint rates that the same sort of an order be entered as was made by the Commission in the McCloud River Lumber case.

In the Peavey Elevator cases the Commission found that payment out of the joint rate to the Peavey Elevator Company for the elevation of the grain of that company was a rebate and discrimination; the finding in the tap line cases, so far as the transportation of lumber and logs for the proprietary lumber companies upon the fifty-seven (57) lines held not to be carriers of logs or lumber for the proprietary lumber companies, is that any allowance out of the joint rate is a rebate and discrimination. In that case an order
58 to cease and desist was made. That order was similar in all respects to the order requested in this case as to the fifty-seven first named tap lines.

We therefore respectfully petition this Honorable Commission to modify its order in form substantially as above requested.

L. M. WALTER,
Attorney for Petitioners.

And thereupon, on the 30th day of October, 1912, the Interstate Commerce Commission made and entered of record an amended order in form and substance as follows, to-wit:

Interstate Commerce Commission.

Investigation and Suspension Docket No. 11.

The Tap-Line Case.

Amended Order.

At a General Session of the Interstate Commerce Commission, held at its office in Washington, D. C., on the 30th day of October, A. D. 1912.

Investigation and Suspension Docket No. 11.

In the Matter of the Investigation and Suspension of Schedules Canceling Through Rates with Certain Tap-Line Connections; and Certain Other Cases Consolidated Herewith.

This matter coming on again upon a motion for an amendment of the order heretofore entered by the Commission on May 14, 1912, and the Commission being fully advised.

It Is Ordered, That the said order be, and it is hereby, modified to read as follows:

1. It Appearing, That a full investigation of the matters and things herein involved has been had, and the Commission, on April 23, 1912, having made and filed a report containing its findings of
59 fact and conclusions thereon, and having also on the said 14th day of May, 1912, made and filed a supplemental report containing its further findings of fact and conclusions

thereon, which said reports are hereby referred to and made a part hereof;

2. It Further Appearing, That the Commission upon the record finds in the case of the following named parties to the record, and each of them, namely:

Malvern & Freeo Valley Railway Company;
Wilmar & Saline Valley Railroad Company;
Arkansas & Gulf Railroad Company;
Little Rock, Maumelle & Western Railroad Company;
Beirne & Clear Lake Railroad;
Mississippi, Arkansas & Western Railway Company;
Bearden & Ouachita River Railroad Company;
Arkansas Eastern Railroad Company;
Blytheville, Burdette & Mississippi River Railway Company;
Brookings & Peach Orchard Railroad Company;
Crossett Railway Company;
Fordyce & Princeton Railroad Company;
Homan & Southeastern Railway Company;
Little Rock, Sheridan & Saline River Railway Company;
L'Anguille River Railway Company;
Ouachita Valley Railway Company;
Griffin, Magnolia & Western Railway Company;
Saline Bayou Railway Company;
Enterprise Railway Company;
Natchez, Ball & Shreveport Railway Company;
Black Bayou Railroad Company;
The Bodcaw Valley Railway Company;
Mill Creek & Little River Railway & Navigation Company;
Red River & Rocky Mount Railway Company;
60 Woodworth & Louisiana Central Railway Company;
Freeo Valley Railroad Company;
Natchez, Urania & Ruston Railway Company;
Bernice & Northwestern Railway Company;
Dorcheat Valley Railroad Company;
Manghan & Northeastern Railway Company;
Galveston, Beaumont & Northeastern Railway Company;
Peach River & Gulf Railway Company;
Riverside & Gulf Railway Company;
Jefferson & Northwestern Railway Company;
Beaumont & Saratoga Transportation Company;
Angelina & Neches River Railroad Company;
Missouri & Louisiana Railroad Company;
Saginaw & Ouachita River Railroad Company;
Warren, Johnsville & Saline River Railroad Company;
Blytheville, Leachville & Arkansas Southern Railroad Company;
The Caddo & Choctaw Railroad Company;
Manila & Southwestern Railway Company;
Louisiana & Pine Bluff Railway Company;
Mansfield Railway & Transportation Company;
Louisiana & Pacific Railway Company;
Roosevelt & Western Railroad Company;
Tioga & Southeastern Railway Company;

Louisiana Central Railroad Company;
Monroe & Southwestern Railway Company;
Victoria, Fisher & Western Railroad Company;
Ouachita & Northwestern Railroad Company;
Lake Charles Railway & Navigation Company;
Louisiana Railway Company;
61 Zwolle & Eastern Railway Company;
Sabine & Northern Railroad Company;
Gideon & North Island Railroad Company;
Poplar Bluff & Dan River Railway Company;

that the tracks and equipment with respect to the industry of the several proprietary companies are plant facilities, and that the service performed therewith for the respective proprietary lumber companies in moving logs to their respective mills and performed therewith in moving the products of the mills to the trunk lines is not a service of transportation by a common carrier railroad, but is a plant service by a plant facility; and that any allowances or divisions out of the rate on account thereof are unlawful and result in undue and unreasonable preferences and unjust discriminations, as found in the said reports;

3. It Is Ordered, That the principal defendants, The Chicago, Rock Island & Pacific Railway Company; St. Louis & San Francisco Railroad Company; New Orleans, Texas & Mexico Railroad Company; Beaumont, Sour Lake & Western Railway Company; St. Louis, Iron Mountain & Southern Railway Company; The Texas & Pacific Railway Company; International & Great Northern Railway Company; The Missouri, Kansas & Texas Railway Company of Texas; St. Louis Southwestern Railway Company; St. Louis Southwestern Railway Company of Texas; The Paragould Southeastern Railway Company; Eastern Texas Railroad Company; The Kansas City Southern Railway Company; Texarkana & Fort Smith Railway Company; The Houston, East & West Texas Railway Company; Texas & New Orleans Railroad Company; Louisiana Western Railroad Company; Morgan's Louisiana & Texas Railroad & Steamship Company; Lake Charles & Northern Railroad Company; Vicksburg, Shreveport & Pacific Railway Company; Louisiana & Arkansas Railway Company; Louisiana Railway & Navi-
62 gation Company; Gulf, Colorado & Santa Fe Railway Company; The Texas & Gulf Railway Company; Missouri & North Arkansas Railroad Company; Illinois Central Railroad Company; Southern Railway Company; Northern Alabama Railway Company; New Orleans Great Northern Railroad Company, and Mobile & Ohio Railroad Company be, and they are hereby, notified and required to cease and desist, and for a period of two years hereafter, or until otherwise ordered, to abstain from making any such allowances to any of the above named parties to the record in respect of any such above described service.

4. It Further Appearing, That the following parties to the record, namely:

Little Rock, Maumelle & Western Railroad Company;
Bearden & Ouachita River Railroad Company;
Arkansas Eastern Railroad Company;
Crossett Railway Company;
Fordyce & Princeton Railroad Company;
Ouachita Valley Railway Company;
Freeo Valley Railroad Company;
Dorcheat Valley Railroad Company;
Galveston, Beaumont & Northeastern Railway Company;
Peach River & Gulf Railway Company;
Riverside & Gulf Railway Company;
Angelina & Neches River Railroad Company;
Saginaw & Ouachita River Railroad Company;
Blytheville, Leachville & Arkansas Southern Railroad Company;
The Caddo & Choctaw Railroad Company;
Manila & Southwestern Railway Company;
Louisiana & Pine Bluff Railway Company;
Mansfield Railway & Transportation Company;
Lake Charles Railway & Navigation Company;
Louisiana Railway Company;
63 Zwolle & Eastern Railway Company;
Gideon & North Island Railroad Company;

have heretofore filed with the Commission their several petitions asking for the establishment or re-establishment of through routes and joint rates to interstate destinations, which said petitions or complaints are filed on or consolidated with the record herein and on which a full hearing has been had:

5. It Is Ordered, That said petitions, so far as they relate to rates on the products of the mills of the respective proprietary companies, be, and for the reasons set forth in said reports they are hereby, dismissed.

6. It Further Appearing, That the following parties to the record, namely:

Warren & Ouachita Valley Railway Company;
El Dorado & Wesson Railway Company;
Thornton & Alexandria Railway Company;
Fourche River Valley & Indian Territory Railway Company;
Prescott & Northwestern Railroad Company;
Crittenden Railroad Company;
North Louisiana & Gulf Railroad Company;
Arkansas Southeastern Railroad Company;
Red River & Gulf Railroad Company;

Mississippi Valley Railway Company;
Paragould & Memphis Railway Company;

64 have heretofore filed with the Commission their several petitions asking for the establishment or re-establishment of through routes and joint rates to interstate destinations, which said petitions or complaints are filed on or consolidated with the record herein, and on which a full hearing has been had:

7. It Is Ordered, That the said principal defendants above named be, and they are hereby, required, on or before January 1, 1913, to re-establish, and for a period of two years to maintain with each of the said parties to the record last above named, the through interstate routes and joint rates in effect, in accordance with their respective tariffs filed with this Commission on April 30, 1912;

8. Provided, That the rates on yellow pine lumber and articles taking the same rates from points on the lines of the last above named parties to the record shall not exceed the current rates in effect from the junction points; and

9. Provided further, That the allowances or divisions out of such joint rates to be paid by said principal defendants, respectively, to the said last named parties to the record on the products of the mills of the said respective proprietary companies named in said report shall not exceed the divisions or allowances specified in the aforesaid supplemental report of the Commission, which are hereby fixed as maximum divisions or allowances thereon, until further order, the Commission finding upon the record that any allowances or divisions in excess thereof result in undue preferences and unjust discriminations and are unlawful.

10. It Is Further Ordered, That in the case of the following parties to the record, by which petitions for the establishment or re-establishment of through routes and joint rates have not been filed, namely:

Saline River Railway Company;
Doniphan, Kensett & Searcy Railway;
Memphis, Dallas & Gulf Railroad Company;
65 De Queen & Eastern Railroad Company;
Central Railway Company of Arkansas;
Gulf & Sabine River Railroad Company;
The Sibley, Lake Bisteneau and Southern Railway Company;
Timpson & Henderson Railway Company;
Moscow, Camden & San Augustine Railway Company;
Salem, Winona & Southern Railroad Company;
Fernwood & Gulf Railroad Company;
New Orleans, Natalbany & Natchez Railway Company;
Alabama Central Railroad Company;
Washington & Choctaw Railway Company;

the said principal defendants be, and *there* are hereby, authorized to re-establish the through routes and joint rates in effect in accordance

with their respective tariffs filed with this Commission on April 30, 1912, subject to the terms and conditions prescribed in paragraphs 8 and 9 hereof; and Provided, further, that upon the failure of the principal defendants to re-establish the through routes and joint rates in effect on April 30, 1912, with the last above named parties to the record on or before January 1, 1913, the Commission will upon the filing herein of appropriate petitions therefor enter an order upon the record herein requiring the re-establishment of such through routes and joint rates.

11. It Is Further Ordered, That in case of the failure of the principal defendants to re-establish, on or before January 1, 1913, the through routes and joint rates in effect on April 30, 1912, on traffic other than the products of the mills of the respective proprietary companies in the case of any of the parties to the record first herein above named, the Commission will upon appropriate petition herein enter an order requiring the establishment of such through routes and joint rates or enter upon an inquiry with respect thereto.

12. It Is Further Ordered, That the divisions of all joint
66 rates herein required and authorized to be re-established on traffic other than the products of the mills of the several proprietary lumber companies shall be submitted to the Commission by the parties hereto for approval.

13. It Is Further Ordered, That, in the case of the following parties to the record, namely:

Gould Southwestern Railway Company;
Kentwood & Eastern Railway Company;
Kentwood, Greensburg & Southwestern Railroad Company;
Liberty-White Railroad Company;
Natchez, Columbia & Mobile Railroad Company;

for the reasons specified in the said supplemental report no allowances or divisions shall be made on the products of the mills of the respective proprietary lumber companies.

14. And It Is Further Ordered, That the joint rates herein above authorized or required may be published on three days' notice to the public and to the Commission, the tariffs to refer to this order by date and number.

By the Commission.

[SEAL.] JOHN H. MARBLE, *Secretary.*

12. Your petitioners further state that as a common carrier the Louisiana & Pacific Railway Company became, and until midnight on the 30th day of April, 1912, was, a party to each and all of the following tariffs applicable on lumber and articles taking lumber rates to the various points in said tariffs mentioned, the lines publishing said tariffs and the lines mentioned and concurring therein constituting, with the petitioner the Louisiana & Pacific Railway Company, reasonable through routes and said tariffs prescribing
67 reasonable through rates between points on the Louisiana & Pacific Railway and the several points therein mentioned, to-wit:

Southwestern Lines Lumber Tariffs Canceled May 1st, 1912, from Louisiana & Pacific Railway Company Points.

S. W. L. 48-G I. C. C. 892 to Oklahoma points.

Chicago & Eastern Illinois Railway Company, St. Louis & San Francisco Railway Company and Chicago, Rock Island & Pacific Railway Company Lumber Tariff Canceled May 1st, 1912, from Louisiana & Pacific Railway Company Points.

2800-C I. C. C. 2596 to Ill., Ind., Ky., Mich., Mo., N. Y., Ohio, Pa., W. Va., Wisc., etc.

13. Your petitioners further say that prior to the 31st day of October, 1906, the petitioner Hudson River Lumber Company (located at De Ridder, Louisiana), erected a large sawmill at De Ridder, Louisiana, on the main line of The Kansas City Southern Railway, and the said Hudson River Lumber Company built a standard gauge railroad in an easterly direction to Bundick, a distance of about ten miles, for the purpose of reaching the timber owned by said Hudson River Lumber Company and bringing said timber to the mill of said Company, there to be manufactured into lumber and then to be delivered to the Kansas City Southern Railway at De Ridder for transportation to various markets. Said road so constructed by
69 the Hudson River Lumber Company was formerly called the De Ridder & Eastern Railway.

Also prior to October, 1909, the petitioner King-Ryder Lumber Company, having a mill located at Bonami, Louisiana, built a standard gauge railroad in an eastern direction to Walla, Louisiana, for the purpose of hauling logs from the woods to Bonami, there to be manufactured into lumber and transported over the Kansas City Southern Railway to various markets.

The only trunk line connection for both of these roads then serving separately only the two mills above mentioned was the Kansas City Southern Railway. This trunk line road, the Kansas City Southern, encouraged the building of these properties, and for that purpose and in order to encourage the building of such lines of

road, extended the application of the rate on lumber in effect from Bonami and De Ridder to the woods at the end of the lines of these roads, the point of origin of logs, and allowed these roads, extending from the forest to the mills, certain divisions of the through rate on the manufactured lumber from Bonami and De Ridder to the various points to which said lumber was carried. This practice, known as the "milling in transit privilege," then obtained and now obtains by all railroad companies, and the same practice and custom is applied to grain; cotton and various other commodities, and such practice is recognized in law, and was at that time, and ever since has been, recognized by the Interstate Commerce Commission.

Also prior to October 31, 1906, there was in Calcasieu Parish,
Louisiana, a lumber mill known as the Bradley-Ramsey
70 Lumber Company, which said Bradley-Ramsey Lumber Company also had a line of railroad for hauling timber from the woods to the mill. This road was a narrow gauge road and extended from a point on the Calcasieu River in Section 9, Township 9, Range 8, Calcasieu Parish, Louisiana, to or near a station now called Curtis, and to a point in Section 2, Township 6, Range 10. This road consisted of about thirty miles of track.

About January 17, 1906, the petitioner the Long-Bell Lumber Company purchased the property of the Bradley-Ramsey Lumber Company, including therein two mills at Lake Charles and large tracts of timber in Calcasieu Parish, adjacent to the timber holdings of the King-Ryder Lumber Company and the Hudson River Lumber Company, and included in said purchase the said narrow-gauge logging road of about thirty miles in length, which was built for the purpose of getting logs from the timber north of Lake Charles to the mills at Lake Charles.

This purchase, together with the holdings of the King-Ryder Lumber Company and the Hudson River Lumber Company, gave to the petitioners the Long-Bell Lumber Company, King-Ryder Lumber Company and the Hudson River Lumber Company about forty miles of timber between De Ridder and Lake Charles, Louisiana. This body of timber, or portions thereof, at different times thereafter was sold by the Long-Bell Lumber Company to the other lumber companies petitioners herein, each of said companies owning certain bodies of timber adjacent to the mills built or owned respectively by them.

Up to this time—that is, to about January, 1906—the said peti-
toiners owning the mills at De Ridder and Bonami had
71 been seriously hampered in their efforts to dispose of their products because of the absence of railroad competition, there being but one trunk line connection, the Kansas City Southern Railway aforesaid, and this railroad was unable to furnish adequate transportation facilities and competitive rates to the markets desired to be reached by the said King-Ryder Lumber Company and Hudson River Lumber Company.

Under this condition of affairs and during the year 1906, certain of the owners of the stock of the various lumber companies then owning the forty miles of timber between De Ridder and Lake

Charles, together with the owners of the stock in the three lumber roads heretofore mentioned, seeing the necessity for arranging for additional transportation facilities in the form of new trunk line connections, and with this end in view, organized a company known as the Louisiana & Pacific Railway Company, one of the petitioners herein, being a reorganization of the company formerly owning the short line of railroad from Bonami to Walla.

It was the understanding, intention and plan of the parties organizing and promoting the said Louisiana & Pacific Railway Company that it would be built from De Ridder to Lake Charles, and that connections would be made with the Southern Pacific Railway System and the Missouri Pacific Railway System at Lake Charles, St. Louis & San Francisco System at Fulton, Louisiana; the Kansas City Southern Railway at Bonami; the Kansas City Southern Railway and the Gulf, Colorado & Santa Fe Railway at De Ridder; thus giving the mills located and to be located on the lines of the Louisiana & Pacific Railway additional and ample
72 transportation facilities on a competitive rate basis.

Based on this agreement, understanding and intention of the parties promoting and bringing about the organization of the Louisiana & Pacific Railway, the mill companies petitioners herein parted with and sold the lines of railway theretofore owned by them to the Louisiana & Pacific Railway Company, and the additional transportation facilities contemplated in the organization of the Louisiana & Pacific Railway Company, and by the owners who had sold the three short line roads hereinbefore mentioned, were being provided, or about to be provided, by the Louisiana & Pacific Railway, by the construction by said company of a main line of railroad extending from De Ridder to Lake Charles, with branch lines extending to Bundick, Walla and Curtis.

The said Louisiana & Pacific Railway Company at this time owned a line of railway from De Ridder, Louisiana, to a certain point on the Calcasieu River, at or near the northwest corner of Section Ten (10), Township Nine (9), Range Eight (8), in said Calcasieu Parish, a portion of said road being completed and in operation, a portion in process of construction, a portion consisting of the narrow-gauge railroad purchased from the Bradley-Ramsey Lumber Company; and the said Louisiana & Pacific Railway Company at this time—that is, prior to the 31st day of October, 1906, also owned a right of way for a railroad from Lake Charles, Louisiana, to a point on its said road near the northeast corner of Section Thirty-two (32), Township Eight (8), Range Eight (8), in said Calcasieu Parish, and was constructing its said road so as to
73 have a line of railroad from De Ridder, Louisiana, to Lake Charles, Louisiana, and with the branch line heretofore mentioned.

A plat showing the "De Ridder & Eastern Railroad," the "Louisiana & Pacific" as it then was, that is, extending from Bonami southeast, the portion of the road under construction; the narrow gauge road built by the Bradley-Ramsey Lumber Company, called the Lake Charles & Leesville Railroad; and the right of way from

Lake Charles to the northeast corner of said Section Thirty-two, is hereto annexed.

A plat showing the Louisiana & Pacific Railway Company lines and connections, as they now exist, is hereto annexed.

Under this condition of affairs and prior to the 31st day of October, 1906, the officers representing the interests controlling what is known as the Southern Pacific System entered into negotiations with the Louisiana & Pacific Railway Company looking to a joint interest by "the Southern Pacific System" and the Louisiana & Pacific Railway in that portion of the line being built between De Ridder and Lake Charles, to the end that the "Southern Pacific System" might have an interest in that portion of said line of railway between De Ridder and Lake Charles and might over that route reach a territory north of De Ridder; and the "Southern Pacific System," through a subsidiary company, known as the Lake Charles & Northern Railroad Company, purchased the said Louisiana & Pacific Railway Company's line of road and right of way between De Ridder and Lake Charles, extended the road northeast to Nitram, by trackage contract with the Santa Fe, and entered into a joint trackage agreement whereby, although the "Southern Pacific System"
74 would then own the railway from Lake Charles to De Ridder, yet the Louisiana & Pacific Railway Company, through said trackage agreement, had the right to still operate as its main line of railway the road from De Ridder to Lake Charles, Louisiana, and could still carry out the object and purpose for which said railroad was formed, to-wit, obtaining adequate transportation facilities and competitive rates and connections with the various other railroad systems in Calcasieu Parish, Louisiana; said contract, dated the 31st day of October, 1906, between the Louisiana & Pacific Railway and the Lake Charles & Northern Railroad Company, provides that the Lake Charles & Northern Railroad Company would, and it afterwards did, complete the said line of railroad so as to make a continuous, complete and direct line of railroad from De Ridder to Lake Charles, Louisiana, and thereby form an outlet with the defendant the Louisiana Western Railroad Company.

Said contract of sale between the said Louisiana & Pacific Railway Company and the Lake Charles & Northern Railroad Company further provided that in consideration of the sale of said portion of the Louisiana & Pacific Railway Company's railroad and right of way between De Ridder and Lake Charles, that the said Lake Charles & Northern Railroad Company would (and the said Lake Charles & Northern Railroad Company afterwards did) enter into a contract with the Louisiana & Pacific Railway Company, which said contract gives to the Louisiana & Pacific Railway Company joint trackage rights over the line of railroad from De Ridder to Lake Charles, and the right to operate trains of the said Louisiana & Pacific Railway Company over said road at a certain price
75 and upon certain terms fixed by said contract. Said line of railroad between De Ridder and Lake Charles will, for convenience and to distinguish it from the other portions of the Louisiana & Pacific Railway Company's railway, be hereafter referred to as the "joint track."

Said contract between the Louisiana & Pacific Railway Company and the said Lake Charles & Northern Railroad Company further provided that said contract, that is, the agreement for the sale of the "joint track" by the Louisiana & Pacific Railway Company to the Lake Charles & Northern Railroad Company, with all things pertaining thereto, was entered into on the faith of the consummation and performance of a certain agreement of October 31, 1906, between the respondent Louisiana Western Railroad Company and said petitioners Louisiana & Pacific Railway Company, the Hudson River Lumber Company, the King-Ryder Lumber Company, the Calcasieu Long Leaf Lumber Company and the Long-Bell Lumber Company.

14. Petitioners further allege that in Interstate Commerce shipments there prevails now, and has prevailed for many years, in all of the lumber producing districts of the South, with the full concurrence of the railroad systems and the producers and shippers of lumber, and with the full concurrence of the Interstate Commerce Commission, what are known as "blanket rates," that is, all lumber rates from all points on all lines in a given territory are the same to any point in any other given territory; that, consequently, the lumber rates for Interstate Commerce shippers from any point on the line of the petitioner the Louisiana & Pacific Railway Com-
76 pany, were, until the 1st day of May, 1912, the same as from any of its points of connection with other railroads.

15. Petitioners further state that under the conditions hereinbefore set out and contemporaneously with the contract of sale between the Louisiana & Pacific Railway Company and the Lake Charles & Northern Railroad Company, in reference to the track and roadbed between De Ridder and Lake Charles, and contemporaneously with the "joint trackage" agreement hereinbefore mentioned between the Louisiana & Pacific Railway Company and the Lake Charles & Northern Railroad Company, and on the 31st day of October, 1906, the petitioners herein and the respondent herein, Louisiana Western Railroad Company, entered into a tripartite agreement wherein and whereby it was agreed that the Louisiana Western Railroad Company and the Louisiana & Pacific Railway Company would, during the existence of said agreement, interchange business with each other at the point of connection of their respective lines and by means thereof establish a through line of railway with traffic thereover on the basis of rates and divisions as in said contract set forth.

The Lumber Companies petitioners herein agreed that during the existence of said agreement they would ship or cause to be shipped over the line of railroad of the Louisiana & Pacific Railway Company to its said connection at Lake Charles, there to be delivered to the Louisiana Western Railroad Company for transportation to destination, at least 40 per cent of the aggregate products of all the mills of the petitioners which were then or which might thereafter be located on the line of railway of the petitioner Louisiana & Pacific Railway Company.

77 The Louisiana & Pacific Railway Company, upon its part, agreed to deliver said freight to the Louisiana Western Railroad Company.

The Louisiana Western Railroad Company agreed that it would accept from the Louisiana & Pacific Railway Company all shipments by it offered to or from points between which joint rates were in effect and to transport the same with reasonable promptness and dispatch, and would use every reasonable effort to furnish the Louisiana & Pacific Railway Company with cars as requested by it from time to time to a number sufficient for transporting 40 per cent of the products of the mills of the petitioner's Lumber Companies along the line of railway of the Louisiana & Pacific Railway Company.

Said contract further provides that the Louisiana Western Railroad Company and the Louisiana & Pacific Railway Company agree, each with the other, that they will enter into joint tariffs relating to the joint traffic over their respective lines, and to file the same with the Interstate Commerce Commission, in the manner and form as required by law.

Said contract further provides that the Louisiana Western Railroad Company agrees that it will, at all times, during the existence of said agreement, publish for all points mentioned in its tariffs, the same freight rates on all products of the defendants from all points on the line of railway of the Louisiana & Pacific Railway Company, as are or shall be in effect from Lake Charles, Louisiana, on the line of the said Louisiana Western Railroad Company, which rate shall, at all times, during the existence of said agreement, be competitive with rates from other points in Calcasieu Parish, producing
78 yellow pine, to all destinations to which the Louisiana Western Railroad Company may be able to arrange through rates.

Said contract also provides that it shall commence and become effective on the date thereof and shall be and remain in full force and effect for a period of twenty (20) years thereafter, or so long as the petitioners Lumber Companies shall operate their mills along the line of railroad of the Louisiana & Pacific Railway Company.

A full, true and complete copy of said contract is hereto attached, marked Exhibit "A," hereby referred to and made a part hereof, as fully as if set out herein in full.

16. Petitioner herein, the Longville Lumber Company, is not by name a party to the agreement between the other petitioners and the respondent Louisiana Western Railroad Company, but the Longville Lumber Company, since the execution of the said contract, purchased from one of the other petitioners timber along the line of the railroad of the Louisiana & Pacific Railway Company, has conformed to the provisions of said contract and is entitled to and claims the benefits of said contract, and has been recognized by all the parties to said contract as having the same rights thereunder as the other Lumber Companies petitioners herein.

17. At about the same time that the contracts heretofore mentioned were entered into the petitioners herein entered into a contract with the Colorado Southern, New Orleans & Pacific Railroad Company, which changed its name to, and is now, the New Orleans, Texas & Mexico Railroad Company, and with the St. Louis & San

Francisco Railroad Company, similar in its terms to the con-
79 tract made between petitioners and the Louisiana Western Railroad Company, hereinbefore referred to, and which said contract between the petitioners and the Colorado Southern, New Orleans & Pacific Railroad Company and the St. Louis & San Francisco Railroad Company provides that the Colorado Southern, New Orleans & Pacific Railroad Company and the St. Louis & San Francisco Railroad Company of the one part and the Louisiana & Pacific Railroad Company of the other part will interchange business with each other at the point of connection of their respective lines, and by means thereof establish a through line of railway with traffic thereover on the basis of the division of rates as in said contract set forth; and that said Colorado Southern, New Orleans & Pacific Railroad Company and the St. Louis & San Francisco Railway Company agree each with the other that they will enter into joint tariffs relating to the joint traffic over their respective lines, and to file the same with the Interstate Commerce Commission, and to publish the same in the manner and form as required by law.

A copy of said contract is hereto attached, marked Exhibit "B," hereby referred to and made a part hereof, as fully as if set out herein.

The moving cause and consideration for these contracts was that the shippers had the right to route their freight over such line or lines of railroad as they saw fit, and in order to secure the performance of the contracts between the Louisiana & Pacific Railway Company and its connecting carriers, the Southern Pacific and Frisco Systems, it was necessary to have the shippers sign the contracts and agree to route their products over the line of the Louisiana & Pacific Railway Company.

80 18. That, relying upon the contracts between the petitioners herein and the respondent- herein, the Louisiana Western Railroad Company, the New Orleans, Texas & Mexico Railroad Company and the St. Louis and San Francisco Railroad Company, the various lumber companies petitioners herein, owning mills along the line of the Louisiana & Pacific Railway, have, each for itself, entered into contracts whereby the said lumber companies respectively agree to ship, or cause to be shipped, over the line of the Louisiana & Pacific Railway Company, all of the logs and products of said mills; the Louisiana & Pacific Railway Company agreeing to furnish the necessary transportation facilities for the handling of the logs from the point of connection with the Lumber Companies' road to the mill and the product of said logs from the mill, at the published tariff rates of said Companies, filed with the Interstate Commerce Commission.

And also upon the faith of said contracts between the petitioners herein and the defendant Railroad Companies, and upon the faith of the contracts between the said petitioners Lumber Companies and the said Louisiana & Pacific Railway Company, the said petitioners Lumber Companies, now owning mills along the line of the Louisiana & Pacific Railway, have constructed large and valuable mills for the manufacture of lumber, and have acquired in addition

to the lands and timber owned by them prior to the making of said contracts, other large bodies of timber land.

The investments which have been made by said lumber companies and the value of the plants and timber owned by them are as follows:

81	Plant.	Timber, etc.	Total.
King-Ryder	$448,127	$3,167,477	$3,615,604
Calcasieu	393,066	4,730,137	5,132,203
Longville	535,952	2,750,579	3,286,531
Hudson	308,560	3,260,844	3,569,404
	$1,685,705	$13,909,037	$15,603,742

The number of miles of steel rails laid in the tram railroads of the Lumber Companies and the value thereof and the number of locomotives, cars and equipment and the value thereof owned by the petitioners Lumber Companies and used in the transportation of logs to the railroad of the Louisiana & Pacific Railway Company is as follows:

Calcasieu Long Leaf Lumber Company.

Steel rails, 24.704 miles	$24,679.05
Three locomotives	16,000.00
Stock and tank cars, 7 cabooses	3,080.62
Steel cars	559.55
	$44,319.22

Hudson River Lumber Company.

Steel rails, 22.0654 miles	$43,069.81
Three locomotives	10,000.00
Hand, tank and water cars, and cabooses	3,181.37
	$56,251.18

King-Ryder Lumber Company.

Steel rails, 17.405 miles	$33,048.72
Four locomotives	16,200.00
Stock and tank cars, cabooses, etc.	9,608.07
Steel cars	1,030.28
Coach	250.00
	$60,137.07

82 Longville Lumber Company.

Steel rails	$19,797.35
Three locomotives	26,930.52
Stock and tank cars, gondolas, etc.	6,413.57
Steel cars	1,118.02
Pile drivers	6,344.58
	$60,604.04

The capacity of the mills of petitioners Lumber Companies on the line of the defendant Louisiana & Pacific Railway Company is 1,200 cars per month.

19. Your petitioners state that the decision and report of the Interstate Commerce Commission, being the decision published in the 17th Interstate Commerce Commission Reports, page 338 et seq., is an erroneous and incorrect statement of the law, and is a misapprehension, misstatement and misapplication of facts in so far as petitioners herein are concerned, and the statement in said opinion to the effect

"that any allowance or division made to or with the tap line that is owned or controlled directly or indirectly by the lumber mill or by its officers or board of directors, and that has no traffic beyond the logs that it hauls to the mill, except such as it may pick up as a mere incident to its efforts to serve the mill as an adjunct or plant facility, is an unlawful departure from the published rates"

is not a correct statement of the law, and is an erroneous and illegal holding upon the part of the Interstate Commerce Commission. And the whole of said opinion is an incorrect and improper statement of the facts and the law as applied to these petitioners, and the action of the trunk line railroad companies in August, 1910, in filing
83 with the Interstate Commerce Commission the schedules stating new, individual or joint rates, fares or charges, applicable upon the articles named therein in excess of the rates, fares and charges theretofore in effect, and in thereby canceling the through routes and joint rates which had theretofore been maintained with the petitioner Louisiana & Pacific Railway Company was and is unlawful, and was and is in wrongful violation and avoidance of the obligations and contracts heretofore pleaded and set out, and is in violation of the Interstate Commerce laws of the United States.

That the opinion and report heretofore referred to and published in the 23d Interstate Commerce Commission Reports, at page 277 et seq., is an erroneous and incorrect finding of facts, is a misapprehension and misapplication of the facts as found, is an erroneous and illegal statement of the law, it takes away from these petitioners vested rights guaranteed by law, and impairs and destroys the obligation of legal contracts which these petitioners have. And the statement in said report found on page 338 thereof, to-wit:

"The cancellations by the trunk lines will be allowed and become effective on May 1st, as provided in the tariffs now on file,"

constitutes an order to the trunk line railroad companies to cancel the tariffs heretofore mentioned in paragraph 12 hereof, constitutes a denial and dismissal of the petition of the Louisiana & Pacific Railway Company to the Commission, heretofore pleaded in paragraph 9 hereof, to issue an order to said trunk line railroads to continue the through routes and joint rates theretofore existing with
84 the petitioner Louisiana & Pacific Railway Company, as provided for in the tariffs set out in paragraph 12 hereof.

That the Interstate Commerce Commission by its said opinions and reports herein referred to, and by its order allowing the cancellation by the trunk lines to become effective on May 1, as provided by the tariffs then on file, and by its supplemental report dated May 14, 1912, and by its order dated May 14, 1912, and by its amended order of October 30, 1912, herein set out in full, has erroneously, illegally and improprely held that the petitioner Louisiana & Pacific Railway Company is not a common carrier in reference to logs and lumber and that the service it performs is not a common carrier service when said service is performed in the hauling of logs and lumber and the products of the petitioner Lumber Companies' mills, and has, by both of its said opinions, to-wit, the opinion dated April 23, 1912, and the opinion dated May 14, 1912, and by its order dated May 14, 1912, and its amended order dated October 30, 1912, ordered the respondent Railroad Companies to cease the maintenance of through routes and joint rates on lumber with the petitioner the Louisiana & Pacific Railway Company, and to cease paying any division whatsoever of the rates to the petitioner Louisiana & Pacific Railway Company.

And by said opinions and reports and orders the Interstate Commerce Commission has ordered and required the respondent Railroad Companies to submit for the approval of the Interstate Commerce Commission the basis of their divisions on through joint class and commodity rates in effect or hereafter made effective to or from points on the line of the petitioner Louisiana & Pacific Rail-
85 way Company, which said order is beyond the jurisdiction of the Interstate Commerce Commission, and commands the respondent Railroad Companies to violate the terms of the contracts with the petitioners, herein set out, and is in violation of Section 15 of the Interstate Commerce Act, which provides that the Commission may establish through routes and joint classifications and may "establish joint rates as the maximum to be charged, and may prescribe the divisions of such rates, as hereinbefore provided, and the terms and conditions under which such through rates shall be operated whenever the carriers themselves shall have refused or neglected to establish voluntarily such through rates or joint classifications or joint rates." Your petitioners further allege that the respondent Railroad Companies and the petitioner Louisiana & Pacific Railway Company have not refused or neglected to establish voluntarily such through routes or joint classifications or joint rates, but on the contrary, as hereinbefore set out, have agreed to establish such through routes and joint classifications and joint rates, and have filed with the Interstate Commerce Commission their tariffs showing such through routes and joint classifications and joint rates, all of which will fully appear by Tariff Index Number 9-B, Interstate Commerce Commission Number 21.

Your petitioners further allege that the respondents Railroad Companies did not voluntarily cancel the through rates under and by virtue of the canceling tariffs hereinbefore referred to, but the action of the respondents Railroad Companies in that regard was had under the compulsion of the several reports, decisions and

orders of the Interstate Commerce Commission hereinbefore
86 referred to, and under the belief induced by said reports, decisions and orders, that if said joint through rates with the petitioner Louisiana & Pacific Railway Company were not canceled, that said respondents Railroad Companies, their officers and agents, would be subject to criminal prosecution at the instance of the Interstate Commerce Commission as for alleged rebates and alleged unlawful discrimination.

Your petitioners further allege that the respondents Louisiana Western Railroad Company, Morgan's Louisiana & Texas Railway & Steamship Company; New Orleans, Texas & Mexico Railroad, and the St. Louis & San Francisco Railroad Company, and other common carriers subject to the Act to regulate commerce, have for years recognized the petitioner Louisiana & Pacific Railway Company as a common carrier in every respect and fully entitled to all the rights and privileges belonging to a common carrier under the law; and, but for the action of the Interstate Commerce Commission, herein complained of, would continue to so recognize said petitioner as a common carrier and would participate with said petitioner in joint rates upon lumber and forest products and the maintenance of through routes to interstate destinations.

Your petitioners further state that the statement made in the finding of facts in reference to the Louisiana & Pacific Railway Company, to the effect that there is no charge made for the service of hauling the logs to the mills, is incorrect and misleading, the fact being that the charge for transporting the logs and finished product is provided for in the through rate which applies from the point at
which the logs are delivered to the Louisiana & Pacific Rail-
87 way Company by the Lumber Companies, and includes the transportation of the logs to the mill and the product from the mill to final destination, and is a practice which has long been recognized by the Interstate Commerce Commission, not only on lumber, but on other commodities, and is not in itself illegal.

The statement "the steel for these tracks is furnished and supplied by the Tap Line without charge," is incorrect and untrue. There is no steel or other equipment supplied by the Louisiana & Pacific Railway Company to the Lumber Companies. At the time of the hearing of the case it was the custom of the Louisiana & Pacific Railway Company to lease or lend to shippers on its line steel and other equipment for the trams of said lumber companies beyond the line of the railroad of the Louisiana & Pacific Railway Company; this practice seemed to be condemned by the Commission, and by reason thereof the Louisiana & Pacific Railway Company sold and transferred to the lumber companies all steel and other equipment which was being used by the lumber companies in the tram roads of the lumber companies, and there is now no steel or other equipment furnished to the lumber companies by the Louisiana & Pacific Railway Company, and a copy of the contract or bill of sale evidencing this fact was filed with the Interstate Commerce Commission before the closing of the "Tap Line case" before said Commission.

Petitioners further state that upon the finding of facts made by the Interstate Commerce Commission, hereinabove set out, the petitioner Louisiana & Pacific Railway Company is a common carrier, performs a common carrier service, is entitled to the main-
88 tenance of through routes and joint rates and to divisions, as in its contracts provided.

Petitioners further state that the entire opinion, report, finding and order of the Interstate Commerce Commission, made under the caption, "Investigation and Suspension Docket No. 11, The Tap-Line Case," is inconsistent with itself, with the former decisions and reports of the Interestate Commerce Commission, permits and requires discriminations and inequalities, and a compliance with said decisions and requirements compels the railroad companies to violate Section 3 of the Interstate Commerce Act, hereinafter set out. And said decisions and orders are in violation of and in conflict with the "Commodities Clause" of Section 1 of said Interstate Commerce Act.

Your petitioners further allege that said decisions and orders hereinbefore set out were made by the said Interstate Commerce Commission as a result of investigation and alleged information furnished by its investigators without any opportunity to these petitioners of cross-examination or rebuttal.

Your petitioners allege that the Interstate Commerce Commission has no jurisdiction or authority in law to decide that the petitioner Louisiana & Pacific Railway Company is not a common carrier in respect to the logs and lumber which it transports for petitioners Lumber Companies (although holding that it is a common carrier and compelling it to be a common carrier with respect to other tonnage which it hauls), and by so holding and by its order to the trunk line railroad companies to cancel through routes and joint rates and to cease for two years paying divisions to the petitioner Louisiana & Pacific Railway Company, the
89 Interstate Commerce Commission attempts to nullify state laws and the Interstate Commerce laws and its own rulings and decisions heretofore made; and the decision, in reference to the petitioner Louisiana & Pacific Railway Company and the orders of the Interstate Commerce Commission, hereinabove set out, are each and all unlawful, erroneous and invalid.

Your petitioners further allege that said decisions and orders are arbitrary, unreasonable and in excess of the power and authority of the said Commission and constitute violations of Section 3 of the Act which forbids unjust discrimination between persons, localities and traffic. As an instance of the unequal, discriminatory, arbitrary and unreasonable Act of the Commission, petitioner alleges that many of the so-called tap lines whose status was determined by the Commission in the decisions and orders hereinbefore set out, were recognized as common carriers of the traffic of the so-called proprietary interests and others denied such a status without any distinction in fact or manner of operation.

Further, petitioners allege that notwithstanding the Commission established a rule that under Section 15 payment should be made to

the shipper when the transportation was not less than 1,000 feet nor more than three miles from the trunk line connection, nevertheless no such allowance was prescribed by the Commission in the case of your petitioners, but on the contrary such an allowance is expressly negatived by the Commission.

Your petitioners further allege that other short line railroads mentioned in the decisions and orders above set forth have been by the Commission directed to establish joint rates from points
90 on their line to interstate destination points, when in fact all the circumstances and conditions which properly may be considered by the Commission in an investigation of this sort require that the petitioners be given joint rates over through routes to interstate destinations. In support of this allegation the petitioners call attention to the findings of the Commission and make said findings part of this petition as fully as if set forth herein, in the following cases:

Fourche River Valley & Indian Territory Railway Company.
The Nacogdoches & Southeastern Railroad Company.
Trinity Valley & Northern Railway Company.
Butler County Railroad Company.
Red River & Gulf Railroad Company, and others.

Your petitioners further state that the Interstate Commerce Commission in holding that the tracks and equipment of the Louisiana & Pacific Railway Company with respect to the industry of the petitioners Lumber Companies are plant facilities and that the service performed therewith for the said Lumber Companies in moving logs to their mills and performed therewith in moving the products of the said mills of the petitioners Lumber Companies to the junction of the Louisiana & Pacific Railway Company with its connecting trunk line companies, is not a service of transportation by a common carrier railroad, but is a plant service by a plant facility—is without any basis in fact or in law. Said finding and conclusion is arbitrary, unreasonable and in violation of the Act to Regulate Com-
91 merce and the decisions of the Supreme Court of the United States.

Your petitioners assert that under the provisions of the Act to Regulate Commerce and the interpretation thereof by the Supreme Court of the United States upon the facts found by the Commission and set forth herein the said petitioner Louisiana & Pacific Railway Company is a common carrier by railroad of the logs of the petitioners Lumber Companies, in that it furnishes a railroad and maintains the same in condition for the movement of said logs and is a common carrier of the products of the petitioners Lumber Companies from their mills to the junction points with the Louisiana & Pacific Railway Company's connecting carriers, and inasmuch as the larger proportion of the output of said mills of the petitioners Lumber Companies is destined to interstate destinations, the said movement from said petitioners Lumber Companies' mills to said junction points is a service of transportation by a common carrier railroad in interstate commerce.

Your petitioners further state that no part of that portion of the

report headed "Irregular Practices of Tap-Lines," found on pages 649-650 of the 23d Interstate Commerce Commission Reports, applies in any respect whatsoever to the petitioner Louisiana & Pacific Railway Company, but that on the contrary said petitioner Louisiana & Pacific Railway Company, "files annual reports with the Commission"; said reports "are complete and comply with the requirements of the Act"; it does "publish local rates to apply on traffic received from or delivered to its trunk line connections"; it does "charge for carrying passengers and less than carload shipments in all cases, and under authority of published tariffs"; it does not "permit
92 the use by any lumber company of its tracks, without charging therefor," but on the contrary all of its charges and rates "are under tariff authority filed with the Interstate Commerce Commission"; it complies with the "Hours of Service law"; with the "Safety Appliance Act," and all the "other Acts imposing requirements on common carriers engaged in interstate commerce."

The Interstate Commerce Commission itself, while the "Tap-Line Case" was pending before it, caused a prosecution to be entered against the petitioner Louisiana & Pacific Railway Company, because one car in a train operated by said Company, to-wit, St. Louis & San Francisco Car No. 30741, had a broken and disconnected uncoupling chain thereon, and in said suit brought by the United States against it, said Louisiana & Pacific Railway Company was fined for such offense, and paid a judgment in the sum of $100.00, and costs amounting to $10.25.

There is no "lack of attention on the part of the Louisiana & Pacific Railway Company to the rules and regulations respecting the filing of tariffs and keeping of accounts," but on the contrary, said railway company complies strictly with such rules and regulations and pays out thousands of dollars annually in so doing and in the publishing of tariffs, and the books of the Louisiana & Pacific Railway Company have always been open and "full access thereto has been given to the examiners of the Interstate Commerce Commission."

Your petitioners allege that if any such failures to comply with the Act to Regulate Commerce existed on the line of the petitioner Louisiana & Pacific Railway Company, or if any such ir-
93 regular practices do exist upon the line of the said petitioner, it is the duty of the said Interstate Commerce Commission to invoke the curative processes provided for in the Act, and petitioners further allege that such lapses or irregular practices, if any, do not constitute any basis for denial to said petitioner Louisiana & Pacific Railway Company and its shippers of the status which the law confers upon it.

20. Petitioners allege that the action of the respondents the Louisiana Western Railroad Company, New Orleans, Texas & Mexico Railroad Company, and the St. Louis & San Francisco Railroad Company, in filing with the Interstate Commerce Commission, in August, 1910, the schedule designated as Supplement No. 3 to Interstate Commerce Commission No. 23, effective the 10th day of September, 1910, and Supplement No. 9 to I. C. C. No. 2454-B,

and schedule designated as Supplements Nos. 5 and 6 to Interstate Commerce Commission Nos. 6073 and 6194, and any and all other schedules filed by said respondents which state new, individual or joint rates, fares or charges that are in excess of the rates, fares and charges theretofore in effect, and which in effect cancel the through routes and joint rates with the petitioner Louisiana & Pacific Railway Company, is violative of the terms, obligations and conditions of said contracts between the respondents Louisiana Western Railroad Company, New Orleans, Texas & Mexico Railroad Company, the St. Louis & San Francisco Railroad Company and the petitioner Louisiana & Pacific Railway Company heretofore pleaded; and that the same is without cause, justification or excuse; and that the action of said respondent Railway Companies in filing said schedules
94 which state new, individual or joint rates, fares or charges that are in excess of the rates, fares and charges theretofore in effect, and which cancel through routes and joint rates with the petitioner Louisiana & Pacific Railway Company is in violation of that portion of Section 1 of the Act to Regulate Commerce, reading as follows:

"All charges made for any service rendered or to be rendered in the transportation of passengers or property * * * or in connection therewith shall be just and reasonable; and every unjust and unreasonable charge for such service, or any part thereof, is prohibited and declared to be unlawful, * * * and it is hereby made the duty of all common carriers subject to the provisions of this Act to establish, observe and enforce just and reasonable classifications of property for transportation with reference to which rates, tariffs, regulations or practices are or may be made or prescribed, and just and reasonable regulations and practices affecting classifications, rates or tariffs," * * *

and is in violation of Section 3 of the Interstate Commerce Act, reading as follows:

"That it shall be unlawful for any common carrier subject to the provisions of this Act to make or give any undue or unreasonable preference or advantage to any particular person, company, firm, corporation or locality, or any particular description of traffic, in any respect whatsoever, or to subject any particular person, company, firm, corporation or locality, or any particular description of traffic, to any undue or unreasonable prejudice or disadvantage in any respect whatsoever.

Every common carrier subject to the provisions of this Act, shall, according to their respective powers, afford all reasonable, proper and equal facilities for the interchange of traffic between their
95 respective lines, and for the receiving, forwarding and delivering of passengers and property to and from their several lines and those connecting therewith, and shall not discriminate in their rates and charges between such connecting lines; but this shall not be construed as requiring any such common carrier to give the use of its tracks or terminal facilities to another carrier engaged in like business."

And the said action of said respondent Railroad Companies pre-

vents these petitioners from having interstate traffic moved by said common carriers, the petitioner Louisiana & Pacific Railway Company and the respondent Railway Companies, at the same rates as are charged or upon terms or conditions as favorable as those given by said common carriers for like traffic under similar conditions to other shippers; and the action of the respondent Interstate Commerce Commission first in declaring the law to be as said respondent declared the law to be by its opinion in the 17th Interstate Commerce Commission Reports, page 338 et seq., and later as it declared the law to be by its report contained in the 23d Interstate Commerce Commission Report, at page 277 et seq., and by the statement in said report permitting the cancellations by the trunk lines to become effective, is in violation of that portion of Section 15 of the Interstate Commerce law reading as follows, to-wit:

"The Commission may also, after hearing on a complaint or upon its own initiative without complaint, establish through routes and joint classifications."

21. And the petitioners allege that the rights and equities of petitioners are so interwoven and complicated by their mutual
96 undertakings under the contracts heretofore referred to and heretofore set out, that petitioners will be irreparably injured by the said respondents Railroad Companies' violation of said contracts, and petitioners will be without any adequate remedy at law.

That a multiplicity of suits will inevitably result, and circuitous action will be entailed upon the petitioners and each of them by the said respondents' avoidance and breach of said contracts.

That over 90 per cent of the lumber tonnage (more than 1,000 cars per month) handled by the petitioner Louisiana & Pacific Railway Company is destined to interstate points; that since the 1st day of May, 1912, the petitioner Louisiana & Pacific Railway Company has charged and is now charging on lumber destined to interstate points its local rate on all lumber shipments from all points to various points of connection with respondent Railway Companies.

The petitioners Lumbers Companies are being, and will continue to be, placed at a serious disadvantage in regard to other lumber industries in the same territory not on the line of the Louisiana & Pacific Railway, because they are compelled to pay on all shipments of lumber destined to interstate points the local rate of the Louisiana & Pacific Railway to the junctions with respondent Railroad Companies, plus the blanket rate (which petitioners' competitors in said territory now enjoy) from said junctions to final destination of the lumber, the combination of the two rates placing petitioners Lumber Companies at a disadvantage as compared with petitioners Lumber Companies' competitors in the same territory enjoying the blanket rate.

97 Petitioners Lumber Companies have no competitive rates on interstate lumber traffic, and the absence of through routes and joint rates greatly retards and impairs the business and investments of the petitioners Lumber Companies, and the damages so caused to said petitioners cannot be adequately measured, and constitute irreparable loss.

The absence of through routes and joint rates and the effect of the Interstate Commerce Commission's said decisions will be to place the petitioners back in the condition in which they were prior to the building of the Louisiana & Pacific Railway in 1906, localize the business of the petitioner Mill Companies and hand over the business of the Louisiana & Pacific Railway to the Southern Pacific System, and, on account of the increased business of these mills, create a condition more intolerable than the conditions which prompted the building of the Louisiana & Pacific Railway.

Your petitioners further allege that in the case of Central Yellow Pine Association v. Vicksburg, Shreveport & Pacific Railroad Company, 10 Interstate Commerce Commission Reports, page 193, the Interstate Commerce Commission held that divisions such as those condemned in the opinions in "The Tap Line Case" were proper, and that, acting under the decision in the said Central Yellow Pine Association case, and other decisions of the Interstate Commerce Commission, and acting under the law of the State of Louisiana, the investments by the petitioners herein mentioned were made; that under the Constitution and Laws of the State of Louisiana the petitioner Louisiana & Pacific Railway Company is compelled to operate as a common carrier and its status as a common carrier is
98 fixed by State and Federal laws, and the Interstate Commerce Commission is wholly without right or authority of law to deny to the petitioner the Louisiana & Pacific Railway Company the right to operate as a common carrier of all traffic transported; that said Louisiana & Pacific Railway Company has invested in physical property more than a half million dollars; its operating expenses for the fiscal year 1911 were $241,248.47; its earnings for the same fiscal year were $229,067.94; its operating expenses for the fiscal year 1912 were $224,980.36; its earnings for the same fiscal year were $228,352.54. Ninety per cent of its revenue is derived from interstate freight, most of which comes from the transportation of lumber; less than 10 per cent of its revenue is from intrastate freight.

In the case of Freeo Valley Railroad Company v. Hodges, Secretary of State, 151 Southwestern Reporter, page 281, the Supreme Court of Arkansas, on November 18, 1912 held that the Freeo Valley Railroad Company (one of the parties to the proceeding in the "Tap Line case") could not surrender its charter and cease to perform its duties to the state and the public, as a common carrier, and this is doubtless the law and will doubtless be so held by the Supreme Court of Louisiana and all other states.

Unless the petitioner Louisiana & Pacific Railway Company is permitted to earn revenue on all interstate shipments of lumber, it cannot pay its operating expenses or interest on its bonded indebtedness. The reports, decisions and orders of the Interstate Commerce Commission hereinbefore set out operate to confiscate said petitioner's property and to deprive it of its property without due process of law, and in violation of the Fifth Amendment to
99 the Constitution of the United States.

The petitioners Lumber Companies have performed, and are now performing, in every respect, the contracts heretofore recited

to be performed by them, and have annually, since the making of said contracts, delivered to the petitioner Louisiana & Pacific Railway Company, and the Louisiana & Pacific Railway Company has delivered to the respondents Louisiana Western Railroad Company, New Orleans, Texas & Mexico Railroad Company, and the St. Louis & San Francisco Railroad Company, freight upon which charges to the amount of hundreds of thousands of dollars have been paid. The petitioners, and each of them, are remediless, unless relief be given by this Court by injunction and by other proper orders and decrees against the orders and requirements made by the Interstate Commerce Commission heretofore pleaded, and against the violation by the respondent Railroad Companies of the terms of the contracts between petitioners and said defendants hereinabove referred to and set out.

Your petitioners aver that the Commission in its finding and in that paragraph of the order which holds that the service performed by the Louisiana & Pacific Railway Company for the petitioners Lumber Companies, in moving logs to their mills and in moving the products of the mills to the trunk lines, is not a service of transportation by a common carrier railroad, acted erroneously and in violation of the provisions of the Act to Regulate Commerce; your petitioners aver that under the statement of facts contained in the report and opinion of the Commission the said service is in law a service of transportation by a common carrier railroad and
100 that in accordance with the law the petitioner Louisiana & Pacific Railway Company should file tariffs of its charges for said service. Under the report and order of the Commission hereinbefore set out, no tariffs lawfully can be filed covering such movement; that if such movement is transportation, the petitioner Louisiana & Pacific Railway Company will be subject to the penalties provided in the statute for failure to file tariffs.

Further, your petitioners aver that under the statute no common carrier can engage in interstate commerce until it has first filed tariffs covering the transportation in which it is engaged. Your petitioners Lumber Companies therefore aver that their traffic could not be handled by the petitioner Louisiana & Pacific Railway Company, because the findings of the Commission that the said movement is not transportation by a common carrier railroad precludes the filing of tariffs. For these reasons the said order is inconsistent with the Act to Regulate Commerce and destroys the rights of the petitioners Lumber Companies to have the products of their mills moved by the Louisiana & Pacific Railway Company, and prevents said petitioner Railway Company from transporting said products as a common carrier in interstate commerce

Your petitioners allege that the said order of the Commission, dated October 30, 1912, by its terms is directed against the respondent Railroad Companies, among others; that the petitioners were parties to the proceedings before the Interstate Commerce Commission out of which the orders, reports and decisions complained of grew;

that their rights are vitally affected by said reports, decisions
101 and orders; that the respondent trunk line railroads have profited materially by the aforesaid reports, decisions and orders, and will so continue to profit by reason of the fact that the existing lumber rates from the junction point between the petitioner Louisiana & Pacific Railway Company and the said trunk line companies are the same as those which prior to May 1, 1912, applied from the petitioners Lumber Companies' mills on the line of the petitioner Louisiana & Pacific Railway Company; that therefore your petitioners allege that the said reports, decisions and orders of the said Commission as vitally affect the property rights of the petitioners as if said order was directed against the Louisiana & Pacific Railway Company by name.

Your petitioners and each of them are remediless, unless relief be given by this Court by injunction and by other proper orders and decrees against the orders and requirements made by the Interstate Commerce Commission heretofore pleaded.

22. Wherefore, your petitioners say that the said reports and decisions of the Interstate Commerce Commission, and the orders of date May 14, 1912, and October 30, 1912, made in pursuance of said reports and decisions, are invalid and void for the following, among other, reasons:

"(1) The Interstate Commerce Commission is wholly without power, authority or jurisdiction to declare that there is any 'proprietary' lumber company or companies of the Louisiana & Pacific Railway Company; to declare that 'the service performed for the respective proprietary lumber companies in moving the logs from
their respective forests to their respective mills, and in moving
102 the product from the mills to the trunk lines is not a service of transportation by a common carrier railroad, but is a plant service by a plant facility, and that any allowances or divisions out of the rate on account thereof are unlawful,' in so far as such declaration and order is applied to the petitioner Louisiana & Pacific Railway Company, or to deprive said company of its rights as a common carrier granted to it under the Constitution and laws of the State of Louisiana and the Constitution and laws of the United States.

(2) The Interstate Commerce Commisssion is wholly without power, authority or jurisdiction to declare that the transportation offered by the trunk line carriers, such as the respondent railroad companies, extends three miles distance from the line of such railroads and that an allowance may be made for the movement which is more than 1,000 feet from said line and not in excess of three miles from said line of railroad. The said holding is legislation, pure and simple, and the exercise of arbitrary and unreasonable power and constitutes a gross discrimination and violation of the Act to Regulate Commerce.

(3) Said order is unconstitutional, invalid and void, in that said order impairs the validity of the contracts hereinbefore declared upon, contrary to the provisions of the Fifth Amendment to the United States Constitution.

(4) Said order unduly discriminates against the petitioner Lumber Companies, as shippers, compared with shippers on the line of the Louisiana & Pacific Railroad and on other railroads.

(5) Said order deprives your petitioners of the through routes and joint rates provided for by Section 15 of the Interstate Commerce Act.

(6) The uncontradicted evidence in the proceeding had by the Interstate Commerce Commission under the title 'Investigation and suspension Docket No. 11,' shows that the petitioner Louisiana & Pacific Railway Company is a common carrier under the
103 law, and the finding of the Interstate Commerce Commission that the petitioner Louisiana & Pacific Railway Company is not a common carrier is not based on any substantial testimony.

(7) Under the findings of fact made by the Interstate Commerce Commission, the Louisiana & Pacific Railway Company is a common carrier of lumber of the petitioner Lumber Companies, and of all other mills on its line of railway.

(8) The aforesaid decisions, reports and orders of the Interstate Commerce Commission require the petitioner Louisiana & Pacific Railway Company to maintain through routes and joint rates with its connecting carriers on traffic of others than the petitioner Lumber Companies, while forbidding the maintenance of through routes and joint rates and divisions upon lumber produced by the petitioner Lumber Companies when destined to interstate points, and thereby said order grossly and unjustly discriminates against the petitioners Lumber Companies, and subjects them to undue prejudice and disadvantage.

(9) The findings, reports, decisions and orders of the Commission hereinbefore set out are arbitrary, unreasonable and in excess of the power of the Commission, in that, among other things, the Commission compels unjust and unlawful discrimination as between the so-called 'tap line' railroads named in the orders hereinbefore set out."

23. Wherefore, petitioners, and each of them, pray that the said orders of the Interstate Commission dated May 14, 1912, and October 30, 1912, be enjoined, set aside and annulled; that the United States of America, the Interstate Commerce Commission and all persons claiming to act under their authority, direction or
104 control, be enjoined and restrained from enforcing or attempting in any wise to enforce or put in effect any portion of said orders which require the respondent Railway Companies to cease and for a period of two years thereafter abstain from maintaining through routes and joint rates upon any property transported from the mills of the petitioners Lumber Companies on the line of the Louisiana & Pacific Railway Company.

And your petitioners further pray that the respondents, Railroad Companies, be enjoined and restrained from violating the terms of the said contracts herein pleaded and herein fully set out under the marks of Exhibits "A" and "B," and that they and each of them be specifically ordered and required to continue to observe the terms, conditions and obligations of said contracts, by filing with the Interstate Commerce Commisssion the tariffs described and

set out in paragraph 12 hereof (or similar tariffs), giving to the Louisiana & Pacific Railway Company through interstate rates, and that the Interstate Commerce Commission be specifically ordered and commanded to accept, receive and file and to permit to become effective upon three days' notice the tariffs specifically described in paragraph 12 hereof, or similar tariffs.

And your petitioners pray for all other and further relief as in equity and good conscience they may be entitled to receive.

And may it please Your Honors to grant unto your petitioners a subpœna of the United States of America, issuing out of and under the seal of this Honorable Court, directed to the United States of America, Louisiana Western Railroad Company, Morgan's Louisiana & Texas Railway & Steamship Company, New
105 Orleans, Texas & Mexico Railroad Company and the St. Louis and San Francisco Railroad Company, the respondents herein respectively, therein and thereby commanding them, on a day certain therein to be named, and under a certain penalty, to be and appear before this Honorable Court, then and there to answer, but not under oath (an answer under oath being hereby expressly waived), all and singular, the premises, and to stand to, perform and abide by such order, direction or decree as may be made against them in the premises, as shall seem meet and agreeable to equity and good conscience.

And your petitioners, as in duty bound, will ever pray.

LOUISIANA & PACIFIC RAILROAD COMPANY,
HUDSON RIVER LUMBER COMPANY,
KING-RYDER LUMBER COMPANY,
CALCASIEU LONG LEAF LUMBER COMPANY,
LONGVILLE LUMBER COMPANY, AND
THE LONG-BELL LUMBER COMPANY,
By W. R. THURMOND,
H. M. GARWOOD,
L. M. WALTER,
Their Solicitors.

STATE OF MISSOURI,
County of Jackson, ss:

R. A. Long, being duly sworn, on his oath states that he is the president of the petitioner the Louisiana & Pacific Railway Company, and that he is president of the petitioner The Long-Bell Lumber Company.

That he has read the above and foregoing petition and is familiar with the facts therein stated, and that the allegations and averments therein made and contained are true.

R. A. LONG.

106 Subscribed and sworn to before me this 4th day of January, 1913.

My commission expires April 29, 1915.

[SEAL.] HOYT A. POORMAN,
Notary Public in and for Jackson County, Missouri.

STATE OF MISSOURI,
County of Jackson, ss:

C. B. Sweet, being duly sworn, on his oath states that he is president of the petitioners Hudson River Lumber Company, the King-Ryder Lumber Company, the Calcasieu Long Leaf Lumber Company, and the Longville Lumber Company.

That he has read the above and foregoing petition and is familiar with the facts therein stated, and that the allegations and averments therein made and contained are true.

C. B. SWEET.

Subscribed and sworn to before me this 4th day of January, 1913. My commission expires April 29, 1915.

[SEAL.] HOYT A. POORMAN,
Notary Public in and for Jackson County, Missouri.

EXHIBIT "A."

This Agreement, made and entered into this 31st day of October, Nineteen Hundred and Six (1906), by and between the Louisiana Western Railroad Company, a corporation under the laws of the State of Louisiana, party of the first part; the Louisiana & Pacific Railway Company, a corporation under the laws of the State of Louisiana, party of the second part, and the Hudson River
107 Lumber Company, the King-Ryder Lumber Company, the Calcasieu Long Leaf Lumber Company, and The Long-Bell Lumber Company, parties of the third part.

WITNESSETH: The said party of the first part controls a line of railroad, constituting a part of what is known as the Southern Pacific System, and directly and through its connections reaches a large number of markets wherein the products of the parties of the third part may be sold.

The said party of the second part controls and operates a line of railway reaching large tracts of timber land of said parties of the third part, and, at the request of said parties of the third part, is extending its said line of railroad and is about to acquire a better connection with the line of said party of the first part at Lake Charles, Louisiana; and, when such connection is made, it, together with the line of said party of the first part and its connections, will furnish to said parties of the third part facilities for transporting their timber to their mills, located along the line of railway of said party of the second part, and for transporting the products of the mills to the markets on the lines of said party of the first part and its connections.

The business of said third parties is very much hampered because of lack of adequate railway facilities for transporting the products of their mills to desirable markets, and for that reason it will be greatly to the advantage of said parties of the third part to have said party of the second part extend its said line and make a better

connection thereof with the line of the said party of the first part, as above mentioned.

108 Now Therefore, The parties hereto, in consideration of the mutual benefits which will result to them, respectively, and of the mutual covenants and agreements hereinafter set forth, to be by them kept and performed, have and do hereby covenant and agree, each with the others, as follows:

1. The said party of the first part and the said party of the second part agree that, during the existence of this agreement, they will interchange business with each other at said point of connection of their respective lines, that is, Lake Charles, Louisiana, and by means thereof will establish a through line of railway with traffic thereover on the basis of a division of rates, as hereinafter set forth.

2. The said parties of the third part agree that during each and every month, until the expiration of this agreement, they will ship, or cause to be shipped, over the line of railway of the said party of the second part to said connection at Lake Charles, and there to be delivered to the line of said party of the first part, for transportation to its destination, at least forty per cent (40%) of the aggregate products of all their mills, which now are or may be hereafter located on the said line of railway of said second party. And said party of the second part hereby agrees that it will, during the existence of this agreement, deliver to said party of the first part at said point of connection, Lake Charles, Louisiana, said amount of at least forty per cent (40%) of the aggregate products from said mills for the purpose of having the same transported from said point of connection over the line of said party of the second part and said party of the first part and their connections to points of destination thereof.

109 The said third parties also agree to so route at least sixty-five per cent (65%) of all incoming freight as to cause the same to be shipped over the line of said first party; provided the place at which it is purchased will enable the said third parties to so route it as to cause it to be shipped over the line of said first party at an equal rate with the rates which said third parties may be able to obtain for such freight over other lines, which, with their connections will reach points of destination of such freight.

3. The party of the first part agrees that, during the existence of this agreement, it will accept from said party of the second part all shipments by it offered, to or from points between which joint rates are in effect, to transport same with reasonable promptness and despatch and to use every reasonable effort to furnish said party of the second part with cars as requested by it from time to time, to a number sufficient for transporting at least forty per cent (40%) of all the products of the mills of said parties of the third part (now existing or which may hereafter be built) along the line of railway of said second party. It is understood and agreed, however, that if the party of the first part shall fail during any calendar month to furnish the number of cars requested by the second party, and necessary in order to transport at least forty per cent (40%) of the products of the aforesaid mills during said month, then and in such event the

party of the first part shall not be obligated thereafter to make up such deficit of cars in such calendar month, nor shall said second party be obligated thereafter to furnish freight to make up such deficit on account of the failure of said party to furnish said cars in any calendar month.

4. The said party of the first part and said party of the second part agree, each with the other, that they will enter into joint tariffs relating to the joint traffic over their respective lines, and to file the same with the Interstate Commerce Commission, in the manner and form as required by law.

5. Said party of the second part and said parties of the third part hereby agree that they will cause or permit all shipments that may be delivered to said party of the first part, under the terms of this agreement, to be so routed by the party of the first part as to give the railways constituting the line or system known as the Southern Pacific System, such haul as shall yield to them the largest revenue.

6. In respect to the division of freight rates between the said party of the first part and the said party of the second part it is hereby agreed that, during the existence of this agreement, the said party of the second part shall be entitled to receive and shall be paid four (4) cents per hundred (100) pounds on the products from said mills along the line of railway of the said second party, which may be shipped under the terms of this agreement (excluding export business, the divisions of which shall be subject to future agreement between the traffic managers of the first and second parties), and that upon all other commodities shipped over the lines of said party of the first part and the said party of the second part, the said party of the second part shall be entitled to such per cent of the whole amount of freight received for the entire shipment as may be agreed upon from time to time by the traffic managers of the said first and second parties.

The division of freight rates above set forth is based upon present through rates; and it is hereby agreed that if, at any time during the existence of this agreement, the through rates shall be changed from what they are at the signing of this agreement, the proportion which the said party of the second part shall receive shall be correspondingly changed—that is, increased or reduced pro rata.

7. The said party of the first part agrees that it will at all times, during the existence of this agreement, publish for all points mentioned in its tariff, the same freight rates on all products of the parties of the third part, from all points on the line of railways of the said party of the second part, as are or shall be in effect from Lake Charles, Louisiana, on the line of the said party of the first part, which rates shall at all times, during the existence of this agreement, be competitive with rates from other points in Calcasieu Parish producing yellow pine, to all destinations to which party of the first part may be able to arrange through rates.

8. The said party of the first part and the said party of the second part agree that said party of the first part shall be amenable to said second party and said party of the second part shall be amenable to said party of the first part for the prompt and careful handling of

all cars of the other party, or cars of other companies not parties hereto, which the said parties may respectively handle; and in the handling of cars the usual practice and penalties of railroad companies in the State of Louisiana shall govern, and that no
112 cars of the party of the first part shall be used locally by the said party of the second part, nor shall any cars of the party of the second part be used locally by said party of the first part.

9. The party of the first part agrees to indemnify and save harmless the party of the second part for any loss or damage to its cars or equipment, or to cars or equipment belonging to other companies or persons, which it may receive from the party of the second part, which may occur while said cars or equipment are on the lines of said party of the first part or under its control. And likewise the said party of the second part agrees to indemnify and save harmless the said party of the first part for any loss or damage to its cars or equipment, or to the cars or equipment belonging to other companies or persons, which it may receive from said party of the first part, and which damage may occur while said cars or equipment are on the line of said second party or under its control. And in case of any damage to such cars or equipment while on the line or under the control of the respective parties hereto, repairs to such cars and damages to such cars shall be adjusted between the parties hereto in accordance with the rules and regulations of the Master Car Builders' Association.

10. This agreement and all the terms and conditions, rights and obligations thereof, shall inure in favor of and be binding upon the successors, assigns and lessees of each of the parties hereto.

11. This agreement shall commence and become effective on the date hereof, and shall be and remain in full force and effect for the period of twenty (20) years thereafter, or so long as the par-
113 ties of the third part shall operate their mills along the line of railway of said party of the second part.

In witness whereof, each party hereto has caused this agreement to be signed by its proper officer and its corporate seal to be affixed the day and year first above written.

EXHIBIT "B."

Agreement, Made this 13th day of October, A. D. 1906, by and between the Colorado Southern, New Orleans & Pacific Railroad Company, hereinafter called the "Colorado Company," party of the first part, the St. Louis & San Francisco Railroad Company, hereinafter called the "Frisco Company," party of the second part,
114 the Louisiana & Pacific Railway Company, hereinafter called the "Louisiana Company," party of the third part, the King-Ryder Lumber Company, hereinafter called the "King Company," party of the fourth part, the Hudson River Lumber Company, hereinafter called the "Hudson Company," party of the fifth part, the Calcasieu Long Leaf Lumber Company, hereinafter called the "Calcasieu Company, party of the sixth part, and the Long-Bell Lumber Company, hereinafter called the "Long-Bell Company," party of the seventh part;

Witnesseth: That, Whereas, The Colorado Company is a railroad corporation, organized and existing under the laws of the State of Louisiana, and is constructing a line of railroad in the State of Louisiana running in a general easterly and westerly direction, and which will pass near the village of Ramsay in Calcasieu Parish, and which will reach diretely and through its connections a large number of markets wherein the products of the King Company, the Hudson Company, the Calcasieu Company and the Long-Bell Company, or all companies owned and controlled by either or all of said companies, can be sold, and

Whereas, The Frisco Company is a railroad corporation, organized and existing under the laws of the State of Missouri, and controls, by ownership of stock, the Colorado Company, and

Whereas, The Louisiana Company is a railroad corporation organized and existing under the laws of the State of Louisiana, and is to be constructed and operated from De Ridder to near Ramsay in Calcasieu Parish, Louisiana, and may be extended or construct branches to other points. Its line of railroad will connect
115 with the line of railroad of the Colorado Company near Ramsay and will largely traverse the timber lands of the King Company, the Hudson Company, the Calcasieu Company and the Long-Bell Company, and the companies owned or controlled by

either or all of them, and in connection with the railroad of the Colorado Company and of the Frisco Company will furnish railway facilities for the transportation of the lumber of all of said lumber companies from the forest to the different mills of all of said lumber companies on said line of railroad, and the transportation of the products thereof to the markets which all of said lumber companies will desire to reach, and

Whereas, The said King Company, The Hudson Company, the Calcasieu Company and the Long-Bell Company are each organized under the laws of the State of Missouri, and each owns and controls large tracts of timber lands in the Parish of Calcasieu, State of Louisiana, all of which are tributary to the said proposed line of railroad of the Louisiana Company, and each is extensively engaged in cutting the timber on said land and marketing the products thereof, and

Whereas, The transaction of the business of all of said lumber companies is hampered and made less profitable than it should be because of lack of adequate railway facilities and means of transportation of the timber from the forest to their mills, and for lack of railway facilities and means by which the products of said timber can be transported from the mills to the most advantageous markets. For the proper, economical and profitable conduct of their business the said lumber companies have arranged with the Louisiana Company to construct and operate its said proposed line of rail-
116 way. In furtherance of this purpose the Louisiana Company, the King Company, the Hudson Company, and the Calcasieu Company have requested the Colorado Company to permit the Louisiana Company to make a track connection with its line near Ramsay and to enter into this agreement, and

Whereas, The Long-Bell Company is a corporation, organized and existing under the laws of the State of Missouri, and it owns and controls the property and franchises of the said King Company, Hudson Company, and Calcasieu Company, through stock ownership thereof, and has also requested the Colorado Company to permit the Louisiana Company to make such track connections with its said line and to enter into this agreement, and

Whereas, Where the term "Lumber Companies" is used in this agreement it means the King Comapny, Hudson Company, Calcasieu Company and the Long-Bell Company, and all lumber companies controlled by them by the ownership of stock or otherwise, and

Whereas, The several parties hereto, because of the mutual advantages accruing to them hereby, are willing to enter into this agreement.

Now, Therefore, in consideration of the premises and of the mutual covenants and agreements hereinafter contained, and of the sum of One Dollar ($1.00) to each of the parties hereto by the other parties paid, the parties hereto have covenanted and agreed, and do covenant and agree each with the other as follows:

First. The Louisiana Company covenants and agrees that it will, with all convenient speed and dispatch, construct its said railroad

and provide it with the necessary side and spur tracks and
117 other appurtenances necessary to the railway ready for the operation of trains thereover from De Ridder, Louisiana, to near Ramsay, Louisiana, and to there connect said line with the line of railway of the Colorado Company, in the Parish of Calcasieu.

Second. The Colorado Company hereby covenants and grants to the Louisiana Company, during the existence of this agreement, the right to connect the above described line of railway of the Louisiana Company with the line of railway of the Colorado Company at such convenient point near Ramsay as shall be designated by the Colorado Company, and also the right thereafter for a like term to operate at and over the point of connection under such rules and regulations therefore as shall from time to time be adopted by the Colorado Company.

Third. The Colorado Company and the Louisiana Company agree that during the existence of this agreement that they will interchange business with each other at said point of connection of their respective lines and by means thereof will establish a through line of railway with traffic thereover on the basis of the division of rates as hereinafter set forth.

Fourth. The King Company, the Hudson Company, the Calcasieu Company and the Long-Bell Company covenant and agree with the Louisiana Company, for its benefit and that of the Colorado Company and of the Frisco Company, to ship and cause to be shipped each and every month during the existence of this agreement over the line of railway of the Louisiana Company from the forest to the mills of the said named lumber companies, and all companies owned or controlled by them or either of them, all of the timber cut by all of said companies from all their lands
118 (including all lands controlled directly or indirectly by them or by any of their subsidiary companies, or by any companies in which they hold controlling interest) which they or either of them now own or may thereafter acquire along or contiguous to the said line of railroad of the Louisiana Company, and that they will ship at least fifty per centum (50%) of all the products of said mills to said point of connection near Ramsay over the line of railroad of the Louisiana Company, and then over the line of railway of the Colorado Company, and of the Frisco Company, and their connections, to the points of destination thereof. And the Louisiana Company covenants and agrees with the Colorado Company and with the Frisco Company, during the existence of this agreement, to deliver to the Colorado Company and to the Frisco Company, at said point of connection near Ramsay, said amount of at least fifty per centum (50%) of all the products of said mills, as hereinbefore mentioned, for the purpose of having same transported from the said point of connection over the line of the railway of the said Colorado Company and the Frisco Company and their connections to the points of destination thereof. Provided, however, that if hereafter the King Company, the Hudson Company, the Calcasieu Company or the Long-Bell Company shall acquire timber lands along or contiguous to the line of railway of the Louisiana Com-

pany, the owners of which shall require, as a condition of the sale thereof, that all or part of the timber or products of the timber from the same shall be shipped over some other line or lines of railway than the line of railway of the Colorado Company, then, and in such case, the provisions of this agreement shall not apply
119 to such lands or to the timber or products of the timber therefrom, in so far as there may be a necessary conflict with the said condition of sale of such after acquired lands.

Fifth. The Colorado Company and the Frisco Company agree, during the existence of this agreement, to accept from the Louisiana Company all shipments by it offered and to transport the same with reasonable promptness and dispatch, and to use every reasonable effort to furnish the Louisiana Company with cars as requested by it from time to time, to a number sufficient for transporting at least fifty per centum (50%) of all the products of the mills of the King Company, the Hudson Company, the Calcasieu Company and of the Long-Bell Company, and of all companies owned or controlled by them or either of them. It is understood and agreed, however, that if the Colorado Company or the Frisco Company shall fail during any calendar month to furnish the number of cars required by the Louisiana Company and necessary in order to transport fifty per centum (50%) of the products of the said mills during said month, then, in such event, the Colorado Company or the Frisco Company shall not be obliged thereafter to make up such deficit of cars in any such calendar month. Nor shall the Louisiana Company be obliged thereafter to furnish freight to make up such deficit on account of such failure of said Colorado Company or Frisco Company to furnish cars in said calendar month.

Sixth. The Colorado Company, the Frisco Company and the Louisiana Company agree, each with the other, that they will enter into joint tariffs relating to the joint traffic over their respect-
120 ive lines, and to file the same with the Interstate Commerce Commission and to publish the same in the manner and form as required by law.

Seventh. It is further agreed that no per diem charges shall be made by either the Colorado Company, or Frisco Company, or the Louisiana Company on freight cars delivered by either to the other of said parties, including its own and also foreign cars, during or for the first six days after such delivery, but all per diem charge accruing on cars after the expiration of said period of six days from the date of delivery thereof by one of said parties to the other, shall be paid by the party using and holding said cars to the other of said parties.

Eighth. The cost and expense of constructing, maintaining and renewing such connecting, interchange or sidetracks as may be necessary to properly handle the business of the Louisiana Company at said point of connection near Ramsay shall be borne and paid jointly and equally by the Louisiana Company and the Colorado Company.

Ninth. The King Company, the Hudson Company, the Calcasieu Company and the Long-Bell Company further covenant and agree

with the Louisiana Company and the Colorado Company and the Frisco Company to deliver, or cause to be delivered, to the Louisiana Company for transportation over the railway of the Colorado Company and of the Frisco Company to points on or reached via the railways or some of them constituting the railway lines or system of which the Colorado Company or the Frisco Company shall form a part, at least fifty per centum (50%) of all outbound shipments of lumber and other products of the mills of the said King
121 Company, Hudson Company, Calcasieu Company and Long-Bell Company, and of all companies owned or controlled by them or either of them, each and every month during the existence of this agreement, and in every such case they shall cause or permit such shipments to be so routed as to give to the railways constituting the railway lines or system of which the Colorado Company and the Frisco Company are a part, such hauls as shall yield to them the largest revenue.

Tenth. In respect to the division of freight rates between the Louisiana Company and the Colorado Company and the Frisco Company the said three companies hereby agree to the following division during the existence of this agreement:

On all lumber shipments originating on the line of the Louisiana Company, the Louisiana Company shall receive thirty-five per centum (35%) of the through rate, with a maximum of five and one-half cents per hundred pounds.

It is agreed that the above division of through rates shall include delivery of shipments to the Colorado Company or to the Frisco Company and are based upon the present through rates. It is agreed that if at any time during the existence of this agreement the through rates shall be reduced, the maximum of five and one-half cents per hundredweight due to the Louisiana Company shall be reduced in proportion to the reduction of the through rates.

Where lumber shipments made by the Lumber Companies originate on the line of the Louisiana Company and are transported over the line of the Colorado Company from the point of connection between the lines of the two companies near Ramsay to near Kinder, in Calcasieu Parish, on the line of railway of the St. Louis,
122 Watkins & Gulf Railway Company and delivered to the latter company at or near Kinder, the Colorado Company will make a rate for the transportation over its line, from the point of connection near Ramsay to the point of connection at or near Kinder, of not to exceed one cent per hundred pounds on such lumber shipments. But as to such shipments the division of the through rate hereinbefore agreed to and the maximum of five and one-half cents per hundred pounds shall not apply, and as to such shipments the Louisiana Company shall not receive from the Colorado Company any division of the through rate, and such shipments from Ramsay to Kinder shall not be computed or considered as part of the fifty per centum (50%) of shipments to be made over the line of railroad of the Colorado Company and the Frisco Company and their connections.

The Colorado Company and the Frisco Company agree that they

will at all times during the existence of this agreement publish for all territory east of the Mississippi River and north of the Ohio River and points on and west of the Mississippi River on the lines of the Frisco and Rock Island Systems and their connections the same freight rates from points on the Louisiana Company's line as are or shall be in effect from Eunice, La., on the Colorado Company's line.

On all commodities of traffic other than lumber which may be interchanged between the Louisiana Company and the Colorado Company and the Frisco Company the said three companies agree to make such divisions of the tariffs between themselves as shall be reasonable and fair and in accordance with the usual methods of making joint tariffs and divisions on like commodities be-
123 tween railroad companies operating lines of railroad within the State of Louisiana.

Eleventh. The Louisiana Company and the Colorado Company and the Frisco Company agree that each company shall be amenable to the other company for the prompt and proper handling of all cars of the other company, or cars of the other companies not parties hereto which it may handle; that in the handling of cars the usual practice and penalties of railroad companies in the State of Louisiana shall govern, excepting as to per diem charges as hereinbefore provided for, and that no cars of either company shall be used locally by the other companies.

Twelfth. The Louisiana Company and the Colorado Company and the Frisco Company each further covenant and agree to indemnify and save harmless the other from any and all loss of and damage to its cars or equipment or to cars or equipment belonging to other companies or persons which either company may receive from the other company which may occur while such cars or equipment are on the railroad of the indemnifying company, and in case of any damage to said cars or equipment while on its said line each of the said companies agree to properly repair the same without delay, and if it fails or neglects to repair the same within a reasonable time and to the satisfaction of the other company, then the other company may make such repairs and the cost thereof with ten per centum (10%) thereon additional thereto shall be paid to the company making such repairs by the other company immediately upon the receipt of statement showing the amount of such cost.

Thirteenth. This agreement and all the terms and condi-
124 tions, rights and obligations hereof shall inure in favor of and be binding upon the successors, assigns and lessees of each of the parties hereto.

Fourteenth. The Colorado Company shall proceed diligently to construct and put into operation its line of railroad passing near Ramsay and to make railroad connections with other line or lines of railroad so that the freight herein referred to may be transported by said Colorado Company and Frisco Company, and their connections, and as soon as the railroad of the Colorado Company has been constructed and put into operation to such extent and for such purposes then this agreement shall become effective and it shall be and

Record Book

Page 126.

remain in full force and effect for a period of fifteen (15) years hereafter, reckoning the said fifteen years from the date of the execution of this agreement, or as long as the lumber companies or either of them shall operate their mills in said Parish of Calcasieu.

In witness whereof, each party hereto has caused this agreement to be signed by its proper officer and its corporate seal to be hereto affixed and attested the day and year first above written.

310 In the United States Commerce Court.

No. 90.

LOUISIANA & PACIFIC RAILWAY COMPANY, HUDSON RIVER LUMBER Company, King-Ryder Lumber Company, Calcasieau Long Leaf Lumber Company, Longville Lumber Company, and the Long-Bell Lumber Company, Petitioners,

v.

THE UNITED STATES OF AMERICA, LOUISIANA WESTERN RAILROAD Company, Morgan's Louisiana & Texas Railway & Steamship Company, New Orleans, Texas & Mexico Railroad, and the St. Louis & San Francisco Railroad Company, Respondents.

Answer of the United States.

(Filed January 29, 1913.)

Comes now the United States, respondent, by its counsel, not waiving but insisting upon the insufficiency in law of the petition, and answers as follows upon information and belief:

I.

The order of the Interstate Commerce Commission sought by this petition to be set aside and annulled, and the report of the
311 commission rendered therewith, and the findings of fact stated in said order and report, were made upon due hearing and due investigation, and upon substantial and sufficient evidence and due consideration thereof.

II.

The Interstate Commerce Commission did not, in any particular, act unreasonably, arbitrarily, or otherwise improperly.

III.

The Interstate Commerce Commission, after due hearing and upon substantial evidence, found that the tracks and equipment of the Louisiana & Pacific Railway Company with respect to the industry of the several proprietary lumber companies, are plant facilities, and that the service performed therewith for the respective proprietary lumber companies in moving logs to their respective mills, and in moving the products of the mills to the trunk lines, is not a service of transportation by a common-carrier railroad, but is a plant service by a plant facility; and that any allowances or divisions out of the rate on account thereof are unlawful and result in undue and unreasonable preferences and unjust discriminations. Whether or not, as to other shippers, petitioner is a common carrier is immaterial.

IV.

Respondent denies the allegations on page 75 of the petition in so far as they imply that the trunk lines had universally, or even in a majority of instances, extended the blanket rate through the
312 mills of the tributary lumber companies to the trees in the forest, and calls attention to the finding of the Commission (23 I. C. C., 281, 282, 284, 297, and 298) to the effect that the majority of tap lines in this vicinity receive no allowances whatever for the tree-to-mill haul, and alleges that the said finding was based on substantial evidence.

V.

Respondent has no knowledge or information sufficient to form a belief as to the causes which induced the trunk line railroads to cancel their allowances to petitioner or whether said trunk lines would continue to pay said allowances were it not for the order of the Commission herein complained of.

VI.

Respondent denies that the Commission's order herein complained of permits other tap lines to receive allowances from trunk line railroads for services rendered their proprietary companies which are substantially similar to the services rendered to its proprietary companies by this petitioner.

VII.

The contracts between the trunk line railroads and the petitioners described in the petition and set forth at length in the exhibits attached thereto and providing for the payment to the petitioner of divisions out of the joint rate for the transportation of the products of its proprietary lumber companies, are void in so far as they
313 conflict with the Act to regulate commerce or any lawful order of the Interstate Commerce Commission; they are also void because they bind the proprietary lumber companies to ship certain percentages of their entire product over the contracting trunk line railroads and thus these contracts constitute and unlawful device through which the trunk lines pay to the lumber companies a consideration in order to obtain said shipments. In any case it is not within the jurisdiction either of the Interstate Commerce Commission or of the Commerce Court to order specific performance of such contracts.

VIII.

The allegations on pages 5-21, inclusive, contain mere evidentiary matter which, in so far as it is inconsistent with the findings of the Interstate Commerce Commission or not contained therein or in the evidence upon which said findings were based, is irrelevant and immaterial.

IX.

For the purposes of this case, respondent admits the allegations of fact in the petition which are not denied or specifically referred to above and which are not inconsistent with the findings made by the order and report of the commission.

Wherefore, having fully answered this petition, this respondent prays that said petition be dismissed with costs.

WINFRED T. DENISON,
Assistant Attorney General.

January, 1913.

314 In the United States Commerce Court.

No. 90.

LOUISIANA & PACIFIC RAILWAY COMPANY, HUDSON RIVER LUMBER Company, King-Ryder Lumber Company, Calcasieu Long Leaf Lumber Company, Longville Lumber Company, and The Long-Bell Lumber Company, Petitioners.

v.

THE UNITED STATES OF AMERICA, LOUISIANA WESTERN RAILROAD Company, Morgan's Louisiana & Texas Railway & Steamship Company, New Orleans, Texas & Mexico Railroad, and The St. Louis & San Francisco Railroad Company, Respondents.

Answer of the Interstate Commerce Commission.

(Filed February 8, 1913.)

The Interstate Commerce Commission, intervening respondent in the above-entitled cause, now and at all times saving and reserving to itself all and all manner of benefit and advantage of exception to the many errors and insufficiencies in the petitioners' petition
315 contained, for answer thereunto, or unto so much or such parts thereof as this respondent is advised is material for it to make answer unto, answering says:

I.

That there is a misjoinder of parties defendant, in that the act of Congress creating said court expressly provides that suits of this character shall be brought against the United States.

That this court has no jurisdiction of the controversy, matters and things respectively set forth in said petition, nor does it possess general equity jurisdiction to grant the relief, or any part thereof, prayed for.

II.

This respondent admits that it made and entered the order set forth in said petition bearing date September 3, 1910, In the Matter of the Investigation and Suspension of Supplement No. 3 to I. C. C. No. 23; that it made and entered the order of January 16, 1912, set forth in said petition. It admits and alleges that after due and full hearing, as required by the statute, it made and filed in the proceeding known as Investigation and Suspension Docket No. 11, its original report, under date, April 23, 1912, which report is set forth in volume 23 of its printed reports (I. C. C. Rep.) beginning at page 277, and thereafter—May 14, 1912—it made and filed the supplemental report set forth in said petition and in said volume 23 (I. C. C.
316 Rep.) beginning at page 549; that on the 14th day of May, 1912, it made and entered the order in said matter, set forth in said petition.

This respondent admits the filing of the petition by L. M. Walter, attorney for petitioners, as set forth in said petition, and that thereafter, on October 30, 1912, this respondent, at the request of said petitioners, made and entered the amended order set forth in said petition. This respondent admits that it made the decision and report referred to in said petition and reported in its published reports, volume 17 (I. C. C. Rep.), beginning at page 338; and this respondent admits that the trunk lines, so called in said petition, withdrew their tariffs and filed new tariffs at the times and substantially in form as stated in said petition.

III.

This respondent neither admits nor denies the particular matters and things set forth in said petition regarding the organization of the several petitioning companies, and the several stockholdings set forth in said petition, nor has it any knowledge regarding the business and the amount thereof of the several petitioners or of either of them, excepting as the facts relevant and pertinent to the issue were proved in the said proceedings and matters before this respondent, in which matters the said reports and orders of this respondent were entered; and this respondent avers that the facts presented to and the conclusions reached thereon by this respondent in
317 said investigation (I. and S. D. No. 11), regarding the said allegations contained in the petition herein, are set forth in the original report thereof, appearing in volume 23 of this respondent's published reports (I. C. C. Rep.), beginning at page 277, and in the supplemental report in said investigation reported in said volume 23, beginning at page 549, and in the several orders entered thereon; and this respondent makes said original and supplemental reports and each of them, and the orders entered thereon, a part of this answer for and as its statement of the facts in this controversy; and respondent begs leave to make the same use of said published reports in its defense herein as it could make if the original and supplemental reports and said orders respectively were each set forth in full in this answer.

IV.

This respondent denies each and every allegation in said petition which in effect or by inference alleges that this respondent in the matters aforesaid erroneously determined or decided any questions of law, or that it acted in any respect arbitrarily, or that this respondent in making said orders, or either of them, herein complained of, acted without substantial evidence produced at said hearing to support the same, or that in the making and enforcement of said orders, herein complained of, or either of them, the petitioners, or either of them, have suffered or will suffer any violation or infraction of their constitutional rights or privileges.

318 This respondent denies each and every allegation in said petition not herein expressly admitted, or which is contrary to the or any facts stated in this answer or in respondent's said original or supplemental reports or orders.

All of which matters and things this respondent is ready to aver, maintain, and prove as this honorable court shall direct, and prays the same advantage as to each and all the matters and things aforesaid as this respondent would be entitled to if the same were specially pleaded, or set forth by way of demurrer, or motion to dismiss the petition.

And having fully answered said petition, this respondent prays to be hence dismissed with its reasonable costs and charges in its behalf sustained.

INTERSTATE COMMERCE COMMISSION,
By CHARLES W. NEEDHAM, *Its Solicitor.*

CITY OF WASHINGTON,
District of Columbia, ss:

James S. Harlan, being duly sworn, deposes and says that he is a member of the Interstate Commerce Commission, the above-entitled respondent, and makes this affidavit on behalf of said commission; that he has read the foregoing answer and knows the contents thereof, and that the same is true as to the matters
319 within the knowledge of the commission, and as to the other matters he believes it to be true.

[SEAL.] JAMES S. HARLAN.

Subscribed and sworn to before me, George B. McGinty, a notary public within and for the District of Columbia, this 8th day of February, 1913.

GEORGE B. McGINTY,
Notary Public.

320 In the United States Commerce Court.

No. 90.

LOUISIANA AND PACIFIC RAILWAY COMPANY, et al., Petitioners,
vs.
UNITED STATES OF AMERICA et al., Respondents.

Answer of the Louisiana Western Railroad Company.

(Filed February 6, 1913.)

The answer of the Louisiana Western Railroad Company to the complaint herein respectfully shows:

I. It admits the incorporation of the Louisiana & Pacific Railway Company, and is advised and believes that the same is a common carrier as alleged in clause 1 of the complaint. It admits, also, the correctness of the extracts in said clause from the constitution and laws of Louisiana.

It admits, upon information and belief, the correctness of the statements in clause 1 in regard to the location and mileage of the

lines of railway over which the Louisiana & Pacific Railway Company operates, the connections thereof with other lines of railroad, compliance with the rules and regulations of the State Rail-
321 road Commission of Louisiana and of the Interstate Commerce Commission and with the laws of the State of Louisiana and of the United States relating to common carriers by railroad, and its carrying a full line of class and commodity rates, state and interstate, and concurring in joint tariffs with connecting lines.

It has no knowledge, or sufficient information upon which to form a belief, as to the correctness of the statements in clause 1 in regard to the cost of the physical property of the Louisiana & Pacific Railway Company, or in regard to the details of its equipment or of its operating force, or as to the amount and character of its traffic other than traffic, outbound and inbound, for its co-complainants, or of the number and character of its stockholders and their relation or want of relation with corporations, individuals and industries on said line of railway, or as to the bonds issued and the holders thereof; and, neither admitting or denying said statements, it leaves complainants to make such proof thereof as they may be advised to make.

II. It admits, upon information and belief, the correctness of the statements contained in clauses 2 and 3 of the complaint.

III. It admits the general correctness of the statements contained in clause 4 of the complaint in respect to this respondent, the Louisiana Western Railroad Company, and its co-respondent, the Morgan's Louisiana & Texas Railroad and Steamship Company. Said respondents, however, are each an independent, separately organized and existing railroad corporation, operated by its own officers and agents.

322 It has no concern with the statements in clauses 4 and 5 in regard to its co-defendants, the New Orleans, Texas & Mexico Railway Company and the St. Louis & San Francisco Railroad Company.

IV. It is advised and believes that the references in clause 6 of the complaint to the investigations and reports of the Interstate Commerce Commission in Star Grain and Lumber Company et al. v. Atchison, Topeka & Santa Fe Railway Company et al., Docket No. 1319, are correct.

V. It admits and avers that, by reason of the report or opinion mentioned in the preceding clause of this answer, and by reason of the belief, induced by said report and the action of the said Commission and its members, or some of them, that otherwise its officers and agents would be subjected to criminal prosecution at the instance of the said Commission as for alleged rebates or unlawful discriminations, respondent, about August, 1910, filed with said Commission new tariffs, as supplemental tariffs, on lumber, to become effective in thirty days, which new tariffs canceled all joint tariffs which respondent had theretofore had and maintained with complainant, the Louisiana & Pacific Railway Company.

VI. It admits the general correctness of the statements contained in clauses 8, 9 and 10 of the complaint respecting the further orders, proceedings, argument and reports in the so-called "Tap Line" case, and begs leave to refer to the original proceedings and record

for a more full statement thereof, should the same become necessary.

VII. It admits the general correctness of the statement
323 contained in clause 11 of the complaint respecting the petition filed by complainants in this court on June 21, 1912, the dismissal thereof, and the subsequent application to the Interstate Commerce Commission and the order thereon of October 30, 1912.

VIII. It admits, upon information and belief, the correctness of the statement in clause 12 of the complaint in respect to the tariffs on lumber to which the said Louisiana & Pacific Railway Company was a party on April 30, 1912, but it reserves leave to refer, if need be, to said tariffs on file with said Commission.

IX. For want of sufficient knowledge or information, it neither admits or denies the statements in clause 13 of the complaint relating to the properties, business, plans and intentions, prior to October 31, 1896, of the several complainants herein and leaves complainants to their proof thereof.

It admits that on October 31, 1906, the said Louisiana & Pacific Railway Company and the Lake Charles & Northern Railroad Company entered into an executory contract under which the former was to complete the construction of a broad gauge railroad from De Ridder to Fulton (or Ramsay Junction) and the latter to construct a broad gauge road from Fulton to Lake Charles, and then the former would sell to the latter at cost the road between De Ridder and Fulton, and the right of way and such other rights as it had between Fulton and Lake Charles, the seller to have certain trackage rights over the said road between De Ridder and Lake Charles; and it admits and avers that the said executory contract was carried out and performed by a notarial contract of sale passed at New Orleans,
Louisiana, on February 21, 1908, before Felix J. Puig, notary
324 public, and by a contract under private signature on the same date between the same parties, i. e., the said Louisiana & Pacific Railway Company and the Lake Charles & Northern Railroad Company, whereby the former was given certain joint trackage rights over the said line of railroad between De Ridder and Lake Charles. It reserves the right, if need be, to refer to the originals or to verified copies of said contracts for a more full and detailed statement of their terms and conditions and of the matters covered thereby.

X. It admits the general correctness of the statements in clause 14 of the complaint in respect to "blanket rates" on lumber in the lumber producing districts of the South.

XI. It admits the execution on October 31, 1906, of a tripartite agreement between this respondent, the said Louisiana & Pacific Railway Company, and the Lumber Companies, complainants herein, which was of the general tenor and effect as stated in clause 15 of the complaint.

XII. It avers that the Longville Lumber Company, not originally a party to said tripartite agreement, has been allowed to conform to its provisions and requirements and accordingly to participate in its benefits.

XIII. It has no concern or interest in the statements of clause

17 of the complaint relating to contracts between the complainants and the New Orleans, Texas & Mexico Railroad Company and with the St. Louis & San Francisco Railroad Company, and relating to what has been done by complainants on the faith of said contracts.

325 XIV. For want of sufficient knowledge or information, it neither admits nor denies the statements in clause 18 in regard to the money expended or the property acquired on the faith of said contracts with the defendant railroad companies.

XV. It admits the statement in clause 19 of the complaint, that this respondent canceled the said through rates and divisions, not voluntarily, but under compulsion of the decisions of the Interstate Commerce Commission and the fear of criminal prosecution.

It says that the other matters and things in said clause, being charges against the correctness of the report of the said Commission and its power and authority, concern its co-defendant, the United States, and this respondent asks to be allowed to leave the defense thereof to said co-defendant.

XVI. Answering the remaining clauses of said complaint, this respondent says that the Interstate Commerce Commission having declared that the division of rates between it and the Louisiana & Pacific Railway Company was illegal, it was obliged to act as it did, and cancel the same.

XVII. It denies all the other matters and things in said complaint contained, not hereinabove admitted.

Wherefore, this respondent, the Louisiana Western Railroad Company, prays the court to be hence dismissed with its costs, and for such other and general relief in the premises as to this court may seem meet.

No. 90.

LOUISIANA AND PACIFIC RAILWAY COMPANY et als.
vs.
UNITED STATES et al.

Demurrer of the Morgan's-Louisiana and Texas Railroad and Steamship Company.

Filed February 3, 1913.

This defendant, by protestation, not confessing or acknowledging any of the matters in the complaint herein to be true, doth demur thereto, and for cause of demurrer showeth that complainants have not in their complaint made or stated any such cause as ought to en-

title them or any of them to any relief against this defendant, nor do they seek any relief against it.

Wherefore this defendant demurs thereto, and asks the judgment of this court as to whether it shall be compelled to make any
327 further or other answer to the said bill; and it prays to be hence dismissed with its costs.

H. A. SCANDRETT,
J. P. BLAIR,
Sol'rs for Above-named Defendant.

St. Denis J. De Blanc, being duly sworn, deposes and says that he is secretary of the said Morgan's Louisiana and Texas Railroad and Steamship Company, and that the foregoing demurrer is not interposed for delay.

No. 90.

LOUISIANA AND PACIFIC RAILWAY COMPANY et al., Petitioners,
vs.
THE UNITED STATES OF AMERICA et al., Respondents.

Joint Answer of Respondents, New Orleans, Texas & Mexico Railroad, and St. Louis & San Francisco Railroad Company.

(Filed February 6, 1913.)

Now come New Orleans, Texas & Mexico Railroad and St. Louis & San Francisco Railroad Company, respondents herein, and for answer to the petition herein, respectfully show:

1. They admit the incorporation of the Louisiana & Pacific Railway Company, hereinafter called the Louisiana Company, and are informed and believe that said company is incorporated under the laws of the State of Louisiana providing for the formation of
329 common carrier railroad corporations, and also admit the correctness of the extracts in Paragraph 1 of the petition herein from the Constitution and Laws of the State of Louisiana.

They admit upon information and belief the correctness of the statements in Paragraph 1 in regard to the location and mileage of the lines of railway over which the Louisiana Company operates, and the connections thereof with other lines of railroad. They have no knowledge or sufficient information upon which to form a belief as to the correctness of the statements in Paragraph 1 of the petition as to compliance with the rules and regulations promulgated by public authorities, or the carriage of a full line of class and commodity rates between points on its own line in Louisiana, but admit that it concurs in joint tariffs on some commodities between points on its road and points on the line of these respondents, but denies that the Louisiana Company has a full line of rates on all commodities to all interstate territory; they have no knowledge or sufficient information upon which to form a belief as to the correctness of the statements in Paragraph 1 of the petition in regard to the cost of the physical property of the Louisiana Company, or the details of its equipment, or of its operating force, as to the amount and character of its traffic, the number or size of the cities, towns, villages or stations located thereon, the number or character of the industries located thereon, or adjacent thereto, the number and character of its stockholders and their relation, or want of relation with corporations, individuals and industries on said line of railway, or as to the bonds issued thereby and the holders thereof.

2. They admit upon information and belief the correctness of the statements contained in Paragraph 2 of the petition.

330 3. They admit upon information and belief the correctness of the statements contained in Paragraph 3 of the petition.

4. They admit that respondent New Orleans, Texas & Mexico Railroad is a railroad corporation of the State of Louisiana and a part of what is known as the "Frisco System," but deny that it owns or operates any line of railroad within the State of Texas, and aver that the line of railroad operated by it extends from New Orleans and Baton Rouge to the boundary line between the States of Louisiana and Texas. These respondents have no concern with statements in Paragraph 4 of the petition respecting their co-respondents herein.

5. They admit that the St. Louis and San Francisco Railroad Company is a railroad corporation organized under the laws of the State of Missouri, owning and operating railroads in the States of Arkansas, Missouri and elsewhere, but deny that the St. Louis and San Francisco Railroad Company owns or operates lines of railroad in the States of Louisiana and Texas.

6. They admit the allegations of Paragraph 6 of the petition.

7. Answering Paragraph 7 of the petition they aver that by reason of the report or opinion of the Interstate Commerce Commission (hereinafter called the Commission), referred to therein, and by reason of the belief, induced by said report and the respondents' understanding of the opinion and attitude of Commission with respect to the subject-matter thereof, that otherwise the re-

331 spondents, their officers and agents would be subject to criminal prosecution at the instance of the Commission as for

alleged rebates or unlawful discriminations, respondents, about August, 1910, filed with the Commission new tariffs, as supplemental tariffs, on lumber, to become effective in thirty days, which new tariffs cancelled all joint tariffs which respondents had theretofore had and maintained with complainant, the Louisiana and Pacific Railway Company.

8. They admit the general correctness of the statements contained in Paragraph 8 of the petition, and beg leave to refer to the original proceedings and record for full statement thereof, should the same become necessary.

9. They admit upon information and belief the allegations of fact contained in Paragraph 9 of the petition herein.

10. They admit upon information and belief the general correctness of the statements contained in Paragraph 10 of the petition respecting the orders and reports of the Commission, and beg leave to refer to the original proceedings and record for a more full statement thereof, should the same become necessary, and for the legal effect thereof.

11. They admit the general correctness of the statements contained in Paragraph 11 of the complaint respecting the petition filed by the petitioners in this court on June 21, 1912, the dismissal thereof and the subsequent application to the Commission and the order thereon of October 30, 1912.

12. They admit upon information and belief the correctness of the statements contained in Paragraph 12 of the petition
332 with respect to the tariffs on lumber to which the Louisiana Company was a party on April 30, 1912, but reserves leave to refer, if need be, to said tariffs on file with said Commission; but deny that the rates therein prescribed were reasonable through rates, and allege that said rates were unreasonably low.

13. They have no knowledge or information sufficient upon which to form a belief as to the correctness of the allegations of Paragraph 13 of the petition as to the prior history of the railroads now operated by the Louisiana Company, or as to the business, plans and intentions of the petitioners and the parties named in said Paragraph 13, with respect to the construction or consolidation of the properties therein named, or the incorporation of the railroad companies therein described, or of the sale therein referred to to the Lake Charles and Northern Railroad Company, or of the contract between said company and the Louisiana Company, but are informed and believe that such contract of sale was made, and that the Louisiana Company has trackage rights as therein alleged.

14. They admit the general correctness of the statement in Paragraph 14 of the petition in respect to blanket rates on lumber in the lumber-producing districts of the South.

15. They state that they have no knowledge or sufficient information upon which to form a belief as to the truth of the allegations of Paragraph 15 of the petition with respect to the contract therein alleged between the petitioners and the Louisiana Western Railway Company, and have no concern or interest therein.

333 16. They have no knowledge or sufficient information upon which to form a belief as to the truth of the allegations in Paragraph 16 of the petition contained, with respect to the actions of the Longview Lumber Company therein alleged, and have no interest or concern therein.

17. They admit the execution on October 13, 1906, of the contract between these respondents and the petition- as stated in Clause 17 of the petition.

18. They have no knowledge and have not sufficient information to form a belief as to the truth of the statements in Paragraph 18 of the petition with regard to the money expended or the property acquired or the contracts made on the faith of said contracts with the respondent railroad companies.

19. They admit that they cancelled the through rates referred to in the petition under and by virtue of the cancelling tariffs hereinbefore referred to by reason of the several reports, decisions and orders of the Interstate Commerce Commission hereinbefore referred to and under the belief, induced by said reports, decisions and orders, and their understanding thereof that if said joint through rates with the Louisiana Company were not cancelled, said respondent railroad companies, their officers and agents would be subject to criminal prosecution at the instance of the Commission as for alleged rebates and alleged unlawful discrimination. As to the legal effect of the various orders and actions taken by the Commission and set forth in Paragraph 19 of the petition herein, defendants refer to said orders themselves as specifically set out in the petition. They are
334 without knowledge or sufficient information to form a belief as to the truth of the statements contained in said Paragraph 19 as to the practices of the Louisiana Company and of the manner in which it conducts its business, and say that the other matters and things in said paragraph contained, being charges against the correctness of the findings of fact and conclusions of law contained in the report of the Commission, and averments respecting the validity of the order of the Commission and its power and authority concern their co-respondent, the United States of America, and these respondents ask to be allowed to leave the defence thereof to said co-respondent.

20. They deny that their action in filing the supplemental tariff referred to in Paragraph 20 of the petition was in violation of the act to regulate commerce and allege that the Commission having held through rates and divisions with the Louisiana Company to be unlawful it was right and proper for these respondents to file said supplemental tariffs for the reasons heretofore given.

21. They are without knowledge or sufficient information to form a belief as to the truth of the statements of facts contained in Paragraph 21 of the petition.

22. They deny all the other matters and things in the petition contained not hereinabove admitted.

Wherefore these respondents pray the Court to be hence dismissed

with their costs and for such action and general relief in the premises as to this Court may seem meet.

FRED H. WOOD,
Solicitors for Respondents Above Named.

335 In the United States Commerce Court.

No. 90.

THE LOUISIANA & PACIFIC RAILWAY COMPANY et al., Petitioners,
vs.
THE UNITED STATES OF AMERICA et al., Respondents.

Petition of Intervention of the Railroad Commission of Louisiana.

(Filed February 10, 1913.)

To the Honorable the Judges of the United States Commerce Court:

The Railroad Commission of Louisiana, a political corporation organized under and by virtue of the laws of the State of Louisiana, composed of Shelby Taylor, Chairman; Henry B. Schreiber and B. A. Bridges, Commissioners, of which Henry Jastremski
336 is the Secretary, having its domicile in the city of Baton Rouge, State of Louisiana (hereinafter called petitioner), by leave of the Court join- and file- this, its petition of intervention in the above-numbered and entitled cause.

I.

Petitioner is organized under the provisions of Articles 284 to 289, inclusive, of the Constitution of Louisiana, and of the Acts of the Legislature amendatory thereto and supplemental thereof, and it is its duty to adopt, change or make reasonable and just rates, charges and regulations to govern and regulate railroad * * * freight and passenger tariffs and service, * * * to correct abuses and to prevent unjust discrimination and extortion in the rates for the same, on the different railroads * * * of this State, and to prevent such companies from charging any greater compensation in the aggregate for the like kind of property or passengers, * * * for a shorter than a longer distance over the same lines, unless authorized by the Commission to do so in special cases; to require all railroads to build and maintain suitable depots, switches and appurtenances, wherever the same are reasonably necessary at stations, and to inspect railroads and require them to keep their tracks and bridges in a safe condition, and to fix and adjust rates between branch or short lines and the great trunk lines with which they connect, and to enforce the same by having the
337 penalties prescribed inflicted through the proper Courts having jurisdiction.

II.

That acting under the authority of the Constitution and Laws of the State of Louisiana, petitioner has adopted and enforced, and is now enforcing numerous rules and regulations to regulate and govern the rates and service of common carriers operating in the State of Louisiana.

That acting under and by virtue of Act No. 195 of the General Assembly of the State of Louisiana of 1906, the Railroad Commission on January 31, 1913, adopted a resolution authorizing the filing of this intervention, a certified copy of which resolution is attached hereto as Exhibit "A," and leave is asked to file the same as part hereof.

III.

That Article 230 of the Constitution of Louisiana exempted for a period of ten years from the date of its completion any railroad or part of such railroad thereafter constructed and completed prior to January 1, 1904, and that this exemption from taxation was renewed and extended by Constitutional Amendment in 1904, for a period of ten years, to all railroads or parts of railroads constructed and completed subsequently to January 1, 1905, and prior to January 1, 1909, which exemptions from taxation was for the
338 purpose of encouraging railroad construction and extension in the State of Louisiana.

IV.

That Article 272 of the Constitution of Louisiana declares that: "Railways heretofore constructed, or that may be hereafter constructed in this State, are hereby declared public highways, and railroad companies common carriers,"

and this provision of the Constitution of Louisiana has been interpreted and defined by the Supreme Court of Louisiana to apply to any railroad with roadbed and crossties, and parallel rails on which steam locomotives draw regular trains for the transportation of passengers and freight.

That on or about the 8th day of December, 1910, petitioner filed a petition of intervention before the Interstate Commerce Commission, In the Matter of Tap Line Allowances and Divisions, Number 1319 on the docket of said Interstate Commerce Commission, on behalf of the people of the State of Louisiana. The petition alleged that "the lumber traffic on railroads operating in the State of Louisiana far exceeds, in volume, the traffic in any other commodity transported, the percentage of the tonnage of lumber, logs and staves transported by thirty-three of the sixty-six railroads reporting to the Railroad Commission of Louisiana for the year ending June
339 30, 1901, being over 60% of the entire tonnage hauled, and the percentage of the lumber, logs and staves transported by forty-six of the sixty-six railroads reporting to the Railroad Commission of Louisiana for the year ending June 30, 1910, being

greater than the tonnage of any other commodity transported by them." It was further alleged "that a larger percentage, which your petitioner cannot state with exactness, of the lumber traffic so moving over the railroads operating within the State of Louisiana, originates on the short line railroads connecting with the trunk lines, and is transported to various points in other States in the United States, and exported to foreign countries." The petition further states: "That the short line railroads have played a valuable and important part in the development of the State of Louisiana, and the policy of your petitioner has been to encourage their extension by establishing fair and reasonable rates on all classes of freight, requiring them, in turn, to establish and maintain adequate and suitable train service, depots, and other facilities of travel and commerce." After alleging that the industrial and agricultural development has been greatly advanced by the building of short line railroads, many miles of which would not have been constructed except for the expected traffic in lumber and forest products, the petition alleges that the Railroad Commission of Louisiana believes that all railroads in the State of Louisiana, having a charter and operating regular trains, filing annual reports, filing and publishing tariffs, operating suitable and adequate trains, providing
339½ ample shipping facilities, and otherwise complying with and obeying all the orders, rules and regulations governing railroads operating in the State of Louisiana, should be allowed to charge a fair and reasonable rate, and earn fair returns on their investments, whether fair returns are derived from local or intrastate freight rates or from a division of freight rates made by agreement with connecting carriers, on both interstate and intrastate traffic.

That the Railroad Commission of Louisiana, through counsel, filed a brief and made oral argument, and the case was submitted on April 15, 1911. Thereafter, on April 23, 1912, the Commission handed down its partial report, and, on May 14, 1912, and on October 30, 1912, the Commission handed down its suplemental reports (being its Opinions Numbers 1853 and 1898), holding that the service performed for the proprietary lumber companies by certain tap lines described in the report is not a service of transportation by a common carrier.

V.

That among other short line railroads operating in the State of Louisiana, so declared by the said Interstate Commerce Commission not to be transportation companies, or common carriers, as to the service performed for the proprietary lumber companies, was the Louisiana & Pacific Railway Company, one of the petitioners in the above-entitled suit, a railway corporation duly incorporated under
340 the laws of the State of Louisiana, a common carrier, owning and operating a railroad between De Ridder, Louisiana, and Lake Charles, Louisiana, a distance of about forty-three miles, with several branches. That said Louisiana & Pacific Railway Company is and has been, since it began operations, engaged in both state and interstate commerce, having connections at Lake Charles, Louisiana,

with the Louisiana Western Railroad; at Fulton, with the New Orleans, Texas & Mexico Railroad; at Bon Ami, Lake Charles and De Ridder, with the Kansas City Southern Railway; at De Ridder with the Gulf, Colorado & Santa Fe Railway; at Lake Charles with the Saint Louis, Iron Mountain & Southern Railway. Said Louisiana & Pacific Railway Company is complying with the laws of Louisiana governing common carriers, and with the rates, rules and regulations and orders of petitioner, the Railroad Commission of Louisiana. It publishes and files with petitioner, the Railroad Commission of Louisiana, tariffs of rates on commodities, and the different classes of freight, applying locally between points on its own line, and it concurs in joint through rates, legally published and filed, applicable between points on its own line and points on connecting lines in Louisiana, and it also publishes and files tariffs of rates from and to interstate points, and under such tariffs freight moves freely. It operates regular trains, on wheih both passengers and freight are handled at regular tariff or statutory rates.

The Louisiana & Pacific Railway has been exempted from taxation for a period of ten years by the State Board of Ap-
341 praisers of the State of Louisiana, in accordance with the Constitutional provisions of the State of Louisiana, hereinabove referred to, applying to new railroads or parts of railroads constructed and completed within certain prescribed dates.

VI.

That under and by virtue of its charter, the Louisiana & Pacific Railway Company has a contract with the State of Louisiana to operate and maintain a railroad in the State of Louisiana, and it should be permitted to transport as a common carrier, and earn revenue upon all kinds and classes of freight that may be tendered or that may result from its development of the country through which it runs, and its contract with the State has been seriously threatened, and will be vitally affected and impaired by reason of an order of the Interstate Commerce Commission, from engaging in interstate transportation of logs, lumber and other forest products, and receiving out of joint through rates a division therefrom.

VII.

And the interests of the State of Louisiana are seriously affected by the orders of the Interstate Commerce Commission attacked in this cause, because the State has encouraged the building of railroads by exempting such roads as were built during certain periods
342 from taxation for ten years. The mileage of railroads in the State of Louisiana on June 30, 1909, was 4,950.55, an increase in the ten years during which the exemption ran, of 2,525.25 miles, a large portion of the increase in mileage having been constructed by the short line railroads, including the mileage of the Louisiana and Pacific Railway.

The Railroad Commission of Louisiana, petitioner, believes, and upon its belief, alleges, that the orders of the Interstate Commerce

mmission attacked herein, if allowed to remain in force, will stifle growth of the State, check the building and extension of short, ependent railroads, hamper and retard its agricultural and indus- l development, reduce its railroad mileage, destroy valuable prop- y at a time when the State of Louisiana is beginning to reap the efits of these investments by reason of the termination of the iod of exemption, by collection of taxes, on the Louisiana and ific Railway, as well as on other railways which will be affected the said orders of the Interstate Commerce Commission.

VIII.

That the said orders of the Interstate Commerce Commission de- y the right of the Louisiana shippers of logs and lumber from pping over the Louisiana and Pacific Railway under like condi- ns with other shippers, who enjoy joint through rates to and from interstate points from and to parties in the State of Louisiana, located on such railway, and likewise if continued in force, destroys the right of the Louisiana and Pacific Railway to gage in the transportation of interstate shipments of logs and lum- , under joint through rates, and divisions of such rates in accord- e with their contracts, which its charter, as a common carrier, der the laws of Louisiana, permits it to do. The said Louisiana l Pacific Railway Company is thereby prevented from giving to Louisiana shippers of logs and lumber manufactured therefrom advantages, opportunities, and conveniences almost universally oyed by shippers, of shipping under joint through rates, and the isiana and Pacific Railway Company, a Louisiana corporation, l other railways operated in Louisiana under similar circum- nces and conditions, the right of entering into contracts with con- ting lines of railways for joint through rates, and a division of h rates.

IX.

That the aforesaid orders of the Interstate Commerce Commission ce an undue and unnecessary burden upon the shippers of local rchandise freight transported by the Louisiana and Pacific Rail- y by denying to the Louisiana and Pacific Railway Com- ay the right to transport logs and lumber manufactured refrom to and from interstate points at established joint through es, and to receive a division out of such revenues as may be derived from such interstate traffic, in that the local rates on such merchandise, or the divisions received on the joint through rates from such merchandise, must bear all the burden of ring operating costs, the maintenance costs, the general expenses, fixed charges, the interest on the investment of such railway. is will result in unjust discrimination against the shipper of local ight, other than logs and lumber, whereas, the logs and lumber nsported by such railway should contribute its fair share of the enue of the Louisiana and Pacific Railway, and not throw upon local shippers of freight other than logs and lumber the burden paying rates high enough to pay all the necessary costs of oper- ng and maintaining the Louisiana and Pacific Railway.

X.

Petitioner further avers that the order of the Interstate Commerce Commission aforementioned destroys the guarantee of the Declaration of Independence, of equal rights to all, and impairs the obligation of the contract existing between the State of Louisiana and the Louisiana and Pacific Railway Company, to operate and maintain a railroad, and engage in both state and interstate commerce, wherefore considering the premises and the matters and things hereinbefore set forth, petitioner says:

1. That the orders of the Interstate Commerce Commission in the Tap Line case, in so far as they effect the right of the Louisiana and Pacific Railway Company and other railway companies similarly organized under the laws of Louisiana and operating as com-
345 mon carriers in said State, were made without power or authority either directly or indirectly conferred upon it by the Act to Regulate Commerce or any amendment thereto or supplement thereof, or by any other law of the United States, the Commission having no jurisdiction to prevent a railroad corporation lawfully incorporated under the laws of the State of Louisiana as a common carrier and operating its railroad accordingly, from engaging in the transportation of logs and lumber to and from interstate points, on the ground that the principal shippers of the logs and lumber so transported own or control the railroad.

2. That for the reasons above set forth the Order of the Interstate Commerce Commission aforementioned, declaring that the service performed for proprietary lumber companies by certain Tap Lines described in its report is not a service of transportation, is unjust, unreasonable, discriminatory, unconstitutional, and therefore null and void.

XI.

Wherefore, petitioner prays that the service of this petition be made on respondents herein commanding them to answer the matter hereof (but not under oath, answer under oath being expressly waived); that notice of the application for injunction hereby made be duly served on the respondents, on the Attorney-General of the United States, and on the Interstate Commerce Commission; that upon the hearing hereof the said orders of the Interstate
346 Commerce Commission of May 1st and May 14th, 1912, and of October 30, 1912, in the Tap Line case, be enjoined, set aside, and held for naught; that the Interstate Commerce Commission, its members, agents, attorneys, servants and representatives be forever enjoined from enforcing said order or taking any steps or instituting any proceedings for the enforcement thereof, and petitioner prays for all general and equitable relief.

RUFFIN J. PLEASANT,
Attorney-General of the State of Louisiana;
WYLIE M. BARROW,
Assistant Attorney-General,
Solicitors for the Railroad Commission of Louisiana.

STATE OF LOUISIANA,
Parish of East Baton Rouge:

I, Shelby Taylor, Chairman of the Railroad Commission of Louisiana, upon my oath, state that I am authorized to make this affidavit; that I have read the foregoing petition, and that the allegations of fact set forth therein are true, and the allegations made upon information and belief I believe to be true.

SHELBY TAYLOR.

Sworn to and subscribed before me, the undersigned authority, this, the 7th day of February, 1913, A. D.

[SEAL.] R. H. FLOWER,
Assistant Secretary of State, Parish of East Baton Rouge, City of Baton Rouge, State of Louisiana.

347 *Resolution.*

On motion of Commission- Taylor, duly seconded, the following resolution was unanimously adopted:

"Whereas, The Commission has learned that various suits have been filed in the Commerce Court at Washington, D. C., by the so-called 'tap lines' operating in the State of Louisiana; and,

"Whereas, The following so-called 'tap lines,'

Mansfield Railway & Transportation Company,
Woodworth & Louisiana Central Railway Company, Limited,
Victoria, Fisher & Western Railroad Company, and
Louisiana & Pacific Railway Company

are among those 'tap lines' which have filed such suits, and which railways are duly chartered under the laws of the State of Louisiana as common carriers, and which, in fact, operating as common carriers in the said State, are under the supervision and control of the Railroad Commission of Louisiana; and,

"Whereas, The said suits in the Commerce Court have been filed for the purpose of contesting the orders of the Interstate Commerce Commission, declaring that, in substance, such 'tap lines' are not common carriers as to the logs and lumber which they transport for their proprietary lumber companies; and,

"Whereas, This Commission is of the opinion that this decision of the Interstate Commerce Commission is an unconstitu-
348 tional interference with the rights of the said railway companies to receive revenue out of joint through rates for the transportation of lumber and logs over their lines in Louisiana destined to interstate points; and,

"Whereas, It is the opinion of this Commission that the decision of the Interstate Commerce Commission in the 'tap line case' is detrimental to the interests of the shippers of the State of Louisiana, and deprives the shippers, served by said railway companies, of the right

to ship logs and lumber over said railways at reasonable joint through rates, and deprives the said railway companies from receiving a reasonable division out of joint through rates, which division of rates is the principal source of revenues of such carriers; and,

"Whereas, If the said companies are not permitted to receive divisions of joint through rates on lumber and logs, they will be deprived of revenues for transporting the said logs and lumber, thereby rendering it impossible to meet the operating expenses and fixed charges, and consequently preventing any extension, or hope of extension, or improvement, or hope of improvement of such railways:

Therefore, be it resolved, That the Railroad Commission of Louisiana, in behalf of the shippers of the State of Louisiana, hereby authorizes and instructs its attorney, the Assistant Attorney-General of Louisiana, to intervene in the Commerce Court in the cases filed by the railway companies, hereinabove named, in support of their petitions, and to aid and assist, in every way possible, in having the Court recognize the said railway companies as common car-
349 riers of interstate shipment of logs and lumber, as they are recognized to be common carriers of all other classes and kind of shipment."

I, Henry Jastremski, Secretary of the Railroad Commission of Louisiana, do hereby certify the above and foregoing as a true and correct copy of the Resolution adopted by the Railroad Commission of Louisiana at the general session held in the city of New Orleans on January 31, 1913.

In testimony whereof, I have hereunto affixed my signature and the seal of the Railroad Commission of Louisiana, at Baton Rouge, La., on this 7th day of February, 1913.

[SEAL.] HENRY JASTREMSKI, *Secretary.*

No. 90.

LOUISIANA & PACIFIC RAILWAY COMPANY et al.
v.
THE UNITED STATES OF AMERICA et al.

Order of Intervention.

(Entered February 10, 1913.)

The Railroad Commission of Louisiana having filed and presented its petition for intervention herein and it appearing to the Court from the said petition that the petitioner has shown that it has sufficient interest in the proceedings herein to entitle it to intervene and be heard by its counsel:

It is ordered, That the Railroad Commission of Louisiana be and

it is hereby allowed to intervene and become a party intervener and to be heard by its counsel in all the proceedings had and taken in the above entitled cause, the Court reserving the right at all times hereafter to enter such other and further order or orders concerning the right of the said intervener to appear and be heard herein, and to enter such rule or rules concerning the pleadings of the said intervener and its course of procedure, as to the court shall seem wise and proper.

By the Court:

MARTIN A. KNAPP,
Presiding Judge.

No. 90.

LOUISIANA & PACIFIC RAILWAY COMPANY et al., Petitioners,
v.
THE UNITED STATES OF AMERICA et al., Respondents.

Petition for Leave to Intervene.

(Filed February 10, 1913.)

Come now The Atchison, Topeka & Santa Fe Railway Company and the Gulf, Colorado & Santa Fe Railway Company, and say that they were parties to the original proceeding before the Interstate Commerce Commission, out of which the above entitled litigation springs, and that they are interested directly and financially in any disposition of this cause, and therefore they ask an order allowing them to intervene and to be heard in all proceedings in said cause, and to have the benefit of all orders and decrees that may be entered herein.

Your intervening petitioners further state that they are common carriers by railroad with rails extending from extensive lumber producing territory to various markets; that the milling industries located upon the railroads of intervening petitioners are competitors with the milling industries located upon the line- of petitioners; that the through rates applying for the carriage of lumber from the industries located upon the lines of intervening petitioners and the milling industries located upon the lines of petitioners are known as the blanket system of rates.

352 Your intervening petitioners further state that they make no allowance or division of through rates to tap lines or to milling industries on the lines of intervening petitioners, and as a result the milling industries located upon the lines of intervening petitio ers are required to pay in full the lawfully published tariff rate on lumber. Your intervening petitioners further state that the allowance to said petitioners of a division of the through rate will give said petitioners an undue advantage over the milling industries

located upon the lines of intervening petitioners, and will constitute an unjust discrimination against such milling industries located upon the lines of intervening petitioners, and will be in violation of the Interstate Commerce law.

Your intervening petitioners further state that any allowance by the respondents herein will not be in truth an allowance to a railroad for the service of transportation of lumber but on the contrary will be an allowance to the milling industry for an operation incident to the manufacture of lumber, and will constitute a device for the payment of a rebate to a shipper, in violation of the Interstate Commerce Law.

LOUISIANA & PACIFIC RAILWAY COMPANY et al., Petitioners,
vs.
THE UNITED STATES OF AMERICA et al., Respondents; INTERSTATE COMMERCE COMMISSION et al., Interveners.

Order.

(Entered February 24, 1913.)

The above entitled cause came on for hearing before the Court on February 10, 1913, at Washington, D. C., upon the motion of the United States to dismiss for want of jurisdiction, in open court made; and the Court having given the arguments of counsel due consideration, now, on the 24th day of February, 1913,

It is ordered and adjudged that said motion be, and the same is hereby, denied, the Court being of opinion that the order complained of is an order the validity of which this Court has jurisdiction to determine at the suit of the petitioners. The Court, however, in so deciding, in no way passes upon the merits of the case presented by the petition filed.

By the Court:

Order Designating Judge Carland to Hear Testimony.

(Entered March 5, 1913.)

In said cause it is ordered that the Honorable John E. Carland, Associate Judge of this court, be and he is hereby designated to hear testimony and to rule upon the admissibility of evidence.

MARTIN A. KNAPP,
Presiding Judge.

357 *Agreement, October* 31, 1906, *Louisiana Western Railroad Company, Louisiana & Pacific Railway Company, Hudson River Lumber Company, King-Ryder Lumber Company, Calcasieu Long Leaf Lumber Company, and Long-Bell Lumber Company.*

(Filed in Clerk's Office March 22, 1913.)

(Copy of this agreement is attached to the petition herein as Exhibit A.)

Agreement, October 13, 1906, *Colorado Southern, New Orleans & Pacific Railroad Company, St. Louis & San Francisco Railroad Company, Louisiana & Pacific Railway Company, King-Ryder Lumber Company, Hudson River Lumber Company, Calcasieu Long Leaf Lumber Company, and Long-Bell Lumber Company.*

(Filed in Clerk's Office, March 22, 1913.)

(Copy of this agreement is attached to the petition herein as Exhibit B.)

358 United States Commerce Court. Filed Mar. 22, 1913. G. F. Snyder, Clerk.

This agreement, made and entered into this 31st day of October, Nineteen Hundred and Six, by and between the Louisiana and Pacific Railway Company, party of the first part, and the Lake Charles and Northern Railroad Company, party of the second part, both of said corporations being organized under the laws of the State of Louisiana—

359 Witnesseth: The said party of the first part is the owner of a line of railway from De Ridder, Louisiana, to a certain point on the Calcasieu River at or near the Northwest corner of Section Ten, Township Nine, Range Eight, in Calcasieu Parish, State of Louisiana. That part of said line of road lying between Ramsay Junction and said point on Calcasieu River has been completed, but is a narrow gauge road. Of the remainder of said line of road, that is, that portion lying between De Ridder and Ramsay Junction, a portion has been completed and the other portion is now being constructed.

The said first party also owns a right of way for a railroad from Lake Charles to a point on said narrow gauge road near the northeast corner of Section Thirty-two, Township Eight, Range Eight, in said Parish and State.

The said second party desires to purchase said first party's said line of road from De Ridder to said point on the Calcasieu River and said right of way from Lake Charles to the junction with said narrow gauge road in said Section Thirty-two; and said first party is willing to sell its said road and said right of way, on condition

that it can have the joint use of said line of road from De Ridder to Lake Charles, which condition is not objectionable to said second party.

Now, therefore, in consideration of the foregoing premises, and the covenants and agreements to be kept and performed by the parties hereto, respectively, as herein set forth, the said parties do hereby agree and bind themselves as follows:

1. The said first party agrees to sell and said second party agrees to buy said line of railroad from De Ridder to said point on the Calcasieu River and said right of way from Lake Charles to said junction point in Section Thirty-two.

The purchase price of said property shall be a sum equal to Fifteen Thousand ($15,000.00) Dollars, (which is the agreed value of said narrow gauge portion of said line of road, and said right of way from Lake Charles to the aforesaid junction point), plus the total actual cost of that portion of said line of railroad between De Ridder and Ramsay Junction, including the cost of all yards, round-houses, section-houses, tool-houses, depots, shops, right of way, grading, ties, rails, etc., and other appurtenances—such cost to be ascertained by reference to the books of said party of the first part, to be verified by the engineers of the parties hereto. Of such purchase price, the said second party shall pay said first party the sum of Ninety Thousand ($90,000.00) Dollars, at the time of the execution and delivery of this agreement; and the balance shall be paid monthly as the work of construction progresses, on estimates to be furnished by the engineer of the said first party, and verified by the engineer of the said second party, the final amount to be ascertained and determined from the records of the said first party by the engineers of both parties.

2. The said property which the said first party agrees to sell, and which the said second party agrees to buy, as above set forth, shall include the said right of way from Lake Charles to the said
360 junction of the said right of way with the narrow gauge portion of said road in said Section Thirty-two, and the right of way, roadbed, tracks, yards, depots, round-houses, section-houses, tool-houses, shops, and everything pertaining to the line of road of said first party from De Ridder to said point on the Calcasieu River in Section Ten, except the Thirty and Thirty-five pound steel on the narrow gauge portion of said line of road, and except the rolling stock of said first party.

3. The said first party shall, as soon as can reasonably be done, but not later than July 1, 1907, complete the construction of the roadbed, tracks and side-tracks of said portion of said line of road between De Ridder and Ramsay Junction, putting same in the condition usual for roads of similar character, and shall on the completion of said line of road convey by good and sufficient deed to said second party the property contracted to be sold as herein set forth.

4. The said second party shall, at its own cost and expense, as soon as can reasonably be done (it being the hope and expectation of both parties that the work will be completed not later than July 1, 1907), change to a standard gauge road that part of the narrow gauge por-

tion of said road lying between Ramsay Junction and said junction in said Section Thirty-two of said right of way to Lake Charles, and also build from said last named junction to Lake Charles a standard gauge road and connect the same at Lake Charles with the line of the Louisiana Western Railroad Company, and also with the Mills of the Calcasieu Long Leaf Lumber Company, situated near Lake Charles, putting all of said road in an operating condition usual for roads of similar character.

5. The said second party shall, at its own cost and expense, deliver to said first party, at such point along the line of said railway as may be designated by said first party, the thirty and thirty-five pound steel now in the track of the narrow gauge portion of said line of railroad.

6. Immediately upon the conveyance by said first party to said second party of the property herein contracted to be sold, the said second party shall execute and deliver to said first party a contract giving said first party joint trackage rights over the entire line of railroad above mentioned, except that part thereof lying between said point on the Calcasieu River in Section 10 and said junction point in Section Thirty-two.

Said trackage agreement shall vest in said first party trackage rights over the said line of railroad from De Ridder to Lake Charles, with all the appurtenances thereto, for a period of Twenty Years from the date of this contract, for such trains as said first party may desire to operate over said road, provided that the number of trains operated by said first party over said line of railroad shall not materially interfere with the operation of trains by said second party.

The details of the operation of trains by said first party over said line of railroad shall be arranged by the Operating Departments of the said first and second parties, and shall be according to the usual and customary rules prevailing with railroads under similar circumstances; and for the use of said railroads as aforesaid, said first
361 party shall pay to said second party a rental equal to twenty-five cents per train mile for every train that shall be run over said road by said first party during the existence of this contract. Said rental shall be ascertained and fixed by reference to the records to be kept by said second party, and said second party shall keep complete and accurate record of trains that shall be run over said line of railroad during the existence of this contract, which record shall be open to the inspection of said first party.

Payments of rental shall be made monthly and on or before the Tenth day of each month.

The term "train," as used in this provision of this contract, shall at all times be considered and construed to mean an engine pulling one or more cars of any kind, except an engine pulling a wrecking outfit, and no charge shall be made for any engine running over said road when not pulling one or more cars.

The mileage for which said first party shall be required to pay, shall not include the movements of trains within the switching limits of any station, in placing cars or doing other similar work, nor shall it include the moving of logging trains over that part of

said line between De Ridder and the junction of the De Ridder Branch, which is about three-quarters of a mile in length, or the movements of logging trains over that portion of said line lying between Bonami and the junction of the Bonami branch. Map hereto attached and made part hereof will more fully define the limits referred to.

7. Said second party shall at all times during said period of Twenty years, at its own cost and expense, keep said line of railroad and its appurtenances in such operating condition as is usual with lines of railroad of similar character; and it shall, at its own cost and expense, put in and maintain in operating condition such as is usual with lines of railroad of similar character, such sidings as may be reasonably necessary, whenever a new mill may be built contiguous to said line of railroad.

8. The said first party shall have the right to connect said line of railroad over which it is to have trackage rights with any logging railroad or railroads that it may see proper to build at any time during the said twenty years from any point on said line to serve any near-by lumber mills.

9. In the event that any controversy should at any time arise between the parties hereto, and they shall themselves be unable to adjust the same, either party may demand an arbitration and select one arbitrator; and the other party shall, within Ten days' notice of the selection of such arbitrator by the other party, itself select an arbitrator, notifying the other party of that fact; and within ten days thereafter the two arbitrators thus selected shall, if they cannot agree upon the adjustment of the matter in controversy; select a third arbitrator, and the decision of any two of said three arbitrators shall be binding upon the parties hereto.

In the event that the parties hereto shall each select an arbitrator and such arbitrators shall fail to select a third arbitrator within ten days from the date of their selection, then the parties hereto
362 shall select new arbitrators who shall proceed as hereinabove provided. In the event that any third arbitrator selected shall refuse to act, the two arbitrators acting shall select another third arbitrator and so on.

10. This agreement with all things pertaining thereto is entered into on the faith of the consummation and performance of a certain agreement of October 31, 1906, between the Louisiana Western Railroad Company, the said Louisiana and Pacific Railway Company, the Hudson River Lumber Company, the King-Ryder Lumber Company, the Calcasieu Long Leaf Lumber Company, and the Long-Bell Lumber Company, for division of freights on joint business and for a routing of a proportion of the products of said lumber companies as provided in said agreement.

11. This agreement shall commence and become effective on the date hereof, and all the terms and conditions, rights and obligations hereof, shall inure in favor of and be binding upon the successors, assigns and lessees of each of the parties hereto.

In witness whereof, each party hereto has caused this agreement

to be signed by its proper officer, and its corporate seal to be affixed and attested, the day and year first above written.

United States Commerce Court. Filed Mar. 22, 1913. G. F. Snyder, Clerk.

Joint Trackage Agreement between Louisiana & Pacific Railway Company and Lake Charles & Northern Railroad Company.

This agreement, made and entered into this 21st day of February, 1908, by and between the Louisiana & Pacific Railway Company (hereinafter called the Louisiana Company), a corporation of the State of Louisiana, herein represented by C. B. Sweet, its Vice President, duly authorized by a resolution of its Board of Directors, adopted November 26, 1907, a certified copy of which is hereto annexed; and the Lake Charles & Northern Railroad Company (hereinafter called the Lake Charles Company), a corporation of the State of Louisiana, herein represented by G. W. Nott, its President, duly authorized by a resolution of the Board of Directors of the Lake Charles Company, adopted February 21, 1908, a certified copy of which is hereto annexed: Witnesseth:

363 Whereas, the Lake Charles Company owns a line of railway in the Parish of Calcasieu, extending from De Ridder, Louisiana, to a connection with the Louisiana Western Railroad Company at Lake Charles, Louisiana, a distance of approximately forty-five (45) miles, together with railroad yards, depots, switches, section-houses and appurtenances, said line of railway being hereinafter designated as "Joint Line," the same being now completed from De Ridder, Louisiana, to Fulton, Louisiana, a distance of approximately twenty-six (26) miles, and it is expected that the Lake Charles Company will complete at an early date that part of the "Joint Line" between Fulton, Louisiana, and a connection with the tracks of the Louisiana Western Railroad Company at Lake Charles, Louisiana—being the property acquired by the Lake Charles Company from the Louisiana Company by Act of Sale before Felix J. Puig, Notary Public, passed at New Orleans, Louisiana, on the 21st day of February, 1908; and,

Whereas, the Lake Charles Company has heretofore agreed to grant to the Louisiana Company joint trackage rights over the "Joint Line" as herein defined, and it is deemed advisable now to execute a contract for such trackage rights,

Now, therefore, it is mutually agreed between the parties hereto as follows, to-wit:

1. The Lake Charles Company grants and leases to the Louisiana Company during the continuance of the term hereinafter mentioned, and upon the terms and conditions and subject to the limitations hereinafter expressed, the right to use jointly with the Lake Charles Company the tracks of the "Joint Line" for the operation of the trains, engines and cars of the Louisiana Company, hereby conferring upon the Louisiana Company joint trackage rights over the "Joint Line" for a period of twenty years from October 31st, 1906, for such trains as the Louisiana Company may desire to operate over said "Joint Line," provided the operation of trains so operated by it shall not materially interfere with the operation of trains by the Lake Charles Company or under its authority.

2. The details of the operation of trains by the Louisiana Company over the "Joint Line" shall be arranged by the Operating Departments of the parties hereto, and shall be according to the usual and customary rules prevailing with railroads under similar circumstances (e. g. the supervision, management and operation of the "Joint Line" shall be under the exclusive direction and control of the Lake Charles Company, but all time cards, rules, regulations or orders for the movement of engines, trains and cars upon the "Joint Line" shall be reasonable, fair and just, and in accordance with the usual and customary rules prevailing with railroads under similar circumstances. All passenger trains shall be given preference over other trains, and the trains of both parties shall be given equal dispatch according to their class).

The Station and Administrative expenses of the "Joint Line" shall be apportioned between the parties hereto, as follows: Before
364 the completion of the operation of the "Joint Line" to Lake Charles, Twenty-five per cent (25%) to the Lake Charles Company, and seventy-five per cent (75%) to the Louisiana Company; after the completion and operation of the "Joint Line" to Lake Charles, Forty per cent (40%) to the Lake Charles Company, and Sixty per cent (60%) to the Louisiana Company.

Said station expenses cover and apply to the stations already established, which are to be maintained as long as they are necessary for the business of either party hereto, and such other stations as may hereafter be established on the "Joint Line."

Administrative expenses shall include the salary of the Superintendent and his office force and expenses, including dispatchers; and Station expense shall include the salaries of Station agents and other station expenses; but it is understood that for service rendered by the Lake Charles, Louisiana, agency, the Louisiana Company agrees to pay the lump sum of One Hundred Dollars ($100.00) per month in lieu of its proportion of station expenses above mentioned, and in addition thereto to furnish necessary stationery and supplies for the transaction of its own business at said station.

All joint employés shall be employed by the Lake Charles Company but any such employé shall be discharged at the request of

the General Manager or any other general officer of the Louisiana Company acting for it.

said joint employés shall perform the customary services incidental to their employment for both parties hereto and keep such accounts and make such reports as may be required of them.

3. The Lake Charles Company shall at all times during the term of this agreement, at its own cost and expense, keep the "Joint Line" in such operating condition as is usual with lines of railroad of similar character; and it shall at its own cost and expense, put in and maintain in operating condition, such as is usual with lines of railroad of similar character, such sidings as may be reasonably necessary whenever a new mill may be built contiguous to the "Joint Line."

4. The Louisiana Company shall have the right to connect the "Joint Line" with any logging railroad or railroads that it may see proper to build at any time during the term of this agreement from any point on the "Joint Line" to serve any nearby lumber mills.

5. The Louisiana Company hereby covenants and agrees that it will pay to the Lake Charles Company at its Treasurer's office in New Orleans, Louisiana, at the times and in the manner hereinafter provided during the term of this agreement, for the aforesaid use of the "Joint Line," a rental equal to twenty-five (25) cents per train mile for every train that shall be run over the "Joint Line" by the Louisiana Company during said term, which rental shall be ascertained and fixed by reference to the records to be kept by the Lake Charles Company, as well as the administrative and station expenses hereinabove provided for. The last named Company shall keep complete and accurate record of trains that shall be run over the "Joint Line" during the existence of this agreement, and such record shall be open to the inspection of the Louisiana Com-
365 pany. Payments of said rental and administrative and station expenses shall be made monthly on or before the tenth day of the following month for all mileage due account of trains run during the preceding month and for all administrative and station expenses of the preceding month.

The term train as used in this contract shall be considered and construed to mean an engine pulling one or more cars of any kind, except an engine pulling a wrecking outfit, and no charge shall be made for any engine running over the "Joint Line" when not pulling one or more cars.

The mileage for which the Louisiana Company shall be required to pay shall not include the movement of trains within the switching limits of any station, in placing cars or doing other similar work, nor shall it include the movement of logging trains over that part of the "Joint Line" between De Ridder and the junction of the De Ridder branch, which is about three quarters of a mile in length, nor the movement of logging trains over that portion of the said line between Bonami and the junction of the Bonami branch.

It is understood that cars handled solely on switching tracks at De Ridder, Fulton and Bonami to other line connections at these points on which the Lake Charles Company would otherwise receive

no trackage revenue, the Louisiana Company will pay the Lake Charles Company one train mile, or twenty-five (25) cents for each car so handled to such connections.

6. The Louisiana Company hereby assumes the risk of all loss, damage or injury which shall in any manner occur in or upon any tracks, building or premises, the use whereof is hereby granted, whether to property of the Louisiana Company or to property in its custody or to its passengers or to its employés, and which third persons or the property of third persons shall suffer by reason of the movement of any engine, car or train of the Louisiana Company, in all respects as if the Louisiana Company had then been in the exclusive use and control of such track, building or premises, excepting only such loss, damage or injury as shall be caused by the negligence of the employés solely of the Lake Charles Company; and excepting only, as aforesaid, the Louisiana Company hereby agrees to save the Lake Charles Company harmless from all such loss, damage and injury, from all liability and claim therefor, and from all consequent costs and expenses. Each party hereto hereby agrees to save the other party harmless from all loss, damage or injury caused by the negligence of its own sole employés, from all liability and claim therefor, and from all consequent costs and expenses.

The parties hereto expressly covenant and agree that in case of collision between their respective engines, cars or trains while on the "Joint Line," the party whose employé or employés are alone in fault shall be solely responsible for and shall settle and pay for the entire loss and damage caused thereby, and shall save the other party harmless therefrom; and that in case any such collision is caused by the fault of the employés of both parties or by the fault of
366 any joint employé or employés, or in case the cause of the collision is so concealed that it cannot be determined whose employés are at fault, each party shall bear and pay all the loss, damage or injury which its own property or property in its custody or its employés or passengers may have suffered in consequence thereof.

All liability for damages to persons or property accruing in connection with the maintenance or operation of the "Joint Line" from any cause except as herein otherwise provided shall be apportioned and paid by the parties hereto in the same proportion as has been hereinabove provided for the apportionment of administrative and station expenses.

7. In the event any controversy should at any time arise between the parties hereto and they shall themselves be unable to adjust the same, either party may demand arbitration, and may select one arbitrator; and the other party shall, within ten days after notice of the selection of such arbitrator by the other party, itself select an arbitrator, notifying the other party of that fact; and, within ten days thereafter, the two arbitrators then selected, shall, if they cannot agree upon the adjustment of the matter in controversy, select a third arbitrator, and the decision of any two of said three arbitrators shall be binding upon the parties hereto. In the event that

the parties hereto shall each select an arbitrator and such arbitrators shall fail to select a third within ten days from the date of their selection, then the parties hereto shall select new arbitrators who shall proceed as hereinabove provided. In the event that any third arbitrator selected shall refuse to act, the two arbitrators selected shall select another third arbitrator, and so on.

8. It is understood at the signing of this agreement that all of the tracks known as "Joint Line," and appurtenances, have been completed between and including the stations of De Ridder and Fulton, but that the "Joint Line" between Fulton and Lake Charles is under course of construction, but it is expected that the Lake Charles Company will complete at an early date that portion of the "Joint Line" between Fulton, Louisiana, and a connection with the tracks of the Louisiana Western Railroad Company at Lake Charles, Louisiana, at which time this contract of itself becomes effective over the entire "Joint Line."

9. Until the completion of the entire line referred to in Article 8, this contract is to apply as to payments of mileage, administrative and station expenses to the completed portion between Fulton and De Ridder. During the construction of the line between Fulton and Lake Charles, the Lake Charles Company agrees to keep the narrow gauge tracks which temporarily remain on the broad gauge ties in suitable operating condition, for which they are to receive compensation from the Louisiana Company at the regular train mile rates provided for in this agreement.

10. The payment of station and administrative expenses hereinbefore provided to be paid by the Louisiana Company shall cover only such period of time as said Louisiana Company shall have the right to operate trains over said "Joint Line" as a common carrier,
367 and if for any reason said Louisiana Company shall cease to have such right, such proportionate payments for "station and administrative expenses" by said Louisiana Company shall cease; provided, however, the right to operate logging trains shall not thereby terminate; and for the operation of such logging trains, the Louisiana Company shall pay the twenty-five (25) cents per train mile hereinbefore mentioned.

11. It is understood and agreed that all the terms and conditions of this contract shall bear upon and inure to the benefit of the successor or assigns of either or both of the parties hereto.

This done and signed, in duplicate, at New Orleans, Louisiana, on the 21st day of February, 1908.

LAKE CHARLES & NORTHERN RAILROAD COMPANY,

By —— ——, *President.*

Attest:

—— ——, *Secretary.*

LOUISIANA & PACIFIC RAILWAY COMPANY,

By —— ——, *Vice-President.*

Attest:

—— ——, *Secretary.*

Whereas, at a meeting of the Board of Directors of the Lake Charles & Northern Railroad Company, held at its office in the City of New Orleans on the 30th day of October, 1906, it was resolved that this Company enter into an agreement with the Louisiana & Pacific Railway Company to purchase that Company's line of railway from De Ridder, Louisiana, to a certain point on the Calcasieu River, Calcasieu Parish, State of Louisiana, both the completed and uncompleted portions thereof, as well as the right of way for a railroad from Lake Charles, Louisiana, together with right of way, road bed, tracks, yards, etc., and to enter at the same time into an agreement to give the Louisiana & Pacific Railway Company joint trackage rights over said railroad upon terms and conditions therein stated; and,

Whereas, the President and Secretary of this Company, being duly authorized by said resolution, did, on October 31, 1906, enter into an agreement with the Louisiana & Pacific Railway Company of the tenor and effect hereinabove recited; and,

Whereas, in accordance with the terms of said resolution and said agreement of October 31, 1906, it is proper and necessary for this Company to execute the contract for trackage rights therein contemplated.

Resolved, that the President and Secretary of this Company be and they are hereby authorized and directed to sign and execute an agreement for and in the name of this Company with the Louisiana & Pacific Railway Company, conferring joint trackage rights on the said railroad from De Ridder to Lake Charles, said officers being hereby vested with full discretion in the premises as to form of said contract and the proper steps to be taken to carry into effect the same.

368 *Certified Copy of Minutes of Meeting of Board of Directors of the Louisiana & Pacific Railway Company Authorizing Joint Trackage Agreement.*

At a special meeting of the Board of Directors of the Louisiana & Pacific Railway Company, a Louisiana corporation, held at the office of said Company at Bonami, Louisiana, on the 26th day of November, 1907, at the hour of 2:30 p. m., all of said Directors having consented that said meeting be held and being present and participating, the following, among other proceedings, were had, to-wit:

"Upon motion of B. H. Smith, the following resolution was introduced and adopted by unanimous vote:

"Whereas, at a meeting of the Board of Direcors of the Louisiana & Pacific Railway Company, held at its office in Bonami, Louisiana, on the 19th day of October, 1906, a resolution was unanimously adopted authorizing an agreement to be made with the Lake Charles & Northern Railroad Company and sell the Louisiana & Pacific Railway Company's line of railway from De Ridder, Louisiana, to a certain point on the Calcasieu River, Calcasieu Parish, State of Louisiana, both the completed and uncompleted portions thereof, as well as the right of way for a railroad from Lake

Charles, Louisiana, together with the right of way, roadbed, tracks, yards, etc., and to enter at the same time into an agreement to acquire joint trackage rights from said Lake Charles & Northern Railroad Company upon terms and conditions therein stated; and,

"Whereas, the President and Secretary of this Company, being duly authorized by said resolution, did on October 31, 1906, enter into an agreement with the Lake Charles & Northern Railroad Company of the tenor and effect hereinabove recited; and

"Whereas, in accordance with the terms of said resolution and said agreement of October 31, 1906, it is proper and necessary for this Company to execute the contract for trackage rights therein contemplated;

"Now, therefore, be it resolved, that the Vice President and Secretary of this Company be and they are hereby authorized and directed to sign and execute an agreement for and in the name of this Company with the Lake Charles & Northern Railroad Company acquiring joint trackage rights on said railroad from De Ridder to Lake Charles, said officers being hereby vested with full discretion in the premises as to the form of said contract and the proper steps to be taken to carry the same into effect."

STATE OF LOUISIANA,
Parish of Orleans:

I, B. H. Smith, Secretary of the Louisiana & Pacific Railway Company, a Louisiana corporation, do hereby certify that the above and foregoing is a full, true and correct copy of a resolution adopted at a meeting of the Directors of the Louisiana & Pacific Railway Company, a Louisiana corporation, held at the office
369 of said Company at Bonami, in the Parish of Calcasieu, State of Louisiana; that said meeting was duly, and regularly called in accordance with the provisions of the by-laws of said Company; that before said meeting was held the written consent of each and all the Directors of said Company for the holding of said meeting had been obtained; that all the Direcors of said Company were present and participated therein, and consented that said resolution be passed; that I am Secretary of the Louisiana & Pacific Railway Company at the time of the signing of this certificate.

In testimony whereof, witness my hand and the seal of said Company hereto affixed this 21st day of February, A. D. 1908.

——— ———, *Secretary.*

Agreement Between Louisiana & Pacific Railway Company and Hudson River Lumber Company.

United States Commerce Court. Filed Mar. 22, 1913. G. F. Snyder, Clerk.

This agreement, made and entered into this 2nd day of March, 1908, by and between the Louisiana & Pacific Railway Company (hereinafter called the Louisiana Company) a corporation of the

State of Louisiana, herein represented by R. A. Long, its President, and the Hudson River Lumber Company, (hereinafter called the Lumber Company), a corporation of the State of Missouri, herein represented by C. B. Sweet, its Vice-President, witnesseth:—

Whereas, the Louisiana Company owns or controls and operates a line of railway in the Parish of Calcasieu, extending from Lake Charles, Louisiana, to De Ridder, Louisiana, together with railroad yards, depots, switches, and all other appurtenances, together with connections at Lake Charles, with the Louisiana Western Railroad Company, the Kansas City Southern Railway Company, and the St. Louis, Watkins & Gulf Railway Company, at Fulton with the Colorado Southern, New Orleans & Pacific Railroad Company, at Bonami with the Kansas City Southern Railway Company, and at De Ridder with the Kansas City Southern Railway Company and the Gulf Colorado & Santa Fe Railroad Company, and

Whereas, the Louisiana Company owns a line of railroad connected with said main line from De Ridder to Lake Charles, as aforesaid, at De Ridder Junction, extending in a southeasterly direction a distance of twelve (12) miles, more or less, to Chitto and beyond, also approximately eleven (11) miles of logging spurs beyond Chitto; and,

Whereas, the Lumber Company owns and operates a saw mill at De Ridder, Louisiana, and owns a large amount of timber land with timber thereon along the line of railroad of said Louisiana Company, which it desires to transport to said mill at De Ridder and there convert the same into lumber, and,

Whereas, said lumber company has been much hampered because of lack of adequate railway facilities and accommodations for
370 transporting its logs to its said mill and for transporting the product of its said mill to desirable market, and

Whereas, it is very desirable that the Louisiana Company should acquire the tonnage which the said Lumber Company is in position to furnish,—

Now therefore, it is mutually agreed between the parties hereto, as follows, to-wit:—

1. The Louisiana Company shall for the period and upon the terms, limitations and conditions hereinafter expressed furnish to the Lumber Company all the necessary engines, cars and other appurtenances and equipment (hereinafter for brevity and convenience called equipment) for transporting the products of said Lumber Company from its Lumber camps to its mills at De Ridder, Louisiana.

2. The Louisiana Company shall place the said equipment upon the spur tracks at the Junction point of said spur tracks with main line of said Louisiana Company at the various Lumber camps along the main line of said Louisiana Company as directed by said Lumber Company.

3. The movement of said equipment and the placing thereof on said spurs shall be made in accordance with an agreement hereafter to be agreed upon between the Superintendent of said Louisiana Company and the Superintendent of said Lumber Company, in such

manner and upon such condition as shall be mutually agreeable to each.

4. The said Lumber Company shall take charge of said equipment and manage and control the same immediately upon its being placed upon said spurs, as hereinabove provided, and shall load the products of said lumber Company upon said equipment and return the same to the main line of said Louisiana Company, there to be taken in charge by the employees of said Louisiana Company, and transported to the mills of said Lumber Company.

5. The Lumber Company shall receive said cars from the Louisiana Company at the places aforesaid subject to the rules of the Master Car Builders' Association as far as they are applicable to the conditions and circumstances of said companies and the expense of any repairs caused or made necessary by said Lumber Company shall be borne by said Lumber Company.

6. The Louisiana Company shall furnish to said Lumber Company all steel rails, of suitable class, necessary to make any extension or extensions to any of the spurs of said Louisiana Company, said Lumber Company to furnish ties and bear all expense connected with the construction thereof.

7. In the event that it becomes necessary in order to make repairs upon any of said logging equipment, to take the same into De Ridder, said Lumber Company shall have the right to take said logging equipment, with its own crews, into De Ridder over the line of said Louisiana Company without any additional expense to said Lumber Company; the movement of such equipment to be made after first obtaining permission from the Superintendent of the Lou-
371 isiana Company, who is hereby required to furnish this permission when requested.

8. The Lumber Company hereby agrees that it will be responsible to the Louisiana Company and will hold it harmless and indemnify it against all loss and damage to persons or property caused by the operation of any of said equipment while being operated by or in possession of said Lumber Company.

9. During the term of this agreement the Lumber Company will ship, or cause to be shipped, over the line of railroad of the Louisiana Company to the terminus of said line or to the connection of said line of the Louisiana Company with other railroads, there to be delivered to connection with other carriers, one hundred (100%) per cent of the aggregate products of its mill or mills as are now located or may hereafter be located on the Line of said Louisiana Company, or any of its branches, to be carried by the Louisiana Company at the regular published tariff rates of said Company and filed with the Interstate Commerce Commission.

10. In the event any controversy should at any time arise between the parties hereto, and they shall themselves be unable to adjust the same, either party may demand arbitration, and may select one arbitrator; and the other party shall, within ten days after notice of the selection of such arbitrator by the other party, itself select an arbitrator, notifying the other party of that fact; and within ten days thereafter, the two arbitrators then selected, shall, if they cannot

agree upon the adjustment of the matter in controversy, select a third arbitrator, and the decision of any two of said three arbitrators shall be binding upon the parties hereto. In the event that the parties hereto shall each select an arbitrator and such arbitrators shall fail to select a third within ten days from the date of their selection, then the parties hereto shall select new arbitrators, who shall proceed as hereinbefore provided. In the event that any third arbitrator selected shall refuse to act, the two arbitrators selected shall select another third arbitrator, and so on.

11. It is understood and agreed that this contract shall be binding upon the parties hereto for a period of eighteen (18) years, and that all the terms and conditions of this agreement shall bear upon and inure to the benefit of and be obligations upon the successors and assigns of either or both of the parties hereto.

This done and signed, in duplicate, at De Ridder, Louisiana, the day and year first above written.

United States Commerce Court. Filed Mar. 22, 1913. G. F. Snyder, Clerk.

Agreement Between Louisiana & Pacific Railway Company and King-Ryder Lumber Company.

This agreement, made and entered into this 2nd day of March, 1908, by and between the Louisiana & Pacific Railway Company (hereinafter called the Louisiana Company), a corporation of the State of Louisiana, herein represented by R. A. Long, its President, and the King-Ryder Lumber Company (hereinafter called the Lumber Company), a corporation of the State of Missouri, herein represented by C. B. Sweet, its Vice-Pres., witnesseth:

Whereas, The Louisiana Company owns or controls and operates a line of railroad in the Parish of Calcasieu, extending from Lake Charles, Louisiana, to De Ridder, Louisiana, together with railroad yards, depots, switches, and all other appurtenances, together with connections at Lake Charles with the Louisiana Western Railroad Company, the Kansas City Southern Railway Company and the St. Louis, Watkins & Gulf Railway Company, at Fulton with the Colorado Southern, New Orleans & Pacific Railroad Company, at Bonami with the Kansas City Southern Railway Company, and at De Ridder with the Kansas City Southern Railway Company, and the Gulf, Colorado & Santa Fe Railroad Company; and

Whereas, the Louisiana Company owns a line of railroad connected with said main line from De Ridder to Lake Charles, as aforesaid, at Lilly Junction, extending in a Southeasterly direction a distance of 7.4 miles, more or less, to Walla,—also approximately fifteen (15) miles of logging spurs beyond Walla; and

Whereas, The Lumber Company owns and operates a saw mill at Bonami, Louisiana, and owns a large amount of timber land with timber thereon along the line of railroad of said Louisiana Company, which it desires to transport to said mill at Bonami, and there convert the same into lumber; and

Whereas, Said Lumber Company has been much hampered because of the lack of adequate railway facilities and accommodations for transporting its logs to its said mill and for transporting the products of its said mill to desirable markets; and

Whereas, It is very desirable that the Louisiana Company should acquire the tonnage which the said Lumber Company is in position to furnish,—

Now, therefore, It is mutually agreed between the parties hereto, as follows, to-wit:

1. The Louisiana Company shall for the period and upon the terms, limitations, and conditions hereinafter expressed furnish to the Lumber Company all the necessary engines, cars and other appurtenances and equipment (hereinafter for brevity and convenience called equipment) for transporting the products of
373 said Lumber Company from its lumber camps to its mill at Bonami, Louisiana.

2. The Louisiana Company shall place the said equipment upon the spur tracks at the junction point of said spur tracks with main line of said Louisiana Company at the various lumber camps along the main line of said Louisiana Company as directed by said Lumber Company.

3. The movement of said equipment and the placing thereof on said spurs shall be made in accordance with an agreement hereafter to be agreed upon between the Superintendent of said Louisiana Company and the Superintendent of said Lumber Company, in such manner and upon such condition as shall be mutually agreeable to each.

4. The said Lumber Company shall take charge of said equipment and manage and control the same immediately upon its being placed upon said spurs, as hereinabove provided, and shall load the products of said Lumber Company upon said equipment and return the same to the main line of said Louisiana Company, there to be taken in charge by the employees of said Louisiana Company, and transported to the mills of said Lumber Company.

5. The Lumber Company shall receive said cars from the Louisiana Company at the places aforesaid subject to the rules of the Master Car Builders' Association as far as they are applicable to the conditions and circumstances of said companies and the expense of any repairs caused or made necessary by said Lumber Company shall be borne by said Lumber Company.

1 1 9

6. The Louisiana Company shall furnish to said Lumber Company all steel rails, of suitable class, necessary to make any extension or extensions to any of the spurs of said Louisiana Company, said Lumber Company to furnish ties and bear all expense connected with the construction thereof.

7. In the event that it becomes necessary in order to make repairs, upon any of said logging equipment, to take the same into Bonami, said Lumber Company shall have the right to take said logging equipment, with its own crews, into Bonami over the line of said Louisiana Company without any additional expense to the said Lumber Company; the movement of such equipment to be made after first obtaining permission from the Superintendent of the Louisiana Company, who is hereby required to furnish this permission when requested.

8. The Lumber Company hereby agrees that it will be responsible to the Louisiana Company and will hold it harmless and indemnify it against all loss and damage to persons or property caused by the operation of any of said equipment while being operated by or in possession of the Lumber Company.

9. During the term of this agreement the Lumber Company will ship, or cause to be shipped, over the line of railroad of the Louisiana Company to the terminus of said line or to the connection of said line of the Louisiana Company with other railroads, there to be delivered to connection with other carriers, one hundred (100%) per cent of the aggregate products of its mill or mills as are
374 now located or may hereafter be located on the line of said Louisiana Company, or any of its branches, to be carried by said Louisiana Company at the regular published tariff rates of said Company and filed with the Interstate Commerce Commission.

10. In the event any controversy should at any time arise between the parties hereto, and they shall themselves be unable to adjust the same, either party may demand arbitration, and may select one arbitrator; and the other party shall, within ten days after notice of the selection of such arbitrator by the other party, itself select an arbitrator, notifying the other party of that fact; and within ten days thereafter, the two arbitrators then selected, shall, if they can not agree upon the adjustment of the matter in controversy, select a third arbitrator, and the decision of any two of said three arbitrators shall be binding upon the parties hereto. In the event that the parties hereto shall each select an arbitrator and such arbitrators shall fail to select a third within ten days from date of their selection, then the parties hereto shall select new arbitrators, who shall proceed as hereinbefore provided. In the event that any third arbitrator selected shall refuse to act, the two arbitrators selected shall select another third arbitrator, and so on.

11. It is understood and agreed that this contract shall be binding upon the parties hereto for a period of eighteen (18) years, and that all the terms and conditions of this agreement shall bear upon and inure to the benefit of and be obligations upon the successors and assigns of either or both of the parties hereto.

This done and signed, in duplicate, at Bonami, Louisiana, the day and year first above written.

LOUISIANA & PACIFIC RAILWAY COMPANY,
By R. A. LONG, *Pres.*
KING-RYDER LUMBER COMPANY,
By C. B. SWEET, *V. P.*

[Endorsed:] Agreement between Louisiana & Pacific Railway Co. and King-Ryder Lumber Company.

United States Commerce Court. Filed Mar. 22, 1913. G. F. Snyder, Clerk.

Agreement Between Louisiana & Pacific Railway Company and Longville Lumber Company.

This agreement, made and entered into this first day of July, A. D. 1908, by and between the Louisiana & Pacific Railway Company (hereinafter called the Louisiana Company) a common carrier corporation of the State of Louisiana, herein represented by C. B. Sweet, its Vice-President, and the Longville Lumber Co. (hereinafter called the Lumber Company) a corporation organized and existing under and by virtue of the laws of the State of Missouri, herein represented by R. A. Long, its President, witnesseth:

That, whereas, the Louisiana Company owns or controls and operates a line of railway in the Parish of Calcasieu, extending
375 from Lake Charles, Louisiana to De Ridder, Louisiana, together with the usual railroad yards, depots, switches, and all other appurtenances and connections for the unloading and transporting of freight and passengers; and,

Whereas, the Lumber Company owns and operates a saw-mill at Longville, Louisiana, where it manufactures large quantities of Lumber and similar products; and,

Whereas, the Lumber Company owns large tracts of timber in the neighborhood of Longville, Louisiana, which it is cutting and manufacturing into Lumber at its saw-mill in Longville, Louisiana; and,

Whereas, for the purpose of transporting its logs from the forest to its said saw-mill at Longville, Louisiana, it has been necessary for it to construct certain logging roads from its said mill out into the forest; and,

Whereas, said Lumber company has been much hampered because of the lack of adequate facilities and accommodations for transporting its said logs to its said mill, and for transporting the products of its said mill to desirable markets; and,

Whereas, it is desirable that the Louisiana Company should acquire the tonnage which the said Lumber Company is in position to furnish from its said mill;

Now, therefore, it is mutually agreed between the parties hereto, as follows:

1. That for and in consideration of the sum of Seventy Five Thousand Five Hundred Twenty-four and 20/100 Dollars ($75,524.20), paid by the said Louisiana Company to the said Lumber Company, (the receipt of which is hereby acknowledged) the said Lumber Company does hereby grant, bargain, sell and convey to the said Louisiana Company, its successors and assigns, all of its logging roads, tram roads, spurs and connections, together with all cars, engines, tools, equipment and appurtenances of every kind and character therewith connected.

2. The Louisiana Company shall for the period, and upon the terms, limitations and conditions hereinafter expressed, furnish to the Lumber Company all the necessary cars, engines, and other appurtenances and equipments, (hereinafter for brevity and convenience called "equipment") for transporting the products of said Lumber Company to its mill at Longville, Louisiana. The Louisiana Company shall place said equipment upon the spur tracks and logging roads at the points at which the Lumber Company shall from time to time be cutting timber to be transported on said cars to its mill at Longville, Louisiana; said Lumber Company shall receive said equipment at said points and shall perform all the work and render all the services necessary to the loading of said logs and products upon said cars free of expense and charge to the said Louisiana Company; that after said cars are loaded with logs and products of said forest then said Louisiana Company shall receive said cars and equipment so loaded as aforesaid, and shall transport the same to the mill of said Lumber Company at Longville, Louisiana.

3. The movement of said equipment and the placing
376 thereof on said spurs shall be made in accordance with an agreement hereinafter to be agreed upon between the Superintendent of *of* said Louisiana Company and the Superintendent of said Lumber Company, in such manner and upon such conditions as shall be mutually agreeable to each.

4. The Lumber Company shall receive said cars from the Louisiana Company at the places aforesaid subject to the rules of the Master Car Builders' Association as far as they are applicable to the conditions and circumstances of said companies, and the expense of any repairs caused or made necessary by said Lumber Company shall be borne by said Lumber Company.

5. The Louisiana Company shall furnish to said Lumber Company all steel rails, of suitable class, necessary to make any extension to any of the spurs herein purchased from said Lumber Company, and said Lumber Company is to furnish all ties, and bear all expense connected with the construction of said extensions.

6. In the event that it becomes necessary in order to make repairs upon any of said logging equipment, to take same into Longville, Louisiana, said Lumber Company shall have the right to take said logging equipment, with its own crews, into Longville, Louisiana, over the line of said Louisiana Company without any additional expense to the said Lumber Company, the movement of such equipment to be made after first obtaining permission from the Super-

intendent of the said Louisiana Company, who is hereby required to furnish this permission when requested.

7. The Lumber Company hereby agrees that it will be responsible to the Louisiana Company, and will hold it harmless and indemnify it against all loss and damage to persons or property caused by the operation of any of said equipment while being operated by or in possession of said Lumber Company.

8. During the term of this agreement the Lumber Company will ship or cause to be shipped, over the line of railroad of said Louisiana Company to the terminus of said Line or to the connection of said line of the Louisiana Company with other railroads, there to be delivered to connection with other carriers, one hundred per cent. (100%) of the aggregate products of its mill, or mills, as are now located or may hereafter be located on the line of said Louisiana Company, or any of its branches, to be carried by said Louisiana Company at the regular published tariff rates of said Louisiana Company, and filed with the Inter-State Commerce Commission.

9. In the event any controversy should at any time arise between the parties hereto, and they shall themselves be unable to adjust the same, either party may demand arbitration and may select one arbitrator, and the other party shall, within ten (10) days after notice of the selection of such arbitrator by the other party itself select an arbitrator, notifying the other party of that fact; and within ten (10) days thereafter the two arbitrators then selected shall, if they can not agree upon the adjustment of the matter in controversy, select a third arbitrator, and the decision of any two of said three arbitrators shall be binding upon the parties hereto. In the
377 event that the parties hereto shall each select an arbitrator and such arbitrators shall fail to select a third within ten (10) days from the date of their selection, then the parties hereto shall select new arbitrators who shall proceed as hereinbefore provided. In the event that any third arbitrator selected shall refuse to act, the two other arbitrators shall select another third arbitrator, and so on.

10. It is understood and agreed that this contract shall be binding upon the parties hereto for a period of eighteen (18) years, and that all the terms and conditions of this agreement shall bear upon and inure to the benefit of, and be obligations upon, the successors and assigns of either or both of the parties hereto.

This done and signed in duplicate at Bonami, Louisiana, the day and year first above written.

LOUISIANA & PACIFIC RAILWAY COMPANY,
By C. B. SWEET, *Vice-Pres.*
LONGVILLE LUMBER COMPANY,
By R. A. LONG, *President.*

United States Commerce Court. Filed March 22, 1913. G. F. Snyder, Clerk.

Agreement Between Louisiana & Pacific Railway Company and Calcasieu Long Leaf Lumber Company.

This agreement, made and entered into this 2nd day of March, 1908, by and between the Louisiana & Pacific Railway Company (hereinafter called the Louisiana Company), a corporation of the State of Louisiana, herein represented by R. A. Long, its President, and the Calcasieu Long Leaf Lumber Company (hereinafter called the Lumber Company), a corporation of the State of Missouri, herein represented by C. B. Sweet, its Vice Pres. Witnesseth:

Whereas, the Louisiana Company owns or controls and operates a line of railway in the Parish of Calcasieu, extending from Lake Charles, Louisiana, to De Ridder, Louisiana, together with railroad yards, depots, switches, and all other appurtenances together with connections at Lake Charles with the Louisiana Western Railroad Company, the Kansas City Southern Railway Company and the St. Louis Watkins & Gulf Railway Company, at Fulton with the Colorado Southern, New Orleans & Pacific Railroad Company, at Bonami with the Kansas City Southern Railway Company and at De Ridder with the Kansas City Southern Railway Company and the Gulf, Colorado & Santa Fe Railroad Company; and

Whereas, the Louisiana Company owns a line of railroad connected with said main line from De Ridder to Lake Charles, as aforesaid, at Fayette, extending in a Northwesterly direction a distance of nine (9) miles, more or less, to Camp Curtis—also approximately nine (9) miles of logging spurs beyond Camp Curtis; and

Whereas, The Lumber Company owns and operates a saw mill at Lake Charles, Louisiana, and owns a large amount of timber
378 land with timber thereon along the line of railroad of said Louisiana Company, which it desires to transport to said mill at Lake Charles, and there convert the same into lumber; and

Whereas, Said Lumber Company has been much hampered because of the lack of adequate railway facilities and accommodation for transporting its logs to its said mill and for transporting the products of its said mill to desirable market; and

Whereas, It is very desirable that the Louisiana Company should acquire the tonnage which the said Lumber Company is in position to furnish—

Now, therefore, it is mutually agreed between the parties hereto, as follows to wit:

1. The Louisiana Company shall for the period and upon the terms, limitations, and conditions hereinafter expressed, furnish to the Lumber Company all of the necessary engines, cars and other appurtenances and equipment (hereinafter called, for brevity and convenience, equipment) for transporting the products of said Lumber Company from its lumber camps to its mills at Lake Charles, Louisiana.

. The Louisiana Company shall place the said equipment upon spur tracks at the junction point of said spur tracks with main of said Louisiana Company at the various lumber camps along main line of said Louisiana Company as directed by said Lumber npany.

. The movement of said equipment and the placing thereof on spurs shall be made in accordance with an agreement hereafter e agreed upon between the Superintendent of said Louisiana npany and Superintendent of said Lumber Company, in such nner and upon such conditions as shall be mutually agreeable ach.

. The Said Lumber Company shall take charge of said equip- t and manage and control the same immediately upon its being ed upon said spurs, as hereinabove provided, and shall load the ducts of said Lumber Company upon said equipment and re- the same to the main line of said Louisiana Company, there e taken in charge by the employees of said Louisiana Company, transported to the mills of said Lumber Company.

. The Lumber Company shall receive said cars from the Louis- a Company at the places aforesaid subject to the rules of the ter Car Builders Association as far as they are applicable to the ditions and circumstances of said companies and the expense of repairs caused or made necessary by said Lumber Company ll be borne by said Lumber Company.

. The Louisiana Company shall furnish to said Lumber Com- y all steel rails of suitable class, necessary to make any extension extensions to any of the spurs of said Louisiana Company, said mber Company to furnish ties and bear all expenses connected h the construction thereof.

. In the event that it becomes necessary in order to make repairs n any of said logging equipment, to take the same into Lake Charles said Lumber Company shall have the right to take said logging equipment, with its own crews into Lake Charles over the line of said Louisiana Company without any ad- onal expense to the said Lumber Company; the movement of h equipmenut to be made after first obtaining permission from Superintendent of the Louisiana Company, who is hereby re- red to furnish this permission when requested.

. The Lumber Company hereby agrees that it will be responsi- to the Louisiana Company and will hold it harmless and in- nify it against all loss and damage to persons or property caused the operation of any of said equipment while being operated by in possession of the lumber Company.

. During the term of this agreement the Lumber Company will p, or cause to be shipped, over the line of railroad of the Louisiana mpany to the terminus of said line or to the connection of said e of the Louisiana Company with other railroads, there to be ivered to connections with other carriers, one hundred (100%) cent. of the aggregate products of its mill or mills as are now ated or may hereafter be located on the line of said Louisiana mpany, or any of its branches to be carried by said Louisiana

Company at the regular published tariff rates of said Company and filed with the Interstate Commerce Commission.

10. In the event any controversy should at any time arise between the parties hereto, and they shall themselves be unable to adjust the same, either party may demand arbitration, and may select one arbitrator; and the other party, shall, within ten days after notice of the selection of such arbitrator by the other party, itself select an arbitrator, notify the other party of that fact; and within ten days thereafter, the two arbitrators then selected, shall if they cannot agree upon the adjustment of the matter in controversy, select a third arbitrator, and the decision of any two of the said three arbitrators, shall be binding upon the parties hereto. In the event that the parties hereto shall each select an arbitrator and such arbitrators shall fail to select a third within ten days from date of their selection, then the parties hereto shall select new arbitrators, who shall proceed as hereinbefore provided. In the event that any third arbitrator selected shall refuse to act, the two arbitrators selected shall select another third arbitrator, and so on.

11. It is understood and agreed that this contract shall be binding upon the parties hereto for a period of eighteen (18) years, and that all the terms and conditions of this agreement shall bear upon and inure to the benefit of and be obligations upon the successors and assigns of either of the parties hereto.

This done and signed, in duplicate, at Lake Charles, Louisiana, the day and years first above written.

LOUISIANA & PACIFIC RAILWAY COMPANY,
By R. A. LONG, *Pres.*
CALCASIEU LONG LEAF LUMBER COMPANY,
By C. B. SWEET, *V.-P.*

380 (Filed in Clerk's Office, Mar. 22, 1913.)

Agreement made this 13th day of October, A. D., 1906, by and between the Colorado Southern, New Orleans and Pacific Railroad Company, hereinafter called the "Colorado Company," party of the first part, the St. Louis and San Francisco Railroad Company, hereinafter called the "Frisco Company," party of the second part, the Louisiana and Pacific Railway Company, hereinafter called the "Louisiana Company," party of the third part, the King-Ryder Lumber Company, hereinafter called the "King Company," party of the fourth part, the Hudson River Lumber Company, hereinafter called the "Hudson Company," party of the fifth part, the Calcasieu Long Leaf Lumber Company, hereinafter called the "Cal-
381 casieu Company," party of the sixth part, and the Long-Bell Lumber Company, hereinafter called the "Long Bell Company," party of the seventh part; witnesseth:

That, whereas, the Colorado Company is a railroad corporation organized and existing under the laws of the State of Louisiana,

and is constructing a line of railroad in the State of Louisiana running in a general easterly and westerly direction and which will pass near the village of Ramsay in Calcasieu Parish, and which will reach directly and through its connections a large number of markets wherein the products of the King Company, the Hudson Company, the Calcasieu Company and the Long Bell Company or all companies owned and controlled by either or all of said companies can be sold, and

Whereas, the Frisco Company is a railroad corporation organized and existing under the laws of the State of Missouri, and controls by ownership of stock the Colorado Company, and

Whereas, the Louisiana Company is a railroad corporation organized and existing under the laws of the State of Louisiana, and is to be constructed and operated from De Ridder to near Ramsay in Calcasieu Parish, Louisiana, and may be extended or construct branches to other points. Its line of railroad will connect with the line of railroad of the Colorado Company near Ramsay and will largely traverse the timber lands of the King Company, the Hudson Company, the Calcasieu Company and the Long Bell Company and the companies owned or controlled by either or all of them and in connection with the railroad of the Colorado Company and of the Frisco Company will furnish railway facilities for the transportation of the lumber of all of said lumber companies from the forest to the different mills of all of said lumber companies on said line of railroad, and the transportation of the products thereof to the markets which all of said lumber companies will desire to reach, and

Whereas, the said King Company, the Hudson Company, the Calcasieu Company and the Long Bell Company are each organized under the laws of the State of Missouri and each owns and controls large tracts of timber lands in the Parish of Calcasieu, State of Louisiana, all of which are tributary to the said proposed line of railroad of the Louisiana Company, and each is extensively engaged in cutting the timber on said land and marketing the products thereof, and

Whereas, the transaction of the business of all of said lumber companies is hampered and made less profitable than it should be because of lack of adequate railway facilities and means of transportation of the timber from the forest to their mills and for lack of railway facilities and means by which the products of said timber can be transported from the mills to the most advantageous markets. For the proper, economical and profitable conduct of their business the said lumber companies have arranged with the Louisiana Company to construct and operate its said proposed line of railway. 'In furtherance of this purpose the Louisiana Company, the King
382 Company, the Hudson Company, and the Calcasieu Company have requested the Colorado Company to permit the Louisiana Company to make a track connection with its line near Ramsay and to enter into this agreement, and

Whereas, the Long Bell Company is a corporation organized and existing under the laws of the State of Missouri, and it owns and controls the property and franchises of the said King Company,

Hudson Company, and Calcasieu Company through stock ownership thereof, and has also requested the Colorado Company to permit the Louisiana Company to make such track connections with its line and to enter into this agreement, and

Whereas, where the term "Lumber companies" is used in this agreement it means the King Company, Hudson Company, Calcasieu Company and the Long Bell Company and all lumber companies controlled by them by the ownership of stock or otherwise, and

Whereas, the several parties hereto, because of the mutual advantages accruing to them hereby, are willing to enter into this agreement.

Now, therefore, in consideration of the premises and of the mutual covenants and agreements hereinafter contained, and of the sum of One Dollar ($1.00) to each of the parties hereto by the other parties paid, the parties hereto have covenanted and agreed and do covenant and agree with *the* other as follows:

First. The Louisiana Company covenants and agrees that it will, with all convenient speed and dispatch, construct its said railroad and provide it with the necessary side and spur tracks and appurtenances necessary to the railway ready for the operation of trains thereover from De Ridder, Louisiana, to near Ramsay, Louisiana, and to there connect said line with the line of railway of the Colorado Company, in the Parish of Calcasieu.

Second. The Colorado Company hereby covenants and grants to the Louisiana Company, during the existence of this agreement the right to connect the above described line of railway of the Louisiana Company with the line of railway of the Colorado Company at such convenient point near Ramsay as shall be designated by the Colorado Company, and also the right thereafter for a like term to operate at and over the point of connection under such rules and regulations therefor as shall from time to time be adopted by the Colorado Company.

Third. The Colorado Company and the Louisiana Company agree that during the existence of this agreement that they will interchange business with each other at said point of connection of their respective lines and by means thereof will establish a through line of railway with traffic thereover on the basis of the divisions of rates as hereinafter set forth.

Fourth. The King Company, the Hudson Company, the Calcasieu Company and the Long Bell Company covenant and
383 agree with the Louisiana Company for its benefit and that of the Colorado Company and of the Frisco Company, to ship and cause to be shipped each and every month during the existence of this agreement over the line of railway of the Louisiana Company from the forest to the mills of the said named lumber companies and all companies owned or controlled by them or either of them all of the timber cut by all of said companies from all their lands (including all lands controlled directly or indirectly by them of by any of their subsidiary companies or by any companies in which they hold controlling interest) which they or either of them now own or may hereafter acquire along or contiguous to the said line of railroad of

the Louisiana Company and that they will ship at least fifty per centum (50%) of all the products of said mills to said point of connection near Ramsay over the line of railroad of the Louisiana Company, and then over the line of railway of the Colorado Company and of the Frisco Company and their connections to the points of destination thereof. And the Louisiana Company covenants and agrees with the Colorado Company and with the Frisco Company during the existence of this agreement to deliver to the Colorado Company and to the Frisco Company at said point of connection near Ramsay said amount of at least fifty per centum (50%) of all the products of said mills as hereinbefore mentioned, for the purpose of having same transported from the said point of connection over the lines of the railway of the said Colorado Company and the Frisco Company and their connections to the points of destination thereof; provided, however, that if hereafter the King Company, the Hudson Company, the Calcasieu Company or the Long Bell Company shall acquire timber lands along or contiguous to the line of railway of the Louisiana Company, the owners of which shall require, as a condition of the sale thereof, that all or part of the timber or products of the timber from the same shall be shipped over some other line or lines of railway than the line of railway of the Colorado Company, them, and in such case the provisions of this agreement shall not apply to such lands or to the timber or products of the timber therefrom in so far as there may be a necessary conflict with the said condition of sale of such after acquired lands.

Fifth. The Colorado Company and the Frisco Company agree during the existence of this agreement to accept from the Louisiana Company all shipments by it offered and to transport the same with reasonable promptness and dispatch, and to use every reasonable effort to furnish the Louisiana Company with cars as requested by it from time to time to a number sufficient for transporting at least fifty per centum (50%) of all the products of the mills of the King Company and Hudson Company, the Calcasieu Company and the Long Bell Company and of all companies owned or controlled by them or either of them. It is understood and agreed, however, that if the Colorado Company *of* the Frisco Company shall fail during any calendar month to furnish the number of cars required
384 by the Louisiana Company and necessary in order to transport fifty per centum (50%) of the products of the said mills during said month, then in such event the Colorado Company or the Frisco Company shall not be obliged thereafter to make up such deficit of cars in any such calendar month. Nor shall the Louisiana Company be obliged thereafter to furnish freight to make up such deficit on account of such failure of said Colorado Company or Frisco Company to furnish cars in said calendar month.

Sixth. The Colorado Company, the Frisco Company and the Louisiana Company agree each with the other that they will enter into joint tariffs relating to the joint traffic over their respective lines and to file the same with the Interstate Commerce Commission and to publish the same in the manner and form as required by law.

Seventh. It is further agreed that no per diem charges shall be made by either *of* the Colorado Company, or Frisco Company *of* the Louisiana Company on freight cars delivered by either to the other of said parties, including its own and also foreign cars, during or for the first six days after the expiration of said period of six days from the date of delivery thereof by one of said parties to the other, shall be paid by the party using and holding said cars to the other of said parties.

Eighth. The cost and expense of constructing, manufacturing and renewing such connecting, interchange or side tracks as may be necessary to properly handle the business of the Louisiana Company at said point of connection near Ramsay shall be borne and paid jointly and equally by the Louisiana Company and the Colorado Company.

Ninth. The King Company, the Hudson Company, the Calcasieu Company and the Long Bell Company further covenant and agree with the Louisiana Company and the Colorado Company and the Frisco Company to deliver or cause to be delivered to the Louisiana Company for transportation over the railway of the Colorado Company and of the Frisco Company to points on or reached via the railways or some of them constituting the railway lines or system of which the Colorado Company or the Frisco Company shall form a part, at least fifty per centum (50%) of all outbound shipments *or* lumber and other prpoducts of the mills of the said King Company, Hudson Company, Calcasieu Company and Long Bell Company and of all companies owned or controlled by them or either of them, each and every month during the existence of this agreement, and in every such case they shall cause or permit such shipments to be so routed as to give to the railways constituting the railway lines or system of which the Colorado Company and the Frisco Company are a part, such hauls as shall yield to them the largest revenue.

It is agreed between the Louisiana Company, the Colorado Company and the Frisco Company that the Colorado Company and the Frisco Company shall have the exclusive right to fix and
385 determine all interstate rates applicable over the lines of the Louisiana Company and of the Colorado Company and of the Frisco Company and their connections governing all such shipments and all other shipments both outbound and inbound, whether *or* all of the said lumber companies or of the public generally.

Tenth. In respect to the division of freight rates between the Louisiana Company and the Colorado Company and the Frisco Company the said three companies hereby agree to the following division during the existence of this agreement.

On all lumber shipments originating on the line of the Louisiana Company, the Louisiana Company shall receive thirty-five per centum (35%) of the through rate, with a maximum of five and one-half *cents* per hundred pounds.

It is agreed that the above division of through rates shall include delivery of shipments to the Colorado Company or to the Frisco Company and are based upon the present through rates. It is

agreed that if at any time, during the existence of this agreement the through rates shall be reduced, the maximum of five and one half cents per hundred weight due to the Louisiana Company shall be reduced in proportion to the reduction of the through rates.

Where lumber shipments, made by the lumber companies, originate on the line of the Louisiana Company and are transported over the line of the Colorado Company from the point of connection between the lines of the two companies near Ramsay to near Kinder in Calcasieu Parish on the line of railway of the St. Louis, Watkins and Gulf Railway Company and delivered to the latter company at or near Kinder, the Colorado Company will make a rate for the transportation over its line, from the point of connection near Ramsay to the point of connection at or near Kinder, of not to exceed one cent per hundred pounds on such lumber shipment. But as to such shipments the division of the through rate hereinbefore agreed to and the maximum of five and one-half cents per hundred pounds shall not apply and as to such shipments the Louisiana Company shall not receive from the Colorado Company any division of the through rate and such shipments from Ramsay to Kinder shall not be computed or considered as part of the fifty per centum (50%) of shipments to be made over the line of railroad of the Colorado Company and the Frisco Company and their connections.

The Colorado Company and the Frisco Company agree that they will, at all times during the existence of this agreement publish for all territory east of the Mississippi River and north of the Ohio River and points on and west of the Mississippi River on the lines of the Frisco and Rock Island Systems and their connections the same freight rates from points on the Louisiana Company's line as are or shall be in effect from Eunice, La., on the Colorado Company's line.

On all commodities of traffic other than lumber which may be interchanged between the Louisiana Company and the Colo-
386 rado Company and the Frisco Company the said three companies agree to make such divisions of the tariffs between themselves as shall be reasonable and fair, and in accordance with the usual methods of making joint tariffs and divisions on like commodities between railroad companies operating lines of railroad within the State of Louisiana.

Eleventh. The Louisiana Company and the Colorado Company and the Frisco Company agree that each company shall be amenable to the other company for the prompt and proper handling of all cars of the other company, or cars of the other companies not parties hereto which it may handle; that in the handling of cars the usual practice and penalties of railroad companies in the State of Louisiana shall govern, excepting as to per diem charges as hereinbefore provided for, and that no cars of either company shall be used locally by the other companies.

Twelfth. The Louisiana Company and the Colorado Company and the Frisco Company each further covenant and agree to indemnify and save harmless the other from any and all loss of and damage to its cars or equipment or to cars or equipment belonging to other

companies or persons which either company may received from the other company, which may occur while such cars or equipment are on the railroad of the indemnifying company and in case of any damage to said cars or equipment while on its said line each of the said companies agree to properly repair the same without delay, and if it fails or neglects to repair the same within a reasonable time and to the satisfaction of the other company, then the other company may make such repairs and the cost thereof with ten per centum (10%) thereon additional thereto shall be paid to the company making such repairs by the other company immediately upon the receipt of statement showing the amount of such cost:

Thirteenth. This agreement and all the terms and conditions, rights and obligations hereof shall inure in favor of and be binding upon the successors, assigns and lessees of each of the parties hereto.

Fourteenth. The Colorado Company shall proceed diligently to construct and put into operation its line of railroad passing near Ramsay and to make railroad connections with other line or lines of railroad so that the freight herein referred to may be transported by said Colorado Company and Frisco Company, and their connections, and as soon as the railroad of the Colorado Company has been constructed and put into operation to such extent and for such purposes then this agreement shall become effective and it shall be and remain in full force and effect for a period of fifteen (15) years hereafter, reckoning the said fifteen years from the date of the execution of this agreement; or as long as the lumber companies or either or them shall operate their mills in said Parish of Calcasieu.

In witness whereof, each party hereto has caused this
387 agreement to be signed by its proper officer and its corporate seal to be hereto affixed and attested the day and year first above written.

(Coat-of-Arms.)

STATE OF LOUISIANA:

I, the undersigned Assistant Secretary of State, of the State of Louisiana, do hereby certify that the annexed and following nine (9) pages contain a true and correct transcript of certified copy of charter of "Louisiana and Pacific Railway Company", of Bonami, Louisiana, as is shown by comparing the same with the certified copy on file in this office and recorded in book "Records of Charters", No. 29, Folio 230, under date of August 6th, 1904; and, certified copy of amendment to Article III of the charter of "Louisiana and Pacific Railway Company", of Bonami, Louisiana, as is shown by comparing the same with the certified copy on file in this office and recorded in book, "Record of Charters", No. 47, Folio 424; under date of May 1st, 1907; and, certified copy of proceedings of stockholders' meeting of "Louisiana and Pacific Railway Company", increasing the amount of the capital stock from $30,000.00 to $200,000.00, as is shown by comparing the same with the certified copy on file in this office and recorded in book "Record of Charters" No. 64, Folio 146, under date of February 21st, 1910.

Given under my signature, authenticated with the impress of my Seal of office, at the City of Baton Rouge, this 24th day of September A. D. 1910.

[Seal State of Louisiana, Secretary of State.]

EUGENE J. McGIONEY,
Assistant Secretary of State.

Charter of the Louisiana & Pacific Railway Company.

STATE OF LOUISIANA,
Parish of Calcasieu, ss:

Be it known, That on this 6th day of June, A. D. 1904, before me, Henry E. Hall, a notary public in and for the Parish of Calcasieu, State of Louisiana aforesaid, duly commissioned and qualified, and in the presence of the witnesses hereinafter named, and undersigned, personally came and appeared the several persons whose names are hereunto subscribed, who severally declared, that availing themselves of the laws of the State of Louisiana, in such cases made and provided, they have contracted and agreed and do, by these presents, covenant and agree and bind themselves, as well as such persons as may hereafter become associated with them, to form and constitute a corporation for the objects and purposes and under the articles and stipulations, to wit:

389

Article I.

The name of the said corporation shall be the "Louisiana & Pacific Railway Company," and under its said corporate name it shall have power and authority to have and enjoy succession for the full term of twenty-five (25) years from and after the date hereof; to contract, sue and be sued; to make and use a corporate seal, to hold, receive, purchase and convey under their corporate name property, both real and personal; to name and appoint such managers, directors and officers, as their officers, and their interests and convenience may require; to make and establish such by-laws for the proper management and regulation of the affairs of the corporation as may be necessary and proper.

Article II.

The domicile of said corporation shall be at Bonami, in the Parish of Calcasieu, State of Louisiana; all citations or other legal process shall be served upon B. H. Smith, Manager of said corporation, or, in the event of his absence upon any agent of the said corporation.

Article III.

The object and purposes for which this corporation is established, and the nature of the business to be carried on by it, are declared and specified to be, to construct, maintain and operate, or to lease and operate a railroad commencing at Bonami, Calcasieu Parish, State of Louisiana, in an easterly direction, through Bonami Junction, in said Parish and State; to lease and operate railway and steamship lines as common carriers of freight.

Article 4.

The capital stock of said corporation is hereby fixed at the sum of Thirty Thousand Dollars ($30,000.00), divided into and repre-

sented by One Hundred (100) shares of the par value of Three Hundred Dollars (300.00) each. Said stock shall be paid for in installments of such amounts and at such times as the Board of Directors may determine, but any part or parcel of said stock may be issued by said Board of Directors at no less than par value, in payments of labor done or property actually received by the said corporation. Said stock books shall be kept by said corporation.

Article V.

All the corporate powers of said corporation shall be vested and exercised by a Board of Directors, to be composed of six stockholders, to be elected annually on the first Tuesday in April, in each year, all such elections shall take place by ballot at the general office of the company in Bonami, Calcasieu Parish, State of Louisiana, and each share of stock entitles the owner or holder thereof to one vote. The six stockholders receiving the highest number of votes cast shall be declared elected. The six (6) directors so chosen shall immediately thereafter proceed to choose from among their number a President, two Vice-Presidents, Secretary and Treasurer, who shall be vested with such power as given and defined by the by-laws of said corporation.

Article VI.

Whenever this corporation shall be dissolved either by limitation or any other cause, the affairs shall be liquidated by three stockholders to be appointed as Commissioners at a general meeting of the stockholders to be convened for such purpose, after thirty days' previous notice shall have been given by advertisement in one or more newspapers of general circulation and published in the Parish of Calcasieu, State of Louisiana, and a majority in amount of the capital stock of said corporation shall be required to elect, each share shall be entitled to one vote in person of by proxy. Said Commissioners shall remain in office until the affairs of the said corporation shall have been fully settled up and liquidated, and in case of death of one or more of said commissioners, the vacancy shall be filled by the election of surviving Commissioners.

Article VII.

This act of incorporation may be modified, changed or altered, or said corporation may be dissolved with the assent of two-thirds of the capital stock represented at any general meeting of the stockholders convened for such purpose, after thirty (30) days' previous notice shall have been given in one or more newspapers of general circulation and published in Parish of Calcasieu, State of Louisiana.

Article VIII.

No stockholder shall ever be held liable or responsible for the contracts or faults of said corporation in any further sum than the unpaid balance due on shares of stock owned by him, nor shall any mere informality in the organization have the effect of rendering

this charter null or of exposing a stockholder to any liability beyond the amount due on his stock.

Article IX.

R. A. Long, C. B. Sweet, B. H. Smith, W. F. Ryder, Robert Stack, and F. J. Bannister are hereby declared the Directors of this Company, to act until the first Tuesday in April, A. D. 1905, R. A. Long, as President, B. H. Smith, 1st Vice-President, Robert Stack and C. B. Sweet, 2nd Vice-Presidents, W. F. Ryder, Secretary, and Fred J. Bannister, Treasurer, have been chosen and selected as the first Board of Directors and Officers of said corporation to
391 serve as such until the 1st Tuesday in April, A. D. 1905, or until their successors shall have been elected.

Said corporation shall commence business as soon as all shares shall have been subscribed for.

This done and passed in my office in the town of Bonami, Parish of Calcasieu, State of Louisiana, in the presence of R. H. Mathis and O. C. Murray, competent witnesses of lawful age, both of Bonami, who hereunto sign their names with the said appearers and me, Notary Public, on the day and date aforesaid.

R. A. LONG.
C. B. SWEET.
B. H. SMITH.
W. F. RYDER.
ROBT. STACK.
F. J. BANNISTER.

Witnesses:

R. H. MATHIS.
O. C. MURRAY.

HENRY E. HALL,
Notary Public.

The stock of the above corporation is held by the following persons and in the amounts set opposite their names:

R. A. Long, Seventy-five (75) Shares.
C. B. Sweet, Five (5) Shares.
B. H. Smith, Five (5) Shares.
W. F. Ryder, Five (5) Shares.
Robert Stack, Five (5) Shares.
F. J. Bannister, Five (5) Shares.

Have examined the above and foregoing "act of incorporation," and finding nothing therein contrary to law, I hereby approve.

This done and signed officially at my office in the City of Lake Charles, Louisiana, on this 18th day of June, A. D. 1904.

JOSEPH MOORE,
Fifteenth (15) *Judicial District of the State of Louisiana.*

STATE OF LOUISIANA,
Parish of Calcasieu:

I hereby certify that the within is a true copy of the original on file in my office and recorded in book 13 of Mortgages on page 80 et seq.

In testimony whereof witness my official signature and seal on this 21st day of June, A. D. 1904.

(Signed) A. S. GOSSETT,
[SEAL.] *Deputy Clerk.*

392 *Amendment of Article III of the Charter of Louisiana & Pacific Railway Company.*

At a regular meeting of the Louisiana & Pacific Railway Company regularly called and duly held at the office of said Company at Bonami, Calcasieu Parish, Louisiana, on the 12th day of March, A. D. 1907, all of the Capital stock of said Company being represented at said meeting, on motion of C. B. Sweet, duly seconded, the following resolution was adopted:

"That Article III of the Charter of this Company be amended so as to read as follows: "The objects and purposes for which this corporation is established are to acquire right of way; to acquire, construct, maintain and operate a railroad, or railroads, and branches thereof, in the State of Louisiana as a common carrier of freight and passengers; to acquire by lease or otherwise, and to operate as common carriers of freight and passengers, steamship lines, and to carry and transport upon such railway and steamship lines, as may be operated by this corporation, express, United States Mail, and all other articles usually conveyed and transported by railroads and steamship lines; to construct and operate along its right of way telegraph and telephone lines for the transaction of its business; to buy, sell, lease, and otherwise acquire and deal with and in real estate and other property of every kind and character necessary and incident to the carrying out of the purposes of this corporation; to borrow money and issue evidences of indebtedness, and to convey, pledge and mortgage its property, real, personal and mixed, for the purpose of securing its indebtedness; and generally to do all things necessary and proper which may be incident to any of the purposes herein recited, and to have and exercise all the franchises, powers, rights, privileges and immunities conferred by law upon corporations created and organized for the purposes aforesaid."

The said resolution was unanimously adopted by the stockholders of said Company, all of said stock being voted in favor — said amendment.

There being no further business before the meeting, upon motion duly made and seconded, same was declared adjourned.

STATE OF MISSOURI,
County of Jackson:

I, F. J. Bannister, Secretary of the Louisiana and Pacific Railway Company, do hereby certify that the above and foregoing is a true and perfect copy of the Record Book of the Louisiana and Pacific Railway Company of the amendments made and adopted to Article III of Charter at said meeting of the stockholders, held on the 12th day of March, A. D. 1907.

[SEAL.] F. J. BANNISTER,
Secretary of Louisiana and Pacific Railway Company.

393 STATE OF LOUISIANA,
Parish of Calcasieu:

Office of Clerk of 15" Jud. Dist. Court.

I hereby certify that the above is a true and correct copy of a certain amendment of Charter of the Louisiana and Pacific Railway Co. filed for record in this office on the 25th day of April and recorded in Book 21 of Mortgages, page 448, on the 26" day of April, 1907.

In testimony whereof witness my official signature and seal at Lake Charles, La., this 26" day of April, 1907.

(Signed) M. E. CRAWFORD,
[SEAL.] *D'y Clerk.*

Certificate of Proceedings of Stockholders' Meeting of the Louisiana and Pacific Railway Company.

We, the undersigned, Chairman and Secretary of the stockholders' meeting of the Louisiana & Pacific Railway Company convened and held on the eighth day of February, 1910, do hereby certify that a meeting of the stockholders of the Louisiana & Pacific Railway Company was duly convened and held at the office of the Company in the town of De Ridder, Louisiana, on the eighth day of February, 1910; that a notice of said meeting was duly given and that all of the stockholders of said company signed and accepted service of said notice and consented to the meeting held for the purpose mentioned in said notice, and waived the issuance of any other notice and waived the publication of notice of said meeting, which said notice and waiver by stockholders holding all of the shares of stock in said company was duly filed with the Secretary of said meeting; that said meeting was organized by the election of C. B. Sweet as Chairman and Jennie L. Sweet as Secretary of said meeting; that the following resolution was submitted to said meeting, to-wit:

"Resolved, That the capital stock of this company be increased from $30,000.00 to $200,000.00."

That a vote was taken on said resolution and that upon the canvassing of votes it duly appeared that persons holding or representing not less than two-thirds of the capital stock of the corpora-

tion had voted in favor of the proposed increase of stock. That is to say, it duly appeared that all of the stockholders of said company had voted in favor of increasing said capital stock from $30,000.00 to $200,000.00.

We further certify that the amount of the capital stock of said corporation at the time said vote was taken was $30,000.00; the number of the holders of said stock was six; that the amount to which it was proposed and agreed to increase said capital stock was $200,000.00, and the number of shares to which it was proposed and agreed to be increased was 666⅔ shares; that the amount
394 of the shares of stock whose holders had voted in favor of said change was $30,000.00 and the number of shares whose holders had voted in favor of said change was 100 shares, and the amount and number of shares which voted against said change was none, and that the whole amount of debts and liabilities of said corporation is $579,120.03.

(Signed) C. B. SWEET,
Chairman of Stockholders' Meeting.

(Signed) JENNIE L. SWEET,
Secretary of Stockholders' Meeting.

STATE OF LOUISIANA,
Parish of Calcasieu, ss:

C. B. Sweet and Jennie L. Sweet being duly sworn upon their oaths do say that they were Chairman and Secretary respectively of the stockholders' meeting of the Louisiana & Pacific Railway Company mentioned and described in the above and foregoing certificate; and that the statements made and contained in the above and foregoing certificate are true.

(Signed) C. B. SWEET.
" JENNIE L. SWEET.

Subscribed in my presence and sworn to before me this 8th day of February, 1910.

(Signed) ALBERT I. SHAW.
[SEAL.] *Notary Public in and for Calcasieu Parish, Louisiana.*

395 (Filed in Clerk's Office, March 22, 1913.)

Interstate Commerce Commission, Washington.

I, George B. McGinty, Secretary of the Interstate Commerce Commission, do hereby certify that the papers hereto attached are true copies of contract dated March 1, 1911, between Louisiana & Pacific Railway Company and Calcasieu Long Leaf Lumber Company; of contract dated March 1, 1911, between Louisiana & Pacific Railway Company and Longville Lumber Company; of contract dated March 1, 1911, between Louisiana & Pacific Railway Company and King-Ryder Lumber Company, and of contract dated March 1, 1911, between Louisiana & Pacific Railway Company and Hudson River

Lumber Company, the originals of which are now on file and of record in the office of this Commission.

In testimony whereof, I have hereunto subscribed my name, and affixed the seal of the Commission, this 10th day of April, 1913.

[Seal Interstate Commerce Commission, 1887.]

GEORGE B. McGINTY,
Secretary of the Interstate Commerce Commission

DAVIS EXHIBIT No. 8.

Contract File 3711, Auditor's Office.

Contract Between Louisiana & Pacific Railway Company and Calcasieu Long Leaf Lumber Company.

Interstate Commerce Commission. Received Apr. 11, 1911. 9907. Bureau of Tariffs.

This agreement, Made and entered into this first day of March, 1911, by and between the Louisiana and Pacific Railway Company, hereinafter called the "Railway Company" a corporation organized under the laws of the State of Louisiana, herein represented by C. B. Sweet, its Vice-President, and the Calcasieu Long Leaf Lumber Company, hereinafter called the "Lumber Company", a corporation organized under the laws of the State of Missouri, herein represented by S. T. Woodring, its General Manager, Witnesseth:

Whereas the railway company and the lumber company have heretofore entered into an agreement of date March 2, 1908, whereby the railway company agreed to furnish to the lumber company the necessary engines, cars and other equipment for transporting products of the lumber company from the lumber company's camps to its mills at Lake Charles, Louisiana, and also agreed to furnish to the lumber company steel rails, necessary to make extensions or spurs from the end of the line of the railway company to the lumber company's camps and

396 Whereas, although the railway company has furnished similar equipment and steel rails to all other lumber companies located near its line of railway, yet, at a hearing before the Interstate Commerce Commission at New Orleans, Louisiana, in December, 1910, and at St. Louis, Missouri, in January, 1911, the Interstate Commerce Commission appeared to look with some disapproval upon the furnishing of such equipment by a railway company to a shipper;

Now, therefore, in order to avoid any appearance of doing anything which may be construed by the Interstate Commerce Commission as improper, and in consideration of the sum of Fifteen Thousand Six Hundred Forty-five and 01/100 Dollars, ($15,645.01) to the railway company paid by the lumber company, (the receipt of which is hereby acknowledged) the railway company hereby sells, assigns, transfers and delivers to the lumber company the following described property, and at the itemized prices, as follows, to-wit:

Engine No. 71, wheel rod	9,479.81	
Engine No. 51, wheel shay	3,500.00	
4 Acetylene Headlights	38.46	
		$13,018.27
3 Tank Cars	1,330.62	
3 Flat Cars	450.00	
Toggle Chain	846.12	
		2,626.74
		$15,645.01

The railway company also agrees to sell, transfer and deliver to the lumber company all steel rails and track equipment, beyond the station of Camp Curtis, at and for the price of Thirty Dollars per ton; the amount of steel rails and track equipment to be determined by the engineer of the railway company as soon as can be done.

The said contract of date the second day of March, 1908, between the railway company and the lumber company is hereby modified to the extent that this sale necessitates a modification thereof, particularly, paragraph one of said contract is abrogated, except that the railway company will furnish logging cars for the hauling of logs from Camp Curtis to Lake Charles, which said logging cars may go off of the line of the railway company and go to the spurs owned by the lumber company.

The lumber company to load and deliver said cars to the railway company at Camp Curtis.

And in consideration for the use of said logging cars by the lumber company said lumber company shall keep such logging cars as are used by it upon its spur tracks in repair or pay the cost of such repairs.

Paragraph sixth of said contract is annulled and cancelled.

In testimony whereof the railway company has caused this instrument to be executed by its Vice-President and its corporate seal to be hereunto affixed, attested by its Secretary and the lumber company has caused this instrument to be executed by its General Manager and its corporate seal to be hereunto affixed, attested by its Secretary, all pursuant to resolutions of the Board of Directors of said respective companies, this first day of March, 1911.

DAVIS EXHIBIT No. 9.

Contract File 3710, Auditor's Office.

Contract Between Louisiana and Pacific Railway Company and Longville Lumber Company.

Interstate Commerce Commission. Received Apr. 11, 1911. 9907. Bureau of Tariffs.

This agreement, Made and entered into this first day of March, 1911, by and between the Louisiana and Pacific Railway Company, hereinafter called the "railway company," a corporation organized under the laws of the State of Louisiana, herein represented by C. B. Sweet, its Vice-President, and the Longville Lumber Company, hereinafter called the "lumber company", a corporation organized under the laws of the State of Missouri, herein represented by B. H. Smith, its General Manager, Witnesseth:

Whereas, the railway company and the lumber company have heretofore entered into an agreement of date July 1, 1908, whereby the railway company agreed to furnish to the lumber company the necessary engines, cars and other equipment for transporting products of the lumber company from the lumber company's camps to its mills at Longville, Louisiana, and also agreed to furnish to the lumber company steel rails, necessary to make extensions or spurs from the end of the line of the railway company to the lumber company's camps, and

Whereas, although the railway company had furnished similar equipment and steel rails to all other lumber companies located near its line of railway, yet at a hearing before the Interstate Com-
398 merce Commission at New Orleans, Louisiana, in December, 1910, and at St. Louis, Missouri, in January, 1911, the Interstate Commerce Commission appeared to look with some disapproval upon the furnishing of such equipment by a railway company to a shipper;

Now therefore, in order to avoid any appearance of doing anything which may be construed by the Interstate Commerce Commission as improper, and in consideration of the sum of Thirty-two Thousand Five Hundred Twnety-eight and 29/100 ($32,528.29) Dollars to the railway company paid by the lumber company, (the receipt of which is hereby acknowledged) the railway company hereby sells, assigns, transfers and delivers to the lumber company the following described property, and at the itemized prices, as follows, to-wit:

Engine No. 95.....	9,192.81	
Engine No. 86.....	9,192.81	
Engine No. 97.....	8,544.90	
		26,930.52

1 Steel Car.....	559.20		
2 Tank Cars.....	1,686.02		
1 Cattle Car.....	250.00		
8 Skidder Cars.....	3,102.55		
		5,597.77	
			$32,528.29

The Railway Company also agrees to sell, transfer and deliver to the lumber company all steel rails and track equipment, beyond the station of Vandercook, at and for the price of thirty Dollars per ton; the amount of steel rails and track equipment to be determined by the engineer of the railway company as soon as can be done.

The said contract of date the first day of July, 1908, between the railway company and the lumber company is hereby modified to the extent that this sale necessitates a modification thereof, particularly, paragraph two of said contract is abrogated, except that the railway company will furnish logging cars for the hauling of logs from Vandercook to Longville, which said logging cars may go off of the line of the railway company and go to the spurs owned by the lumber company.

The lumber company to load and deliver said cars to the railway company at Vandercook.

And in consideration for the use of said logging cars by the lumber company said lumber company shall keep such logging cars as are used by it upon its spur tracks in repair or pay the cost of such repairs.

Paragraph fifth of said contract is annulled and cancelled.

In testimony whereof the railway company has caused this instrument to be executed by its Vice-President and its corporate seal to be hereunto affixed, attested by its Secretary and the lumber company has caused this instrument to be executed by its
399 General Manager and its corporate seal to be hereunto affixed, attested by its Secretary, all pursuant to resolutions of the Board of Directors of said respective companies, this first day of March, 1911.

Contract File No. 3709, Auditor's Office.

Contract Between Louisiana & Pacific Railway Company and King-Ryder Lumber Company.

Interstate Commerce Commission. Received Apr. 11, 1911. 9907.
Bureau of Tariffs.

This agreement, Made and entered into this first day of March, 1911, by and between the Louisiana and Pacific Railway Company, hereinafter called the "railway company", a corporation organized under the laws of the State of Louisiana, herein represented by C. B. Sweet, its Vice-President, and the King-Ryder Lumber Company, hereinafter called the "Lumber Company", a corporation organized under the laws of the State of Missouri, herein represented by W. L. Prickett, its General Manager, Witnesseth:

Whereas, the railway company and the lumber company have heretofore entered into an agreement of date March 2, 1908, whereby the railway company agreed to furnish to the lumber company the necessary engines, cars and other equipment for transporting products of the lumber company from the lumber company's camps to its mills at Bonami, Louisiana, and also agreed to furnish to the lumber company steel rails, necessary to make extensions or spurs from the end of the line of the railway company to the lumber company's camps, and

Whereas, although the railway company has furnished similar equipment and steel rails to all other lumber companies located near its line of railway, yet, at a hearing before the Interstate Commerce Commission at New Orleans, Louisiana, in December, 1910, and at St. Louis, Missouri, in January, 1911, the Interstate Com-
400 merce Commission appeared to look with some disapproval upon the furnishing of such equipment by a railway company to a shipper.

Now therefore, in order to avoid any appearance of doing anything which may be construed by the Interstate Commerce Commission as improper and in consideration of the sum of Twenty-six Thousand Eight Hundred Sixty-eight and 23/100 ($26,868.23) Dollars to the railway company paid by the lumber company, (the receipt of which is hereby acknowledged) the railway company hereby sells, assigns, transfers and delivers to the lumber company the following described property, and at the itemized prices, as follows, to-wit:

Engine No. 45, 6 wheel rod.....	$7,500.00	
Engine No. 42, 6 wheel rod.....	4,500.00	
Engine No. 41, 6 wheel rod.....	3,000.00	
Engine No. 33, 4 wheel rod.....	1,200.00	
		$16,200.00

4 Tank Cars	2,387.78	
1 Steel Car	300.00	
1 Caboose	350.00	
1 Coach	250.00	
7 Skidder Cars	3,815.45	
1 Blacksmith Car	500.00	
4 Stable Cars	2,400.00	
2 Hand Cars	60.00	
1 Push Car	25.00	
2 Stock Cars	580.00	
		10,668.23
		$26,868.23

The railway company also agree to sell, transfer and deliver to the lumber company all steel rails and track equipment, beyond the station of Walla, at and for the price of Thirty Dollars per ton; the amount of steel rails and track equipment to be determined by the engineer of the railway company as soon as can be done.

The said contract of date the second day of March, 1908, between the railway company and the lumber company is hereby modified to the extent that this sale necessitates a modification thereof, particularly, paragraph one of said contract is abrogated, except that the railway company will furnish logging cars for the hauling of logs from Walla to Bonami, which said logging cars may go off of the line of the railway company and go to the spurs owned by the lumber company.

The lumber Company to load and deliver said cars to the railway company at Walla.

And in consideration for the use of said logging cars by the lumber company said lumber company shall keep such logging cars as are used by it upon its spur tracks in repair or pay the cost of such repairs.

401 Paragraph sixth of said contract is annulled and cancelled.

In testimony whereof the railway company has caused this instrument to be executed by its Vice-President and its corporate seal to be hereunto affixed, attested by its Secretary and the lumber company has caused this instrument to be executed by its General Manager and its corporate seal to be hereunto affixed, attested by its Secretary, all pursuant to resolutions of the Board of Directors of said respective companies, this first day of March, 1911.

Contract File No. 3708, Auditor's Office.

Contract Between Louisiana & Pacific Railway Company and Hudson River Lumber Company.

Interstate Commerce Commission. Received Apr. 11, 1911. 9907.
Bureau of Tariffs.

This agreement, Made and entered into this first day of March, 1911, by and between the Louisiana and Pacific Railway Company, hereinafter called the "Railway Company," a corporation organized under the laws of the State of Louisiana, herein represented by C. B. Sweet, its Vice-President, and the Hudson River Lumber Company, hereinafter called the "Lumber Company," a corporation organized under the laws of the State of Missouri, herein represented by C. H. Dodd, its General Manager, Witnesseth:

Whereas, the railway company and the lumber company have heretofore entered into an agreement of date March 2, 1908, whereby the railway company agreed to furnish to the lumber company the necessary engines, cars and other equipment for transportation — products of the lumber company from the lumber company's camps to its mills at De Ridder, Louisiana, and also agreed to furnish to the lumber company steel rails, necessary to make extensions or spurs from the end of the line of the railway company to the lumber company's camps, and

402 Whereas, although the railway company has furnished similar equipment and steel rails to all other lumber companies located near its line of railway, yet, at a hearing before the Interstate Commerce Commission at New Orleans, Louisiana, in December, 1910, and at St. Louis, Missouri, in January, 1911, the Interstate Commerce Commission appeared to look with some disapproval upon the furnishing of such equipment by a railway company to a shipper;

Now therefore, in order to avoid any appearance of doing anything which may be construed by the Interstate Commerce Commission as improper, and in consideration of the sum of Thirteen thousand one hundred eighty-one and 37/100 ($13,181.37) Dollars to the railway company paid by the lumber company, (the receipt of which is hereby acknowledged) the railway company hereby sells, assigns, transfers and delivers to the lumber company the following described property, and at the itemized prices, as follows, to-wit:

Engine No. 1, 8 wheel Shay.....	$5,000.00	
Engine No. 5, 4 wheel rod.....	3,000.00	
Engine No. 14, 4 wheel rod.....	2,000.00	
		$10,000.00

2 Hand Cars	120.00	
1 Tank Car	840.97	
4 Water Cars	1,450.00	
2 Cabooses	770.40	
		3,181.37
		$13,181.37

The Railway Company also agree to sell, transfer and deliver to the lumber company, all steel rails and track equipment, beyond the station of Bundick, at and for the price of Thirty Dollars per ton; the amount of steel rails and track equipment to be determined by the engineer of the railway company as soon as can be done.

The said contract of date the second day of March, 1908, between the railway company and the lumber company is hereby modified to the extent that this sale necessitates a modification thereof, particularly, paragraph one of said contract is abrogated, except that the railway company will furnish logging cars for the hauling of logs from Bundick to De Ridder, which said logging cars may go off of the line of the railway company and go to the spurs owned by the lumber company.

The lumber company to load and deliver said cars to the railway company at Bundick.

And in consideration for the use of said logging cars by the lumber company said lumber company shall keep such logging cars as are used by it upon its spur tracks in repair or pay the cost of such repairs.

Paragraph sixth of said contract is annualled and cancelled.

403-745 In testimony whereof the railway company has caused this instrument to be executed by its Vice-President and its corporate seal to be hereunto affixed, attested by its Secretary and the lumber company has caused this instrument to be executed by its General Manager and its corporate seal to be hereunto affixed, attested by its Secretary, all pursuant to resolution of the Board of Directors of said respective companies, this first day of March, 1911.

No. 90.

LOUISIANA & PACIFIC RAILWAY COMPANY et al., Petitioners,
vs.
THE UNITED STATES OF AMERICA et al., Respondents; INTERSTATE COMMERCE COMMISSION et al., Interveners.

Order.

In the above entitled cause, an order having been entered allowing an appeal to the Supreme Court of the United States from the final order or decree of the United States Commerce Court entered November 28, 1913, and the Clerk having been directed to transmit to the Supreme Court a properly authenticated transcript of the record, proceedings and papers on which said order or decree was made and entered,—

Now, pursuant to Section 2 of the Act of June 18, 1910, it is hereby ordered that the Clerk shall transmit to the Supreme Court from the files of the Commerce Court the original certified copies of exhibits filed in the proceedings before the Interstate Commerce Commission entitled "In the Matter of the Investigation and Suspension of Schedules Cancelling Through Rates with Certain Tap Line Connections," Investigation and Suspension Docket No. 11, or such parts of said certified copies as were not printed for the use of the Commerce Court.

Objections to the Sufficiency of the Petition on Final Hearing.

(Filed June 2, 1913.)

Comes now the United States of America, by its counsel, on the final hearing hereof, and in accordance with the statute in such case made and provided, makes and enters the following objections to the sufficiency of the petition in the above-entitled cause, viz:

First. The Court is without jurisdiction to entertain the said petition, because the order of the Interstate Commerce Commission sought to be set aside is a negative order;

Second. The Court is without jurisdiction to review the action of the Interstate Commerce Commission in refusing to establish through routes and joint rates between the petitioner and the trunk lines;

Third. The Court is without jurisdiction or power to issue an order in the nature of a writ of mandamus or to order specific performance of the contracts;

Fourth. There is a misjoinder of parties petitioners and respondents;

Fifth. The petition does not state any cause of action against the respondent.

v.
THE UNITED STATES OF AMERICA et al., Respondents.

The above case having been submitted for final hearing upon pleadings and proofs, and due consideration thereof having been had, it is ordered and adjudged that the motion made by the Interstate Commerce Commission to strike from the record all oral evidence taken in this Court be and the same is hereby granted.

It is further ordered and adjudged that the motion to dismiss for want of jurisdiction be and the same is hereby denied.

It is further ordered and adjudged that that portion of the amended order of the Interstate Commerce Commission made October 30th, 1912, which is in the following language:

"That the tracks and equipment with respect to the industry of the several proprietary companies are plant facilities, and that the service performed therewith for the respective proprietary lumber companies in moving logs to their respective mills and performed therewith in moving the products of the mills to the trunk lines is not a service of transportation by a common carrier railroad, but is a plant service by a plant facility; and that any allowances or divisions out of the rate on account thereof are unlawful and result in undue and unreasonable preferences and unjust discriminations, as found in the said reports:

3. It is Ordered, That the principal defendants, the Chicago, Rock Island & Pacific Railway Company; St. Louis & San Francisco Railroad Company; New Orleans, Texas & Mexico Railroad Company; Beaumont, Sour Lake & Western Railway Company; St. Louis, Iron Mountain & Southern Railway Company; The Texas & Pacific Railway Company; International & Great Northern Railway Company; The Missouri, Kansas & Texas Railway Company of Texas; St. Louis Southwestern Railway Company; St. Louis Southwestern Railway Company of Texas; The Paragould Southeastern Railway Company; Eastern Texas Railroad Company; The Kansas City Southern Railway Company; Texarkana & Fort Smith Railway Company; The Houston East and West Texas Railway Company;
780 Texas & New Orleans Railroad Company; Louisiana Western Railroad Company; Morgan's Louisiana & Texas Railroad & Steamship Company; Lake Charles & Northern Railroad Company; Vicksburg, Shreveport & Pacific Railway Company; Louisiana & Arkansas Railway Company; Louisiana Railway & Navigation Company; Gulf, Colorado & Santa Fe Railway Company; The Texas

& Gulf Railway Company; Missouri & North Arkansas Railroad Company; Illinois Central Railroad Company; Southern Railway Company; Northern Alabama Railway Company; New Orleans Great Northern Railroad Company, and Mobile & Ohio Railroad Company be and they are hereby, notified and required to cease and desist and for a period of two years hereafter, or until otherwise ordered, to abstain from making any such allowances to any of the above named parties to the record in respect of any such above described service" be and the same is hereby vacated and set aside as to the petitioners herein.

No. 90.

LOUISIANA AND PACIFIC RAILWAY COMPANY, HUDSON RIVER LUMBER Company, King-Ryder Lumber Company, Calcasieu Long Leaf Lumber Company, Longville Lumber Company, and The Long-Bell Lumber Company, Petitioners; Railroad Commission of Louisiana, Intervenor,

v.

UNITED STATE OF AMERICA, LOUISIANA WESTERN RAILROAD COMPANY, Morgan's Louisiana and Texas Railway and Steamship Company, New Orleans, Texas and Mexico Railroad, The St. Louis and San Francisco Railroad Company, Respondents, and Interstate Commerce Commission and Atchison, Topeka & Santa Fe Railway Company, Intervening Respondents.

Petition for Appeal.

(Filed November 29, 1913.)

The United States, respondent, and the Interstate Commerce Commission, intervenor, feeling themselves aggrieved by the final decree entered in the above-entitled cause on November 28, 1913, by their counsel, pray an appeal to the Supreme Court of the United States from the said final decree.

The particulars wherein the United States and the Interstate Commerce Commission consider said final decree erroneous are set forth in the assignment of errors herewith filed, to which reference is made.

And the United States, respondent, and the Interstate Commerce Commission, intervenor, further pray that a transcript of the record, proceedings, and papers on which the said final decree was made and entered, duly authenticated, may be transmitted forthwith to
785 the Supreme Court of the United States.

Washington, November 29, 1913.

J. C. McREYNOLDS,
Attorney General of the United States.
CHAS. W. NEEDHAM,
Solicitor for the Interstate Commerce Commission.

MARTIN A. KNAPP,
Presiding Judge United States Commerce Court.

786 In the United States Commerce Court, June Session, 1913.

No. 90.

LOUISIANA & PACIFIC RAILWAY COMPANY et al., Petitioners,
v.
THE UNITED STATES OF AMERICA et al., Respondents.

Assignment of Errors.

(Filed November 29, 1913.)

Come now the United States of America, by its Attorney General, and the Interstate Commerce Commission, by its Solicitor, and in connection with their petition for appeal, file the following assignment of errors on which they will rely on said appeal to the Supreme Court of the United States from the final order or decree of the Commerce Court, entered against them on November 28, 1913, in the above-entitled cause.

The Commerce Court erred—

I.

In not granting the motion to dismiss for want of jurisdiction, and in holding and adjudging that the Commerce Court had jurisdiction to hear and determine the cause.

II.

In holding and adjudging that the order of the Interstate Commerce Commission sought to be annulled and enjoined is an affirmative order within the power of the Court to review, and in not holding and adjudging that the same is a negative order and beyond the power of the court to review.

787 III.

In not dismissing the petition for the (*a*) same does not set forth any cause of action, and is insufficient to warrant the relief granted, or to form the basis for any relief from the order of the commission; (*b*) nor have the said petitioners shown that there is any equity in the said petition upon which to grant the relief prayed, or to form the basis for any relief from the order of the commission; (*c*) nor have the petitioners shown that in making its said order the Interstate Commerce Commission acted beyond or without its jurisdiction or exceeded any power or authority conferred upon it by the act to regulate commerce; (*d*) nor have the petitioners shown that in making its said order the Interstate Commerce Commission violated any right of the said petitioners protected by the Constitution of the United States, or any other right of the said petitioners over which this court may exercise jurisdiction.

IV.

In holding and adjudging that with relation to the freight of its proprietary lumber companies the Louisiana and Pacific Railway Company is a common carrier by railroad engaged in commerce among the several states and subject to the act to regulate commerce, approved February 4, 1887, and the various acts amendatory thereof or supplementary thereto.

V.

In holding that the Commission "impliedly, if not expressly, held" that the petitioner was a common carrier, and therefore entitled to a division out of main line lumber rates for services which it performed for its proprietary lumber company.

788

VI.

In holding that a mere switching movement could be made a part of a through route instead of holding that the switching movement was an independent movement additional to the line haul.

VII.

In holding that the Commission was without power to inquire into and go behind the mere forms of organization and methods of doing business by the lumber company and the tap line, and ascertain the true facts regarding the relations between the two companies; and whether the tap line was used as a medium for securing rebates on the lumber company's traffic.

VIII.

In holding that the Commission, after finding that the tap line was a medium for the payment of rebates on the lumber company's traffic, could not order the main-line carriers to desist from making such payments.

IX.

In not holding and adjudging that the organization of the Louisiana and Pacific Railway Company and the transfer to it by the lumber companies of the railway tracks and equipment was the creation of a device for the purpose of attempting to shift the old open and illegal rebating transactions between the lumber companies, as shippers, and the trunk lines, as carriers, to private transactions between the Louisiana and Pacific Railway Company and the trunk lines, in order to evade the provisions of the act to regulate commerce, and, simultaneously, to maintain the advantages of the parties.

X.

789 In not holding and adjudging that the lumber companies are making the transportation of their enormous traffic a matter of bargain and sale, and with the power wielded in

controlling the routing to compel the trunk lines to make allowances to the Louisiana and Pacific Railway Company, resulting in undue and illegal preferences and discriminations forbidden by the act to regulate commerce in favor of the lumber companies and against other shippers.

XI.

In not holding and adjudging upon the facts found by the commission that the transportation of the products of the proprietary companies by the petitioner is not transportation by a common carrier.

XII.

In not holding and adjudging that the conclusions and orders of the commission are founded upon substantial evidence and are not arbitrary, and in holding and adjudging that certain parts of the order of the commission are arbitrary, null, and void, as to the petitioners.

XIII.

In vacating and setting aside as to the petitioners the portions of the amended order of the Interstate Commerce Commission made October 30, 1912, which declared the tracks and equipment of the petitioners to be plant facilities, and the service rendered thereon to be a plant service, and directing the trunk line carriers to cease and desist from making any allowances to the petitioners in respect to any such plant service.

XIV.

In holding and adjudging that a common carrier may,
790 as to certain shippers, and particularly as to a proprietary company, be a mere plant facility and perform merely plant or industrial services as distinguished from transportation services, and at the same time holding and adjudging that the actual service rendered by the tap-line from the time it takes the logs until it delivers the finished product to the trunk line is the same for proprietary and non-proprietary mills, and as this is held by the Interstate Commerce Commission to be a transportation service by an interstate common carrier as to the latter, it must be held to be a similar service as to the former.

XV.

In disposing of the four separate and distinct cases in a single blanket opinion of general observations, without regard to the peculiar facts of each particular case, after holding that the orders of the commission are separate and distinct as to each of the tap-lines, and are expressly based upon a careful investigation of and separate findings in relation to each of the companies.

XVI.

In granting the relief prayed by the petitioners, or a substantial part thereof.

Wherefore the United States and the Interstate Commerce Commission pray that the said final decree of the Commerce Court, entered November 28, 1913, be reversed, annulled and set aside, and for such other and further order as may be appropriate.

J. C. McREYNOLDS,
Attorney General of the United States.
CHAS. W. NEEDHAM,
Solicitor for the Interstate Commerce Commission.

791 In the United States Commerce Court, June Session, 1913.

No. 90.

LOUISIANA AND PACIFIC RAILWAY COMPANY, HUDSON RIVER LUMBER COMPANY, KING-RYDER LUMBER COMPANY, CALCASIEU LONG LEAF LUMBER COMPANY, LONGVILLE LUMBER COMPANY, AND THE LONG-BELL LUMBER COMPANY, Petitioners; Railroad Commission of Louisiana, Intervenor,

v.

UNITED STATES OF AMERICA, LOUISIANA WESTERN RAILROAD COMPANY, Morgan's Louisiana and Texas Railway and Steamship Company, New Orleans, Texas and Mexico Railroad, The St. Louis and San Francisco Railroad Company, Respondents, and Interstate Commerce Commission, and Atchison, Topeka and Santa Fe Railway Company, Intervening Respondents.

Order Allowing Appeal.

(Entered November 29, 1913.)

In the above-entitled cause, the United States and the Interstate Commerce Commission, having made and filed their petition praying an appeal to the Supreme Court of the United States from the final decree of the Commerce Court entered November 28, 1913, and having at the same time made and filed an assignment of errors, and having in all respect conformed to law and the rules of court—

It is ordered and decreed that the said appeal be and the same is hereby, allowed, as prayed, and made returnable thirty days from the date hereof. And the clerk is directed to transmit forthwith a properly authenticated transcript of the records, papers, and proceedings to the Supreme Court of the United States.

November 29, 1913.

No. 90.

LOUISIANA & PACIFIC RAILWAY COMPANY et al., Petitioners,
v.
THE UNITED STATES OF AMERICA et al., Respondents.

Assignment of Errors.

(Filed November 29, 1913.)

Comes now The Atchison, Topeka & Santa Fe Railway Company and the Gulf, Colorado & Santa Fe Railway Company, and in connection with their petition for appeal, file the following assignment of errors on which they will rely on said appeal to the Supreme Court of the United States from the final order or decree of the Commerce Court, entered against them on November 28, 1913, in the above entitled cause.

The Commerce Court erred—

I.

In not granting the motion to dismiss for want of jurisdiction, and in holding and adjudging that the Commerce Court had jurisdiction to hear and determine the cause.

II.

In holding and adjudging that the order of the Interstate Commerce Commission sought to be annulled and enjoined is an affirmative order within the power of the Court to review, and in not holding and adjudging that the same is a negative order and beyond the power of the court to review.

III.

795 In not dismissing the petition for the reason that (*a*) the same does not set forth any cause of action, and is insufficient to warrant the relief granted, or to form the basis for any relief from the order of the Commission; (*b*) nor have the said petitioners shown that there is any equity in the said petition upon which to grant the relief prayed, or to form the basis for any relief from the order of the Commission; (*c*) nor have the petitioners shown that in making its said order the Interstate Commerce Commission acted beyond or without its jurisdiction or exceeded any power or authority conferred upon it by the act to regulate commerce; (*d*) nor have the petitioners shown that in making its said order the Interstate Commerce Commission violated any right of the said petitioners protected by the Constitution of the United States, or any other right of the said petitioners over which this court may exercise jurisdiction.

IV.

In holding and adjudging that with relation to the freight of its proprietary lumber companies, the Louisiana and Pacific Railway Company is a common carrier by railroad engaged in commerce among the several states and subject to the act to regulate commerce, approved February 4, 1887, and the various acts amendatory thereof or supplementary thereto.

V.

In holding that the Commission "impliedly, if not expressly, held" that the petitioner was a common carrier, and therefore entitled to a division out of main line lumber rates for services which it performed for its proprietary lumber company.

VI.

In holding that a mere switching movement could be made a part of a through route instead of holding that the switching movement was an independent movement additional to the line haul.

796

VII.

In holding that the Commission was without power to inquire into and go behind the mere forms of organization and methods of doing business by the lumber company and the tap lines and ascertain the true facts regarding the relations between the two companies, and whether the tap line was used as a medium for securing rebates on the lumber company's traffic.

VIII.

In holding that the Commission after finding that the tap line was a medium for the payment of rebates on the lumber company's traffic, could not order the main-line carriers to desist from making such payments.

IX.

In not holding and adjudging that the organization of the Louisiana & Pacific Railway Company and the transfer to it by the lumber companies of the railway tracks and equipment was the creation of a device for the purpose of attempting to shift the old open and illegal rebating transactions between the lumber companies, as shippers, and the trunk lines, as carriers, to private transactions between the Louisiana & Pacific Railway Company and the trunk lines, in order to evade the provisions of the act to regulate commerce and, simultaneously, to maintain the advantages of the parties.

X.

In not holding and adjudging that the lumber companies are making the transportation of their enormous traffic a matter of

bargain and sale, and with the power wielded in controlling the routing, are forcing the trunk lines to make allowances to the
797 Louisiana & Pacific Railway Company, resulting in undue and illegal preferences and discriminations forbidden by the act to regulate commerce in favor of the lumber companies and against other shippers.

XI.

In not holding and adjudging upon the facts found by the Commission that the transportation of the products of the proprietary companies by the petitioners is not transportation by a common carrier.

XII.

In not holding and adjudging that the conclusions and orders of the Commission are founded upon substantial evidence and are not arbitrary, and in holding and adjudging that certain parts of the order of the Commission are arbitrary, null, and void, as to the petitioners.

XIII.

In vacating and setting aside as to the petitioners the portions of the amended order of the Interstate Commerce Commission, made October 30, 1912, which declared the tracks and equipment of the petitioners to be plant facilities, and the service rendered thereon to be a plant service, and directing the trunk line carriers to cease and desist from making any allowances to the petitioners in respect to any such plant service.

XIV.

In holding and adjudging that a common carrier may, as to certain shippers, and particularly as to a proprietary company, be a mere plant facility and perform merely plant or industrial services as distinguished from transportation services, and at the same time holding and adjudging that the actual service rendered by the tap-line from the time it takes the logs until it delivers the finished product to the trunk line is the same for proprietary and non-proprietary mills, and as this is held by the Interstate Com-
798 merce Commission to be a transportation service by an interstate common carrier as to the latter, it must be held to be a similar service as to the former.

XV.

In disposing of the four separate and distinct cases in a single blanket opinion, without regard to the peculiar facts of each particular case, after holding that the orders of the Commission are separate and distinct as to each of the tap-lines, and are expressly based upon a careful investigation of and separate findings in relation to each of the companies.

XVI.

In granting the relief prayed by the petitioners, or a substantial part thereof.

Wherefore, The Atchison, Topeka & Santa Fe Railway Company and the Gulf, Colorado & Santa Fe Railway Company pray that the said final decree of the Commerce Court, entered November 28, 1913, be reversed, annulled and set aside, and for such other and further order as may be appropriate.

No. 90.

LOUISIANA & PACIFIC RAILWAY COMPANY, HUDSON RIVER LUMBER Company, King-Ryder Lumber Company, Calcasieu Long Leaf Lumber Company, Longville Lumber Company, and The Long-Bell Lumber Company, Petitioners,

v.

UNITED STATES OF AMERICA, LOUISIANA WESTERN RAILROAD Company, Morgan's Louisiana & Texas Railway & Steamship Company, New Orleans, Texas & Mexico Railroad, and the St. Louis & San Francisco Railroad Company, Respondents; Interstate Commerce Commission, the Atchison, Topeka & Santa Fe Railway Company, Gulf Colorado & Santa Fe Railway Company, and the Railroad Commission of Louisiana Intervenors.

Bond on Appeal.

(Filed December 5, 1913.)

Know all men by these presents, that we, The Atchison, Topeka & Santa Fe Railway Company and the Gulf, Colorado & Santa Fe Railway Company, as principals and the National Surety Company, a corporation of the State of New York, as surety are held and firmly bound unto the Louisiana & Pacific Railway Company, Hudson River Lumber Company, King-Ryder Lumber Company, Calcasieu Long Leaf Lumber Company, Longville Lumber Company, and The Long-Bell Lumber Company in the sum of Five Hundred Dollars ($500.00), to be paid to the Louisiana & Pacific Railway Company, Hudson River Lumber Company, King-Ryder Lumber Company, Calcasieu Long Leaf Lumber Company, Longville Lumber Company, and The Long-Bell Lumber Company. We bind ourselves and each of our successors and assigns jointly and severally by these presents.

Sealed with our seals this fifth day of December, A. D.
801 nineteen hundred and thirteen.

Whereas, Heretofore, to wit, on the 28th day of November, 1913, in a suit pending in the United States Commerce Court, and numbered 90 on the docket of said Court wherein the Louisiana & Pacific Railway Company, Hudson River Lumber Company, King-Ryder Lumber Company, Longville Lumber Company, Calcasieu Long Leaf Lumber Company, and the Long-Bell Lumber Company, were petitioners, and the United States of America, Louisiana Western Railroad Company, Morgan's Louisiana & Texas Railway & Steamship Company, New Orleans, Texas & Mexico Railroad, and the St. Louis and San Francisco Railroad Company, were respondents, and the Interstate Commerce Commission, The Atchison, Topeka & Santa Fe Railway Company, the Gulf, Colorado & Santa Fe Railway Company, and the Railroad Commission of Louisiana, were intervenors, an order, judgment and decree was rendered against said respondents and intervenors, and

Whereas, Said The Atchison, Topeka & Santa Fe Railway Company, and the Gulf, Colorado & Santa Fe Railway Company, have appealed from said order and decree to the Supreme Court of the United States, and have obtained citation directed to the said Louisiana & Pacific Railway Company, Hudson River Lumber Company, King-Ryder Lumber Company, Calcasieu Long Leaf Lumber Company, Longville Lumber Company, and The Long-Bell Lumber Company, citing and admonishing them and each of them to be and appear at a session of the Supreme Court of the United States to be held at the City of Washington within thirty days from the allowance of the said appeal.

Now, the condition of the above obligation is such, that if the said The Atchison, Topeka & Santa Fe Railway Company and the Gulf, Colorado & Santa Fe Railway Company shall prosecute their said appeal to effect and shall pay all costs, if they fail to
802 make their appeal good, then the above obligation to be void, otherwise to remain in full force and effect.

Præcipe for Record.

To the Clerk:

You will please prepare a transcript of the record in the above-entitled cause, to be filed in the office of the clerk of the Supreme Court of the United States, upon the appeal from the final order or decree of the Commerce Court entered November 28, 1913, and include in said transcript the following pleadings, proceedings and papers on file or of record, to wit:

Petition, with exhibits attached, filed January 6, 1913.

Return of service of petition on respondents, filed January 7, 1913.

Answer of the United States filed January 29, 1913.

Answer of the Interstate Commerce Commission, filed February 8, 1913.

Answer of Louisiana Western Railroad Company, filed February 6, 1913.

Demurrer of the M. L. & S. F. R. R. & S. Co., filed February 3, 1913.

Joint answer of N. O. T. & M. R. R. Co. and St. L. & S. F. R. R. Co., filed February 6, 1913.

Petition of intervention of Railroad Commission of Louisiana, filed February 10, 1913.

Order granting the same entered February 10, 1913.

Petition of intervention of A. T. & S. F. Ry Co. et al., filed February 10, 1913.

804 Order granting same entered February 10, 1913.

Journal entry on hearing to dismiss for want of jurisdiction, February 10, 1913.

Order denying motion to dismiss for want of jurisdiction, February 24, 1913.

Order designating Judge Carland to hear testimony entered March 5, 1913.

The following documents contained in the record and proceedings, viz:

1. Agreement, October 31, 1906, Louisiana Western Railroad Company, Louisiana & Pacific Railway Company, Hudson River Lumber Company, King-Ryder Lumber Company, Calcasieu Long Leaf Lumber Company, and Long-Bell Lumber Company, attached to the petition as exhibit A, filed March 2, 1913.

2. Agreement, October 13, 1906, Colorado Southern New Orleans & Pacific Railroad Company, St. Louis & San Francisco Railroad Company, Louisiana & Pacific Railway Company, King-Ryder Lumber Company, Hudson River Lumber Company, Calcasieu Long Leaf Lumber Company, and Long-Bell Lumber Company, marked exhibit B.

3. Agreement, October 31, 1906, Louisiana & Pacific Railway Company and Lake Charles & Northern Railroad Company, filed March 22, 1913.

4. Agreement, February 21, 1908, Louisiana & Pacific Railway Company and Lake Charles & Northern Railroad Company, filed March 22, 1913, with the resolution, and certified copy of minutes, accompanying the same.

5. Agreement, March 2, 1908, Louisiana & Pacific Railway Company and Hudson River Lumber Company, filed March 22, 1913.

6. Agreement, March 2, 1908, Louisiana & Pacific Railway Company and King-Ryder Lumber Company, filed March 22, 1913.

7. Agreement, July 1, 1908, Louisiana & Pacific Railway Company and Longville Lumber Company, filed March 22, 1913.

8. Agreement, March 2, 1908, Louisiana & Pacific Railway Company and Calcasieu Long Leaf Lumber Company, filed March 22, 1913.

9. Agreement, October 13, 1906, Colorado Southern, New Orleans

& Pacific Railroad Company, St. Louis & San Francisco Railroad Company, Louisiana & Pacific Railway Company, King-Ryder Lumber Company, Hudson River Lumber Company, Calcasieu Long Leaf Lumber Company, and Long-Bell Lumber Company, filed March 22, 1913.

10. Certificate of Secretary of State showing increase of the capital stock of Louisiana & Pacific Railway Company, charter of Louisiana & Pacific Railway Company and certificate thereof, amendment to article 3 of said charter, and certificate of stockholders' meeting, all filed March 22, 1913.

805 Agreement March 1, 1911, Louisiana & Pacific Railway Company and Calcasieu Long Leaf Lumber Company; agreement March 1, 1911, between Louisiana & Pacific Railway Company and Longville Lumber Company; agreement March 11, 1911, Louisiana & Pacific Railway Company and King-Ryder Lumber Company; agreement March 1, 1911, Louisiana & Pacific Railway Company and Hudson River Lumber Company, with the certificate of the Secretary of the Interstate Commerce Commission, dated April 10, 1913.

Certified transcripts of testimony at hearings in proceedings before Interstate Commerce Commission, I. & S. Docket No. 11, filed March 26, 1913.

Order of Interstate Commerce Commission, in Docket No. 3400, Sub. 7, I. & S. Docket No. 11-*a*, filed May 10, 1913.

Certified copies of exhibits in proceedings before Interstate Commerce Commission, I. & S. Docket No. 11, filed May 8, 1913.

LOUISIANA & PACIFIC RAILWAY COMPANY, HUDSON RIVER LUMBER Company, King-Ryder Lumber Company, Calcasieu Long Leaf Lumber Company, Longville Lumber Company, and The Long-Bell Lumber Company, Petitioners,

vs.

UNITED STATES OF AMERICA, LOUISIANA WESTERN RAILROAD Company, Morgan's Louisiana & Texas Railway and Steamship Company, New Orleans, Texas & Mexico Railroad, and The St. Louis & San Francisco Railroad Company, Respondents; Interstate Commerce Commission, Atchison, Topeka & Santa Fe Railway Company; Gulf, Colorado & Santa Fe Railway Company Railroad Commission of Louisiana, Interveners.

UNITED STATES OF AMERICA, *ss:*

I, G. F. Snyder, Clerk of the United States Commerce Court, do hereby certify that the foregoing transcript, together with the original certified copies of exhibits filed in the proceedings before the Interstate Commerce Commission entitled "In the Matter of the Investigation and Suspension of Schedules Cancelling Through Rates with Certain Tap Line Connections," Investigation and Suspension Docket No. 11, constitutes a complete record of the proceedings had and papers filed in the above entitled cause, made in accordance with the præcipe filed in the Clerk's Office of said Court.

In testimony whereof, I have hereunto set my hand and affixed the seal of the United States Commerce Court this 27th day of December, A. D. 1913.

[Seal of the United States Commerce Court.]

G. F. SNYDER, *Clerk.*

UNITED STATES OF AMERICA et al., Appellants,
v.
LOUISIANA AND PACIFIC RAILWAY Co. et al.

Instructions to Omit Certain Matter From the Printing.

To the Clerk:

In printing the separate record in the foregoing appeal, you will please omit the following, viz.—

1. The Report and Supplemental Report, and the Order and the Amended Order of the Interstate Commerce Commission.

2. Certified transcript of testimony at hearings in proceedings before the Interstate Commerce Commission, I. & S. Docket No. 11, filed March 26, 1913, consisting of 4 printed volumes marked, respectively, Volumes I, II, III, IV, and the certificates of Secretary McGinty, attached thereto.

3. Order of Interstate Commerce Commission, in Docket No. 3400, Sub. 7, I. & S. Docket No. 11-A, filed May 10, 1913.

4. Certified typewritten copies of exhibits in proceedings before the Interstate Commerce Commission, I. & S. Docket No. 11, filed May 8, 1913, following short letter of H. M. Garwood, and the certificate of Secretary McGinty, attached thereto.

813 5. Opinion of the United States Commerce Court.

Other instructions are separately given to print in a single volume certain parts of the matter so to be omited.

JNO. W. DAVIS,
Solicitor General.

No. 91.

WOODWORTH & LOUISIANA CENTRAL RAILWAY COMPANY, LIMITED; Rapides Lumber Company, Limited; The Long-Bell Lumber Company, Petitioners,

vs.

THE UNITED STATES OF AMERICA, CHICAGO, ROCK ISLAND & PACIFIC Railway Company, Rock Island, Arkansas & Louisiana Railroad Company, Respondents; Interstate Commerce Commission, Atchison, Topeka & Santa Fe Railway Company, Gulf, Colorado & Santa Fe Railway Company, Railroad Commission of Louisiana, Interveners.

UNITED STATES OF AMERICA, *ss:*

Be it remembered that in the United States Commerce Court, in the city of Washington, District of Columbia, at the times hereinafter mentioned, the following papers were filed and proceedings had in the above entitled cause, to wit:

Petition and Exhibits.

(Filed January 8, 1913.)

1 In the United States Commerce Court.

WOODWORTH & LOUISIANA CENTRAL RAILWAY COMPANY, LIMITED; Rapides Lumber Company, Limited; The Long-Bell Lumber Company, Petitioners,

vs.

THE UNITED STATES OF AMERICA, CHICAGO, ROCK ISLAND & PACIFIC Railway Company, Rock Island, Arkansas & Louisiana Railroad Company, Respondents.

Petition.

To the Judges of the United States Commerce Court:

Your petitioners complain of the respondents, and for cause of action say:

1. That the petitioner, the Woodworth & Louisiana Central Railway Company, Limited, is a railway corporation duly chartered, incorporated and existing under the laws of the State of Louisiana, and by its charter duly empowered to construct, maintain and
2 operate or to lease and operate a railroad in the State of Louisiana as a common carrier of freight and passengers, and it now has and exercises franchises, powers, rights, privileges and

immunities conferred by law on corporations created and organized for railroad purposes.

That the Constitution and Laws of the State of Louisiana provide as follows:

Constitution, Art. 271. "Any railroad corporation or association organized for the purpose shall have the right to construct and operate a railroad between any points within this state and connect at the state line with railroads of other states. Every railroad company shall have the right with its road to intersect, connect with or cross any other railroad, and shall receive and transport each other's passengers, tonnage and cars, loaded or empty, without delay or discrimination." Const. 1879, Art. 243.

Constitution, Art. 272. "Railways heretofore constructed, or that may hereafter be constructed in this state, are hereby declared public highways, and railroad companies common carriers." Const. 1879, Art. 244.

Constitution, Art. 273. "Every railroad or other corporation, organized or doing business in this state, under the laws or authority thereof, shall have and maintain a public office or place in this state for the transaction of its business, where transfers of stock shall be made, and where shall be kept for public inspection books in which shall be recorded the amount of capital stock subscribed, the names of owners of stock, the amounts owned by them respectively, the amount of stock paid, and by whom, the transfers of said stock, with the date of transfer, the amount of its assets and liabilities, and the names and places of residence of its officers." Const. 1879 p. 245.

3 Revised Statutes, Sec. 1479. "Whenever the state or any political corporation of the same, created for the purpose of exercising any portion of the governmental powers in the same, or the board of administrators or directors of any charity hospital, or any board of school directors thereof, or any corporation constituted under the laws of this state for the construction of railroads, plank roads, turnpike roads or canals for navigation; or for the construction or operation of waterworks or sewerage to supply the public with water and sewerage, or for the purpose of transmitting intelligence by magnetic telegraph, cannot agree with the owner of land which may be wanted for its purchase, it shall be lawful for such state, corporation, board of administrators, directors or person to apply by petition to the District Court in which the same may be situated, or if it extends into two districts, to the judge of the District Court in which the owner resides, and if the owner does not reside in either district, to either of the District Courts, describing the land necessary for the purposes, with a plan of the same, and a statement of the improvement thereon, if any, and the name of the owner thereof, if known at present in the state, with a prayer that the land be adjudged to such state, corporation, board of administrators or directors upon payment to the owner of all such damages as he may sustain in consequence of the expropriation of said land for such public works; all claims for lands or damages to the owner caused by its taking or for expropriation for such public work shall be barred by two (2) years' pre-

scription, which shall commence to run from the date at which the land was actually occupied and used for the construction of the works." (As amended by Act 227, 1902, p. 457.)

Said petitioner operates a line of standard gauge railroad
4 from Woodworth, Louisiana, to Lamorie, Louisiana, a distance of about six miles; and operates a narrow gauge railroad from Woodworth, Louisiana, west to a station called Hineston, Louisiana, a distance of about eighteen miles.

The line of railroad of the petitioner, the Woodworth & Louisiana Central Railway Company, connects with the St. Louis, Iron Mountain & Southern Railway, at Woodworth, Louisiana, and with the Chicago, Rock Island & Pacific Railway Company, Morgan's Louisiana & Texas Railway & Steamship Company, and the Texas & Pacific Railway at Lamorie, Louisiana.

The petitioner Woodworth & Louisiana Central Railway Company complies with the rules and regulations promulgated by the State Railroad Commission of Louisiana and by the Interstate Commerce Commission, and complies with the laws of the State of Louisiana and of the United States relating to common carriers by railroad. It is engaged in both state and interstate commerce and is a common carrier by railroad for all persons desiring its services.

It carries a full line of class and commodity rates between points on its own lines in Louisiana and concurs in joint tariffs applying between points on its own road and points on connecting lines in Louisiana, and carries a full line of class and commodity rates from and to all interstate territory via all connecting lines.

That part of the road between Woodworth and Lamorie handles a diversified tonnage made up of general merchandise, agricultural and lumber products. There never have been any logging operations at all on this part of the road. The country through which it runs is an agricultural community.

5 2. The petitioner Rapides Lumber Company is a corporation organized under the laws of the State of Louisiana for the purpose of manufacturing and selling timber and lumber and of owning timber lands for the purpose of obtaining timber therefrom to manufacture into lumber.

It owns and operates a lumber mill, planing mill and plant for the manufacture of lumber at the town of Woodworth, Louisiana, on the line of the petitioner, the Woodworth & Louisiana Central Railway Company, and is a large shipper over said railroad.

3. The petitioner Long-Bell Lumber Company is a corporation organized under the laws of the State of Missouri for the purpose of engaging in the wholesale and retail lumber business. It acts as a selling agent for the product of the Rapides Lumber Company, and it is a party to one of the contracts hereinafter set out.

4. The respondent Chicago, Rock Island & Pacific Railway Company is a consolidated corporation organized under the laws of the States of Illinois and Iowa, and operates in connection with or over the lines of the railway and right-of-way of the respondent Rock Island, Arkansas & Louisiana Railway Company, a line of railways in the States of Louisiana, Texas, Arkansas, Missouri and other states.

5. The Rock Island, Arkansas & Louisiana Railway Company is a railway corporation, organized under the laws of the State of Arkansas, and on the 1st day of August, 1906, it owned and operated certain railway lines in and through the States of Arkansas
6 and Louisiana, and was then constructing a line of railroad into and through Lamorie, in Rapides Parish, Louisiana, which line of railway, when completed, would reach directly, and through its connections, a large number of markets wherein the products of the petitioners, Lumber Companies, could be sold.

6. That on or about the 28th day of January, 1908, the Interstate Commerce Commission entered upon a hearing and investigation in a certain cause entitled "Star Grain & Lumber Company et al. v. Atchison, Topeka & Santa Fe Ry. Co. et al., Docket No. 1319." Hearings were had at various times and places, and on the 23d day of June, 1908, the Interstate Commerce Commission made a report and rendered an opinion, which report and opinion will be found in the 14 Interstate Commerce Commission Reports, at page 364 et seq., reference to which is hereby made. Further hearings were thereafter had in said case of Star Grain & Lumber Company et al. v. Atchison, Topeka & Santa Fe Railway Company et al., Docket No. 1319, and on December 7, 1909, respondent the Interstate Commerce Commission made a supplemental report, which is published in the 17th Interstate Commerce Commission Reports, at page 338 et seq., reference to which supplemental report is hereby made, and the same is made a part hereof as fully as if set out herein.

7. By reason of the rendition of this report and opinion, and because the Interstate Commerce Commission demanded under threat of criminal prosecution that they comply with the require-
7 ments thereof, the trunk line railroad companies of the United States, or a large number of them, including the respondent Railroad Companies herein, about the month of August, 1910, filed with the Interstate Commerce Commission new tariffs or supplemental tariffs on lumber, to become effective in thirty days, which new tariffs or schedules canceled all joint tariffs which the said respondent Railway Companies had theretofore had and maintained with the petitioner Railway Company, and except for the order of the Interstate Commerce Commission, set out in paragraph 8 hereof, would have left said petitioner without any joint interstate rates or through routes on lumber with the other railroads of the country.

8. Thereupon the Interstate Commerce Commission made and entered of record an order, in words and figures as follows, to-wit:

At a General Session of the Interstate Commerce Commission Held at Its Office in Washington, D. C., on the 3d Day of September, A. D. 1910.

Docket No. 3400, Sub. 7.

In the Matter of the INVESTIGATION AND SUSPENSION OF SUPPLEMENT No. 3 to I. C. C. No. 23, Filed by the Texas & New Orleans Railroad Company, the Galveston, Harrisburg & San Antonio Railway Company, Houston & Texas Central Railroad Company, Houston, East & West Texas Railroad Company, Houston & Shreveport Railroad Company, Louisiana Western Railroad Company, and Morgan's Louisiana & Texas Railroad Company.

It appearing from the records of the Interstate Commerce Commission that there has been filed with the Commission by the
8 Texas & New Orleans Railroad Company, the Galveston, Harrisburg & San Antonio Railway Company, Houston & Texas Central Railroad Company, Houston, East & West Texas Railroad Company, Houston & Shreveport Railroad Company, Louisiana Western Railroad Company, and Morgan's Louisiana & Texas Railroad Company, schedule designated as Supplement No. 3 to I. C. C. No. 23, effective 10th day of September, 1910, which schedule states new individual or joint rates, fares or charges, applicable upon the articles named therein, that are in excess of the rates, fares and charges now in effect,

It is ordered that the Commission, upon complaint, without formal pleading and without answer by the interested carriers, do enter upon a hearing concerning the propriety of such advances and the lawfulness of the rates, fares, or charges stated in said schedule, with a view to making such order in the premises as may, after full hearing seem just and proper; and that such hearing be held at such time and place as may be hereafter fixed by the Commission.

The Commission being further of the opinion that, pending such hearing and decision of the Commission concerning the propriety of such rates, fares or charges, the operation of such schedule should be postponed for the reason that from a consideration of the character and amount of the advances and the circumstances under which they have been made, it appears to the Commission there is sufficient ground for claiming that said advances are unlawful and that the rates, fares or charges established by said schedule are unjust and unreasonable, and therefore unlawful, and that the public interest requires that the operation of said schedule be deferred until sufficient time has been given for an investigation by this Commission.

It is further ordered that the operation of the aforesaid schedule be suspended, and that the use of the rates, fares or charges therein specified be deferred until January 5, 1911.

9 It is further ordered that the several carriers above named that have filed schedules be and they are hereby made defendants to this proceeding, and that a copy of this order be forthwith served upon each of them; and

It is further ordered that the carriers named in said schedule and

supplements thereto as participating therein be and they are hereby made defendants to this proceeding, and that a copy of this order be forthwith served upon each of them.

A true copy.

EDW. A. MOSELEY, *Secretary.*"

Thereupon the Interstate Commerce Commission made similar orders on or about the same date, suspending the operation of the schedules of various other railroad companies within the United States, and thereby kept in force and effect the joint tariffs and the maintenance of through routes and joint rates between the petitioner Railway Company and the respondent railroad companies herein mentioned, and the various other trunk line railroads and systems of the United States for a period of 120 days. Reference to which orders is hereby made and the same are made a part hereof.

And the said Interstate Commerce Commission, from time to time, continued by appropriate orders, similar in form to the order hereinabove set out, the suspension of the cancellation of rates between various railroad companies of the United States, including the respondent railroad companies, and the petitioner Railway Company, until the end of the 30th day of April, 1912; the last of said orders being in words and figures as follows, to-wit:

10 "At a General Session of the Interstate Commerce Commission Held at its Office in Washington, D. C., on the 16th Day of January, A. D. 1912.

Charles A. Prouty,
Judson C. Clements,
Franklin K. Lane,
Edgar E. Clark,
James S. Harlan,
Charles C. McChord,
Balthasar H. Meyer,
Commissioners.

Investigation and Suspension Docket No. 11.

In the Matter of the INVESTIGATION AND SUSPENSION OF SCHEDULES Canceling Through Rates with Certain Tap Line Connections.

It Appearing, That, by orders heretofore entered, the Commission instituted an investigation and hearing concerning the propriety of various tariffs filed by certain carriers wherein joint rates with and divisions or allowances to so-called tap line connections were to be canceled and withdrawn; and the Commission, by orders duly filed and served, having suspended and deferred the effectiveness of such tariffs until June 1, 1911; and that under authority of an order entered herein on May 18, 1911, the various carriers withdrew their said tariffs conceling such divisions or allowances and refiled them

to become effective on November 1, 1911; and that under authority of a further order entered herein on October 16, 1911, the various carriers withdrew their said tariffs canceling such divisions or allowances, and refiled them to become effective on February 1, 1912; and,

It Further Appearing, That a full investigation of the said matters has been had, but it has been impossible for the Commission to reach a final decision of the questions and matters involved within the period for which the operation of the said schedules has been
11 voluntarily postponed by the carriers; namely, on or before February 1, 1912; and,

It Further Appearing, That the various carriers by which the cancellations in question were published, republished and filed with the Commission are desirous of withdrawing the said cancellation tariffs and refiling them, thereby further postponing their effectiveness to May 1, 1912;

It Is Ordered, That each and all of the carriers that are parties to this record be, and they are hereby, authorized on three days' notice to the Commission and to the public, to cancel and withdraw all such tariffs filed with the Commission, and under their present terms to become effective on or before February 1, 1912, in which are contained cancellations or withdrawals of joint rates or divisions with or allowances to so-called tap line connections, and, Provided, the said tariffs are forthwith refiled to become effective on May 1, 1912;

It Is Further Ordered, That all tariffs or supplements issued under authority of this order shall bear the following notation on title page:

Issued by authority of the Interstate Commerce Commission's Order of January 16, 1912, in Investigation and Suspension Docket No. 11.

A true copy.

C. A. PROUTY, *Chairman.*"

9. Pursuant to the orders of date the 3d day of September, 1910, one of which is hereinabove fully set out, the Interstate Commerce Commission did enter upon a further hearing of the matter of the propriety of the advances and the lawfulness of the rates, fares or charges, stated in said schedules, mentioned in said orders, and thereupon, and on the 15th day of November, 1910, gave the petitioner Railway Company, and to various other railroad com-
12 panies in the United States, including respondent railroad companies herein, a notice in words and figures as follows, to-wit:

"NOVEMBER 15, 1910.

Docket No. 1319.

STAR GRAIN AND LUMBER COMPANY et al.
vs.
ATCHISON, TOPEKA & SANTA FE RY. CO. et al.

In the Matter of TAP LINE ALLOWANCES AND DIVISIONS, Being Docket Nos. 3400, Sub. 6; 3400, Sub. 7; 3493, 3511, 3512, 3513, 3514, 3524, 3548, 3551, 3552, and 3564, Consolidated under Investigation and Suspension Docket No. 11.

The above entitled proceedings are assigned for hearing on Thursday, December 9, 1910, 10 o'clock a. m., at United States Court rooms, New Orleans, Louisiana.

By THE COMMISSION,
EDW. A. MOSELEY, *Secretary.*"

Your petitioners aver that notwithstanding that by the Act to Regulate Commerce it is required that the Commission serve upon the defendants in any proceeding before it a copy of the petition with directions to answer the same or to satisfy the petition, nevertheless, no such service was made upon the defendants and no answers were made by said defendants to said petition before the said Interstate Commerce Commission.

Pursuant to said notice and the orders of the Interstate Commerce Commission hereinabove set forth, the petitioner Railway Company, together with the numerous other railroad companies; appeared before the Interstate Commerce Commission, at New Orleans,
13 on December 8, 1910, and subsequent days, and at St. Louis, Missouri, and at Chicago, Illinois, upon adjournments of said hearing, and thereupon the Honorable James S. Harlan, one of the Interstate Commerce Commissioners, examined the officers and agents of the petitioner Railway Company, concerning the matters under investigation in said proceeding, and said petitioner Railway Company also thereafter submitted to the Interstate Commerce Commission certain documentary evidence, by filing the same with the secretary of said Commission at Washington; and thereafter, and within the time fixed by the Commission, said petitioner filed with the Interstate Commerce Commission a statement of facts, abstract of the evidence which had been taken before said Commission, in reference to said petitioner, and a brief and argument, reference to which statement and brief is hereby made, and in said statement and brief said petitioner Railway Company petitioned the Interstate Commerce Commission to make an order compelling the trunk line railroad companies to restore the rates existing with the petitioner Woodworth & Louisiana Central Railway Company.

At the beginning of said hearing at New Orleans on December 8, 1910, the Honorable James S. Harlan, the commissioner presiding at said hearing, made the announcement to the parties interested and

appearing at said hearing, that each so-called "Tap-Line" would be treated as though it had filed a formal petition.

There was also filed before the Interstate Commerce Com-
14 mission in said case of Star Grain & Lumber Company et al. v. Atchison, Topeka & Santa Fe, "Investigation and Suspension Docket No. 11," a "Brief and Argument for Various Tap Lines," signed by H. M. Garwood, N. S. Brown and Luther M. Walter, which contained, among other things, the following:

"The facts, therefore, of each case are so widely divergent as to render classification impossible, and to necessitate, however burdensome it may become, the analysis of the facts of each case. It would be unjust to the several lines above, many of which are not represented by the writers of this brief, to undertake any arbitrary classification, and we therefore invoke as a part of that due process of law to which each is entitled, the examination by this body of the facts of each case and the entry of a special and separate order thereon, to the end that the rights of each line may be duly regarded."

And at the close of said brief was the following:

"We submit, therefore, with confidence that the basic questions underlying this investigation have been fully and carefully decided by the decisions of this Commission, by the practices in accordance therewith extending over a long period of years, by the decisions of our courts, state and federal, by the approval of the Federal Congress; and that investments made in full accord with the constitutions and laws of the several states, with the approval of Congress, and under the prior decisions of this Commission, ought not now to be confiscated in the absence of clear legislative requirement; and that railway corporations legally formed, sustaining all the burdens of state and federal legislation, and assuming, under charters legally issued, all of the common law and statutory obligations of a common carrier, cannot here be denied the right to engage in inter-
15 state commerce, establish through rates with connecting carriers and joint rates applicable thereto."

The said brief and the request therein for the entry of a special and separate order in each case was filed on behalf of the petitioner Railway Company among others.

10. On the 29th day of April, 1912, the Interstate Commerce Commission rendered an opinion, No. 1853, entitled "Investigation and Suspension Docket No. 11, the Tap Line Case," which opinion will be found in the 23d Interstate Commerce Commission Reports, p. 277, et seq., reference to which opinion is hereby made, and which is made a part hereof, as fully as if set out herein in full.

And in said opinion and supplemental report is the following, to-wit:

"The cancellations by the trunk lines will be allowed to become effective on May 1, as provided in the tariffs now on file."

Your petitioners then believed and now believe that in and by said opinion and supplemental report and by the language hereinabove last quoted the Interstate Commerce Commission made an order authorizing, permitting and commanding the trunk line railroad companies of the United States, including the respondent rail-

road companies herein, to cancel all joint interstate rates on lumber with the petitioner Railway Company, on the 1st day of May, 1912.

16 And said trunk line companies of the United States, including the respondent railroad companies, have construed said opinion herein last above referred to, as an order from the Commission to cancel said joint rates and tariffs with the petitioner Railway Company, and now have canceled and have ceased to maintain any joint tariffs or through routes and joint rates with said petitioner on lumber. And the Interstate Commerce Commission, through its secretary, notified the trunk line railroads of the United States that said cancellations did take effect at midnight on the 30th day of April, 1912, and that rates, as filed, must be observed by carriers and shippers, if criminal violation of Interstate Commerce Act and Elkins Act is to be avoided.

Your petitioners further state that while "the matter of the investigation and suspension of schedules canceling through rates with certain tap line connections, Investigation and Suspension Docket No. 11," was pending before the Commission upon the application of the petitioner Railway Company, and on account of the course of procedure which had theretofore been taken by the Interstate Commerce Commission, your petitioners were led to believe, had the right to believe, and did believe that the Interstate Commerce Commission would further postpone the effectiveness of the tariffs referred to in the order of January 16, 1912, hereinbefore set out, until after the Interstate Commerce Commission had rendered its opinion and made its order in said cause.

Your petitioners further state that the Opinion No. 1853 and the order contained therein, hereinbefore referred to, and reported in the 23d Interstate Commerce Reports, at page 277, et seq., purports to have been decided, and is dated on April 23, 1912. But

17 your petitioners allege that said opinion was not made public until the 29th day of April, 1912, and if it was rendered on the 23d day of April, all knowledge and information thereof was withheld from your petitioners, and the public generally, and your petitioners had no opportunity to know the contents thereof until about 4 o'clock in the afternoon of April 29, 1912, and a copy of said opinion was not received by your petitioners until after the 30th day of April, 1912, by reason of which your petitioners were unable, on account of lack of time, to prepare any petition or application for injunction to this, or any other, Court, to prevent the cancellation of rates by the respondent railroad companies becoming effective as hereinabove stated, or, before the 1st day of May, 1912, to make any application to this Court to enjoin, set aside and annul the order of the Interstate Commerce Commission hereinbefore set out.

Your petitioners further state that on the 1st day of June, 1912, the Interstate Commerce Commission made a supplemental report entitled "Investigation and Suspension Docket No. 11, the Tap Line Case," Opinion No. 1898, which is reported in the 23d Interstate Commerce Reports, at page 549, reference to which is hereby made and which is made a part hereof as fully as if set out herein.

Said supplemental report or opinion, in so far as it relates to the so-called "Tap Line" case in general, and in so far as it makes a finding of the facts in reference to the petitioner Railway Company, is in words and figures as follows, to-wit:

18 Investigation and Suspension Docket No. 11. The Tap Line Case, Decided May 14, 1912.

Supplemental Report of the Commission.

By the COMMISSION:

In the original report herein (ante, page 277), after stating the history of the several tap lines there mentioned and setting forth the salient features in connection with their ownership, physical condition, general character, source of traffic and revenue, and the manner in which their operations for the proprietary company are conducted, we found that in none of the cases there disposed of did the tap line perform a service of transportation, either in the movement of the products of the mill of the proprietary company or in the movement of its logs from the forest to its mill. We held that the service in each case, so far as the logs and lumber of the proprietary company are concerned, was a plant service. It was also said at the close of the report that in a supplemental opinion, to be announced in the near future, we would state the facts in relation to all the other tap lines whose affairs are disclosed in the record before us, pointing out from among them such as, in the judgment of the Commission, bear a different relation to their respective proprietary lumber companies; and that in connection with the supplemental report we would enter such order with respect to all the tap lines before us as the conclusions announced might require.

Many of the tap lines described in this report differ only in detail from the lines described in the original report and consequently are controlled by the same principles. At the conclusion of the statement in each case we have noted a finding to which effect will be given in the order to be entered. It seems well, however, before describing the remaining tap lines of record, to call attention to a practice that finds frequent illustration in the pages that fol-

19 low. In a number of cases, the tap line, without charge, hauls the logs of the lumber company that owns it. In other cases the lumber company itself hauls its logs over the tap line rails to its mill. In some instances its right to do this is evidenced by a formal trackage contract; in other instances it is done under a verbal understanding. In some cases no charge is entered up by the tap line against the lumber company for this use of its tracks, and in a few cases the lumber company pays a small compensation. In several instances the trunk lines themselves have given trackage rights for a small toll to lumber companies. We have not understood that special privileges of this kind may lawfully be granted to a shipper. It is not uncommon for one railroad to give the use of its rails to another railroad under a trackage agreement, but we see no way in which a shipper may enjoy such

a privilege over the rails of a common carrier, particularly when the compensation for the privilege is not published and the privilege is not open equally to other shippers. Except in one or two cases where the tap line crosses the state boundary line, such arrangements are possibly to be regarded as purely local, and, therefore, beyond our control. But they are inherently unlawful, and afford strong evidence that a tap line whose rails are used in that manner by its proprietary lumber company is a mere plant facility. On the other hand, such an arrangement with a shipper, even though it be purely local, and, therefore, beyond our control, may nevertheless operate as a rebate and be punishable as such under this law when it appears that the concession is made in order to secure the interstate traffic of the shipper. All such arrangements are wrongful and we shall expect them to be discontinued. It may be well again to say that in the disposition made of these cases we have had in mind the special conditions that exist in this territory, and have taken such action as, under all the circumstances developed,
20 seemed necessary in the prevention of unlawful discriminations and preferences. Doubtless, the same or generally similar conditions exist in other extensive lumber producing districts and may be duplicated elsewhere in connection with different classes of traffic. But it is obvious that matters of this nature cannot be dealt with in a wholesale manner, but must be considered separately and in the light of the surrounding conditions and special facts. It will, therefore, be fully understood that all that is here said is intended to relate specifically to the conditions found to exist in this territory. * * *

"Woodworth & Louisiana Central Railway.

The Woodworth & Louisiana Central Railway serves the mill of the Rapides Lumber Company at Woodworth, Louisiana, a station on the Iron Mountain Railroad, which has a spur track to the mill. The tap line and lumber company are identical in interest, with the same principal officers. The tap line has a standard-gauge track extending from the mill eastward for six miles to La Moria, Louisiana, connecting with the Southern Pacific, Texas & Pacific, and Rock Island lines. Its main track, however, is narrow gauge and runs from the mill westward for eighteen miles to a point from which unincorporated track extend- into the timber. The right-of-way for the narrow gauge track is leased from the lumber company; but the steel in the unincorporated logging spurs, on the other hand, is owned by the tap line and leased to the lumber company, as are four narrow gauge locomotives which the lumber company utilizes in the operation of the logging spurs. The equipment of the tap line consists of one standard gauge locomotive, five narrow gauge locomotives, and two standard and nine narrow gauge cars. The logs are hauled from the end of the incorporated track to the mill by the tap line without charge against the lumber com-
21 pany and are dumped into the mill pond by the trainmen. The standard gauge locomotive of the tap line switches the carloads of lumber from the planing mill to the point from which

they are taken by the Iron Mountain, a distance, as the record indicates, of only twenty-five feet, or less than a car length. About 95 per cent of the lumber moves through La Moria, being switched to that point, a distance of six miles, by the tap line. The explanation doubtless lies in the fact that the allowances from the Iron Mountain out of the through rates run from 1½ to 5½ cents, while the trunk lines connecting at La Moria allow from 2 to 5½ cents. There are no joint rates except on lumber. The record indicates that 40,707 tons of freight was handled for the lumber company during the fiscal year ending June 30, 1910, and that there was 2,100 tons of outside traffic, consisting of merchandise, farm products, and miscellaneous material. It does not appear what proportion of this tonnage was intended for employés of the lumber company. There is no passenger service.

The Woodworth & Louisiana Central was incorporated in 1900, with a capital stock of $25,000. It has no bonds, but is indebted to the lumber company in the sum of $88,000 and to a bank in the amount of $10,000. Its operations for the year ending June 30, 1910, resulted in a deficit; but there was a surplus on that date, resulting from previous years, amounting to nearly $10,000. It files annual reports with the Commission."

* * * * * * *

Irregular Practices of Tap Lines.

It appears from the foregoing statements respecting the several tap lines described in this supplemental report, as well as from the statement of those described in the original report, that there are many respects in which the law and the rules and regulations of the Commission are not observed by them. Although claiming to be common carriers, some of them did not file anual reports
22 with the Commission until recently. The reports of others are so far from being complete that they cannot be said to comply with the requirements of the Act. Many of them, also, do not publish any local rates to apply on traffic received from or delivered to their trunk line connections. Many of them carry passengers and less-than-carload shipments without charge at all; others make a charge without the authority of published tariffs. We have already referred to the use made by controlling lumber companies of their tap lines under formal and informal agreements for trackage rights with and without charge, and all without any tariff authority. The Hours of Service Law, the Safety Appliance Act and other Acts imposing certain requirements on common carriers engaged in interstate commerce are not fully complied with in many cases, and in others are wholly disregarded. There is a lack of attention also to our rules and regulations respecting the filing of tariffs and the keeping of accounts. In some cases, our examiners have been refused full access to the books of tap lines. With respect to all these matters, the law makes no exception in favor of any railroads that purport to be common carriers. While our conclusions, in no instance, have been based on the failure of a

tap line to comply with our rules and regulations, we must give warning to all such companies that purport to hold themselves out as common carriers that such irregularities must promptly be corrected.

General Comments.

The rates of the trunk lines for the movements of logs in this territory are penalty rates; that is to say, the inbound rate to the mill is higher than it should be and is reduced to a net rate, provided the lumber goes out over the rails of the same carrier. Such rate adjustments are adverted to and criticised in Red River Cotton Oil Co. v. T. & P. Ry. Co., 23 I. C. C. 437. So far as we can
23 see from a careful examination of the record, there is no real necessity for any such rate adjustment in this territory. The penalty rates should be withdrawn, and in their place the carriers ought to fix reasonable flat rates for the inbound log movement.

Orders will be entered as soon as possible to give effect to the views expressed in the original and supplemental reports herein. Tariffs fixing rates and switching charges in accordance with our conclusions may be filed on three days' notice. The carriers will also be expected to submit for the approval of the Commission the basis of allowances to lumber companies, under Section 15, in the cases where in the original and supplemental reports we have said that such allowances might properly be paid. When approved by the Commission such allowances must be published.

In the majority of cases the tap lines have made no joint class and commodity rates with their trunk line connections. In other cases joint rates have been established, at least to some destinations. Where joint through class and commodity rates are in effect or hereafter made effective to or from points on tap lines, the trunk lines and the tap lines will be expected to submit to the Commission for approval the basis of their divisions. It is expected also that they will submit for our approval reasonable and non-discriminatory rates on forest product when shipped from tap line points other than the mills of the controlling companies, and will also submit the bases of the divisions thereof.

When all these matters shall have been adjusted in compliance with the views of the Commission, an order will be entered authorizing trunk lines to make settlements on these bases with respect to all traffic moving after May 1, either under Section 15 or as allowances out of the rate, as provided herein in the respective cases.

Orders in other cases in which these or other tap lines in
24 this territory are parties defendant may be called to our attention in case they are in conflict herewith.

By THE COMMISSION,

[SEAL.] JOHN H. MARBLE, *Secretary.*"

Your petitioners further state that the Opinion No. 1898, reported in the 23d Interstate Commerce Commission Reports, at page 549, et seq., purports to have been decided and is dated on May 14, 1912,

but your petitioners allege that said opinion was not made public until the 1st day of June, 1912.

Petitioners further state that on the 11th day of June, 1912, the Interstate Commerce Commission made and entered of record, or at least made public on that day, an order in words and figures as follows, to-wit:

Order.

"At a General Session of the Interstate Commerce Commission, Held at its Office in Washington, D. C., on the 14th Day of May, A. D. 1912.

Investigation and Suspension Docket No. 11.

In the Matter of the INVESTIGATION AND SUSPENSION OF SCHEDULES Canceling Through Rates with Certain Tap-Line Connections, and Certain Other Cases Consolidated Herewith.

It Appearing, That a full investigation of the matters and things herein involved has been had, and the Commission, on April 23, 1912, having made and filed a report containing its findings of fact and conclusions thereon, and having also on the date hereof made and filed a supplemental report containing its further findings of fact and conclusions thereon, which said reports are hereby referred to and made a part hereof;

It Further Appearing, That the Commission has found that in the case of the following named parties to the record, and each of them, namely:

Malvern & Freeo Valley Railway Company;
Wilmar & Saline Valley Railroad Company;
Arkansas & Gulf Railroad Company;
Little Rock, Maumelle & Western Railroad Company;
Beirne & Clear Lake Railroad;
Mississippi, Arkansas & Western Railway Company;
Bearden & Ouachita River Railroad Company;
Arkansas Eastern Railroad Company;
Blytheville, Burdette & Mississippi River Railway Company;
Brookings & Peach Orchard Railroad Company;
Crossett Railway Company;
Fordyce & Princeton Railroad Company;
Homan & Southeastern Railway Company;
Little Rock, Sheridan & Saline River Railway Company;
L'Anguille River Railway Company;
Ouachita Valley Railway Company;
Griffin, Magnolia & Western Railway Company;
Saline Bayou Railway Company;
Enterprise Railway Company;
Natche, Ball & Shreveport Railway Company;
Black Bayou Railroad Company;
The Bodcaw Valley Railway Company;

Mill Creek & Little River Railway & Navigation Company;
Red River & Rocky Mount Railway Company;
Woodworth & Louisiana Central Railway Company;
Freeo Valley Railroad Company;
Natchez, Urania & Ruston Railway Company;
Bernice & Northwestern Railway Company;
Dorcheat Valley Railroad Company;
26 Manghan & Northeastern Railway Company;
Galveston, Beaumont & Northeastern Railway Company;
Peach River & Gulf Railway Company;
Riverside & Gulf Railway Company;
Jefferson & Northwestern Railway Company;
Beaumont & Saratoga Transportation Company;
Angeline & Neches River Railroad Company;
Missouri & Louisiana Railroad Company;
Saginaw & Ouachita River Railroad Company;
Warren, Johnsville & Saline River Railroad Company;
Blytheville, Leachville & Arkansas Southern Railroad Company;
The Cado & Choctaw Railroad Company;
Manila & Southwestern Railway Company;
Louisiana & Pine Bluff Railway Company;
Mansfield Railway & Transportation Company;
Louisiana & Pacific Railway Company;
Roosevelt & Western Railroad Company;
Tioga & Southeastern Railway Company;
Louisiana Central Railroad Company;
Monroe & Southwestern Railway Company;
Victoria, Fisher & Western Railroad Company;
Ouachita & Northwestern Railroad Company;
Lake Charles Railway & Navigation Company;
Louisiana Railway Company;
Zwolle & Eastern Railway Company;
Sabine & Northern Railroad Company;
Gidean & North Island Railroad Company;
Poplar Bluff & Dan River Railway Company;

the service performed for the respective proprietary lumber companies in moving the logs from their respective forests to their
27 respective mills and in moving the product from the mills to the trunk lines is not a service of transportation by a common carrier railroad and that any allowances or divisions out of the rate on account thereof are unlawful:

It Further Appearing, That the following parties to the record, namely:

Little Rock, Maumelle & Western Railroad Company;
Bearden & Ouachita River Railroad Company;
Arkansas Eastern Railroad Company;
Crossett Railway Company;
Fordyce & Princeton Railroad Company;
Ouachita Valley Railway Company;
Freeo Valley Railroad Company;
Dorcheat Valley Railroad Company;

Galveston, Beaumont & Northeastern Railway Company;
Peach River & Gulf Railway Company;
Riverside & Gulf Railway Company;
Angelina & Neches River Railroad Company;
Saginaw & Ouachita River Railroad Company;
Blytheville, Leachville & Arkansas Southern Railroad Company;
The Caddo & Choctaw Railroad Company;
Manila & Southwestern Railway Company;
Louisiana & Pine Bluff Railway Company;
Mansfield Railway & Transportation Company;
Lake Charles Railway & Navigation Company;
Louisiana Railway Company;
Zwolle & Eastern Railway Company;
Gideon & North Island Railroad Company;

have heretofore filed with the Commission petitions asking for the establishment or re-establishment of through routes and joint rates on forest products to interstate destinations, which said petitions or complaints are filed on or consolidated with the record herein and on which a full hearing has been had:

It Is Ordered, That said petitions, so far as they relate to rates on the products of the mills of the proprietary companies, be, and for the reasons set forth in said reports they are hereby, dismissed.

It Is Further Ordered, That the defendants the Chicago, Rock Island & Pacific Railway Company; St. Louis & San Francisco Railroad Company; New Orleans, Texas & Mexico Railroad Company; Beaumont, Sour Lake & Western Railway Company; St. Louis, Iron Mountain & Southern Railway Company; The Texas & Pacific Railway Company; International & Great Northern Railway Company; The Missouri, Kansas & Texas Railway Company of Texas; St. Louis Southwestern Railway Company; St. Louis Southwestern Railway Company of Texas; The Paragould Southeastern Railway Company; Eastern Texas Railroad Company; The Kansas City Southern Railway Company; Texarkana & Fort Smith Railway Company; The Houston, East & West Texas Railway Company; Texas & New Orleans Railroad Company; Louisiana Western Railroad Company; Morgan's Louisiana & Texas Railroad & Steamship Company; Lake Charles & Northern Railroad Company; Vicksburg, Shreveport & Pacific Railway Company; Louisiana & Arkansas Railway Company; Louisiana Railway & Navigation Company; Gulf, Colorado & Santa Fe Railway Company; The Texas & Gulf Railway Company; Missouri & North Arkansas Railroad Company; Illinois Central Railroad Company; Southern Railway Company; Northern Alabama Railway Company; New Orleans Great Northern Railroad Company, and Mobile & Ohio Railroad Company be, and they are hereby, authorized, on not less than three days' notice, to reopen through routes and publish joint rates with the following parties to the record, and each of them, on the products of the mills of their respective proprietary companies;

Saline River Railway Company;
Warren & Ouachita Valley Railway Company;

El Dorado & Western Railway Company;
Thornton & Alexandria Railway Company;
Doniphan, Kensett & Searcy Railway;
Fourche River Valley & Indian Territory Railway Company;
Prescott & Northwestern Railroad Company;
Memphis, Dallas & Gulf Railroad Company;
Crittenden Railroad Company;
De Queen & Eastern Railroad Company;
Central Railway Company of Arkansas;
Gulf & Sabine River Railroad Company;
The Sibley, Lake Bisteneau & Southern Railway Company;
North Louisiana & Gulf Railroad Company;
Arkansas Southeastern Railroad Company;
Red River & Gulf Railroad Company;
Tremont & Gulf Railway Company;
The Nacogdoches & Southeastern Railroad Company;
Texas Southeastern Railroad Company;
Timpson & Henderson Railway Company;
Shreveport, Houston & Gulf Railroad Company;
Groveton, Lufkin & Northern Railway Company;
Moscow, Camden & San Augustine Railway Company;
Trinity Valley & Northern Railway Company;
Trinity Valley Southern Railroad Company;
Caro Northern Railway Company;
Butler County Railroad Company;
Deering Southwestern Railway;
Mississippi Valley Railway Company;
Paragould & Memphis Railway Company;
Salem, Winona & Southern Railroad Company;
30 Fernwood & Gulf Railroad Company;
New Orleans, Natalbany & Natchez Railway Company;
Albany Central Railroad Company;
Washington & Choctaw Railway Company;

Provided, The allowances or divisions out of such joint rates to be paid on the products of the mills of the said proprietary companies shall not exceed the divisions or allowances specified in the aforesaid supplemental report of the Commission.

It Is Further Ordered, That, for the reasons specified in the said supplemental report, no allowances or divisions shall be made on the products of the mills of the lumber companies owning or controlling the following companies party to the record:

Gould Southwestern Railway Company;
Kentwood & Eastern Railway Company;
Kentwood, Greensburg & Southwestern Railroad Company;
Liberty-White Railroad Company;
Natchez, Columbia & Mobile Railroad Company;

And It Is Further Ordered, That the joint rates hereinabove authorized may be published on three days' notice to the public and to the Commission, the tariffs to refer to this order by date and number, and on like notice any of the said defendants or parties to the

record may republish rates on class and commodity traffic and on products of mills other than those of the respective proprietary lumber companies.

By THE COMMISSION,
[SEAL.] JOHN H. MARBLE, *Secretary.*"

11. Your petitioners, believing the reports and decisions and orders of the Interstate Commerce Commission hereinbefore set out under paragraph 10 hereof to be void and unlawful, filed in
31 this Court, on or about the 21st day of June, 1912, their petition asking this Court to suspend and annul said orders. Said suit is numbered 72 in this Court.

Thereupon, upon the motion of the United States and of the Interstate Commerce Commission, this Court, basing its decision upon the case of Proctor & Gamble v. The United States, on the 29th day of June, 1912, dismissed the petition of these petitioners for want of jurisdiction in this Court; and thereupon, to meet the decision of this Court, these petitioners and other railroad companies, affected by the report, decision and order of the Interstate Commerce Commission, filed an application before the Interstate Commerce Commission for a modification of the order hereinabove set out, which application is in form and substance as follows, to-wit:

Before the Interstate Commerce Commission.

I. & S. Docket No. 11.

Petition.

Comes now the undersigned, attorney for the various tap line railroads whose status was determined by the Commission in the above entitled investigation, and respectfully requests that the Commission will, at the earliest possible date, issue an affirmative order substantially in form as follows:

"It is ordered that Malvern & Freeo Valley Railway Company; Wilmar & Saline Valley Railroad Company; Arkansas & Gulf Railroad Company; Little Rock, Maumelle & Western Railroad Company; Beirne & Clear Lake Railroad Company; Mississippi, Arkansas & Western Railway Company; Bearden & Ouachita River
32 Railroad Company; Arkansas Eastern Railroad Company; Blytheville, Burdette & Mississippi River Railway Company; Brookings & Peach Orchard Railroad Company; Crossett Railway Company; Fordyce & Princeton Railroad Company; Homan & Southeastern Railway Company; Little Rock, Sheridan & Saline River Railway Company; L'Anguille River Railway Company; Ouachita Valley Railway Company; Griffin, Magnolia & Western Railway Company; Saline Bayou Railway Company; Enterprise Railway Company; Natches, Ball & Shreveport Railway Company; Black Bayou Railroad Company; The Bodcaw Valley Railway Company; Mill Creek & Little River Railway & Navigation Company; Red River & Rocky Mountain Railroad Company; Woodworth & Louisiana Central Railway Company; Freeo Valley Railroad Com-

pany; Natchez, Urania & Ruston Railway Company; Bernice & Northwestern Railway Company; Dorcheat Valley Railroad Company; Manghan & Northeastern Railway Company; Galveston, Beaumont & Northeastern Railway Company; Peach River & Gulf Railway Company; Riverside & Gulf Railway Company; Jefferson & Northeastern Railway Company; Beaumont & Saratoga Transportation Company; Angelina & Neches River Railroad Company; Missouri & Louisiana Railroad Company; Saginaw & Ouachita River Railroad Company; Warren, Johnsville & Saline River Railroad Company; Blytheville, Leachville & Arkansas Southern Railroad Company; The Caddo & Choctaw Railroad Company; Manila & Southwestern Railway Company; Louisiana & Pine Bluff Railway Company; Mansfield Railway & Transportation Company; Louisiana & Pacific Railway Company; Roosevelt & Western Railroad Company; Tioga & Southeastern Railway Company; Louisiana Central Railroad Company; Monroe & Southwestern Railway Company; Victoria, Fisher & Western Railroad Company; Ouachita & Northwestern Railroad Company; Lake Charles Railway & Navi-
33 gation Company; Louisiana Railway Company; Zwolle & Eastern Railway Company; Sabine & Northern Railroad Company; Gideon & North Island Railroad Company, and Poplar Bluff & Dan River Railway Company be and each of them are required, on or before September 15, 1912, to cease and desist, and for a period of two years thereafter to abstain from maintaining joint interstate rates for the movement of logs to the mills of the respective proprietary lumber companies in Opinions Nos. 1853 and 1898 (which opinions are made part hereof), and for the movement of the products of such logs and mills to interstate destinations.

It is further ordered that the defendants named, the Chicago, Rock Island & Pacific Railway Company; St. Louis & San Francisco Railroad Company; New Orleans, Texas & Mexico Railroad Company; Beaumont, Sour Lake & Western Railway Company; St. Louis, Iron Mountain & Southern Railway Company; The Texas & Pacific Railway Company; International & Great Northern Railway Company; The Missouri, Kansas & Texas Railway Company of Texas; St. Louis Southwestern Railway Company; St. Louis Southwestern Railway Company of Texas; The Paragould Southeastern Railway Company; Eastern Texas Railroad Company; The Kansas City Southern Railway Company; Texarkana & Fort Smith Railway Company; The Houston East & West Texas Railway Company; Texas & New Orleans Railroad Company; Louisiana Western Railroad Company; Morgan's Louisiana & Texas Railroad & Steamship Company; Lake Charles & Northern Railroad Company; Vicksburg, Shreveport & Pacific Railway Company; Louisiana & Arkansas Railway Company; Louisiana Railway & Navigation Company; Gulf, Colorado & Santa Fe Railway Company; The Texas & Gulf Railway Company; Missouri & North Arkansas Railroad Company; Illinois Central Railroad Company; Southern Railway Company; Northern Alabama Railway Company; New Orleans Great
34 Northern Railroad Company and Mobile & Ohio Railroad Company; Saline River Railway Company; Warren &

Ouachita Valley Railway Company; El Dorado & Wessen Railway Company; Thornton & Alexandria Railway Company; Doniphan, Kensett & Searcy Railway; Fourche River Valley & Indian Territory Railway Company; Prescott & Northwestern Railway Company; Memphis, Dallas & Gulf Railroad Company; Crittenden Railroad Company; De Queen & Eastern Railroad Company; Central Railway Company of Arkansas; Gulf & Sabine River Railroad Company, The Sibley, Lake Bisteneau & Southern Railway Company; North Louisiana & Gulf Railroad Company; Arkansas Southeastern Railroad Company; Red River & Gulf Railroad Company; Tremont & Gulf Railway Company; The Nacogdoches & Southeastern Railroad Company; Texas Southeastern Railroad Company; Timpsin & Henderson Railway Company; Shreveport, Houston & Gulf Railroad Company; Groveton, Lufkin & Northern Railway Company; Moscow, Camden & San Augustine Railway Company; Trinity Valley & Northern Railway Company; Trinity Valley Southern Railroad Company; Caro Northern Railway Company; Butler County Railroad Company; Deering Southwestern Railway; Mississippi Valley Railway Company; Paragould & Memphis Railway Company; Salem, Winona & Southern Railroad Company; Fernwood & Gulf Railroad Company; New Orleans, Natalbany & Natchez Railway Company; Alabama Central Railroad Company, and Washington & Choctaw Railway Company be and they are hereby authorized and required on or before September 15, 1912, to reopen through routes and publish joint rates upon lumber destined to interstate points, provided the maximum of such joint rates shall not exceed those in effect April 30, 1912.

It is further ordered that the divisions or proportions of the joint rates accruing to the Saline River Railway Company; Warren & Ouachita Valley Railway Company; El Dorado & Wesson
35 Railway Company; Thornton & Alexandria Railway Company; Doniphan, Kensett & Searcy Railway Company; Forche River Valley & Indian Territory Railway Company; Prescott & Northwestern Railway Company; Memphis, Dallas & Gulf Railroad Company; Crittenden Railroad Company; De Queen & Eastern Railroad Company; Central Railway Company of Arkansas; Gulf & Sabine River Railroad Company; The Sibley, Lake Bisteneau & Southern Railway Company; North Louisiana & Gulf Railroad Company; Arkansas Southeastern Railroad Company; Red River & Gulf Railroad Company; Tremont & Gulf Railway Company; The Nacogdoches & Southeastern Railroad Company; Texas Southeastern Railroad Company; Timpson & Henderson Railway Company; Shreveport, Houston & Gulf Railroad Company; Groveton, Lufkin & Northern Railway Company; Moscow, Camden & San Augustine Railway Company; Trinity Valley & Northern Railway Company; Trinity Valley Southern Railroad Company; Caro Northern Railway Company; Butler County Railroad Company; Deering Southwestern Railway Company; Mississippi Valley Railway Company; Paragould & Memphis Railway Company; Salem, Winona & Southern Railroad Company; Fernwood & Gulf Railroad Company; New Orleans, Natalbany & Natchez Railway Company; Alabama Central

Railroad Company, and Washington & Choctaw Railway Company upon the products of the mills of the proprietary companies named in Opinions Nos. 1853 and 1898, located on said lines, shall not exceed the divisions, proportions or allowances specified in said opinions."

The basis for the aforesaid request is contained in the following statement of facts and circumstances arising subsequent to the entry of the order of May 14, 1912:

(1) The order of May 14, 1912, entered in such proceeding is not such an order as is required by Sections 14 and 15 of the Act to Regulate Commerce as amended June 29, 1906.

36 (2) Subsequent to the entry of said order of May 14, 1912, the Supreme Court of the United States announced its opinion in the Proctor & Gamble case, in which it was held that the Commerce Court had no jurisdiction of suits brought to enjoin so-called negative orders of the Commission.

(3) There was much difference of opinion as to whether said order of May 14, 1912, was or was not an affirmative order within the definition of the Supreme Court in the said Proctor & Gamble case. Application was made to the Commission for modification of said order substantially in form with that set forth above, which said application was denied.

(4) Three test suits were filed in the Commerce Court to enjoin such order of May 14, 1912, and the Commerce Court, upon motion of the Commission and the Department of Justice, dismissed the same on the authority of the Proctor & Gamble decision.

(5) The time limit within which appeals from such decree of dismissal must be made will expire August 18, 1912.

(6) The trunk line railroads connecting with the so-called tap lines have accepted the Commission's requirement of May 14, 1912, as an affirmative order, and the said tap lines are without any recourse whereby to protect their lawful rights.

(7) The modification above requested will not change in any wise the present status of any of the tap line carriers so far as joint rates are concerned; the only effect of the order will be to confer jurisdiction upon the court to determine the lawful rights of the said tap lines and their shippers, and, so far as the law may require or permit, protect the tap lines and their shippers from unlawful acts of the trunk line connections.

(8) In the case of fifty-seven (57) lines in which the Commission held that the transportation of logs from the forest to the
37 mills and the product from the mills to the trunk lines was not a service of transportation when performed for the proprietary lumber companies, the trunk lines have refused to establish joint rates upon other forest products, notwithstanding the Commission's suggestion so to do, the position taken by the trunk lines being that if the tap lines are not common carriers of logs and lumber for the proprietary lumber companies such tap lines are not common carriers of any logs and lumber.

(9) Members of the Commission have stated since the entry of this order that the questions of law involved in the tap line cases are

important and should be determined at an early date. These questions can be determined at the present time by the entry of the form of order requested herein.

(10) Since May 14, 1912, the Commission has established joint rates upon lumber transported by short line railroad companies for proprietary lumber companies, and has entered an affirmative order requiring the publication of such joint rates. We are asking in the case of the Saline River Railway Company and other carriers recognized by this Commission as properly entitled to participate in joint rates that the same sort of an order be entered as was made by the Commission in the McCloud River Lumber case.

In the Peavey Elevator cases the Commission found that payment out of the joint rate to the Peavey Elevator Company for the elevation of the grain of that company was a rebate and discrimination; the finding in the tap line cases, so far as the transportation of lumber and logs for the proprietary lumber companies upon the fifty-seven (57) lines held not to be carriers of logs or lumber for the proprietary lumber companies, is that any allowance out of the joint rate is a rebate and discrimination. In that case an order to cease and desist was made. That order was similar in all respects
38 to the order requested in this case as to the fifty-seven first named tap lines.

We therefore respectfully petition this Honorable Commission to modify its order in form substantially as above requested.

L. M. WALTER,
Attorney for Petitioners.

And thereupon, on the 30th day of October, 1912, the Interstate Commerce Commission made and entered of record an amended order in form and substance as follows, to-wit:

Interstate Commerce Commission.

Investigation and Suspension Docket No. 11.

The Tap-line Case.

Amended Order.

At a General Session of the Interstate Commerce Commission, held at its office in Washington, D. C., on the 30th day of October, A. D. 1912.

Investigation and Suspension Docket No. 11.

In the Matter of the Investigation and Suspension of Schedules Canceling Through Rates with Certain Tap-Line Connections, and Certain Other Cases Consolidated Herewith.

This matter coming on again upon a motion for an amendment of the order heretofore entered by the Commission on May 14, 1912, and the Commission being fully advised,

It is Ordered, That the said order be, and it is hereby, modified to read as follows:

1. It Appearing, That a full investigation of the matters and things herein involved has been had, and the Commission, on April 23, 1912, having made and filed a report containing its findings of fact and conclusions thereon, and having also on the said 14th day of May, 1912, made and filed a supplemental report containing its further findings of fact and conclusions thereon, which said reports are hereby referred to and made a part hereof;

39

2. It Further Appearing, That the Commission upon the record finds in the case of the following named parties to the record, and each of them, namely:

Malvern & Freeo Valley Railway Company;
Wilmar & Saline Valley Railroad Company;
Arkansas & Gulf Railroad Company;
Little Rock, Maumelle & Western Railroad Company;
Beirne & Clear Lake Railroad;
Mississippi, Arkansas & Western Railway Company;
Bearden & Ouachita River Railroad Company;
Arkansas Eastern Railroad Company;
Blytheville, Burdette & Mississippi River Railway Company;
Brookings & Peach Orchard Railroad Company;
Crossett Railway Company;
Fordyce & Princeton Railroad Company;
Homan & Southeastern Railway Company;
Little Rock, Sheridan & Saline River Railway Company;
L'Anguille River Railway Company;
Ouachita Valley Railway Company;
Griffin, Magnolia & Western Railway Company;
Saline Bayou Railway Company;
Enterprise Railway Company;
Natchez, Ball & Shreveport Railway Company;
Black Bayou Railroad Company;
The Bodcaw Valley Railway Company;
Mill Creek & Little River Railway & Navigation Company;
Red River & Rocky Mount Railway Company;

40

Woodworth & Louisiana Central Railway Company;
Freeo Valley Railroad Company;
Natchez, Urania & Ruston Railway Company;
Bernice & Northwestern Railway Company;
Dorcheat Valley Railroad Company;
Manghan & Northeastern Railway Company;
Galveston, Beaumont & Northeastern Railway Company;
Peach River & Gulf Railway Company;
Riverside & Gulf Railway Company;
Jefferson & Northwestern Railway Company;
Beaumont & Saratoga Transportation Company;
Angelina & Neches River Railroad Company;
Missouri & Louisiana Railroad Company;
Saginaw & Ouachita River Railroad Company;
Warren, Johnsville & Saline River Railroad Company;

Blytheville, Leachville & Arkansas Southern Railroad Company;
The Caddo & Choctaw Railroad Company;
Manila & Southwestern Railway Company;
Louisiana & Pine Bluff Railway Company;
Mansfield Railway & Transportation Company;
Louisiana & Pacific Railway Company;
Roosevelt & Western Railroad Company;
Tioga & Southeastern Railway Company;
Louisiana Central Railroad Company;
Monroe & Southwestern Railway Company;
Victoria, Fisher & Western Railroad Company;
Ouachita & Northwestern Railroad Company;
Lake Charles Railway & Navigation Company;
Louisiana Railway Company;
41 Zwolle & Eastern Railway Company;
Sabine & Northern Railroad Company;
Gideon & North Island Railroad Company;
Poplar Bluff & Dan River Railway Company;

that the tracks and equipment with respect to the industry of the several proprietary companies are plant facilities, and that the service performed therewith for the respective proprietary lumber companies in moving logs to their respective mills and performed therewith in moving the products of the mills to the trunk lines is not a service of transportation by a common carrier railroad, but is a plant service by a plant facility; and that any allowances or divisions out of the rate on account thereof are unlawful and result in undue and unreasonable preferences and unjust discriminations, as found in the said reports;

3. It is Ordered, That the principal defendants, The Chicago, Rock Island & Pacific Railway Company; St. Louis & San Francisco Railroad Company; New Orleans, Texas & Mexico Railroad Company; Beaumont, Sour Lake & Western Railway Company; St. Louis, Iron Mountain & Southern Railway Company, The Texas & Pacific Railway Company; International & Great Northern Railway Company; The Missouri, Kansas & Texas Railway Company of Texas; St. Louis Southwestern Railway Company; St. Louis Southwestern Railway Company of Texas; The Paragould Southeastern Railway Company; Eastern Texas Railroad Company; The Kansas City Southern Railway Company; Texarkana & Fort Smith Railway Company; The Houston, East & West Texas Railway Company; Texas & New Orleans Railroad Company; Louisiana Western Railroad Company; Morgan's Louisiana & Texas Railroad & Steamship Company; Lake Charles & Northern Railroad Company; Vicksburg, Shreveport & Pacific Railway Company; Louisiana & Arkan-
42 sas Railway Company; Louisiana Railway & Navigation Company; Gulf, Colorado & Santa Fe Railway Company; The Texas & Gulf Railway Company; Missouri & North Arkansas Railroad Company; Illinois Central Railroad Company; Southern Railway Company; Northern Alabama Railway Company; New Orleans Great Northern Railroad Company, and Mobile & Ohio Railroad

Company be, and they are hereby, notified and required to cease and desist, and for a period of two years hereafter, or until otherwise ordered, to abstain from making any such allowances to any of the above named parties to the record in respect of any such above described service.

4. It Further Appearing, That the following parties to the record, namely:

Little Rock, Maumelle & Western Railroad Company;
Bearden & Ouachita River Railroad Company;
Arkansas Eastern Railroad Company;
Crossett Railway Company;
Fordyce & Princeton Railroad Company;
Ouachita Valley Railway Company;
Freeo Valley Railroad Company;
Dorcheat Valley Railroad Company;
Galveston, Beaumont & Northeastern Railway Company;
Peach River & Gulf Railway Company;
Riverside & Gulf Railway Company;
Angelina & Neches River Railroad Company;
Saginaw & Ouachita River Railroad Company.
Blytheville, Leachville & Arkansas Southern Railroad Company;
The Caddo & Choctaw Railroad Company;
Manila & Southwestern Railway Company;
Louisiana & Pine Bluff Railway Company;
Mansfield Railway & Transportation Company;
Lake Charles Railway & Navigation Company;
Louisiana Railway Company;
43 Zwolle & Eastern Railway Company;
Gideon & North Island Railroad Company;

have heretofore filed with the Commission their several petitions asking for the establishment or re-establishment of through routes and joint rates to interstate destinations, which said petitions or complaints are filed on or consolidated with the record herein and on which a full hearing has been had:

5. It is Ordered, That said petitions, so far as they relate to rates on the products of the mills of the respective proprietary companies, be, and for the reasons set forth in said reports they are hereby, dismissed.

6. It Further Appearing, That the following parties to the record, namely:

Warren & Ouachita Valley Railway Company;
El Dorado & Wesson Railway Company;
Thornton & Alexandria Railway Company;
Fourche River Valley & Indian Territory Railway Company;
Prescott & Northwestern Railroad Company;
Crittenden Railroad Company;
North Louisiana & Gulf Railroad Company;
Arkansas Southeastern Railroad Company;
Red River & Gulf Railroad Company;
Tremont & Gulf Railway Company;
The Nacogdoches & Southeastern Railroad Company;

Texas Southeastern Railroad Company;
Shreveport, Houston & Gulf Railroad Company,
Groveton, Lufkin & Northern Railway Company;
Trinity Valley & Northern Railway Company;
Trinity Valley Southern Railroad Company;
Caro Northern Railway Company;
Butler County Railroad Company;
Deering Southwestern Railway;
Mississippi Valley Railway Company;
Paragould & Memphis Railway Company;

44 have heretofore filed with the Commission their several petitions asking for the establishment or re-establishment of through routes and joint rates to interstate destinations, which said petitions or complaints are filed on or consolidated with the record herein, and on which a full hearing has been had:

7. It is Ordered, That the said principal defendants above named be, and they are hereby, required, on or before January 1, 1913, to re-establish, and for a period of two years to maintain with each of the said parties to the record last above named, the through interstate routes and joint rates in effect, in accordance with their respective tariffs filed with this Commission on April 30, 1912;

8. Provided, That the rates on yellow pine lumber and articles taking the same rates from points on the lines of the last above named parties to the record shall not exceed the current rates in effect from the junction points; and

9. Provided further, That the allowances or divisions out of such joint rates to be paid by said principal defendants, respectively, to the said last named parties to the record on the products of the mills of the said respective proprietary companies named in said report shall not exceed the divisions or allowances specified in the aforesaid supplemental report of the Commission, which are hereby fixed as maximum divisions or allowances thereon, until further order, the Commission finding upon the record that any allowances or divisions in excess thereof result in undue preferences and unjust discriminations and are unlawful.

10. It Is Further Ordered, That in the case of the following parties to the record, by which petitions for the establishment or re-establishment of through routes and joint rates have not been filed, namely:

Saline River Railway Company;
Doniphan, Kensett & Searcy Railway;
Memphis, Dallas & Gulf Railroad Company;
45 De Queen & Eastern Railroad Company;
Central Railway Company of Arkansas;
Gulf & Sabine River Railroad Company;
The Sibley, Lake Bisteneau and Southern Railway Company;
Timpson & Henderson Railway Company;
Moscow, Camden & San Augustine Railway Company;
Salem, Winona & Southern Railroad Company;
Fernwood & Gulf Railroad Company;
New Orleans, Natalbany & Natchez Railway Company;

Alabama Central Railroad Company;
Washington & Choctaw Railway Company;

the said principal defendants be, and they are hereby, authorized to re-establish the through routes and joint rates in effect, in accordance with their respective tariffs filed with this Commission on April 30, 1912, subject to the terms and conditions prescribed in paragraphs 8 and 9 hereof; and Provided, further, that upon the failure of the principal defendants to re-establish the through routes and joint rates in effect on April 30, 1912, with the last above named parties to the record on or before January 1, 1913, the Commission will upon the filing herein of appropriate petitions therefor enter an order upon the record herein requiring the re-establishment of such through routes and joint rates.

11. It is Further Ordered, That in case of the failure of the principal defendants to re-establish, on or before January 1, 1913, the through routes and joint rates in effect on April 30, 1912, on traffic other than the products of the mills of the respective proprietary companies in the case of any of the parties to the record first herein above named, the Commission will upon appropriate petition herein enter an order requiring the establishment of such through routes and joint rates or enter upon an inquiry with respect thereto.

46 12. It Is Further Ordered, That the divisions of all joint rates herein required and authorized to be re-established on traffic other than the products of the mills of the several proprietary lumber companies shall be submitted to the Commission by the parties hereto for approval.

13. It Is Further Ordered, That, in the case of the following parties to the record, namely:

Gould Southwestern Railway Company;
Kentwood & Eastern Railway Company;
Kentwood, Greensburg & Southwestern Railroad Company;
Liberty-White Railroad Company;
Natchez, Columbia & Mobile Railroad Company;

for the reasons specified in the said supplemental report no allowances or divisions shall be made on the products of the mills of the respective proprietary lumber companies.

14. And It Is Further Ordered, That the joint rates herein above authorized or required may be published on three days' notice to the public and to the Commission, the tariffs to refer to this order by date and number.

By the Commission.

[SEAL.] JOHN H. MARBLE, *Secretary.*

12. Your petitioners further state that as a common carrier the Woodworth & Louisiana Central Railway Company became, and until midnight on the 30th day of April, 1912, was, a party to each and all of the following tariffs applicable on lumber and articles taking lumber rates to the various points in said tariffs mentioned, the lines publishing said tariffs and the lines mentioned and con-

curring therein constituting, with the petitioner, the Woodworth & Louisiana Central Railway Company, reasonable through
47 routes and said tariffs prescribing reasonable through rates between points on the Woodworth & Louisiana Central Railway and the several points therein mentioned, to-wit:

Southwestern Lines Lumber Tariffs Canceled May 1st, 1912, from Woodworth & Louisiana Central Railway Company Points.

S. W. L.	48-G	I. C. C.	892	to	Oklahoma points.
S. W. L.	50-E	I. C. C.	868	to	Ariz., Ark, Colo., Iowa, Ks., Mo., Neb., N. Mex., S. D., Utah, Wyo.
S. W. L.	63-E	I. C. C.	897	to	Texas points.
S. W. L.	4-A	I. C. C.	849	to	Mexico points.

Chicago, Rock Island & Pacific Railway Lumber Tariffs Canceled May 1st, 1912, from Woodworth & Louisiana Central Railway Company Points.

C., R. I. & P.	24000-E	I. C. C.	c 9235	to	Ala., Ark., Fla., Ills., Iowa, Ky., Minn., Miss., Mo., N. Mex., North Dak., South Dak., Tenn., Wisc., Wyoming, etc.
	28013	I. C. C.	c 9062		Tie Plant, Ark., or Winnfield, La., when creosoted and reshipped beyond.

Chicago & Eastern Illinois Railway Company, St. Louis & San Francisco Railway Company, and Chicago, Rock Island & Pacific Railway Company Lumber Tariffs Canceled May 1st, 1912, from Woodworth & Louisiana Central Railway Company Points.

2800-C	I. C. C.	2596	to	Ill., Ind., Ky., Mich., Mo., N. Y., Ohio, Pa., W. Va., Wisc., etc.

13. Your petitioner further say that prior to the year 1900 the petitioner Rapides Lumber Company was operating a lumber mill at Woodworth, Louisiana, and had a narrow gauge railroad running west into the timber belonging to said Company, and said Company had about 42,000 acres of timber. The only railroad which the Rapides Lumber Company then had for the shipping of its products was the St. Louis, Watkins & Gulf Railroad at Woodworth,
48 Louisiana, which road was unable to furnish the cars and equipment and to reach all markets for the lumber output of the mill of the Rapides Lumber Company. By reason of this fact, and because of having only the one railroad connection at Woodworth, some of the stockholders of the Rapides Lumber Company, about the 8th day of December, 1900, incorporated a railroad known as the Woodworth & Louisiana Central Railway Company, petitioner herein, and constructed a standard gauge railroad from Woodworth to Lamourie in order to connect with the Texas & Pacific Railroad and the Morgan's Louisiana & Texas Railway and Steamship Company. Later the Chicago, Rock Island & Pacific Railway Company built a road through the town of Lamourie, and the Rock Island Company also connected its road with the Woodworth & Louisiana

Central Railroad at Woodworth. The Woodworth & Louisiana Central Railroad Company purchased the narrow gauge road running from Woodworth west about the first of the year 1901 and ever since has owned and operated said road.

14. Petitioners further allege that in interstate commerce shipments there prevails now, and has prevailed for many years, in all of the lumber producing districts of the South with the full concurrence of the railroad systems and the producers and shippers of lumber, and with the full concurrence of the Interstate Commerce Commission, what are known as "blanket rates," that is, all lumber rates from all points on all lines in a given territory are the same to any point in any other given territory; that, consequently, the lumber rates for interstate commerce shippers from any point on the line of the petitioner, the Woodworth & Louisiana Cen-
49 tral Railway Company, were, until the 1st day of May, 1912, the same as from any of its points of connection with other railroads in the same blanket rate territory.

15. Petitioners further state that on or about the 1st day of August, 1906, a contract was entered into between the respondent Rock Island, Arkansas & Louisiana Railway Company and the Chicago, Rock Island & Pacific Railway Company and the petitioners, the Woodworth & Louisiana Central Railway Company, Rapides Lumber Company and the Long-Bell Lumber Company, providing for a connection between the Woodworth & Louisiana Central Railway Company and Rock Island, Arkansas & Louisiana Railway Company and the Chicago, Rock Island & Pacific Railway Company at the town of Lamourie, Louisiana, and further providing that during the existence of said agreement said railroad companies would interchange business with each other at said point of connection, and by means thereof would establish a through line of railway with traffic thereover on the basis of the divisions of rates as in said contract set forth. The said petitioners, lumber companies, agreed to ship over the line of the railway of the Woodworth & Louisiana Central Railway Company from the forest to the mills of said lumber companies all the lumber cut by said lumber companies, and that they would ship at least 50 per cent of the products of said mills to the point of connection at Lamourie, and that said lumber companies and said Woodworth & Louisiana Central Railway Company would ship 50 per cent of the products of said mills
50 over the line of the railway of the Rock Island, Arkansas & Louisiana Railway Company and the Chicago, Rock Island & Pacific Railway Company to the points of destination. The Rock Island, Arkansas & Louisiana Railway Company and the Chicago, Rock Island & Pacific Railway Company agreed to accept from the Woodworth & Louisiana Central Railway Company all shipments so offered, and to transport the same with reasonable promptness and dispatch, and to use every reasonable effort to furnish the Woodworth & Louisiana Central Railway Company with cars sufficient for transporting said 50 per cent of the products of the mills of said lumber companies. And the said respondents Rock Island, Arkansas & Louisiana Railway Company and the Chicago, Rock Island &

Pacific Railway Company further agreed with the Woodworth & Louisiana Central Railway Company that said railway companies would enter into joint tariffs relating to the joint traffic over their respective lines, and to file the same with the Interstate Commerce Commission, and to publish the same in the manner and form as required by law. Said agreement provided that it should become effective on the date thereof and continue for a period of fifteen years, or so long as the lumber company should operate its mills in said Parish of Rapides, Louisiana. A copy of said contract is hereto attached, hereby referred to, and made a part hereof, and marked Exhibit "A." The moving cause and consideration for these contracts was that the shippers had the right to route their freight over such line or lines of railroad as they saw fit, and in order to secure the performance of the contracts between the Woodworth &
51 Louisiana Central Railway Company and its connecting carriers, the respondent Railway Companies, it was necessary to have the shippers sign the contracts and agree to route their products over the line of the Woodworth & Louisiana Central.

16. That relying upon the contracts between the petitioners herein and the respondents Rock Island, Arkansas & Louisiana Railway Company, and Chicago, Rock Island & Pacific Railway Company, the petitioner, the Rapides Lumber Company, long prior to the Star Grain and Lumber Company decision, entered into a contract whereby said Lumber Company agrees to ship or cause to be shipped over the line of the Woodworth & Louisiana Central Railway Company all of the products of its mills located on the line of said Railway Company, such product to be carried by said Woodworth & Louisiana Central Railway Company by regular published tariff rates of said Company filed with the Interstate Commerce Commission, and the said Woodworth & Louisiana Central Railway Company has agreed to furnish said Lumber Company the necessary engines, cars and other appurtenances and equipment for transporting the products of said Lumber Company from the connections of the Lumber Company's tram roads with the line of railway of the Woodworth & Louisiana Central Railway Company and the Lumber Company's mills.

The investment which has been made by the Rapides Lumber Company in mills and timber amounts to more than a million and a half dollars. The capacity of the mills of the Rapides Lumber Company is 2,100 cars per annum. The value of the steel
52 rails laid in tram roads of the Rapides Lumber Company is $27,263.21. It has four locomotives used on the tram roads, of the value of $17,500.

17. Your petitioners state that the decision and report of the Interstate Commerce Commission, being the decision published in the 17th Interstate Commerce Commission Reports, page 338 et seq., is an erroneous and incorrect statement of the law, and is a misapprehension, misstatement and misapplication of facts in so far as petitioners herein are concerned, and the statement in said opinion to the effect

"that any allowance or division made to or with the tap line that

is owned or controlled directly or indirectly by the lumber mill or by its officers or board of directors, and that has no traffic beyond the logs that it hauls to the mill, except such as it may pick up as a mere incident to its efforts to serve the mill as an adjunct or plant facility, is an unlawful departure from the published rates"

is not a correct statement of the law, and is an erroneous and illegal holding upon the part of the Interstate Commerce Commission. And the whole of said opinion is an incorrect and improper statement of the facts and the law as applied to these petitioners, and the action of the trunk line railroad companies in August, 1910, in filing with the Interstate Commerce Commission the schedules stating new, individual or joint rates, fares or charges, applicable upon the articles named therein in excess of the rates, fares and charges theretofore in effect, and in thereby canceling the through routes and joint rates which had theretofore been maintained with the petitioner Railway Company was and is unlawful, and was
53 and is wrongful violation and avoidance of the obligations and contracts heretofore pleaded and set out, and is in violation of the Interstate Commerce laws of the United States.

That the opinion and report heretofore referred to and published in the 23d Interstate Commerce Commission Reports, at page 277 et seq., is an erroneous and incorrect finding of facts, is a misapprehension and misapplication of the facts as found, is an erroneous and illegal statement of the law, it takes away from these petitioners vested rights guaranteed by law, and impairs and destroys the obligation of legal contracts which these petitioners have. And the statement in said report found on page 338 thereof, to-wit:

"The cancellations by the trunk lines will be allowed and become effective on May 1st, as provided in the tariffs now on file,"

constitutes an order to the trunk line railroad companies to cancel the tariffs heretofore mentioned in paragraph 12 hereof, constitutes a denial and dismissal of the petition of the Railway Company to the Commission, heretofore pleaded in paragraph 9 hereof, to issue an order to said trunk line railroads to continue the through routes and joint rates theretofore existing with the petitioner Company, as provided for in the tariffs set out in paragraph 12 hereof.

That the Interstate Commerce Commission by its said opinions and reports herein referred to, and by its order allowing the cancellation by the trunk lines to become effective on May 1, as provided by the tariffs then on file, and by its supplemental report
54 dated May 14, 1912, and by its order dated May 14, 1912, and by its amended order of October 30, 1912, herein set out in full, has erroneously, illegally and improperly held that the petitioner Railway Company is not a common carrier in reference to logs and lumber and that the service it performs is not a common carrier service when said service is performed in the hauling of logs and lumber and the products of the petitioner Lumber Companies' mills, and has, by both of its said opinions, to-wit, the opinion dated April 23, 1912, and the opinion dated May 14, 1912, and by its order dated May 14, 1912, and its amended order dated October

30, 1912, ordered the respondent Railroad Companies to cease the maintenance of through routes and joint rates on lumber with the petitioner Railway Company, and to cease paying any division whatsoever of the rates to the petitioner Railway Company.

And by said opinions and reports and orders the Interstate Commerce Commission has ordered and required the respondent Railroad Companies to submit for the approval of the Interstate Commerce Commission the basis of their divisions on through joint class and commodity rates in effect or hereafter made effective to or from points on the line of the petitioner Railway Company, which said order is beyond the jurisdiction of the Interstate Commerce Commission, and commands the respondent Railroad Companies to violate the terms of the contracts with the petitioners, herein set out, and is in violation of Section 15 of the Interstate Commerce Act, which provides that the Commission may establish through routes and joint classifications and may "establish joint rates as the
55 maximum to be charged, and may prescribe the divisions of such rates, as hereinbefore provided, and the terms and conditons under which such through rates shall be operated whenever the carriers themselves shall have refused or neglected to establish voluntarily such through rates or joint classifications or joint rates." Your petitioners further allege that the respondent Railroad Companies and the petitioner Railway Company have not refused or neglected to establish voluntarily such through routes or joint classifications or joint rates, but on the contrary, as hereinbefore set out, have agreed to establish such through routes and joint classifications and joint rates, and have filed with the Interstate Commerce Commission their tariffs showing such through routes and joint classifications and joint rates, all of which will fully appear by Tariff Index Number 9-B, Interstate Commerce Commission Number 21.

Your petitioners further allege that the respondents Railroad Companies did not voluntarily cancel the through rates under and by virtue of the canceling tariffs hereinbefore referred to, but the action of the respondents Railroad Companies in that regard was had under the compulsion of the several reports, decisions and orders of the Interstate Commerce Commission hereinbefore referred to, and under the belief induced by said reports, decisions and orders, that if said joint through rates with the petitioner Railway Company were not canceled, that said respondents Railroad Companies, their officers and agents, would be subject to criminal prosecution at the instance of the Interstate Commerce Commission as for alleged rebates and alleged unlawful discrimination.

56 Your petitioners further allege that the respondents Railroad Companies, and other common carriers subject to the Act to regulate commerce, have for years recognized the petitioner Railway Company as a common carrier in every respect and fully entitled to all the rights and privileges belonging to a common carrier under the law; and, but for the action of the Interstate Commerce Commission, herein complained of, would continue to so recognize said petitioner as a common carrier and would partici-

pate with said petitioner in joint rates upon lumber and forest products and the maintenance of through routes to interstate destinations.

Your petitioners further state that the statement made in the finding of facts in reference to the petitioner Railway Company, to the effect that there is no charge made for the service of hauling the logs to the mills, is incorrect and misleading, the fact being that the charge for transporting the logs and finished product is provided for in the through rate which applies from the point at which the logs are delivered to the said Company by the Lumber Companies, and includes the transportation of the logs to the mill and the product from the mill to final destination, and is a practice which has long been recognized by the Interstate Commerce Commission, not only on lumber, but on other commodities, and is not in itself illegal.

The statement "the steel for these tracks is furnished and supplied by the Tap Line without charge," is incorrect and untrue. There is no steel or other equipment supplied by the Railway Company to the Lumber Companies. At the time of the hearing of the case it was the custom of the Railway Company to lease
57 or lend to shippers on its line steel and other equipment for the trams of said lumber companies beyond the line of the Railroad; this practice seemed to be condemned by the Commission, and by reason thereof, the Railway Company sold and transferred to the Lumber Companies all steel and other equipment which was being used by the Lumber Companies, and there is now no steel or other equipment furnished to the Lumber Companies by the Railway Company, and a copy of the contract or bill of sale evidencing this fact was filed with the Interstate Commerce Commission before the closing of the "Tap Line case" before said Commission.

Petitioners further state that upon the finding of facts made by the Interstate Commerce Commission, hereinabove set out, the petitioner Railway Company is a common carrier, performs a common carrier service, is entitled to the maintenance of through routes and joint rates and to divisions, as in its contracts provided.

Petitioners further state that the entire opinion, report, finding and order of the Interstate Commerce Commission, made under the caption, "Investigation and Suspension Docket No. 11, The Tap-Line Case," is inconsistent with itself, with the former decisions and reports of the Interstate Commerce Commission, permits and requires discriminations and inequalities, and a compliance with said decisions and requirements compels the railroad companies to violate Section 3 of the Interstate Commerce Act, hereinafter set out. And said decisions and orders are in violation of and in conflict with the "Commodities Clause" of Section 1 of said Interstate Commerce Act.

58 Your petitioners further allege that said decisions and orders hereinbefore set out were made by the said Interstate Commerce Commission as a result of investigation and alleged in-

formation furnished by its investigators without any opportunity to these petitioners of cross-examination or rebuttal.

Your petitioners allege that the Interstate Commerce Commission has no jurisdiction or authority in law to decide that the petitioner Railway Company is not a common carrier in respect to the logs and lumber which it transports for petitioners Lumber Companies (although holding that it is a common carrier and compelling it to be a common carrier with respect to other tonnage which it hauls), and by so holding and by its order to the trunk line railroad companies to cancel through routes and joint rates and to cease for two years paying divisions to the petitioner Railway Company, the Interstate Commerce Commission attempts to nullify state laws and the Interstate Commerce laws and its own rulings and decisions heretofore made; and the decision in reference to the petitioner Railway Company and the orders of the Interstate Commerce Commission, hereinabove set out, are each and all unlawful, erroneous and invalid.

Your petitioners further allege that said decisions and orders are arbitrary, unreasonable and in excess of the power and authority of the said Commission and constitute violations of Section 3 of the Act which forbids unjust discrimination between persons, localities and traffic. As an instance of the unequal, discriminatory, arbitrary and unreasonable Act of the Commission, petitioner alleges
59 that many of the so-called tap lines whose status was determined by the Commission in the decisions and orders hereinbefore set out, were recognized as common carriers of the traffic of the so-called proprietary interests and others denied such a status without any distinction in fact or manner of operation.

Further, petitioners allege that notwithstanding the Commission established a rule that under Section 15 payment should be made to the shipper when the transportation was not less than 1,000 feet nor more than three miles from the trunk line connection, nevertheless no such allowance was prescribed by the Commission in the case of your petitioners, but on the contrary such an allowance is expressly negatived by the Commission.

Your petitioners further allege that other short line railroads mentioned in the decisions and orders above set forth have been by the Commission directed to establish joint rates from points on their line to interstate destination points, when in fact all the circumstances and conditions which properly may be considered by the Commission in an investigation of this sort require that the petitioners be given joint rates over through routes to interstate destinations. In support of this allegation the petitioners call attention to the findings of the Commission and make said findings part of this petition as fully as if set forth herein, in the following cases:

Fourche River Valley & Indian Territory Railway Company.
The Nacogdoches & Southeastern Railroad Company.
Trinity Valley & Northern Railway Company.
Butler County Railroad Company.
Red River & Gulf Railroad Company, and others.

60 Your petitioners further state that the Interstate Commerce Commission in holding that the tracks and equipment of the petitioner Railway Company with respect to the industry *to* the petitioners Lumber Companies are plant facilities and that the service performed therewith for the said Lumber Companies in moving logs to their mills and performed therewith in moving the products of the said mills of the petitioners Lumber Companies to the junction of the petitioner Company with its connecting trunk line companies, is not a service of transportation by a common carrier railroad, but is a plant service by a plant facility—is without any basis in fact or in law. Said finding and conclusion is arbitrary, unreasonable and in violation of the Act to Regulate Commerce and the decisions of the Supreme Court of the United States.

Your petitioners assert that under the provisions of the Act to Regulate Commerce and the interpretation thereof by the Supreme Court of the United States upon the facts found by the Commission and set forth herein the said petitioner Railway Company is a common carrier by railroad of the logs of the petitioners Lumber Companies, in that it furnishes a railroad and maintains the same in condition for the movement of said logs and is a common carrier of the products of the petitioners Lumber Companies from their mills to the junction points with the Railway Company's connecting carriers, and inasmuch as the larger proportion of the output of said mills of the petitioners Lumber Companies is destined to interstate destinations, the said movement from said petitioners Lumber Companies' mills to said junction points is a service of

61 transportation by a common carrier railroad in interstate commerce.

Your petitioners further state that no part of that portion of the report headed "Irregular Practices of Tap Lines," found on pages 649-650 of the 23d Interstate Commerce Commission Reports, applies in any respect whatsoever to the petitioner Railway Company, but that on the contrary said petitioner Railway Company, "files annual reports with the Commission"; said reports "are complete and comply with the requirements of the Act"; it does "publish local rates to apply on traffic received from or delivered to its trunk line connections"; it does "charge for carrying passengers and less than carload shipments in all cases, and under authority of published tariffs"; it does not "permit the use by any lumber company of its tracks, without charging therefor," but on the contrary all of its charges and rates "are under tariff authority filed with the Interstate Commerce Commission"; it complies with the "Hours of Service law"; with the "Safety Appliance Act," and all the "other Acts imposing requirements on common carriers engaged in interstate commerce."

There is no "lack of attention on the part of said Railway Company to the rules and regulations respecting the filing of tariffs and keeping of accounts," but on the contrary, said Railway Company complies strictly with such rules and regulations and pays out thousands of dollars annually in so doing and in the publishing of tariffs,

and the books of the petitioner Railway Company have al-
62 ways been open and "full access thereto has been given to the examiners of the Interstate Commerce Commission."

Your petitioners allege that if any such failures to comply with the Act to Regulate Commerce existed on the line of the petitioner Railway Company, or if any such irregular practices do exist upon the line of the said petitioner, it is the duty of the said Interstate Commerce Commission to invoke the curative processes provided for in the Act, and petitioners further allege that such lapses or irregular practices, if any, do not constitute any basis for denial to said petitioner Railway Company and its shippers of the status which the law confers upon it.

18. Petitioners allege that the action of the respondents Railroad Companies, in filing with the Interstate Commerce Commission, in August, 1910, the schedule designated as Supplement No. 3 to Interstate Commerce Commission No. 23, effective the 10th day of September, 1910, and Supplement No. 9 to I. C. C. No. 2454-B, and schedule designated as Supplements Nos. 5 and 6 to Interstate Commerce Commission Nos. 6073 and 6194, and any and all other schedules filed by said respondents which state new, individual or joint rates, fares or charges that are in excess of the rates, fares and charges theretofore in effect, and which in effect cancel the through routes and joint rates with the petitioner Railway Company, is violative of the terms, obligations and conditions of said contracts between the respondents Railroad Companies and the petitioner Railway Company heretofore pleaded; and that the same is without cause, justification or
63 excuse; and that the action of said respondent Railway Companies in filing said schedules which state new, individual or joint rates, fares or charges that are in excess of the rates, fares and charges theretofore in effect, and which cancel through routes and joint rates with the petitioner Railway Company is in violation of that portion of Section 1 of the Act to Regulate Commerce, reading as follows:

"All charges made for any service rendered or to be rendered in the transportation of passengers or property * * * or in connection therewith shall be just and reasonable; and every unjust and unreasonable charge for such service, or any part thereof, is prohibited and declared to be unlawful. * * * And it is hereby made the duty of all common carriers subject to the provisions of this Act to establish, observe and enforce just and reasonable classifications of property for transportation with reference to which rates, tariffs, regulations or practices are or may be made or prescribed, and just and reasonable regulations and practices affecting classifications, rates or tariffs." * * *

and is in violation of Section 3 of the Interstate Commerce Act, reading as follows:

"That it shall be unlawful for any common carrier subject to the provisions of this Act to make or give any undue or unreasonable preference or advantage to any particular person, company, firm,

corporation or locality, or any particular description of traffic, in any respect whatsoever, or to subject any particular person, company, firm, corporation or locality, or any particular description of traffic, to any undue or unreasonable prejudice or disadvantage in any respect whatsoever.

Every common carrier subject to the provisions of this Act
64 shall, according to their respective powers, afford all reasonable, proper and equal facilities for the interchange of traffic between their respective lines, and for the receiving, forwarding and delivering of passengers and property to and from their several lines and those connecting therewith, and shall not discriminate in their rates and charges between such connecting lines; but this shall not be construed as requiring any such common carrier to give the use of its tracks or terminal facilities to another carrier engaged in like business."

And the said action of said respondent Railroad Companies prevents these petitioners from having interstate traffic moved by said common carriers, the petitioner Railway Company and the respondent Railway Companies, at the same rates as are charged or upon terms or conditions as favorable as those given by said common carriers for like traffic under similar conditions to other shippers; and the action of the Interstate Commerce Commission first in declaring the law to be as said respondent declared the law to be by its opinion in the 17th Interstate Commerce Commission Reports, page 338 et seq., and later as it declared the law to be by its report contained in the 23d Interstate Commerce Commission Report, at page 277 et seq., and by the statement in said report permitting the cancellations by the trunk lines to become effective, is in violation of that portion of Section 15 of the Interstate Commerce law reading as follows, to-wit:

"The Commission may also, after hearing on a complaint or upon its own initiative without complaint, establish routes and joint classifications."

65 19. And the petitioners allege that the rights and equities of petitioners are so interwoven and complicated by their mutual undertakings under the contracts heretofore referred to and heretofore set out, that petitioners will be irreparably injured by the said respondents Railroad Companies' violation of said contracts, and petitioners will be without any adequate remedy at law.

That a multiplicity of suits will inevitably result, and circuitous action will be entailed upon the petitioners and each of them by the said respondents' avoidance and breach of said contracts.

That over 90 per cent of the lumber tonnage (more than 1,000 cars per month) handled by the petitioner Railway Company is destined to interstate points; that since the 1st day of May, 1912, the petitioner Railway Company has charged and is now charging on lumber destined to interstate points its local rate on all lumber shipments from all points to various points of connection with respondent Railway Companies.

The petitioners Lumbers Companies are being, and will continue

to be, placed at a serious disadvantage in regard to other lumber industries in the same territory not on the line of the petitioner Railway, because they are compelled to pay on all shipments of lumber destined to interstate points the local rate of the petitioner Railway to the junctions with respondent Railroad Companies, plus the blanket rate (which petitioners' competitors in said territory now enjoy) from said junctions to final destination of the lumber, the combination of the two rates placing petitioners Lumber Companies at a disadvantage as compared with petitioners Lumber Companies'
66 competitors in the same territory enjoying the blanket rate.

Petitioners Lumber Companies have no competitive rates on interstate lumber traffic, and the absence of through routes and joint rates greatly retards and impairs the business and investments of the petitioners Lumbers Companies, and the damages so caused to said petitioners cannot be adequately measured, and constitute irreparable loss.

Your petitioners further allege that in the case of Central Yellow Pine Association v. Vicksburg, Shreveport & Pacific Railroad Company, 10 Interstate Commerce Commission Reports, page 193, the Interstate Commerce Commission held that divisions such as those condemned in the opinions in "The Tap Line Case" were proper, and that, acting under the decision in the said Central Yellow Pine Association case, and other decisions of the Interstate Commerce Commission, and acting under the law of the State of Louisiana, the investments by the petitioners herein mentioned were made; that under the Constitution and Laws of the State of Louisiana the petitioner Railway Company is compelled to operate as a common carrier and its status as a common carrier is fixed by State and Federal laws, and the Interstate Commerce Commission is wholly without right or authority of law to deny to the petitioner Railway Company the right to operate as a common carrier of all traffic transported.

In the case of Freeo Valley Railroad Company v. Hodges, Secretary of State, 151 Southwestern Reporter, page 281, the Supreme Court of Arkansas, on November 18, 1912, held that the Freeo Valley Railroad Company (one of the parties to the proceeding
67 in the "Tap Line case") could not surrender its charter and cease to perform its duties to the state and the public, as a common carrier, and this is doubtless the law and will doubtless be so held by the Supreme Court of Louisiana and all other states.

Unless the petitioner Railway Company is permitted to earn revenue on all interstate shipments of lumber, it cannot pay its operating expenses or interest on its bonded indebtedness. The reports, decisions and orders of the Interstate Commerce Commission hereinbefore set out operate to confiscate said petitioner's property and to deprive it of its property without due process of law, and in violation of the Fifth Amendment to the Constitution of the United States.

The petitioners Lumber Companies have performed, and are now performing, in every respect, the contracts heretofore recited to be performed by them, and have annually, since the making of said contracts, delivered to the petitioner Railway Company, and said

Railway Company has delivered to the respondents Railroad Companies, freight upon which charges to the amount of thousands of dollars have been paid. The petitioners, and each of them, are remediless, unless relief be given by this Court by injunction and by other proper orders and decrees against the orders and requirements made by the Interstate Commerce Commission heretofore pleaded, and against the violation by the respondent Railroad Companies of the terms of the contracts between petitioners and said respondents hereinabove referred to and set out.

68 Your petitioners aver that the Commission in its finding and in that paragraph of the order which holds that the service performed by the petitioner Railway Company for the petitioners Lumber Companies, in moving logs to their mills and in moving the products of the mills to the trunk lines, is not a service of transportation by a common carrier railroad, acted erroneously and in violation of the provisions of the Act to Regulate Commerce; your petitioners aver that under the statement of facts contained in the report and opinion of the Commission the said service is in law a service of transportation by a common carrier railroad and that in accordance with the law the petitioner Railway Company should file tariffs of its charges for said service. Under the report and order of the Commission hereinbefore set out, no tariffs lawfully can be filed covering such movement; that if such movement is transportation, the petitioner Railway Company will be subject to the penalties provided in the statute for failure to file tariffs.

Further, your petitioners aver that under the statute no common carrier can engage in interstate commerce until it has first filed tariffs covering the transportation in which it is engaged. Your petitioners Lumber Companies therefore aver that their traffic could not be handled by the petitioner Railway Company, because the findings of the Commission that the said movement is not transportation by a common carried railroad precludes the filing of tariffs. For these reasons the said order is inconsistent with the Act to Regulate Commerce and destroys the rights of the petitioners Lumber Companies to have the products of their mills moved by the petitioner Railway

69 Company, and prevents said petitioner Railway Company from transporting said products as a common carrier in interstate commerce.

Your petitioners allege that the said order of the Commission, dated October 30, 1912, by its terms is directed against the respondent Railroad Companies, among others; that the petitioners were parties to the proceedings before the Interstate Commerce Commission out of which the orders, reports and decisions complained of grew; that their rights are vitally affected by said reports, decisions and orders; that the respondent trunk line railroads have profited materially by the aforesaid reports, decisions and orders, and will so continue to profit by reason of the fact that the existing lumber rates from the junction point between the petitioner Railway Company and the said trunk line companies are the same as those which prior to May 1, 1912, applied from the petitioners Lumber Companies' mills on the line of the petitioner Railroad Company; that

therefore your petitioners allege that the said reports, decisions and orders of the said Commission as vitally affect the property rights of the petitioners as if said order was directed against the petitioner Railroad Company by name.

Your petitioners and each of them are remediless, unless relief be given by this Court by injunction and by other proper orders and decrees against the orders and requirements made by the Interstate Commerce Commission heretofore pleaded.

20. Wherefore, your petitioners say that the said reports and decisions of the Interstate Commerce Commission, and the orders of date May 14, 1912, and October 30, 1912, made in pursuance
70 of said reports and decisions, are invalid and void for the following, among other, reasons:

"(1) The Interstate Commerce Commission is wholly without power, authority or jurisdiction to declare that there is any 'proprietary' lumber company or companies of the petitioner Railway Company; to declare that 'the service performed for the respective proprietary lumber companies in moving the logs from their respective forests to their respective mills, and in moving the product from the mills to the trunk lines is not a service of transportation by a common carrier railroad, but is a plant service by a plant facility, and that any allowances or divisions out of the rate on account thereof are unlawful,' in so far as such declaration and order is applied to the petitioner Railway Company, or to deprive said Company of its rights as a common carrier granted to it under the Constitution and laws of the State of Louisiana and the Constitution and laws of the United States.

(2) The Interstate Commerce Commission is wholly without power, authority or jurisdiction to declare that the transportation offered by the trunk line carriers, such as the respondent railroad companies, extends three miles distance from the line of such railroads and that an allowance may be made for the movement which is more than 1,000 feet from said line and not in excess of three miles from said line of railroad. The said holding is legislation, pure and simple, and the exercise of arbitrary and unreasonable power and constitutes a gross discrimination and violation of the Act to Regulate Commerce.

(3) Said order is unconstitutional, invalid and void, in that said order impairs the validity of the contracts hereinbefore declared upon, contrary to the provisions of the Fifth Amendment to the United States Constitution.

71 (4) Said order unduly discriminates against the petitioner Lumber Companies, as shippers, compared with shippers on the line of the petitioner Railroad and on other railroads.

(5) Said order deprives your petitioners of the through routes and joint rates provided for by Section 15 of the Interstate Commerce Act.

(6) The uncontradicted evidence in the proceeding had by the Interstate Commerce Commission under the title 'Investigation and Suspension Docket No. 11,' shows that the petitioner Railway Company is a common carrier under the law, and the finding of the

Interstate Commerce Commission that the petitioner Railway Company is not a common carrier is not based on any substantial testimony.

(7) Under the findings of fact made by the Interstate Commerce Commission, the petitioner Railway Company is a common carrier of lumber of the petitioner Lumber Companies, and of all other mills on its line of railway.

(8) The aforesaid decisions, reports and orders of the Interstate Commerce Commission require the petitioner Railway Company to maintain through routes and joint rates with its connecting carriers on traffic of others than the petitioner Lumber Companies, while forbidding the maintenance of through routes and joint rates and divisions upon lumber produced by the petitioner Lumber Companies when destined to interstate points, and thereby said order grossly and unjustly discriminates against the petitioners Lumber Companies, and subjects them to undue prejudice and disadvantage.

(9) The findings, reports, decisions and orders of the Commission hereinbefore set out are arbitrary, unreasonable and in excess of the power of the Commission, in that, among other things, the Commission compels unjust and unlawful discrimination as be-
72 tween the so-called 'tap line' railroads named in the orders hereinbefore set out."

27. Wherefore, petitioners, and each of them, pray that the said orders of the Interstate — Commission dated May 14, 1912, and October 30, 1912, be enjoined, set aside and annulled; that the United States of America, the Interstate Commerce Commission and all persons claiming to act under their authority, direction or control, be enjoined and restrained from enforcing or attempting in any wise to enforce or put in effect any portion of said orders which require the respondent Railway Companies to cease and for a period of two years thereafter abstain from maintaining through routes and joint rates upon any property transported from the mills of the petitioners Lumber Companies on the line of the petitioner Railway Company.

And your petitioners further pray that the respondents, Railroad Companies, be enjoined and restrained from violating the terms of the said contract herein pleaded and herein fully set out under the mark of Exhibit "A" and that they and each of them be specifically ordered and required to continue to observe the terms, conditions and obligations of said contract, by filing with the Interstate Commerce Commission the tariffs described and set out in paragraph 12 hereof (or similar tariffs), giving to the Louisiana & Pacific Railway Company through interstate rates, and that the Interstate Commerce Commission be specifically ordered and commanded to accept, receive and file and to permit to become effective upon three days'
73 notice the tariffs specifically described in paragraph 12 hereof, or similar tariffs.

And your petitioners pray for all other and further relief as in equity and good conscience they may be entitled to receive.

And may it please Your Honors to grant unto your petitioners a subpœna of the United States of America, issuing out of and under

the seal of this Honorable Court, directed to the United States of America; Chicago, Rock Island & Pacific Railway Company; Rock Island, Arkansas & Louisiana Railway Company, the respondents herein respectively, therein and thereby commanding them on a day certain therein to be named, and under a certain penalty, to be and appear before this Honorable Court, then and there to answer, but not under oath (an answer under oath being hereby expressly waived), all and singular, the premises, and to stand to, perform and abide by such order, direction or decree as may be made against them in the premises as shall seem meet and agreeable to equity and good conscience.

And your petitioners, as in duty bound, will ever pray.

WOODWORTH & LOUISIANA CENTRAL
RAILWAY COMPANY, LIMITED.
RAPIDES LUMBER COMPANY, LIMITED.
THE LONG-BELL LUMBER COMPANY,
By W. R. THURMOND,
H. M. GARWOOD,
L. M. WALTER,
Their Solicitors.

74 STATE OF MISSOURI,

C. B. Sweet, being duly sworn, on his oath states that he is president of the Woodworth & Louisiana Central Railway Company and of the Rapides Lumber Company, petitioners in the above entitled cause.

That he has read the above and foregoing petition and is familiar with the facts therein stated and that the allegations and averments therein made and contained are true.

C. B. SWEET.

Subscribed and sworn to before me this 4th day of January, 1913.

My commission expires April 29, 1915.

[SEAL.] HOYT A. POORMAN,

Notary Public in and for Jackson County, Missouri.

EXHIBIT "A."

Agreement made this first day of August, A. D. 1906, by and between the Rock Island, Arkansas and Louisiana Railroad Company, hereinafter called the "Rock Island Company," party of the first part; The Chicago, Rock Island and Pacific Railway Company, hereinafter called the "Chicago Company," party of the second part; the Woodworth and Louisiana Central Railway Company, Ltd., hereinafter called the "Woodworth Company," party of the third part; the Rapides Lumber Company, Ltd., hereinafter called the "Lumber Company" party of the fourth part; and the Long-Bell Lumber Company, hereinafter called the "Long-Bell Company," party of the fifth part.

The Rock Island Company is a corporation organized and existing under the laws of the State of Arkansas. It owns or operates certain railway lines in and through the States of Arkansas and Louisiana, it is now constructing a line into and through Lamourie, in the Parish of Rapides, in said State of Louisiana, and it reaches directly and through its connections, a large number of markets wherein

76 the products of the Lumber Company or of the Long-Bell Company, or of companies owned or controlled by the said Lumber Company or by the Long-Bell Company, or either of them, can be sold.

The Chicago Company is a consolidated corporation organized and existing under the laws of the States of Illinois and Iowa. It is the lessee under a lease for a period of nine hundred and ninety-nine (999) years, of the existing railway of the Rock Island Company, and of the railways or extensions of railways hereafter constructed or acquired by it; that portion of the railway of the Rock Island Company now being constructed into and through Lamourie, as aforesaid, will, when completed, become a part of the railway to which said lease applies.

The Woodworth Company is a corporation organized and existing under the laws of the State of Louisiana, being duly authorized to construct, own and operate a steam railroad. It has, at the request of the Lumber Company, and the Long-Bell Company, built a line of railway from Nelson to Lamourie, both being in the Parish of Rapides and State of Louisiana, as hereinafter more particularly set forth. Said line of railway will connect with the line of the Rock Island Company at Lamourie, when the latter is completed, will largely traverse the timber lands of the Lumber Company, or of the Long-Bell Company, or of companies owned or controlled by the said Lumber Company and the Long-Bell Company, or either of

them, and, in connection with the railway of the Rock Island Company, and of the Chicago Company, will furnish railway facilities for the transportation of the timber of the Lumber Company, or
of the Long-Bell Company, and of the companies owned or
77 controlled by the Lumber Company and the Long-Bell Company, or either of them, from the forest to the different mills of the Lumber Company, or of the Long-Bell Company, and of companies owned or controlled by the said Lumber Company and the Long-Bell Company, or either of them, on said line of railway, and the transportation of the products thereof to the markets the Lumber Company and the Long-Bell Company desires to reach for itself and companies owned or controlled by it.

The Lumber Company is a corporation organized and existing under the laws of the State of Louisiana, and owns or controls large tracts of timber land in the Parish of Rapides in said state, all of which are tributary to the said proposed line of railway of the Woodworth Company, and is extensively engaged in the business of cutting the timber on such land and marketing the products thereof. The transaction of the business of the Lumber Company and of the Long-Bell Company, and of companies owned or controlled by them, or either of them, is hampered and less profitable than it should be because of lack of adequate railway facilities and means for the transportation of the timber from the forest to its mills, and for the lack of facilities and means by which the products of said timber may be transported from the said mills to the most advantageous markets. For the proper, economical and profitable conduct of its business, it arranged with the Woodworth Company to construct and operate said proposed line of railway. In furtherance of this purpose the Woodworth Company and the Lumber Company have requested the Rock Island Company to permit the Woodworth Company to make a track connection with its line and to enter into this
agre-ment.

78 The Long-Bell Company is a corporation organized and existing under the laws of the State of Missouri. It owns or controls the property and franchises of the Lumber Company through stock ownership thereof, and has also requested the Rock Island Company to permit the Woodworth Company to make a track connection with its line and to enter into this agreement.

The several parties hereto, because of the mutual advantages accruing to them hereby, are willing to enter into this agreement.

Now, therefore, in consideration of the premises and of the mutual covenants and agreements hereinafter contained, and of the sum of one dollar by each party hereto to the other parties paid, the parties hereto have covenanted and agreed, and do hereby covenant and agree, each with the others, as follows:

1. The Woodworth Company covenants and agrees that it will, with all convenient speed and dispatch, provide its said railroad with the necessary side or spur tracks and other appurtenances necessary to a railway ready for the operation of trains thereover, from Nelson, Louisiana, to Lamourie, Louisiana, and to connect said line with

the line of railway of the Rock Island Company at Lamourie, in the Parish of Rapides and State of Louisiana.

2. The Rock Island Company hereby grants to the Woodworth Company, during the existence of this agreement, the right to connect the above described line of railway of the Woodworth Company with the line of railway of the Rock Island Company at such
79 convenient point in or near Lamourie as shall be designated by the Rock Island Company, and also the right thereafter for a like term to operate the same, under such rules and regulations therefor as shall from time to time be adopted by the Rock Island Company.

3. The Rock Island Company and the Woodworth Company agree that during the existence of this agreement they will interchange business with each other at said point of connection of their respective lines, and, by means thereof, will establish a through line of railway with traffic thereover, on the basis of the divisions of rates as hereinafter set forth.

4. The Lumber Company and the Long-Bell Company covenant and agree with the Woodworth Company, for its benefit and that of the Rock Island Company and of the Chicago Company, to ship and cause to be shipped each and every month during the existence of this agreement, over the line of railway of the Woodworth Company, from the forest to the mills of the Lumber Company and of the Long-Bell Company, and of companies owned or controlled by the Lumber Company and by the Long-Bell Company, all the timber cut by the Lumber Company and all companies owned or controlled by the said Lumber Company and by the Long-Bell Company from all their lands (including all lands controlled directly or indirectly by them, or by any subsidiary company of the Lumber Company or the Long-Bell Company, or by any company controlled by or in which the Lumber Company or the Long-Bell Company holds a controlling interest) which they or either of them now own or may hereafter acquire along or contiguous to the said line of rail-
80 road of the Woodworth Company, and that they will ship at least fifty per centum (50%) of all the products of said mills to said point of connection at Lamourie over the line of railroad of the Woodworth Company; and thence over the line of railway of the Rock Island Company, and of the Chicago Company and their connections, to the points of destination thereof, and the Woodworth Company covenants and agrees with the Rock Island Company and with the Chicago Company, during the existence of this agreement, to deliver to the Rock Island Company, or to the Chicago Company, at said point of connection at Lamourie, said amount of at least fifty per centum (50%) of all the products of said mills, as hereinbefore mentioned, for the purpose of having the same transported from the said point of connection over the lines of railway of the Rock Island Company and of the Chicago Company, and their connections, to the points of destination thereof; provided, however, that if thereafter the Lumber Company or the Long-Bell Company shall acquire timber lands along or contiguous to the line of railway of the Woodworth Company, the owners of which shall require, as a condition of the sale thereof, that all or a part of the timber and products of

timber from the same, shall be shipped over some other line or lines of railway than that of the Rock Island Company, then, and in such case, the provisions of this agreement shall not apply to such lands or to the timber or products of timber therefrom, in so far as they may be in necessary conflict with the said condition of sale of such after-acquired lands.

81 5. The Rock Island Company and the Chicago Company agree, during the existence of this agreement, to accept from the Woodworth Company all shipments by it offered, to transport the same with reasonable promptness and dispatch, and to use every reasonable effort to furnish the Woodworth Company with cars, as requested by it from time to time, to a number sufficient for transporting at least fifty per centum (50%) of all the products of the mills of the Lumber Company and of the Long-Bell Company, and all companies owned or controlled by them, or either of them. It is understood and agreed, however, that if the Rock Island Company or the Chicago Company shall fail during any calendar month to furnish the number of cars required by the Woodworth Company and necessary in order to transport fifty per centum (50%) of the products of said mills during said month, then in such event the Rock Island Company or the Chicago Company shall not be obliged thereafter to make up such deficit of cars in any such calendar month, nor shall the Woodworth Company be obliged thereafter to furnish freight to make up such deficit on account of such failure of said Rock Island Company or of the Chicago Company to furnish cars in such calendar month.

6. The Rock Island Company, the Chicago Company and the Woodworth Company agree each with the other that they will enter into joint tariffs relating to the joint traffic over their respective lines, and to file the same with the Interstate Commerce Commission and to publish the same in the manner and form as required by law.

82 7. It is further agreed that no per diem charges shall be made by either the Rock Island Company, the Chicago Company or the Woodworth Company on freight cars delivered by either to the other of said parties, including its own and also foreign cars, during or for the first six (6) days after each delivery; but all per diem charges accruing on cars after the expiration of said period of six (6) days from the date of delivery thereof by one of said parties to the other, shall be paid by the party using and holding said cars to the other of said parties.

8. The cost and expense of constructing, maintaining and renewing such connecting, interchange or side tracks as may be necessary to properly handle the business of the Woodworth Company at said point of connection at Lamourie, shall be borne and paid jointly and equally by the Woodworth Company and the Rock Island Company.

9. The Lumber Company and the Long-Bell Company further covenant and agree with the Woodworth Company and the Rock Island Company and the Chicago Company, to deliver or cause to be delivered, to the Woodworth Company, for transportation over the railway of the Rock Island Company and of the Chicago Company, to points on or reached by way of the railways or some of them constituting the railway lines or systems of which the Rock Island

Company or the Chicago Company shall form a part, at least fifty per centum (50%) of all outbound shipments of lumber and other products of the mills of the Lumber Company or of the Long-Bell Company, and of all companies owned or controlled by them
83 or either of them, each and every month during the existence of this agreement, and in every such case the Lumber Company and the Long-Bell Company shall cause or permit such shipments to be so routed as to give to the railways constituting the railway lines or system of which the Rock Island Company and the Chicago Company are a part, such haul as shall yield to them the largest revenue.

10. In respect to the division of freight rates between the Woodworth Company and the Rock Island Company and the Chicago Company, the Woodworth Company and the Rock Island Company and the Chicago Company hereby agree to the following divisions, during the existence of this agreement:

"On all lumber shipments originating on the line of the Woodworth Company, the Woodworth Company shall receive thirty-five (35) per centum of the through rate, with a maximum of five and one-half (5½) cents per hundred pounds."

It is agreed that the above division of through rates shall include delivery of shipments to the Rock Island Company, or to the Chicago Company, and are based upon the present through rates. It is agreed that if, at any time during the existence of this agreement, the through rates shall be reduced, the maximum of five and one-half cents per hundred-weight due to the Woodworth Company shall be reduced in proportion to said reduction of through rate.

The Rock Island Company and the Chicago Company agree
84 that they will, at all times during the existence of this agreement, publish for all territory east of the Mississippi River and north of the Ohio River, and points on and west of the Mississippi River on the lines of the Rock Island and Frisco systems and their connections, the same freight rates from points on the Woodworth Company's line as are or shall be in effect from Alexandria on the Rock Island Company's line.

On all commodities of traffic, other than lumber, which may be interchanged between the Woodworth and the Rock Island Companies and the Chicago Company, the said companies agree to make such divisions of the tariffs between themselves as shall be reasonable and fair and in accordance with the usual methods of making joint tariffs and divisions on like commodities between railroad companies operating lines of railroad within the State of Louisiana.

11. The Woodworth Company and the Rock Island Company and the Chicago Company agree that each company shall be amenable to the other company for the prompt and proper handling of all cars of the other company, or cars of other companies not parties thereto, which it may handle; that in the handling of cars the usual practice and penalties of railroad companies in the State of Louisiana shall govern, excepting as to per diem charges as hereinbefore provided for, and that no cars of either company shall be used locally by the other company.

85 12. The Rock Island Company and the Woodworth Company and the Chicago Company each further covenant and agree to indemnify and save harmless the other from any and all loss of or damage to its cars or equipment, or to cars or equipment belonging to other companies or persons, which either company may receive from the other company; and in case of any damage of said cars or equipment, while on its said line, each of said companies agrees to properly repair the same without delay, and if it fails or neglects to repair the same with a reasonable time and to the satisfaction of the other company, then the other company may make such repairs, and the cost thereof, with ten per centum (10%) thereon additional thereto, shall be paid to the company making such repairs by the other company immediately upon the receipt of statements showing the amount of such cost.

13. This agreement, and all the terms and conditions, rights and obligations hereof, shall inure in favor of and be binding upon the successors, assigns and lessees of each of the parties hereto.

14. This agreement shall commence and become effective on the date hereof, and shall be and remain in full force and effect for the period of fifteen (15) years thereafter, or as long as the Lumber Company shall operate its mills in said Parish of Rapides.

86–265 In Witness Whereof, each party herein has caused this agreement to be signed by its proper officer, and its corporate seal to be hereto affixed and attested, the day and year first above written. Executed in quintuplicate.

Notice to the Attorney General.

(Filed January 9, 1913.)

United States Commerce Court.

WOODWORTH & LOUISIANA CENTRAL RAILWAY COMPANY, LIMITED, Rapides Lumber Company, Limited, The Long-Bell Lumber Company, Petitioners,

vs.

THE UNITED STATES OF AMERICA, CHICAGO, ROCK ISLAND & Pacific Railway Company, Arkansas & Louisiana Railway Company, Respondents.

The President of the United States to Honorable George W. Wickersham, as Attorney General of the United States:

You are hereby notified that a petition has been filed in the above entitled case in the office of the Clerk of the United States Commerce Court at Washington, D. C., copy of which is herewith served by filing said copy in the Department of Justice.

In case no answer shall be filed to said petition within thirty days after such service, the petitioner may apply to the Court on notice for such relief as may be proper upon the facts alleged in said petition.

Witness the Honorable Martin A. Knapp, Presiding Judge of the United States Commerce Court, this 8th day of January, A. D. 1913.

[Seal of the United States Commerce Court.]

WOODWORTH & LOUISIANA CENTRAL RAILWAY COMPANY, LIMITED, et al.,
vs.
THE UNITED STATES OF AMERICA et al.

I hereby enter the appearance of The Chicago, Rock Island & Pacific Railway Company and Rock Island, Arkansas & Louisiana Railroad Company, respondents, and of myself as their attorney, in the above entitled cause.

W. F. DICKINSON,
Attorney for said Respondents.

271 In the United States Commerce Court, February Session, 1913.

No. 91.

WOODWORTH & LOUISIANA CENTRAL RAILWAY COMPANY, LIMITED, Rapides Lumber Company, Limited, The Long-Bell Lumber Company, Petitioners,
v.
THE UNITED STATES OF AMERICA, CHICAGO, ROCK ISLAND & Pacific Railway Company, Arkansas & Louisiana Railway Company, Respondents.

Motion of the United States to Dismiss the Petition.

(Filed February 7, 1913.)

Comes now the United States of America, one of the respondents, by its counsel, and moves the court to dismiss the above-entitled cause, upon the following grounds, viz:

1. The Commerce Court is without jurisdiction or authority to grant the relief prayed, or any part of the same, because—

(*a*) The order of the Interstate Commerce Commission is negative in that, in the absence of the Rapides Lumber Company, Limited, and The Long-Bell Lumber Company, as petitioners,
272 and Chicago, Rock Island & Pacific Railway Company and Arkansas & Louisiana Railway Company, as respondents, none of which is a proper party to this proceeding, except on its own motion, any relief granted against the United States would be of no avail to the Woodworth & Louisiana Central Railway Company in restoring the status quo of the parties;

(*b*) The order of the Interstate Commerce Commission complained of directed no affirmative relief, and the negative order of the commission affords no basis for any action by the Commerce Court;

(*c*) The same relief which is sought of the Commerce Court was denied by the Interstate Commerce Commission, and the Commerce Court has no power or authority to act for and instead of the said commission.

2. The Commerce Court is without jurisdiction or authority to grant the relief prayed, or any part of the same, because—

(*a*) The Woodworth & Louisiana Central Railway Company, Limited, is not a common carrier engaged in commerce among the several States;

(*b*) The suit is not one commenced by a common carrier engaged in commerce among the several States, but is commenced in the name and on behalf of the Rapides Lumber Company, Limited, and the Long-Bell Lumber Company, engaged in the manufacture and sale of lumber;

(*c*) The suit is not one brought in the Commerce Court by a common carrier against the United States to enjoin, set aside,
273 annul, or suspend, in whole or in part, an order of the Interstate Commerce Commission, but is commenced against Chicago, Rock Island & Pacific Railway Company and Arkansas & Louisiana Railway Company, common carriers engaged in commerce among the several States;

(*d*) The said Rapides Lumber Company, Limited, and The Long-Bell Lumber Company seek to compel the specific performance of the contract marked "Exhibit A" between them and the said Chicago, Rock Island & Pacific Railway Company and Arkansas & Louisiana Railway Company, common carriers engaged in commerce among the several States;

(*e*) The said Rapides Lumber Company, Limited, and The Long-Bell Lumber Company seek to compel the Chicago, Rock Island & Pacific Railway Company and Arkansas & Louisiana Railway Company, common carriers engaged in commerce among the several States, to file tariffs giving to the Louisiana & Pacific Railway Company through routes and joint rates, and to compel the Interstate Commerce Commission to receive and file the same, after the commission has negatively ordered otherwise;

(*f*) The said petitioners seek to invoke the jurisdiction of the Commerce Court to entertain a controversy not contemplated by the act to create a Commerce Court, in that the Woodworth & Louisiana

Central Railway Company and the United States are but nominal parties, and the real controversy will be conducted and carried on by, between, and in the interest of, the said two lumber companies and the said two common carriers subject to the act to regulate commerce;

274 (*g*) The power to establish through routes and joint rates under the act to regulate commerce is reposed exclusively in the carriers, and in the event of their failure to agree, exclusively in the Interstate Commerce Commission under section 15 of the said act.

3. The said Woodworth & Louisiana Central Railway Company, Limited, Rapides Lumber Company, Limited, and The Long-Bell Lumber Company are, and each of them is, without any standing in a court of equity to enjoin, set aside, annul, or suspend the order of the Interstate Commerce Commission, on the ground that the Woodworth & Louisiana Central Railway Company, Limited, is a common carrier engaged in commerce among the several States; for that if the said Woodworth & Louisiana Central Railway Company, Limited, is a common carrier engaged in commerce among the several States, then it and the said two lumber companies, as one and the same enterprise, are unlawfully transporting in interstate commerce commodities manufactured, produced, and otherwise dealt in by them, and in which they have an interest, direct and indirect, in violation of section 1 of the act to regulate commerce.

4. The Woodworth & Louisiana Central Railway Company, Limited, Rapides Lumber Company, Limited, and The Long-Bell Lumber Company have no standing in a court of equity to maintain an action to enjoin, set aside, annul, or suspend the order of the Interstate Commerce Commission, and to compel specific per-

275 formance of the contract set out under the mark of "Exhibit A" to the petition, because the said contract on its face is illegal and void, in that it creates illegal preferences and discriminations on the part of the Chicago, Rock Island & Pacific Railway Company and the Arkansas & Louisiana Railroad Company in favor of the Rapides Lumber Company, Limited, and the said The Long-Bell Lumber Company, in violation of the act to regulate commerce, approved February 4, 1887, and the various acts amendatory thereof or supplementary thereto, or certain of the provisions thereof.

5. That the incorporation of the Woodworth & Louisiana Central Railway Company, Limited, and the use of the same is a mere device and subterfuge for the purpose of giving the appearance of legality to the illegal contract between the said lumber companies and the said common carriers engaged in commerce among the several States, and for the further purpose of covering up the unlawful preferences, discriminations, and rebates growing out of the same.

6. There is a misjoinder of causes of action and the petition is multifarious because—

(*a*) The petitioners seek an injunction against the United States of America, the Interstate Commerce Commission, and all persons

claiming to act under their authority, direction, or control; and in the same petition,

(*b*) The petitioners seek an injunction against the Chicago, Rock Island & Pacific Railway Company and Arkansas & Louisiana Railway Company preventing them from violating the terms of
276 the contract pleaded and set out under the mark of "Exhibit A"; and in the same petition,

(*c*) The petitioners seek to compel specific performance of the said contract on the part of the said Chicago, Rock Island & Pacific Railway Company and Arkansas & Louisiana Railway Company; and in the same petition,

(*d*) The petitioners seek an order compelling the carriers to file tariffs of their rates and charges with the Interstate Commerce Commission; and in the same petition,

(*e*) The petitioners seek an order compelling the Interstate Commerce Commission to receive and file the tariffs after the court, by a similar previous order, has compelled the Chicago, Rock Island & Pacific Railway Company and the Arkansas & Louisiana Railway Company to file the said tariffs; and in the same petition,

(*f*) The petitioners seek an order compelling the Chicago, Rock Island & Pacific Railway Company and the Arkansas & Louisiana Railway Company to establish through routes and joint rates with the Woodworth & Louisiana Railway Company.

7. There is a misjoinder of parties because—

According to the statute, none of the following parties, to wit: The Rapides Lumber Company and The Long-Bell Lumber Company, as petitioners, and Chicago, Rock Island & Pacific Railway Company and Arkansas & Louisiana Railway Company, as respondents, is a necessary or proper party, or a permissible party, except on its own motion.

277 8. The petitioners are, and each of them is, estopped from assailing the validity of the order of the Interstate Commerce Commission, as the said order was entered upon the request and with the consent of the said petitioners and each of them.

9. The petitioners have not in and by their said petition shown that in making its said order the Interstate Commerce Commission transcended the powers conferred upon it by the statute or violated any right of petitioners protected by the Constitution of the United States, or any other right of the petitioners over which this court may exercise jurisdiction.

10. The petition is vague, indefinite, uncertain, and insufficient in that it contains much irrelevant and immaterial matter and abounds in conclusions and assumptions of the pleader without facts to support the same.

11. The said petition is insufficient to set forth a cause of action upon which the court may grant the relief prayed, or any part of the same.

Wherefore, and for divers other good causes appearing from the face of the said petition more fully to be pointed out upon the hearing hereof, this respondent prays that its motion be sustained, and that the said petition be dismissed at the petitioners' cost and

that it be not required to make any answer thereto; and for such other and further action as may be appropriate in the premises.

BLACKBURN ESTERLINE,
Special Assistant to the Attorney General.

VICTORIA, FISHER & WESTERN R. R. CO. et al., Petitioners,
vs.
THE UNITED STATES OF AMERICA, Respondent; INTERSTATE COMMERCE COMMISSION et al., Interveners.

Thereupon these causes came on for hearing upon the motion of the United States to dismiss for want of jurisdiction in open court made, and the arguments of counsel were concluded, Mr. Assistant Attorney General Denison and Mr. Blackburn Esterline appearing on behalf of the United States, Mr. Charles W. Needham on behalf of the Interstate Commerce Commission, Mr. Luther M. Walter and Mr. H. M. Garwood on behalf of the petitioners, Mr. James L. Coleman on behalf of the intervening carriers, and Mr. Wylie M. Barrow on behalf of the Railroad Commission of Louisiana. Thereupon the cause was taken under advisement by the Court.

279 *Order Denying Motion to Dismiss for Want of Jurisdiction.*

(Entered February 24, 1913.)

United States Commerce Court.

No. 91.

WOODWORTH & LOUISIANA CENTRAL RAILWAY COMPANY, LIMITED, et al., Petitioners,

vs.

THE UNITED STATES OF AMERICA et al., Respondents; INTERSTATE COMMERCE COMMISSION et al., Interveners.

Order.

The above entitled cause came on for hearing before the Court on February 10, 1913, at Washington, D. C., upon the motion of the United States to dismiss for want of jurisdiction, in open court made; and the court having given the arguments of counsel due consideration, now, on this 24th day of February, 1913,

It is ordered and adjudged that said motion be, and the same is hereby, denied, the court being of opinion that the order complained of is an order the validity of which this court has jurisdiction to determine at the suit of the petitioners. The Court, however, in so deciding, in no way passes upon the merits of the case presented by the petition filed.

By the Court:

MARTIN A. KNAPP,
Presiding Judge.

280 In the United States Commerce Court.

No. 91.

WOODWORTH & LOUISIANA CENTRAL RAILWAY COMPANY, LIMITED, Rapides Lumber Company, Limited; the Long-Bell Lumber Company, Petitioners,

v.

THE UNITED STATES OF AMERICA, CHICAGO, ROCK ISLAND & PACIFIC Railway Company; Arkansas & Louisiana Railway Company, Respondents.

Answer of the United States.

(Filed March 18, 1913.)

The United States of America, respondent, not waiving its motion to dismiss the above-entitled cause for want of jurisdiction of the court over the subject matter, but still insisting upon its said motion and each and every part of the same, and still protesting against

the court entertaining jurisdiction over the subject matter now and at all times hereafter, and answering the said petition under protest—

The United States of America, respondent, now and at all times hereafter saving to itself any and all manner of benefit and advantage of exceptions or otherwise that can or may be had or
280*a* taken to the many errors, uncertainties, and imperfections in said petition contained, for answer thereto or to so much thereof as this respondent is advised it is material or necessary for it to make answer, answers and says:

I. It admits—

(*a*) The allegations of Paragraph VI of the petition;

(*b*) The commission made and entered the orders of September 3, 1910, and January 16, 1912, referred to in Paragraph VIII of the petition;

(*c*) The commission made and entered the order of November 15, 1910, referred to in Paragraph IX of the petition;

(*d*) The filing with the commission of the brief and argument referred to in Paragraph IX of the petition;

(*e*) The making and filing by the commission on April 29, 1912, of report No. 1853, entitled "Investigation and Suspension, Docket No. 11," referred to in Paragraph X of the petition;

(*f*) The making and filing by the commission on May 14, 1912, of supplemental report No. 1898, entitled "Investigation and Suspension, Docket No. 11, The Tap Line Case," parts of which are set out on pages 18 to 23, inclusive, of the petition, in extenso;

(*g*) The commission made and entered the order of May 14, 1912, referred to on pages 24 to 30, inclusive, of the petition;

(*h*) The filing with the commission of the petition in "I. and S., Docket No. 11," referred to on pages 31 to 38, inclusive, of the petition; and

280*b* (*i*) The commission made and entered the amended order of October 30, 1912, referred to on pages 38 to 46, inclusive, of the petition.

II. It admits—

(*a*) Woodworth and Louisiana Central Railway Company, Limited, is a corporation;

(*b*) Rapides Lumber Company, Limited, is a corporation;

(*c*) The Long-Bell Lumber Company is a corporation;

(*d*) Chicago, Rock Island and Pacific Railway Company is a corporation;

(*e*) Rock Island, Arkansas and Louisiana Railway Company is a corporation;

(*f*) The contract attached to the petition as Exhibit A.

III. Woodworth and Louisiana Central Railway Company, Limited, Rapides Lumber Company, Limited, and The Long-Bell Lumber Company are three interlocking corporations under a common ownership, control, and management operating in the State of Louisiana, with headquarters in a single office in Kansas City, Missouri. Chicago, Rock Island and Pacific Railway Company and Rock Island, Arkansas and Louisiana Railway Company are corporations and common carriers by railroad engaged in interstate

commerce and serve the petitioners. Prior to and during part of the year 1906 the said two common carriers named and other common carriers paid secret allowances to Rapides Lumber Company,
280c Limited, for lumber delivered by it to and transported by the said common carriers in interstate commerce, and each of them, which were illegal rebates and departures from the published tariffs. During the year 1906, or shortly prior thereto, as a device, the stockholders and officers of Rapides Lumber Company, Limited, and The Long-Bell Lumber Company, under the pretense of securing a better supply of cars and other railroad facilities, caused to be organized the Woodworth and Louisiana Central Railway Company, Limited, and took over, for a nominal consideration, the tracks and other plant facilities of Rapides Lumber Company, Limited, which theretofore had been used for the shifting of the loaded and empty cars within and around its mills. Through its organization and by other schemes and devices the stockholders and officers of Rapides Lumber Company, Limited, and The Long-Bell Lumber Company sought to clothe Woodworth and Louisiana Central Railway Company, Limited, with the rights and obligations of a common carrier with trunk-line connections. After so manipulating the said plant facilities and creating competition among several common carriers engaged in interstate commerce for the heavy traffic of Rapides Lumber Company, Limited, and The Long-Bell Lumber Company, they and Woodworth and Louisiana Central Railway Company, Limited, with the power wielded in the control of the heavy traffic, were enabled to and did hammer the competing trunk lines
280d for allowances or divisions; and by reason thereof the petitioners were enabled to and did, in the year 1906, secure such excessive allowances and divisions from Chicago, Rock Island and Pacific Railway Company and Southern Pacific System that they entered into similar, separate contracts with them, in and by which Chicago, Rock Island and Pacific Railway Company, since the year 1906, has received and transported fifty per cent (50%) of the traffic, a copy of the contract being attached to the petition as Exhibit A, and in and by which the Southern Pacific System, since the year 1906, has received and transported forty per cent (40%) of the traffic on similar terms and conditions. By entering into the contracts with the said two trunk lines named, for which they must furnish the cars for ninety per cent (90%) of the traffic, the remaining competing trunk lines are unable to secure any substantial proportion of the traffic; and the petitioners are unable to avail themselves of the cars and other facilities which the other competing carriers could furnish if allowed any substantial proportion of the traffic. The three interlocking petitioners under the common ownership, control, and management are operated for the double purpose of (1) controlling the traffic and dictating their allowances and divisions and (2) giving color of legality to the unlawful arrangements between the said two railroad companies and the petitioners.

The allowances or divisions made to Woodworth and Louis-
280e iana Central Railway Company are illegal rebates to the Rapides Lumber Company, Limited, and The Long-Bell Lumber Company and departures from the published tariffs and

illegal preferences and discriminations forbidden by the provisions of the act to regulate commerce, approved February 4, 1887, and the various acts amendatory thereof and supplementary thereto.

IV. The matters and things heard and determined by the Interstate Commerce Commission were within its power and authority to hear and determine under the provisions of the act to regulate commerce, and in its reports in writing with respect thereto, made after a full hearing and due notice to all the parties, which state its conclusions, together with its decision, order, or requirement in the premises, the matters and things of which complaint is made were fully covered and foreclosed by findings of fact.

V. Further answering the said petition and each and every part of the same in so far as it has not heretofore been admitted, denied, or otherwise traversed, this respondent denies any fact or facts alleged in said petition or any part of the same which deny or which seek to deny any fact or facts found by the Interstate Commerce Commission in its said reports and order; and denies any fact or facts alleged in said petition or any part of the same which are inconsistent with any fact or facts found by the Interstate Commerce Commission in its said reports and order; and denies any and
280*f* all inferences of fact from any particular fact or facts alleged in the said petition or any part of the same which seek to deny or which are inconsistent with any fact or facts found by the Interstate Commerce Commission in its said reports and order; and denies any fact or facts alleged in said petition or any part of the same which set up or which seek to set up matters and things which were not before the Interstate Commerce Commission or which are not referred to in its said reports and order; and denies any fact or facts alleged in said petition or any part of the same which attack or which seek to attack the reports and order of the Interstate Commerce Commission and to show facts differently from what the said reports and order show on the face thereof; and denies any allegations in said petition or any part of the same which allege that facts were found by the Interstate Commerce Commission in its said reports and order which, as shown on the face thereof, in fact were not so found; and denies any conclusions of law alleged and insisted upon in the said petition or any part of the same which are inconsistent with any conclusions of law held by the Interstate Commerce Commission in its said reports and order.

And this respondent now gives notice that upon the final hearing hereof, and in accordance with section 1 of the act entitled "An act to create a Commerce Court," etc., approved June 18, 1910, it will move to dismiss the petition, for that the same is insufficient
280*g* to state any cause of action against the said respondent and will renew and urge in support thereof the grounds of its written motion already filed in that behalf.

Wherefore, having fully answered, respondent prays that the petition be dismissed at the cost of the petitioners, and for such other and further order as may be appropriate in the premises.

BLACKBURN ESTERLINE,
Special Assistant to the Attorney General.

March, 1913.

280*h* In the United States Commerce Court.

No. 91.

WOODWORTH & LOUISIANA CENTRAL RAILWAY COMPANY, LIMITED; Rapides Lumber Company, Limited; The Long-Bell Lumber Company, Petitioners,

v.

THE UNITED STATES OF AMERICA; CHICAGO, ROCK ISLAND & Pacific Railway Company; Arkansas & Louisiana Railway Company, Respondents.

Answer of the Interstate Commerce Commission.

(Filed February 8, 1913.)

The Interstate Commerce Commission, intervening respondent in the above-entitled cause, now and at all times saving and reserving to itself all and all manner of benefit and advantage of exception to the many errors and insufficiencies in the petitioners' petition contained, for answer thereunto, or unto so much or such parts thereof as this respondent is advised is material for it to make answer unto, answering says:

I.

That there is a misjoinder of parties defendant, in that the
280*i* act of Congress creating said court expressly provides that suits of this character shall be brought against the United States.

That this court has no jurisdiction of the controversy, matters and things respectively set forth in said petition, nor does it possess general equity jurisdiction to grant the relief, or any part thereof, prayed for.

II.

This respondent admits that it made and entered the order set forth in said petition bearing date September 3, 1910, In the Matter of the Investigation and Suspension of Supplement No. 3 to I. C. C. No. 23; that it made and entered the order of January 16, 1912, set forth in said petition. It admits and alleges that after due and full hearing, as required by the statute, it made and filed in the proceeding known as Investigation and Suspension Docket No. 11, its original report, under date, April 23, 1912, which report is set forth in volume 23 of its printed reports (I. C. C. Rep.) beginning at page 277, and thereafter—May 14, 1912—it made and filed the supplemental report set forth in said petition and in said volume 23 (I. C. C. Rep.) beginning at page 549; that on the 14th day of May, 1912, it made and entered the order in said matter set forth in said petition.

This respondent admits the filing of the petition by L. M. Walter, attorney for petitioners, as set forth in said petition, and that there-

after, on October 30, 1912, this respondent, at the request of said petitioners, made and entered the amended order set forth in
280*j* said petition. This respondent admits that it made the decision and report referred to in said petition and reported in its published reports, volume 17 (I. C. C. Rep.), beginning at page 338; and this respondent admits that the trunk lines, so called in said petition, withdrew their tariffs and filed new tariffs at the times, and substantially in form as stated in said petition.

III.

This respondent neither admits nor denies the particular matters and things set forth in said petition regarding the organization of the several petitioning companies, and the several stockholdings set forth in said petition, nor has it any knowledge regarding the business and the amount thereof of the several petitioners or of either of them, excepting as the facts relevant and pertinent to the issue were proved in the said proceedings and matters before this respondent, in which matters the said reports and orders of this respondent were entered; and this respondent avers that the facts presented to and the conclusions reached thereon by this respondent in said investigation (I. and S. D. No. 11), regarding the said allegations contained in the petition herein, are set forth in the original report thereof, appearing in volume 23 of this respondent's published reports (I. C. C. Rep.), beginning at page 277, and in the supplemental report in said investigation reported in said volume 23, beginning at page 549, and in the several orders entered thereon; and this respondent makes said original and supplemental reports and
280*k* each of them, and the orders entered thereon, a part of this answer for and as its statement of the facts in this controversy; and respondent begs leave to make the same use of said published reports in its defense herein as it could make if the original and supplemental reports and said orders respectively were each set forth in full in this answer.

IV.

This respondent denies each and every allegation in said petition which in effect or by inference alleges that this respondent in the matters aforesaid erroneously determined or decided any questions of law, or that it acted in any respect arbitrarily, or that this respondent in making said orders, or either of them, herein complained of, acted without substantial evidence produced at said hearing to support the same, or that in the making and enforcement of said orders, herein complained of, or either of them, the petitioners, or either of them, have suffered or will suffer any violation or infraction of their constitutional rights or privileges.

This respondent denies each and every allegation in said petition not herein expressly admitted, or which is contrary to the or any facts stated in this answer or in respondent's said original or supplemental reports or orders.

All of which matters and things this respondent is ready to aver,

maintain, and prove as this honorable court shall direct, and prays the same advantage as to each and all the matters and things aforesaid as this respondent would be entitled to if the same were
280*l* specially pleaded, or set forth by way of demurrer, or motion to dismiss the petition.

And having fully answered said petition, this respondent prays to be hence dismissed with its reasonable costs and charges in its behalf sustained.

INTERSTATE COMMERCE COMMISSION,
By CHARLES W. NEEDHAM, *Its Solicitor.*

CITY OF WASHINGTON,
District of Columbia, ss:

James S. Harlan, being duly sworn, deposes and says that he is a member of the Interstate Commerce Commission, the above-entitled respondent, and makes this affidavit on behalf of said commission; that he has read the foregoing answer and knows the contents thereof, and that the same is true as to the matters within the knowledge of the commission, and as to the other matters he believes it to be true.

JAMES S. HARLAN.

Subscribed and sworn to before me, George B. McGinty, a notary public within and for the District of Columbia, this 8th day of February, 1913.

[SEAL.] GEORGE B. McGINTY,
Notary Public.

280*m* In the United States Commerce Court.

No. 91.

WOODWORTH & LOUISIANA CENTRAL RAILWAY COMPANY, LIMITED; Rapides Lumber Company, Limited; The Long-Bell Lumber Company, Petitioners,

vs.

THE UNITED STATES OF AMERICA et al., Respondents.

Answer of the Chicago, Rock Island & Pacific Railway Company, Respondent, to the Petition of the Above-named Petitioners.

(Filed February 7, 1913.)

I.

It admits the incorporation of the Woodworth & Louisiana Central Railway Company, one of the petitioners herein, and is informed and believes that said company is incorporated under the laws of the State of Louisiana providing for the formation of common carrier corporations; and also admits the correctness of the extracts in Paragraph 1 of the petition herein from the Constitution and Laws of the

State of Louisiana. It admits, upon information and belief, the correctness of the statements in Paragraph 1 of the petition in reference to the location and mileage of the lines of railway operated by the petitioner railway company, and the connections between
280*n* said railway and other lines of railroad. For lack of sufficient information, it neither admits nor denies the statements in Paragraph 1 of the petition as to compliance with the rules and regulations promulgated by public authorities or as to the carriage of a full line of class and commodity rates between points on its own line in Louisiana or from and to all interstate territory via all connecting lines, but admits that it concurs in joint through rates on some commodities between points on its line and points on the line of said respondent.

II.

It admits, upon information and beleief, the correctness of the statements contained in Paragraph 2 of the petition.

III.

It admits, upon information and belief, the correctness of the statements contained in Paragraph 3 of the petition.

IV.

It admits that it is a consolidated corporation organized under the laws of the States of Illinois and Iowa, and that it operates lines of railway in various states of the United States.

V.

Answering Paragraph 5 of the petition, this respondent says that the Rock Island, Arkansas & Louisiana Railroad Company is a railway corporation organized under the laws of the States of
280*o* Arkansas and Louisiana, and that the lines of said railway are leased by it to this respondent for a period of years, under and by virtue of which lease said lines in Arkansas and Louisiana are operated by this respondent.

VI.

It admits the averments set forth in Paragraph 6 of the petition.

VII.

Answering Paragraph 7 of the petition, it admits and avers that by reason of the Report or Opinion mentioned in Paragraph 6 of the petition and by reason of the belief, induced by said report or opinion and the respondent's understanding of the views of the Interstate Commerce Commission with respect to the subject-matter thereof, that otherwise its officers and agents would be subjected to criminal prosecution as for alleged rebates or for unlawful discriminations, this respondent, about August 1, 1910, filed new tariffs on lumber

with said Commission, in the form of supplemental tariffs, to become effective in thirty days, which new tariffs canceled all joint rates or tariffs on lumber which respondent had theretofore maintained with the petitioner railway company.

VIII.

Answering Paragraph 8 of the petition, it admits that on the third day of September, A. D. 1910, the Interstate Commerce Com-
280*p* mission issued an order, in words and figures as set forth in the petition, by which order the said Commission suspended for a period of one hundred and twenty days the operation of the tariffs filed by this respondent with said Commission canceling joint rates on lumber with the petitioner railway company. Respondent admits that the said Commission from time to time by appropriate orders further suspended the cancellation of said joint rates until the thirtieth day of April, A. D. 1912.

IX.

Respondent admits that pursuant to its order of September 3, 1910, the Interstate Commerce Commission entered upon a hearing as to the propriety of the schedules or tariffs filed by respondent canceling joint rates on lumber with the petitioner railway company. It neither admits nor denies the additional averments contained in Paragraph 9 of said petition, but leaves petitioners to make proof thereof.

X.

It admits that following said hearing the Interstate Commerce Commission rendered its Report and Opinion, No. 1853, entitled "Investigation and Suspension Docket No. 11, The Tap-Line Case," by which it approved the cancellation of joint rates on lumber between respondent and the petitioner railway company and other railway companies, and under which it permitted the cancella-
280*q* tion of said joint rates to become effective on May 1, 1912. Further answering, it admits that said Commission, under Investigation and Suspension Docket No. 11, issued a supplemental Report and Order in which it found that the service performed by the petitioner railway company and other named railway companies "for the respective proprietary lumber companies in moving the logs from their respective forests to their respective mills and in moving the product from the mills to the trunk lines is not a service of transportation by a common carrier railroad, and that any allowances or divisions out of the rate on account thereof are unlawful." Respondent neither admits nor denies the additional averments contained in Paragraph 10 of the petition, but leaves petitioners to make proof thereof.

XI.

Answering Paragraph 11 of the petition, it admits the general correctness of the statements set forth in Paragraph 11 of the petition

respecting the petition filed by the petitioners in this court on June 21, 1912, the dismissal thereof, and the subsequent application to the Interstate Commerce Commission. It admits that on the thirtieth day of October, 1912, the said Commission entered of record an Amended Order in Investigation and Suspension Docket No. 11, The Tap-Line Case, requiring this respondent to cease and desist, and for a period of two years thereafter, or until otherwise
280*r* ordered, to abstain, from making any allowances out of joint rates on lumber to the petitioner railway company and other railway companies, the said order being based on a finding by the Interstate Commerce Commission "that the tracks and equipment with respect to the industry of the several proprietary companies are plant facilities, and that the service performed therewith for the respective proprietary companies in moving logs to their respective mills, and performed therewith in moving the products of the mills to the trunk lines, is not a service of transportation by a common carrier railroad, but is a plant service by a plant facility; and that any allowances or divisions out of the rate on account thereof are unlawful and result in unreasonable and unlawful preferences and unjust discriminations." Respondent neither admits nor denies any of the additional averments contained in Paragraph 11 of the petition, but leaves petitioners to make proof thereof.

XII.

It admits, upon information and belief, the correctness of the statements contained in Paragraph 12 of the petition with respect to the tariffs on lumber to which the petitioner railway company was a party until April 30, 1912; but it reserves leave to refer, if need be, to said tariffs on file with the Interstate Commerce Commission. It denies that the rates therein named were reasonable through rates, and avers that said rates were unduly low.

280*s*

XIII.

It has no knowledge or information sufficient to form a belief as to the correctness of all of the averments of Paragraph 13 of the petition, and it therefore neither admits nor denies the averments in Paragraph 13, but leaves petitioners to make proof thereof, so far as the averments may be deemed material.

XIV.

Answering Paragraph 14 of the petition, it admits that there has prevailed for a number of years in the lumber-producing districts of the South what are known as "blanket rates;" that is, all lumber rates from all points on all lines in a given territory are the same to any points in any other given territory.

XV.

It admits the execution on August 1, A. D. 1906, of a contract between The Chicago, Rock Island & Pacific Railway Company, the

Rock Island, Arkansas & Louisiana Railroad Company, and the petitioners herein, which contract was in words and figures substantially as set forth in a copy thereof attached to the petition and marked "Exhibit A."

280*f*

XVI.

It has no knowledge or sufficient information upon which to form a belief as to the truth of the averments of Paragraph 16 of the petition with respect to any contract or contracts between the petitioner railway company and the Rapides Lumber Company, or as to the investment alleged to have been made by the Rapides Lumber Company in mills and timber.

XVII.

It admits that it canceled joint through rates on lumber with the petitioner railway company under and by virtue of the canceling tariffs hereinbefore referred to, and that such cancellation was made by reason of the several reports, decisions and orders of the Interstate Commerce Commission hereinabove referred to, and by reason of the belief, induced by said reports, decisions and orders, that otherwise its officers and agents would be subjected to criminal prosecution as for alleged rebates or for unlawful discriminations. As to the legal effect of the various orders and requirements of the said Commission, set forth in Paragraph 17 of the petition herein, respondent refers to said orders and requirements as specifically set out in the petition.

It says that the other matters and things in said Paragraph 17, being charges against the correctness of the Report of the said Commission and its power and authority, concern its co-defend-
280*a* ant, The United States, and this respondent asks to be allowed to leave the defense thereof to said co-defendant.

XVIII.

Answering the remaining paragraphs of said petition, this respondent says that, the Interstate Commerce Commission having declared that the division of rates between it and the petitioner railway company was in violation of law, it was obliged to act as it did and cancel the same.

XIX.

It denies all the other matters and things in said petition contained, not hereinabove admitted.

Wherefore, this respondent, The Chicago, Rock Island & Pacific Railway Company, prays the Court to be hence dismissed with its costs, and for such other and general relief in the premises as to this Court may seem meet.

W. F. DICKINSON,
Solicitor for The Chicago, Rock Island & Pacific Railway Company.

280*v* *Petition of A., T. & S. F. Ry. Co. et al., for Leave to Intervene.*

(Filed February 10, 1913.)

In the United States Commerce Court.

No. 91.

WOODWORTH & LOUISIANA CENTRAL RAILWAY COMPANY, LIMITED, et al., Petitioners,
v.
THE UNITED STATES OF AMERICA et al., Respondents.

Petition for Leave to Intervene.

Come now The Atchison, Topeka & Santa Fe Railway Company and the Gulf, Colorado & Santa Fe Railway Company, and say that they were parties to the original proceeding before the Interstate Commerce Commission, out of which the above entitled litigation springs, and that they are interested directly and financially in any disposition of this cause, and therefore they ask an order allowing them to intervene and to be heard in all proceedings in said cause, and to have the benefit of all orders and decrees that may be entered herein.

Your intervening petitioners further state that they are common carriers by railroad with rails extending from extensive lumber producing territory to various markets; that the milling industries located upon the railroads of intervening petitioners are competitors with the milling industries located upon the line of petitioners; that the through rates applying for the carriage of lumber from the industries located upon the lines of intervening petitioners and the
280*w* milling industries located upon the lines of petitioners are known as the blanket system of rates.

Your intervening petitioners further state that they make no allowance or division of through rates to tap lines or to milling industries on the lines of intervening petitioners, and as a result the milling industries located upon the lines of intervening petitioners are required to pay in full the lawfully published tariff rate on lumber. Your intervening petitioners further state that the allowance to said petitioners of a division of the through rate will give said petitioners an undue advantage over the milling industries located upon the lines of intervening petitioners, and will constitute an unjust discrimination against such milling industries located upon the lines of intervening petitioners, and will be in violation of the Interstate Commerce law.

Your intervening petitioners further state that any allowance by the respondents herein will not be in truth an allowance to a railroad for the service of transportation of lumber, but on the contrary will be an allowance to the milling industry for an operation incident to

the manufacture of lumber, and will constitute a device for the payment of a rebate to a shipper, in violation of the Interstate Commerce Law.

THE ATCHISON, TOPEKA AND SANTA FE RAILWAY COMPANY,
GULF, COLORADO AND SANTA FE RAILWAY COMPANY,

WOODWORTH & LOUISIANA CENTRAL RAILWAY COMPANY et al.
v.
UNITED STATES OF AMERICA et al.

Order of Intervention.

(Entered February 10, 1913.)

The Atchison, Topeka & Santa Fe Railway Company, and Gulf, Colorado and Santa Fe Railway Company, having filed and presented their petition for intervention herein and it appearing to the Court from the said petition that the petitioners have shown that they have sufficient interest in the proceedings herein to entitle them to intervene and be heard by their counsel:

It is ordered, that the Atchison, Topeka & Santa Fe Railway Company and Gulf, Colorado and Santa Fe Railway Company be and they are hereby allowed to intervene and become parties intervener and to be heard by their counsel in all the proceedings had and taken in the above entitled cause, the Court reserving the right at all times hereafter to enter such other and further order or orders concerning the right of the said interveners to appear and be heard herein, and to enter such rule or rules concerning the pleadings of the said interveners and their course of procedure, as to the court shall seem wise and proper.

By the Court:

MARTIN A. KNAPP,
Presiding Judge.

280y *Petition of Intervention of Railroad Commission of Louisiana.*

(Filed February 10, 1913.)

In the United States Commerce Court.

No. 91.

WOODWORTH & LOUISIANA CENTRAL RAILROAD COMPANY et al., Petitioners,
vs.
THE INTERSTATE COMMERCE COMMISSION et al., Respondents.

Motion on Behalf of the Railroad Commission of Louisiana for Permission to Intervene as Party Petitioner and to be Represented by Counsel and to File Brief in the Above-entitled Suit.

Comes now the Railroad Commission of Louisiana, through its undersigned counsel, and moves this Honorable Court for an
280z order granting permission to it to enter appearance, to be made party interventor, as petitioner, to be represented by counsel, and to file brief in the above-entitled suit, and as grounds for such motion, shows that it, through its then constituent members, J. J. Meredith, Shelby Taylor, and Henry B. Schreiber, was an interventor In the Matter of the Tap Line Allowances and Divisions, being Docket Numbers 3400, Sub. 6; 3400, Sub. 7, 3493, 3411, 3412, 3513, 3514, 3524, 3551, 3552 and 3564, consolidated under Investigation and Suspension Docket No. 11, and known as the "Tap Line Case," before the Interstate Commerce Commission, in which case the said Interstate Commerce Commission made the orders attacked in the above-entitled cause, and that it is interested in having the orders of the said Interstate Commerce Commission, insofar as they refer to petitioner, a common carrier, duly incorporated and operating under the laws of the State of Louisiana, annulled and set aside.

THE RAILROAD COMMISSION OF LOUISIANA,
SHELBY TAYLOR, *Chairman;*
HENRY B. SCHREIBER,
B. A. BRIDGES,
Commissioners,
By RUFFIN G. PLEASANT,
Attorney General State of Louisiana;
WYLIE M. BARROW,
Assistant Attorney General,
Solicitors for the Railroad Commission of Louisiana, Intervening Petitioner.

280aa In the United States Commerce Court.

Docket No. 91.

WOODWORTH & LOUISIANA CENTRAL RAILWAY COMPANY, LIMITED, et al., Petitioner; The Railroad Commission of Louisiana, Intervener,

vs.

THE UNITED STATES OF AMERICA et al., Respondent.

To the Honorable the Judges of the United States Commerce Court:

The Railroad Commission of Louisiana, composed of Shelby Taylor, Chairman; Henry B. Schreiber and B. A. Bridges, Commissioners, a political corporation created, organized and existing under and by virtue of the laws of the State of Louisiana, having its domicile in the city of Baton Rouge, Parish of East Baton Rouge, State of Louisiana, for the reasons hereinafter set forth,
280bb asks leave to intervene and be made a party to this cause, in behalf of plaintiff.

I.

Because the Woodworth & Louisiana Central Railway Company, Limited, is a railroad corporation duly and legally chartered, incorporated and existing under the laws of the State of Louisiana, and is under the laws of the State of Louisiana, a common carrier of freight and passengers, subject, as to its freight and passenger tariffs and service between and at points in the State of Louisiana, to regulation and control by the Railroad Commission of Louisiana. That the said Woodworth & Louisiana Central Railway Company, Limited, petitioner, is operating a railroad in Louisiana, in accordance with the laws of the State of Louisiana, and is subject to the rules and regulations governing railroads adopted by the Railroad Commission of Louisiana. That said petitioner, the Woodworth & Louisiana Central Railway Company, Limited, accepts and transports shipments at and between points on its said line of railroad in Louisiana, and has filed with the Railroad Commission of Louisiana, tariffs containing class and commodity rates, which have been approved by the Railroad Commission of Louisiana to apply on shipments so transported. That it has been engaged in the business of a common carrier since the Railroad Commission of Louisiana was organized in 1898, and for some time previous thereto.

280cc II.

That there are numerous shippers living along the line of the railroad of the Woodworth & Louisiana Central Railway Company, who ship and receive interstate and intrastate freight over the said railroad, and who are interested in securing fair and reasonable rates and adequate service, for the transportation of all classes and kinds

of freight, including lumber, over the Woodworth & Louisiana Central Railway Company.

III.

That Act No. 195 of the Legislature of 1906 of the State of Louisiana provides:

"That power and authority is hereby vested in the Railroad Commission of Louisiana, and it is hereby made its duty, to appear, through any of its commissioners, or its secretary, or by a duly authorized attorney, before the Interstate Commerce Commission at Washington, D. C., or at any other place where the said Interstate Commerce Commission might be holding a session, whenever, in the judgment of the said Railroad Commission of Louisiana, the interests of shippers or consignees in the State of Louisiana may require it."

That acting under and by virtue of Act No. 195 of the
280*dd* General Assembly of the State of Louisiana of 1906, the Railroad Commission on January 31, 1913, adopted the following resolution:

"Whereas, The Commission has learned that various suits have been filed in the Commerce Court at Washington, D. C., by the so-called 'tap lines' operating in the State of Louisiana; and

"Whereas, The following so-called 'tap lines,'

Mansfield Railway & Transportation Company,
Woodworth & Louisiana Central Railway Company, Limited,
Victoria, Fisher & Western Railroad Company, and
Louisiana & Pacific Railway Company

are among those 'tap lines' which have filed such suits, and which railways are duly chartered under the laws of the State of Louisiana as common carriers, and which, in fact, operating as common carriers in the said State, are under the supervision and control of the Railroad Commission of Louisiana; and,

"Whereas, The said suits in the Commerce Court have been filed for the purpose of contesting the orders of the Interstate Commerce Commission, declaring that, in substance, such 'tap lines' are not common carriers as to the logs and lumber which they transport for their proprietary lumber companies; and,

280*ee* "Whereas, This Commission is of the opinion that this decision of the Interstate Commerce Commission is an unconstitutional interference with the rights of the said railway Companies to receive revenue out of joint through rates of the transportation of lumber and logs over their lines in Louisiana destined to interstate points; and,

"Whereas, It is *of* the opinion of this Commission that the decision of the Interstate Commerce Commission in the 'tap line case' is detrimental to the interests of the shippers of the State of Louisiana, and deprives the shippers, served by said railway companies, of the right to ship logs and lumber over said railways at reasonable joint through rates, and deprives the said railway companies from receiving a reasonable division out of joint through rates, which

division of rates is the principal source of revenue of such carriers; and,

"Whereas, If the said companies are not permitted to receive divisions of joint through rates on lumber and logs, they will be deprived of revenues for transporting the said logs and lumber, thereby rendering it impossible to meet the operating expenses and fixed charges, and consequently preventing any extension, or hope of extension, or improvement, or hope of improvement of such railways:

"Therefore, be it resolved, That the Railroad Commission of Louisiana, in behalf of the shippers of the State of Louisiana, hereby authorizes and instructs its attorney, the Assistant Attorney-General of Louisiana, to intervene in the Commerce Court in the cases filed by the railway companies, hereinabove named, in support of their petitions, and to aid and assist, in every way possible, in having the Court recognize the said railway companies as common carriers of interstate shipments of logs and lumber, as they are recognized to be common carriers of all other class- and kind- of shipments."

280*ff*

IV.

That, pursuant to the various appropriate orders made by the Interstate Commerce Commission, in the case of Star Grain & Lumber Company, et al., vs. Atchison, Topeka & Santa Fe Railway Company, et al., Docket No. 1319, as set forth and referred to in Paragraphs III, IV, V, VI, VII, VIII and IX of the petition filed in this cause, the Railroad Commission of Louisiana, believing the shippers and general public living along the line of railroad of the Woodworth & Louisiana Central Railway Company were interested in the proceeding instituted by the Interstate Commerce Commission, entitled:

"Investigation and Suspension Docket No. 11. In the Matter of the Investigation and Suspension of Schedules Canceling Through Rates with Certain Tap Line Connections."

On or about the 9th day of December, 1910, filed a petition of intervention on behalf of the shippers of the State of Louisiana, and were operating their railroads as common carriers under and by virtue of their charters, one of which railroads was that owned and operated by the Woodworth & Louisiana Central Railway Company. That the said Railroad Commission of Louisiana thereafter filed a brief and took part in the oral argument before the Interstate Commerce Commission, in support of the rights of the shippers who ship and receive freight over the lines of railroad owned and operated by the common carriers who, for the purposes of the proceedings before the Interstate Commerce Commission were, and have since been, designated as 'tap lines.' That one of the said common carriers in which the Railroad Commission was and is interested as a vehicle and means of intrastate and interstate transportation for the use of the public in the State of Louisiana, is the Woodworth & Louisiana Central Railway Company, plaintiff in this cause.

280*gg*

V.

Your petitioner further states that the Woodworth & Louisiana Central Railway Company is an important railroad, performing a valuable service in the development of the section of the State of Louisiana through which its railroad runs; that the people living along such railroad are dependent upon it for the transportation of their products and their merchandise to and from the towns, cities and markets of the country. That they are entitled to ship
280*hh* at fair and reasonable local and joint through interstate, as well as intrastate, rates; that an important commodity shipped over the said railroad is lumber, and that, while the said railroad is required by the laws of the State of Louisiana and the rulings of the Railroad Commission of Louisiana, to establish reasonable local rates and joint through rates in connection with the trunk lines with which it connects on Louisiana intrastate shipments, and is permitted by the Interstate Commerce Commission to establish joint through rates, and receive divisions therefrom, to and from interstate points on all classes and commodities, except lumber, on shipments of lumber the said Woodworth & Louisiana Central Railway Company is not permitted to receive a division out of joint through interstate rates.

VI.

That in declaring an allowance out of joint through rates on lumber to be unlawful, the Interstate Commerce Commission has deprived the said Woodworth & Louisiana Central Lumber Company of an important source of revenue, which it earns by performing a transportation service, and to which it is entitled as a common carrier, the only restrictions upon such allowance being that it must be reasonable, and in thus denying an allowance out of through interstate rates on lumber to the Woodworth & Louisiana Central Railway Company, and depriving it of this important
280*ii* source of revenue, an undue burden and unnecessary hardship, and an unjust discrimination has been enacted and placed upon shippers of other commodities than lumber who use plaintiff's railroad, thus depriving the State of Louisiana of the natural development and increase in property values which follow the extension and improvement of railroad properties, where the legitimate revenues from the operation of such properties lead to their betterment.

Your petitioner further avers that by depriving the Woodworth & Louisiana Central Railway Company of a division of the earnings from interstate shipments of lumber, made in connection with the trunk lines, with which it connects, the Interstate Commerce Commission has thrown upon the smaller tonnage of general commodities, other than lumber, the entire burden of producing a sufficient revenue to pay all the fixed and operating expenses of the Woodworth & Louisiana Central Railway Company, and, as a result of such a burden, your petitioner fears that the Woodworth & Louisiana Central Railway Company's revenues will so diminish as to cause it to become bankrupt, and thereby seek, through proper legal means, to dissolve its charter, cease its operations, and go out of busines

as a common carrier, leaving many of the citizens of Louisiana, who are served by said Railway Company totally without means of transportation. That such a result will deprive the citizens of Louisiana of their rights to be served by common carriers,
280*jj* properly organized under its laws, under the same conditions and circumstances as are accorded to the trunk lines.

VII.

And petitioner further avers that should the Woodworth & Louisiana Central Railway Company be deprived of its right to receive a fair division of reasonable joint through interstate rates for the transportation of lumber, it will cause an unjust discrimination, is arbitrary, unreasonable, and unjust.

VIII.

Your petitioner further avers that the Woodworth & Louisiana Railway Company is a common carrier by virtue of its charter, that it holds itself out as such, constantly acts in that capacity, and has been so treated by those who it has served, by the great railroad systems with which it connects, by the State Board of Appraisers of the State of Louisiana, by the Railroad Commission of Louisiana, and, except as to the transportation of logs and lumber, in all other respects, by the Interstate Commerce Commission. That as a common carrier, exercising the right of eminent domain, it has received exemption from taxation under the constitutional provisions, amendments thereof of 1898, of the State of Louisiana, having extended its lines during the period when such exemption from taxation ran.

280*kk*

IX.

Petitioner further avers that the Woodworth & Louisiana Central Railway Company actually performs a part of the transportation of every shipment of lumber originating on its line, going to interstate destinations, and accepts all shipments tendered it for such transportation.

X.

Your petitioner further avers that it is and has been the policy of the State of Louisiana to aid and encourage the development of its resources, the investment of capital in manufacturing industries, and to assist, whenever it can consistently do so, the producers of Louisiana, to secure and maintain equitable and fair rates, rules and regulations affecting the transportation of persons and property between points in the State of Louisiana, and points in other States. That the Railroad Commission of Louisiana, as the authorized representative of the shippers of the State of Louisiana, is vitally interested in the outcome of this suit, in that it involves property rights, industrial enterprises and transportation problems, which affect the commerce of its citizens.

Wherefore, petitioner, the Railroad Commission of Louisiana, prays leave to file this intervention, and that it be made a party to this proceeding, and that the orders of the Interstate Com-
280½ merce Commission, dated May 14, 1912, and October 31, 1912, be enjoined, set aside and annulled, all as is prayed for in the prayer of the original petition filed herein.

And your petitioner prays for all other and further relief as in equity and good conscience they may be entitled to receive.

THE RAILROAD COMMISSION OF LOUISIANA,
By W. M. BARROW,
Assistant Attorney-General of the State of Louisiana.

STATE OF LOUISIANA,
Parish of ——:

Shelby Taylor, being duly sworn on his oath, states that he is Chairman of the Railroad Commission of Louisiana, the petitioner herein; that he has read the above and foregoing petition, and is familiar with the facts therein stated; and that the allegations and averments of facts made are, to the best of his knowledge, information and belief, true, and he believes them to be true.

SHELBY TAYLOR,
Chairman Railroad Commission of Louisiana.

Subscribed and sworn to before me, this 7th day of February, A. D. 1913.
[SEAL.]

R. H. FLOWER,
Assistant Secretary of State.

281 In the United States Commerce Court.

No. 91.

WOODWORTH & LOUISIANA CENTRAL RAILROAD COMPANY et al.
v.
THE UNITED STATES OF AMERICA et al.

Order of Intervention.

(Entered February 10, 1913.)

The railroad Commission of Louisiana having filed and presented its petition for intervention herein and it appearing to the Court from the said petition that the petitioner has shown that it has sufficient interest in the proceedings herein to entitle it to intervene and be heard by its counsel:

It is ordered, That the Railroad Commission of Louisiana be and it is hereby allowed to intervene and become a party intervener and to be heard by its counsel in all the proceedings had and taken in the above entitled cause, the Court reserving the right at all times

hereafter to enter such other and further order or orders concerning the right of the said intervener to appear and be heard herein, and to enter such rule or rules concerning the pleadings of the said intervener and its course of procedure, as to the court shall seem wise and proper.

By the Court:

MARTIN A. KNAPP,
Presiding Judge.

No. 91.

WOODWORTH & LOUISIANA CENTRAL RAILWAY COMPANY (LIMITED) et al., Petitioners,
v.
THE UNITED STATES OF AMERICA et al., Respondents.

The above case having been submitted for final hearing upon pleadings and proofs, and due consideration thereof having been had. It is ordered and adjudged that the motion made by the Interstate Commerce Commission to strike from the record all oral evidence taken in this Court be and the same is hereby granted.

It is further ordered and adjudged that the motion to dismiss for want of jurisdiction be and the same is hereby denied.

It is further ordered and adjudged that that portion of the amended Order of the Interstate Commerce Commission made October 30th, 1912, which is in the following language:

"That the tracks and equipment with respect to the industry of the several proprietary companies are plant facilities, and that the service performed therewith for the respective proprietary lumber companies in moving logs to their respective mills and performed therewith in moving the products of the mills to the trunk lines is not a service of transportation by a common carrier railroad, but is a plant service by a plant facility; and that any allowances or divisions out of the rate on account thereof are unlawful and result in undue and unreasonable preferences and unjust discriminations, as found in the said reports:

3. It is Ordered, That the principal defendants, the Chicago, Rock Island & Pacific Railway Company; St. Louis & San Francisco Railroad Company; New Orleans, Texas & Mexico Railroad Company; Beaumont, Sour Lake & Western Railway Company; St. Louis, Iron Mountain & Southern Railway Company; The Texas & Pacific Railway Company; International & Great Northern Railway Company; the Missouri, Kansas & Texas Railway Company of Texas; St. Louis Southwestern Railway Company; St. Louis Southwestern Railway Company of Texas; The Paragould Southeastern Railway Company; Eastern Texas Railroad Company; The Kansas City Southern Railway Company; Texarkana & Fort Smith Railway Company;

346 The Houston, East & West Texas Railway Company; Texas & New Orleans Railroad Company; Louisiana Western Railroad Company; Morgan's Louisiana & Texas Railroad & Steamship Company; Lake Charles & Northern Railroad Company; Vicksburg, Shreveport & Pacific Railway Company; Louisiana & Arkansas Rail-

way Company; Louisiana Railway & Navigation Company; Gulf, Colorado & Santa Fe Railway Company; The Texas & Gulf Railway Company; Missouri & North Arkansas Railroad Company; Illinois Central Railroad Company; Southern Railway Company; Northern Alabama Railway Company; New Orleans Great Northern Railroad Company, and Mobile & Ohio Railroad Company be, and they are hereby, notified and required to cease and desist, and for a period of two years hereafter, or until otherwise ordered, to abstain from making any such allowances to any of the above named parties to the record in respect of any such above described service,"

be and the same is hereby vacated and set aside as to the petitioners herein.

By the Court.

Summons and Severance.

(Filed November 29, 1913.)

To Chicago, Rock Island & Pacific Railway Company and Arkansas & Louisiana Railway Company:

You are hereby invited to join with the United States of America and the Interstate Commerce Commission in an appeal this day prosecuted from the final order or decree of the Commerce Court entered November 28, 1913, in the above-entitled cause, in which you are a party respondent, to the Supreme Court of the United States, to reverse the judgment rendered in the said cause. In the event of your failure to join, the United States of America and the Interstate Commerce Commission will prosecute said appeal without joining you as parties.

BLACKBURN ESTERLINE,
Special Assistant to the Attorney General for the United States.
CHAS. W. NEEDHAM,
Solicitor for Interstate Commerce Commission.

Service of a true copy of the foregoing notice is hereby acknowledged this 29th day of November A. D. 1913.

T. P. LITTLEPAGE,
Agent at Washington for Rock Island Lines and Rock Island, Arkansas & Louisiana Ry. Co.

UNITED STATES OF AMERICA, CHICAGO, ROCK ISLAND & PACIFIC Railway Company, and Arkansas & Louisiana Railway Company, Respondents; Interstate Commerce Commission, Atchison, Topeka & Santa Fe Railway Company, and Gulf, Colorado & Santa Fe Railway Company, Intervening Respondents.

Petition for Appeal.

(Filed November 29, 1913.)

The United States, respondent, and the Interstate Commerce Commission, intervenor, feeling themselves aggrieved by the final decree entered in the above-entitled cause on November 28, 1913, by their counsel, pray and appeal to the Supreme Court of the United States from the said final decree.

The particulars wherein the United States and the Interstate Commerce Commission consider said final decree erroneous are set forth in the assignment of errors herewith filed, to which reference is made.

And the United States, respondent, and the Interstate Commerce Commission, intervenor, further pray that a transcript of the record, proceedings, and papers on which the said final decree was made and entered, duly authenticated, may be transmitted
350 forthwith to the Supreme Court of the United States.

Washington, November 29, 1913.

351 In the United States Commerce Court, June Session, 1913.

No. 91.

WOODWORTH & LOUISIANA CENTRAL RAILWAY COMPANY et al., Petitioners,
v.
THE UNITED STATES OF AMERICA et al., Respondents.

Assignment of Errors.

(Filed November 29, 1913.)

Come now the United States of America, by its Attorney General, and the Interstate Commerce Commission, by its Solicitor, and in connection with their petition for appeal, file the following assignment of errors on which they will rely on said appeal to the Supreme Court of the United States from the final order or decree of the Commerce Court, entered against them on November 28, 1913, in the above-entitled cause.

The Commerce Court erred—

I.

In not granting the motion to dismiss for want of jurisdiction, and in holding and adjudging that the Commerce Court had jurisdiction to hear and determine the cause.

II.

In holding and adjudging that the order of the Interstate Commerce Commission sought to be annulled and enjoined is an affirmative order within the power of the Court of review, and in not holding and adjudging that the same is a negative order and beyond the power of the court to review.

352 III.

In not dismissing the petition for the (*a*) same does not set forth any cause of action, and is insufficient to warrant the relief granted, or to form the basis for any relief from the order of the commission; (*b*) nor have the said petitioners shown that there is any equity in the said petition upon which to grant the relief prayed, or to form the basis for any relief from the order of the commission; (*c*) nor have the petitioners show that in making its said order the Interstate Commerce Commission acted beyond or without its jurisdiction or exceeded any power or authority conferred upon it by the act to regulate commerce; (*d*) nor have the petitioners shown that in making its said order the Interstate Commerce Commission violated any right of the said petitioners protected by the Constitution of the United States, or any other right of the said petitioners over which this court may exercise jurisdiction.

IV.

In holding and adjudging that with relation to the freight of its proprietary lumber companies the Woodworth & Louisiana Central Railway Company is a common carrier by railroad engaged in commerce among the several states and subject to the act to regulate commerce, approved February 4, 1887, and the various acts amendatory thereof or supplementary thereto.

V.

In holding that the Commission "impliedly, if not expressly, held" that the petitioner was a common carrier, and therefore entitled to a division out of main line lumber rates for services which it performed for its proprietary lumber company.

353

VI.

In holding that a mere switching movement could be made a part of a through route instead of holding that the switching movement was an independent movement additional to the line haul.

VII.

In holding that the Commission was without power to inquire into and go behind the mere forms of organization and methods of doing business by the lumber company and the tap line, and ascertain the true facts regarding the relations between the two companies; and whether the tap line was used as a medium for securing rebates on the lumber company's traffic.

VIII.

In holding that the Commission, after finding that the tap line was a medium for the payment of rebates on the lumber company's traffic, could not order the main-line carriers to desist from making such payments.

IX.

In not holding and adjudging that the organization of the Woodworth & Louisiana Central Railway Company and the transfer to it by the lumber companies of the railway tracks and equipment was the creation of a device for the purpose of attempting to shift the old open and illegal rebating transactions between the lumber companies, as shippers, and the trunk lines, as carriers, to private transactions between the Woodworth & Louisiana Central Railway Company and the trunk lines, in order to evade the provisions of the act to regulate commerce, and, simultaneously, to maintain the advantages of the parties.

X.

354 In not holding and adjudging that the lumber companies are making the transportation of their enormous traffic a matter of bargain and sale, and with the power wielded in

controlling the routing to compel the trunk lines to make allowances to the Woodworth & Louisiana Central Railway Company, resulting in undue and illegal preferences and discriminations forbidden by the act to regulate commerce in favor of the lumber companies and against other shippers.

XI.

In not holding and adjudging upon the facts found by the commission that the transportation of the products of the proprietary companies by the petitioner is not transportation by a common carrier.

XII.

In not holding and adjudging that the conclusions and orders of the commission are founded upon substantial evidence and are not arbitrary, and in holding and adjudging that certain parts of the order of the commission are arbitrary, null, and void, as to the petitioners.

XIII.

In vacating and setting aside as to the petitioners the portions of the amended order of the Interstate Commerce Commission made October 30, 1912 which declared the tracks and equipment of the petitioners to be plant facilities, and the service rendered thereon to be a plant service, and directing the trunk line carriers to cease and desist from making any allowances to the petitioners in respect to any such plant service.

XIV.

In holding and adjudging that a common carrier may,
355 as to certain shippers, and particularly as to a proprietary company, be a mere plant facility and perform merely plant or industrial services as distinguished from transportation services, and at the same time holding and adjudging that the actual service rendered by the tap-line from the time it takes the logs until it delivers the finished product to the trunk line is the same for proprietary and non-proprietary mills, and as this is held by the Interstate Commerce Commission to be a transportation service by an interstate common carrier as to the latter, it must be held to be a similar service as to the former.

XV.

In disposing of the four separate and distinct cases in a single blanket opinion of general observations, without regard to the peculiar facts of each particular case, after holding that the orders of the commission are separate and distinct as to each of the tap-lines, and are expressly based upon a careful investigation of and separate findings in relation to each of the companies.

XVI.

In granting the relief prayed by the petitioners, or a substantial part thereof.

Wherefore the United States and the Interstate Commerce Commission pray that the said final decree of the Commerce Court, entered November 28, 1913, be reversed, annulled and set aside, and for such order and further order as may be appropriate.

J. C. McREYNOLDS,
Attorney General of the United States.
CHAS. W. NEEDHAM,
Solicitor for the Interstate Commerce Commission.

Order Allowing Appeal.

(Entered November 29, 1913.)

In the above-entitled cause, the United States and the Interstate Commerce Commission, having made and filed their petition praying an appeal to the Supreme Court of the United States from the final decree of the Commerce Court entered November 28, 1913, and having at the same time made and filed an assignment of errors, and having in all respects conformed to law and the rules of court—

It is ordered and decreed that the said appeal be and the same is hereby, allowed, as prayed, and made returnable thirty days from the date hereof. And the clerk is directed to transmit forthwith a properly authenticated transcript of the records, papers, and proceedings to the Supreme Court of the United States.

WOODWORTH & LOUISIANA CENTRAL RAILWAY COMPANY, LIMITED, et al., Petitioners,
v.
UNITED STATES OF AMERICA et al., Respondents.

Assignment of Errors.

(Filed November 29, 1913.)

Comes now The Atchison, Topeka & Santa Fe Railway Company and the Gulf, Colorado & Santa Fe Railway Company, and in connection with their petition for appeal, file the following assignments of errors on which they will rely on said appeal to the Supreme Court of the United States from the final order or decree of the Commerce Court, entered against them on November 28, 1913, in the above entitled cause.

The Commerce Court erred—

I.

In not granting the motion to dismiss for want of jurisdiction, and in holding and adjudging that the Commerce Court had jurisdiction to hear and determine the cause.

II.

In holding and adjudging that the order of the Interstate Commerce Commission sought to be annulled and enjoined is an affirmative order within the power of the Court to review, and in not holding and adjudging that the same is a negative order and beyond the power of the court to review.

III.

In not dismissing the petition for the reason that (*a*) the
360 same does not set forth any cause of action, and is insufficient to warrant the relief granted, or to form the basis for any relief from the order of the Commission; (*b*) nor have the said petitioners shown that there is any equity in the said petition upon which to grant the relief prayed, or to form the basis for any relief from the order of the Commission; (*c*) nor have the petitioners shown that in making its said order the Interstate Commerce Commission acted beyond or without its jurisdiction or exceeded any power or authority conferred upon it by the act to regulate commerce; (*d*) nor have the petitioners shown that in making its order the Interstate Commerce Commission violated any right of the said petitioners protected by the Constitution of the United States, or any other right of the said petitioners over which this court may exercise jurisdiction.

IV.

In holding and adjudging with relation to the freight of its proprietary lumber companies, that the Woodworth & Louisiana Central Ry. Co., Ltd., is a common carrier by railroad engaged in commerce among the several states and subject to the act to regulate commerce, approved February 4, 1887, and the various acts amendatory thereof or supplementary thereto.

V.

In holding that the Commission "impliedly, if not expressly, held" that the petitioner was a common carrier, and therefore entitled to a division out of main line lumber rates for services which it performed for its proprietary lumber company.

VI.

In holding that a mere switching movement could be made a part of a through route instead of holding that the switching movement was an independent movement additional to the line
361 haul.

VII.

In holding that the Commission was without power to inquire into and go behind the mere forms of organization and methods of doing business by the lumber company and the tap line, and ascertain the true facts regarding the relations between the two companies, and whether the tap line was used as a medium for securing rebates on the lumber company's traffic.

VIII.

In holding that the Commission after finding that the tap line was a medium for the payment of rebates on the lumber company's traffic, could not order the main line carriers to desist from making such payments.

IX.

In not holding and adjudging that the organization of the Woodworth & Louisiana Central Railway Company, Ltd., and the transfer to it by the lumber companies of the railway tracks and equipment was the creation of a device for the purpose of attempting to shift the old open and illegal rebating transactions between the lumber companies, as shippers, and the trunk lines, as carriers, to private transactions between the Woodworth & Louisiana Central Railway Company, Ltd., and the trunk lines, in order to evade the provisions of the act to regulate commerce, and, simultaneously, to maintain the advantages of the parties.

X.

In not holding and adjudging that the lumber companies are making the transportation of their enormous traffic a matter of bargain and sale, and with the power wielded in controlling the routing, are forcing the trunk lines to make allowances to the Woodworth &

Louisiana Central Railway Company, Ltd., resulting in un-
362 due and illegal preferences and discriminations forbidden by the act to regulate commerce in favor of the lumber companies and against other shippers.

XI.

In not holding and adjudging upon the facts found by the Commission that the transportation of the products of the proprietary companies by the petitioner is not transportation by a common carrier.

XII.

In not holding and adjudging that the conclusions and orders of the Commission are founded upon substantial evidence and not arbitrary, and in holding and adjudging that certain parts of the order of the Commission are arbitrary, null, and void, as to the petitioners.

XIII.

In vacating and setting aside as to the petitioners the portions of the amended order of the Interstate Commerce Commission, made October 30, 1912, which declared the tracks and equipment of the petitioners to be plant facilities, and the service rendered thereon to be a plant service, and directing the trunk line carriers to cease and desist from making any allowances to the petitioners in respect to any such plant service.

XIV.

In holding and adjudging that a common carrier may, as to certain shippers, and particularly as to a proprietary company, be a mere plant facility and perform merely plant or industrial services as distinguished from transportation services, and at the same time holding and adjudging that the actual service rendered by the tap line from the time it takes the logs until it delivers the finished product to the trunk line is the same for proprietary and non-proprietary mills, and as this is held by the Interstate Commerce
363 Commission to be a transportation service by an interstate common carrier as to the latter, it must be held to be a similar service as to the former.

XV.

In disposing of the four separate and distinct cases in a single blanket opinion, without regard to the peculiar facts of each particular case, after holding that the orders of the Commission are separate and distinct as to each of the tap lines, and are expressly based upon a careful investigation of and separate findings in relation to each of the companies.

XVI.

In granting the relief prayed by the petitioners, or a substantial part thereof.

Wherefore, The Atchison, Topeka & Santa Fe Railway Company and the Gulf, Colorado & Santa Fe Railway Company pray that the said final decree of the Commerce Court, entered November 28, 1911, be reversed annulled and set aside, and for such other and further order as may be appropriate.

Bond on Appeal.

(Filed December 5, 1913.)

Know all men by these presents, That we, The Atchison, Topeka & Santa Fe Railway Company, and the Gulf, Colorado & Santa Fe Railway Company, as principals, and the National Surety Company, a corporation of the State of New York, as surety, are held and firmly bound unto the Woodworth & Louisiana Central Railway Company, Limited, Rapides Lumber Company, Limited, and the Long-Bell Lumber Company, in the sum of Five Hundred Dollars ($500.00), to be paid to the Woodworth & Louisiana Central Railway Company, Limited, Rapides Lumber Company, Limited, and the Long-Bell Lumber Company. We bind ourselves and each of our successors and assigns jointly and severally by these presents.

Sealed with our seals this fifth day of December, A. D. nineteen hundred and thirteen.

Whereas, heretofore, to wit, on the 28th day of November, 1913, in a suit pending in the United States Commerce Court, and
365 numbered 91 on the docket of said Court, wherein the Woodworth & Louisiana Central Railway Company, Limited, Rapides Lumber Company, Limited, and the Long-Bell Lumber Company, were petitioners, and the United States of America, Chicago, Rock Island & Pacific Railway Company, and Arkansas & Louisiana Railway Company, were respondents, and the Interstate Commerce Commission, The Atchison, Topeka & Santa Fe Railway Company, Gulf, Colorado & Santa Fe Railway Company, and the Railroad Commission of Louisiana, were intervenors, an order, judgment and decree was rendered against said respondents and intervenors, and

Whereas, said The Atchison, Topeka & Santa Fe Railway Company and the Gulf, Colorado & Santa Fe Railway Company, have appealed from said order and decree to the Supreme Court of the United States, and have obtained citation directed to the said Woodworth & Louisiana Central Railway Company, Limited, Rapides Lumber Company, Limited, and the Long-Bell Lumber Company, citing and admonishing them and each of them to be and appear

at a session of the Supreme Court of the United States, to be held at the city of Washington, within thirty days from the allowance of the said appeal.

Now, the condition of the above obligation is such, that if the said The Atchison, Topeka & Santa Fe Railway Company and the Gulf, Colorado & Santa Fe Railway Company shall prosecute said appeal to effect and shall pay all costs, if they shall fail to make their appeal good, then the above obligation to be void, otherwise to re-
366 main in full force and effect.

To Woodworth & Louisiana Central Railway Company, Limited; Rapides Lumber Company, Limited, and the Long-Bell Lumber Company; Railroad Commission of Louisiana:

You are hereby cited and admonished to be and appear at the Supreme Court of the United States, at Washington, within thirty days from the date hereof, pursuant to an appeal duly allowed and

filed in the Clerk's Office of the United States Commerce Court, wherein The Atchison, Topeka & Santa Fe Railway Company and the Gulf, Colorado & Santa Fe Railway Company are appellants and you are appellees, to show cause, if any there be, why the decree rendered against the said appellants, as in the appeal mentioned, should not be corrected, and why speedy justice should not be done to the parties in that behalf.

Witness the Honorable Martin A. Knapp, Presiding Judge of the United States Commerce Court, this 29th day of November, A. D. 1913.

MARTIN A. KNAPP,
Presiding Judge, United States Commerce Court.

Service of a copy of the within citation is hereby admitted this 2nd day of December, A. D. 1913.

H. M. GARWOOD,
W. R. THURMOND,

No. 92.

MANSFIELD RAILWAY & TRANSPORTATION COMPANY and FROST-JOHNSON LUMBER COMPANY, Petitioners,

vs.

THE UNITED STATES OF AMERICA, Respondent; Interstate Commerce Commission, Atchison, Topeka & Santa Fe Railway Company, Gulf, Colorado & Santa Fe Railway Company, Railroad Commission of Louisiana, Interveners.

UNITED STATES OF AMERICA, *ss:*

Be it remembered that in the United States Commerce Court, in the city of Washington, District of Columbia, at the times hereinafter mentioned, the following papers were filed and proceedings had in the above entitled cause, to wit:

Petition and Exhibits.

(Filed January 14, 1913.)

1 In the United States Commerce Court.

MANSFIELD RAILWAY & TRANSPORTATION COMPANY and FROST-JOHNSON LUMBER COMPANY, Petitioners,

vs.

THE UNITED STATES OF AMERICA, Respondent.

Petition.

To the Judges of the United States Commerce Court:

Your petitioners complain of the respondent, and for cause of action say:

I.

That the petitioner, Mansfield Railway & Transportation Company, is a railway corporation duly chartered, incorporated and existing under the laws of the State of Louisiana, and by its charter duly empowered to acquire rights of way, construct, maintain and operate railroads and branches thereof in the State of Louisiana, as a common carrier of freight and passengers, and to acquire by lease or otherwise, and to operate as a common carrier freight and passenger railways and trains, and to carry express, United
2 States mail and all other articles usually conveyed and transported by railroads, and to do all things necessary and proper, which may be incident to the above mentioned purposes, and now

has and exercises franchises, powers, rights, privileges and immunities conferred by law upon corporations created and organized for railroad purposes.

That the Constitution and Laws of the State of Louisiana provide as follows:

Constitution, Art. 271. "Any railroad corporation or association organized for the purpose shall have the right to construct and operate a railroad between any points within this state and connect at the state line with railroads of other states. Every railroad company shall have the right with its road to intersect, connect with or cross any other railroad, and shall receive and transport each other's passengers, tonnage and cars, loaded or empty, without delay or discrimination." Const. 1879, Art. 243.

Constitution, Art. 272. "Railways heretofore constructed, or that may hereafter be constructed in this state, are hereby declared public highways, and railroad companies common carriers." Const. 1879, Art. 244.

Constitution, Art. 273. "Every railroad or other corporation, organized or doing business in this state, under the laws or authority thereof, shall have and maintain a public office or place in this state for the transaction of its business, where transfers of stock shall be made, and where shall be kept for public inspection books in which shall be recorded the amount of capital stock subscribed, the names of owners of stock, the amounts owned by them respectively, the amount of stock paid, and by whom, the transfers of said stock, with the date of transfer, the amount of its assets and liabili-
3 ties, and the names and places of residence of its officers." Const. 1879, p. 245.

Revised Statutes, Sec. 1479. "Whenever the state or any political corporation of the same, created for the purpose of exercising any portion of the governmental powers in the same, or the board of administrators or directors of any charity hospital, or any board of school directors thereof, or any corporation constituted under the laws of this state for the construction of railroads, plank roads, turnpike roads or canals for navigation; or for the construction or operation of waterworks or sewerage to supply the public with water and sewerage, or for the purpose of transmitting intelligence by magnetic telegraph, cannot agree with the owner of land which may be wanted for its purchase, it shall be lawful for such state, corporation board of administrators, directors or person to apply by petition to the District Court in which the same may be situated, or if it extends into two districts, to the judge of the District Court in which the owner resides, and if the owner does not reside in either district, to either of the District Courts, describing the land necessary for the purposes, with a plan of the same, and a statement of the improvement thereon, if any, and the name of the owner thereof, if known at present in the state, with a prayer that the land be adjudged to such state, corporation, board of administrators or directors upon payment to the owner of all such damages as he may sustain in consequence of the expropriation of said land for such public works; all claims for lands or damages to the owner caused by its taking or for

expropriation for such public work shall be barred by two (2) years' prescription, which shall commence to run from the date at which
the land was actually occupied and used for the construction
4 of the works." (As amended by Act. 227, 1902, p. 457.)

Said petitioner, Mansfield Railway & Transportation Company, operates a line of railroad from Mansfield, La., to Hunter, La., a distance of about sixteen miles. Said Mansfield Railway & Transportation Company is engaged in both state and interstate commerce. It connects with the Texas & Pacific Railway Company at Mansfield Junction, La., and with the Kansas City Southern Railway Company, at a point about one and one-half miles east of Mansfield, La. Said petitioner complies with the rules and regulations promulgated by the State Railroad Commission of Louisiana and by the Interstate Commerce Commission and is subject to and complies with all the laws of the State of Louisiana and the United States relating to common carriers by railroad. It carries a full line of class and commodity rates between points on its own line in Louisiana and concurs in joint tariffs applying on class and commodities transported between points on its own road and points on connecting lines in Louisiana and other states of the United States except upon lumber and forest products. It has invested in road and equipment, $294,105.71, which represents about $18,381.61 per mile, including equipment. It has an equipment consisting of one locomotive, one box car and two passenger coaches. It maintains an operating force including office employees, telegraph and station agents, and the necessary section gangs and track men varying from time to time, none of which operating force is in any way connected with the petitioner Frost-Johnson Lumber Company, or of any lumber company located on its line of road.

In addition to the lumber traffic handled it receives from
5 and delivers to its connections above named, merchandise in carload and less than carload quantities and handles passengers, mail and express on regular scheduled trains between Mansfield Junction, Mansfield and Hunter, Louisiana, under tariffs filed with the Louisiana Railroad Commission and the Interstate Commerce Commission. The largest station on its line is Mansfield, La., which has a population of between twenty-five hundred and three thousand inhabitants. At this point it serves the following industries:

Mansfield Gin Company.
De Sota Cotton Oil Company.
De Sota Foundry & Machine Company.

At Oak Hill, La., it serves:

Mansfield Hardwood Lumber Company.
Frost-Johnson Lumber Company.

At Baker, La., it serves:

N. P. Baker Cotton Gin.

At Hunter, La., it serves the

English Cotton Gin.

In addition to these industries at these points it serves many other shippers of general merchandise, viz:

W. H. Rogers.....General Merchandise

The capital stock of the petitioner, Mansfield Railway & Transportation Company, is held by E. A. Frost in trust for the stockholders of the Frost-Johnson Lumber Company, petitioner herein. The petitioner, Mansfield Railway & Transportation Company, has outstanding $77,300 stock, and a bonded indebtedness of $216,000.

II.

That the petitioner, Frost-Johnson Lumber Company, is a corporation organized under the laws of the State of Missouri for the purpose of manufacturing and selling timber and lumber and owns timber lands for the purpose of obtaining timber therefrom at various points in the United States and more particularly at and near said Mansfield, La., and at other points on and adjacent to the line of the petitioner, Mansfield Railway & Transportation Company, over which line of railroad it is a large shipper. The line of railroad of the petitioner, Mansfield Railway & Transportation Company, forms part of a through route between points in the State of Louisiana and points in other states of the United States in connection with the line of railroad of the Texas & Pacific Railway Company and the Kansas City Southern Railway Company, both of which last named railway companies are common carriers engaged in interstate commerce by railroad and as such are subject to the Act to Regulate Commerce and other statutes of the United States applicable to such common carriers.

8

III.

That on or about the 28th day of January, 1908, the Interstate Commerce Commission entered upon a hearing and investigation in a certain cause entitled Star Grain & Lumber Company et al. v. Atchison, Topeka & Santa Fe Ry. Co. et al., Docket No. 1319. Hearings were had at various times and places, and on the 23d day of June, 1908, the Interstate Commerce Commission made a report and rendered an opinion, which report and opinion will be found in the 14 Interstate Commerce Commission Reports, at page 364, et seq., reference to which is hereby made. Further hearings were thereafter had in said case of Star Grain & Lumber Company et al. v. Atchison, Topeka & Santa Fe Railway Company et al., Docket No. 1319, and on December 7, 1909, the Interstate Commerce Commission made a supplemental report, which is published in the 17th Interstate Commerce Commission Reports, at page 338, et seq., reference to which report is hereby made, and the same is made a part hereof as fully as if set out herein.

IV.

By reason of the rendition of this report, or opinion, and because the Interstate Commerce Commission demanded under threat of

criminal prosecution, that they comply with the requirements thereof, the trunk line railroad companies of the United States, or a large number of them, including the Texas & Pacific Railway
9 Company and Kansas City Southern Railway Company, about the month of August, 1910, filed with the Interstate Commerce Commission new tariffs or supplemental tariffs on lumber, to become effective in thirty days, which new tariffs or schedules canceled all joint tariffs upon lumber and forest products which the said railway companies had theretofore had and maintained with the petitioner, Mansfield Railway & Transportation Company, and except for the order of the Interstate Commerce Commission, set out in paragraph 8 hereof, would have left said petitioner without any joint interstate rates or through routes on lumber with the other railroads of the country.

V.

Thereupon the Interstate Commerce Commission made and entered of record an order on or about the 3rd day of September, 1910, which after reciting that it appeared from the records of the Commission that tariffs had been filed by the Texas & Pacific Railway Company and Kansas City Southern Railway Company, and their agents, which schedules or tariffs stated new individual or joint rates applicable upon the articles named in said schedules or tariffs that were in excess of rates, fares and charges then in effect proceeded as follows:

It is ordered that the Commission, upon complaint, without formal pleading and without answer by the interested carriers, do enter upon a hearing concerning the propriety of such advances and the lawfulness of the rates, fares or charges stated in said schedule, with a view to making such order in the premises as may, after full hearing, seem just and proper; and that such hearing be held at such time and place as may be hereafter fixed by the Commission.
10 The Commission being further of the opinion that, pending such hearing and decision of the Commission concerning the propriety of such rates, fares or charges, the operation of such schedule should be postponed for the reason that from a consideration of the character and amount of the advances and the circumstances under which they have been made, it appears to the Commission there is sufficient ground for claiming that said advances are unlawful and that the rates, fares or charges established by said schedule are unjust and unreasonable, and therefore unlawful, and that the public interest requires that the operation of said schedule be deferred until sufficient time has been given for an investigation by this Commission.

It is further ordered that the operation of the aforesaid schedule be suspended, and that the use of the rates, fares or charges therein specified be deferred until January 5, 1911.

It is further ordered that the several carriers above named that have filed schedules be and they are hereby made defendants to this proceeding, and that a copy of this order be forthwith served upon each of them; and

It is further ordered that the carriers named in said schedule and supplements thereto as participating therein be and they are hereby made defendants to this proceeding, and that a copy of this order be forthwith served upon each of them.

A true copy.

EDW. A. MOSELEY, *Secretary.*

Thereupon, the Interstate Commerce Commission made similar orders on or about the same date, suspending the operation of the schedules of various other railroad companies within the United States, and thereby kept in force and effect the joint tariffs
11 and the maintenance of through routes and joint rates between the petitioner Mansfield Railway & Transportation Company and the railroad companies herein mentioned, and the various other trunk line railroads and systems of the United States for a period of 120 days. Reference to which orders is hereby made and the same are made a part hereof.

And the said Interstate Commerce Commission, from time to time, continued by appropriate orders, similar in form to the order hereinabove set out, the suspension of the cancellation of rates between various railroad companies of the United States, including the railroad companies named herein, and the petitioner, the Mansfield Railway & Transportation Company, until the end of the 30th day of April, 1912; the last of said orders being in words and figures as follows, to-wit:

"At a General Session of the Interstate Commerce Commission Held at Its Office in Washington, D. C., on the 16th Day of January, A. D. 1912.

Charles A. Prouty, Judson C. Clements, Franklin K. Lane, Edgar E. Clark, James S. Harlan, Charles C. McCord, Balthasar H. Meyer, Commissioners.

Investigation and Suspension Docket No. 11.

In the Matter of the Investigation and Suspension of Schedules Canceling Through Rates with Certain Tapline Connections.

It appearing, That, by orders heretofore entered, the Com-
12 mission instituted an investigation and hearing concerning the propriety of various tariffs filed by certain carriers wherein joint rates with and divisions or allowances to so-called tapline connections were to be canceled and withdrawn; and the Commission, by orders duly filed and served, having suspended and deferred the effectiveness of such tariffs until June 1, 1911; and that under authority of an order entered herein on May 18, 1911, the various carriers withdrew their said tariffs canceling such divisions or allowances and refiled them to become effective on November 1, 1911; and that under authority of a further order entered herein on October 16, 1911, the various carriers withdrew their said tariffs cancel-

ing such divisions or allowances, and refiled them to become effective on February 1, 1912; and,

It further appearing, That a full investigation of the said matters has been had, but it has been impossible for the Commission to reach a final decision of the questions and matters involved within the period for which the operation of the said schedules has been voluntarily postponed by the carriers; namely, on or before February 1, 1912; and,

It further appearing, That the various carriers by which the cancellations in question were published, republished and filed with the Commission are desirous of withdrawing the said cancellation tariffs and refiling them, thereby further postponing their effectiveness to May 1, 1912;

It is ordered, That each and all of the carriers that are parties to this record be, and they are hereby authorized on three days' notice to the Commission and to the public, to cancel and withdraw all such tariffs filed with the Commission, and under their present terms to become effective on or before February 1, 1912, in which are contained cancellations or withdrawals of joint rates or divisions
13 with or allowances to so-called tapline connections, and, provided, the said tariffs are forthwith refiled to become effective on May 1, 1912;

It is further ordered, That all tariffs or supplements issued under authority of this order shall bear the following notation on title page:

Issued by authority of the Interstate Commerce Commission's order of January 16, 1912, in Investigation and Suspension Docket No. 11.

A true copy.

C. A. PROUTY, *Chairman.*"

VI.

Pursuant to the orders of date the 3rd day of September, 1910, one of which is hereinabove fully set out, Interstate Commerce Commission did enter upon a further hearing of the matter of the propriety of the advances and the lawfulness of the rates, fares or charges, stated in said schedules, mentioned in said orders, and thereupon, and on the 15th day of November, 1910, gave to the petitioner, the Mansfield Railway & Transportation Company, and to various other railroad companies in the United States, including the railroad companies mentioned herein, a notice in words and figures as follows, to-wit:

"NOVEMBER 15, 1910.

Docket No. 1319.

STAR GRAIN AND LUMBER COMPANY et al.
vs.
ATCHISON, TOPEKA & SANTA FE RY. CO. et al.

In the Matter of Tapline Allowances and Divisions, Being Docket Nos. 3400, Sub. 6, 3400, Sub. 7, 3493, 3511, 3512, 3513, 3514, 3524, 3548, 3551, 3552, and 3564, Consolidated under Investigation and Suspension Docket No. 11.

14 The above entitled proceedings are assigned for hearing on Thursday, December 9, 1910, 10 o'clock a. m., at United States Court rooms, New Orleans, Louisiana.

By the Commission.

EDW. A. MOSELEY, *Secretary.*"

On or about November 28, 1910, the petitioner, Mansfield Railway & Transportation Company, filed with the Interstate Commerce Commission its petition against the Kansas City Southern Railway Company and its separate petition against the Texas & Pacific Railway Company, complaining of the cancellation by said defendants of joint rates theretofore in effect upon forest products, particularly lumber, requesting of the Commission that an answer be required from each of these defendants, that an investigation be entered into and that joint rates be compelled by and between the said defendants, Texas & Pacific Railway Company and Kansas City Southern Railway Company with the petitioner, Mansfield Railway & Transportation Company, and their connections to all interstate destinations upon all forest products originating at points upon lines of the petitioner, Mansfield Railway & Transportation Company.

Your petitioners aver that notwithstanding that by the Act to Regulate Commerce it is required that the Commission serve upon the defendants in any proceeding before it a copy of the petition with directions to answer the same or to satisfy the petition, nevertheless, no such service was made upon the defendants and no answers were made by said defendants to said petition before the said Interstate Commerce Commission.

15 And pursuant to said notice and the orders of the Interstate Commerce Commission hereinabove set forth, the petitioner, Mansfield Railway & Transportation Company, together with numerous other railroad companies, appeared before the Interstate Commerce Commission, at New Orleans, on December 8, 1910, and subsequent days, and at St. Louis, Missouri, and at Chicago, Illinois, upon adjournments of said hearing, and thereupon the Honorable James S. Harlan, one of the Interstate Commerce Commissioners, examined the officers and agents of the petitioner, the Mansfield Railway & Transportation Company, concerning the matters under investigation in said proceeding, and said petitioner,

Mansfield Railway & Transportation Company, also thereafter submitted to the Interstate Commerce Commission certain documentary evidence, by filing the same with the secretary of said Commission at Washington; and thereafter, and within the time fixed by the Commission, said petitioner filed with the Interstate Commerce Commission a statement of facts, abstract of the evidence which had been taken before said commission, in reference to said petitioner, and a brief and argument, reference to which statement and brief is hereby made.

Thereafter oral argument was made before said Commission in support of the rights of your petitioners.

On the 29th day of April, 1912, the Interstate Commerce Commission rendered an opinion No. 1853, entitled, Investigation and Suspension Docket No. 11, the Tapline case, which opinion will be found in the 23d Interstate Commerce Commission Reports, p. 277, et seq., reference to which opinion is hereby made, and which is made a part hereof as fully as if set out herein in full.

And in said opinion and report is the following, to-wit:

16 "The cancellations by the trunk lines will be allowed to become effective on May 1, as provided in the tariffs now on file."

And in and by said opinion and report and by the language hereinabove last quoted, the Interstate Commerce Commission made an order authorizing, permitting and commanding the trunk line railroad companies of the United States, including the railroad companies mentioned herein to cancel all joint interstate rates on so-called proprietary lumber with the petitioner, the Mansfield Railway & Transportation Company, on the 1st day of May 1912.

And said trunk line companies of the United States, including the railroad companies mentioned herein, have construed said opinion herein last above referred to, as an order from the Commission to cancel said joint rates and tariffs with the petitioner, the Mansfield Railway & Transportation Company, and now have canceled and have ceased to maintain any joint tariffs or through routes and joint rates with said petitioner on lumber. And the Interstate Commerce Commission, through its secretary, has notified the trunk line railroads of the United States that said cancellation did take effect at midnight on the 30th day of April, 1912, and that rates, as filed must be observed by carriers and shippers, if criminal violation of Interstate Commerce Act and Elkins Act is to be avoided.

Your petitioners further state that the opinion No. 1853, and the order contained therein, hereinbefore referred to, and reported in the 23d InterstateCommerce Reports, at page 277, et seq., purports to have been decided, and is dated on, April 23, 1912. But, your petitioners allege that said opinion was not made public

17 until the 29th day of April, 1912, and if it was rendered on the 23d day of April, all knowledge and information thereof was withheld from your petitioners, and the public generally, and your petitioners had no opportunity to know the contents thereof until about 4 o'clock in the afternoon of April 29th, 1912,

and a copy of said opinion was not received by your petitioners until after the 30th day of April, 1912, by reason of which your petitioners were unable, on account of lack of time, to prepare any petition or application for injunction to this, or any other, court, to prevent the cancellation of rates by the said railroad companies becoming effective as hereinabove stated, or, before the 1st day of May, 1912, to make any application to this court to enjoin, set aside and annul the order of the Interstate Commerce Commission hereinbefore set out.

VI.

Your petitioners further state that on the 1st day of June, 1912, the Interstate Commerce Commission made a supplemental report, entitled, Investigating and Suspension Docket No. 11, the Tapline Case, Opinion No. 1898, which is reported in the 23d Interstate Commerce Reports, at page 549, reference to which is hereby made and which is made a part hereof as fully as if set out herein.

Said supplemental report or opinion, in so far as it relates to the petitioner, Mansfield Railway & Transportation Company, or makes a finding of fact in reference to said petitioner, is in words and figures as follows, to-wit:

The Mansfield Railway & Transportation Company was incorporated as long ago as 1881, by the citizens of Mansfield,
18 who built two miles of track from the town to a connection with the Texas & Pacific, at a point known as Mansfield Junction. Within the past ten years this track and equipment then in use was acquired by E. A. Frost and others, through purchase, for the sum of $12,500 of the entire capital stock of the railway company. At about the same time a large body of timber land was purchased lying west of the line of the Texas & Pacific, and a sawmill was erected at a point near Mansfield, known as Oak Hill. The timber and the mill were held and operated by a corporation, owned by Frost and his associates, known as the De Sota Land & Lumber Company, which also held stock of the Mansfield Railway. Some six or eight miles of logging roads were constructed from a connection with the incorporated line into the timber. There is some obscurity in the record, but our understanding is that the Frost-Johnson Lumber Company was later organized by the same interests, and took over the property and business of the De Sota Company. The additional tracks that had been constructed by the Frost interests, however, were transferred in 1908 to their tapline corporation, the Mansfield Railway & Transportation Company. The lumber company reserved to itself the free privilege of operating logging trains between the timber and the mill; the value of this reservation was not reflected in the purchase price, which fully covered the value of the property transferred, as the record clearly indicates. The tapline has issued and outstanding capital stock to the amount of $77,300, all of which is held by the stockholders of the Frost-Johnson Lumber Company; and it is indebted to the lumber company in the sum of $216,806.97.

The two companies are identical in interest. There is a sub-

sidiary corporation of the Frost-Johnson Company that performs the entire logging service. It is owned absolutely by the
19 lumber company, which has assigned to it the trackage privilege over the tapline; and we shall refer to it hereinafter simply as the logging company.

The tapline as described on the record now consists of about sixteen miles of track, commencing at the town of Mansfield and terminating at a logging camp in the woods known as Hunter. In addition to the original connection with the Texas & Pacific at Mansfield Junction the tapline joins the Kansas City Southern, which subsequently built through this section, at a point about one and one-half miles east of Mansfield. The tapline has one locomotive, a passenger coach, and one box car; the logging cars are owned by the logging company. In addition to the incorporated road there are in the aggregate nearly twenty-five miles of unincorporated logging tracks in the woods.

The tapline does not haul the logs to the mill, which, as heretofore stated, is at Oak Hill, about three-fourths of a mile from the junction, with the Kansas City Southern and two and one-half miles from the point of interchange with the Texas & Pacific. The mill is within 300 feet of the right of way of the Kansas City Southern with which it was formerly connected by a spur track that was abandoned and later taken up. The logs are moved to the mill by the logging company under the reserved trackage right already referred to. The service performed by the tapline for the proprietary company consists in switching the empty and loaded cars for lumber shipments between the mill and the tracks of the trunk lines, a distance of three-fourths of a mile, or two and one-half miles, respectively. The tapline, however, bears the expense of maintaining the incorporated tracks extending into the woods over which the logging trains are operated.

20 There are no other yellow-pine sawmills served by the tapline. But there is a hardwood mill adjacent to the mill of the Frost-Johnson Company, which apparently obtains a substantial portion of its logs from the Frost-Johnson Company or its subsidiary logging company, the price paid including delivery at the hardwood mill. Such logs are hauled to the mill by the logging company under its trackage right in the same manner that the logs are hauled to the Frost-Johnson mill. The hardwood mill also obtains some logs along the Texas & Pacific, which are switched by the tapline to the mill at a charge of $2.50 a car or less. The tapline has joint rates on hardwood as well as yellow-pine lumber.

A good deal of outside traffic is handled over the original two miles of line from Mansfield to Mansfield Junction, but there is practically no traffic in which the proprietary company is not interested over the remainder of the track. Hunter, at the western end of the line, is a logging camp, and there are very few settlers along the line who are not employees of the lumber company or the subsidiary logging company. During the fiscal year ending June 30, 1910, 28,596 tons of lumber were handled, of which 91.4 per cent was supplied by the Frost-Johnson Company. There was

16,539 tons of miscellaneous freight, almost all of which moved over the line between Mansfield and Mansfield Junction, and a considerable proportion of which was handled for the controlling interests or their employees. The tapline operates a daily train in each direction on regular schedule and handles passengers, mail, and express; but its revenues from passenger train operation during the year 1910 aggregated only $1,209.76, its freight revenue being $25,617.19.

As stated, the spur track of the Kansas City Southern, about 300 feet long, which formerly went directly into this mill,
21 was torn out; the switching is now done over a track of the tapline three-fourths of a mile long. This arrangement being effected, the Kansas City Southern thereupon undertook to pay the tapline allowances of 1 to 4 cents per 100. We hold this to be a mere manipulation of the situation in order to establish a relation that is unlawful. The tapline also crosses the right of way of the Texas & Pacific within a short distance from the mill, but the lumber is switched by the tapline back toward Mansfield and then to the junction with that line, a distance of about two and one-half miles; the tapline receives from the Texas & Pacific 1 to 4 cents per 100 pounds. In this case we regard any allowance as unlawful.

VII.

Your petitioners further state that the opinion No. 1898, reported in the 23d Interstate Commerce Commission Reports, at page 549, et seq., purports to have been decided and is dated on May 14, 1912, but your petitioners allege that said opinion was withheld and not made public until the first day of June, 1912.

Petitioners further state that on the 14th day of June, 1912, the Interstate Commerce Commission made and entered of record, or at least made public on that day, an order in words and figures as follows, to-wit:

"Order.

At a General Session of the Interstate Commerce Commission Held at Its Office in Washington, D. C., on the 14th Day of May, A. D. 1912.

22 Investigation and Suspension Docket No. 11.

In the Matter of the Investigation and Suspension of Schedules Canceling Through Rates with Certain Tapline Connections, and Certain Other Cases Consolidated Herewith.

It appearing, That a full investigation of the matters and things herein involved has been had, and the Commission, on April 23, 1912, having made and filed a report containing its findings of fact and conclusions thereon, and having also on the date hereof made and filed a supplemental report containing its further findings of

fact and conclusions thereon, which said reports are hereby referred to and made a part hereof;

It further appearing, That the Commission has found that in the case of the following named parties to the record, and each of them, namely:

Malvern & Freeo Valley Railway Company;
Wilmer & Saline Valley Railroad Company;
Arkansas & Gulf Railroad Company;
Little Rock, Maumelle & Western Railroad Company;
Beirne & Clear Lake Railroad;
Mississippi, Arkansas & Western Railway Company;
Bearden & Ouachita River Railroad Company;
Arkansas Eastern Railroad Company;
Blytheville, Burdette & Mississippi River Railway Company;
Brookings & Peach Orchard Railroad Company;
Crossett Railway Company;
Fordyce & Princeton Railroad Company;
Homan & Southeastern Railway Company;
Little Rock, Sheridan & Saline River Railway Company;
L'Anguille River Railway Company;
Ouachita Valley Railway Company;
23 Griffin, Magnolia & Western Railway Company;
Saline Bayou Railway Company;
Enterprise Railway Company;
Natchez, Ball & Shreveport Railway Company;
Black Bayou Railroad Company;
The Bodcau Valley Railway Company;
Mill Creek & Little River Railway & Navigation Company;
Red River & Rocky Mount Railway Company;
Woodworth & Louisiana Central Railway Company;
Freeo Valley Railroad Company;
Natchez, Urania & Huston Railway Company;
Bernice & Northwestern Railway Company;
Dorcheat Valley Railroad Company;
Manghan & Northeastern Railway Company;
Galveston, Beaumont & Northeastern Railway Company;
Peach River & Gulf Railway Company;
Riverside & Gulf Railway Company;
Jefferson & Northwestern Railway Company;
Beaumont & Saratoga Transportation Company;
Angeline & Neches River Railroad Company;
Missouri & Louisiana Railroad Company;
Saginaw & Ouachita River Railroad Company;
Warren, Johnsville & Saline River Railroad Company;
Blytheville, Leachville & Arkansas Southern Railroad Company;
The Caddo & Choctaw Railroad Company;
Manila & Southwestern Railway Company;
Louisiana & Pine Bluff Railway Company;
Mansfield Railway & Transportation Company;
Louisiana & Pacific Railway Company;
Roosevelt & Western Railroad Company;
Tioga & Southeastern Railway Company;

Louisiana Central Railroad Company;
Monroe & Southwestern Railway Company;
Victoria, Fisher & Western Railroad Company;
Ouachita & Northwestern Railroad Company;
Lake Charles Railway & Navigation Company;
Louisiana Railway Company;
Zwolle & Eastern Railway Company;
Sabine & Northern Railroad Company;
Gideon & North Island Railroad Company;
Poplar Bluff & Dan River Railway Company;

the service performed for the respective proprietary lumber companies in moving the logs from their respective forests to their respective mills and in moving the product from the mills to the trunk lines is not a service of transportation by a common carrier railroad and that any allowances or divisions out of the rate on account thereof are unlawful:

It further appearing, That the following parties to the record, namely:

Little Rock, Mammelle & Western Railroad Company;
Bearden & Ouachita River Railroad Company;
Arkansas Eastern Railroad Company;
Crossett Railway Company;
Fordyce & Princeton Railroad Company;
Ouachita Valley Railway Company;
Freeo Valley Railroad Company;
Dorcheat Valley Railroad Company;
Galveston, Beaumont & Northeastern Railway Company;
Peach River & Gulf Railway Company;
Riverside & Gulf Railway Company;
Angelina & Neches River Railroad Company;
Saginaw & Ouachita River Railroad Company;
Blytheville, Leachville & Arkansas Southern Railroad Company;
The Caddo & Choctaw Railroad Company;
Manila & Southwestern Railway Company;
Louisiana & Pine Bluff Railway Company;
Mansfield Railway & Transportation Company;
Lake Charles Railway & Navigation Company;
Louisiana Railway Company;
Zwolle & Eastern Railway Company;
Gideon & North Island Railroad Company;

have heretofore filed with the Commission petitions asking for the establishment or re-establishment of through routes and joint rates on forest products to interstate destinations, which said petitions or complaints are filed on or consolidated with the record herein and on which a full hearing has been had:

It is ordered, That said petitions, so far as they relate to rates on the products of the mills of the proprietary companies, be, and for the reasons set forth in said reports they are hereby, dismissed.

It is further ordered, That the defendants, the Chicago, Rock Island & Pacific Railway Company; St. Louis & San Francisco Railroad Company; New Orleans, Texas & Mexico Railroad Company;

15

Beaumont, Sour Lake & Western Railway Company; St. Louis, Iron Mountain & Southern Railway Company; The Texas & Pacific Railway Company; International & Great Northern Railway Company; The Missouri, Kansas & Texas Railway Company of Texas; St. Louis Southwestern Railway Company; St. Louis Southwestern Railway Company of Texas; the Paragould Southeastern Railway Company; Eastern Texas Railroad Company; The Kansas City Southern Railway Company; Texarkana & Fort Smith Railway Company; The Houston, East & West Texas Railway Company; Texas & New Orleans Railroad Company; Louisiana Western Railroad Company; Morgan's Louisiana & Texas Railroad & Steamship Company; Lake Charles & Northern Railroad Company; Vicksburg, Shreveport & Pacific Railway Company; Louisiana & Arkansas Railway Company; Louisiana Railway & Navigation Company; Gulf, Colorado & Santa Fe Railway Company; The Texas
26 & Gulf Railway Company; Missouri & North Arkansas Railroad Company; Illinois Central Railroad Company; Southern Railway Company; Northern Alabama Railway Company; New Orleans Great Northern Railroad Company; and Mobile & Ohio Railroad Company, be, and they are hereby authorized, on not less than three days' notice, to reopen through routes and publish joint rates with the following parties to the record, and each of them, on the products of the mills of their respective proprietary companies:

Saline River Railway Company;
Warren & Ouachita Valley Railway Company;
El Dorado & Western Railway Company;
Thornton & Alexandria Railway Company;
Doniphan, Kensett & Searcy Railway;
Fourche River Valley & Indian Territory Railway Company;
Prescott & Northwestern Railroad Company;
Memphis, Dallas & Gulf Railroad Company;
Crittenden Railroad Company;
De Queen & Eastern Railroad Company;
Central Railway Company of Arkansas;
Gulf & Sabine River Railroad Company;
The Sibley, Lake Bisteneau & Southern Railway Company;
North Louisiana & Gulf Railroad Company;
Arkansas Southeastern Railroad Company;
Red River & Gulf Railroad Company;
Tremont & Gulf Railway Company;
The Nacogdoches & Southeastern Railroad Company;
Texas Southeastern Railroad Company;
Timpson & Henderson Railway Company;
Shreveport, Houston & Gulf Railroad Company;
Groveton, Lufkin & Northern Railway Company;
Moscow, Camden & San Augustine Railway Company;
Trinity Valley & Northern Railway Company;
Trinity Valley Southern Railroad Company;
27 Caro Northern Railway Company;
Butler County Railroad Company;
Deering Southwestern Railway;

Mississippi Valley Railway Company;
Paragould & Memphis Railway Company;
Salem, Winona & Southern Railroad Company;
Fernwood & Gulf Railroad Company;
New Orleans, Natalbany & Natchez Railway Company;
Alabama Central Railroad Company;
Washington & Choctaw Railway Company;

Provided, The allowances or divisions out of such joint rates to be paid on the products of the mills of the said proprietary companies shall not exceed the divisions or allowances specified in the aforesaid supplemental report of the Commission.

It is further ordered, That, for the reasons specified in the said supplemental report, no allowances or divisions shall be made on the products of the mills of the lumber companies owning or controlling the following companies party to the record:

Gould Southwestern Railway Company;
Kentwood & Eastern Railroad Company;
Kentwood, Greensburg & Southwestern Railroad Company;
Liberty-White Railroad Company;
Natchez, Columbia & Mobile Railroad Company.

And it is further ordered, That the joint rates hereinabove authorized may be published on three days' notice to the public and to the Commission, the tariffs to refer to this order by date and number, and on like notice any of the said defendants or parties to the record may republish rates on class and commodity traffic and on products of mills other than those of the respective proprietary lumber companies.

By the Commission,

[SEAL.] JOHN H. MARBLE, *Secretary.*"

28 VIII.

Thereafter proceedings were begun by certain of the Tapline Companies and shippers thereon situated to enjoin said order of the Commission, but upon motion of the Interstate Commerce Commission and the United States and upon the authority of the decision of the Supreme Court in the case of Proctor & Gamble v. United States, the said petitions for injunction were dismissed. Thereafter and on or about August — 1912, a petition was filed before said Interstate Commerce Commission, in letters and figures as follows:

Comes now the undersigned, attorney for the various Tapline railroads whose status was determined by the Commission in the above entitled investigation, and respectfully requests that the Commission will, at the earliest possible date, issue an affirmative order substantially in form as follows:

"It is ordered that Malvern & Freeo Valley Railway Company; Wilmar & Saline Valley Railroad Company; Arkansas & Gulf Railroad Company; Little Rock, Maumelle & Western Railroad Company; Beirne & Clear Lake Railroad; Mississippi, Arkansas & Western Railway Company; Bearden & Ouachita River Railroad

Company; Arkansas Eastern Railroad Company; Blytheville, Burdette & Mississippi River Railway Company; Brookings & Peach Orchard Railroad Company; Crossett Railway Company; Fordyce & Princeton Railroad Company; Homan & Southeastern Railway Company; Little Rock, Sheridan & Saline River Railway Company; L'Anguille River Railway Company; Ouachita Valley Railway Company; Griffin, Magnolia & Western Railway Company; Saline Bayou Railway Company; Enterprise Railway Company; Natchez, Ball & Shreveport Railway Company; Black Bayou Railroad Com-
29 pany; The Bodcaw Valley Railway Company; Mill Creek & Little River Railway & Navigation Company; Red River & Rocky Mountain Railroad Company; Woodworth & Louisiana Central Railway Company; Freeo Valley Railroad Company; Natchez, Urania & Ruston Railway Company; Bernice & Northwestern Railway Company; Dorcheat Valley Railroad Company; Mangham & Northeastern Railway Company; Galveston, Beaumont & Northeastern Railway Company; Beach River & Gulf Railway Company; Riverside & Gulf Railway Company; Jefferson & Northwestern Railway Company; Beaumont & Saratoga Transportation Company; Angelina & Neches River Railroad Company; Missouri & Louisiana Railroad Company; Saginaw & Ouachita River Railroad Company; Warren, Johnsville & Saline River Railroad Company; Blytheville, Leachville & Arkansas Southern Railroad Company; The Caddo & Choctaw Railroad Company; Manila & Southwestern Railway Company; Louisiana & Pine Bluff Railway Company; Mansfield Railway & Transportation Company; Louisiana & Pacific Railway Company; Roosevelt & Western Railroad Company; Tioga & Southeastern Railway Company; Louisiana Central Railroad Company; Monroe & Southwestern Railway Company; Victoria, Fisher & Western Railroad Company; Ouachita & Northwestern Railroad Company; Lake Charles Railway & Navigation Company; Louisiana Railway Company; Zwolle & Eastern Railway Company; Sabine & Northern Railroad Company; Gideon & North Island Railroad Company and Poplar Bluff & Dan River Railway Company be and each of them are required, on or before September 15, 1912, to cease and desist, and for a period of two years thereafter to abstain from maintaining joint interstate rates for the movement of logs to the mills of the respective proprietary lumber companies in opinions Nos.
30 1853 and 1898 (which opinions are made part hereof) and for the movement of the products of such logs and mills to interstate destinations.

It is further ordered that the defendants named, The Chicago, Rock Island & Pacific Railway Company; St. Louis & San Francisco Railroad Company; New Orleans, Texas & Mexico Railroad Company; Beaumont, Sour Lake & Western Railway Company; St. Louis, Iron Mountain & Southern Railway Company; The Texas & Pacific Railway Company; International & Great Northern Railway Company; The Missouri, Kansas & Texas Railway Company of Texas; St. Louis Southwestern Railway Company; St. Louis Southwestern Railway Company of Texas; The Paragould Southeastern Railway Company; Eastern Texas Railroad Company; The Kansas

City Southern Railway Company; Texarkana & Fort Smith Railway Company; The Houston East & West Texas Railway Company; Texas & New Orleans Railroad Company; Louisiana Western Railroad Company; Morgan's Louisiana & Texas Railroad & Steamship Company; Lake Charles & Northern Railroad Company; Vicksburg, Shreveport & Pacific Railway Company; Louisiana & Arkansas Railway Company; Louisiana Railway & Navigation Company; Gulf, Colorado & Santa Fe Railway Company; The Texas & Gulf Railway Company; Missouri & North Arkansas Railroad Company; Illinois Central Railroad Company; Southern Railway Company; Northern Alabama Railway Company; New Orleans Great Northern Railroad Company and Mobile & Ohio Railroad Company; Saline River Railway Company; Warren & Ouachita Valley Railway Company; El Dorado & Wessen Railway Company; Thornton & Alexandria Railway Company; Doniphan, Kensett & Searcy Railway; Fourche River Valley & Indian Territory Railway Company; Prescott & Northwestern Railway Company; Memphis, Dallas &
31 Gulf Railroad Company; Crittenden Railroad Company; De Queen & Eastern Railroad Company; Central Railway Company of Arkansas; Gulf & Sabine River Railroad Company; The Sibley, Lake Bisteneau & Southern Railway Company; North Louisiana & Gulf Railroad Company; Arkansas Southeastern Railroad Company; Red River & Gulf Railroad Company; Tremont & Gulf Railway Company; The Nacogdoches & Southeastern Railroad Company; Texas Southeastern Railroad Company; Timpson & Henderson Railway Company; Shreveport, Houston & Gulf Railroad Company; Groveton, Lufkin & Northern Railway Company; Moscow, Camden & San Augustine Railway Company; Trinity Valley & Northern Railway Company; Trinity Valley Southern Railroad Company; Caro Northern Railway Company; Butler County Railroad Company; Deering Southwestern Railway; Mississippi Valley Railway Company; Paragould & Memphis Railway Company; Salem, Winona & Southern Railroad Company; Fernwood & Gulf Railroad Company; New Orleans, Natalbany & Natchez Railway Company; Alabama Central Railroad Company and Washington & Choctaw Railway Company be and they are hereby authorized and required on or before September 15, 1912, to reopen through routes and publish joint rates upon lumber destined to interstate points, provided the maximum of such joint rates shall not exceed those in effect April 30, 1912.

It is further ordered that the divisions or proportions of the joint rates accruing to the Saline River Railway Company; Warren & Ouachita Valley Railway Company; El Dorado & Wesson Railway Company; Thornton & Alexandria Railway Company; Doniphan, Kensett & Searcy Railway; Fourche River Valley & Indian Territory Railway Company; Prescott & Northwestern Railway
32 Company; Memphis, Dallas & Gulf Railroad Company; Crittenden Railroad Company; De Queen & Eastern Railroad Company; Central Railway Company of Arkansas; Gulf & Sabine River Railroad Company; The Sibley, Lake Bisteneau & Southern Railway Company; North Louisiana & Gulf Railroad Company; Ar-

kansas Southeastern Railroad Company; Red River & Gulf Railroad Company; Tremont & Gulf Railway Company; The Nacogdoches & Southeastern Railroad Company; Texas Southeastern Railroad Company; Timpson & Henderson Railway Company; Shreveport, Houston & Gulf Railroad Company; Groveton,' Lufkin & Northern Railway Company; Moscow, Camden & San Augustine Railway Company; Trinity Valley & Northern Railway Company; Trinity Valley Southern Railroad Company; Caro Northern Railway Company; Butler County Railroad Company; Deering Southwestern Railway; Mississippi Valley Railway Company; Paragould & Memphis Railway Company; Salem, Winona & Southern Railroad Company; Fernwood & Gulf Railroad Company; New Orleans, Natalbany & Natchez Railway Company; Alabama Central Railroad Company and Washington & Choctaw Railway Company upon the products of the mills of the proprietary companies named in opinions Nos. 1853 and 1898, located on said lines, shall not exceed the divisions, proportions or allowances specified in said opinions."

The basis for the aforesaid request is contained in the following statement of facts and circumstances arising subsequent to the entry of the order of May 14, 1912:

(1) The order of May 14, 1912, entered in such proceedings is not such an order as is required by Sections 14 and 15 of the Act to Regulate Commerce as amended June 29, 1906.

(2) Subsequent to the entry of said order of May 14, 1912,
33 the Supreme Court of the United States announced its opinion in the Proctor & Gamble Case, in which it was held that the Commerce Court had no jurisdiction of suits brought to enjoin so-called negative orders of the Commission.

(3) There was much difference of opinion as to whether said order of May 14, 1912, was or was not an affirmative order within the definition of the Supreme Court in the said Proctor & Gamble Case. Application was made to the Commission for modification of said order substantially in form with that set forth above, which said application was denied.

(4) Three test suits were filed in the Commerce Court to enjoin such order of May 14, 1912, and the Commerce Court, upon motion of the Commission and the Department of Justice, dismissed the same on the authority of the Proctor & Gamble decision.

(5) The time limit within which appeals from such decree of dismissal must be made will expire August 18, 1912.

(6) The Trunk Line Railroads connecting with the so-called taplines have accepted the Commission's requirements of May 14, 1912, as an affirmative order, and the said taplines are without any recourse whereby to protect their lawful rights.

(7) The modification above requested will not change in any wise the present status of any of the tapline carriers so far as joint rates are concerned; the only effect of the order will be to confer jurisdiction upon the Court to determine the lawful rights of the said taplines and their shippers, and, so far as the law may require or permit, protect the taplines and their shippers from unlawful acts of the trunk line connections.

(8) In the case of fifty-seven (57) lines in which the Commission held that the transportation of logs from the forest to the
34 mills and the product from the mills to the trunk lines was not a service of transportation when performed for the proprietary lumber companies, the trunk lines have refused to establish joint rates upon other forest products, notwithstanding the Commission's suggestion so to do, the position taken by the trunk lines being that if the Taplines are not common carriers of logs and lumber for the proprietary lumber companies such taplines are not common carriers of any logs and lumber.

(9) Members of the Commission have stated since the entry of this order that the questions of law involved in the tapline cases are important and should be determined at an early date. These questions can be determined at the present time by the entry of the form of order requested herein.

(10) Since May 14, 1912, the Commission has established joint rates upon lumber transported by short line railroad companies for proprietary lumber companies, and has entered an affirmative order requiring the publication of such joint rates. We are asking in the case of the Saline River Railway Company and other carriers recognized by this Commission as properly entitled to participate in joint rates, that the same sort of an order be entered as was made by the Commission in the McCloud River Lumber case.

In the Peavey Elevator cases the Commission found that payment out of the joint rate to the Peavey Elevator Company for the elevation of the grain of that company was a rebate and discrimination; the finding in the tapline cases so far as the transportation of lumber and logs for the proprietary lumber companies upon the fifty-seven (57) lines held not to be carriers of logs or lumber for the proprietary lumber companies is that any allowance out of the joint rates is a rebate and discrimination. In that case an order to cease and desist was made. That order was similar in all respects
35 to the order requested in this case as to the fifty-seven first named taplines.

We therefore respectfully petition this Honorable Commission to modify its order in form substantially as above requested.

IX.

Thereupon the Commission issued an amended order in letters and figures, as follows:

Investigation and Suspension Docket No. 11.

The Tapline Case.

Amended Order.

At a General Session of the Interstate Commerce Commission, Held at Its Office in Washington, D. C., on the 30th Day of October, A. D., 1912.

Investigation and Suspension Docket No. 11.

In the Matter of the INVESTIGATION AND SUSPENSION OF SCHEDULES CancelingThrough Rates with Certain Tapline Connections; and Certain Other Cases Consolidated Herewith.

This matter coming on again upon a motion for an amendment of the order heretofore entered by the Commission on May 14, 1912, and the Commission being fully advised,

It is ordered, That the said order be, and it is hereby, modified to read as follows:

1. It appearing, That a full investigation of the matters and things herein involved has been had, and the Commission, on April 23, 1912, having made and filed a report containing its find-
36 ing of fact and conclusions thereon, and having also on the said 14th day of May, 1912, made and filed a supplemental report containing its further findings of fact and conclusions thereon, which said reports are hereby referred to and made a part *of* hereof;

2. It further appearing, That the Commission upon the record finds in the case of the following named parties to the record, and each of them, namely:

Malvern & Freeo Valley Railway Company;
Wilmar & Saline Valley Railroad Company;
Arkansas & Gulf Railroad Company;
Little Rock, Maumelle & Western Railroad Company;
Beirne & Clear Lake Railroad;
Mississippi, Arkansas & Western Railway Company;
Bearden & Ouachita River Railroad Company;
Arkansas Eastern Railroad Company;
Blytheville, Burdette & Mississippi River Railway Company;
Brookings & Peach Orchard Railroad Company;
Crossett Railway Company;
Fordyce & Princeton Railroad Company;
Homan & Southeastern Railway Company;
Little Rock, Sheridan & Saline River Railway Company;
L'Anguille River Railway Company;
Ouachita Valley Railroad Company;
Griffin, Magnolia & Western Railway Company;
Saline Bayou Railway Company;
Enterprise Railway Company;

Natchez, Ball & Shreveport Railway Company;
Black Bayou Railroad Company;
The Bodcaw Valley Railway Company;
Mill Creek & Little River Railway & Navigation Company;
Red River & Rocky Mount Railway Company;
Woodworth & Louisiana Central Railway Company;
Freeo Valley Railroad Company;
37 Natchez, Urania & Ruston Railway Company;
Bernice & Northwestern Railway Company;
Dorcheat Valley Railroad Company;
Manghan & Northeastern Railway Company;
Galveston, Beaumont & Northeastern Railway Company;
Peach River & Gulf Railway Company;
Riverside & Gulf Railway Company;
Jefferson & Northwestern Railway Company;
Beaumont & Saratoga Transportation Company;
Angelina & Neches River Railroad Company;
Saginaw & Ouachita River Railroad Company;
Warren, Johnsville & Saline River Railroad Company;
Blytheville, Leachville & Arkansas Southern Railroad Company;
The Caddo & Choctaw Railroad Company;
Manila & Southwestern Railway Company;
Louisiana & Pine Bluff Railway Company;
Mansfield Railway & Transportation Company;
Louisiana & Pacific Railway Company;
Roosevelt & Western Railroad Company;
Tioga & Southeastern Railway Company;
Louisiana Central Railroad Company;
Monroe & Southwestern Railway Company;
Victoria, Fisher & Western Railroad Company;
Ouachita & Northwestern Railroad Company;
Lake Charles Railway & Navigation Company,
Louisiana Railway Company;
Zwolle & Eastern Railway Company;
Sabine & Northern Railroad Company;
Gideon & North Island Railroad Company;
Poplar Bluff & Dan River Railway Company;

that the tracks and equipment with respect to the industry of the several proprietary companies are plant facilities, and that the service performed therewith for the respective proprietary lumber
38 companies in moving logs to their respective mills and performed therewith in moving the products of the mills to the trunk lines is not a service of transportation by a common carrier railroad but is a plant service by a plant facility; and that any allowances or divisions out of the rate on account thereof are unlawful and result in undue and unreasonable preferences and unjust discriminations, as found in the said reports:

3. It is ordered, That the principal defendants, The Chicago, Rock Island & Pacific Railway Company; St. Louis & San Francisco Railroad Company; New Orleans, Texas & Mexico Railroad Com-

pany; Beaumont, Sour Lake & Western Railway Company; St. Louis, Iron Mountain & Southern Railway Company; The Texas & Pacific Railway Company; International & Great Northern Railway Company; The Missouri, Kansas & Texas Railway Company of Texas; St. Louis Southwestern Railway Company; St. Louis Southwestern Railway Company of Texas; The Paragould Southeastern Railway Company; Eastern Texas Railroad Company; The Kansas City Southern Railway Company; Texarkana & Fort Smith Railway Company; The Houston, East & West Texas Railway Company; Texas & New Orleans Railroad Company; Louisiana Western Railroad Company; Morgan's Louisiana & Texas Railroad & Steamship Company; Lake Charles & Northern Railroad Company; Vicksburg, Shreveport & Pacific Railway Company; Louisiana & Arkansas Railway Company; Louisiana Railway & Navigation Company; Gulf, Colorado & Santa Fe Railway Company; The Texas & Gulf Railway Company; Missouri & North Arkansas Railroad Company; Illinois Central Railroad Company; Southern Railway Company; Northern Alabama Railway Company; New Orleans Great Northern Railroad Company; and Mobile & Ohio Railroad Company, be, and they are hereby notified and re-
39 quired to cease and desist, and for a period of two years hereinafter, or until otherwise ordered, to abstain from making any such allowances to any of the above-named parties to the record in respect of any such above-described service.

4. It further appearing, That the following parties to the record, namely:

Little Rock, Maumelle & Western Railroad Company;
Bearden & Ouachita River Railroad Company;
Arkansas Eastern Railroad Company;
Crossett Railway Company;
Fordyce & Princeton Railroad Company;
Ouachita Valley Railway Company;
Freeo Valley Railroad Company;
Dorcheat Valley Railroad Company;
Galveston, Beaumont & Northeastern Railway Company;
Peach River & Gulf Railway Company;
Riverside & Gulf Railway Company;
Angelina & Neches River Railroad Company;
Saginaw & Ouachita River Railroad Company;
Blytheville, Leachville & Arkansas Southern Railroad Company;
The Caddo & Choctaw Railroad Company;
Manila & Southwestern Railway Company;
Louisiana & Pine Bluff Railway Company;
Mansfield Railway & Transportation Company;
Lake Charles Railway & Navigation Company;
Louisiana Railway Company;
Zwolle & Eastern Railway Company;
Gideon & North Island Railroad Company;

have heretofore filed with the Commission their several petitions asking for the establishment or re-establishment of through routes

and joint rates to interstate destinations, which said petitions or complaints are filed on or consoldiated with the record herein and on which a full hearing has been had.

40 5. It is ordered, That said petitions, so far as they relate to rates on the products of the mills of the respective proprietary companies, be, and for the reasons set forth in said reports, they are hereby, dismissed.

6. It further appearing, That the following parties to the record, namely:

Warren & Ouachita Valley Railway Company;
El Dorado & Wesson Railway Company;
Thornton & Alexandria Railway Company;
Fourche River Valley & Indian Territory Railway Company;
Prescott & Northwestern Railroad Company;
Crittenden Railroad Company;
North Louisiana & Gulf Railroad Company;
Arkansas Southeastern Railroad Company;
Red River & Gulf Railroad Company;
Tremont & Gulf Railway Company;
The Nacogdoches & Southeastern Railroad Company;
Texas Southeastern Railroad Company;
Shreveport, Houston & Gulf Railroad Company;
Groveton, Lufkin & Northern Railway Company;
Trinity Valley & Northern Railway Company;
Trinity Valley Southern Railroad Company;
Caro Northern Railway Company;
Butler County Railroad Company;
Deering Southwestern Railway;
Mississippi Valley Railway Company;
Paragould & Memphis Railway Company;

have heretofore filed with the Commission their several petitions asking for the establishment or re-establishment of through routes and joint rates to interstate destinations, which said petitions or complaints are filed on or consolidated with the record herein, and on which a full hearing has been had:

41 7. It is ordered, That the said principal defendants above named be, and they are hereby, required, on or before January 1, 1913, to re-establish, and for a period of two years to maintain with each of the said parties to the record last above named, the through interstate routes and joint rates in effect, in accordance with their respective tariffs filed with this Commission on April 30, 1912;

8. Provided, That the rates on yellow pine lumber and articles taking the same rates from points on the lines of the last above-named parties to the record shall not exceed the current rates in effect from the junction points; and

9. Provided further, That the allowances or divisions out of such joint rates to be paid by said principal defendants, respectively, to the said last-named parties to the record on the products of the mills of the said respective proprietary companies named in said

report shall not exceed the divisions or allowances specified in the aforesaid supplemental report of the Commission, which are hereby fixed as maximum divisions or allowances thereon, until further order, the Commission finding upon the record that any allowances or divisions in excess thereof result in undue preferences and unjust discriminations and are unlawful.

10. It is further ordered, That in the case of the following parties to the record, by which petitions for the establishment or re-establishment of through routes and joint rates have not been filed, namely:

Saline River Railway Company;
Doniphan, Kensett & Searcy Railway;
Memphis, Dallas & Gulf Railroad Company;
De Queen & Eastern Railroad Company;
Central Railway Company of Arkansas;
Gulf & Sabine River Railroad Company;
The Sibley, Lake Bisteneau and Southern Railway Company;
Timpson & Henderson Railway Company;
42 Moscow, Camden & San Augustine Railway Company;
Salem, Winona & Southern Railroad Company;
Fernwood & Gulf Railroad Company;
New Orleans, Natalbany & Natchez Railway Company;
Alabama Central Railroad Company;
Washington & Choctaw Railway Company;

the said principal defendants be, and they are hereby authorized to re-establish the through routes and joint rates in effect, in accordance with their respective tariffs filed with this Commission, on April 30, 1912, subject to the terms and conditions prescribed in paragraphs 8 and 9 hereof; and

Provided further, That upon the failure of the principal defendants to re-establish the through routes and joint rates in effect on April 30, 1912, with the last above-named parties to the record on or before January 1, 1913, the Commission will upon the filing herein of appropriate petitions therefor enter an order upon the record herein requiring the re-establishment of such through routes and joint rates.

11. It is further ordered, That in case of the failure of the principal defendants to re-establish, on or before January 1, 1913, the through routes and joint rates in effect on April 30, 1912 on traffic other than the products of the mills of the respective proprietary companies in the case of any of the parties to the record first herein above named, the Commission will upon appropriate petition herein enter an order requiring the establishment of such through routes and joint rates or enter upon an inquiry with respect thereto.

12. It is further ordered, That the divisions of all joint rates herein required and authorized to be re-established on traffic other than the products of the mills of the several proprietary lumber companies shall be submitted to the Commission by the
43 parties hereto for approval.

13. It is further ordered, That, in the case of the following parties to the record, namely:

Gould Southwestern Railway Company;
Kentwood & Eastern Railway Company;
Kentwood, Greensburg & Southwestern Railroad Company;
Liberty-White Railroad Company;
Natchez, Columbia & Mobile Railroad Company;

for the reasons specified in the said supplemental report no allowances or divisions shall be made on the products of the mills of the respective proprietary lumber companies.

14. And it is further ordered, That the joint rates herein above authorized or required may be published on three days' notice to the public and to the Commission, the tariffs to refer to this order by date and number.

By the Commission.

[SEAL.] JOHN H. MARBLE, *Secretary.*

X.

Your petitioners further state that as a common carrier the Mansfield Railway & Transportation Company became and until midnight of the 30th day of April, 1912, was a party to each and all of the following tariffs applicable on lumber and articles taking lumber rates to the various points in said tariffs mentioned. The lines publishing said tariffs and the lines mentioned and concurring therein constituting with the petitioner Mansfield Railway & Transportation Company, reasonable through routes and said tariffs prescribing reasonable joint through rates between points on the Mansfield Railway & Transportation Company and the several
44 points mentioned in said tariffs, to-wit: Kansas City Southern, I. C. C. Nos. 1722, 2593, 2745, 2824, 2838; Southwestern Lines Bureau Nos. 50-B, I. C. C. 703; Southwestern Lines No. 63, I. C. C. 650; Texas & Pacific, I. C. C. 1857 and Supplement 69 to I. C. C. 1266.

Your petitioners state that the decision or report of the Interstate Commerce Commission, being the decision published in the 17th Interstate Commerce Commission Reports, page 338 et seq., is an erroneous and incorrect statement of the law, and is a misapprehension, misstatement and misapplication of facts insofar as petitioners herein are concerned, and statement in said opinion to the effect

"that any allowance or division made to or with the tapline that is owned or controlled directly or indirectly by the lumber mill or by its officers or board of directors, and that has no traffic beyond the logs that it hauls to the mill, except such as it may pick up as a mere incident to its efforts to serve the mill as an adjunct or plant facility, is an unlawful departure from the published rates"

is not a correct statement of the law, and is an erroneous and illegal holding upon the part of the Interstate Commerce Commission. And the whole of said opinion is an incorrect and improper statement of the facts and the law as applied to these petitioners, and the action of the trunk line railroad companies in August, 1910,

in filing with the Interstate Commerce Commission the schedules stating new, individual or joint rates, fares or charges, applicable upon the articles named therein in excess of the rates, fares and charges theretofore in effect, and in thereby canceling the through routes and joint rates which had theretofore been maintained with the petitioner, Mansfield Railway & Transportation Company, was and is unlawful, in violation of the Interstate Commerce laws of the United States.

That the opinion or report heretofore referred to and published in the 23d Interstate Commerce Commission Reports, at page 277, et seq., is an erroneous and incorrect finding of facts, is a misapprehension and misapplication of the facts as found, is an erroneous and illegal statement of the law, and takes away from these petitioners vested rights guaranteed by law.

That the Interstate Commerce Commission, by its said opinion and report and by its order allowing the cancellation by the trunk lines to become effective on May 1, as provided by the tariffs then on file, and by its supplemental report rendered on the first day of June, 1912, but dated May 14, 1912 and by its orders dated May 14, 1912, and October 30, 1912, herein set out in full, has erroneously, illegally and improperly held that the petitioner Mansfield Railway & Transportation Company, is not a common carrier of logs and lumber and that the service it performs is not a common carrier service when said service is performed in the hauling of logs and lumber and the products of the petitioner Frost-Johnson Lumber Company, and has, by both of its said opinions, to-wit: the opinion dated April 23, 1912, and the opinion dated May 14, 1912, and by its orders dated May 14, 1912, and October 30, 1912, ordered the Texas & Pacific Railway Company and the Kansas City Southern Railway Company to cease and desist for two years from the maintenance of through routes and joint rates on lumber with the petitioner the Mansfield Railway & Transportation Company, and to cease paying any division whatsoever of the rates to the said petitioner upon any traffic transported for the petitioner, Frost-Johnson Lumber Company.

Your petitioners further allege that the Texas & Pacific Railway Company and Kansas City Southern Railway Company did not voluntarily cancel the through rates under and by virtue of the canceling tariffs hereinbefore referred to, but the action of the said Railroad Companies, in that regard was had under the compulsion of the several reports, decisions and orders of the Interstate Commerce Commission hereinbefore referred to, and under the belief induced by said reports, decisions and orders, that if said joint through rates with the petitioner, Mansfield Railway & Transportation Company, were not canceled, that said Railroad Companies, their officers and agents, would be subject to criminal prosecution at the instance of the Interstate Commerce Commission as for alleged rebates and alleged unlawful discrimination.

Your petitioners further allege that the Texas & Pacific Railway Company and Kansas City Southern Railway Company and other common carriers subject to the Act to Regulate Commerce

have for years recognized the petitioner, Mansfield Railway & Transportation Company, as a common carrier in every respect and fully entitled to all the rights and privileges belonging to a common carrier under the law; but for the action of the Interstate Commerce Commission herein complained of would continue to so recognize the said petitioner as a common carrier and would participate with the said petitioner in joint rates upon lumber and forest products and the maintenance of through routes to interstate destinations.

47 XI.

In order that this court may fully have before it all the facts in connection with the creation and operation of the petitioner, Mansfield Railway & Transportation Company, petitioners set forth the following and aver that the same constitutes a full and complete statement of all material facts pertinent to the issues herein.

The Mansfield Railway & Transportation Company was incorporated as a common carrier under the laws of the State of Louisiana in 1881, by various citizens of the City of Mansfield, to build a line of railway connecting the said City of Mansfield with the Texas & Pacific Railway, a distance of two miles from Mansfield, the point of connection with the Texas & Pacific being Mansfield Junction, Louisiana. Several years ago the stock of this railway, together with all its assets was bought by the De Sota Land & Lumber Company. Several years thereafter the stock of the Railway Company was sold to the petitioner, Frost-Johnson Lumber Company and is now owned by said petitioner. At about the same time, E. A. Frost and associates purchased a large boundary of timber and erected a sawmill at Oak Hill, La., near Mansfield. This timber, together with the mill was sold to the De Sota Land & Lumber Company and after being held and operated by it for several years, in the meantime the railroad having been extended eight miles, the entire holding of timber and mill was sold to the Frost-Johnson Lumber Company. While so held by the petitioner, Frost-Johnson Lumber Company, the railroad was further extended to Hunter, La. In the year 1908, the entire line of railroad from Mansfield to Hunter was sold to the petitioner, Mansfield Railway & Transportation
48 Company, and the trackage rights over said railway were conveyed to the petitioner, Frost-Johnson Lumber Company, or its assigns, for logging trains only. The railroad as now constructed is of standard gauge, well graded and laid with steel ranging from fifty-two to sixty pounds per yard. The road has, as a part of its equipment standard railroad track scales. Passengers, mail and express are carried, the express contract being with the Pacific Express Company. Stations are located at Mansfield Junction, Mansfield, Oak Hill, Baker, Burgess and Hunter, La. Agents exclusively in the employment of the railway are located at Hunter and Mansfield, La. At Baker, La., the station service is performed by a Mr. Baker, a merchant at that point. The railway company's general office is located at Mansfield, and all the accounts and operations of the railway company are separate and distinct from the accounts and opera-

tions of the lumber company. The petitioner, Frost-Johnson Lumber Company's plant at Oak Hill is located two and one-half miles from the junction with the Texas & Pacific Railway and three-fourths of a mile from the junction with the Kansas City Southern Railway. The petitioner railway company owns right-of-way and station grounds and also sidings in and around the mill plant of the petitioner, Frost-Johnson Lumber Company. The logging company is a separate corporation whose stock is owned by the petitioner, Frost-Johnson Lumber Company. This logging company cuts the timber, loads the same on the logging car, conveys the logs to the spur and hauls the same to the mill at Oak Hill, where the logs are dumped into the pond of the lumber company. The logging cars and engines belong to the logging company and the expenses
49 of constructing and maintaining the spur tracks which lead from the railway company's tracks into the woods, aggregating about twenty-five miles, is all borne by the logging company. Hunter, the terminus of the main line of the road, has a population of about one hundred people. Here there was a store located prior to the building of the railroad to that point from which the farming community adjacent to that point obtained its supplies and disposed of its products. The construction of the railroad from Oak Hill to Hunter cost about $16,000.00 per mile. Mansfield is the second oldest town in Louisiana and has a population of from twenty-five hundred to three thousand inhabitants. The De Sota Foundry & Machine Company is one of the largest shippers over the line of the petitioner railway company, and operates a plant for the casting of machinery, repairs to locomotives, cars and saw-mill machinery. There is also located at Mansfield the De Sota Cotton Oil Company, which operates a cotton seed oil mill. The Mansfield Hardwood Lumber Company operates a hardwood mill at Mansfield, the logs for which are handled both from Hunter and Mansfield Junction. When brought from Hunter this hardwood log movement is made by the logging company. Part of the hardwood so hauled is owned by the Frost-Johnson Lumber Company, but the larger tonnage from that territory comes from lands not owned by the Frost-Johnson Lumber Company. On the hardwood brought from the Texas & Pacific and Kansas City Southern junctions a switching charge of $1.00 per car is collected from the Hardwood Lumber Company. Equipment used by the petitioner, Mansfield Railway & Transportation Company in the movement of lumber and other traffic is furnished either by the Kansas City Southern or the Texas &
50 Pacific Railways. Petitioner, Mansfield Railway & Transportation Company, takes the empty car from the junction point with said railway companies to the loading point on the line of the petitioner railway and removes the loaded car from said point to the junction point with said railways. Prior to the cancellation of the joint through rates there were in effect milling-in-transit rates applying upon the raw material to the mill and the finished material out. The division ranged from 1c. to 4c., the average being about 2½c. Most of the hardwood lumber was shipped to southern points on which the division averaged 2c. While the logs for either Frost-

Johnson Lumber Company or Mansfield Hardwood Lumber Company are hauled by the logging company under the contract for trackage rights, yet the petitioner, Mansfield Railway & Transportation Company, furnishes the railroad, maintains it in good condition and thereby sustains the greater part of the expense of the movement of the logs from Hunter to Oak Hill. All merchandise or traffic of any and every description destined to the town of Mansfield is hauled by the petitioner, Mansfield Railway & Transportation Company. The railroad is operated as a common carrier and its entire mileage from Mansfield Junction to Hunter is operated as a unit. Petitioner, Mansfield Railway & Transportation Company operates a daily train on regular schedule round trip from Mansfield to Hunter and from Mansfield to Mansfield Junction. Its operation has been without discrimination. No one has been denied any facility ordinarily furnished by common carriers. During the year ending June 30, 1912, the revenue of the petitioner, Mansfield Railway & Transportation Company amounted to $32,690.78. The total operating ex-
51 penses were $24,267.91. Attached hereto, as "Exhibit A," is a statement in detail of the statistics of the petitioner railway, including a comparative general balance sheet between the years ending June 30, 1911, and ending June 30, 1912, together with the traffic and mileage statistics and freight traffic movement by selected commodities which exhibit is prayed to be taken as part hereof as fully as though set out at length herein. A similar statement showing operating revenue and expenses for the period of four months ending October 31, 1912, is attached hereto, as "Exhibit B," and is prayed to be taken as part hereof as fully as though set out at length herein. An examination of these statements show that the petitioner, Frost-Johnson Lumber Company paid of the total revenue during these four months less than 65%, while its tonnage constituted less than 55% of the total tonnage handled by the petitioner, Mansfield Railway & Transportation Company, during the period ending October 31, 1912.

XII.

Your petitioners further state that the statement in the Commission's findings of fact with reference to the petitioner, Mansfield Railway & Transportation Company, on page 588 of 23d volume of Interstate Commerce reports

"the mill is within 300 feet of the right-of-way of the Kansas City Southern, with which it was formerly connected by a spur track that was abandoned and later taken up"

and the statement on page 589 of said volume,

"as stated the spur track of the Kansas City Southern about 300 feet long, which formerly went directly into this mill was torn out; the switching is now done over a track of the tapline
52 three-fourths of a mile long. This arrangement being effected the Kansas City Southern thereupon undertook to pay the tapline allowances of 1c. to 4c. per hundred pounds. We hold this to be a mere manipulation of the situation in

order to establish a relation that is unlawful. The tapline also crosses the right-of-way of the Texas & Pacific within a short distance of the mill, but the lumber is switched by the tapline back toward Mansfield and then to the junction with that line, a distance of about two and one-half miles; the tapline receives from the Texas & Pacific 1c. to 4c. per hundred pounds. In this case we regard any allowance as unlawful"

is a misstatement of fact and the conclusion therein expressed is arbitrary, unreasonable, without any foundation whatever in law and deprives your petitioners of their rights under the Act to Regulate Commerce and the Constitution of the United States. When the Kansas City Southern transported the machinery for the establishment of the mill there was no track leading to Oak Hill, the site of the mill, from any point on the line of petitioner, Mansfield Railway & Transportation Company, and no means of getting delivery of the carload shipments of machinery other than by the installation of a temporary track from the line of the Kansas City Southern Railway. Your petitioners allege that the Kansas City Southern Railway was unwilling to maintain said spur track permanently for the reason that its maintenance and operation at that point constituted an impracticable connection and was a menace to through transportation both passenger and freight, over the main line of the said Kansas City Southern Railway.

53 Your petitioners further allege that it is immaterial as to why said spur track was removed; that at time of the investigation by the Commission and for a long time prior thereto, there had been no connection whatever by rail from Oak Hill with either the Texas & Pacific and Kansas City Southern Railways other than over the rails of the petitioner, Mansfield Railway & Transportation Company.

Your petitioners further allege that the mills of the petitioner, Frost-Johnson Lumber Company, are located upon the rails of the petitioner, Mansfield Railway & Transportation Company, and that the decisions, orders and requirements of the Commission hereinbefore set out deny the petitioner, Frost-Johnson Lumber Company, the right to participate in interstate traffic and to have its products transported upon as favorable conditions as are given to its competitors and constitute a violation of the Act to Regulate Commerce.

Your petitioners further allege that there is no physical connection between the rails of the Texas Pacific Railway Company and the Mansfield Railway & Transportation Company, at any point nearer than Mansfield Junction and that the only possible movement of carload freight is via said Junction.

XIII.

Petitioners further state that upon the finding of facts made by the Interstate Commerce Commission, hereinabove set out, the petitioner, Mansfield Railway & Transportation Company, is a common carrier, performs a common carrier service, and is entitled to participate in through routes and joint rates and to divisions.

54

XIV.

Petitioners further state that the entire opinion, report, finding and order of the Interstate Commerce Commission, made under the caption, Investigation and Suspension Docket No. 11, The Tapline Case, is inconsistent with itself, with the former decisions and reports of the Interstate Commerce Commission, permits and requires discriminations and inequalities, and a compliance with said decisions and requirements compels the railroad companies to violate Section 3 of the Interstate Commerce Act, hereinafter set out. And said decision and orders are in violation of and in conflict with the "Commodities Clause" of Section 1, of said Interstate Commerce Act.

XV.

Your petitioners further allege that said decisions and orders hereinafter set out were made by the said Interstate Commerce Commission as a result of investigation and alleged information furnished by its investigators without any opportunity to these petitioners of cross examination or rebuttal.

XVI.

Your petitioners further allege that said decisions and orders are arbitrary, unreasonable and in excess of the power and authority of the said Commission and constitute violations of Section 3 of the Act which forbids unjust discrimination between persons, localities and traffic. As an instance of the unequal, discriminatory, arbitrary and unreasonable Act of the Commission, petitioner alleges that many of the so-called taplines whose status was determined
55 by the Commission in the decisions and orders hereinbefore set out, were recognized as common carriers of the traffic of the so-called proprietary interests and others denied such a status without any distinction in fact or manner of operation.

XVII.

Further petitioners allege that notwithstanding the Commission established a rule that under Section 15, payment should be made to the shipper when the transportation was not less than 1,000 feet nor more than three miles from the trunk line connections, nevertheless no such allowance was prescribed by the Commission in the case of your petitioners, on the contrary such an allowance is expressly negatived by the Commission.

XVIII.

Your petitioners further allege that other short line railroads mentioned in the decisions and orders above set forth have been by the Commission directed to establish joint rates from points on their lines to interstate destination points, when in fact all the circumstances and conditions which properly may be considered by the Commission in an investigation of this sort require that the petitioners be given joint rates over through routes to interstate destina-

tions. In support of this allegation the petitioners call attention to the findings of the Commission and make said findings part of this report as fully as set forth herein in the following cases:

Fourche River Valley & Indian Territory Railroad Company;
The Nacogdoches & Southeastern Railroad Company;
56 Trinity Valley & Northern Railroad Company;
Butler County Railroad Company;
Red River & Gulf Railroad Company, and others.

XIX.

Your petitioners allege that the Interstate Commerce Commission has no jurisdiction or authority in law to decide that the petitioner, Mansfield Railway & Transportation Company, is not a common carrier in respect to the logs and lumber of the petitioner, Frost-Johnson Lumber Company, which it transports (although holding that it is a common carrier and compelling it to be a common carrier with respect to other tonnage which it hauls), and by so holding and by its order to the trunk line railroad companies to cancel through routes and joint rates and to cease for two years paying divisions to the petitioner, Mansfield Railway & Transportation Company, the Interstate Commerce Commission attempts to nullify state laws and the Interstate Commerce laws and its own rulings and decisions heretofore made; and the decision, in reference to the petitioner, Mansfield Railway & Transportation Company, and the orders of the Interstate Commerce Commission, hereinabove set out, are each and all unlawful, erroneous and invalid.

Your petitioners further state that the Interstate Commerce Commission in holding that the tracks and equipment of the Mansfield Railway & Transportation Company with respect to the industry of the Frost-Johnson Lumber Company are plant facilities and that the service performed therewith for the said Lumber Company in moving logs to its mill and performed therewith in moving the products of the said mills of the Frost-Johnson Lumber Com-
57 pany to the Texas & Pacific Railway Company and the Kansas City Southern Railway Company, is not a service of transportation by a common carrier railroad, but is a plant service by a plant facility, is without any basis in fact or in law. Said finding and conclusion is arbitrary, unreasonable and in volation of the Act to Regulate Commerce and the decisions of the Supreme Court of the United States.

XX.

Your petitioners assert that under the provisions of the Act to Regulate Commerce and the interpretation thereof by the Supreme Court of the United States upon the facts found by the Commission and set forth herein the said petitioner, Mansfield Railway & Transportation Company, is a common carrier by railroad of the logs of the petitioner, Frost-Johnson Lumber Company, in that, it furnishes a railroad and maintains the same in condition for the movement of said logs and is a common carrier of the products of the Frost-Johnson Lumber Company from its mill at Oak Hill to the

junction point with the Texas & Pacific Railway Company and the Kansas City Southern Railway Company, and inasmuch as the larger proportion of the output of said mill of the petitioner, Frost-Johnson Lumber Company, is destined to interstate destinations, the said movement from said Oak Hill to said junction points is a service of transportation by a common carrier railroad in interstate commerce.

XXI.

Your petitioners further state that no part of that portion of the report headed "Irregular Practices of Taplines," found on
58 page 649-650 of the 23d Interstate Commerce Commission Reports, applies in any respect whatsoever to the petitioner, Mansfield Railway & Transportation Company, but that on the contrary said petitioner "files annual reports with the Commission"; said reports "are complete and comply with the requirements of the act"; it does "publish local rates to apply on traffic received from or delivered to its trunk line connections"; it does "charge for carrying passengers and less than carload shipments in all cases, and under authority of published tariffs"; it does not "permit the use by any lumber company of its tracks, without charging therefor," but on the contrary all of its charges and rates "are under tariff authority filed with the Interstate Commerce Commission"; it complies with the "Hours of Service law"; with the "Safety Appliance Act," and all the "other acts imposing requirements on common carriers engaged in interstate commerce."

There is no "lack of attention on the part of the Mansfield Railway & Transportation Company to the rules and regulations respecting the filing of tariffs and keeping of accounts," but on the contrary, said railway company complies strictly with such rules and regulations and pays out large sums of money annually in so doing and in the publishing of tariffs, and its books have always been open and "full access thereto has been given to the examiners of the Interstate Commerce Commission."

Your petitioners allege that if any such failures to comply with the Act to Regulate Commerce exist on the line of the petitioner, Mansfield Railway & Transportation Company, or if any such irregular practices do exist upon the line of the said petitioner
59 it is the duty of the said Interstate Commerce Commission to invoke the curative processes provided for in the act, and petitioner further alleges that such lapses or irregular practices do not constitute any basis for denial to said petitioner and its shippers of the status which the law confers upon it.

XXII.

Petitioners allege that the action of the Texas & Pacific Railway Company and Kansas City Southern Railway Company in filing the schedules hereinbefore referred to, and any and all other schedules filed by said trunk lines which state new, individual or joint rates, fares and charges that are in excess of the rates, fares and charges theretofore in effect, and which in effect cancel the

through routes and joint rates with the petitioner, Mansfield Railway & Transportation Company, and the decisions, orders and requirements of the said Commission hereinbefore set out, are in violation of that portion of Section of the Act to Regulate Commerce, reading as follows:

"It shall be the duty of every carrier subject to the provisions of this act to provide and furnish such transportation upon reasonable request therefor, and to establish through routes and just and reasonable rates applicable thereto; and to provide reasonable facilities for operating such through routes and to make reasonable rules and regulations with respect to the exchange, interchange, and return of cars used therein, and for the operation of such through routes, and providing for reasonable compensation to those entitled thereto.

"All charges made for any service rendered or to be rendered in the transportation of passengers or property * * * or
60 in connection therewith shall be just and reasonable; and every unjust and unreasonable charge for such service, or any part thereof, is prohibited and declared to be unlawful, * * * and it is hereby made the duty of all common carriers subject to the provisions of this act to establish, observe and enforce just and reasonable classifications of property for transportation with reference to which rates, tariffs, regulations or practices are or may be made or prescribed, and just and reasonable regulations and practices affecting classifications, rates or tariffs." * * *

and is in violation of Section 3 of the Interstate Commerce Act, reading as follows:

"That it shall be unlawful for any common carrier subject to the provisions of this act to make or give any undue or unreasonable preference or advantage to any particular person, company, firm, corporation or locality, or any particular description of traffic, in any respect whatsoever, or to subject any particular person, company, firm, corporation or locality, or any particular description of traffic, to any undue or unreasonable prejudice or disadvantage in any respect whatsoever.

"Every common carrier subject to the provisions of this act shall, according to their respective powers, afford all reasonable, proper and equal facilities for the interchange of traffic between their respective lines, and for the receiving, forwarding and delivering of passengers and property to and from their several lines and those connecting therewith, and shall not discriminate in their rates and charges between such connecting lines; but this shall not be construed as requiring any such common carrier to give the use of its tracks or terminal facilities to another carrier engaged in like business."

61 XXIII.

That over 90 per cent of the lumber tonnage handled by the petitioner, Mansfield Railway & Transportation Company is destined to interstate points; that since the first day of May, 1912, the petitioner Mansfield Railway & Transportation Company, has charged and is now charging on lumber destined to interstate points its local

rate from all points of origin to points of connection with said railway companies.

The petitioner, Frost-Johnson Lumber Company, is being, and will continue to be, at a serious disadvantage in regard to other lumber industries in the same territory not on the line of the Mansfield Railway & Transportation Company, because it is compelled to pay on all shipments of lumber destined to interstate points the local rate of the petitioner railway to the junctions with said railroad companies, plus the blanket rate (which petitioners' competitors in said territory now enjoy), from said junctions to final destination of the lumber, the combination of the two rates placing petitioner lumber company at a disadvantage as compared with petitioner's competitors in the same territory enjoying the blanket rate.

Petitioner, Frost-Johnson Lumber Lumber Company, has no competitive rates on interstate lumber traffic, and the absence of through routes and joint rates greatly retards and impairs the business and investments of the petitioner lumber company, and the damages so caused to said petitioner cannot be adequately measured, and constitute irreparable loss.

XXIV.

Your petitioners further allege that in the case of Central
62 Yellow Pine Association v. Vicksburg, Shreveport & Pacific Railroad Company, 10 Interstate Commerce Commission Reports, page 193, the Interstate Commerce Commission held that divisions such as those condemned in the opinions in The Tapline Case were proper, and that, acting under the decision in the said Central Yellow Pine Association case, and other decisions of the Interstate Commerce Commission, and acting under the law of the State of Louisiana, the investments by the petitioners herein mentioned were made; that under the Constitution and Laws of the State of Louisiana the petitioner, Mansfield Railway & Transportation Company, is compelled to operate as a common carrier and its status as a common carrier is fixed by state and federal laws, and the Interstate Commerce Commission is wholly without right or authority of law to deny to the said petitioner, the Mansfield Railway & Transportation Company, the right to operate as a common carrier of all traffic transported, proprietary as well as non-proprietary.

XXV.

Your petitioners aver that the Commission in its finding and in that paragraph of the order which holds that the service performed by the Mansfield Railway & Transportation Company for the petitioner, Frost-Johnson Lumber Company, in moving logs to its mills and in moving the products of the mills to the trunk lines, is not a service of transportation by a common carrier railroad acted erroneously and in violation of the provisions of the Act to Regulate Commerce; your petitioners aver that under the statement of facts contained in the report and opinion of the Commission the
63 said service is in law a service of transportation by a common carrier railroad and that in accordance with the law the peti-

tioner, Mansfield Railway & Transportaion Company, should file tariffs of its charges for said service. Under the report and order of the Commission hereinbefore set out, no tariffs lawfully can be filed covering such movement; that if such movement is transportation, the petitioner, Mansfield Railway & Transportation Company, will be subject to the penalties provided in the statute for failure to file tariffs.

Further your petitioners aver that under the statute no common carrier can engage in interstate commerce until it has first filed tariffs covering the transportation in which it is engaged. Your petitioner, Frost-Johnson Lumber Company, therefore avers that its traffic could not be handled by the petitioner, Mansfield Railway & Transportation Company, because the finding of the Commission that the said movement is not transportation by a common carrier railroad precludes the filing of tariffs. For these reasons the said order is inconsistent with the Act to Regulate Commerce and destroys the rights of the petitioner lumber company, to have the products of its mills moved by the Mansfield Railway & Transportation Company, and prevents the petitioner, Mansfield Railway & Transportation Company, from transporting the said products as a common carrier in interstate commerce.

XXVI.

Your petitioners further allege that from time to time the Interstate Commerce Commission has recommended legislation by the Congress which would make it unlawful for a shipper, or one interested in products transported by rail in interstate com-
64 merce, to be interested financially by stock ownership or otherwise in the railroad so transporting said products; that notwithstanding said recommendations the Congress not only refused to enact such legislation, but in such legislation as was enacted, to-wit: the Commodities Clause and other amendments to the Act to Regulate Commerce, expressly recognized such ownership so that in the present statutes the Congress has legalized the ownership by a railroad company in products transported over its line and the ownership by a shipper in the railroad.

Your petitioners allege that the decision of the Interstate Commerce Commission in the tapline case, hereinbefore set out, is in express violation of the acts of Congress and the legislative intent thereof, as shown by the committee reports and debates in Congress.

Your petitioners further allege that the Commission, in its said decision, has undertaken to make the law what it thinks the law ought to be, instead of following the law as written by Congress.

XXVII.

Petitioners allege that a large portion of the lumber manufactured by the Frost-Johnson Lumber Company, at its mill at Oak Hill, La., is sold by the petitioner, Frost-Johnson Lumber Company, delivered on board cars at its plant and that the purchaser pays the freight charges and is the owner of said lumber from the time it is so loaded by your petitioner and before any movement is performed by the

Mansfield Railway & Transportation Company. Therefore your petitioner alleges that the transportation of said lumber is per-
65 formed by the Mansfield Railway & Transportation Company for the consignee and not for the Frost-Johnson Lumber Company.

Petitioner further alleges that the said order of the Commission unjustly and unlawfully discriminates against and subjects to undue prejudice all purchasers of lumber from the petitioner, Frost-Johnson Lumber Company, in that it compels the said purchasers to pay the local rate upon said lumber to the junction point with the Texas & Pacific or Kansas City Southern Railways and to pay therefrom the blanket rate applicable from all points upon the lines of the Texas & Pacific Railway Company or the Kansas City Southern Railway Company or from points upon short-line railroads recognized by the Commission in its report and decision as common carriers of proprietary traffic, while at the same time for a greater haul under similar circumstances and conditions the competitors of said purchasers may purchase lumber and have it delivered at interstate destinations at a less total cost.

XXVIII.

Your petitioners allege that the said order of the Commission, dated October 30, 1912, by its terms is directed against the Texas & Pacific Railway Company and Kansas City Southern Railway Company, among others; that the petitioners were parties to the proceeding before the Interstate Commerce Commission, out of which the orders, reports and decisions complained of grew; that their rights are vitally affected by said reports, decisions and orders; that the said trunk line railroads, Texas & Pacific Railway Company and Kansas City Southern Railway Company, have profited materially by the aforesaid reports, decisions and orders and will so con-
66 tinue to profit by reason of the fact that the existing lumber rates from the junction point between the petitioner, Mansfield Railway & Transportation Company, and said trunk line companies are the same rates as those which prior to May 1, 1912, applied from Oak Hill on the line of the petitioner, Mansfield Railway & Transportation Company; that therefore your petitioners allege that the said reports, decisions and orders of the said Commission as vitally affect the property rights of the petitioners as if said order was directed against the Mansfield Railway & Transportation Company by name.

XXIX.

Attached hereto, and made a part hereof, marked "Exhibit C," is a map of the lines of the petitioner, Mansfield Railway and Transportation Company, and also the mills of the petitioner, Frost-Johnson Lumber Company, at Oak Hill, La.

The petitioners, and each of them, are remediless, unless relief be given by this court by injunction and by other proper orders and decrees against the orders and requirements made by the Interstate Commerce Commission heretofore pleaded.

XXX.

Wherefore, your petitioners say that the said reports and decisions of the Interstate Commerce Commission, and the orders of date May 14, 1912, and October 30, 1912, made in pursuance of said reports and decisions, are invalid and void for the following, among other, reasons:

(1) The Interstate Commerce Commission is wholly without
67 power, authority or jurisdiction to declare that there is any "proprietary lumber company or companies of the Mansfield Railway & Transportation Company; to declare that the service performed for the Frost-Johnson Lumber Company by the Mansfield Railway & Transportation Company in moving the logs from the forest to the mill of the Frost-Johnson Lumber Company and in moving the product of the Frost-Johnson Lumber Company to the Texas & Pacific Railway Company and Kansas City Southern Railway Company from said mills is a plant service by a plant facility.

(2) The Interstate Commerce Commission is wholly without power, authority or jurisdiction to declare that the transportation offered by the trunk line carriers such as the Texas & Pacific and Kansas City Southern Railway Companies extends three miles distant from the line of such railroads and that an allowance may be made for the movement which is more than 1000 feet from said line and not in excess of three miles from said line of railroad. The said holding is legislation, pure and simple, and the exercise of arbitrary and unreasonable power and constitutes a gross discrimination and violation of the Act to Regulate Commerce.

(3) Said order discriminates against all purchasers of lumber from the Frost-Johnson Lumber Company in that if it should be held that the lumber of said company in the transit from its mill to the junction point with the trunk line company is intrastate commerce subject to the local Louisiana state rate, all purchasers of lumber paying such freight will be compelled to pay the additional amount of such local state rate and will be driven thereby to purchase only from mills situated either upon trunk lines or upon other short lines similarly situated with the Mansfield Railway &
Transportation Company, but which by said order have been
68 allowed to participate in joint rates and through routes, thereby depriving said purchasers of the competition of mills and depriving petitioner, Frost-Johnson Lumber Company, of the competition of purchasers, all of which is contrary to and in violation of Section 3 of the Act to Regulate Commerce.

(4) Said order unduly and illegally discriminates against the Frost-Johnson Lumber Company as shippers as compared with shippers on other railroads within the same territory and competitive in business and discriminates against said lumber company as compared with shippers of lumber now situated or which may hereafter be situated on the line of the Mansfield Railway & Transportation Company.

(5) Said order deprives your petitioners of the through routes and joint rates provided for by Sections 1, 6 and 15 of the Interstate Commerce Act.

(6) The uncontradicted evidence in the proceeding had by the Interstate Commerce Commission under the title, "Investigation and Suspension Docket No. 11," shows that the petitioner, Mansfield Railway & Transportation Company, is a common carrier under the law, and the finding of the Interstate Commerce Commission that the petitioner, Mansfield Railway & Transportation Company, is not a common carrier of proprietary lumber is not based on any substantial testimony.

(7) Under the findings of fact made by the Interstate Commerce Commission, the Mansfield Railway & Transportation Company is a common carrier of lumber of the petitioner, Frost-Johnson Lumber Company, and of all other mills on its line of railway.

(8) The aforesaid decisions, reports and orders of the Interstate Commerce Commission forbid the Texas & Pacific Railway Company and Kansas City Southern Railway Company, in connection with the Mansfield Railway & Transportation Company, to establish any joint rates upon lumber produced by the petitioner, Frost-Johnson Lumber Company, when destined to interstate points, while in effect authorizing the establishment of joint rates upon lumber of any other shipper on the line of the Mansfield Railway & Transportation Company destined to similar points and thereby said order grossly and unjustly discriminates against the petitioner, Frost-Johnson Lumber Company, and subjects said petitioner to undue prejudice and disadvantage.

69

(9) Said order is arbitrary, unreasonable and void and deprives petitioner of the equal protection of the law and due process of the law in that without any just, reasonable or logical reason therefor it prevents petitioner, Mansfield Railway & Transportation Company, from engaging in interstate commerce and receiving any conpensation therefor, while at the same time permitting and requiring other lines of railway similarly situated and which cannot by any just reason be differentiated from the line of your petitioner to engage therein, concur in joint tariffs and through routes and rates and participate in a division thereof.

(10) Said order deprives your petitioner, Mansfield Railway & Transportation Company, of due process of law, deprives it of its property without due process of law, and devotes the same to public use without compensation in that it denies it the right to participate in interstate commerce on the lumber and forest products of the Frost-Johnson Lumber Company and derive revenue therefrom without which it cannot pay operating expenses or earn any just or reasonable return upon the value of its plant.

XXXI.

Wherefore, petitioners, and each of them, pray that the said orders of the Interstate Commerce Commission, dated May 14, 1912, and October 30, 1912, be enjoined, set aside and annulled; that the United States of America, the Interstate Commerce Commission and all persons claiming to act under their authority, direction or control, be temporarily enjoined and restrained from enforcing said order against petitioner, Mansfield Rail-

70

way & Transportation Company, and against said Kansas City Southern Railway Company and said Texas & Pacific Railway Company, or any or either of their connections, and that said Interstate Commerce Commission be ordered and commanded to accept, receive and file tariffs and schedules of rates on all lumber moving out over the line of petitioner, Mansfield Railway & Transportation Company, over the lines of said Kansas City Southern and Texas & Pacific Railway Companies and their connections prescribing and installing joint rates and through routes from points on the line of petitioner, Mansfield Railway & Transportation Company, to all interstate points and on all traffic moving to interstate or to foreign points and enjoining and commanding said Interstate Commerce Commission to refrain from preventing or endeavoring to prevent petitioner, Mansfield Railway & Transportation Company, from agreeing with its said connections, Kansas City Southern Railway Company and the Texas & Pacific Railway Company, on just and reasonable divisions of said through rates.

And your petitioners pray for all other and further relief as in equity and good conscience they may be entitled to receive.

Petitioners pray for issuance of subpœna of the United States of America issuing out of and under the seal of this Honorable
71 Court directed to the United States of America, therein and thereby commanding it on a day certain therein to be named and under certain penalty to be and appear before this Honorable Court then and there to answer, but not under oath, answer under oath being hereby expressly waived, all and singular the premises, and to stand to, perform and abide by such order, direction or decree as may be made in the premises as shall seem meet and agreeable to equity and good conscience, and petitioners pray that on final hearing hereof said injunction be made perpetual, and your petitioners as in duty bound will ever pray.

MANSFIELD RAILWAY & TRANSPORTATION COMPANY,
FROST-JOHNSON LUMBER COMPANY,
By H. M. GARWOOD AND
LUTHER M. WALTER,
Their Solicitors.

72 STATE OF LOUISIANA,
Caddo Parish, ss:

E. A. Frost, being duly sworn on his oath, states that he is the President of the Petitioner, the Mansfield Railway & Transportation Company, and that he is — of the petitioner, Frost-Johnson Lumber Company; that he has read the above and foregoing petition and is familiar with the facts therein stated and that the allegations and averments therein made and contained are true.

——

Subscribed and sworn to before me this — day of January, 1913.

——

Notary Public.

264 In the United States Commerce Court, February Session, 1913.

No. 92.

MANSFIELD RAILWAY & TRANSPORTATION COMPANY and FROST-JOHNSON LUMBER COMPANY, Petitioners,
v.
UNITED STATES OF AMERICA, Respondent.

Motion of the United States to Dismiss the Petition.

(Filed February 8, 1913.)

Comes now the United States of America, respondent, by its counsel, and moves the court to dismiss the above-entitled cause, upon the following grounds, viz:

1. The Commerce Court is without jurisdiction or authority to grant the relief prayed, or any part of the same, because—

(*a*) The order of the Interstate Commerce Commission is negative, in that, in the absence of the Frost-Johnson Lumber Company, which is not a proper party to this proceeding, except on its own motion, any relief granted against the United States would be of no avail to the Mansfield Railway & Transportation Company in restoring the status quo of the parties.

265 (*b*) The order of the Interstate Commerce Commission complained of directed no affirmative relief, and the negative order of the commission affords no basis for any action by the Commerce Court.

(*c*) The same relief which is sought of the Commerce Court was denied by the Interstate Commerce Commission, and the Commerce Court has no power or authority to act for and instead of the said commission.

2. The Commerce Court is without jurisdiction or authority to grant the relief prayed, or any part of the same, because—

(*a*) The Mansfield Railway & Transportation Company is not a common carrier engaged in commerce among the several States.

(*b*) The suit is not one commenced by a common carrier engaged in commerce among the several States, but is commenced in the name and on behalf of the Frost-Johnson Lumber Company, engaged in the manufacture and sale of lumber.

(*c*) The Mansfield Railway & Transportation Company and Frost-Johnson Lumber Company seek to compel the Interstate Commerce Commission to accept, receive, and file tariffs and schedules of rates and charges prescribing through routes and joint rates with the interstate carriers after the commission has negatively ordered otherwise.

(*d*) The said Mansfield Railway & Transportation and Frost-Johnson Lumber Company seek to invoke the jurisdiction of the Commerce Court to entertain a controversy not contemplated

266 by the act to create a Commerce Court, in that the Mansfield Railway & Transportation Company and the United

States are but nominal parties, and the real controversy will be conducted and carried on by, between and in the interest of the said lumber company and certain common carriers subject to the act to regulate commerce.

(e) The power to establish through routes and joint rates under the act to regulate commerce is reposed exclusively in the carriers, and in the event of their failure to agree, exclusively in the Interstate Commerce Commission under section 15 of the said act.

3. The said Mansfield Railway & Transportation Company and Frost-Johnson Lumber Company are and each of them is, without any standing in a court of equity to enjoin, set aside, annul, or suspend the order of the Interstate Commerce Commission, on the ground that the Mansfield Railway & Transportation Company is a common carrier engaged in commerce among the several States; for that if the said Mansfield Railway & Transportation Company is a common carrier engaged in commerce among the several States, then it and the said lumber company, as one and the same enterprise, are unlawfully transporting in interstate commerce commodities manufactured, produced, and otherwise dealt in by them, and in which they have an interest, direct and indirect in violation of section 1 of the act to regulate commerce.

4. The Mansfield Railway & Transportation Company and Frost-Johnson Lumber Company have no standing in a court of
267 equity to maintain an action to enjoin set aside, annul, or suspend the order of the Interstate Commerce Commission, for that the allowances create illegal preferences and discriminations on the part of certain common carriers engaged in commerce among the several States in favor of Frost-Johnson Lumber Company, the principal petitioner, in violation of the act to regulate commerce, approved February 4, 1887, and the various acts amendatory thereof or supplementary thereto, or certain of the provisions thereof.

5. That the incorporation of the Mansfield Railway & Transportation Company, and the use of the same, is a mere device and subterfuge for the purpose of giving the appearance of legality to proposed illegal arrangements between Frost-Johnson Lumber Company and certain common carriers engaged in commerce among the several States, and for the further purpose of covering up the unlawful preferences, discriminations, and rebates growing out of the same.

6. There is a misjoinder of parties because, according to the statute, Frost-Johnson Lumber Company is not a necessary or proper party, or a permissible party, except on its own motion, to this proceeding, and then as intervener only.

7. The petitioners are, and each of them is, estopped from assailing the validity of the order of the Interstate Commerce Commission, as the said order was entered upon the request and with the consent of the said petitioners and each of them.

268 8. The petitioners have not in and by their said petition shown that in making its said order the Interstate Commerce Commission transcended the powers conferred upon it by the statute, or violated any right of petitioners protected by the Con-

stitution of the United States, or any other right of the petitioners over which this court may exercise jurisdiction.

9. The petition is vague, indefinite, uncertain, and insufficient in that it contains much irrelevant and immaterial matter, and abounds in conclusions and assumptions of the pleader without facts to support the same.

10. The said petition is insufficient to set forth a cause of action upon which the court may grant the relief prayed, or any part of the same.

Wherefore, and for divers other good causes appearing from the face of the said petition more fully to be pointed out upon the hearing hereof, this respondent prays that its motion be sustained, and that the said petition be dismissed at the petitioners' cost and that it be not required to make any answer thereto; and for such other and further action as may be appropriate in the premises.

BLACKBURN ESTERLINE,
Special Assistant to the Attorney General.

269 *Journal Entry.*

No. 93.

VICTORIA, FISHER & WESTERN R. R. Co. et al, Petitioners,
vs.
THE UNITED STATES OF AMERICA, Respondent; INTERSTATE COMMERCE COMMISSION et al., Interveners.

Thereupon these causes came on for hearing upon the motion of the United States to dismiss for want of jurisdiction in open court

made, and the arguments of counsel were concluded, Mr. Assistant Attorney General Denison and Mr. Blackburn Esterline appearing on behalf of the United States, Mr. Charles W. Needham on behalf of the Interstate Commerce Commission, Mr. Luther M. Walter and Mr. H. M. Garwood on behalf of the petitioners, Mr. James L. Coleman on behalf of the intervening carriers, and Mr. Wylie M. Barrow on behalf of the Railroad Commission of Louisiana. Thereupon the cause wa staken under advisement by the Court.

270 *Order Denying Motion to Dismiss for Want of Jurisdiction.*

(Entered February 24, 1913.)

United States Commerce Court.

No. 92.

MANSFIELD RAILWAY & TRANSPORTATION COMPANY and FROST-JOHNSON LUMBER COMPANY, Petitioners,

vs.

THE UNITED STATES OF AMERICA, Respondent; INTERSTATE COMMERCE COMMISSION et al., Interveners.

Order.

The above entitled cause came on for hearing before the Court on February 10, 1913, at Washington, D. C., upon the motion of the United States to dismiss for want of jurisdiction in open court made; and the Court having given the arguments of counsel due consideration, now, on this 24th day of February, 1913,—

It is ordered and adjudged that said motion be, and the same is hereby, denied, the Court being of opinion that the order complained of is an order the validity of which this Court has jurisdiction to determine at the suit of the petitioners. The Court, however, in so deciding, in no way passes upon the merits of the case presented by the petition filed.

By the Court:

MARTIN A. KNAPP,
Presiding Judge.

271 In the United States Commerce Court.

No. 92.

MANSFIELD RAILWAY & TRANSPORTATION COMPANY and FROST-JOHNSON LUMBER COMPANY, Petitioners,

v.

UNITED STATES OF AMERICA, Respondent.

Answer of the United States.

(Filed March 18, 1913.)

The United States of America, respondent, not waiving its motion to dismiss the above-entitled cause for want of jurisdiction of the

court over the subject matter, but still insisting upon its said motion and each and every part of the same, and still protesting against the court entertaining jurisdiction over the subject matter now and at all times hereafter, and answering the said petition under protest;

The United States of America, respondent, now at all time hereafter saving to itself any and all manner of benefit and advantage of exceptions or otherwise that can or may be had or taken to the many errors, uncertainties, and imperfections in said petition contained, for answer thereto or to so much thereof as this respondent is advised it is material or necessary for it to make answer, answers and says:

I. It admits—

(*a*) The allegations of Paragraph III of the petition;

272 (*b*) The Commission made and entered the orders of September 3, 1910, and January 16, 1912, referred to in Paragraph V of the petition;

(*c*) The Commission made and entered the order of November 15, 1910, referred to in Paragraph VI, page 13, of the petition;

(*d*) The making and filing by the Commission on April 29, 1912, of Report No. 1853, entitled "Investigation and Suspension Docket No. 11, The Tap Line Case," referred to in Paragraph VI, page 15, of the petition;

(*e*) The making and filing by the Commission on May 14, 1912, of Supplemental Report No. 1898, entitled "Investigation and Suspension Docket No. 11, The Tap Line Case," referred to in Paragraph VI, page 17, of the petition, parts of which are set out on pages 17 to 21, inclusive, of the petition;

(*f*) The Commission made and entered the order of May 14, 1912, referred to on pages 21 to 27, inclusive, of the petition;

(*g*) The filing with the Commission of the petition referred to in Paragraph VIII of the petition, at pages 28 to 35, inclusive; and

(*h*) The Commission made and entered the amended order of October 30, 1912, referred to in Paragraph IX of the petition, at pages 35 to 43, inclusive.

II. It admits—

(*a*) Mansfield Railway & Transportation Company is a corporation;

273 (*b*) Frost-Johnson Lumber Company is a corporation.

III. Mansfield Railway & Transportation Company and Frost-Johnson Lumber Company are two interlocking corporations with a common ownership, control, and management, operating in the State of Louisiana, with headquarters in a single office. Texas & Pacific Railway Company and Kansas City Southern Railway Company are corporations and common carriers by railroad engaged in interstate commerce and serve the petitioners in the transportation of lumber. When Mansfield Railway & Transportation Company was organized, it owned and operated but 2 miles of track, extending from the town of Mansfield to a connection with the Texas & Pacific Railway Company at a point known as Mansfield Junction. From time to time Frost-Johnson Lumber Company laid additional tracks in and about its mills for the shifting and handling of its logs and lumber and turned the same over to Mansfield Railway &

Transportation Company for nominal considerations, the business of the said two petitioners being all the time conducted as one. In so doing, and through other various schemes and devices, the stockholders and officers of the petitioners have sought to clothe Mansfield Railway & Transportation Company with the rights and obligations of a common carrier with trunk-line connections. After so manipulating the said plant facilities and making connections with Texas & Pacific Railway Company and Kansas City Southern
274 Railway Company, and creating competition between them for the heavy traffic of Frost-Johnson Lumber Company, it and Mansfield Railway & Transportation Company with the power wielded by them in the control of the heavy traffic, are enabled to and do hammer the two competing trunk lines for allowances or divisions; by reason thereof, the petitioners are enabled to secure, and they have secured, excessive allowances and divisions from the said two trunk lines named, which are illegal rebates to Frost-Johnson Lumber Company and its stockholders, and departures from the published tariffs, and illegal preferences and discriminations forbidden by the provisions of the act to regulate commerce, approved February 4, 1887, and the various acts amendatory thereof and supplementary thereto. The said two interlocking petitioners, under the common ownership, control, and management, are so operated for the double purpose of (*a*) controlling the traffic and dictating the allowances and divisions to them for the traffic which they furnish, and (*b*) giving color of legality to the unlawful arrangements between the said two railroad companies and the petitioners.

IV. The matters and things heard and determined by the Interstate Commerce Commission were within its power and authority to hear and determine under the provisions of the act to regulate commerce, and in its reports in writing with respect thereto, made after a full hearing and due notice to all the parties, which state its conclusions, together with its decision, order, or requirement in
275 the premises, the matters and things of which complaint is made were fully covered and foreclosed by findings of fact.

V. Further answering the said petition and each and every part of the same in so far as it has not heretofore been admitted, denied, or otherwise traversed, this respondent denies any fact or facts alleged in said petition or any part of the same which deny or which seek to deny any fact or facts found by the Interstate Commerce Commission in its said reports and order; and denies any fact or facts alleged in said petition or any part of the same which are inconsistent with any fact or facts found by the Interstate Commerce Commission in its said reports and order; and denies any and all inferences of fact from any particular fact or facts alleged in the said petition or any part of the same which seek to deny or which are inconsistent with any fact or facts found by the Interstate Commerce Commission in its said reports and order; and denies any fact or facts alleged in said petition or any part of the same which set up or which seek to set up matters and things which were not before the Interstate Commerce Commission or which are not referred to in its said reports and order; and denies any fact or facts alleged in said petition or any part of the same which attack or which seek to

attack the reports and order of the Interstate Commerce Commission and to show facts differently from what the said reports and order show on the face thereof; and denies any allegations
276 in said petition or any part of the same which allege that facts were found by the Interstate Commerce Commission in its said reports and order which, as shown on the face thereof, in fact were not so found; and denies any conclusions of law alleged and insisted upon in the said petition or any part of the same which are inconsistent with any conclusions of law held by the Interstate Commerce Commission in its said reports and order.

And this respondent now gives notice that upon the final hearing hereof, and in accordance with section 1 of the act entitled "An act to create a Commerce Court," etc., approved June 18, 1910, it will move to dismiss the petition, for that the same is insufficient to state any cause of action against the said respondent and will renew and urge in support thereof the grounds of its written motion already filed in that behalf.

Wherefore, having fully answered, respondent prays that the petition be dismissed at the cost of the petitioners, and for such other and further order as may be appropriate in the premises.

BLACKBURN ESTERLINE,
Special Assistant to the Attorney General.

March, 1913.

277 In the United States Commerce Court.

No. 92.

MANSFIELD RAILWAY & TRANSPORTATION COMPANY and FROST-JOHNSON LUMBER COMPANY, Petitioners,
v.
THE UNITED STATES OF AMERICA, Respondent.

Answer of the Interstate Commerce Commission.

(Filed February 8, 1913.)

The Interstate Commerce Commission, intervening respondent in the above-entitled cause, now and at all times saving and reserving to itself all and all manner of benefit and advantage of exception to the many errors and insufficiencies in the petitioners' petition contained, for answer thereunto, or unto so much or such parts thereof as this respondent is advised is material for it to make answer unto, answering says:

I.

That this court has no jurisdiction of the controversy, matters and things respectively set forth in said petition, nor does
278 it possess general equity jurisdiction to grant the relief, or any part thereof, prayed for.

II.

This respondent admits that it made and entered the order set forth in said petition bearing date September 3, 1910, In the Matter of the Investigation and Suspension of Supplement No. 3 to I. C. C. No. 23; that it made and entered the order of January 16, 1912, set forth in said petition. It admits and alleges that after due and full hearing, as required by the statute, it made and filed in the proceeding known as Investigation and Suspension Docket No. 11, its original report, under date, April 23, 1912, which report is set forth in volume 23 of its printed reports (I. C. C. Rep.) beginning at page 277, and thereafter—May 14, 1912—it made and filed the supplemental report set forth in said petition and in said volume 23 (I. C. C. Rep.) beginning at page 549; that on the 14th day of May, 1912, it made and entered the order in said matter set forth in said petition.

This respondent admits the filing of the petition by L. M. Walter, attorney for petitioners, as set forth in said petition, and that thereafter, on October 30, 1912, this respondent, at the request of said petitioners, made and entered the amended order set forth in said petition. This respondent admits that it made the decision and report referred to in said petition and reported in its published reports, volume 17 (I. C. C. Rep.), beginning at page 338;
279 and this respondent admits that the trunk lines, so called in said petition, withdrew their tariffs and filed new tariffs at the times, and substantially in form as stated in said petition.

III.

This respondent neither admits nor denies the particular matters and things set forth in said petition regarding the organization of the several petitioning companies, and the several stockholdings set forth in said petition, nor has it any knowledge regarding the business and the amount thereof of the several petitioners or of either of them, excepting as the facts relevant and pertinent to the issue were proved in the said proceedings and matters before this respondent, in which matters the said reports and orders of this respondent were entered; and this respondent avers that the facts presented to and the conclusions reached thereon by this respondent in said investigation (I. and S. D. No. 11), regarding the said allegations contained in the petition herein, are set forth in the original report thereof, appearing in volume 23 of this respondent's published reports (I. C. C. Rep.), begining at page 277, and in the supplemental report in said investigation reported in said volume 23, beginning at page 549, and in the several orders entered thereon; and this respondent makes said original and supplemental reports and each of them, and the orders entered thereon, a part of this answer for and as its statement of the facts in this controversy; and respondent begs leave to make the same use of said pub-
280 lished reports in its defense herein as it could make if the original and supplemental reports and said orders respectively were each set forth in full in this answer.

IV.

This respondent denies each and every allegation in said petition which in effect or by inference alleges that this respondent in the matters aforesaid erroneously determined or decided any questions of law, or that it acted in any respect arbitrarily, or that this respondent in making said orders, or either of them, herein complained of, acted without substantial evidence produced at said hearing to support the same, or that in the making and enforcement of said orders, herein complained of, or either of them, the petitioners, or either of them, have suffered or will suffer any violation or infraction of their constitutional rights or privileges.

This respondent denies each and every allegation in said petition not herein expressly admitted, or which is contrary to the — or any facts stated in this answer or in respondent's said original or supplemental reports or orders.

All of which matters and things this respondent is ready to aver, maintain, and prove as this honorable court shall direct, and prays the same advantage as to each and all the matters and things aforesaid as this respondent would be entitled to if the same were specially pleaded, or set forth by way of demurrer, or motion to dismiss the petition.

281 And having fully answered said petition, this respondent prays to be hence dismissed with its reasonable costs and charges in its behalf sustained.

INTERSTATE COMMERCE COMMISSION,
By CHARLES W. NEEDHAM, *Its Solicitor.*

CITY OF WASHINGTON,
District of Columbia, ss:

James S. Harlan, being duly sworn, deposes and says that he is a member of the Interstate Commerce Commission, the above-entitled respondent, and makes this affidavit on behalf of said commission; that he has read the foregoing answer and knows the contents thereof, and that the same is true as to the matters within the knowledge of the commission, and as to the other matters he believes it to be true.

JAMES S. HARLAN.

Subscribed and sworn to before me, Geo. F. Graham, a notary public within and for the District of Columbia, this 8th day of February, 1913.

[SEAL.] GEO. F. GRAHAM,
Notary Public.

282 *Petition of A., T. & S. F. Ry. Co. et al. for Leave to Intervene.*

(Filed February 10, 1913.)

In the United States Commerce Court.

No. 92.

MANSFIELD RAILWAY & TRANSPORTATION COMPANY et al., Petitioners,

v.

THE UNITED STATES OF AMERICA, Respondent.

Petition for Leave to Intervene.

Come now The Atchison, Topeka & Santa Fe Railway Company and the Gulf, Colorado & Santa Fe Railway Company, and say that they were parties to the original proceedings before the Interstate Commerce Commission, out of which the above entitled litigation springs, and that they are interested directly and financially in any disposition of this cause, and therefore they ask an order allowing them to intervene and to be heard in all proceedings in said cause, and to have the benefit of all orders and decrees that may be entered herein.

Your intervening petitioners further state that they are common carriers by railroad with rails extending from extensive lumber producing territory to various markets; that the milling industries located upon the railroads of intervening petitioners are competitors with the milling industries located upon the line of petitioners; that the through rates applying for the carriage of lumber from the industries located upon the lines of intervening petitioners and the milling industries located upon the lines of petitioners are known as the blanket system of rates.

283 Your intervening petitioners further state that they make no allowance or division of through rates to tap lines or to milling industries on the lines of intervening petitioners, and as a result the milling industries located upon the lines of intervening petitioners are required to pay in full the lawfully published tariff rate on lumber. Your intervening petitioners further state that the allowance to said petitioners of a division of the through rate will give said petitioners an undue advantage over the milling industries located upon the lines of intervening petitioners, and will constitute an unjust discrimination against such milling industries located upon the lines of intervening petitioners, and will be in violation of the Interstate Commerce law.

Your intervening petitioners further state that any allowance to the petitioners herein will not be in truth an allowance to a railroad for the service of transportation of lumber but on the contrary will be an allowance to the milling industry for an operation incident to the manufacture of lumber, and will constitute a device

for the payment of a rebate to a shipper, in violation of the Interstate Commerce Law.

THE ATCHISON, TOPEKA AND SANTA FE RAILWAY COMPANY,
GULF, COLORADO AND SANTA FE RAILWAY COMPANY,

No. 92.

MANSFIELD RAILWAY AND TRANSPORTATION COMPANY et al.
vs.
UNITED STATES OF AMERICA et al.

Order of Intervention.

(Entered February 10, 1913.)

The Atchison, Topeka & Santa Fe Railway Company, and Gulf, Colorado and Santa Fe Railway Company having filed and presented their petition for intervention herein and it appearing to the Court from the said petition that the petitioners have shown that they have sufficient interest in the proceedings herein to entitle them to intervene and be heard by their counsel:

It is ordered, That The Atchison, Topeka and Santa Fe Railway Company and Gulf, Colorado and Santa Fe Railway Company be and they are hereby allowed to intervene and become parties intervener and to be heard by their counsel in all the proceedings had and taken in the above entitled cause, the Court reserving the right at all times hereafter to enter such other and further order or orders concerning the right of the said interveners to appear and be heard herein, and to enter such rule or rules concerning the pleadings of the said interveners and their course of procedure, as to the court shall seem wise and proper.

By the Court:

MARTIN A. KNAPP,
Presiding Judge.

No. 92.

MANSFIELD RAILWAY & TRANSPORTATION COMPANY and FROST-JOHNSON LUMBER COMPANY, Petitioners,
vs.
THE UNITED STATES OF AMERICA, Respondent.

Reply to Intervening Petition of the Atchison, Topeka and Santa Fe Railway, and Gulf, Colorado and Santa Fe Railway Company.

(Filed February 26, 1913.)

Comes now the Mansfield Railway & Transportation Company and Frost-Johnson Lumber Company, Petitioners herein, and ask leave of the Court to file this, their reply to the petition of intervention filed herein by The Atchison, Topeka & Santa Fe Railway Company and Gulf, Colorado & Santa Fe Railway Company.

Petitioners admit that intervenors were parties to the original proceeding before the Interstate Commerce Commission, out of which the above entitled suit originated.

286 Petitioners further admit that the intervenors are "interested directly and financially in any disposition of this cause." Petitioners further admit that intervenors are common carriers by railroad, with rails extending from "extensive lumber producing territory to various markets"; that the milling industries located upon the lines of intervenors are competitors with the milling industries located upon the line of the petitioner, Mansfield Railway & Transportation Company; that the through rates applying for the carriage of lumber from the industries located upon the lines of intervenors is known as the blanket system of rates, but these petitioners deny that the rates applying for the carriage of lumber from points upon the line of the petitioner, Mansfield Railway & Transportation Company, is the joint rate commonly known as the blanket rate from the yellow pine producing territory. On the contrary, these petitioners aver that milling industries such as the petitioner, Frost-Johnson Lumber Company, are compelled to pay the blanket rate from the junction point with the trunk lines to consuming territory, plus the local charge of the petitioner, Mansfield Railway & Transportation Company, from the mill to such junction point.

Petitioners further allege that while the intervenors may compel their shippers to pay in full the lawfully published tariff rate on lumber and may make no allowance or division of through rates to tap-lines or milling industries, petitioners aver that the intervenors make concessions, or other arrangements, whereby an undue preference is accorded many shippers from points upon the lines of intervenors as compared with the petitioner, Frost-Johnson

287 Lumber Company, as will more particularly appear herein.

Petitioners deny that any allowance to the petitioner,

Mansfield Railway & Transportation Company, out of the joint through rates, will give these petitioners any undue advantage over milling industries located upon the lines of the intervenors or that such allowance will constitute any unjust discrimination, or otherwise be any violation of the Interstate Commerce law. Your petitioners further deny that such an allowance to the Mansfield Railway & Transportation Company is, or will be, any allowance to the milling industries of the petitioner, Frost-Johnson Lumber Company. On the contrary, these petitioners assert that the service performed by the Mansfield Railway & Transportation Company in moving lumber from the plant of the Frost-Johnson Lumber Company to the Kansas City Southern Railway or the Texas & Pacific Railway is a service of transportation within the meaning of the Act to Regulate Commerce.

Petitioners deny that any allowance to the petitioner, Mansfield Railway & Transportation Company, out of the joint rate, in any way constitutes a device for the payment of a rebate to a shipper, or is otherwise any violation of the Interstate Commerce Law.

Your petitioners affirmatively show unto this honorable court that the intervenors, about the year 1902, purchased from John H. Kirby and his associates two short-line railways, to-wit: the Gulf, Beaumont & Kansas City and the Gulf, Beaumont & Great Northern, both of which railways penetrated the most productive
288 yellow pine territory in Texas. At that time, the said Kirby and his associates were large holders of yellow pine timber lands; that about the same time these intervenors made a contract with said Kirby by which said intervenors agreed, so far as they lawfully could do so, to cancel all through rates on lumber with all of their railway connections, both trunk lines and short lines. Shortly thereafter the said Kirby and his associates organized the Kirby Lumber Company and the Houston Oil Company, both corporations of the State of Texas. Your petitioners aver that it appeared before the Interstate Commerce Commission in the record in the so-called tap-line case that the said Kirby and his associates, through said corporations and their personal holdings, obtained the control of approximately nine hundred thousand acres of yellow pine timber land. The purpose of said Kirby and his associates was shown to be to obtain the practical control of all yellow pine producing territory in southeastern Texas and southwestern Louisiana.

Petitioners further aver that it appeared in evidence before the said Commission that the lands of the Kirby Lumber Company and of John H. Kirby passed into the hands of intervenor, Atchison, Topeka & Santa Fe Railway Company, which now holds a legal title to said lands, the said Kirby holding an option to re-purchase the same. It further was shown to the said Commission that these lands are held for the intervenor, Atchison, Topeka & Santa Fe Railway Company under the name of J. R. Chapman.

289 Petitioners further allege that it was shown to the said Commission in said hearing that the intervenor, Atchison, Topeka & Santa Fe Railway Company, acquired through the in-

strumentality of said Kirby, a vast body of lands in the same territory, known as the "Kountze lands," consisting of one hundred and eighty-seven thousand acres of yellow pine timber. Through an operating contract with the Kirby Lumber Company the timber output of the Houston Oil Company lands is manufactured and controlled by said Kirby Lumber Company.

Petitioners allege that these entire holdings, most of which are immediately adjacent and tributary to the east Texas lines of intervenors, comprise one million and eighty-seven thousand acres, and are generally estimated to contain about eight billion feet of lumber. The Bureau of Corporations of the United States, in its recent report, Senate Document No. 818, estimates privately owned timber in the State of Texas to amount to sixty-six billion feet. It therefore appears that practically one-eighth of the yellow pine timber of Texas is controlled by intervenors.

Petitioners further allege that it was shown to the Interstate Commerce Commission that the Kirby Lumber Company operates thirteen mills, all of which, with one or two exceptions, are located upon the lines of intervenors and all the tonnage produced from the aforesaid holdings by the Kirby Lumber Company east of the Neches River, is tied by contracts to the intervenors.

290 Prior to the hearing before the Commission, and subsequent to the year 1902, intervenors, or persons acting for them, organized the Southwestern Lumber Company, a corporation of the State of Texas, and sold to the Industrial Lumber Company sixty-five thousand acres for an approximate consideration of Three Million Dollars, the deferred payments upon which bore interest at the rate of four and one-half per cent. per annum (the current rate of interest at the time of the transaction being from six to eight per cent.).

Petitioners allege that the Kirby Lumber Company and Industrial Lumber Company were parties to the proceeding before the Commission in which the order complained of by petitioners was made.

Petitioners allege that it was shown to the said Commission that the expenditures incident to the acquisition of the said immense timber holdings by the intervenors in southeastern Texas and southwestern Louisiana approximated eight million dollars.

Petitioners allege that the contract above mentioned between intervenors and said John H. Kirby was intended to, and did, give the said Kirby and his associates an undue and unlawful advantage in marketing yellow pine lumber over the lines of the intervenors.

Petitioners allege that there was filed before the Interstate Commerce Commission in the said tap-line record, a copy of an answer filed by the said Kirby and the Kirby Lumber Company in the Circuit Court of the United States for the Southern District of Texas in the case of Maryland Trust Company, trustee, vs. Kirby

291 Lumber Company and Houston Oil Company, wherein it appeared, in the thirteenth paragraph, that

"said Atchison & Santa Fe Railroad, under said contract with said Kirby, of which said Kirby Lumber Company is a beneficiary, had

canceled all through and joint rates on lumber with connecting lines, thereby giving the lumber manufacturers located along the lines of said Atchison Railroad an advantage in freight rates in reaching all points located on the line of the said Atchison Railroad system."

The paragraph further provides that

"(it) would give said Kirby Lumber Company an advantage of about one dollar per thousand feet over and above what its competitors, located on other lines of railway, could realize from the shipments to points reached by said Atchison Railroad, and this for the reason that said Atchison & Santa Fe Railroad, under said contract with said Kirby, of which said Kirby Lumber Company is a beneficiary, had canceled all through and joint rates on lumber with the connecting lines, thereby giving the lumber manufacturers located along the lines of said Atchison Railroad an advantage in freight rates in reaching all points located on the line of the said Atchison Railroad system."

As disclosed by the thirteenth, fourteenth and fifteenth paragraphs of said answer, it was the purpose at that time of the Kirby Lumber Company to acquire the Kountze lands above referred to, which the intervenors subsequently acquired as above stated; and it is alleged in the fourteenth paragraph of said answer

"That the arrangement herein stated, between said Kirby
292 and said Atchison, Topeka & Santa Fe Railroad, of which said defendant Kirby Lumber Company is a beneficiary, is not, and under the law could not be, exclusively for his benefit, but would apply equally to all shippers along the lines of the Gulf, Colorado & Santa Fe Railway Company; that if said Houston Oil Company of Texas acquired said Kountze lands, then there would be no other large bodies of lands along the lines of said Atchison Railroad not owned by either said Houston Oil Company of Texas or said Kirby Lumber Company, to tempt competitors, wherefore such regulation by said Atchison Railroad would practically result in said Kirby Lumber Company being the sole beneficiary thereof."

Petitioners further allege that the only complaining parties against tap-line allowances in the hearing before the Commission were the Kirby Lumber Company, the Miller Link Company, the Industrial Lumber Company, the Lutcher-Moore Lumber Company, Alexander-Miller Company and Ludington, Wells & VanShaick Lumber Company, all of which, with the exception of the Lutcher-Moore and Miller Link Companies, were directly tributary to the lines of the intervenors herein. It appeared before the Commission that the Southwestern Lumber Company, of which President E. P. Ripley of the intervenors and his associates were the officers, sold to the Industrial Lumber Company sixty-five thousand acres of pine land for approximately three million dollars, and at the time of the taking of the testimony before the Commission about two and one-half million dollars was still unpaid and drawing interest at four and one-half per cent. per annum, while the current rate
293 of interest, which your petitioners pay, was from six to eight per cent.

It appears from the published reports of the Interstate Commerce Commission that the said intervenors did cancel, or cause to be canceled, joint rates from points on their lines to points on other lines of railroad in large lumber consuming territory of the United States. In the original Star Grain case through rates were ordered by the Commission via the St. Louis Southwestern Railway Company and the intervenors.

Petitioners, in view of the foregoing and upon information and belief, allege that the intervenors have stirred up and instigated litigation before the Interstate Commerce Commission and are participating herein for the sole purpose of monopolizing the transportation and trade in yellow pine lumber between points upon its line. Petitioners further allege that intervenors have in control and operation to-lay a mill at Merryville, in the State of Louisiana, whose product is shipped to various points in the United States and is in competition with the lumber produced by the petitioner, Frost-Johnson Lumber Company.

Your petitioners further allege that the order complained of by petitioners herein, if allowed to remain effective, will make it easier for the intervenors to succeed in their plans to monopolize the aforesaid trade and transportation in yellow pine lumber.

Your petitioners therefore say that the aforesaid facts
293½ abundantly show that the order of the Commission constitutes an unjust discrimination and undue preference in violation of the Act to Regulate Commerce and should be enjoined and set aside.

Your petitioners therefore pray as in the original petition.

MANSFIELD RAILWAY & TRANSPORTATION COMPANY,
FROST-JOHNSON LUMBER COMPANY,
By H. M. GARWOOD AND
LUTHER M. WALTER,
Their Solicitors.

294 In the United States Commerce Court.

No. 92.

MANSFIELD RAILWAY & TRANSPORTATION COMPANY et al., Petitioners,
vs.
THE UNITED STATES OF AMERICA et al., Respondents; THE ATCHISON, Topeka and Santa Fe Railway Company and Gulf, Colorado and Santa Fe Railway Company, Intervening Petitioners.

Motion of the Atchison, Topeka and Santa Fe Railway Company and Gulf, Colorado and Santa Fe Railway Company to Strike Out Certain Scandalous, Impertinent and Irrelevant Matter Contained in the Reply of the Mansfield Railway and Transportation Company and Frost-Johnson Lumber Company, and Suggestions in Support of said Motion.

(Filed March 8, 1913.)

Come now The Atchison, Topeka and Santa Fe Railroad Company and the Gulf, Colorado and Santa Fe Railway Company, Intervening Petitioners herein, and respectfully move the court to strike from the reply of the Mansfield Railway and Transportation Company and Frost-Johnson Lumber Company, Petitioners, to the intervening petition of The Atchison, Topeka and Santa Fe Rail-
295 way Company and the Gulf, Colorado and Santa Fe Railway Company the following, on the ground that the same is scandalous, impertinent and irrelevant:

"Petitioners further allege that while the intervenors may compel their shippers to pay in full the lawfully published tariff rate on lumber and may make no allowance or division of through rates to tap-lines or milling industries, petitioners aver that the intervenors make concessions, or other arrangements, whereby an undue preference is accorded many shippers from points upon the lines of intervenors as compared with the petitioner, Frost-Johnson Lumber Company, as will more particularly appear herein."

(The above being contained on page 2 of said reply.)

"Your petitioners affirmatively show unto this honorable court that the intervenors, about the year 1902, purchased from John H. Kirby and his associates two short-line railways, to-wit: the Gulf, Beaumont & Kansas City and the Gulf, Beaumont & Great Northern, both of which railways penetrated the most productive yellow pine territory in Texas. At that time, the said Kirby and his associates were large holders of yellow pine timber lands; that about the same time these intervenors made a contract with said Kirby by which said intervenors agreed, so far as they lawfully could do so, to cancel all through rates on lumber with all of their railway connections, both trunk lines and short lines. Shortly thereafter the said Kirby and his associates organized the Kirby Lumber Company and the

Houston Oil Company, both corporations of the state of Texas. Your petitioners aver that it appeared before the Interstate Commerce Commission in the record in the so-called tap-line case that the said Kirby and his associates, through said corporations and their personal holdings, obtained the control of approximately nine hundred thousand acres of yellow pine timber land. The purpose of said Kirby and his associates was shown to be to obtain the practical control of all yellow pine producing territory in southeastern Texas and southwestern Louisiana.

296 Petitioners further aver that it appeared in evidence before the said Commission that the lands of the Kirby Lumber Company and of John H. Kirby passed into the hands of intervenor, Atchison, Topeka & Santa Fe Railway Company, which now holds a legal title to said lands, the said Kirby holding an option to repurchase the same. It further was shown to the said Commission that these lands are held for the intervenor, Atchison, Topeka & Santa Fe Railway Company under the name of J. R. Chapman.

Petitioners further allege that it was shown to the said Commission in said hearing that the intervenor, Atchison, Topeka & Santa Fe Railway Company, acquired through the instrumentality of said Kirby, a vast body of lands in the same territory, known as the "Kountze lands," consisting of one hundred and eighty-seven thousand acres of yellow pine timber. Through an operating contract with the Kirby Lumber Company the timber output of the Houston Oil Company lands is manufactured and controlled by said Kirby Lumber Company.

Petitioners allege that these entire holdings, most of which are immediately adjacent and tributary to the east Texas lines of intervenors, comprise one million and eighty-seven thousand acres, and are generally estimated to contain about eight billion feet of lumber. The Bureau of Corporations of the United States, in its recent report, Senate Document No. 818, estimates privately owned timber in the State of Texas to amount to sixty-six billion feet. It therefore appears that practically one-eighth of the yellow pine timber of Texas is controlled by intervenors.

Petitioners further allege that it was shown to the Interstate Commerce Commission that the Kirby Lumber Company operates thirteen mills, all of which, with one or two exceptions, are located upon the lines of intervenors and all the tonnage produced from the aforesaid holdings by the Kirby Lumber Company east of the Neches River, is tied by contracts to the intervenors.

297 Prior to the hearing before the Commission, and subsequent to the year 1902, intervenors, or persons acting for them, organized the Southwestern Lumber Company, a corporation of the State of Texas, and sold to the Industrial Lumber Company sixty-five thousand acres for an approximate consideration of Three Million Dollars, the deferred payments upon which bore interest at the rate of four and one-half per cent. per annum (the current rate of interest at the time of the transaction being from six to eight per cent.).

Petitioners allege that the Kirby Lumber Company and Industrial Lumber Company were parties to the proceeding before the

Commission in which the order complained of by petitioners was made.

Petitioners allege that it was shown to the said Commission that the expenditures incident to the acquisition of the said immense timber holdings by the intervenors in southeastern Texas and southwestern Louisiana approximated eight million dollars.
